Notes to Financial Statements	3 - 14

**Report of Independent Registered Public Accounting Firm**

To the Sole Member of Sea Otter Securities Group, LLC

**Opinion on the Financial Statement**

We have audited the accompanying statement of financial condition of Sea Otter Securities Group, LLC as of March 31, 2021, and the related notes (collectively referred to as the financial statement). In our opinion, the statement of financial condition presents fairly, in all material respects, the financial position of Sea Otter Securities Group, LLC as of March 31, 2021 in conformity with accounting principles generally accepted in the United States of America.

**Basis for Opinion**

This financial statement is the responsibility of Sea Otter Securities Group, LLC's management. Our responsibility is to express an opinion on Sea Otter Securities Group, LLC's financial statement based on our audit. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to Sea Otter Securities Group, LLC in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statement is free of material misstatement, whether due to error or fraud. Our audit included performing procedures to assess the risks of material misstatement of the financial statement, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audit also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audit provides a reasonable basis for our opinion.

We have served as Sea Otter Securities Group, LLC's auditor since 2018.

## Sea Otter Securities Group LLC

---

### Notes to Financial Statements For the Year Ended March 31, 2021

#### 1. Organization and Nature of Business

Sea Otter Securities Group, LLC ("Company"), a Delaware limited liability company wholly-owned by Sea Otter Holdings LLC ("Parent"), is a registered broker-dealer in securities under the Securities Exchange Act of 1934 and is a member of the New York Stock Exchange ("NYSE"). The Company commenced operations on July 27, 2015. The Company is engaged in proprietary trading and making markets in various types of securities. Equity securities, inclusive of ETFs, are traded on the ARCA exchange. The Company also takes hedge positions in futures, options, and swaps.

The Company does not hold funds or securities for customers and does not carry accounts for customers.

#### 2. Summary of Significant Accounting Policies

##### Basis of Accounting

The financial statements are prepared using the accrual basis of accounting in accordance with accounting principles generally accepted in the United States of America. Revenue is recognized when earned, while expenses and losses are recognized when incurred.

##### Cash and Cash Equivalents

The Company maintains its cash balance at a financial institution. At times, the amount on deposit at this institution may exceed the maximum balance insured by the Federal Deposit Insurance Corporation.

The Company's cash is held principally at one financial institution and at times may exceed federally insured limits. The Company has placed these funds in a high quality institution in order to minimize risk relating to exceeding insured limits.

##### Furniture and Equipment

The Company, under its capitalization policy, evaluates the materiality of furniture and equipment when purchased. All items deemed to be immaterial are expensed when purchased. The Company did not purchase any additional fixed assets during the fiscal period.

##### Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities as of the date of the financial statements and the reported amounts of revenue and expenses during the reporting period. Actual results could differ from those estimates.

---

---

**Sea Otter Securities Group LLC**

**Notes to Financial Statements  
For the Year Ended March 31, 2021**

**Income Taxes**

The Company is a single member limited liability company disregarded for income tax purposes. The Parent is individually responsible for income taxes that result from the Company's operations. Therefore, no provision for federal, state, or local income taxes is included in the accompanying financial statements.

Tax laws are complex and subject to different interpretations by the taxpayer and taxing authorities. Significant judgment is required when evaluating tax positions and related uncertainties. Future events such as changes in tax legislation could require a provision for income taxes. Any such changes could significantly affect the amounts reported in the Statement of Operations.

Management is responsible for determining whether a tax position taken by the Company is more likely than not to be sustained on the merits. The Company has not recognized in these financial statements any interest or penalties related to income taxes, and have no material unrecognized tax benefits. Years 2018 through 2020 are still subject to examination. There are currently no income tax returns under examination.

**Revenue Recognition - ASC 606**

The Company recognizes income from trading activities on a trade date basis, and unrealized gains and losses are reflected in revenues. For the period ended March 31, 2021, income from trading activities earned by the Company amounted to \$150,355,358

Interest income and expense and stock rebates are accounted for on the accrual basis. Dividend income and expense is accounted for as of ex-dividend date.

---

**Sea Otter Securities Group LLC**

---

Notes to Financial Statements  
For the Year Ended March 31, 2021

**3. Fair Value**

The fair value of the Company's assets and liabilities which qualify as financial instruments in accordance with US GAAP approximate the carrying amounts presented in the Statement of Financial Condition.

The Company carries its securities owned and sold short at fair value. US GAAP establishes a hierarchy for inputs used in measuring Fair value that maximizes the use of observable inputs and minimizes the use of unobservable inputs. Observable inputs are inputs that market participants would use in pricing the investment based on available market data. Unobservable inputs are inputs that reflect the Company's assumptions about the facts market participants would use in valuing the investment based on the best information in the circumstances.

The fair value hierarchy is categorized into three levels based on the inputs as follow:

Level 1) Valuations based on unadjusted quoted priced in active markets for identical investments.

Level 2) Valuations based on (a) quoted prices in markets that are not active; (b) quoted prices for similar investments in active markets; (c) inputs other than quoted prices that are observable or inputs derived from or corroborated by observable market data correlation or otherwise.

Level 3) Valuations based on inputs that are unobservable, supported by little or no market activity, and significant to the overall fair value measurement.

An asset or liability's level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement.

The availability of observable inputs can vary from financial instrument to financial instrument and is affected by a wide variety of factors, including, for example the type of product, whether the product is new and not yet established in the marketplace, the liquidity of markets, and other characteristic's particular to the transaction. To the extent that valuation is based on models or inputs that are less observable or unobservable in the market the determination of fair value requires more judgment. Accordingly, the degree of judgment exercised by the management in determining fair value is greatest for instruments categorized in Level 3.

The fair value of the Company's assets and liabilities which qualify as financial instruments in accordance with US GAAP approximate the carrying amounts presented in the Statement of Financial Condition, due to their short term nature.

Fair values for exchange traded derivatives, principally futures and certain options, are based on quoted market prices. Fair values for over the counter derivative financial instruments, principally forwards, options, and swaps, are based on pricing models as no quoted market prices exist for such instruments.

The inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, for disclosure purposes, the level in the fair value hierarchy within which the fair value measurement falls in its entirety is determined based on the lowest level input that is significant to the fair value measurement entirety. The Company's assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment and considers factors specific to the investment.

**Sea Otter Securities Group LLC**

---

Notes to Financial Statements  
For the Year Ended March 31, 2021

**3. Fair Value (continued)**

US GAAP requires disclosure of the estimated fair value of certain financial instruments, and the methods and significant assumptions used to estimate their fair values. Financial instruments within the scope of these disclosure requirements are included in the following table. Certain financial instruments that are not carried at fair value on the Statement of Financial Condition are carried at amounts that approximate fair value due to their short-term nature and generally negligible credit risk. These instruments include cash, due from brokers, prepaid expenses and other assets, due from affiliates, clearing deposit, due to broker, due to affiliates, and accounts payable.

The following table presents the carrying values and estimated fair values at March 31, 2021 of financial assets and liabilities. The information is provided on their classification within the fair value hierarchy.

	Level 1	Level 2	Level 3	Total
<b>Assets</b>				
Securities, at fair value				
Equities	450,471,040	-	-	450,471,040
Investment in Private Operating Company	-	-	300,000	300,000
Derivative contracts				
Options	166,643,867	-	-	166,643,867
Total Securities, at fair value	617,114,907	-	300,000	617,414,907
<b>Liabilities</b>				
Securities sold not yet purchased				
Equities	200,498,745	-	-	200,498,745
Derivative contracts				
Options	110,797,589	-	-	110,797,589
Total Securities sold not yet purchased, at fair value	311,296,334	-	-	311,296,334
Futures contracts*	(68,342,931)	-	-	(68,342,931)

**Investments in Securities**

The Company values investments in securities that are freely tradeable and are listed on a national securities exchange at their last sales price as of the date of determination. ETFs that are freely tradeable and are listed on a national stock exchange are included in securities, at fair value, and securities sold not yet purchased for fair value hierarchy presentation.

To the extent securities are actively traded and valuation adjustments are not applied, they are categorized in Level 1 of the fair value hierarchy, otherwise the securities are categorized as level 2.

**Options Contracts**

The fair value of options which are listed on major securities exchanges are valued at the midpoint of the bid/ask spread at the close of business. To the extent options are actively traded and valuation adjustments are not applied, they are categorized in Level 1 of the fair value hierarchy, otherwise the options are categorized as level 2.

**Future Contracts**

Gains and losses from futures contracts are included in commodities trading revenue in the Statement of operations. Futures contracts include futures related to foreign currencies and equity prices.

Futures contracts traded on an exchange or board of trade will be valued at the official daily settlement price on such exchange or board of trade.

**Sea Otter Securities Group LLC**

---

Notes to Financial Statements  
For the Year Ended March 31, 2021

***Investment in Private Operating Company***

The Partnership's investments in private operating companies consist of direct private equity investments. The transaction price, excluding transaction costs, is typically the Partnership's best estimate of fair value at inception. When evidence supports a change to the carrying value from the transaction price, adjustments are made to reflect expected exit values. Ongoing reviews by Partnership management are based on an assessment of each underlying investment, incorporating valuations that consider the evaluation of financing and sale transactions with third parties, expected cash flows and market-based information, including comparable transactions, and performance multiples, among other factors. These nonpublic investments are included in Level 3 of the fair value hierarchy.

The following table presents additional information about Level 3 assets and liabilities measured at fair value. Both observable and unobservable inputs may be used to determine the fair value of positions that the Partnership has classified within the Level 3 category. As a result, the unrealized gains and losses for assets and liabilities within the Level 3 category may include changes in fair value that were attributable to both observable (e.g., changes in market interest rates) and unobservable (e.g., changes in unobservable long-dated volatilities) inputs. Changes in Level 3 assets and liabilities measured at fair value for the period ended March 31, 2021:

	Level 3						Change in net value of Investments still held at March 31, 2021
	Beginning Balance, April 1, 2020	Realized & Unrealized Gains (Losses)	Purchases Sales and Settlements	Net Transfers In and/or (Out) of	Ending Balance, March 31, 2021		
<b>Assets (at fair value)</b>							
Investment in Private Operating Company	\$ 300,000	\$ -	\$ -	\$ -	\$ 300,000	\$ -	\$ -
<b>Total Investments in Securities</b>	<b>\$ 300,000</b>	<b>\$ -</b>	<b>\$ -</b>	<b>\$ -</b>	<b>\$ 300,000</b>	<b>\$ -</b>	<b>\$ -</b>

---

## Sea Otter Securities Group LLC

---

### Notes to Financial Statements For the Year Ended March 31, 2021

#### ***Translation of Foreign Currency***

Assets and liabilities denominated in foreign currencies are translated into US dollar amounts at the period end exchange rates. Transactions denominated in foreign currencies, including purchases and sales of investments, and income and expenses, are translated into US dollars on the transaction date. Adjustments arising from foreign current transactions are reflected in the Statement of Operations.

The Company does not isolate that portion of the results of operations arising from the effect of changes in foreign exchange rates on investments from fluctuations arising from changes in market prices of investments held. Such fluctuations are included in trading revenue in the Statement of Operations.

#### **4. Related Party Transactions**

##### **Expense Sharing Agreement with Puerto Rico based affiliate**

The Company entered into an expense sharing agreement with an affiliate located in Puerto Rico. The agreement with the Puerto Rican affiliate calls for the Company to reimburse the affiliate \$2,500 per month rent, and 95% of internet costs, and 85% of utility costs incurred on behalf of the company. A total of \$42,654 of such reimbursements were included in the Statement of Operations. These payments were comprised of \$30,000 in rent, \$3,446 in internet and connectivity expenses, and \$2,380 in utility expenses and \$6,829 in office, equipment and travel expenses. None of the 2020/2021 reimbursements were unpaid at period end and are included in Accounts payable and accrued expenses in the Statement of Financial Condition.

##### **Expense Sharing Agreement with New York based affiliate**

The Company also leases office space under a lease agreement with an affiliate located in New York. This agreement calls for the Company to pay \$5,000 per month for renting office space in the affiliate's office. The lease agreement renews automatically each quarter and is able to be terminated by either party at any time with at least 90 days prior notice. At March 31, 2021, the Company did not owe any rent in connection with the lease agreement.

---

**Sea Otter Securities Group LLC**

---

Notes to Financial Statements  
For the Year Ended March 31, 2021

**5. Financial Instruments and Risk**

In the normal course of its business, the Company trades various financial instruments and enters into various financial transactions where the risk of potential loss due to market risk, currency risk, and credit risk and other risks can equal or exceed the related amounts recorded. The success of any investment activity is influenced by general economic conditions that may affect the level and volatility of equity, futures, and options prices and the extent and timing of investor participation in these markets.

Market risk represents the potential loss that can be caused by increases or decreases in the fair value of investments resulting from market fluctuations.

Currency risk is the risk that the fair value of an investment will fluctuate because of changes in foreign exchange rates. Investments that are denominated in a non-U.S. currency are subject to the risk that the value of a particular currency will change in relation to one or more other currencies. Among the factors that may affect currency values are trade balances, the level of short term interest rates, differences in relative values of similar assets in different currencies, long term opportunities for investment and capital appreciation and political developments.

Credit risk represents the potential loss that would occur if counterparties fail to perform pursuant to the terms of their obligations. In addition to its investments, the Company is subject to credit risk to the extent a custodian or broker with whom it conducts business is unable to fulfill contractual obligations.

Liquidity risk represents the potential loss that would occur if counterparties fail to perform pursuant to the terms of their obligations. In addition to its investments, the Company is subject to credit risk to the extent a custodian or broker with whom it conducts business is unable to fulfill contractual obligations.

Short selling, or the sale of securities not owned by the Company, expose the Company to the risk of loss in an amount greater than the initial proceeds, and such losses can increase rapidly and in the case of equities, without effective limit. There is the risk that the securities borrowed by the Company in connection with a short sale would need to be returned to the securities lender on short notice. If such request for return of securities occurs at a time when other short sellers of the subject security are receiving similar requests, a "short squeeze" can occur, wherein the Company might be compelled, at the most disadvantageous time, to replace borrowed securities previously sold short with purchases on the open market, possibly at prices significantly in excess of the proceeds received earlier.

Borrowings are usually from securities brokers and dealers and are typically secured by the Company's securities and other assets. Under certain circumstances, such a broker-dealer may demand an increase in the collateral that secures the Company's obligations and if the Company is unable to provide additional collateral, the broker-dealer could liquidate assets held in the account to satisfy the Company's obligations to the broker-dealer. Liquidation in that manner could have adverse consequences. In addition, the amount of the Company's borrowings and the interest rates on those borrowings, which will fluctuate, could have a significant effect on the Company's profitability.

---

## Sea Otter Securities Group LLC

---

### Notes to Financial Statements For the Year Ended March 31, 2021

#### **5. Financial Instruments and Risk (continued)**

While the use of certain forms of leverage, including margin borrowings, can substantially improve the return on invested capital, such use may also increase the adverse impact to which the portfolio of the Company may be subject.

The Company may purchase and sell options on securities and currencies on national and international exchanges. Exchange traded options are generally closed by cash settlement, expiration, or a closing transaction. In entering into a closing transaction, the Company may be subject to the risk of loss to the extent that the premium paid exceeds the premium received in the closing transaction. In addition, the correlation between option prices and the prices of underlying securities may be imperfect and the market for any particular option may be illiquid at a particular time.

The Company invests in futures. Substantially all trading in futures has as its basis a contract to purchase or sell a specified quantity of a particular asset for delivery at a specified time, although certain financial instruments, such as market index futures contracts, may be settled only in cash based on the value of the underlying composite index. Futures trading involves trading in contracts for future delivery of standardized, rather than specific, lots of particular assets.

Futures prices are highly volatile. Price movements for the futures contracts which the Company may trade are influenced by, among other things, changing supply and demand relationships, government, trade, fiscal, and economic events, and changes in interest rates. Governments from time to time intervene, directly and by regulation, in certain markets, often with the intent to influence prices directly.

The open positions must be "marked to market" daily, requiring additional margin deposits if the position reflects a loss that reduces the Company's equity below the level required to be maintained and permitting release of a portion of the deposit if the position reflects a gain that results in excess margin equity.

#### ***Derivative Contracts***

In the normal course of business, the Company utilizes derivative contracts in connection with its trading activities. Investments in derivative contracts are subject to additional risks that can result in a loss of all or part of an investment. The Company's derivative activities and exposure to derivative contracts are classified by the following primary underlying risks: foreign currency exchange rate risk and equity price fluctuation risk.

#### ***Options***

The Company is subject to equity risk in the normal course of pursuing its investment objectives. The Company may enter into options to speculate on the price movements of the financial instrument, commodity, or currency underlying the option, or for use as an economic hedge against certain positions held by the Company. Options purchased give the Company the right, but not the obligation, to buy or sell with a limited time, a financial instrument, commodity or currency at a contracted price that may also be settled in cash, based on differentials between specified indices or prices.

Options written obligate the Company to buy or sell within a limited time, a financial instrument, commodity or currency at a contracted price that may also be settled in cash, based on differentials between specified indices or prices. When the Company writes an option, an amount equal to the premium received by the Company is recorded as a liability and is subsequently adjusted to the current fair value of the option written. Options written by the Company may expose the Company to market risk of an unfavorable change in the financial instrument underlying the written option.

For some OTC options, the Company may be exposed to counterparty risk from the potential that a seller of an option does not sell or purchase the underlying asset as agreed under the terms of the option contract. The maximum risk of loss from counterparty risk to the Company is the fair value of the contracts and the premiums paid to purchase its open options. In these instances, the Company considers the credit risk of the intermediary counterparty to its option transactions in evaluating potential credit risk.

---

## Sea Otter Securities Group LLC

---

### Notes to Financial Statements As of and for the 12 Months Ended March 31, 2021

#### **Futures**

The Company is subject to equity price and foreign currency exchange rate risk in the normal course of pursuing its investment objectives. The Company may use futures contracts to gain exposure to, or hedge against, changes in the fair value of equities and ETFs, or other futures contracts. A futures contract represents a commitment for the future purchase or sale of an asset at a specified price on a specified date.

The purchase and sale of futures contracts requires margin deposits. Subsequent payments (variation margin) are made or received by the Company each day, depending on the daily fluctuations in the value of the contract, which are recorded as unrealized gains or losses by the Company at March 31, 2021.

#### **Swaps**

The Company may enter into various swap contracts (or swaps), including equity swaps as part of its investment strategies, to hedge against unfavorable changes in the value of investments. Generally, a swap contract is an agreement that obligates two parties to exchange a series of cash flows at specified intervals based upon or calculated by reference to changes in specified prices or rates for a specified notional amount of the underlying assets. The payment flows are usually netted against each other, with the difference being paid by one party to the other.

During the term of the swap contract, changes in value are recognized as unrealized gains or losses by marking the contracts at fair value. Additionally, the Company will record a realized gain (loss) when a swap contract is terminated and when periodic payments are received or made at the end of each measurement period. In addition to realized gains (losses) and the change in unrealized gains (losses), periodic interest expense and/or income will be also reflected in net realized gain (loss) on swap contracts on the Statement of Operations.

The fair value of open swaps, reflected on the Statement of Financial Condition as unrealized gain (loss) on swap contracts, may differ from that which would be realized in the event the Company terminated its position in the contract. Risks may arise as a result of the failure of the counterparty to the swap contract to comply with the terms of the swap contract. The loss incurred by the failure of a counterparty is generally limited to the aggregate fair value of swap contracts in an unrealized gain position as well as any collateral posted with the counterparty. The risk is mitigated by having a master netting arrangement between the Company and the counterparty and by the posting of collateral by the counterparty to the Company to cover the Company's exposure to the counterparty. The Company considers the creditworthiness of each counterparty to a swap contract in evaluating potential credit risk. Additionally, risks may arise from unanticipated movements in the fair value of the underlying investments.

Swap contracts are "reset" monthly, which involves subsequent payments made or received by the Company, to reflect appreciation or depreciation in the swap contract. Futures may reduce the fund's exposure to counterparty risk since futures contracts are exchange traded. The exchange's clearinghouse acts as the counterparty to all exchange traded futures, and guarantees the futures against default.

**Sea Otter Securities Group LLC**

Notes to Financial Statements  
For the Year Ended March 31, 2021

**Impact of Derivatives Contracts on the Statement of Financial Condition and Statement of Operations**  
The following table details the open derivatives positions, value present included in the statement of financial condition, and number of contracts, as of March 31, 2021, categorized by primary underlying risk:

<u>Primary Underlying Risk</u>	<u>Derivative Assets</u>	<u>Number of contracts</u>	<u>Derivative Liabilities</u>	<u>Number of contracts</u>
<u>Futures</u>				
Equity	1,723,796	430	70,066,728	8,921
<u>Swaps</u>				
Equity	-	-	(243,848)	1
<u>Options</u>				
Equity	166,643,867	152,270	110,797,590	101,531
	<u>\$ 168,367,663</u>	<u>152,700</u>	<u>\$ 180,620,470</u>	<u>110,453</u>

Subject to master netting arrangements, the swap reset payable is included in due from broker, both on the Statement of Financial Condition.

Trading gains and losses from futures and options on futures are included in Commodities trading revenue on the Statement of Operations. Profits and losses from Swap products for the period April 1, 2020 to March 31, 2021 were \$678,043, which is included in Trading revenue on the Statement of Operations.

The following table details notional amounts of derivatives positions open at March 31, 2021:

	<u>Long Exposure</u>		<u>Short Exposure</u>	
	<u>Notional Amount</u>	<u>Number of contracts</u>	<u>Notional Amount</u>	<u>Number of contracts</u>
Futures	247,663,426	3,512	345,394,712	5,839
Swaps	4,963,550	1	-	-
Options	166,643,867	152,270	110,797,590	101,531

### Notes to Financial Statements For the Year Ended March 31, 2021

#### 8. Recent Accounting Pronouncements

In June 2016, the FASB issued Accounting Standards Update "ASU" No. 2016-13, Financial Instruments - Credit Losses (Topic 326). The ASU introduces a new credit loss methodology, Current Expected Credit Losses (CECL), which requires earlier recognition of credit losses, while also providing additional transparency about credit risk. Since its original issuance in 2016, the FASB has issued several updates to the original ASU. The CECL methodology utilizes a lifetime "expected credit loss" measurement objective for the recognition of credit losses for loans, held-to-maturity securities and other receivables at the time the financial asset is originated or acquired. The expected credit losses are adjusted each period for changes in expected lifetime credit losses. The methodology replaces the multiple existing impairment methods in current U.S. GAAP, which generally requires that a loss be incurred before it is recognized.

For financial assets measured at amortized cost, the Company has concluded that there are de minimus expected credit losses based on the nature and contractual life or expected life of the financial assets and immaterial historic and expected losses. On April 1, 2020, the Company adopted Topic 326 using the modified retrospective approach for all in-scope assets, which did not result in an adjustment to the opening balance in retained earnings.

#### 9. Net Capital Requirement

The Company is subject to the Securities and Exchange Commission Uniform Net Capital Rule (15c3-1), which requires the maintenance of minimum net capital and requires that the ratio of aggregate indebtedness to net capital, both as defined, shall not exceed 800% in the first year of operations, and 1500% in every year thereafter. At March 31, 2021, the Company had net capital of \$70,548,524 which was \$69,548,521 in excess of its required net capital of \$1,000,000. The Company's aggregate indebtedness to net capital ratio was 1.67%.

#### 10. Coronavirus Disease 2019 ("Covid-19 Pandemic")

The Company continues to monitor the effects of the COVID-19 Pandemic both on a national level as well as regionally and locally and is responding accordingly. In addition, we continue to provide frequent communications to employees, and regulators. In early March 2020, some employees began to work remotely with only "essential" employees reporting to the office. The Company accomplished this by significantly expanding the use of technology infrastructure that facilitates remote operations. To date, there have been no significant disruptions to the Company's business or control processes as a result of the effects of the COVID-19 pandemic. Recent outbreaks in various states indicate that COVID-19 will continue to impact the economy, the Company is continuously assessing the impacts of the pandemic on its business and financial results.

#### 11. Subsequent Events

The Company has evaluated events and transactions that occurred between April 1, 2021 and May 28, 2021, which is the date the financial statements were available to be issued, for possible disclosure and recognition in the financial statements. In the months of April and May 2021, the Company did not receive any capital infusions and did withdraw capital in the amount of 16,900,000.

On April 13th, 2021, the Company submitted a Letter of Acceptance, Waiver, and Consent ("AWC") to the NYSE in relation to a routine and periodic examination of the Company by FINRA. In the AWC the Company does not admit nor deny findings that the Company incorrectly computed its net capital which led to net capital deficiencies that occurred in 2018 and 2019. As a result, the Company agreed to payment of a \$150,000 fine relating to this matter. As of the issuance of these financial statements, the examination is still ongoing.
