Date:

- Users who wish to enable routing must complete and submit a Securities Routing Agreement referenced in the [Member Application](#) and found in the [Member Agreements](#).
 - Pegged orders (FIX Tag 40 = P) are not eligible to route (see IEX Rule 11.190(a)(3)), so the IEX system by default rejects any pegged order for which FIX Tag 18 is populated with "u" instead of the applicable pegged order type instruction. By checking this box, User instructs IEX to ignore a routing instruction on a pegged order and instead treat the order as a Midpoint Peg order (FIX Tag 18=M). See IEX Rule 11.190 ("Order, modifier, and parameter combinations which are disallowed by the Exchange may be rejected, ignored, or overridden by the Exchange, as determined by the Exchange to facilitate the most orderly handling of User instructions.").
 - If unspecified, default treatment for Odd Lot orders is displayed. If "Default Odd Lots to Hidden?" option is set to "Yes," then Odd Lot orders with omitted MaxFloor (FIX Tag 111) will be non-displayed.
 - All: Cancel all open orders (Continuous Book, On-Open, and On-Close). If a disconnect occurs between the Lock-in Time and the auction match, orders that are locked-in for the auction will not be canceled. For the Opening Auction, any unfilled portion of DAY and GTX limit orders will be canceled at the conclusion of the auction match in a manner similar to Limit-On-Open ("LOO") orders. All, excluding On-Open/On-Close: Cancel all open orders, excluding On-Open and On-Close orders. None: Do not cancel any open orders.
- The Exchange provides a best effort attempt to cancel all open orders from a User upon a communications disconnection. A loss of connectivity signal must travel through the IEX POP before IEX becomes aware of the loss of connectivity. There is no guarantee that the automatic cancel feature provided by the Exchange will be error free or will operate without interruption. By signing above, you agree and acknowledge that the Exchange is not liable or responsible in any way for any orders which may fail to be canceled using the automatic cancel feature. Members may call IEX Market Operations at 646.343.2310 to verbally request that all open orders be canceled or check the status of open orders.
- AIQ is an optional functionality that enables a User to prevent two of its orders from executing against each other. A User can set a default AIQ group for each port, which will prevent the User's orders from self-matching against orders originating from either the same Member (broker) or MPID. Users that select "Report AIQ Fields" on this form will receive a cancel/restatement message for each order that was cancelled because it was subject to AIQ. Please refer to IEX Rule 11.190(e) and IEX's FIX specifications for additional information.
 - Any time a D-Limit order's resting price is adjusted, the Exchange will send a restatement message to the Member that entered the order notifying it of the price adjustment as well as to any drop copy recipients expressly authorized by the Member. By opting-out of receiving D-Limit restatement messages, the Member acknowledges that it is entitled to receive restatement messages (including to drop copy recipients) but is directing IEX to not transmit such restatement messages. Members that have opted out of receiving D-Limit restatement messages can revoke the opt-out by submitting an updated IEX Equities Port Request Form.

All services and products requested on this form are governed by the terms in the User Agreement and the Exchange Rules.

If you do not receive a written confirmation from IEX within three (3) business days that your request has been received and processed, please contact IEX Market Operations at 646.343.2310 or marketops@iextrading.com. Please refer to the IEX Fee Schedule posted at <https://exchange.iex.io/resources/trading/fee-schedule/> for the latest price list.
