NOTE 1 - DESCRIPTION OF BUSINESS

The Company was incorporated in the State of New York on September 23, 1998. The Company changed its name on December 14, 2012 from ICM Capital Markets Ltd. to Lampert Capital Markets, Inc.

All customer accounts are held by the clearing broker Wedbush Securities, Inc. which clears the firm's transactions. During the year, the authorized number of shares was increased to 300,000 shares.

NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Cash and Cash Equivalents

The Company considers all highly liquid debt instruments with original maturities of three months or less to be cash equivalents. The Company had no cash equivalents during the year ended August 31, 2024.

Revenue Recognition

The Company adopted Accounting Standards Codification ("ASC") Topic 606, *Revenue from Contracts with Customers* on September 1, 2018, the date the guidance became effective for us. The Company adopted the guidance using the modified retrospective method (i.e. applied prospectively effective September 1, 2018), which had no impact on the Company's opening retained earnings. Further, the Company determined that there was no material impact to the Company's recognition of revenue upon adoption of Topic 606. All revenues are recorded in accordance with ASC 606, which is recognized when: (i) a contract with a client has been identified, (ii) the performance obligation(s) in the contract have been identified, (iii) the transaction price has been determined, (iv) the transaction price has been allocated to each performance obligation in the contract, and (v) the Company has satisfied the applicable performance obligation over time / point in time.

The Company principally earns revenue (commissions) from brokerage activities, which are recognized on a trade date basis. Investment banking income includes fees earned for financial advisory and placement services. Financial advisory fees revenues are earned throughout the term of the financial advisory agreement. Fees for placement services are recognized when the placement is completed and the collection of the fee is reasonably determined. Margin interest is earned monthly based upon customer margin balances.

Revenues are not concentrated in any particular region of the country or with any individual or group. The firm's commissions are primarily derived from a combination of a limited number of retail accounts and institutional execution services.

Property and Equipment

Property and equipment are stated at cost. Depreciation and amortization are provided using the straight-line method over the estimated economic lives of the assets, which are from three to five years. Expenditures for major renewals and betterments that extend the useful lives of property and equipment are capitalized. Expenditures for maintenance and repairs are charged to expense as incurred. All property and equipment have been fully depreciated.

NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES, continued

Use of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect certain reported amounts and disclosures. Accordingly, actual results could differ from those estimates. Estimates include depreciation for property and equipment, allowances for receivables and deferred tax asset valuation allowance.

Income Taxes

During the year, the Company implemented the Code, *Accounting for Uncertainty in Income Taxes*. The Code clarifies the accounting for uncertainty in income taxes recognized in an enterprise's financial statements in accordance with the Code, *Accounting for Income Taxes*. The Code prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurements of a tax position taken or expected to be taken in a tax return. The Code also provides guidance on derecognition of tax benefits, classification on the balance sheet, interest and penalties, accounting in interim periods, disclosure and transition. As of August 31, 2024, tax years ending August 31, 2022, 2023 and 2024 were still open for examination under the statute of limitations.

Deferred income taxes are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax basis. Deferred tax assets and liabilities are measured using enacted tax rates expected to be recovered or settled. The effect on deferred taxes of a change in tax rates is recognized in income in the period that includes the enactment date.

Fair Value of Financial Instruments

We adopted the fair value guidelines issued by the FASB on July 1, 2007. The guidelines defines fair value, establishes a framework for measuring fair value under generally accepted accounting principles, and expands disclosures about fair value measurements. This statement applies under other accounting pronouncements that require or permit fair value measurements, the FASB having previously concluded in those accounting pronouncements that fair value is a relevant measurement attribute.

Valuation techniques for fair value are based upon observable and unobservable inputs. Observable inputs reflect market data obtained from independent sources, while unobservable inputs reflect our best estimate, considering all relevant information. These valuation techniques involve some level of management estimation and judgment. The calculation process to determine fair value also includes making appropriate adjustments to the valuation model outputs to consider risk factors.

The fair value hierarchy or our inputs used in the determination of fair value for assets and liabilities during the current period consists of three levels. Level 1 inputs are comprised of unadjusted, quoted prices in active markets for identical assets or liabilities at the measurement date. Level 2 inputs include quoted prices for similar instruments in active markets; quoted prices for identical or similar instruments in markets that are not active; inputs other than quoted prices that are observable for the asset or liability; and inputs that are derived principally from or corroborated by observable market data by correlation or other means. Level 3 inputs incorporate our own best estimate of what market participants would use in pricing the asset or liability at the measurement date where consideration is given to the risk inherent in the valuation technique and the risk inherent in the inputs to the model. If inputs used to measure an asset or liability fall within different levels of the hierarchy, the categorization is based on the lowest level input that is significant to the fair value measurement of the asset or liability. Our assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment, and considers factors specific to the asset or liability.

The carrying amounts reported in the balance sheet for cash, deposits and accounts payable and accrued expenses approximate fair value based on the short-term maturity of these instruments.
