

ATT: SEC - Below is an email from a fake address of which I have 11 more in my email box. I can find no information on this company except that it is based in Taiwan. I strongly suspect that this illegal spamming activity is intended to manipulate a stock for which a company may not be in existence.

I am requesting you immediately suspend the trading of NSLT until this matter is clear.

Thank you

Randy Jacobs

Score with Nanotechnology!

We called it! NSLT is RISE on strong volume. We hope you took a position early and are smiling right now. If you didn't, don't worry. The big spike is expected also on Wednesday, November 22nd. Get in now!

It is widely predicted that nanotechnology will be the next booming industry for our economy. Our feature is in the perfect place at the perfect time.

Company: Nano Superlattice Technology, Inc.
Sym: NSLT
Current Price: \$0.22(+37%)
Short-Term Target: \$0.58
Long-Term Target: \$5.50

With the increased miniaturization of personal electronics devices current tools are reaching their limits. Nano Superlattice Technology Inc. is a nanotechnology company engaged in the coating of tools and components with nano structured PVD coatings for high-tech industries.

NSLT uses Superlattice technology to apply multi-layers of super-hard elemental coatings on an array of precision products to achieve a variety of physical properties. An amazing revelation is set to come out of the Nano laboratories which will have an enormous impact on the manufacturing world. Seize the day and get in before the news is out!

LONDON (CNN) -- Doctors are still trying to determine how a former Russian spy and prominent Kremlin critic was poisoned, but they have discounted suspicions that the toxic metal thallium was used, hospital officials said Tuesday.

BAGHDAD, Iraq (CNN) -- Backed by U.S.-led coalition advisers, Iraqi security forces battled insurgents early Tuesday in Baghdad's Sadr City neighborhood, the U.S. military said.
