This ride is just beginning as we see this stock price at a GREAT purchase. Jump on now and ride the price up on the highest return "Day Trade" we have featured this year.

The key is, knowing when to get on and when to get off a stock, for successful day trading. CWTD has distinct patterns to watch for.

Yesterday CWTD price spiked again. Today we got word that there will be more exiting news early next week. We are still hovering at \$1.52, and we think it is a great DEAL.
