

SEC Comments on Short Sale of Securities

Similar to institutional holdings on the buy side. have all institutional holdings on the sale side recorded and fully disclosed to the public. Make it a level playing field for both longs and shorts. At the present time the field is to the short sales advantage. This also effects the ability to loan out shares via the DTC.

This organization should be regulated as it in fact manages securities. Additionally, the DTC should be monitored particularly in the area of short selling securities or monitored to ensure no naked sale of securities.
