Re: Twenty-Seventh Amendment of the Plan to Address Extraordinary Market Volatility Pursuant to Rule 608 of Regulation NMS under the Securities Exchange Act of 1934 – File No. 4-631

Dear Vanessa Countryman:

Nasdaq, Inc., on behalf of Nasdaq Texas, LLC (“NDTX”), Nasdaq PHLX LLC (“PHLX”), and The Nasdaq Stock Market LLC (“Nasdaq”), and the following parties to the Plan to Address Extraordinary Market Volatility Pursuant to Rule 608 of Regulation NMS under the Securities Exchange Act of 1934 (the “Plan”)¹: 24X National Exchange LLC, Cboe BZX Exchange, Inc., Cboe BYX Exchange, Inc., Cboe EDGA Exchange, Inc., Cboe EDGX Exchange, Inc., Financial Industry Regulatory Authority, Inc., Investors Exchange LLC, Long Term Stock Exchange, MEMX LLC, MIAX PEARL, LLC, New York Stock Exchange LLC, NYSE American LLC, NYSE Arca, Inc., NYSE Texas, Inc., and NYSE National, Inc., (collectively with NDTX, PHLX, and Nasdaq, the “Participants”), respectfully files the amended Plan with the Securities and

Exchange Commission (the “Commission”) for approval pursuant to Rule 608 of Regulation NMS (“Rule 608”) under the Securities Exchange Act of 1934 (the “Exchange Act”).²

The Participants propose to amend the Plan to establish temporary price band protections to overnight trading (“Overnight Protections”) as a precautionary measure to establish safeguards in anticipation of overnight trading by certain national securities exchanges.³ These price bands will initially be static bands foundationally based on 20% above and below two reference points.

This proposal is the first phase of a two-phased approach. In this first phase, Participants propose temporary protections based on overnight trading bands currently employed by certain Alternative Trading Systems (ATs). During the first phase, the Participants will gather and analyze data concerning overnight trading, and will use that data to prepare new overnight protections for the second phase, which will be proposed in a new plan amendment.

I. Requirements Pursuant to Rule 608(a)

A. Statement of Purpose and Summary of the Plan Amendment

The Participants filed the Plan with the Commission on April 5, 2011, to create a market-wide limit up-limit down mechanism intended to address extraordinary market volatility in NMS Stocks, as defined in Rule 600(b)(65) of Regulation NMS under the Exchange Act.⁴ The Plan sets forth procedures that provide for market-wide limit up-limit down requirements to prevent trades in individual NMS Stocks from occurring outside of the specified Price Bands.⁵ These limit up-limit down requirements are coupled with Trading Pauses, as defined in Section I(Y) of the Plan, to accommodate more fundamental price moves. In particular, the Participants adopted this Plan to address extraordinary volatility in the securities markets, *i.e.*, significant fluctuations in individual securities' prices over a short period of time, such as those experienced during the “Flash Crash” on the afternoon of May 6, 2010.

As set forth in more detail in the Plan, all trading centers in NMS Stocks, including both those operated by Participants and those operated by members of Participants, are required to establish, maintain, and enforce written policies and procedures that are reasonably designed to comply with the Limit Up-Limit Down requirements specified in the Plan. The Participants believe that the Limit Up-Limit Down mechanism specified in the Plan has reduced the negative impacts of sudden, unanticipated price movements in NMS Stocks (and erroneous trades in such stocks), thereby protecting investors and promoting a fair and orderly market.⁶

² 17 CFR 242.608.

³ These new overnight trading hours are expected to commence December 6, 2026. This amendment is not a prerequisite to commencing exchange operations for overnight trading, but is also expected to commence effectiveness December 6, 2026.

⁴ 17 CFR 242.600(b)(65).

⁵ Unless otherwise stated, capitalized terms are defined in the LULD Plan.

⁶ Data collected during the pilot period between the initial filing of the Plan and the approval of the Plan on a permanent basis by the Commission, and studies conducted by the Participants and the Commission's

The Participants propose a cautious approach to extending protections to the unique conditions presented by overnight markets. The proposal is to be implemented in two phases. In the first phase, the Participants propose to apply protections based on those currently used by certain ATSS to constrain significant fluctuations in individual securities' prices over a short period of time. The Participants believe that these protections are narrowly tailored to current market conditions, and will promote market stability over an interim period.

During implementation of this first phase, Participants will gather and analyze information concerning overnight trading, and will use that information to develop recommendations for a final proposal to be implemented in the overnight session. The final proposal will be submitted to the Commission as a plan amendment that will remove the interim measures and replace them with revised overnight protections.

1. Authority to Amend Under Rule 608 of Regulation NMS

The Participants respectfully submit this amendment to the Plan pursuant to Rule 608 of Regulation NMS under the Exchange Act, which authorizes the Participants to act jointly in preparing, filing, and implementing national market system plans. Rule 608(a)(3) specifically provides that any two or more self-regulatory organizations, acting jointly, may file a national market system plan or any amendment thereto with the Commission. The Participants are self-regulatory organizations that are parties to the Plan and have the authority under Rule 608 to propose amendments to the Plan for Commission approval.

Section III(A) of the Plan provides that, except with respect to the addition of new Participants to the Plan, any proposed change in, addition to, or deletion from the Plan shall be effected by means of a written amendment to the Plan that: (1) sets forth the change, addition, or deletion; (2) is executed on behalf of each Participant; and (3) is approved by the SEC pursuant to Rule 608 of Regulation NMS under the Exchange Act, or otherwise becomes effective under Rule 608 of Regulation NMS under the Exchange Act.

Each of the Participants has approved this Twenty-Seventh Amendment in accordance with Section III(C) of the Plan. The Participants also received and incorporated feedback from the Plan Advisory Committee in preparing this proposal.

The Participants believe that this amendment is consistent with Section 11A of the Exchange Act and Rule 608 thereunder. Rule 608 provides that the Commission shall approve a proposed NMS plan, or proposed amendment thereto, if it finds that such plan or amendment is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act; and such plan provides that all brokers and dealers may obtain access to

Division of Economic and Risk Analysis demonstrated that the Plan has been beneficial to markets by serving to dampen price volatility, and the Commission approved the Plan on a permanent basis after finding that the LULD mechanism effectively addressed extraordinary market volatility. See Securities Exchange Act Release No. 84843 (December 18, 2018), 83 FR 66464 (December 26, 2018); Securities Exchange Act Release No. 85623 (April 11, 2019), 84 FR 16086 (April 17, 2019).

transaction reports and quotations on terms that are not unreasonably discriminatory.⁷ Section 11A of the Act establishes the Congressional finding that it is in the public interest and appropriate for the protection of investors and the maintenance of fair and orderly markets to assure economically efficient execution of securities transactions, fair competition among brokers and dealers and exchange markets, and the availability to brokers, dealers, and investors of information with respect to quotations for and transactions in securities.⁸ Consistent with these standards, the proposed amendment would enhance the stability and integrity of the national market system by implementing price band protections during overnight trading sessions, thereby reducing the risk of extraordinary volatility and erroneous trades during periods of reduced liquidity.

2. Summary of Proposed Amendment

The Participants propose to add a new Section VIII to the Plan, entitled “Overnight Protections,” which establishes a framework for calculating and disseminating Overnight Price Bands for use during Overnight Protected Hours (defined as 9:00 p.m. Eastern Time on Sunday through Thursday to 4:00 a.m. Eastern Time on the next calendar day), and requires all trading centers that are operative during such hours to establish, maintain, and enforce written policies and procedures that are reasonably designed to prevent trades outside of such Overnight Price Bands. In Phase 2 of the proposal, Participants intend to replace the interim Section VIII proposed in this amendment with a more permanent Section VIII to govern overnight trading protections, and expect these protections to more closely resemble the LULD program in place during Regular Trading Hours, for instance by including sliding bands.

The proposed amendment for Phase 1 includes the following key aspects:

- (a) **Overnight Price Bands.** The Primary Listing Exchange for each NMS Stock shall calculate and disseminate to the Processors an Overnight Lower Price Band and an Overnight Upper Price Band to be applied during Overnight Protected Hours for NMS Stocks. The Overnight Price Bands shall be based on two reference prices as adjusted for any relevant corporate actions, (i) the official closing price of a stock as reported by the listing market for such NMS stock and (ii) the consolidated last round lot sale as of 7:45 p.m. Eastern Time, with the Overnight Lower Price Band being 20% lower than the lower of the reference prices, and the Overnight Upper Price Band being 20% greater than the greater of the reference prices; the Overnight Percentage Parameter for a leveraged ETP shall be 20%, multiplied by the leverage ratio. For NMS Stocks with a Closing Price of less than \$1.00, the minimum Overnight Upper Price Band and minimum Overnight Lower Price Band thresholds shall each be \$1.00 from the applicable reference price; for NMS Stocks with a Closing Price of \$1.00 or more, the minimum Overnight Upper Price Band and minimum Overnight Lower Price Band thresholds shall each be \$3.00 from the applicable reference price. The Minimum Price Band for a leveraged ETP shall be multiplied by the leverage ratio of such product.

⁷ 15 U.S.C. 78k-1(a)(1)(C).

⁸ 15 U.S.C. 78k-1(a)(1)(C).

- (b) Primary Listing Exchanges shall transmit the calculated Overnight Price Bands to the Processors no later than 8:55 p.m. Eastern Time, and the Processors shall disseminate such bands to the public prior to 9:00 p.m. Eastern Time.
- (c) All trading centers in NMS Stocks that are operative during Overnight Protected Hours, must establish, maintain, and enforce written policies and procedures that are reasonably designed to prevent both trades and the display of prices outside the Overnight Price Bands during Overnight Protected Hours.
- (d) The Primary Listing Exchange of a stock may declare a Regulatory Halt in accordance with Primary Listing Exchange rules, and, if so, shall notify the Processor.⁹ During a Regulatory Halt during Overnight Protected Hours, Participants shall reject orders. Any NMS Stock subject to a Regulatory Halt during Overnight Protected Hours shall not reopen during Overnight Protected Hours.
- (e) The proposed amendment also amends Section IV of the Plan to require that trading center policies and procedures comply with the overnight requirements specified in the new Section VIII.¹⁰

Overnight Protected Hours

The Participants have determined to implement overnight protections between the hours of 9:00 p.m. and 4:00 a.m. Eastern Time. The 9:00 p.m. Eastern Time commencement of the Overnight Protected Hours corresponds to the time at which the Processors will open for overnight trading, thereby ensuring that the limit up-limit down mechanism is operative from the moment overnight trading activity becomes available through the consolidated market data infrastructure. The 4:00 a.m. Eastern Time conclusion of the Overnight Protected Hours was selected to accommodate the well-established practice of issuers releasing earnings announcements, material corporate disclosures, and other price-sensitive information during pre-market hours in advance of the Regular Trading Session. By terminating Overnight Protected Hours at 4:00 a.m. Eastern Time, the Participants intend for market participants to be able to incorporate newly disclosed information into securities prices without the constraints of pricing bands based on the prior day's activity.

The Participants acknowledge that the application of price bands during Overnight Protected Hours has the potential to inhibit price discovery to some degree, insofar as the bands may constrain the range of prices at which transactions can occur during those hours. However, the Participants believe that this risk does not outweigh the significant investor protections afforded

⁹ The Primary Listing Exchanges anticipate using halt codes currently available within the Processors' specifications.

¹⁰ Unlike policies at certain ATSS, the proposed amendment does not include guidance regarding how to handle corporate actions during Overnight Protected Hours, as this decision will be left to the discretion of each listing exchange.

by the proposed amendment. In particular, the Participants' analysis¹¹ indicates that only a minority of NMS stocks would be materially impacted by the presence of price bands during Overnight Protected Hours, suggesting that the constraining effect on price discovery would be limited in scope and would not broadly impair the market's ability to reflect fundamental value. Moreover, to the extent that the price band mechanism may in certain instances restrain price movement during the overnight session, the Participants believe that this trade-off is justified by the protections that the amendment provides against erroneous trades and aberrant executions in a low-liquidity trading environment—protections that serve the interests of investors and the integrity of the national market system. Finally, in a circumstance in which orders are consistently being placed outside the bands or the price bands are otherwise limiting price discovery, Primary Listing Exchanges will be able to declare a Regulatory Halt¹² to suspend trading for the remainder of the overnight session, allowing the market to resume price discovery in the more liquid environment following the end of Overnight Protected Hours.

This calibration of the Overnight Protected Hours appropriately balances the Plan's dual objectives of preventing extraordinary volatility and facilitating price discovery: during the overnight session, when liquidity is reduced and the risk of erroneous trades or transitory gaps in liquidity is heightened, the price band mechanism will prevent trades at prices far removed from a security's recent fundamental value, thereby protecting investors who might otherwise execute transactions at aberrant prices. This is in contrast to the pre-market session, when fundamental corporate information is being disseminated and absorbed by the market, and the price discovery process will be allowed to function without impediment. Accordingly, the Participants believe that the proposed Overnight Protected Hours window removes impediments to, and perfects the mechanism of, the national market system by extending proven investor protections to a trading environment that presents the types of risks that the Plan was designed to address, while preserving the market's capacity to efficiently incorporate material new information during the pre-market period.

Overnight Price Band Calculation

The Participants have designed the Overnight Price Bands to balance the Plan's dual objectives of preventing extraordinary volatility and facilitating price discovery during overnight trading sessions. The Overnight Price Bands are calculated using two reference prices: the Closing Price and a more recent Consolidated Price representing an execution in the post-market. The use of dual reference prices is designed to mitigate the risks associated with reliance on a single closing price that may become stale or unrepresentative of current market conditions by the time overnight trading commences. Material information is frequently disseminated after the close of the Regular Trading Session, and post-market trading activity may result in prices that differ meaningfully from the Closing Price.

If the Overnight Price Bands were anchored to just one price, the bands could be misaligned with prevailing market sentiment, potentially resulting in price bands that are too restrictive impeding

¹¹ See Section 2 above.

¹² In accordance with Primary Listing Exchange rules.

legitimate price discovery based on post-market developments. By incorporating the Consolidated Price, the Overnight Price Bands dynamically account for post-market trading activity, ensuring that the bands reflect a price at which market participants have demonstrated a willingness to transact, which is aligned with ATS practice, while also incorporating the Closing Price to reflect market sentiment during Regular Trading hours. This dual-reference methodology grounds the Overnight Price Bands in demonstrated market sentiment across both the Regular Trading Session and post-market hours, providing maximum flexibility in the protections while ensuring those protections remain appropriately calibrated to actual market conditions. The Participants believe that this approach is consistent with the protection of investors and the maintenance of fair and orderly markets, and removes impediments to, and perfects the mechanism of, the national market system.

The Participants selected a Percentage Parameter of 20% for Overnight Price Bands to align with the 20% static band protections currently in place for overnight trading on ATSS, while differing from ATS approach by using two reference prices in calculating those bands. Furthermore, the Participants expect that during the initial period of overnight trading hours (commonly referred to as “23/5 trading”), when market participants are adjusting to the new structure, applying the same Percentage Parameters to all stocks in the Overnight trading session will be easier for participants to understand, balancing the interest of protecting investors with ensuring transparent market practices.

The Overnight Price Bands are also subject to minimum price band thresholds¹³ to ensure that a minimum range of permissible trading prices remains available during overnight hours. These minimum thresholds prevent the Overnight Price Bands from becoming so narrow as to unduly restrict trading activity or impede legitimate price movements, particularly for lower-priced securities where the application of percentage-based parameters alone could result in price bands of only a few cents. The Participants believe that establishing minimum price band thresholds appropriately balances investor protection against extraordinary volatility with the preservation of fair and orderly markets by ensuring that overnight trading can continue to occur within a reasonable price range, consistent with the purposes of Section 11A of the Exchange Act and Rule 608 thereunder.

Primary Listing Exchange and Processor Obligations

This proposed amendment requires the Primary Listing Exchange of an NMS Stock to calculate the price bands and disseminate them to the Processors, who will then disseminate those bands to the market. This was chosen as the approach in Phase 1 because the Processors are currently testing and implementing extensive updates¹⁴ and the Participants agreed that the most effective

¹³ For stocks with a Closing Price of \$1.00 or greater, the minimum band is \$3.00, and for stocks with a Closing Price of less than \$1.00, the minimum band size is \$1.00.

¹⁴ Including to implement 23/5 trading, implement changes to collect and disseminate odd-lot quote information, incorporating fractional share trading information, preparing for amended tick sizes, implementing a new Issue Symbol Directory Message, and transitioning to a new Consolidated Tape Plan. See Securities Exchange Act Release No. 101070 (September 18, 2024), 89 FR 81620 (October 8, 2024),

way to implement Overnight Protections would be to reduce the burden on the Processors that would have come from calculating the bands themselves. Phase 1 is designed to require minimal work from the Processors. The Processors, however, will then disseminate the bands to the public over trade and quote multicast channels via existing fields in the LULD messages starting at approximately 8:55 p.m. Eastern Time, in line with their current role during Regular Trading Hours.

Overnight Halts

At this time, the Participants have determined not to implement automatic Trading Pauses during Overnight Protected Hours, similar to ATSS which also do not implement automatic trading pauses during overnight trading sessions (ATSS simply reject orders that fall outside their bands). This approach reflects the Participants' careful consideration of the distinct characteristics of overnight trading, including significantly reduced liquidity, lower trading volumes, and fewer active market participants relative to Regular Trading Hours. During the Regular Trading Session, automatic Trading Pauses serve to provide market participants with a brief opportunity to reassess their trading interest and supply additional liquidity following a significant price movement, after which trading resumes with an auction to facilitate orderly price discovery. Instead of implementing a similar process of automatic Trading Pauses followed by an auction for the Overnight Protected Hours, Primary Listing Exchanges would instead retain discretion to announce Regulatory Halts, in accordance with Primary Listing Exchange rules, during Overnight Protected Hours, which would remain in place for the duration of the overnight trading session. The Participants have elected not to reopen trading halts with auctions during Overnight Protected Hours because they expect that there will be insufficient liquidity in the initial phase of the overnight trading session for an efficient auction to occur. Without confidence in the standard method of reopening trading following a halt, and without sufficient information to create a different method, the Participants believe that it is in the best interests of the market not to reopen trading following a halt in the overnight session.

The Participants believe that permitting the Primary Listing Exchanges to announce Regulatory Halts during Overnight Protected Hours aligns with the Plan's fundamental purpose of promoting a fair and orderly market. Under this framework, the Overnight Price Bands will continue to operate as a safeguard against trades occurring at prices that deviate significantly from a security's recent fundamental value, thereby preventing extraordinary volatility and protecting investors from executing transactions at aberrant prices. When an event occurs that a Primary Listing Exchange, in accordance with Primary Listing Exchange rules, determines merits a Regulatory Halt, the Primary Listing Exchange will have the authority, but not the obligation, to announce a Regulatory Halt if, in its judgment, such action is warranted to maintain a fair and orderly market. This discretionary approach permits the Primary Listing Exchange to evaluate the totality of the circumstances, including any material information that may be affecting the security's price, and which may also include, in certain circumstances, prevailing liquidity conditions, before determining whether a halt is necessary and appropriate.

File No. S7-30-22; Securities Exchange Act Release No. 88827 (May 6, 2020), 85 FR 28702 (May 13, 2020).

The Participants believe this framework is consistent with Section 11A of the Securities Exchange Act of 1934 and Rule 608 thereunder because it preserves the core investor protections of the limit up-limit down mechanism while the Participants analyze data on overnight trading, thereby removing impediments to, and perfecting the mechanism of, the national market system.

Ministerial Amendments

The Participants have proposed ministerial changes to update the addresses of certain Participants in Section II(A) of the Plan.

The Participants have also proposed a change to the definition of Regular Trading Hours, in Section I(S) to conform to the amended citation in Regulation NMS for the definition of Regular Trading Hours.¹⁵

3. Proposed Overnight Trading Protections Based on Current ATS Protections in Anticipation of 23/5 Exchange Trading

The Commission has recently approved applications by 24X National Exchange LLC, NYSE Arca Inc., and Nasdaq to conduct trading on a near-continuous 23/5 basis.¹⁶ These approvals represent a significant expansion of exchange trading into periods that have historically been characterized by lower liquidity, wider spreads, and the potential for increased price volatility due to the release of overnight news and developments in foreign markets. The Processors are preparing to commence overnight trading on December 6, 2026.¹⁷

The 20% Percentage Parameter proposed in this amendment reflects the existing price protection mechanisms employed by ATSs that currently operate in the overnight trading space. ATSs that currently facilitate overnight trading have generally adopted 20% trading bands as a market-wide price protection standard, although those bands are based on a single static price,¹⁸ unlike the two reference prices in this proposal.¹⁹ The Participants expect that adopting a band percentage

¹⁵ 17 CFR 242.600(b)(88). See also Securities Exchange Act Release No. 99679 (March 6, 2024), 89 FR 26428 (April 15, 2024).

¹⁶ See Securities Exchange Act Release No. 34-102400 (Feb. 11, 2025); 90 FR 9794 (Feb. 18, 2025) (order approving NYSE Arca Inc. proposal to lengthen its trading session to 22 hours per day, 5 days per week) (“NYSE Arca Approval Order”); Securities Exchange Act. Release No. 89-235 (Nov. 27, 2024); 89 FR 97092 (order approving application of 24X National Exchange, LLC for registration as a national securities exchange and to trade 23 hours per day, 5 days per week) (“24X Approval Order”); Securities Exchange Act Release No. 34- 105199 (April 10, 2026) 91 FR 20222 (April 15, 2026) (SR- NASDAQ-2025-109) (“Nasdaq Approval Order”). The Commission is also contemplating a similar proposal by Cboe EDGX Exchange, Inc. See Securities Exchange Act Release No. 34-105206 (April 10, 2026) 91 FR 20213 (April 15, 2026) (SR-CboeEDGX-2026-019).

¹⁷ See letter from Jeff Kimsey, Chair of the Operating Committees of the Equity Data Plans, dated March 23, 2026.

¹⁸ See, e.g., Blue Ocean Technologies LLC, *Frequently Asked Questions*, available at <https://blueocean-tech.io/faq/>.

¹⁹ Due to the different approaches of one vs. two reference prices with the same percentage parameters applied, this proposal could result in wider trading bands than those currently used by ATSs, although the

consistent with these established ATS practices will facilitate a smoother transition for market participants as overnight trading expands to national securities exchanges. By aligning the Overnight Price Bands with protections conceptually familiar to broker-dealers, institutional investors, and retail participants who have engaged in overnight trading through ATSs, the proposed amendment reduces operational complexity and minimizes the risk of market disruption that could arise from the introduction of materially different price protection standards. The Participants submit that this alignment serves the public interest and the protection of investors by establishing uniform expectations across trading venues, thereby promoting confidence in the integrity of overnight trading and supporting the orderly expansion of 23/5 trading to the national market system.

The Participants believe that the application of protections to these newly approved overnight trading sessions is necessary and appropriate and in the public interest, for the protection of investors and for the maintenance of fair and orderly markets. The fundamental purpose of the Plan—to prevent trades in individual NMS Stocks from occurring at prices that are not reflective of a fair and orderly market—applies with equal, if not greater, force during overnight periods when market conditions may exacerbate the risk of sudden, unanticipated price movements similar to the “Flash Crash.” The LULD mechanism is intended to reduce the negative impacts of sudden, unanticipated price movements in NMS Stocks, thereby protecting investors and promoting a fair and orderly market. Previously conducted data and analysis have demonstrated that the LULD mechanism has been largely effective at reducing the negative impacts of such price movements,²⁰ and the Participants believe protections should extend to overnight trading sessions where similar risks—or heightened risks due to reduced liquidity—may arise.

Based on an analysis of data from the ATS Blue Ocean, the Participants expect that the impact of this proposal on actual overnight trading will be minimal, although the guardrails are valuable to the outliers. Using an approximation of the proposed overnight trading bands²¹ and the closing price and the price of a stock as of 7:45 p.m. Eastern Time, an average of 0 S&P 500 stocks, 0.6 ETPs and 0.4 non-S&P 500 stocks per day, or less than 0.1% of total volume, would be impacted by the bands.

current expectation is that using two reference prices will have minimal impact on the bands the majority of the time, while capturing the reality of any extraordinary shifts in the market following the close of Regular Trading Hours.

²⁰ See, e.g., Securities Exchange Act Release No. 84843 (December 18, 2018), 83 FR 66464 (December 26, 2018).

²¹ Blue Ocean rejects orders that are 20% away from the last sale price for the security printed on a national securities exchange as of 7:30 p.m. ET, so this analysis was conducted using 18% bands as a proxy for orders likely to hit the 20% threshold of the proposed overnight trading bands. The Participants acknowledge that this analysis is unable to capture orders that are currently being cancelled or rejected for falling outside the bands, but believe that if orders were surpassing the bands, there would also be a concentration of orders that approach the bands, and so this 18% approximation should capture and reflect that reality.

Average Stock Count by Price Deviation on Blue Ocean

Notes: This chart shows the number of stocks with maximum price deviation between 10-18% and more than 18% relative to the dual benchmarks. Benchmark prices are based on the closing price and the last trade printed on SIP before 8 pm. For stocks priced above \$1, the minimum collar is \$3; for stocks with price below \$1, the minimum price band is \$1. The sample period is between Jan 1, 2025 and Mar 31, 2026 and half trading days are excluded. The sample only include orders executed between 9pm and 4am.

Distribution of BOATS Volume Relative to Benchmark Prices

Notes: This chart shows the percentage of Blue Ocean's volume executed with price deviations of 10-18% and greater than 18% relative to the dual benchmarks. Benchmark prices are based on the closing price and the last trade printed on SIP before 8 pm. For stocks priced above \$1, the minimum collar is \$3; for stocks with price below \$1, the minimum price band is \$1. The sample period is between Jan 1, 2025 and Mar 31, 2026 and half trading days are excluded. The sample only include orders executed between 9pm and 4am.

Overnight trading sessions present unique challenges for market integrity, including reduced liquidity, increased information asymmetry due to overnight news flow and global developments, and a heightened potential for erroneous trades. Implementing the proposed market protections during overnight trading sessions should limit the frequency and severity of harmful price dislocations, consistent with the purposes for which the Plan was adopted.

Indeed, the development of price band protections in the overnight trading space illustrates the organic evolution of similar safeguards in response to market need. Before national securities exchanges sought to extend their operating hours into overnight sessions, ATSS pioneered

overnight trading and independently implemented price band mechanisms to protect market participants from aberrant executions during periods of reduced liquidity. The adoption of 20% price bands by ATSS operating in this space emerged as a market-driven response to the unique risks presented by overnight trading—demonstrating that sophisticated market participants recognize the necessity of such protections. Market participants who have engaged in overnight trading through ATSS have come to rely on these safeguards. These market participants have a reasonable expectation that comparable protections will accompany the expansion of overnight trading to national securities exchanges, which the Participants believe this proposed amendment will achieve, although with some differences to the ATS approach, including by using two reference prices in order to reflect relevant market activity.

4. Phased Implementation of Overnight Protections

As noted above, the Participants propose to implement Overnight Protections in two phases. The amendments to the Plan set forth herein constitute Phase 1 of this implementation. Phase 2 is anticipated to be implemented in 2027, following a period of observation, data gathering, and assessment of overnight trading. As no national exchange currently conducts trading in the overnight session, comprehensive and reliable data on overnight trading activity remains limited, and the Participants recognize that the provisions of Phase 1 in the proposed Plan may require recalibration as empirical evidence accumulates. Phase 1 is therefore designed not only to provide meaningful protections against extraordinary volatility during overnight hours, but also to serve as a structured framework for generating the granular, real-world data necessary to evaluate and refine these overnight provisions to craft a thoughtful Phase 2.

The Participants currently expect Phase 2 to include: (1) sliding price bands that adjust based on market activity during Overnight Protected Hours without imposing an absolute limit on prices (e.g., sliding the Upper Price Band to a higher price if a security is in a prolonged limit state where the national best bid is equal to the Overnight Upper Price Band); (2) the Processors calculating and disseminating the Overnight Price Bands, rather than the Primary Listing Exchanges; and (3) recalibrated Overnight Percentage Parameters, which may be lower than the proposed parameters set forth in Section VIII(A)(3) of the Plan and which may differ between Tier 1 and Tier 2 NMS Stocks.

Each of these anticipated Phase 2 enhancements reflects the Participants' recognition that certain provisions in the current proposal—including the initial Overnight Percentage Parameters, the assignment of calculation and dissemination responsibilities, and the static nature of the price bands—may not be optimally calibrated for the unique liquidity and volatility conditions that characterize overnight trading sessions. The Participants believe that the phased approach is the most prudent and responsible means of addressing these challenges, by enabling the Plan and the Commission to collect and analyze data on overnight trading before proceeding to a more complex system of overnight protections.

The Operating Committee intends to evaluate data on overnight trading and the performance of Phase 1 in 2027 and determine the appropriate timing and specifications for Phase 2. In conducting this evaluation, the Operating Committee will analyze, among other things, the interactions between the market and Overnight Price Bands across varying liquidity conditions, the incidence and causes of any trading halts declared by Listing Exchanges, the adequacy of the

Overnight Percentage Parameters in mitigating extraordinary volatility without unduly constraining legitimate price discovery, and the operational performance of the Primary Listing Exchanges in calculating Overnight Price Bands and the Processors in disseminating them. The Participants are committed to a rigorous, evidence-based assessment and intend to work collaboratively with the Commission and its Staff throughout this process to identify additional data points or analytical methodologies that may enhance the evaluation. The Participants expect to include information regarding the operations of Phase 1 in the Plan’s quarterly reports, commencing with the quarterly report covering the first full quarter of overnight trading. Participants expect to submit a Phase 2 proposal for consideration by the Commission with sufficient time for implementation by the fourth quarter of 2027. The Participants will report on the evidence gathered on overnight trading together with its proposal for Phase 2 revisions to overnight protections.

Just as the Plan was initially approved on a trial basis²² to allow the Participants and the public to gain valuable practical experience with Plan operations, and subsequently made permanent following extensive data collection and analysis,²³ the Participants’ proposal to implement Overnight Protections in a phased approach will enable the Operating Committee, the Commission, and the market as a whole, to observe overnight trading and the effectiveness of the Overnight Protections and compile data to inform future decisions.

The Plan has always operated on the premise that the Participants will engage in a continuous data-intensive review of the National Market System and the Plan’s impact on that market. That premise carries particular force here, where the implementation of protections to Overnight Protected Hours presents novel challenges—including thinner liquidity, wider spreads, and the potential for price dislocations driven by international developments or after-hours corporate announcements—that cannot be fully anticipated or addressed through existing data alone. The current provisions of the proposal reflect the Participants’ best judgment based on available information, but the Participants recognize that certain parameters and operational assignments may require adjustment once real-world evidence becomes available. The proposed two-phased approach, based on a review of the evidence prior to implementing a final proposal, is consistent with that fundamental approach, and will enable the Operating Committee and the Commission to collaborate to review new information.

The Commission has repeatedly emphasized the importance of ongoing review and assessment to ensure that the Plan continues to achieve its objective of reducing extraordinary volatility. The Participants believe that the same data-driven approach is appropriate for overnight protections, and that the restrained approach of observing the interim effects of this Twenty-Seventh Amendment during new overnight trading hours will enable the Plan to respond to market activity with overnight protections that are effective and specifically tailored to the particular circumstances that present during overnight trading.

²² See Securities Exchange Act Release No. 67091 (May 31, 2012), 77 FR 33498 (June 6, 2012) (File No. 4-631) (“Approval Order”).

²³ See Securities Exchange Act Release No. 85623 (April 11, 2019), 84 FR 16086 (April 17, 2019) (File No. 4-631).

5. Consistency with the Purposes of the Plan and the Exchange Act

The Participants believe that the proposed amendment is necessary and appropriate in the public interest, for the protection of investors, and for the maintenance of fair and orderly markets, because extending the protections afforded by the Plan to overnight hours is consistent with the fundamental purposes of the Plan. The Plan was originally adopted to address extraordinary volatility in the securities markets and to prevent trades in individual NMS Stocks from occurring outside of Price Bands selected to maintain orderly market conditions. These objectives are equally applicable—and may be more critical—during overnight trading sessions when market conditions may be less liquid and more susceptible to price dislocations. The efficacy of current LULD mechanisms in addressing extraordinary market volatility, moreover, informs the Participants’ belief that it is appropriate to also establish price protections in the new overnight trading environment.

The Participants believe that the proposed amendment is consistent with Section 11A(a)(1)(C) of the Exchange Act, which directs the Commission to facilitate the establishment of a national market system that assures, among other things, economically efficient execution of securities transactions, fair competition among brokers and dealers and among markets, and the practicability of brokers executing investors’ orders in the best market.²⁴ Applying uniform protections across all trading centers that operate during Overnight Protected Hours promotes fair competition and ensures that investor protection does not vary based on the venue at which an order is executed during overnight hours.

This Twenty-Seventh Amendment to the Plan would enhance the public interest, protect investors, and help maintain fair and orderly markets, while removing impediments to and perfecting the mechanism of the national market system in conformance with Rule 608.²⁵ This proposed amendment establishes guardrails for overnight trading to mitigate the risk of excessive volatility in markets and will help to prevent extreme price swings and erroneous trades, which will protect investors from excessive volatility in the new overnight trading session. The amendment appropriately balances the dual objectives of preventing extraordinary volatility and facilitating price discovery, and will thus enhance confidence in the market as a whole by demonstrating the exchange industry’s thoughtful approach to implementing new market protections in the new world of 23/5 Trading.

B. Governing or Constituent Documents

The governing documents of the Processor, as defined in Section I(P) of the Plan, will not be affected by the Amendment.

C. Implementation of Amendment

The Participants will announce the operative date of the amendment (“Operative Date”), which will be subject to the completion of certain systems changes by the Processors for the Unlisted

²⁴ 15 U.S.C. 78k-1(a)(1)(C) and (a)(2).

²⁵ 17 CFR 242.608(b)(2).

Trading Privileges (UTP) Plan and Consolidated Tape Association (CTA) Plan to ensure dissemination of overnight trading bands.

D. Development and Implementation Phases

The Participants propose to implement the proposed amendment on the Operative Date. As discussed, a separate “Phase 2” proposal will be filed with the Commission at a later date. Phase 1 overnight protections will remain in place until the operative date of such Phase 2 proposal.

E. Analysis of Impact on Competition

The Participants believe that the proposed amendment does not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Exchange Act. The proposed amendment to the Plan would apply to all market participants equally and would not impose a competitive burden on one category of market participants in favor of any other category of market participant. The proposed amendment would apply to trading on all trading centers that operate during Overnight Protected Hours, and all NMS Stocks (other than rights and warrants, which are excluded from the Plan) would be subject to the amended Plan's requirements. The Participants do not believe that the proposed amendment introduces terms that are unreasonably discriminatory for the purposes of Section 11A(c)(1)(D) of the Exchange Act because it would apply to all market participants equally.

F. Written Understanding or Agreements Relating to Interpretation of, or Participation in, Plan

The Participants have no written understandings or agreements relating to interpretation of the Plan. Section II(C) of the Plan sets forth how any entity registered as a national securities exchange or national securities association may become a Participant.

G. Approval of Amendment of the Plan

Each of the Participants has approved this Twenty-Seventh Amendment in accordance with Section III(C) of the Plan. The Participants also received and incorporated feedback from the Plan Advisory Committee in preparing this proposal. Each of the Plan's Participants has executed a written amended Plan.

H. Description of Operation of Facility Contemplated by the Proposed Amendment

Not applicable.

I. Terms and Conditions of Access

Section II(C) of the Plan provides that any entity registered as a national securities exchange or national securities association under the Exchange Act may become a Participant by: (1) becoming a participant in the applicable Market Data Plans, as defined in Section I(F) of the Plan; (2) executing a copy of the Plan, as then in effect; (3) providing each then-current

Participant with a copy of such executed Plan; and (4) effecting an amendment to the Plan as specified in Section III(B) of the Plan.

J. Method of Determination and Imposition, and Amount of, Fees and Charges

This section is not applicable as the proposed amendment to the Plan does not involve fees or charges.

K. Method and Frequency of Processor Evaluation

Not applicable.

L. Dispute Resolution

Section III(C) of the Plan provides that each Participant shall designate an individual to represent the Participant as a member of an Operating Committee. No later than the initial date of the Plan, the Operating Committee shall designate one member of the Operating Committee to act as the Chair of the Operating Committee. Any recommendation for an amendment to the Plan from the Operating Committee that receives an affirmative vote of at least two-thirds of the Participants, but is less than unanimous, shall be submitted to the Commission as a request for an amendment to the Plan initiated by the Commission under Rule 608.

Respectfully submitted,

DocuSigned by:

Preamble

The Participants submit to the SEC this Plan establishing procedures to address extraordinary volatility in NMS Stocks. The procedures provide for market-wide limit up-limit down requirements that prevent trades in individual NMS Stocks from occurring outside of the specified Price Bands. These limit up-limit down requirements are coupled with Trading Pauses to accommodate more fundamental price moves. The Plan procedures are designed, among other things, to protect investors and promote fair and orderly markets. The Participants developed this Plan pursuant to Rule 608(a)(3) of Regulation NMS under the Exchange Act, which authorizes the Participants to act jointly in preparing, filing, and implementing national market system plans.

I. Definitions

(A) "Eligible Reported Transactions" shall have the meaning prescribed by the Operating Committee and shall generally mean transactions that are eligible to update the last sale price of an NMS Stock.

(B) "Exchange Act" means the Securities Exchange Act of 1934, as amended.

(C) "Limit State" shall have the meaning provided in Section VI of the Plan.

(D) "Limit State Quotation" shall have the meaning provided in Section VI of the Plan.

(E) "Lower Price Band" shall have the meaning provided in Section V of the Plan.

(F) "Market Data Plans" shall mean the effective national market system plans through which the Participants act jointly to disseminate consolidated information in compliance with Rule 603(b) of Regulation NMS under the Exchange Act.

(G) "National Best Bid" and "National Best Offer" shall have the meaning provided in Rule 600(b)(42) of Regulation NMS under the Exchange Act.

(H) "NMS Stock" shall have the meaning provided in Rule 600(b)(47) of Regulation NMS under the Exchange Act.

(I) "Opening Price" shall mean the price of a transaction that opens trading on the Primary Listing Exchange. If the Primary Listing Exchange opens with quotations, the "Opening Price" shall mean the closing price of the NMS Stock on the Primary Listing Exchange on the previous trading day, or if no such closing price exists, the last sale on the Primary Listing Exchange.

(J) "Operating Committee" shall have the meaning provided in Section III(C) of the Plan.

(K) "Participant" means a party to the Plan.

(L) "Plan" means the plan set forth in this instrument, as amended from time to time in accordance with its provisions.

(M) "Percentage Parameter" shall mean the percentages for each tier of NMS Stocks set forth in Appendix A of the Plan.

(N) "Price Bands" shall have the meaning provided in Section V of the Plan.

(O) "Primary Listing Exchange" shall mean the Participant on which an NMS Stock is listed. If an NMS Stock is listed on more than one Participant, the Participant on which the NMS Stock has been listed the longest shall be the Primary Listing Exchange.

(P) "Processor" shall mean the single plan processor responsible for the consolidation of information for an NMS Stock pursuant to Rule 603(b) of Regulation NMS under the Exchange Act.

(Q) "Pro-Forma Reference Price" shall have the meaning provided in Section V(A)(2) of the Plan.

(R) "Reference Price" shall have the meaning provided in Section V of the Plan.

(S) "Regular Trading Hours" shall have the meaning provided in Rule 600(b)(~~64~~88) of Regulation NMS under the Exchange Act. For purposes of the Plan, Regular Trading Hours can end earlier than 4:00 p.m. ET in the case of an early scheduled close.

(T) "Regulatory Halt" shall have the meaning specified in the Market Data Plans.

(U) "Reopening Price" shall mean the price of a transaction that reopens trading on the Primary Listing Exchange following a Trading Pause or a Regulatory Halt, or, if the Primary Listing Exchange reopens with quotations, the midpoint of those quotations.

(V) "SEC" shall mean the United States Securities and Exchange Commission.

(W) "Straddle State" shall have the meaning provided in Section VII(A)(2) of the Plan.

(X) "Trading center" shall have the meaning provided in Rule 600(b)(78) of Regulation NMS under the Exchange Act.

(Y) "Trading Pause" shall have the meaning provided in Section VII of the Plan.

(Z) "Upper Price Band" shall have the meaning provided in Section V of the Plan.

II. Parties

(A) List of Parties

The parties to the Plan are as follows:

- (1) 24X National Exchange LLC
One Landmark Square, 18th Floor
Stamford, Connecticut 06901
- (2) Cboe BZX Exchange, Inc.
400 South LaSalle Street
Chicago, Illinois 60605
- (3) Cboe BYX Exchange, Inc.
400 South LaSalle Street
Chicago, Illinois 60605
- (4) Cboe EDGA Exchange, Inc.
400 South LaSalle Street
Chicago, Illinois 60605
- (5) Cboe EDGX Exchange, Inc.
400 South LaSalle Street
Chicago, Illinois 60605
- (6) Financial Industry Regulatory Authority, Inc.
1735 K Street, NW
Washington, DC 20006
- (7) Investors Exchange LLC
~~[4] 3~~ World Trade Center, ~~[44th]~~ 58th
Floor
New York, New York 10007
- (8) Long Term Stock Exchange
101 Greenwich St., Suite 11A
New York, NY 10006
- (9) MEMX LLC
~~[1111 Town Square Place, Suite 520]~~
525 Washington Blvd, Suite 300
Jersey City, NJ 07310
- (10) MIAX Pearl, LLC

New York, New York 10005
- (18) NYSE Texas, Inc.
11 Wall Street
New York, New York 10005
- (B) Compliance Undertaking

By subscribing to and submitting the Plan for approval by the SEC, each Participant agrees to comply with and to enforce compliance, as required by Rule 608(c) of Regulation NMS under the Exchange Act, by its members with the provisions of the Plan. To this end, each Participant shall adopt a rule requiring compliance by its members with the provisions of the Plan, and each Participant shall take such actions as are necessary and appropriate as a participant of the Market Data Plans to cause and enable the Processor for each NMS Stock to fulfill the functions set forth in this Plan.

(C) New Participants

The Participants agree that any entity registered as a national securities exchange or national securities association under the Exchange Act may become a Participant by: (1) becoming a participant in the applicable Market Data Plans; (2) executing a copy of the Plan, as then in effect; (3) providing each then-current Participant with a copy of such executed Plan; and (4) effecting an amendment to the Plan as specified in Section III (B) of the Plan.

(D) Advisory Committee

(1) Formation. Notwithstanding other provisions of this Plan, an Advisory Committee to the Plan shall be formed and shall function in accordance with the provisions set forth in this section.

(2) Composition. Members of the Advisory Committee shall be selected for two-year terms as follows:

(A) Advisory Committee Selections. By affirmative vote of a majority of the Participants, the Participants shall select at least one representatives from each of the following categories to be members of the Advisory Committee: (1) a broker-dealer with a substantial retail investor customer base; (2) a broker-dealer with a substantial institutional investor customer base; (3) an alternative trading system; (4) a broker-dealer that primarily engages in trading for its own account; and (5) an investor.

(3) Function. Members of the Advisory Committee shall have the right to submit their views to the Operating Committee on Plan matters, prior to a decision by the Operating Committee on such matters. Such matters shall include, but not be limited to, proposed material amendments to the Plan.

(4) Meetings and Information. Members of the Advisory Committee shall have the right to attend meetings of the Operating Committee and to receive any information concerning Plan matters; provided, however, that the Operating Committee may meet in executive session if, by affirmative vote

of a majority of the Participants, the Operating Committee determines that an item of Plan business requires confidential treatment.

III. Amendments to Plan

(A) General Amendments

Except with respect to the addition of new Participants to the Plan, any proposed change in, addition to, or deletion from the Plan shall be effected by means of a written amendment to the Plan that: (1) sets forth the change, addition, or deletion; (2) is executed on behalf of each Participant; and, (3) is approved by the SEC pursuant to Rule 608 of Regulation NMS under the Exchange Act, or otherwise becomes effective under Rule 608 of Regulation NMS under the Exchange Act.

(B) New Participants

With respect to new Participants, an amendment to the Plan may be effected by the new national securities exchange or national securities association executing a copy of the Plan, as then in effect (with the only changes being the addition of the new Participant's name in Section II(A) of the Plan) and submitting such executed Plan to the SEC for approval. The amendment shall be effective when it is approved by the SEC in accordance with Rule 608 of Regulation NMS under the Exchange Act or otherwise becomes effective pursuant to Rule 608 of Regulation NMS under the Exchange Act.

(C) Operating Committee

(1) Each Participant shall select from its staff one individual to represent the Participant as a member of an Operating Committee, together with a substitute for such individual. The substitute may participate in deliberations of the Operating Committee and shall be considered a voting member thereof only in the absence of the primary representative. Each Participant shall have one vote on all matters considered by the Operating Committee. No later than the initial date of Plan operations, the Operating Committee shall designate one member of the Operating Committee to act as the Chair of the Operating Committee.

The Operating Committee shall monitor the procedures established pursuant to this Plan and advise the Participants with respect to any deficiencies, problems, or recommendations as the Operating Committee may deem appropriate. The Operating Committee shall establish specifications and procedures for the implementation and operation of the Plan that are consistent with the provisions of this Plan and the Appendixes thereto. With respect to matters in this paragraph, Operating Committee decisions shall be approved by a simple majority vote.

(2) Any recommendation for an amendment to the Plan from the Operating Committee that receives an affirmative vote of at least two-thirds of the Participants, but is less than unanimous, shall be submitted to the SEC as a request for an amendment to the Plan initiated by the Commission under Rule 608 of Regulation NMS.

IV. Trading Center Policies and Procedures

All trading centers in NMS Stocks, including both those operated by Participants and those operated by members of Participants, shall establish, maintain, and enforce written policies and procedures that are reasonably designed to comply with the limit up - limit down requirements specified in Sections VI and VIII of the Plan, and to comply with the Trading Pauses specified in Section VII of the Plan.

V. Price Bands

(A) Calculation and Dissemination of Price Bands

(1) The Processor for each NMS stock shall calculate and disseminate to the public a Lower Price Band and an Upper Price Band during Regular Trading Hours for such NMS Stock. The Price Bands shall be based on a Reference Price for each NMS Stock that equals the arithmetic mean price of Eligible Reported Transactions for the NMS stock over the immediately preceding five-minute period (except for periods following openings and reopenings, which are addressed below). If no Eligible Reported Transactions for the NMS Stock have occurred over the immediately preceding five-minute

period, the previous Reference Price shall remain in effect. The Price Bands for an NMS Stock shall be calculated by applying the Percentage Parameter for such NMS Stock to the Reference Price, with the Lower Price Band being a Percentage Parameter below the Reference Price, and the Upper Price Band being a Percentage Parameter above the Reference Price. The Price Bands shall be calculated during Regular Trading Hours. Between 3:35 p.m. and 4:00 p.m. ET, or in the case of an early scheduled close, during the last 25 minutes of trading before the early scheduled close, the Price Bands shall be calculated by applying double the Percentage Parameters set forth in Appendix A for (i) all Tier 1 NMS Stocks and (ii) Tier 2 NMS Stocks priced equal to or below \$3.00. If the Processor has not yet disseminated Price Bands, but a Reference Price is available, a trading center may calculate and apply Price Bands based on the same Reference Price that the Processor would use for calculating such Price Bands until such trading center receives Price Bands from the Processor. If, under Section VII(B)(2), the Primary Listing Exchange notifies the Processor that it is unable to reopen an NMS Stock due to a systems or technology issue and it has not declared a Regulatory Halt, the Processor will calculate and disseminate Price Bands by applying triple the Percentage Parameters set forth in Appendix A for the first 30 seconds such Price Bands are disseminated.

(2) The Processor shall calculate a Pro-forma Reference Price on a continuous basis during Regular Trading Hours, as specified in Section V(A)(1) of the Plan. If a Pro-forma Reference Price has not moved by 1% or more from the Reference Price currently in effect, no new Price Bands shall be disseminated, and the current Reference Price shall remain the effective Reference Price. When the Pro-forma Reference Price has moved by 1% or more from the Reference Price currently in effect, the Pro-forma Reference Price shall become the Reference Price, and the Processor shall disseminate new Price Bands based on the new Reference Price; provided, however, that each new Reference Price shall remain in effect for at least 30 seconds.

(B) Openings

(1) Except when a Regulatory Halt is in effect at the start of Regular Trading Hours, the first

Reference Price for a trading day shall be the Opening Price on the Primary Listing Exchange in an NMS Stock if such Opening Price occurs less than five minutes after the start of Regular Trading Hours.

During the period less than five minutes after the Opening Price, a Pro-Forma Reference Price shall be updated on a continuous basis to be the arithmetic mean price of Eligible Reported Transactions for the NMS Stock during the period following the Opening Price (including the Opening Price), and if it differs from the current Reference Price by 1% or more shall become the new Reference Price, except that a new Reference Price shall remain in effect for at least 30 seconds. Subsequent Reference Prices shall be calculated as specified in Section V(A) of the Plan.

(2) If the Opening Price on the Primary Listing Exchange in an NMS Stock does not occur within five minutes after the start of Regular Trading Hours, the first Reference Price for a trading day shall be the arithmetic mean price of Eligible Reported Transactions for the NMS Stock over the preceding five minute time period, and subsequent Reference Prices shall be calculated as specified in Section V(A) of the Plan.

(C) Reopenings

(1) Following a Trading Pause in an NMS Stock, and if the Primary Listing Exchange has not declared a Regulatory Halt, if the Primary Listing Exchange reopens trading with a transaction or quotation that does not include a zero bid or zero offer, the next Reference Price shall be the Reopening Price on the Primary Listing Exchange. Subsequent Reference Prices shall be determined in the manner prescribed for normal openings, as specified in Section V(B)(1) of the Plan. If the Primary Listing Exchange notifies the Processor that it is unable to reopen an NMS Stock due to a systems or technology issue, or if the Primary Listing Exchange reopens trading with a quotation that has a zero bid or zero offer, or both, the next Reference Price shall be the last effective Price Band that was in a Limit State before the Trading Pause. Subsequent Reference Prices shall be calculated as specified in Section V(A) of the Plan.

(2) Following a Regulatory Halt, the next Reference Price shall be the Opening or Reopening

Price on the Primary Listing Exchange if such Opening or Reopening Price occurs within five minutes after the end of the Regulatory Halt, and subsequent Reference Prices shall be determined in the manner prescribed for normal openings, as specified in Section V(B)(1) of the Plan. If such Opening or Reopening Price has not occurred within five minutes after the end of the Regulatory Halt, the Reference Price shall be equal to the arithmetic mean price of Eligible Reported Transactions for the NMS Stock over the preceding five minute time period, and subsequent Reference Prices shall be calculated as specified in Section V(A) of the Plan.

VI. Limit Up-Limit Down Requirements

(A) Limitations on Trades and Quotations Outside of Price Bands

(1) All trading centers in NMS Stocks, including both those operated by Participants and those operated by members of Participants, shall establish, maintain, and enforce written policies and procedures that are reasonably designed to prevent trades at prices that are below the Lower Price Band or above the Upper Price Band for an NMS Stock. Single-priced opening, reopening, and closing transactions on the Primary Listing Exchange, however, shall be excluded from this limitation. In addition, any transaction that both (i) does not update the last sale price (except if solely because the transaction was reported late or because the transaction was an odd-lot sized transaction), and (ii) is excepted or exempt from Rule 611 under Regulation NMS shall be excluded from this limitation.

(2) When a National Best Bid is below the Lower Price Band or a National Best Offer is above the Upper Price Band for an NMS Stock, the Processor shall disseminate such National Best Bid or National Best Offer with an appropriate flag identifying it as non-executable. When a National Best Offer is equal to the Lower Price Band or a National Best Bid is equal to the Upper Price Band for an NMS Stock, the Processor shall distribute such National Best Bid or National Best Offer with an appropriate flag identifying it as a "Limit State Quotation".

(3) All trading centers in NMS Stocks, including both those operated by Participants and those operated by members of Participants, shall establish, maintain, and enforce written policies and procedures that are reasonably designed to prevent the display of offers below the Lower Price Band and bids above the Upper Price Band for an NMS Stock. The Processor shall disseminate an offer below the Lower Price Band or bid above the Upper Price Band that may be submitted despite such reasonable policies and procedures, but with an appropriate flag identifying it as non-executable; provided, however, that any such bid or offer shall not be included in National Best Bid or National Best Offer calculations.

(B) Entering and Exiting a Limit State

(1) All trading for an NMS Stock shall immediately enter a Limit State if the National Best Offer equals the Lower Price Band and does not cross the National Best Bid, or the National Best Bid equals the Upper Price Band and does not cross the National Best Offer.

(2) When trading for an NMS Stock enters a Limit State, the Processor shall disseminate this information by identifying the relevant quotation (*i.e.*, a National Best Offer that equals the Lower Price Band or a National Best Bid that equals the Upper Price Band) as a Limit State Quotation. At this point, the Processor shall cease calculating and disseminating updated Reference Prices and Price Bands for the NMS Stock until either trading exits the Limit State or trading resumes with an opening or re-opening as provided in Section V.

(3) Trading for an NMS Stock shall exit a Limit State if, within 15 seconds of entering the Limit State, the entire size of all Limit State Quotations are executed or cancelled.

(4) If trading for an NMS Stock exits a Limit State within 15 seconds of entry, the Processor shall immediately calculate and disseminate updated Price Bands based on a Reference Price that equals the arithmetic mean price of Eligible Reported Transactions for the NMS Stock over the immediately

preceding five-minute period (including the period of the Limit State).

(5) If trading for an NMS Stock does not exit a Limit State within 15 seconds of entry, the Limit State will terminate when the Primary Listing Exchange declares a Trading Pause pursuant to Section VII of the Plan or at the end of Regular Trading Hours.

VII. Trading Pauses

(A) Declaration of Trading Pauses

(1) If trading for an NMS Stock does not exit a Limit State within 15 seconds of entry during Regular Trading Hours, then the Primary Listing Exchange shall declare a Trading Pause for such NMS Stock and shall notify the Processor.

(2) The Primary Listing Exchange may also declare a Trading Pause for an NMS Stock when an NMS Stock is in a Straddle State, which is when National Best Bid (Offer) is below (above) the Lower (Upper) Price Band and the NMS Stock is not in a Limit State, and trading in that NMS Stock deviates from normal trading characteristics such that declaring a Trading Pause would support the Plan's goal to address extraordinary market volatility. The Primary Listing Exchange shall develop policies and procedures for determining when it would declare a Trading Pause in such circumstances. If a Trading Pause is declared for an NMS Stock under this provision, the Primary Listing Exchange shall notify the Processor.

(3) The Processor shall disseminate Trading Pause information to the public. No trades in an NMS Stock shall occur during a Trading Pause, but all bids and offers may be displayed.

(B) Reopening of Trading During Regular Trading Hours

(1) Five minutes after declaring a Trading Pause for an NMS Stock, and if the Primary Listing Exchange has not declared a Regulatory Halt, the Primary Listing Exchange shall attempt to reopen trading using its established reopening procedures. The Processor will publish the following information that the Primary Listing Exchange provides to the Processor in connection with such reopening: auction

reference price; auction collars; and number of extensions to the reopening auction. The Trading Pause shall end when the Primary Listing Exchange reports a Reopening Price.

(2) The Primary Listing Exchange shall notify the Processor if it is unable to reopen trading in an NMS Stock due to a systems or technology issue and if it has not declared a Regulatory Halt. The Processor shall disseminate this information to the public.

(3) Trading centers may not resume trading in an NMS Stock following a Trading Pause without Price Bands in such NMS Stock.

(4) The Processor shall update the Price Bands as set forth in Section V(C)(1) - (2) of the Plan after receiving notification from the Primary Listing Exchange of a Reopening Price following a Trading Pause (or a resume message in the case of a reopening quote that has a zero bid or zero offer, or both) or that it is unable to reopen trading following a Trading Pause due to a systems or technology issue, provided that if the Primary Listing Exchange is unable to reopen due to a systems or technology issue, the update to the Price Bands will be no earlier than ten minutes after the beginning of the Trading Pause.

(C) Trading Pauses Within Ten Minutes of the End of Regular Trading Hours

(1) If an NMS Stock is in a Trading Pause during the last ten minutes of trading before the end of Regular Trading Hours, the Primary Listing Exchange shall not reopen trading and shall attempt to execute a closing transaction using its established closing procedures. All trading centers may begin trading the NMS Stock when the Primary Listing Exchange executes a closing transaction.

(2) If the Primary Listing Exchange does not execute a closing transaction within five minutes after the end of Regular Trading Hours, all trading centers may begin trading the NMS Stock.

VIII. Overnight Protections

(A) For the purposes of this section VIII, the following definitions shall apply:

(1) “Closing Price” of an NMS Stock shall mean the Listing Market Official Closing Price of an NMS Stock, adjusted for relevant corporate actions.

(2) “Consolidated Price” shall mean the consolidated last round lot sale price of an NMS Stock as of 7:45 p.m., Eastern Time, adjusted for relevant corporate actions.

(3) “Overnight Percentage Parameter” shall mean 20% for both Tier 1 and Tier 2 NMS Stocks and non-leveraged ETPs; the Overnight Percentage Parameters for a leveraged ETP shall be 20%, multiplied by the leverage ratio of such product.

(4) “Overnight Price Bands” shall have the meaning provided in Section VIII(B)(1) of the Plan.

(5) “Overnight Protected Hours” will begin at 9:00 p.m. Eastern Time on Sunday through Thursday and conclude at 4:00 a.m. Eastern Time on the next calendar day.

(6) “Overnight Reference Prices” shall mean the two reference prices used for calculating Overnight Price Bands: (i) the Closing Price; and (ii) the Consolidated Price.

Any term not defined in this Section VIII(A) shall have the meaning assigned to it in Section I.

(B) Overnight Price Bands

(1) The Primary Listing Exchange for each NMS Stock shall calculate and disseminate to the Processors an Overnight Lower Price Band and an Overnight Upper Price Band (each as defined below) to be disseminated by the Processors and applied during Overnight Protected Hours for such NMS Stock. The Overnight Price Bands for an NMS Stock shall be calculated by applying the Overnight Percentage Parameter for such NMS Stock to the Overnight Reference Prices. The Overnight Lower Price Band shall be an Overnight Percentage Parameter below the lower of the two Overnight Reference Prices, and the Overnight Upper Price Band shall be an Overnight Percentage Parameter above the higher of the two Overnight Reference Prices.

(2) Minimum Price Bands. For any NMS Stock with a Closing Price of less than \$1.00, the minimum Overnight Upper Price Band and the minimum Overnight Lower Price Band shall each be \$1.00 from the applicable Overnight Reference Price. For any NMS Stock with a Closing Price of \$1.00 or more, the minimum Overnight Upper Price Band and the minimum Overnight Lower Price Band shall each be \$3.00 from the applicable Overnight Reference Price. The Minimum Price Band for a leveraged ETP shall be multiplied by the leverage ratio of such product.

(3) The Primary Listing Exchange for each NMS Stock shall be responsible for determining the Overnight Reference Prices and calculating the Overnight Price Bands. Each Primary Listing Exchange shall transmit the calculated Overnight Price Bands to the Processors no later than 8:55 p.m. Eastern Time.

(4) The Processors shall disseminate to the public the Overnight Price Bands provided by the Primary Listing Exchange prior to 9:00 p.m. Eastern Time.

(C) All trading centers in NMS Stocks that are operative during Overnight Protected Hours, including both those operated by Participants and those operated by members of Participants, shall establish, maintain, and enforce written policies and procedures that are reasonably designed to prevent trades at prices that are below the Overnight Lower Price Band or above the Overnight Upper Price Band for an NMS Stock during Overnight Protected Hours.

(D) During the Overnight Protected Hours, the Primary Listing Exchange for an NMS Stock may declare a Regulatory Halt, in accordance with Primary Listing Exchange rules. In the event the Primary Listing Exchange declares a Regulatory Halt it shall notify the Processor, which shall disseminate notice of the halt. Once a Regulatory Halt is declared, trading in such NMS stock will not reopen during Overnight Protected Hours.

VIIIX. Implementation

The initial date of Plan operations shall be April 8, 2013. Overnight Protections, as described in

Section VIII, are expected to commence on December 6, 2026.

IX. Withdrawal from Plan

If a Participant obtains SEC approval to withdraw from the Plan, such Participant may withdraw from the Plan at any time on not less than 30 days' prior written notice to each of the other Participants.

At such time, the withdrawing Participant shall have no further rights or obligations under the Plan.

XI. Counterparts and Signatures

The Plan may be executed in any number of counterparts, no one of which need contain all signatures of all Participants, and as many of such counterparts as shall together contain all such signatures shall constitute one and the same instrument.

IN WITNESS THEREOF, this Plan has been executed as of the ___ day of _____ 2026 by each of the parties hereto.

Appendix A - Percentage Parameters

I. Tier 1 NMS Stocks

(1) Tier 1 NMS Stocks shall include all NMS Stocks included in the S&P 500 Index and the Russell 1000 Index, and the exchange-traded products ("ETP") identified as Schedule 1 to this Appendix. Schedule 1 to the Appendix will be reviewed and updated semi-annually based on the fiscal year by the Primary Listing Exchange to add ETPs that meet the criteria, or delete ETPs that are no longer eligible. To determine eligibility for an ETP to be included as a Tier 1 NMS Stock, all ETPs across multiple asset classes and issuers, including domestic equity, international equity, fixed income, currency, and commodities and futures will be identified. Leveraged ETPs will be excluded and the list will be sorted by notional consolidated average daily volume ("CADY"). The period used to measure CADY will be from the first day of the previous fiscal half year up until one week before the beginning of the next fiscal half year. Daily volumes will be multiplied by closing prices and then averaged over the period. ETPs, including inverse ETPs, that trade over \$2,000,000 CADY will be eligible to be included as a Tier 1 NMS Stock. The semi-annual updates to Schedule 1 do not require an amendment to the Plan. The Primary Listing Exchanges will maintain the updated Schedule 1 on their respective websites.

(2) The Percentage Parameters for Tier 1 NMS Stocks with a Reference Price more than \$3.00 shall be 5%.

(3) The Percentage Parameters for Tier 1 NMS Stocks with a Reference Price equal to \$0.75 and up to and including \$3.00 shall be 20%.

(4) The Percentage Parameters for Tier 1 NMS Stocks with a Reference Price less than \$0.75 shall be the lesser of (a) \$0.15 or (b) 75%.

(5) The Reference Price used for determining which Percentage Parameter shall be applicable during a trading day shall be based on the closing price of the NMS Stock on the Primary

Listing Exchange on the previous trading day, or if no closing price exists, the last sale on the Primary Listing Exchange reported by the Processor.

II. Tier 2 NMS Stocks

(1) Tier 2 NMS Stocks shall include all NMS Stocks other than those in Tier 1, provided, however, that all rights and warrants are excluded from the Plan.

(2) The Percentage Parameters for Tier 2 NMS Stocks with a Reference Price more than \$3.00 shall be 10%.

(3) The Percentage Parameters for Tier 2 NMS Stocks with a Reference Price equal to \$0.75 and up to and including \$3.00 shall be 20%.

(4) The Percentage Parameters for Tier 2 NMS Stocks with a Reference Price less than \$0.75 shall be the lesser of (a) \$0.15 or (b) 75%.

(5) Notwithstanding the foregoing, the Percentage Parameters for a Tier 2 NMS Stock that is a leveraged ETP shall be the applicable Percentage Parameter set forth in clauses (2), (3), or (4) above, multiplied by the leverage ratio of such product.

(6) The Reference Price used for determining which Percentage Parameter shall be applicable during a trading day shall be based on the closing price of the NMS Stock on the Primary Listing Exchange on the previous trading day, or if no closing price exists, the last sale on the Primary Listing Exchange reported by the Processor.

Appendix B -- Data and Reporting

I. Data Provision. The Commission may request from the Primary Listing Exchanges the below data that is not otherwise publicly available. The requested data shall be collected and transmitted to the Commission in an agreed-upon format, to be provided 30 calendar days following the date of the request, or such other date as agreed upon by the Commission and Primary Listing Exchange. Data collected in connection with a Commission request shall be transmitted to the Commission with a request for confidential treatment under the Freedom of Information Act, 5 U.S.C. § 552, and the Commission's rules and regulations thereunder. This section shall expire at the time the below data becomes available via the National Market System Plan Governing the Consolidated Audit Trail or becomes publicly available.

- A. Data set of all orders entered during halts or Trading Pauses
 - 1. Normal or Auction Only orders, Arrivals, Changes, Cancels, # shares, limit/market, side, Limit State side
 - 2. Pipe delimited with field name as first record
- B. Data set of order events received during Limit States
- C. Summary data on order flow of arrivals and cancellations for each 15-second period for discrete time periods and sample stocks to be determined by the SEC in subsequent data requests. Must indicate side(s) of Limit State.
 - 1. Market/marketable sell orders arrivals and executions
 - a. Count
 - b. Shares
 - c. Shares executed
 - 2. Market/marketable buy orders arrivals and executions
 - a. Count
 - b. Shares
 - c. Shares executed

3. Count arriving, volume arriving and shares executing in limit sell orders above NBO mid-point
4. Count arriving, volume arriving and shares executing in limit sell orders at or below NBBO mid-point (non-marketable)
5. Count arriving, volume arriving and shares executing in limit buy orders at or above NBBO mid-point (non-marketable)
6. Count arriving, volume arriving and shares executing in limit buy orders below NBBO mid-point
7. Count and volume arriving of limit sell orders priced at or above NBBO mid-point plus \$0.05
8. Count and volume arriving of limit buy orders priced at or below NBBO mid-point minus \$0.05
9. Count and volume of (3-8) for cancels
10. Include: ticker, date, time at start, time of Limit State, all data item fields in 1, last sale prior to 15-second period (null if no trades today), range during 15-second period, last trade during 15-second period

II. Reporting

A. Annual Report. No later than March 31, 2020 and annually thereafter, the Operating Committee, in consultation with the Advisory committee, will provide the Commission and make publicly available a report containing key information concerning the Plan's performance during the preceding calendar year which shall include the following items: (1) an update on the Plan's operations; (2) an analysis of any amendments to the Plan implemented during the period covered by the report; and (3) an analysis of potential material emerging issues that may directly impact the operation of the Plan.

1. **Update on the Plan's Operations.** This section of the Annual Report shall analyze the Plan's operations during the covered period, including a discussion of any areas of the Plan's operation that require additional analysis. In particular, this section of the Annual Report shall examine the calibration of the parameters set forth in the Plan (e.g., Price Bands,

duration of Limit States, impact of Straddle States, duration of Trading Pauses, and the performance of reopening procedures following a Trading Pause). This section of the Annual Report also shall consider stock characteristics and variations in market conditions over time, and may include tests that differentiate results for different characteristics, both in isolation and in combination. This section of the Annual Report shall separately analyze the impact and operations of overnight protections implemented during Overnight Protected Hours.

2. Analysis of Amendments Implemented. This section of the Annual Report shall provide an analysis of any amendments implemented during the covered period. The analysis shall include a discussion of any such amendment's operation and its impact on the overall operation of the Plan.

3. Analysis of Emerging Issues. This section of the Annual Report should vary from year-to-year and will include a discussion and analysis of the Plan's operation during a significant market event that may have occurred during the covered period. This section shall also include any additional analyses performed during the covered period on issues that were raised in previous Annual Reports.

B. Quarterly Data. Thirty days following the end of each calendar quarter, the Operating Committee shall provide the Commission and make publicly available a report ("Monitoring Report") including basic statistics aggregated across primary listing exchanges regarding the Plan's operation during the preceding calendar quarter, as well as data aggregated across primary listing exchanges from the previous 12 quarters beginning with the calendar quarter covered by the first Monitoring Report. The purpose of the Monitoring Report is to identify trends in the performance and impact of the Plan on market activity. The Monitoring Report shall include data on the following events for each month during the preceding calendar quarter:

1. Limit States, Trading Pauses, Straddle States, and Clearly Erroneous Events

a. Definitions. For the purpose of this Section B.1 and B.2 below, the following definitions apply:

i. "Category" means the following categories of securities:

- 1) Tier 1 non-ETP securities > \$3.00
- 2) Tier 1 non-ETP securities \geq \$0.75 and \leq \$3.00
- 3) Tier 1 non-ETP securities < \$0.75
- 4) Tier 1 non-leveraged ETPs > \$3.00
- 5) Tier 1 non-leveraged ETPs \geq \$0.75 and \leq \$3.00
- 6) Tier 1 non-leveraged ETPs < \$0.75
- 7) Tier 1 leveraged ETPs > \$3.00
- 8) Tier 1 leveraged ETPs \geq \$0.75 and \leq \$3.00
- 9) Tier 1 leveraged ETPs < \$0.75
- 10) Tier 2 non-ETPs > \$3.00
- 11) Tier 2 non-ETPs \geq \$0.75 and \leq \$3.00
- 12) Tier 2 non-ETPs < \$0.75
- 13) Tier 2 non-leveraged ETPs > \$3.00
- 14) Tier 2 non-leveraged ETPs \geq \$0.75 and \leq \$3.00
- 15) Tier 2 non-leveraged ETPs < \$0.75
- 16) Tier 2 leveraged ETPs > \$3.00
- 17) Tier 2 leveraged ETPs \geq \$0.75 and \leq \$3.00
- 18) Tier 2 leveraged ETPs < \$0.75

ii. "Time of Day" means the following time spans:

- 1) Opening (prior to 9:45 am ET)
- 2) Regular (between 9:45 am ET and 25 minutes prior to the end of core trading hours)
- 3) Closing (the last 25 minutes of core trading hours)
- 4) Within five minutes of a Trading Pause reopen or IPO open

b. Limit States. The Monitoring Report will include:

i. Monthly distribution statistics (mean, median, 25th percentile, and maximum) on the number of Limit States per day, broken out by Category and Time of Day.

ii. Monthly distribution statistics (mean, median, 25th percentile, and maximum) on the number of NMS Stocks that experienced more than one Limit State on a single day, broken out by Category.

- m. Monthly distribution statistics (mean, median, 90th percentile, and 99th percentile) on the number of Limit States experienced per day by individual NMS Stocks that had more than one Limit State on a single day, broken out by Category.
- lv. Monthly distribution statistics (mean, median, 90th percentile, and 99th percentile) on the total length of Limit States experienced per day by individual NMS Stocks that had more than one Limit State on a single day, broken out by Category.
- c. Trading Pauses. The Monitoring Report will include:
 - 1. Monthly distribution statistics (mean, median, 25th percentile, and maximum) on the number of Trading Pauses per day, broken out by Category and Time of Day.
 - 11. Monthly distribution statistics (mean, median, 25th percentile, and maximum) on the number of NMS Stocks that experienced more than one Trading Pause on a single day, broken out by Category.
 - m. Monthly distribution statistics (mean, median, 90th percentile, and maximum) on the number of Trading Pauses per day experienced by individual NMS Stocks having more than one Trading Pause on a single day, broken out by Category.
- d. Straddle States. The Monitoring Report will include:
 - 1. Monthly distribution statistics (mean, median, 25th percentile, and maximum) on the number of Straddle States per day, broken out by Category and Time of Day.

11. Monthly distribution statistics (mean, median, 25th percentile, and maximum) on the number of NMS Stocks that experienced more than one Straddle State on a single day, broken out by Category.
 111. Monthly distribution statistics (mean, median, 90th percentile, and 99.9th percentile) on the total time spent in a Straddle State per day for individual NMS Stocks experiencing one or more Straddle States on a single day, broken out by Category.
- e. The Monitoring Report will include the number of Clearly Erroneous Events per day for all NMS Stocks that occurred during the time when Price Bands are disseminated by the Processor, broken out by Category and Time of Day.

2. Reopening Data

- a. Definitions. For the purpose of this Section B.2, the following definitions apply:
1. "Type of Reopening" means either (1) manual or (2) automated.
 11. "Category" means the following categories of securities:
 - 1) Tier 1 non-ETP securities
 - 2) Tier 1 non-leveraged ETPs
 - 3) Tier 1 leveraged ETPs
 - 4) Tier 2 non-ETP securities
 - 5) Tier 2 non-leveraged ETPs
 - 6) Tier 2 leveraged ETPs
 11. "Length of the Trading Pause" means the following durations:
 - 1) less than 6 minutes (for manual reopenings) or no extensions of the Trading Pause (for automated reopenings);
 - 2) 6 to 10 minutes (for manual reopenings) or one extension of the Trading Pause (for automated reopenings);
 - 3) more than 10 minutes (for manual reopenings) or more than one

extension of the Trading Pause (for automated reopenings)

- b. The Monitoring Report will include the following monthly data on reopenings:
 - i. The number of Trading Pauses per month, broken out by (1) Type of Reopening, (2) Category, and (3) Length of the Trading Pause.
 - ii. Monthly distribution statistics (mean, median, 90th percentile, and 99th percentile) on the duration of each Trading Pause, broken out by (1) Type of Reopening and (2) Category.
- m. The number of Trading Pauses ending in a:
 - 1) trade;
 - 2) quote; and
 - 3) potential closing auction,broken out by (a) Type of Reopening, (b) Category, and (c) Length of Trading Pause.
- iv. For Trading Pauses in NMS Stocks preceded by a Limit Up state, monthly distribution statistics (mean, median, 90th percentile, and 99th percentile) on the percentage price change from the Limit Up pricing that triggered the Trading Pause to the reopening price on exiting the Trading Pause (i.e., the reopening trade or midpoint price), broken out by (1) Category and (2) whether the Trading Pause ended in a trade or (3) in a quote (i.e., the reopening price was a midpoint).
- v. For Trading Pauses in NMS Stocks preceded by a Limit Down state, monthly distribution statistics (mean, median, 90th percentile, and 99th percentile) on the percentage price change from the Limit Down pricing

that triggered the Trading Pause to the reopening price on exiting the Trading Pause (i.e., the reopening trade or midpoint price), broken out by (1) Category and (2) whether the Trading Pause ended in a trade or (3) in a quote (i.e., the reopening price was a midpoint).

- v1. For Trading Pauses in NMS Stocks where the reopening process ended in a trade or quote (with resulting reference price equal to the midpoint of that quote), monthly distribution statistics (mean, median, 90th percentile, and 99th percentile) on the percentage price change from the reopening price on exiting the Trading Pause (i.e., the reopening trade or midpoint price) to
- 1) the highest price of all last sale eligible trades;
 - 2) the lowest price of all last sale eligible trades; and
 - 3) the trade-weighted average price of all last sale eligible trades for the five minutes following the conclusion of the Trading Pause, broken out by (a) Category, (b) whether the Trading Pause was preceded by a Limit Up state or (c) a Limit Down state, and (d) whether the Trading Pause ended in a trade or (e) in a quote (i.e., the reopening price was a midpoint).

3. Overnight Data. The Monitoring Report will include monthly data on overnight protections, such to be determined by the Participants.

C. **Reports on Market Events.** At the Commission's request, the Operating Committee shall provide the Commission and make publicly available a report analyzing the Plan's operation during a significant market event that (1) materially impacted the trading of more than one security across multiple Trading Centers; and (2) is directly related to or implicating the performance of the

Plan. Such report shall be provided to the Commission no later than 30 days following the Commission's request, or at a later date as agreed upon between the Commission and the Operation Committee. The requirement to submit a report under this section may be satisfied by including the required analysis within an Annual Report.
