RE: In support of File Number 4-774

Dear Sir/Madam,

We support this petition to "Request the Commission develop mandatory rules for public companies to disclose high-quality, comparable, decision-useful information concerning BLM Pledge fulfillment" and note that a major bank has estimated the economy has lost \$16 trillion "as a result of discrimination against African Americans."

This estimate covers that cost of discrimination "in a range of areas, including in education and access to business loans..U.S. GDP totaled \$19.5 trillion last year."

The study also notes that "the economy would see a \$5 trillion boost over the next five years if the U.S. were to tackle key areas of discrimination against African Americans." See:

Another study by consultants McKinsey and Company estimated that "the racial wealth gap also constrains the US economy as a whole. It is estimated that its dampening effect on consumption and investment will cost the US economy between \$1 trillion and \$1.5 trillion between 2019 and 2028—4 to 6 percent of the projected GDP in 2028." See: <https://www.mckinsey.com/industries/public-and-social-sector/our-insights/the-economic-impact-of-closing-the-racial-wealth-gap#>

We believe this petition will help to eliminate discrimination against African Americans.

Thank you.
