

Honorable Chairman:

As a concerned consumer and constituent, I am calling on the U.S. Securities and Exchange Commission to ensure that conflict minerals legislation passed as a part of the Dodd-Frank Wall Street Reform Bill, deliver robustly on its intended purpose. To ensure that companies conduct thorough checks and accurately disclose critical information to the public, we believe the regulations promulgated should incorporate the following principles:

1. **Disclosure requirements that are specific.**
2. **Equal reporting standards for all four minerals.**
3. **All manufacturing companies must be included.**

Sincerely,

*Daniel Henkel*
