**Date:** November 18, 2010

**Re:** Section 1502 of the Dodd-Frank Wall Street Reform and Consumer Protection Act Regarding Conflict Minerals

---

On November 18, 2010, Chairman Mary L. Schapiro met with the following individuals: John Prendergast and Darren Fenwick of The Enough Project; Sasha Lezhnev of Grassroots Reconciliation Group; and Deborah R. Meshulam of DLA Piper. Chairman Schapiro was joined by SEC Chief of Staff Didem Nisanci, SEC Deputy Chief of Staff Kayla J. Gillan, Division of Corporation Finance Director Meredith Cross, and Felicia Kung and John Fieldsend of the Division of Corporation Finance. The participants discussed their views regarding the implementation of Section 1502 of the Dodd-Frank Wall Street Reform and Consumer Protection Act, which relates to reporting requirements regarding conflict minerals originating in the Democratic Republic of the Congo and adjoining countries. The Enough Project provided the attached petition at the meeting.

## **Citizen Petition to U.S. Securities and Exchange Commission Regarding Section 1502 of the Dodd-Frank Act**

18 November 2010

Honorable Commissioners:

As concerned consumers and constituents here in the United States, we are calling on the U.S. Securities and Exchange Commission to ensure that conflict minerals legislation passed as a part of the Dodd-Frank Wall Street Reform Bill, deliver robustly on its intended purpose: **Clean and transparent supply chains that do not source minerals from conflict mines in eastern Congo or contribute to the ongoing violent conflict waged by armed groups in the region.**

Unfortunately, the current minerals supply chain from Congo to our products is rife with unchecked information and smuggling, allowing conflict minerals to seep through to the U.S. unnoticed. To ensure that companies conduct thorough checks and accurately disclose critical information to the public, we believe the regulations promulgated should incorporate the following principles:

- 1. Disclosure requirements that are specific.** Reports from companies must include information on the capacity of each mine they source from along with the weights and dates of individual mineral shipments. "Business confidentiality" is a valid argument for not disclosing the price paid for minerals, but not for this information; it is essential to curb smuggling and does not harm companies' competitive interests.
- 2. Equal reporting standards for all four minerals.** While the 3 T's (tin, tungsten, tantalum) and gold are unique, different reporting standards only weaken the regulations and create the possibility of loopholes. Furthermore, numerous companies from the electronics to jewelry industries have confirmed that it is reasonable and possible to secure disclosure on each of these supply chains.
- 3. All manufacturing companies must be included.** Within the legislation passed, Congress intended for all manufacturing companies which use minerals in their products, regardless of how small the percentage or what label they manufacture under to be required to trace and disclose information on their supply chains. This intention must be delivered on through comprehensive regulations.

Sincerely,

2,310 Concerned Consumers

Not only are they abused and taken advantage of by companies dealing with these minerals, for us to deal with these companies only adds to the plight of the people living in the Congo. These companies have a disregard for the environment as well endangering the health of the people who reside in the areas where these minerals are extracted. Corporate willingness to turn a blind eye to smuggling, forced labor, and deliberate destruction of community life by greedy individuals is a primary reason for the destabilization of this region. Curbing extreme abuse of reasonable commercial practices will help the government of DRC to bring greater order to the country. It will also have a "trickle up" effect on US consumers who will be more aware of the issues involved, or more cautious about purchasing products which use blood minerals.

How can we sleep at night knowing that we are not doing more to end the terrible injustice in the Congo? We have it in our power to reduce the stronghold these rebels have on the citizens of the Democratic Republic of Congo. We have in our power the ability to make a difference. How can we not take that step? How can we sit back and watch as countless bodies are piled up, as countless women are brutally raped, as countless children are having their childhoods and innocence forcefully taken away from them? The short answer is that we can't. We can't NOT do everything in our power to change this situation. While you are safe at home in the United States of America, these people, who are just like us, are living a life of immeasurable pain and suffering, chaos and brutality. Do something about it. Show your kids, show future generations, that we won't take this lying down.

501.	Nadia Mulji	CA	95616	The Democratic Republic of Congo is said to be the worst place in the world to be a woman. Similarly, the war is the deadliest in the history of Africa and is nicknamed the "African World War". With a \$183 million industry, conflict minerals are fueling said atrocities. Rape, murder, and forced child labor are all consequences of the conflict. With transparency, all manufacturing companies can be held responsible for contributing to the genocidal violence. It is vital that we terminate any and all contribution to the Congolese violence with our involvement with conflict minerals.

 Women and girls are especially targeted in the conflict in the DRC. The absolutely devastating harm done to such a large portion of the population allows companies to exploit Congo's natural resources. If those resources became less valuable on the global market it would surely lead to a decrease in the atrocious harms being done to these women and girls. | 671. | Moises Almaguer     |    | 93033 | I believe that everyone must learn to share this world peacefully and as equally as possible. If somebody has an abundance of resources, while others have almost nothing, then the wealthy should divide the resources equally among those others and only keep and equal share. Some people work very hard to attain their wealth. This hard work leads them to believe they deserve their wealth and fail to see the entire picture. In reality, hard work should not be rewarded so highly; instead, work that leads to peace should be rewarded, but not by taking away from those that are in need. Of course, such act would lead to less peace. We need much more of the RIGHT education around this world. |

746.	Anna Engle	GA	30030	I am an English teacher. As part of my introduction to the novel "Heart of Darkness," I began researching the current Congo crisis two years ago. I was shocked and appalled that the biggest humanitarian crisis since WWII had been going on for years, and I had barely heard about it. The plight of women and children in Eastern Congo is simply astounding. In the process of educating my students about this conflict, I have been disgusted to find that the violence has not abated over the last two years, as shown by the recent rapes of up to 500 people this past July/August. I feel compelled to do something, even something as small as writing this note, to change this situation. American consumers need to know that blood and tears are intertwined with our electronics, and we deserve to be able to buy electronics with conflict-free materials. More than anything, however, the people of Eastern Congo deserve to live in peace and dignity.

The US has taken such pride in having the resources and influence to make a difference in the world--but this is an example of what we don't know hurting us and our fellow human beings irreparably. We saw these kinds of measures make a difference with the illicit diamond trade. We saw similar choices make an impact on ending apartheid. In a nation weary of war and divided over so many things, it seems that this--this peaceful and powerful call to accountability in our own capitalist ventures--can be one thing that unites us. We may not be able to win our own wars (domestic or foreign), but please, let's do what we can to avoid financing the atrocities in someone else's nation.

769.	Jane Gleeson	VA	22314	We must support legislative, diplomatic and all effective means to bring peace to Congo and protect Congo's people. Conflict minerals provide the financial incentive to rebels to continue genocide, continue unimaginable sexual violence against women and continue conscripting children into their internecine warfare. We must regulate conflict minerals. I lobbied Congress last week with a committed group of women advocates to encourage support for a system to audit and certify that the recent conflict minerals legislation is followed as part of a long-term solution to peace in Congo. We must not accept that our cell phones and laptops are produced from a source of blood and suffering of thousands of precious human lives.

776. Jennifer Schwarzenbach CA 93704 One of the countries richest in minerals, throughout the entire world, is the Congo. Yet it is materially one of the poorest countries...why is this? Currently, control of the mining regions (some of the densest jungle on the entire planet, not only rich in minerals but also in biodiversity) is wrested away by whoever has the biggest guns and is the most ruthless, namely warlords/mafia/rebel groups, who use the sales of these minerals (like coltan, used in cellphones, laptops, etc) to finance their own agendas. The innocent people who live in these areas are terrorized, used, beaten, intimidated, raped, pillaged, killed, maimed, or literally ENSLAVED... men, women, and children. What can we do to protect innocent people? To end unnecessary suffering? To protect traditional cultures and ways of life, like the Mbuti Pygmies who live their lives in symbiosis with the jungle there? To protect a biodiversely unique hotspot? To protect endangered wildlife? War, despair, murder, slavery, terror... NONE OF THESE THINGS IS WORTH CREATING IN ORDER TO HAVE A NEW CELLPHONE.
777. Catherine McIntyre The fact that companies are profiting from the continuing rape of women and children, and the hurt and suffering of so many people in the Congo completely disgusts me. Something needs to be done.
778. Odalia Canfield 32789 I have personally met with members of the Democratic Republic of Congo and local residents in Orlando from the DRC and the atrocities that are happening because of greed over these minerals.
779. Francesca Barwood Why should the women, children and men of the Congo be faced with increasing brutal issues over minerals that provide 'us' with materialistic items. No life, no soul is worth that. By ending conflict minerals through supporting legislation, this will end the conflict and unnecessary drama in millions of lives. And that is a human right.
780. Breanne Ward PA 18966 We are so far from this conflict and enjoy luxuries that people are being killed for. Ensuring thorough regulation is one way that we can strive to eliminate this violence from across the world.

781. Helen Jones  
 Why should we enjoy materialistic items, 'luxuries' that we are so used to having in our everyday lives and things that we take for granted while men women and children are being killed in order for us to have these things. We ignore the fact that there is conflict in the Congo to enable us to have the materialistic items we desire but don't need. No life is worthless this conflict needs to end as it is unnecessary.

 We are from America, the land of the free and opportunity. With a friend I personally help a group in the DR Congo, with prayer and money.. One of our projects is teaching literacy and skills (sewing) to war widows in Lubumbashi. We know many of these widows have lost husbands to the minerals war, and are victims of the war fuelled rape so common in that country.

If we withdraw these conflict minerals from the supply chain, the cycle of madness in the Congo will be reduced significantly.

 Congo was our home for 14 years, and we still have wonderful friends there with whom we maintain contact. The consequences of armed conflict, directly linked to the trade in the minerals referred to in this legislation, have been devastating for hundreds of thousands of Congolese citizens. The lack of proper oversight and regulation of the export markets has opened the door for horrific abuse, and the time has come for those who buy these minerals to do everything in their power to ensure that their purchases are not enabling further devastation in the lives of innocent people. The Congolese have a proverb: "Whoever [knowingly] buys from a thief is a thief." I think we could very reasonably extend that proverb to say, Whoever buys from a killer is a killer. Whoever buys from a rapist is a rapist.

 The U.S. cannot be in the business of supporting conflicts like those that exist within the Congo. It is so simple to divest of such interests. Other sources do exist. It just started this year and were trying to find multiple ways to help, for instance- we had a bake sale where we raised over 540 dollars for speaker fees for a larger assembly to our school and the community. Also, we have had a 10 minute awareness assembly during mass for our project where students and teachers donated 200 dollars. Surely this will bring Katrada here because if we read his book he will visit us at the large scale assembly. We are in hopes of bringing several small town celebrities to our school and raising money to donate to the larger organizations for the ConGO!

1849.	Valerie Greer		49085	In America, we live in a generation that is dependent on many appliances that use conflict minerals. In America, we are supposed to stand for what's just and fair. Yet, in America, we still give so much support to the use of conflict minerals. We cannot change this without the help of the government.

1850.	Cynthia Moore		90019	It's the right thing to do. As a consumer who wants to support human rights (and, by the way, the welfare of animals) with my dollars -- and certainly never wishes to assail those rights in any way, I do not have the resources to vet every product on the market. I want to rely on my government to help, and I do not feel this is too much to expect, especially in the most obvious cases, like conflict minerals. Help the U.S. to stand as a leader by backing up its claims to care about human rights with tough laws and stringent regulation/enforcement. Let's do the right thing!

- As a student active in the Stanford University campaign to increase the awareness and activism of academic institutions on the issue of conflict minerals, I am so pleased to see that the national government is keeping pace with this pressing issue. However, governmental red tape and vague language cannot be allowed to impede this process. Please help companies become responsible managers of their supply chains by imposing clear and binding regulation. This crisis, incentivized by our domestic electronics demands, must not be allowed to continue.

2137. Shannon Wolfe 27106 These companies are contributing to the rape and murders of innocent women and children. Electronic devices that we are using are made from these minerals so we are contributing to the rapes and murders of innocent women and children. It is unimaginable and has to be stopped immediately.
2138. Linda Engelhart 80439 As members of the first world it is our duty to protect those from harm who cannot protect themselves. When our industries are part of the cause of war, we must take action and regulate businesses to prevent the perpetuation of violence.
2139. Patrick Ryel OH 44240
2140. Kristina Shepard WI 53589 Follow the money. Major electronics manufacturers are not only contributing to this problem, they are benefiting from it. It is reprehensible that companies are more concerned about shaving pennies off the price of their product than they are about protecting the health and safety of millions of Congolese. There's no reason that the price of these products should include violence and death! I won't buy these products until they are verifiably conflict-free and the U.S. government should require that manufacturers of these products comply with a verification regime before they are allowed to sell their products in the U.S.

2141. Katherine Yarges KY 41071 The genocide, rapes and imputiny over conflict minerals must stop in the Democratic Republic of Congo. Corporations in the United States must be held accountable and take responsibility to track the minerals used in the electronic devices they produce. Complete documentation of their supply chain must be disclosed to the Security Exchange Commission and all consumers. Without this accountability the atosities will continue in Congo. Please, in the sake of humanity, ensure that the Sec. 1502 Frank Dodd-Frank Act is passed through legislation. Millions of lives are at stake. We as a global community must take a stand. Blaise Kolokolo As son of congo I am pleased to participate in this petition to end crimes, impunity...in congo.By accepting this petition, our mothers and sisters might regain their dignity in world class as their are direct victims of all atrocities fueled by this mineral conflict.Please, we strongly recommend to take action.

2149. Joseph Dunford 97220 We can make a very great difference. In our use of minerals from this region, we must avoid sources based on chaos and violence. The rule of law can then better assure the safety of peoples there.
2150. Laura Matter CA 93940 It saddens me that children, those who have no control, are often the most affected in times of conflict. I work for the children of my country and hope to help the children of the entire world grow up to be healthy and productive citizens of the world. This legislation seems like a logical step to help that happen.

2152. Pamela Shannon OR 97068 Our appetite for small electronics has incited the deaths of over five million people, and these were the lucky ones. 2153. Tesha Hensley-Brown 85296 Enough is enough! Lets do the right thing!
2154. Catherine Donovan 48183 Just because one can take advantage of a situation that compromises people is not an excuse to act without cause. We are all subject to the same weaknesses and plights, geography has benefited some and been of great detriment to others. Using and abusing the resources of entire societies that are already under duress makes us all culpable to the suffering and in turn partners in unspeakable crimes. Responsibility in regards to humanity cannot be negotiable, there shouldn't be a price worthy of such degradation. Or an excuse to deny our part.

2164. Jason Miller CA 94131 The SEC should be moving towards a standard of making these types of disclosures required because in a new world that involves globally concerned citizens and investors, they are of material interest.
2165. Adey Makonnen I'm really shocked and find it hard with living with the thought that the products I love using such as my digital camera, phone, etc. are causing death and suffering to fellow human beings.
2166. Eleanor Frances Cotterill It's hard to comprehend that the products we use everyday and get so much enjoyment from are causing so much suffering and we are all blind to it. This must stop.

2167. Dan Madinabeitia 07960 We pride ourselves as the great nation that defeated Hitler and the Nazi's. If we continue to look away from 7 million dead (half of whom were children under the age of 5) then we are no longer that great nation. We are an enormous accomplice to rape, brutality and murder.
2168. Jessica DePete PA 18360 The technology we take for granted has a horrific price, and it is paid by innocent people in Congo. Tech companies obviously don't have the ethical fortitude to make humane decisions regarding their supply chain, so we must regulate them.
2169. Michelle Kingsbury 03301 It is ridiculous that we even have to ask for these regulations. Nobody with any common sense wants an electronic device that costs someone else their life.
2170. Tatiana Amaral
2171. Musa Camara 220 Please, no more suffering for our convenience. It saddens me that children, those who have no control, are often the most affected in times of conflict. how can we expect development when most of the children are dead which should be tomorrow leaders.
2172. Deborah Duncan 97205 I think weak regulations for profit on the backs of horrible human treatment is appalling and not something the U.S. should support. What does it say about our country that we are willing to support death, torture, and breakdown of others spirit so we can prosper.
2173. Mary Simpson PA 19064 The conflict in Congo is devastating. If there is any way, big or small, to make a difference, I will do it. Innocent lives are lost every day...lives...people like me, who think and feel and worry and dream and love. They are real, and when I turn off my tv, or computer, and don't see them anymore, they continue to be. Please help them. Thank you

Is it not yet apparent to those of you at the US Congress that multinational corporations are responsible for a great deal of human and environmental suffering around the world. Please, please ensure that stricter standards are enacted to preserve the safety and quality of life for people around the world.
2175. Michele Morrioni 19064

I am part of A Thousand Sisters Campaign by Lisa Shannon. I have cried so many times thinking about how I have gotten cell phones or laptops with someone's life taken away. We should be ashamed of it as we have blood on our hands . Its about time to end this terrible violence . I sign this petition for my Congo sister , Imani Furaha , who has gone through her worst. Would never ever want anything bad to happen to her. Its her life that I need to protect and so I hope this matter is taken very very seriously.

2178. Cynthia Blair 94114  
I lived in South Africa for two years, working as a trauma therapist. the effects of conflict zones, mostly wrought by the Western world's interests in Africa's natural resources, are too horrific to imagine. rape, maming, killing for the meager payments made to Africans for large Western corporation profits.... It is a crime of humanity.

Having done volunteer work in DRC in north and south Kivu I have witness first hand devastating effects of these conflict mineral wars. A history of ethnic conflict throughout that has created an unstable and unbalanced social order throughout Congo and across neighboring borders. Though deeply rooted, this ethnic conflict is being further perpetuated by control over Congo's precious resources and consumer demand. 2218. Robert Cutillo CO 80210 I have been to Eastern Congo twice in the last 5 years and have seen the injustice when profit from the minerals of this country are not for the benefit of the people, who suffer greatly from the conflicts there.

2219. Halley Greene MD 97202 I have worked in Congo and have a Congolese friend whose family has fled to the bush because of fighting. I have eked the life out of my 2002 laptop so as not to support the conflict in Congo. As I research options for a new laptop, I am disappointed to find no one at corporate offices knows what I am talking about or can verify any steps their company is taking to eliminate the use of conflict minerals. I imagine that much like the Kimberley Process for diamonds, the regulations against conflict minerals are unlikely to require monitoring of every step in the supply chain, thus permitting conflict minerals to enter at various points. Not to mention the oversight of other human rights abuses such as child labor and worker exploitation. I am calling on the SEC to enforce strict regulations on the electronics industry, requiring monitoring of every step of the supply chain to ensure conflict minerals do not enter electronics. I do not want to be a contributor to the tragedies my Congolese friend's family faces. Please make it possible for me to purchase a new laptop and future cell phones without contributing to their hardships. Sincerely, Halley Greene

2246.	Katherine Thomas-Rico		95688	We must do all we can to end this violence.
2247.	Joyce Tripses		50021	The mineral trade in Eastern Congo is taking place on the backs of the local women. My American daughter is in Eastern Congo now and sees first hand how women and their children are tortured and murdered so that minerals can be mined and their value used to prop up local competing armies who each espouse some mistaken belief, desire to control governments outside of their own or better yet, one individual's messianic vision. If this was occurring in my town, it would have ended long ago. Let's stop contributing to the horrific problem. Remember, this is you that is being tortured, you just haven't realized it yet. We are not exonerated.

2248. Richa Sehgal OR 97229 We have had ENOUGH of the electronic gadgets to play with , without realizing the toll it has taken on the lives of the Congo people. I have cried too many times reading horrific stories but that does not change a thing for the lives bieng lost. It therefore is my way of standing up and saying that I donot need any of the gadgets that have caused so much pain and suffering to my people in Congo . I urge all my Tech companies to come clean and let me know when you sell your products , please donot stain it with the blood of my Congo people. I want clean ones all the way through. Therefore , tech companies , please ensure you follow through regulations as laid down by the SEC and prove to us that you are loyal to your customers and we definitely matter to you when we want unstained products.
2249. Kris Bell 95616 I want a stable formalized mining sector in the Congo so that I can buy tech products without guilt.

2253. Carmen Maianu 02139 I cannot be a consumer of goods that enslave and kill the lives of people in other countries. If we are a democracy, our consumption should promote democracy in other countries as well, not just our own.
2254. Diane Blomgren Everyone matters: People who work in companies, people who buy products, people who are dying in Congo and other countries, and the soldiers who are killing and terrorizing people in order to get access to the minerals and finance their wars. Let's stop making it profitable for anyone to kill, rape, plunder or enslave others.

2256.	Scott Morgan	VA	23901	The Suffering in the DRC for our convenience has gone on for far too long. It has to cease now. This is a step in the right direction.
2257.	Robin Potawsky		28601	We must stand up for the lives of human beings in Congo.
2258.	Kessia Reyne Bennett		49103	This matters because people matter. Lives are on the line. Help the Congolese live and help American technologies flourish without the stain of human blood.
2259.	Janette Toribio		84321	This matters to me, and should matter to everyone. The conflict going on in Congo and the atrocities being committed should not go unchecked. We need to send them a message by boycotting their products. In order to do this, better tracking of the supply chain needs to happen, that way we can identify which consumer products contain the conflict minerals from Congo, and choose to not purchase them. Thank you.

It is time that we became "globally" responsible as opposed to "locally" responsible. What we do in the United States affects the entire world and we need to take care in how we handle our affairs.

As a teacher I have many students who have come to the US to escape the bloodshed and violence in Congo. These students come with violent behaviors because that is all they know. Once they realize they are no longer fighting for their lives they become happy, playful children whose faces glow when they smile. They know they are safe. Please give the children who remain in Congo the same opportunity to smile by regulating minerals that are taken from the area and holding companies responsible for contributing to the continued violence there.

This is yet another example of the structural violence precipitated by global capitalism, especially as it persists unregulated. please take action to ensure that people take precedence over profit.

2281. Daniela Carosio  
It is important that the products we are consuming are not the result of the breach of human rights. It is important that we require the commitment of the electronics companies all together to monitor their supply chain in order to prevent any financing of breach of human rights.

Mass genocide and human rights violations should not be permitted to feed the global north's technology frenzy.
2291. Michelle DeJardine  
I would like to buy products that I can feel good about - not products that contribute to mass rape and the death of over 6 million people in the last decade. I should have the right as a consumer to know if what I am purchasing contributes to the conflict in DRC.

It's time the rest of the world stopped profiting from African exploitation and promoting violence.

2298. Nehal Shukla

It becomes more than a matter of determining what is right and wrong when we see injustice occurring in front of our very own eyes. In this case, there is a strong need for action. I would like to see more transparency in mining practices in the DRC for these very reasons.

2299. Erica Koegler

It is our duty as human beings not to allow the exploitation of other human beings for our luxury and profit.

This topic matters to me for many reasons; I feel it should matter to all of us. I care because that's what separates us from the monsters who do horrific things to the innocent people of the Congo. We have to care about each other and our well beings. I feel that by helping and educating women specifically; it can empower the world and make it a better place. By not letting these people get away with this anymore; it will send a clear message. We HAVE to take action. We MUST stop being the parents who warn their kids a hundred times in the grocery store, "you better behave or else" while they get to continue misbehaving. Let's follow through! We can make a difference and we must.
