Re: Pay Ratio Disclosure, File No. S7-07-13

Dear Ms. Murphy,

Corporations are publicly traded, thus the public deserves to know CEO-to-median worker pay ratios. A reasonable equity in worker pay as compared to CEO pay is important in maintaining the social balance which makes democracy thrive.

Investors also need this information to see whether corporate budgets divert resources to executives at the expense of long-term investments and workforce development. Public disclosure would also be helpful in evaluating whether CEO pay actually reflects the particular CEO's leadership performance!

Sincerely,

Amrita Burdick
