CORRESPONDENCE UNIT

I will make my requests brief. I believe that the naked short selling in the stock market must be stopped. I believe the ETF's (especially the 3X and SKF's) should be eliminated. I want the up tick rule as it was before brought back (not a watered down version). If this is not done to protect the small investor, I will certainly never invest again and I will advise all my friends and family not to invest because we will not stand a chance and will be at the mercy of the big hedge funds and institutions who do all the short selling and who ruin good companies in order to make themselves money. Please help the small investors who want the stock market to go up and not be manipulated by those funds and institutions.
