You people need to do something to stop the shorting of all stocks on the stock exchanges in the United States. Not just the financials...note that C (Citi group) traded almost 100 million shares today!!!! That's beyond absurd. It's dispicable that we...you, allow this to go on every day. You've already allowed the hedge funds to run off individual investors. The next fallout will be in retirement plans (401K's, etc.). Your every day worker is demanding cash buckets today, not mutual funds. He's afraid to invest in anything associated with stocks! We're allowing the markets to be morphed into a cesspool of manipulation by the hedge funds. I want someone in New York or Washington or Memphis or Chattanooga to realize enough is enough, and do something about it.
