INVESTOR INFORMATION

Name: Mr. Alan H Willis

to: SEC Chairman Mary Schapiro

Please restore the Uptick rule as quickly as you can, some erroneous and manipulated study made by the SEC in the past tried to debunk the worth of the Uptick rule, in the real world we now see its worth and how Wall street has become a Las Vegas roulette wheel, round and round we go ...where it stops "someone knows?" It is time to throw a monkey wrench into the spokes of the bear raiders and give the average investor a break.

The clamor for return to the Uptick rule runs over 85% of informed investors, how can a democratic country's agency (SEC) ignore such a overwhelming number? ...all the short selling, options, derivatives rules should be restored to their original form before the year 2000 ...the rules have been rewritten to facilitate theft .(IMHO)
