

Dear SEC,

i am writting to express my concern as an investor spending a lot of money investing in your economy. dark pools, PFOF and the DTCC.

- DARK POOLS

Should a free market not have the ability of clear price discovery? Why are dark pools allowed? It is a tool to rob retail investors.

- PFOF

It presents a serious conflict of interest.

- DTCC

The DTCC did not processing the dividend split as requested by Gamestop. As a foreign investor this doesnt look in regards of corruption in the US.

I hope this comment will not „get lost“ again. Thank you very much.
