

August 1, 2008

Is it any wonder more and more citizens of this country are completely and totally disgusted with the government and agency bureaucrats? Short selling and especially naked short selling is so patently illegal it surpasses all reason that you continue to allow it. It is destructive manipulation which has been used to financially ruin thousands of individuals not privy to inside information. The only reasonable explanation, of course, is you people at the SEC are paid off. Rest assured that is what we all believe happens.
