

August 12, 2008

Hello I am small time investor but I have notice that you have put stop to short selling on a few stock in the financial sector but what I did notice that was very bothering was that WASHINGTON MUTUAL (WM) the nations largest thrit and saving loan bank and its not on the list. And as of JULY 31st 2008 Short interest in [Washington Mutual](#) was up 24.5 percent at 341.1 million, or 32.3 percent of its shares outstanding;

HOW IS THIS helpful for this financial stock I would like to know I really believe you guys should review you list.

Sincerely,
Sarkes
