

RE: File Number S7-23-19

December 27, 2019

Dear Mr. Clayton and members of the SEC,

I am neither a grandmother nor a mother. My husband and I have wanted to feel grateful for that as we see climate change making the planet unfit for humankind. We've failed.

We do care about the next generations, including your grandchildren, who will soon be holding us accountable.

I urge you to withdraw changes to SEC Rule 14a-8.

Do not put up barriers to shareholder resolutions that ask the companies in which we invest to plan to reduce CO2 emissions by 2030, or vote climate change deniers off of their Boards of Directors.

Please reject this proposed change.

Thank you,

Marny Heinen
