

File Numbers S7-23-19 Rule: 14a-8

January 29, 2020

Dear Mr. Clayton and Members of the SEC,

I'm a mother of 3 and grandmother to 6, soon to be 7, beautiful boys and girls. I am extremely anxious about the horrific impact of climate change on my family and the world's people. As a member of Mothers Out Front, I urge you to withdraw changes to SEC Rule 14a-8.

When you changed that rule, the SEC made it infinitely more difficult to stop funding of dirty, soon to be obsolete fossil fuel production. In the United States we have to shift our funding to support clean, renewable energy.

Corporations need to hear from the people, and I am here to respectfully state my firm opinion that the times demand changes. This is not business as usual.

My granddaughter Willa, who will be turning 3 tomorrow, deserves better. As do all the children in the future.

You have children, Mr. Clayton, do you not?

Sincerely,

Linda Schiffman
