Ref: SEC S7-25-06

This SEC proposal, which is presently out for comment, would mandate that only "accredited investors" would be allowed to participate in certain investment vehicles. SEC's definition of "accredited investors" is proposed to be families with a net worth of \$2.5million or more. Statisticly this would restrict 98.5% of US families from participating in whatever the SEC determines are "unsuitable" investment vehicles. The SEC was established to uncover and prosecute fraud and to insure full disclosure- this proposal, as well as being an arrogant and unnecessary explosion of the SEC's powers and duties, is a significant assault on personal liberty and must, like all such bureaucratic overreaching, be stifled at birth. I urge you to become familiar with this proposed rule and to ensure that it does not become another corrosive component of our civil liberty.
