

November 17, 2010

I am the President of DFI Management, a single family office for the Dedman family only in Dallas, Texas, that represents three generations of Dedman family members. I fully support the comments and recommendations made to the SEC by the Private Investors Coalition on November 18, 2010. It is imperative that single family offices be exempted from this unnecessarily burdensome registration. Single family offices need the freedom to represent various family members as their representatives who deal with ever increasingly complex legal, financial, tax, governance, fiduciary, accounting, and risk management issues. Thank you for consideration of the issues addressed by the Private Investors Coalition.
