Subject: Sunshine Act - meeting January 13th 2009 - comment

Dear director Cook,

we are an asset management company from Switzerland and want to add from our perspective from Europe some insight into a matter that is highly discussed in the USA – and not only in the USA.

There are some practices in the stock market place in the US that are highly unfair in our honest opinion and is about time to address these unfair practices at the root !

We want to you to gain attention to the following website :

www.defendtrading.com

and this article from Dennis Dick, CFA, Member of Bright Trading LLC :

<http://www.defendtrading.com/SubpennyinginDarkPoolsCompromisingNBBO.pdf>

We absolutely support Mr. Dick's view and would like to emphasize the call for a total stop of dark pool activity and other unfair practices mentioned in his analysis. Even the proposed 0.25 % rule for dark pools is not fair !

Don't surrender to the pressure from the large players and do not fall for the argument of lost employment ! There will be much more people employed if this malpractice is finally forbidden !

Thank you very much for your attention

Best Regards

Capital Alternative Investment Management GmbH
