Such partial amendment shall be clearly identified and marked to show deletions and additions.

PARTIAL AMENDMENT

Chicago Board Options Exchange, Incorporated (“CBOE” or the “Exchange”) submits this Amendment, constituting Amendment No. 1, to rule filing SR-CBOE-2015-045 in which the Exchange proposes to modify Rule 6.53C, Complex Orders on the Hybrid System, to give the Exchange the flexibility to distinguish between Professional and non-Professional orders for the purposes of determining eligibility for COA. The purpose of this Amendment No. 1 is to amend the statutory basis and burden on competition sections of the Form 19b-4 and Exhibit 1 regarding distinguishing between Professional and non-Professional orders for purposes of determining eligibility for COA. No rule text changes are being proposed by this Amendment 1.

The Exchange believes the proposed change is consistent with the Securities Exchange Act of 1934 (the “Act”) because the Exchange believes the proposed rule change will reduce the number of unnecessary COA auctions that are the result of orders that are cancelled and replaced by Professionals, which will benefit non-Professional customer orders by providing a more efficient COA for eligible complex orders. In addition, the Exchange does not believe the proposed change is unfairly discriminatory or a burden on competition that is not necessary or appropriate in the furtherance of the purposes of the Act because the Exchange believes the proposed rule change will have a negligible impact on Professional customers because although complex orders for Professional customers makeup a significant percentage of COA auctions, such orders receive very few executions from those auctions. For example, orders for Professionals made up 52% of COA auctions but resulted in 0.62% of COA executions in the month of February 2015, which is a typical representation of how Professional orders are currently flowing through COA.

Furthermore, the Exchange believes removing unnecessary Professional COA messages may encourage more participants to provide auction responses (ultimately increasing the likelihood of executions for public customers, which generally serves to protect investors and the public interest) because fewer unnecessary COA messages will most likely increase the proportion of responses that lead to an execution.
