

Dear SEC,

Please approve of the proposal set forth by the CBOE requesting that Bitcoin ETFs be regarded as securities by the regulatory body. Bitcoin and all cryptocurrency assets are the future and they need to be properly regulated so we can actually get more institutions on board with block chain and its vast technological potential. Doing this will benefit us as a country and people greatly. I hope you all receive and take the time to read this letter. If you need to contact me for anything else please let me know.

Thank you.

Sincerely,

Isaiah Bellefeuille
