1 Overview

The following data sets provide information extracted from Form C XML submissions in a flattened data format to assist users in more easily consuming the data for analysis. These data sets include Form C offering statements, progress updates, annual reports, terminations, and any amendments or withdrawals to those submissions. Certain additional fields used in the Commission's EDGAR system are also included to help in supporting the use of the data. The data has been taken directly from submissions created by the registrants and provided in the data set as-filed. The data sets will be updated quarterly. Data contained in documents filed after 5:30pm EST on the last business day of the quarter will be included in the next quarterly posting.

DISCLAIMER: The Crowdfunding Offerings Data Sets contain information derived from structured data filed with the Commission by individual registrants as well as Commission-generated filing identifiers. Because the data sets are derived from information provided by individual registrants, we cannot guarantee the accuracy of the data sets. In addition, it is possible inaccuracies or other errors were introduced into the data sets during the process of extracting the data and compiling the data sets. Finally, the data sets do not reflect all available information, including certain metadata associated with Commission filings. The data sets are intended to assist the public in analyzing data contained in Commission filings; however, they are not a substitute for such filings. Investors should review the full Commission filings before making any investment decision.

The data extracted from the Form C XML submissions are organized into seven data sets containing

information about the issuer, offering, disclosure, and more. Each data set consists of rows and fields, and is provided as a tab-delimited TXT format file. The data sets are as follows:

- **SUBM** – Submission data set; this includes one record for each submission. The set includes fields of information pertinent to the submission, filing entity, and intermediary. Information is extracted from the Commission's EDGAR system and the filings submitted to the Commission by registrants.
- **ISSR** – Issuer data set; information about the issuer for each submission including name, legal status, physical address and intermediary.
- **DISC** – Disclosure and offering data set; provides the offering information and annual report disclosure requirements from each submission. The data set includes target and maximum offering amounts, compensation, fees, number of employees, financial information, and other information.
- **JURS** – Jurisdiction data set; provides the jurisdictions in which the issuer intends to offer securities.
- **DOCS** – Documents data set; provides the names of documents provided with a submission.
- **ISIG** – Issuer signature person data set; contains the data from the issuer signatures.
- **SIGN** – Signature person data set; contains the data from the submission person signatures.

2 Scope

The scope of the data in the Crowdfunding Offerings Data Sets consists of:

- XML data from Form C, Form C-W, Form C-U, Form C-U-W, Form C/A, Form C/A-W, Form C-AR, Form C-AR-W, Form C-AR/A, Form C-AR/A-W, Form C-TR, Form C-TR-W;
- Submitted from May 16, 2016 through the "Data Cutoff Date" inclusive;
- All data values are "as filed."

The Crowdfunding Offerings Data Sets do not include data from attachments or other optional information that may be included in a submission.

Note: The [EDGAR Form C XML Technical Specification](#) and [EDGAR Manual Volume II](#) sections 8.2.5 and 8.2.6 provide additional information regarding crowdfunding offering submissions.

3 Organization

Note that the data sets include Regulation Crowdfunding offering information "as filed" in EDGAR document submissions including amendments of prior submissions. Data in this submitted form may contain redundancies, inconsistencies, and discrepancies relative to prior submissions and other publication formats. There are seven data sets. Each quarterly data set is accompanied by a metadata file conforming to the W3C specification for tabular data (<https://www.w3.org/TR/2015/REC-tabular-data-model-20151217/>) that encodes the following information about the data sets and their relationships to each other.

1. **SUBM** identifies all the EDGAR submissions in the data set, with each row having the primary key **accession_number**.
2. **ISSR** is a data set of the issuer information for each submission, with each row having the primary key **accession_number**.
3. **DISC** is a data set of all the offering and disclosure information, with each row having the primary key **accession_number**.
4. **JURS** is a data set that contains the jurisdictions in which securities are offered, with each row having the primary key **accession_number and id**.
5. **DOCS** is a data set that contains the document names in a submission; with each row having the primary key **accession_number and id**.
6. **ISIG** is a data set providing the data from the issuer signatures, with each row having the primary

key **accession_number and id**.

7. **SIGN** is a data set providing the data from the person signatures, with each row having the primary key **accession_number and id**.

accession_number can be used to retrieve information about a submission in the data sets.

accession_number and id can be used to obtain data reported on multiple lines in the submission.

4 File Formats

Each of the seven data sets is provided in a single encoding, as follows:

Text format, tab delimited, utf-8 encoding.

5 Table Definitions

The fields in the figures below (figures 1 – 7) provide the following information: field name, description, source, data format, maximum field size, an indication of whether or not the field may be NULL (yes or no), and key.

The Source field has two possible values:

- EDGAR indicates that the source of the data is part of the filer's EDGAR submission header or Commission generated.
- XML indicates that the source of the data is the filer's Form C submission.

The Key field indicates whether the field is part of a unique index on the data. There are two possible values for this field:

- "*" – Indicates the field is part of the unique key for the row.
- Empty (nothing in field) – the field is not part of the unique compound key.

5.1 SUBM (Submission)

The submission data set contains summary information about the submission, filer, and intermediary. Some fields were sourced directly from the EDGAR submission information, while other fields of data were sourced from the XML submission.

Figure 1. Fields in the SUBM data set

Field Name	Field Description	Source	Format	Max Size	May be NULL	Key

Note: To access the complete submission files for a given filing, please see the [Commission EDGAR website](https://www.sec.gov/Archives/edgar/data/{cik}/{accession}/). The Commission website folder <https://www.sec.gov/Archives/edgar/data/{cik}/{accession}/> will always contain all the data sets for a given submission. To assemble the folder address to any filing referenced in the SUBM data set, simply substitute {cik} with the cik field and replace {accession} with the accession_number field (after removing the dash character).

5.2 ISSR (Issuer Information)

The ISSR data set contains specified information for the issuer provided in the submission.
