Re: Exxon Mobil Corporation
Incoming letter dated January 31, 2019

Dear Mr. Parsons:

This letter is in response to your correspondence dated January 31, 2019, February 12, 2019, March 12, 2019 and March 18, 2019 concerning the shareholder proposal (the “Proposal”) submitted to Exxon Mobil Corporation (the “Company”) by the New York State Common Retirement Fund et al. (the “Proponents”) for inclusion in the Company’s proxy materials for its upcoming annual meeting of security holders. We also have received correspondence on the Proponents’ behalf dated March 8, 2019 and March 14, 2019. Copies of all of the correspondence on which this response is based will be made available on our website at http://www.sec.gov/divisions/corpfin/cf-noaction/14a-8.shtml. For your reference, a brief discussion of the Division’s informal procedures regarding shareholder proposals is also available at the same website address.

Sincerely,

M. Hughes Bates
Special Counsel

Enclosure

Response of the Office of Chief Counsel  
Division of Corporation Finance  

Re: Exxon Mobil Corporation  
Incoming letter dated January 31, 2019  

The Proposal requests that the board, in annual reporting from 2020, include disclosure of short-, medium- and long-term greenhouse gas targets aligned with the greenhouse gas reduction goals established by the Paris Climate Agreement to keep the increase in global average temperature to well below 2 degrees Celsius and to pursue efforts to limit the increase to 1.5 degrees Celsius.

There appears to be some basis for your view that the Company may exclude the Proposal under rule 14a-8(i)(7), as relating to the Company’s ordinary business operations. In our view, the Proposal would require the Company to adopt targets aligned with the goals established by the Paris Climate Agreement. By imposing this requirement, the Proposal would micromanage the Company by seeking to impose specific methods for implementing complex policies in place of the ongoing judgments of management as overseen by its board of directors. Accordingly, we will not recommend enforcement action to the Commission if the Company omits the Proposal from its proxy materials in reliance on rule 14a-8(i)(7). In reaching this position, we have not found it necessary to address the alternative bases for omission upon which the Company relies.

Sincerely,

Courtney Haseley  
Special Counsel
DIVISION OF CORPORATION FINANCE
INFORMAL PROCEDURES REGARDING SHAREHOLDER PROPOSALS

The Division of Corporation Finance believes that its responsibility with respect to matters arising under Rule 14a-8 [17 CFR 240.14a-8], as with other matters under the proxy rules, is to aid those who must comply with the rule by offering informal advice and suggestions and to determine, initially, whether or not it may be appropriate in a particular matter to recommend enforcement action to the Commission. In connection with a shareholder proposal under Rule 14a-8, the Division’s staff considers the information furnished to it by the company in support of its intention to exclude the proposal from the company’s proxy materials, as well as any information furnished by the proponent or the proponent’s representative.

Although Rule 14a-8(k) does not require any communications from shareholders to the Commission’s staff, the staff will always consider information concerning alleged violations of the statutes and rules administered by the Commission, including arguments as to whether or not activities proposed to be taken would violate the statute or rule involved. The receipt by the staff of such information, however, should not be construed as changing the staff’s informal procedures and proxy review into a formal or adversarial procedure.

It is important to note that the staff’s no-action responses to Rule 14a-8(j) submissions reflect only informal views. The determinations reached in these no-action letters do not and cannot adjudicate the merits of a company’s position with respect to the proposal. Only a court such as a U.S. District Court can decide whether a company is obligated to include shareholder proposals in its proxy materials. Accordingly, a discretionary determination not to recommend or take Commission enforcement action does not preclude a proponent, or any shareholder of a company, from pursuing any rights he or she may have against the company in court, should the company’s management omit the proposal from the company’s proxy materials.

Ladies and Gentlemen:

On behalf of Exxon Mobil Corporation, a New Jersey corporation (the "Company"), we are writing to respond to the letter dated March 14, 2019 ("Proponent Second Letter") from Sanford J. Lewis on behalf of the New York State Common Retirement Fund and the Church Commissioners for England, as co-lead filer (collectively, the "Proponent"). The Proponent Second Letter responds to the Company's March 12, 2019 reply letter (the "March 12 Letter") to a March 8, 2019 letter from the Proponent which in turn was in response to a request from the Company dated January 31, 2019 (the "No-Action Letter") regarding the exclusion of a shareholder proposal submitted by the Proponent (the "Proposal") from the Company's proxy statement for its 2019 Annual Meeting of Shareholders. Certain defined terms are used herein as defined in the No-Action Letter. A copy of the Proposal is included with this letter as Exhibit A.

The Proponent Second Letter attempts to refute the March 12 Letter which argues that the Staff's decision in Devon Energy Corporation (March 4, 2019) applies to the Proposal. Despite the fact that the Devon proposal is identical to this Proposal, the Proponent Second Letter argues that submission of the Proposal to a different company is enough to warrant a different decision. The Proponent Second Letter cites in support of its argument a few recent developments in climate change research, investor focus and actions by other companies that are peers of the Company. We respectfully disagree.

The Company and Devon are both engaged in the oil and gas business. Both face the same circumstances when considering or implementing a proposal that requests reporting on short-, medium- and long-term greenhouse gas targets aligned with the Paris Climate Agreement. Such a proposal, which includes the Devon proposal and this Proposal, would require each recipient company to consider the very same fundamental questions relating to climate change and the Paris Agreement, including what Member State rules implementing the Paris Agreement may ultimately look like, what impact those rules would have on its business, whether to set company-wide greenhouse gas reduction targets and how to set any such targets. Mere developments in research and particular investor commentary do not change these fundamental and common circumstances.
Excluding the Proposal from the Company's Proxy Materials is not inconsistent with the SEC facilitating the ability of investors to engage and undertake private ordering to encourage portfolio companies to mitigate climate change impacts. The Company has been and continues to be actively engaged with its shareholders, including investors representing approximately 30% of its shares during 2018, on environmental, social, and governance issues, including the risks of climate change and how the Company is addressing those risks. Shareholders are not being in any way disenfranchised from engagement with the Company simply due to the exclusion from the Proxy Materials of a single shareholder proposal on a specific topic. Also we note, as is made clear in SLB 14J, the fact that a proposal relates to a significant policy issue does not prevent that proposal from being excludable where the specifics of the proposal delve too deeply into micromanagement, as we believe is the case with this Proposal.

Thus we reiterate that the short-, medium- and long-term targets that the Proposal seeks are unduly specific for purposes of Rule 14a-8(i)(7) and therefore the Proposal should be excluded because, like the Devon proposal, it inappropriately micromanages the Company. We also reiterate, as stated in our No-Action Letter, that the Company has already substantially implemented the Proposal pursuant to Rule 14a-8(i)(10) and that the Proposal is vague and misleading under Rule 14a-8(i)(3).

Respectfully yours,

Louis L. Goldberg

cc: James E. Parsons, Exxon Mobil Corporation
Sanford Lewis
New York State Retirement Fund
Proposal

PROPOSAL REGARDING GREENHOUSE GAS TARGETS

This proposal was submitted by the New York State Common Retirement Fund, 59 Maiden Lane - 30th Floor, New York, NY 10038, the beneficial owner of 10,584,905 shares and lead proponent of a filing group.

"RESOLVED: Shareholders request that the Board of Directors, in annual reporting from 2020, include disclosure of short-, medium- and long-term greenhouse gas targets aligned with the greenhouse gas reduction goals established by the Paris Climate Agreement to keep the increase in global average temperature to well below 2°C and to pursue efforts to limit the increase to 1.5°C. This reporting should cover both the corporation's operations and products, omit proprietary information, and be prepared at reasonable cost.

SUPPORTING STATEMENT: It is widely accepted that a transition to a low carbon economy - driven by advances in technology and government policy aligned with the Paris Agreement - is underway. As the use of zero- and low-carbon technology increases due to technical breakthroughs and decreasing costs, and as governments take steps to limit greenhouse gas emissions, fossil fuel companies face enhanced risk. These trends could limit returns to ExxonMobil's investors by increasing the company's operating costs or by reducing demand for its products.

The Grantham Research Institute on Climate Change and the Environment has identified at least 1,512 climate change laws. Growing recognition of the risks from climate change will result in increasing numbers of, stringency of, and support for these laws.

Disclosing targets is an important means of assuring investors of the management of risks associated with climate change and investors welcome ExxonMobil’s recent announcement of a 2020 methane emission reduction goal. However, some of ExxonMobil's peer companies, including Total and Shell, have disclosed much longer-term ambitions, including for emissions resulting from the use of their products. Investors participating in Climate Action 100+, representing over $32 trillion in assets under management, are seeking enhanced disclosure of targets and other measures demonstrating company alignment with the Paris Agreement.

To ensure that ExxonMobil is adequately prepared to be successful into the future for its shareholders and other stakeholders we believe it is essential for the company to identify and disclose targets that are aligned with the goals of the Paris Agreement.

Re: Shareholder Proposal Submitted to Exxon Mobil Corporation Regarding Greenhouse Gas Targets by New York State Common Retirement Fund and Others – Supplemental Reply

Ladies and Gentlemen:

On behalf of the New York State Common Retirement Fund (the “Proponent”), I am writing to reply to the letter from Louis L. Goldberg of DavisPolk submitted on March 12, 2019 (“Company Supplemental Letter”) to supplement the Exxon Mobil Corporation no-action request of January 31, 2019 on the Proponent’s proposal on greenhouse gas targets (the “Proposal”). That letter responded to our previous reply of March 8, 2019 (“Reply Letter”). We wish to provide a brief follow-up to the Company’s Supplemental Letter. A copy of this reply is being transmitted simultaneously to Mr. Goldberg.

The Company Supplemental Letter notes the recent decision in Devon Energy Corporation (March 4, 2019) regarding a proposal with language that is very close to the present proposal. The thrust of the Company Supplemental Letter is that the Devon precedent should be binding on the Staff in consideration of the Proposal. There are a number of reasons why we believe this conclusion is not warranted.

First, the decision in Devon Energy Corporation was reached without the benefit of a brief from its proponent. As such, it merely reflected a continuation of the approach taken in the 2018 decision regarding EOG Resources (Feb. 26, 2018). As we have articulated in our March 8 letter, we believe that the 2018 decision in EOG Resources was inconsistent with the Commission’s 1998 Release and with long-standing staff precedents. The Devon Energy Corporation determination, issued without the benefit of a brief from the proponent, perpetuates that deviation.

Second, the Commission and Staff have made it clear that micromanagement decisions “will be made on a case-by-case basis, taking into account factors such as the nature of the proposal and the circumstances of the company to which it is directed.” 1998 Release and the Staff Legal Bulletin 14J (October 23, 2018). Notwithstanding the EOG Resources decision early in 2018, our Reply Letter documents that the circumstances have changed, and that the particular circumstances at Exxon Mobil with respect to the subject matter of the Proposal warrant a determination that the Proposal should be allowed to go to a shareholder vote.
Circumstances relating to the Proposal:

- The October 2018 IPCC report, *Global Warming of 1.5°C*, documented both the threat posed by current warming trajectories to future habitability of the earth and economic systems, and the unprecedented scale of worldwide mobilization of public and private sector resources required to address it.

- The launch of the Climate Action 100+ initiative, through which investors with $33 trillion in AUM are engaging with companies to encourage action to reduce greenhouse gas emissions across the value chain, consistent with the Paris Agreement’s goal of limiting global average temperature increase to well below 2°C above pre-industrial levels. In addition, numerous other investor efforts described in the Reply Letter have ripened the issue and increased the knowledge and commitment of investors regarding these matters. Notably, investors representing $9.5 trillion in assets under management have written in support of the Proposal and to urge Staff to deny the company’s request for no-action relief.

- The emergence of efforts by Company peers to set targets in line with those for which disclosure is sought by the Proposal, as set out in the Reply Letter.

A recent U.S. General Accounting Office (GAO) report makes clear the federal government has a strategic role in reducing federal fiscal exposure — including as a “leader of a strategic plan that coordinates federal efforts and informs state, local and private-sector action” (Emphasis added).\(^1\) However, as climate change risks remain on the High-Risk List, the federal government is not meeting those leadership obligations. Key to meeting the GAO’s criteria for removal from the High-Risk List\(^2\) is the federal government identifying responsibilities of other entities, in addition to federal and state governments.

As a result of this report, it seems clear that the Securities and Exchange Commission should facilitate, and not interfere with, the ability of investors to engage and undertake private ordering to encourage portfolio companies to mitigate climate change impacts. Even members of the corporate bar have recognized that in the absence of effective regulatory responses by the federal government, private ordering mechanisms such as the shareholder proposal process represent the best forum for resolving issues of material concern to investors.\(^3\)

---

2. Id. at 120.

3. *The Era of Private Ordering for Corporate Governance*, Gary L. Tygesson, Dorsey & Whitney LLP, on Wednesday, August 23, 2017: "The power of institutional investors to effect changes in the corporate governance framework in the absence of regulation has been demonstrated by the recent and dramatic rise of privately-ordered proxy access.... Regardless of, or perhaps in response to, any relief provided by Congress or the SEC, investors and groups of investors are likely to continue to push for greater shareholder engagement and enhanced disclosure and will use their voting power to effect change, especially in ESG and other non-traditional performance areas where they see a strong tie to long-term value creation."
Thus, the circumstances surrounding the Proposal have now evolved to the extent that the current request for the Company to set short-, medium- and long-term targets is not impractical for shareholder consideration and does not delve too deeply. As noted above, investors are already focused on the topic on multiple fronts. This Proposal addresses a question of high consequence for society and investors. Shareholders should not be disenfranchised from their opportunity to engage with the Company on this issue of both financial and societal consequence. The changing times demonstrate that the Proposal is no longer excludable under Rule 14a-8(i)(7).

Circumstances of Exxon Mobil:

In accordance with Staff Legal Bulletin 14J, a proposal that may constitute micromanagement for smaller companies does not necessarily constitute micromanagement when posed to Exxon Mobil. The Commission and Staff have both made it clear that determinations of micromanagement require review of the circumstances of the company to which it is directed.

Exxon Mobil is in a league of its own. As the largest U.S. oil and gas company, it faces substantial climate risks and the path taken by Exxon Mobil has a larger impact on climate change than probably any other issuer. This has made the Company a particular focus of the largest institutional investors, for many of whom Exxon Mobil represents a significant portfolio holding. The singular impact of the Company on climate change (and conversely, the impact of climate change on the Company), the scale of its operations, as well as the Company’s notoriety for its particular role in climate policy all speak to the distinction of the Company in this regard.

Additionally, many Exxon Mobil shareholders are well versed on issues regarding the impact of climate change on the Company. Shareholders have already weighed in with a majority vote in 2017 asking the Company to issue a scenarios report, focusing on financial risks to the Company from climate policy. It is practical for shareholders to participate in this debate, and in these circumstances, the Proposal represents the important next step in an ongoing discussion and debate among the shareholders and the board and management.

As a former Exxon Mobil executive has noted, for years the Company’s slogan was “Taking on the World’s Toughest Energy Challenges.” The Company’s investors have every right through the shareholder proposal process to encourage the Company to live up to that slogan. Exxon Mobil is near the top of the Fortune 500 companies, one of the largest publicly traded companies and the world’s ninth largest corporation by revenue. The magnitude of the Company and its role in greenhouse gas emissions reflects the transcendent importance of climate risk disclosure for a company of its size, even when such disclosure may be micromanagement for a smaller company. Therefore what may be micromanagement for a smaller company is not in this instance.

Finally, the Company attempts to depict the Reply Letter as vague and misleading under Rule 14a-8(i)(3) claiming that “... the Proposal contains internally contradictory mandates for implementation. ...” Specifically, the Company attempts to depict two concepts as incompatible: i) that divestment of assets would not align with the Paris Agreement since those assets may then be developed by another company; and, ii) peer companies cited in the Reply Letter as having implemented the Proposal’s objectives base their targets in part on divesting assets.

This assertion is nothing more than a distraction. Whether one or more of those peer companies based emission targets in part on divestment of assets as part of their multi-faceted strategies has no bearing either on their commitments to achieve targets in alignment with global goals or on the Proposal, which contains no “mandates” as to its implementation.

In all other respects, we stand by our original reply. We urge the Staff to inform the Company that the Proposal is not excludable on any of the asserted bases, and that the Proposal must appear on the Company’s 2019 proxy statement.

Sincerely,

Sanford Lewis

Office of Chief Counsel
Division of Corporation Finance
Securities and Exchange Commission
100 F Street, NE
Washington, D.C. 20549
via email: shareholderproposals@sec.gov

Ladies and Gentlemen:

On behalf of Exxon Mobil Corporation, a New Jersey corporation (the "Company"), we are writing to respond to the letter dated March 8, 2019 from Sanford Lewis, on behalf of the New York State Common Retirement Fund and the Church Commissioners for England, as co-lead filer (collectively, the "Proponent"). The letter from the Proponent (the "Proponent Letter") was in response to the request from the Company, dated January 31, 2019 (the "No-Action Letter"), regarding the exclusion of a shareholder proposal submitted by the Proponent (the "Proposal") from the Company's proxy statement for its 2019 Annual Meeting of Shareholders. Certain defined terms are used herein as defined in the No-Action Letter. A copy of the Proposal is included with this letter as Exhibit A.

A recent decision by the Staff confirms that the Proposal is excludable on the basis of Rule 14a-8(i)(7) because it inappropriately micromanages the Company. The text of the resolution in the proposal that was the subject of a no-action request by Devon Energy Corporation (March 4, 2019) states: “Shareholders request that the Devon Board of Directors, in annual reporting from 2020, include disclosure of short-, medium- and long-term greenhouse gas targets aligned with the greenhouse gas reduction goals established by the Paris Climate Agreement to keep the increase in global average temperature to well below 2°C and to pursue efforts to limit the increase to 1.5°C. This reporting should cover both the corporation’s operations and products, omit propriety information, and be prepared at reasonable cost.” The Staff determined that in its view, that proposal would “require the [c]ompany to adopt targets aligned with the goals established by the Paris Climate Agreement. By imposing this requirement, the Proposal would micromanage the Company by seeking to impose specific methods for implementing complex policies in place of the ongoing judgments of management as overseen by its board of directors.”

The text of the resolution in the Proposal is the same as the one in the Devon Energy letter, and states: “Shareholders request that the Board of Directors, in annual reporting from 2020, include disclosure of short-, medium- and long-term greenhouse gas targets aligned with the greenhouse gas reduction goals established by the Paris Agreement to keep the increase in global average temperature to well below 2°C and to pursue efforts to limit the increase to 1.5°C. This reporting
should cover both the corporation’s operations and products, omit proprietary information, and be prepared at reasonable cost.”

The Commission has stated that the policy underlying the “ordinary business” exception rests on two central considerations: one is subject matter and the second is the degree to which the proposal “micromanages” the company “by probing too deeply into matters of a complex nature upon which shareholders, as a group, would not be in a position to make an informed judgment” (1998 Release). Micromanagement considerations may come into play where the proposal involves intricate detail, or seeks to impose specific time-frames or methods for implementing complex policies, and looks only to the degree to which a proposal seeks to micromanage, which could take into account factors such as the nature of the proposal and the circumstances of the company to which it is directed. A proposal calling for a report may be excludable if the substance of the report relates to the imposition or assumption of specific timeframes or methods for implementing complex policies.

The Staff’s determination in Devon Energy is consistent with its other decisions that proposals seeking company-wide GHG targets micromanage companies by imposing specific timeframes or methods for implementing complex policies. The supporting statement of the Proposal makes clear that “disclosing targets” is a central objective, and that it is “essential for the company to identify and disclose targets” aligned with the goals established by the Paris Agreement.

The Proponent Letter characterizes the Proposal in two ways. It attempts to reassure us, in the section arguing that the Proposal does not micromanage, that the Proposal seeks a “strategic framework,” “strategic focus,” and “reasonable” levels of detail and does not mandate “specific…targets.” But in the section arguing that the Company has failed to substantially implement the Proposal, the Proponent Letter asserts that the Proposal requires the Company to “chart a proactive path defined by short-, medium- and long-term GHG emission targets” aligned with the GHG emissions reduction goals established by the Paris Agreement, to “quantify[ ]” the GHG emissions of its products, as well as disclose “targets to reduce GHG emissions.”

The short-, medium- and long-term targets that the Proposal seeks are unduly specific for purposes of Rule 14a-8(i)(7) and therefore the Proposal should be excluded because it inappropriately micromanages the Company.

Furthermore, we reiterate that, as stated in our No-Action Letter, the Company has already substantially implemented the Proposal pursuant to Rule 14a-8(i)(10) and that the Proposal is vague and misleading under Rule 14a-8(i)(3). As evidenced in the Proponent Letter, the Proposal contains internally contradictory mandates for implementation, such as: (a) stating that divesting assets would not be in alignment with the Paris Agreement and would not fulfill the Proposal, since those assets may then be developed by another company, but at the same time citing to several other companies as examples of those that have implemented the Proposal’s objectives when those companies’ emissions reduction targets are based in part on divesting assets (pages 9-10) and (b) recommending specific actions that would purported to lead to implementation of the Proposal without acknowledging that those efforts could increase other types of emissions or violate existing contracts (page 16). Accordingly, the Proposal is excludable as well, under Rules 14a-8(i)(10) and 14a-8(i)(3).

Respectfully yours,

Louis L. Goldberg

Re: Shareholder Proposal to Exxon Mobil Corporation from the New York State Common Retirement Fund and the Church Commissioners for England and Co-filed by More than Thirty-Five Other Investors

Counsel:

The undersigned, representing $9.5 trillion in assets under management, write with respect to a shareholder proposal filed by the New York State Common Retirement Fund and the Church Commissioners for England, and co-filed by more than thirty-five other investors calling on Exxon Mobil Corporation (Exxon or Company) to disclose in annual reporting its short-, medium- and long-term greenhouse gas (GHG) targets aligned with the GHG emission reduction goals established by the Paris Climate Agreement to keep the increase in global average temperature to well below 2°C and to pursue efforts to limit the increase to 1.5°C (Proposal). A copy of the Proposal is attached as Exhibit A.

Exxon has sought no-action relief, claiming alternatively that the Proposal is vague, that it attempts to micromanage the Company’s ordinary business operations, or that the Company has substantially implemented the Proposal.

We disagree with all of those assertions, and strongly urge the Staff to deny the relief sought by the Company.

The issues of climate change and GHG emissions have become increasingly urgent as their impact on our portfolios and on society becomes more tangible. Many investors are increasingly committing to work to ensure that our portfolio companies are in alignment with long-term demands of climate change mitigation.

The significance of this issue to Exxon investors is evidenced by a steady stream of engagement with the Company for the past several years. For example, nearly every year beginning as early as 2005, shareholders have filed various climate change- or GHG-related proposals with the Company including several that, like the Proposal, requested the board adopt goals for the reduction of GHG emissions. A compilation of summaries of those proposals is attached to this letter as Exhibit B.

Since May 2018, investors participating in Climate Action 100+ have encouraged the world’s largest corporate GHG emitters, including Exxon, to implement a strong climate
governance framework with board accountability and oversight, take action to reduce GHG emissions across the value chain consistent with the Paris Agreement, and disclose information necessary for shareholders to assess business plans against a range of climate scenarios.

Most recently, a proposal filed in 2017 seeking a two-degree scenario analysis garnered support from 62.3% of Exxon’s shareholders. This vote clearly demonstrates investors’ strong interest in the issues presented by the Proposal. **This year’s Proposal builds directly on the 2017 proposal, requesting that the company take the next step in this process**—disclosure of short-, medium- and long-term targets for GHG emissions from operations and products aligned with the GHG goals established by the Paris Climate Agreement to keep the increase in global average temperature to well below 2°C and to pursue efforts to limit the increase to 1.5°C.

The Company has not substantially implemented the terms of the Proposal. There is a great difference between the actions requested by the Proposal and the Company’s actions to date. Exxon has no current goals for reducing most of its GHG emissions, including those from its products. Although Exxon has published short-term goals for a portion of its emissions, the Company does not have medium- or long-term emission reduction goals for any of its operations or products. In particular, Exxon has refused to disclose GHG emissions associated with the use of its products, calling them the responsibility of others.

Finally, the Proposal includes reasonable and necessary details. It is neither vague nor overly prescriptive. For years shareholders have been voting on climate-change-related proposals at ExxonMobil and many other companies and companies have been engaging with shareholders on the topic.

We urge the Staff to decline Exxon’s request for no-action relief so that the shareholder–company discussion can proceed as it has for the past twelve years.

RESOLVED: Shareholders request that the Board of Directors, in annual reporting from 2020, include disclosure of short-, medium- and long-term greenhouse gas targets aligned with the greenhouse gas reduction goals established by the Paris Climate Agreement to keep the increase in global average temperature to well below 2°C and to pursue efforts to limit the increase to 1.5°C. This reporting should cover both the corporation’s operations and products, omit proprietary information, and be prepared at reasonable cost.

SUPPORTING STATEMENT: It is widely accepted that a transition to a low carbon economy - driven by advances in technology and government policy aligned with the Paris Agreement - is under way. As the use of zero- and low-carbon technology increases due to technical breakthroughs and decreasing costs, and as governments take steps to limit greenhouse gas emissions, fossil fuel companies face enhanced risk. These trends could limit returns to ExxonMobil’s investors by increasing the company’s operating costs or by reducing demand for its products.

The Grantham Research Institute on Climate Change and the Environment has identified at least 1,512 climate change laws. Growing recognition of the risks from climate change will result in increasing numbers of, stringency of, and support for these laws.

Disclosing targets is an important means of assuring investors of the management of risks associated with climate change and investors welcome ExxonMobil’s recent announcement of a 2020 methane emission reduction goal. However, some of ExxonMobil’s peer companies, including Total and Shell, have disclosed much longer-term ambitions, including for emissions resulting from the use of their products. Investors participating in Climate Action 100+, representing over $32 trillion in assets under management, are seeking enhanced disclosure of targets and other measures demonstrating company alignment with the Paris Agreement.

To ensure that ExxonMobil is adequately prepared to be successful into the future for its shareholders and other stakeholders we believe it is essential for the company to identify and disclose targets that are aligned with the goals of the Paris Agreement.
EXHIBIT B

CLIMATE CHANGE-RELATED SHAREHOLDER PROPOSALS AT EXXONMOBIL

2005

Item 9—Climate Science Report (Christian Brothers Investment)—That, by the 2006 annual shareholder meeting, the Board of Directors make available to shareholders the research data relevant to ExxonMobil's stated position on the science of climate change, omitting proprietary information and at reasonable cost.

2007

Item 15—Greenhouse Gas Emissions Goals (Sisters of St. Dominic)—RESOLVED: shareholders request that the Board of Directors adopt quantitative goals, based on current technologies, for reducing total greenhouse gas emissions from the Company's products and operations; and that the Company report to shareholders by September 30, 2007, on its plans to achieve these goals. Such a report will omit proprietary information and be prepared at reasonable cost."

2008

Item 15—Greenhouse Gas Emissions Goals (Sisters of St. Dominic)—RESOLVED: shareholders request that the Board of Directors adopt quantitative goals, based on current technologies, for reducing total greenhouse gas emissions from the Company's products and operations; and that the Company report to shareholders by September 30, 2008, on its plans to achieve these goals. Such a report will omit proprietary information and be prepared at reasonable cost."

Item 16—CO2 Information at the Pump (Mario Lalanne)—“Resolved that Exxon Mobil Corporation inform its customers about the carbon dioxide (CO2) emissions generated by the gasoline or the diesel fuel they buy. The quantitative information would be provided at the pump and based on average well-to-wheels figures, i.e. encompassing all phases from extraction up to and including consumption.

Item 17—Climate Change and Technology Report (Neva Rockefeller Goodwin)—Resolved: Shareholders ask Exxon Mobil Corporation's (‘ExxonMobil’s’) Board of Directors to establish a task force, which should include both (a) two or more independent directors and (b) relevant company staff, to investigate and report to shareholders on the likely consequences of global climate change between now and 2030, for emerging countries, and poor communities in these countries and developed countries, and to compare these outcomes with scenarios in which ExxonMobil takes leadership in developing sustainable energy technologies that can be used by and for
the benefit of those most threatened by climate change. The report should be prepared at reasonable expense, omitting proprietary information, and should be made available to shareholders by March 31, 2009.

2009

Item 11—Greenhouse Gas Emissions Goals (Sisters of St. Dominic)—RESOLVED: shareholders request that the Board of Directors adopt quantitative goals, based on current technologies, for reducing total greenhouse gas emissions from the Company’s products and operations; and that the Company report to shareholders by September 30, 2009, on its plans to achieve these goals. Such a report will omit proprietary information and be prepared at reasonable cost.

Item 12—Climate Change and Technology Report (Neva Rockefeller Goodwin)—Resolved: Shareholders ask Exxon Mobil Corporation’s (‘ExxonMobil’s’) Board of Directors to establish a task force, which should include both (a) two or more independent directors and (b) relevant company staff, to investigate and report to shareholders on the likely consequences of global climate change between now and 2030, for emerging countries, and poor communities in these countries and developed countries, and to compare these outcomes with scenarios in which ExxonMobil takes leadership in developing sustainable energy technologies that can be used by and for the benefit of those most threatened by climate change. The report should be prepared at reasonable expense, omitting proprietary information, and should be made available to shareholders by March 31, 2010.

2010

Item 12—Greenhouse Gas Emissions Goals (Sisters of St. Dominic)—RESOLVED: shareholders request that the Board of Directors adopt quantitative goals, based on current technologies, for reducing total greenhouse gas emissions from the Company’s products and operations; and that the Company report to shareholders by September 30, 2010, on its plans to achieve these goals. Such a report will omit proprietary information and be prepared at reasonable cost.

2011

Item 12—Greenhouse Gas Emissions Goals (Sisters of St. Dominic)—RESOLVED: Shareholders request that the Board of Directors adopt quantitative goals, based on current technologies, for reducing total greenhouse gas emissions from the Company’s products and operations; and that the Company report to shareholders by September 30, 2011, on its plans to achieve these goals. Such a report will omit proprietary information and be prepared at reasonable cost.
2012
Item 9—Greenhouse Gas Emissions Goals (Sisters of St. Dominic)—RESOLVED:
Shareholders request that the Board of Directors adopt quantitative goals, based on
current technologies, for reducing total greenhouse gas emissions from the Company’s
products and operations; and that the company report to shareholders by November 30,
2012, on its plans to achieve these goals. Such a report will omit proprietary information
and be prepared at reasonable cost.

2013
Item 11—Greenhouse Gas Emissions Goals (Sisters of St. Dominic)—RESOLVED:
Shareholders request that the Board of Directors adopt quantitative goals, based on
current technologies, for reducing total greenhouse gas emissions from the Company’s
products and operations; and that the Company report to shareholders by November 30,
2013, on its plans to achieve these goals. Such a report will omit proprietary
information and be prepared at reasonable cost.

2014
Item 8—Greenhouse Gas Emissions Goals (Sisters of St. Dominic)—RESOLVED:
Shareholders request that the Board of Directors adopt quantitative goals, based on
current technologies, for reducing total greenhouse gas emissions from the Company’s
products and operations; and that the Company report to shareholders by November 30,
2014, on its plans to achieve these goals. Such a report will omit proprietary
information and be prepared at reasonable cost.

2015
Item 10—Greenhouse Gas Emissions Goals (Sisters of St. Dominic)—RESOLVED:
Shareholders request that the Board of Directors adopt quantitative goals for reducing
total greenhouse gas emissions from the Company’s products and operations; and that
the Company report to shareholders by November 30, 2015, on its plans to achieve
these goals. Such a report will omit proprietary information and be prepared at
reasonable cost.

2016
Item 11—Policy to Limit Global Warming to 2°C (Sisters of St. Dominic)—Resolved:
Shareholders request that the Board of Directors adopt a policy acknowledging the
imperative to limit global average temperature increases to 2°C above pre-industrial
levels, which includes committing the Company to support the goal of limiting warming
to less than 2°C.
Item 12—Report on Impacts of Climate Change Policies (NYSCRF)—RESOLVED:
Shareholders request that by 2017 ExxonMobil publish an annual assessment of long
term portfolio impacts of public climate change policies, at reasonable cost and omitting
proprietary information. The assessment can be incorporated into existing reporting and
should analyze the impacts on ExxonMobil’s oil and gas reserves and resources under
a scenario in which reduction in demand results from carbon restrictions and related
rules or commitments adopted by governments consistent with the globally agreed upon
2 degree target. The reporting should assess the resilience of the company’s full
portfolio of reserves and resources through 2040 and beyond and address the financial
risks associated with such a scenario.

2017

Item 12—Greenhouse Gas Emissions Goals (NYSCRF)—RESOLVED: Shareholders
request that, beginning in 2018, ExxonMobil publish an annual assessment of the long-
term portfolio impacts of technological advances and global climate change policies, at
reasonable cost and omitting proprietary information. The assessment can be
incorporated into existing reporting and should analyze the impacts on ExxonMobil’s oil
and gas reserves and resources under a scenario in which reduction in demand results
from carbon restrictions and related rules or commitments adopted by governments
consistent with the globally agreed upon 2 degree target. This reporting should assess
the resilience of the company’s full portfolio of reserves and resources through 2040
and beyond, and address the financial risks associated with such a scenario.

Item 13—Report on Methane Emissions (As You Sow)—RESOLVED: Shareholders
request that Exxon report annually to shareholders (at reasonable cost, omitting
proprietary information) and using quantitative indicators, the company’s actions beyond
regulatory requirements to minimize methane emissions, particularly leakage, from the
company’s hydraulic fracturing operations.

Re: Shareholder Proposal to Exxon Mobil Corporation Regarding Greenhouse Gas Emission Targets Aligned with Global Warming Containment Goals of Paris Agreement on Behalf of The New York State Common Retirement Fund and Others

Ladies and Gentlemen:

The New York State Common Retirement Fund (the “Proponent”) is beneficial owner of common stock of Exxon Mobil Corporation (the “Company”), and with the Church Commissioners for England, co-lead filer, has submitted a shareholder proposal (the “Proposal”) to the Company together with co-filers.¹ I have been asked by the Proponent to respond to the letter dated January 31, 2019 (“Company Letter”) sent to the Securities and Exchange Commission by James E. Parsons, Executive Counsel of Exxon Mobil Corporation. In that letter, the Company contends that the Proposal may be excluded from the Company’s 2019 proxy statement. A copy of this letter is being emailed concurrently to Mr. Parsons of Exxon Mobil Corporation.

Our response includes a Summary indexed with page references to the more detailed Analysis and Response that follows. Based on the enclosed materials, we believe it is clear that the Company has provided no basis for the conclusion that the Proposal is excludable from the 2019 proxy statement pursuant to Rule 14a-8. As such, we respectfully request that the Staff inform the Company that it is denying the no-action letter request. If you have any questions, please contact me at 413 549-7333 or sanfordlewis@strategiccounsel.net.

Sincerely,

Sanford Lewis

SUMMARY
Response to No Action Request
2019 Proxy Season

Exxon Mobil
Proposal for Greenhouse Gas Targets

(Page References in this Summary are to pages of
Attached ANALYSIS AND RESPONSE)

The Proposal asks the Company, in annual reporting from 2020, to disclose its short-, medium- and long-term greenhouse gas emissions (GHG) targets for the Company’s operations and products aligned with the goals of the Paris Agreement, to keep the increase in global average temperature to well below 2°C and to pursue efforts to limit the increase to 1.5°C.

Rule 14a-8(i)(3)

The Company Letter seeks exclusion of the Proposal on the basis of Rule 14a-8(i)(3), claiming the Proposal’s request for disclosure of Company GHG emissions targets aligned with the Paris Agreement’s temperature containment goals makes the Proposal misleading, because implementation of the Agreement is intended to occur through “government-to-government” agreements that are based on Nationally Determined Contributions (NDCs), rather than private sector targets. The Company Letter claims that GHG emission reduction goals of the Paris Agreement cannot translate meaningfully into “unilateral reduction goals” for an individual company. The Company further argues that setting reduction targets is meaningless because oil and gas will be needed in the future and others will provide whatever Exxon does not. Pages 5-6.

However, these arguments misconstrue the Proposal which is neither vague nor misleading. The 1.5°C and 2°C goals of the Paris Agreement have resulted in global GHG emission reduction goals based upon exacting science regarding what is necessary to avoid catastrophic warming. In addition to setting such temperature containment goals, the Agreement requires specific actions from governments including setting NDCs. In addition, the Paris Agreement Clause 2.1c establishes the goal of “Making finance flows consistent with a pathway towards low GHG emissions and climate-resilient development.” The Paris Agreement was marked by extensive private sector participation in goal setting, and the adopting Conference statement called on non-party stakeholders to “scale up their efforts and support actions to reduce emissions and/or to build resilience and decrease vulnerability to the adverse effects of climate change ….” Pages 6-7.
This Proposal, which focuses on these needed private sector efforts to redirect financial flows and to meet the agreed upon global climate goals, is clear and its request is appropriate. Investor interest in this Proposal reflects private sector efforts to redirect financial flows consistent with the Agreement. Investors worldwide now understand and are acting to ensure that financial arrangements and corporate policies operate within the limits of the “global carbon budget,” which represents the maximum amount of GHGs that can be emitted, and fossil fuels that can be burned, that would still make it probable that we will be able to keep the increase in global average temperature to 1.5º to 2º C. Page 7.

This process requested by the Proposal is well understood by the Company and investors. For instance, the Climate Action 100+ an investor group of 324 investors who collectively manage more than $33.4 trillion in assets, is seeking action from the largest GHG emitting companies to align with Paris goals through engagement, disclosure, and committed action by the largest GHG emitting companies, including Exxon Mobil and the other oil and gas majors. One of the core requests to all of the companies is to “Take action to reduce greenhouse gas emissions across the value chain, consistent with the Paris Agreement’s goal of limiting global average temperature increase to well below 2 degrees Celsius above pre-industrial level.” In response to this investor initiative, numerous other companies in the oil and gas sector and other sectors are setting targets and taking actions with just that alignment and outcome in mind. Pages 7-9.

The Company Letter also claims that setting GHG goals for the Company could be counterproductive if the Company fulfills the GHG targets by simply divesting assets that are developed by other companies, or if other companies fulfill the market demand for oil and gas. The reality is that as one of the largest oil companies, the Company has capacities for exploration and development which cannot necessarily be met by other actors given the large capitalizations and high-tech expertise required. In addition, divesting assets to other companies for development of oil and gas might not be “in alignment” with the temperature containment goals, and therefore would not be consistent with the proposal. Page 10.

Further, many of the activities that the Company describes in the Rule 14a-8(i)(3) section of its letter -- the role of its natural gas business in the transition from coal, and the development of innovative products that reduce emissions at the consumer level — could well be appropriate as part of the Company’s overall strategy for setting targets consistent with the Paris Agreement’s goals. But that strategy would require the Company to begin estimating and tracking overall GHG emissions from its operations and products, and then integrating the impacts of those activities into short- medium- and long-term targets. Pages 7, 10.

The Company Letter repeats the Company’s prior efforts to use perceived vagaries of public policies on climate change as a means of avoiding accountability through the
The 2017 2° C scenario planning proposal that was supported by 62.3% was the subject of a no action challenge by the Company in 2016, asserting that the term “preindustrial emissions” was vague and seeking exclusion under Rule 14a-8(i)(3). The Staff rejected this assertion. Exxon Mobil (March 22, 2016). Page 10.

The Company Letter’s assertions that the Proposal is misleading are the types of objections that the SEC Staff has stated are appropriate for companies to address in the Company’s statement of opposition that appears on the proxy along with proposal—“factual assertions that, while not materially false or misleading, may be disputed or countered; …. and/or statements [that] represent the opinion of the shareholder proponent or a referenced source.” Page 10.

Thus, the Proposal is not excludable under Rule 14a-8(i)(3).

**Rule 14a-8(i)(7)**

The Company Letter asserts that the Proposal is excludable on the basis of Rule 14a-8(i)(7) because it interferes with the Company’s ordinary business by micromanaging: impermissibly involving complex details, probing too deeply into matters which are impractical for shareholder oversight, and impeding management’s ability to operate the Company’s day-to-day business. However, the Proposal does not focus on minutia, but rather important strategic questions that are appropriate for a shareholder proposal.

There has always been room in the shareholder proposal process for shareholders to advise a company through voting on a proposal to ask a company to reduce its impact on the environment. The current Proposal involves just such a strategic framework, directed toward encouraging the board and management to monitor and set goals for the scale and pace of its response to climate change, and as such, the Proposal does not impermissibly substitute the judgment of shareholders for the judgment of the Company. Pages 15-16.

Climate change is a significant policy issue long recognized by the Staff. Climate change is a significant policy issue for the Company as a large operation with significant climate impact, and with material risks associated with climate change. Pages 16-17.

The remaining ordinary business question presented under Rule 14a-8(i)(7) is whether the Proposal seeks to address the subject matter in a manner that micromanages the Company. Long-standing SEC practice supports allowing shareholder proposals that ask the board and management to reduce the Company’s impact on society, whether it be in the form of eliminating human rights abuses or reducing GHG emissions that cause climate change. This form of strategic focus by shareholders through the proposal process is not considered micromanagement under long-standing practice and under the
Commission’s 1998 Release. The Commission clarified in the preamble to the 1998 Release that it did not intend to exclude as ordinary business or micromanagement all proposals seeking detail or seeking to promote timeframes or methods. The Commission wrote: “commenters thought that the examples cited seemed to imply that all proposals seeking detail, or seeking to promote timeframes or methods, necessarily amount to ordinary business... We did not intend such an implication. Timing questions, for instance, could involve significant policy where large differences are at stake, and proposals may seek a reasonable level of detail without running afoul of these considerations.” (Emphasis added) Pages 17-19.

Therefore, where a proposal is directed toward a large difference on a significant issue for a company and society, and where the details and methods are at a “reasonable level,” a proposal directed toward that issue and those details and methods is not excludable on the basis of micromanagement. Pages 21-23.

Large differences are at stake. The Company has not established goals for reducing companywide GHG emissions consistent with the 1.5° and 2° goals on any timeframe, and in fact has made clear that its plans are based on demand, regardless of whether that demand drives warming in excess of 2°C. Pages 19-21, 24-25.

The Proposal does not involve intricate or unreasonable details or methods. The request to develop short-, medium- and long-term goals does not impose a specific time frame or otherwise direct the minutia of the business, but is framed based on reasonable methods that have long been acceptable in Staff decisions. The Proposal is framed on broad parameters through which investors, board, and management can reasonably assess whether the scale and pace of Company efforts are aligned with the temperature increase containment goals. Pages 25-27.

The question framed by the Proposal is a matter on which market-wide evidence demonstrates that shareholders are well equipped to make an informed judgment. Numerous initiatives of shareholders involving tens of trillions of dollars in assets currently seek disclosure and action consistent with the Proposal. Among others, these include the Task Force on Climate-related Financial Disclosures (TCFD), Climate Action 100+, Principles of Responsible Investment, Investor Network on Climate Risk, Transition Pathways Initiative, CDP, and the Asset Owner Disclosure Project. Pages 11-14.

Actions requested in the Proposal are important components of these initiatives and of investor strategies for benchmarking companies and portfolio construction. The disclosure recommended by the Proposal will allow for constructive engagement, compilation of investment metrics, and accurate portfolio construction. Preventing
shareholder proposals like this could undermine market expectations regarding portfolio construction, ESG risk management, engagement and governance. Pages 11-14

The framing of the Proposal is flexible — it encourages the board and management to redirect its policies to come into alignment with global climate expectations through requesting reasonable details. The Proposal does not mandate specific emission reduction targets for the Company, set any specific dates or deadlines, or predetermine what pathway must occur to reach the targets. Based on the activities of Company’s peers, there are numerous pathways by which the board and management can set and attain targets, including redirecting exploration and development programs toward renewable energy resources, increasing carbon sequestration initiatives, winding down or retiring fossil fuel assets and development rights, and developing consumer technologies or services to reduce energy consumption and GHG emissions, among others. Pages 25-28.

Therefore, the Proposal does not micromanage and is not excludable pursuant to Rule 14a-8(i)(7).

**Rule 14a-8(i)(10)**

The Company Letter asserts that the Company has substantially implemented the Proposal through existing disclosures, in which it describes its current efforts to mitigate climate change risk. In support of its argument that the Proposal is excludable under Rule 14a-8(i)(10), the Company mainly cites its Energy and Carbon Summary, a report that describes the Company’s approach to “meet the world’s growing demand for energy while reducing the environmental impacts and the risks of climate change.”

The Company’s reporting, however, entirely misses the essential objective of the present Proposal, which is to go beyond risk management or fulfilling consumer demand, and instead to chart a proactive path defined by short-, medium- and long-term GHG emissions targets aligned with the GHG emissions reduction goals established by the Paris Agreement. While the Company Letter and existing disclosures describe various company climate activities amounting to a general commitment to reduce and/or mitigate some GHG emissions in some segments and operations, the objective of aligning with the Paris goals is nowhere demonstrated. Pages 29-34

The Company’s activities do not meet the guidelines of the Proposal:

- The Company has not quantified and disclosed the GHG emissions of its products, which are likely to represent more than 80% of the Company’s GHG footprint.
• The Company has not disclosed medium- and long-term targets to reduce GHG emissions from operations and products.

• The Company has not disclosed a plan or targets aligned with the goals of the Paris Agreement, to keep the increase in global average temperature to well below 2°C and to pursue efforts to limit the increase to 1.5°C. The Company’s own 2018 Energy and Carbon Report acknowledged that the Company’s current strategies may be consistent with global warming of 2.4°C.

In the absence of such disclosures, the Company’s current planning and actions do not constitute substantial implementation. Further, the current measures by the Company are inadequate for portfolio allocation decisions, including those based on carbon footprint, which may affect the interests of long-term investors. Without the requested disclosures, the Proposal is not excludable under Rule 14a-8(i)(10). Pages 29-34.
THE PROPOSAL

PROPOSAL REGARDING GREENHOUSE GAS TARGETS

This proposal was submitted by the New York State Common Retirement Fund, 59 Maiden Lane — 30th Floor, New York, NY 10038, the beneficial owner of 10,584,905 shares and lead proponent of a filing group.

RESOLVED: Shareholders request that the Board of Directors, in annual reporting from 2020, include disclosure of short-, medium- and long-term greenhouse gas targets aligned with the greenhouse gas reduction goals established by the Paris Agreement to keep the increase in global average temperature to well below 2°C and to pursue efforts to limit the increase to 1.5°C. This reporting should cover both the corporation’s operations and products, omit proprietary information, and be prepared at reasonable cost.

SUPPORTING STATEMENT: It is widely accepted that a transition to a low carbon economy - driven by advances in technology and government policy aligned with the Paris Agreement - is under way. As the use of zero- and low-carbon technology increases due to technical breakthroughs and decreasing costs, and as governments take steps to limit greenhouse gas emissions, fossil fuel companies face enhanced risk. These trends could limit returns to ExxonMobil’s investors by increasing the company’s operating costs or by reducing demand for its products.

The Grantham Research Institute on Climate Change and the Environment has identified at least 1,512 climate change laws. Growing recognition of the risks from climate change will result in increasing numbers of, stringency of, and support for these laws.

Disclosing targets is an important means of assuring investors of the management of risks associated with climate change and investors welcome ExxonMobil’s recent announcement of a 2020 methane emission reduction goal. However, some of ExxonMobil’s peer companies, including Total and Shell, have disclosed much longer-term ambitions, including for emissions resulting from the use of their products. Investors participating in Climate Action 100+, representing over $32 trillion in assets under management, are seeking enhanced disclosure of targets and other measures demonstrating company alignment with the Paris Agreement.

To ensure that ExxonMobil is adequately prepared to be successful into the future for its shareholders and other stakeholders we believe it is essential for the company to identify and disclose targets that are aligned with the goals of the Paris Agreement.”
ANALYSIS AND RESPONSE
to No Action Request
2019 Proxy Season

ExxonMobil
Proposal for Greenhouse Gas Targets

BACKGROUND

ExxonMobil, the largest U.S. oil and gas company, is one of the world’s largest contributors to global greenhouse gas (GHG) emissions. While the Company does not estimate its GHG contributions, external experts have estimated that the Company has contributed as much as 3% of post-industrial global greenhouse gas emissions from its products and operations.\(^2\)

As will be discussed further below, recent scientific assessments have indicated an urgent need to expedite the reduction of GHG emissions, reducing global emissions of GHGs by 45 percent from 2010 levels by 2030. Meanwhile, the Company is currently expanding its investment in the development of GHG-intensive unconventional oil and gas reserves. In March 2018, Exxon CEO Darren Woods announced the strategy of directing more funds to “U.S. unconventionals” at an investor conference in New York, and the Company’s 2018 Investor Analyst Meeting report notes that capital expenditures in this area are growing.\(^3\) Additional reporting to investors shows an increase from 2016 to 2017 in U.S. expenditures of 48% in U.S. exploration, and a roughly four-fold increase in non-U.S. exploration.\(^4\) In the Management Discussion and Analysis of Financial Condition and Results of Operations in its Form 10-K for fiscal year 2017, the Company states:

“… the proportion of our global production from resource types utilizing specialized technologies such as unconventional drilling and production systems…is expected to grow over the next few years.”

In spite of global agreement that limits on the consumption of fossil fuels are needed to contain the increase of average temperatures to less than 2° C, it appears that the Company’s trajectory — as described in the communications referenced above, the Company’s annual report, Form 10-K, 2018 Energy and Carbon Summary, and elsewhere — is built upon the expectations of increasing global fossil fuel demand and consumption. Business strategy based upon this

assumption — in addition to being problematic for the reasons described herein — is unlikely to proportionally reallocate or redirect company finances and innovative capacities to support the development and scaling of clean energy technologies to meet the formidable challenges posed by climate change and the temperature containment goals.

Many experts and investors are concerned that the Company’s current approach will lock-in costly fossil fuel infrastructure, creating incentives for the Company to engage in further lobbying to preserve its ability to sell its fossil fuel products. Investors are also concerned that the approach being taken by the Company exposes the Company and its investors to additional long-term transition risk.

As a result, institutional investors with an estimated $1.9 trillion under management, led by New York State Comptroller Thomas P. DiNapoli, as Trustee of the New York State Common Retirement Fund (the Fund), and the Church of England’s investment fund (Church Commissioners) have filed the current shareholder Proposal calling on ExxonMobil to set and disclose GHG emission reduction targets, covering emissions from both its operations and the use of its products, in alignment with the global temperature containment goals of 2° C, while pursuing efforts to keep the temperature increase to 1.5° C.

A review of recent history leading to this Proposal is in order.

December 2015 — The Paris Agreement (COP21)
At the 21st Session of the Conference of the Parties (COP 21) in Paris, 195 global governments agreed to restrict GHG emissions to cap global temperature increase to no more than 2 degrees Celsius from pre-industrial levels and submitted plans to begin achieving the necessary GHG emission reductions. In the Paris Agreement, signatories also acknowledged the need to strive to keep global warming to 1.5 degrees, recognizing current and projected harms to low lying islands from warming-related sea level rise. The parties put mechanisms in place for transparent reporting by countries via their Nationally Determined Contributions and a ratcheting mechanism every five years to create accountability for achieving these goals.

The Paris Agreement Clause 2.1c established the goal of “Making finance flows consistent with a pathway towards low GHG emissions and climate-resilient development.” The Conference of the Parties decision document called on the private sector to assist in meeting the goals of the agreement.5

2016 Shareholder Proposal Addressing 2° C Scenario Planning Receives 38% Support
The Proponent filed a proposal with the Company requesting that the Company publish an annual assessment of the long term portfolio impacts of public climate change policies, analyzing

---

5 For example, paragraphs 133 and 14 of the Report of the Conference of the Parties (the Agreement-adopting document) provides that the Conference:
133. Welcomes the efforts of all non-Party stakeholders to address and respond to climate change, including those of civil society, the private sector, financial institutions, cities and other subnational authorities;
134. Invites the non-Party stakeholders referred to in paragraph 133 above to scale up their efforts and support actions to reduce emissions and/or to build resilience and decrease vulnerability to the adverse effects of climate change ....
the impacts on ExxonMobil’s oil and gas reserves and resources under a scenario in which reduction in demand results from carbon restrictions and related rules or commitments adopted by governments consistent with the globally agreed upon 2º C target, assessing the resilience of the company’s full portfolio of reserves and resources through 2040 and the financial risks associated with such a scenario. The proposal received 38% support of shareholders voting for or against the proposal.

2017 Shareholder Proposal Addressing 2º C Scenario Planning Receives Majority Support
In 2017, the proposal seeking portfolio resiliency analysis of the 2º C scenario was refiled by the New York State Common Retirement Fund, and in May of 2017 and received support of 62.3% of shareholders voting for or against the proposal.

February 2018 — Exxon Mobil Releases Report Responding to 2017 Proposal
ExxonMobil released a first report in February 2018 responding to the 2017 proposal. The Company report focused on anticipated demand for oil and gas, and the Company’s positioning to fill that demand by continuing to invest in oil and gas production. The Company’s Energy and Carbon Summary notes “Existing policy frameworks (including the Paris NDCs), financial flows, and the availability of cost-effective technologies indicate that society is not currently on a 2ºC pathway. Should society choose to more aggressively pursue a 2ºC pathway, we will be positioned to contribute through our engagement on policy, development of needed technologies, improved operations, and customer solutions.” The Fund, Church Commissioners and other investors continued to hold talks with ExxonMobil about the importance of releasing a more comprehensive disclosure report that addressed the Company’s carbon footprint.

November 2018 — Fourth U.S. National Climate Assessment Report Issued
In the United States, the Fourth National Climate Assessment report, issued November 2018, found that with continued growth in emissions, “annual losses in some U.S. economic sectors are projected to reach hundreds of billions of dollars by 2100 — more than the current gross domestic product of many U.S. states.” Other studies estimate global losses over $30 trillion. Economic impacts of a warming climate, include: supply chain dislocations, mass migrations of climate refugees, reduced resource availability, lost production, commodity price volatility, infrastructure damage, crop loss, energy disruptions, political instability, and reduced worker efficiency.

Intergovernmental Panel on Climate Change identifies large differences between 2ºC and 1.5ºC warming
A 2018 report of the Intergovernmental Panel on Climate Change provided an updated assessment based on recent understanding of the pace of climate change, regarding the difference between global success at containing the temperature increase to 2º versus containing the temperature increase to 1.5º. The report was geared toward identifying how much greater risk will occur if warming surpasses 1.5º or 2º. For instance, “How much more would heavy rainfall

events happen in a world of 1.5 degrees warming compared to today, and how much more severe would things get if warming increased to 2 degrees or beyond?” The Brookings Institution’s article on the dense IPCC report noted:

The report offers plenty of granular detail, for example, estimating how much additional habitat would be lost when moving from 1.5 to 2 degrees, or how many more ice-free summers the Arctic would have. Some of them are surprisingly sharp increases for half a degree—such as the estimate that the percent of global population exposed to extreme heat at least once every five years rises from 14 percent to 37 percent, or the estimate that coral reefs would degrade “only” an additional 70-90 percent under 1.5 degrees but 99 percent in a 2 degrees world.⁸

The report also demonstrates that to contain global emissions to stay on the 1.5° path, **global emissions of GHGs need to drop by 45 percent from 2010 levels by 2030.** This is at a time of dramatic recent increases in GHG emissions. The update compounds concerns about the current pace of reduction in GHG emissions from all sources. Furthermore, a key concept developed by scientists participating in implementation of the Paris Agreement is whether “unburnable” fossil fuels are being generated by fossil fuel companies opening new reserves and supplies.⁹

**2019- The Current Proposal**

Numerous organizations and initiatives have been created by investors representing trillions of dollars of market capital to redirect financial flows consistent with the Paris agreement temperature containment goals. The capital markets have begun to implement carbon footprinting and carbon asset risk assessment in portfolio analysis, and through engagements with portfolio companies requesting disclosure and improved performance in alignment with the Paris goals.

For the 2019 proxy statement, the present Proposal follows this ratcheting of global investor expectations. It asks the Company to set short-, medium- and long-term GHG targets aligned

---

⁹ For instance, an influential 2015 article in the journal *Nature* noted: “It has been estimated that to have at least a 50 percent chance of keeping warming below 2°C throughout the twenty-first century, the cumulative carbon emissions between 2011 and 2050 need to be limited to around 1,100 gigatonnes of carbon dioxide (Gt CO2). However, the greenhouse gas emissions contained in present estimates of global fossil fuel reserves are around three times higher than this and so the unabated use of all current fossil fuel reserves is incompatible with a warming limit of 2 °C. Our results suggest that, globally, a third of oil reserves, half of gas reserves and over 80 percent of current coal reserves should remain unused from 2010 to 2050 in order to meet the target of 2°C. Development of resources in the Arctic and any increase in unconventional oil production are incommensurate with efforts to limit average global warming to 2°C. Our results show that policymakers’ instincts to exploit rapidly and completely their territorial fossil fuels are, in aggregate, inconsistent with their commitments to this temperature limit. Implementation of this policy commitment would also render unnecessary continued substantial expenditure on fossil fuel exploration, because any new discoveries could not lead to increased aggregate production.” Christophe McGlade & Paul Ekins, “The geographical distribution of fossil fuels unused when limiting global warming to 2°C”, *Nature*, January 8, 2015.
with the goals established by the Paris Agreement to keep the increase in global average
temperature to well below 2 degrees, and to pursue efforts to limit the increase to 1.5 degrees.

Comptroller DiNapoli noted, upon filing of the Proposal, “ExxonMobil’s lack of GHG emissions
reduction targets puts it at odds with its industry peers that have taken such steps. The world is
transitioning to a lower carbon future and Exxon needs to demonstrate its ability to adapt or risk
its bottom line along with investors’ confidence.”

Representing a co-filer, Edward Mason, Church of England, Head of Responsible Investment for
the Church Commissioners, said: “We want to see ExxonMobil develop a clear strategy for long-
term sustainability, in line with international commitments for a safer climate. While we have
been pleased to see ExxonMobil start to address the impact of climate change on its business
over the past two years, the company has much more to do. Our request would bring Exxon in
line with its biggest European peer, Shell, and we believe the board can and should support it.”

LEGAL ANALYSIS

I. Rule 14a-8(i)(3)

The Proposal is neither vague nor misleading:

• The request of the Proposal is consistent with the broadly understood Paris
  Agreement, investor initiatives and peer company activities.

• Neither the Board, management nor shareholders would have difficulty
  understanding the request of the Proposal or how to implement it.

Some of the Company’s arguments might be appropriate to include in an opposition
statement, but they are not a basis for exclusion under Rule 14a-8(i)(3).

The Proposal requests the annual disclosure of short-, medium- and long-term GHG emissions
targets aligned with the GHG emissions reduction goals established by the Paris Agreement to
keep the increase in global average temperature to well below 2°C and to pursue efforts to limit
the increase to 1.5°C. The reporting should cover both the Company’s own operations as well as
its products.

The Company Letter asserts that the Proposal is misleading and excludable under Rule 14a-
8(i)(3) because:

…the particular framing of the Proposal reflects a
misunderstanding both of the nature of the Paris Agreement and of
the global energy economy which renders the Proposal
fundamentally misleading. The Company simply could not
implement the Proposal’s terms as presented. This is especially the
case with respect to the Proposal’s call for company specific
“targets” for the reduction of emissions from both the Company’s
“operations and products” that are “aligned with the greenhouse gas reduction goals established by the Paris Agreement.” Company Letter page 3.

The argument of the Company Letter that the Proposal is vague or misleading under Rule 14a-8(i)(3) must be evaluated against the criterion expressed by the Staff that a proposal is excludable if:

“the resolution contained in the proposal is so inherently vague or indefinite that neither the stockholders voting on the proposal, nor the company in implementing the proposal (if adopted), would be able to determine with any reasonable certainty exactly what actions or measures the proposal requires.”\(^{10}\)

Further, the Staff has clarified that statements in a Proposal that are not objectively false do not give rise to grounds for exclusion under Rule 14a-8(i)(3). Many objections raised by companies are better addressed through the Company’s opposition statement that would appear on the proxy statement along with the proposal.\(^ {11}\)

**Evaluating the Company Claims under Rule 14a-8(i)(3)**

The Company Letter asserts that the Paris Agreement cannot translate meaningfully into reduction goals for individual companies. According to the Company Letter, it would be inappropriate, even environmentally detrimental, for the Company to create its own GHG emissions targets consistent with the Proposal, because implementation of the Paris Agreement occurs through the “government-to-government accord” and any targets for the Company must meet government-imposed limits (Nationally Determined Contributions or NDCs), and the consumer demand generated within these imposed boundaries. Company Letter page 3.

However, the Paris Agreement includes several important global sub-agreements:

- It set an agreed-upon goal for containment of temperature increase (below 2°C and pursuing efforts to limit to 1.5°C)
- It established the process of NDCs which are expected to tighten over time
- It called for *redirecting financial flows consistent with the global goals.*

The Conference of the Parties at which the Agreement was adopted, in the Decision document, Paragraph 134 “invited all the non-Party stakeholders … to scale up their efforts and support actions to reduce emissions and/or to build resilience and decrease vulnerability to the adverse

\(^{11}\) Staff Legal Bulletin 14 B notes: ”Accordingly, going forward, we believe that it would not be appropriate for companies to exclude supporting statement language and/or an entire proposal in reliance on rule 14a-8(i)(3) in the following circumstances ….the company objects to factual assertions that, while not materially false or misleading, may be disputed or countered…. the company objects to statements because they represent the opinion of the shareholder proponent or a referenced source, but the statements are not identified specifically as such. We believe that it is appropriate under Rule 14a-8 for companies to address these objections in their statements of opposition.”
effects of climate change.” The Conference Decision also stated in its preamble a global agreement to “uphold and promote regional and international cooperation in order to mobilize stronger and more ambitious climate action by all Parties and non-Party stakeholders, including civil society, the private sector, financial institutions, cities and other subnational authorities, local communities and indigenous peoples.”

Consistent with the Paris Agreement and COP21 Conference, the private sector is undertaking numerous efforts to redirect financial flows and to ensure that emissions are reduced in line with global goals. As described in the background section of this letter, these include the Task Force on Climate-related Financial Disclosure (TCFD), Climate Action 100+, Principles of Responsible Investment, Investor Network on Climate Risk, Transition Pathways Initiative, CDP, and the Asset Owner Disclosure Project. The Proposal is in support of, and consistent with these efforts, which together reflect trillions of dollars of assets under management acting to redirect financial flows and implement the goals of the Paris Agreement. Furthermore, many private sector companies are moving forward consistent with the Paris Agreement to set science-based targets for reducing their GHG emissions.

Thus, the Company Letter is misdirected in implying that the only meaningful way GHG emissions will be reduced under the Paris Agreement is by each government enforcing their NDCs. Furthermore, the Company Letter fails to acknowledge that NDCs, under the terms of the Paris Agreement, are expected to be ratcheted down (become more restrictive) over time.

In its discussion of Rule 14a-8(i)(3), the Company Letter asserts that some of its activities involve emissions reductions. For instance, the Company notes that its natural gas business is helping to reduce global GHG emissions during the transition from coal. Similarly, the Company Letter notes that the Company is developing products that reduce emissions at the consumer level. These Company activities could well prove to be part of an overall implementation strategy in which the Company discloses targets for GHG emissions attributable to its operations and products.

Despite the Company’s claim that the Proposal is confusing or misleading in requesting GHG emissions reduction goals, activities in the market already reflect implementation of the approach presented in the Proposal. Some of Exxon’s global peers, and at least one hundred large companies in multiple sectors, have already committed to achieve GHG emissions reduction targets for operations and products in alignment with global goals.

---

12 For example, paragraphs 133 and 14 of the Report of the Conference of the Parties (the Agreement-adopting document) provides that the Conference:
133. Welcomes the efforts of all non-Party stakeholders to address and respond to climate change, including those of civil society, the private sector, financial institutions, cities and other subnational authorities;
134. Invites the non-Party stakeholders referred to in paragraph 133 above to scale up their efforts and support actions to reduce emissions and/or to build resilience and decrease vulnerability to the adverse effects of climate change ....
Notably, the oil super-major Shell, has set an ambition to reduce its net carbon footprint, including product-related emissions, by 50 percent by 2050, with interim targets. Shell published a graphic that depicts the company’s GHG plans succinctly:

![Ambition for Net Carbon Footprint](image)

**Figure 1 Shell Oil’s Published Medium and Long Term GHG goals aligned with the Paris Agreement**

Source: Shell Energy Transition Report

In its 2018 Climate Disclosure Project Report, Shell explains:

“Shell announced its ambition in November 2017 to reduce the net carbon footprint (NCF) of its energy products in step with society’s

---

progress to reduce GHG emissions. We aim to cut our and our customers’ GHG emissions from energy products that Shell sells — expressed in grams of CO2 equivalent per megajoule consumed — by around half by 2050. As an interim step by 2035, and predicated on societal progress, we aim for a reduction of around 20% compared with 2017 levels.

We have applied our own unique Net Carbon Footprint methodology, using our Sky scenario analysis and the IEA’s Energy Technology Perspectives 2017 as inputs. This has identified the reduction in the Net Carbon Footprint of the energy system needed to achieve a reasonable chance of limiting global warming to well below two degrees Celsius (2°C).”

Total, a major French energy company, has invested in solar energy and is reducing the carbon intensity of its energy products as a means for it to achieve a goal for the company’s mix of energy products to include 15 - 20% renewables by 2035. The company’s climate action plan, disclosed in its report *Integrating Climate Into Our Strategy*, includes detailed description of its Carbon Intensity Indicator, and how it plans to gradually decrease the carbon intensity of its energy products in keeping with the Paris Agreement. This report also describes how Total includes avoided emissions and is considering its options to increase natural gas production as a near-term step.

Oil super-major BP announced support for a 2019 resolution requesting targets for reducing GHG emissions from its operations aligned with the Paris goals, and disclosure of estimates for future reductions in the carbon intensity of its products.

---

15 Shell also notes: “Our approach to reducing the NCF covers emissions directly from Shell operations (including from the extraction, transportation and processing of raw materials, and transportation of products), those generated by third parties who supply energy to us for production, and our customers’ emissions from their consumption of our energy products. Also included are emissions from elements of this life cycle not owned by Shell, such as oil and gas processed by Shell but not produced by Shell, or from oil products and electricity marketed by Shell that have not been processed or generated at a Shell facility. Excluded are our emissions or our customers emissions from our chemicals and lubricants products, which are not used to produce energy.”

17 *Id. at 6.*

18 “BP supports shareholder resolution on climate change disclosure. Says strategy consistent with Paris goals,” *Offshore Energy Today* (February 1, 2019), https://www.offshoreenergytoday.com/bp-supports-shareholder-resolution-on-climate-change-disclosure-says-strategy-consistent-with-paris-goals/. Equinor, a major Norwegian energy company, has announced a goal to further reduce the carbon intensity of its upstream production to 8 kilograms of CO2 per barrel of oil equivalent by 2030, and is investing in wind energy development. The company plans to devote up to 25% of research funds to new energy solutions and energy efficiency by 2020. According to Equinor’s website, “Our strategy focuses on three main areas. We are building a high value and low carbon oil and gas portfolio, we are building a material industrial position in renewable energy and low carbon solutions, and we embed climate risk and performance into our decision-making. Our Climate Roadmap explains how we plan to achieve our goals and how we will develop our business, in support of the ambitions set out in the Paris climate agreement” (emphasis added).https://www.equinor.com/en/how-and-why/climate-change.html, p. 30
The Company’s peers, and the many other companies and investors, working to align their GHG emissions with the need to contain global warming below 2º C or 1.5º C have not found the Paris Agreement to be unclear. Thus, the Company Letter’s implication that shareholders, the board or management would not know how to implement the Proposal is contradicted by these efforts of Company’s peers.

The Company Letter also implies that reducing the total GHG emissions of its operations and products could be done in a manner that is inconsistent with the global temperature containment goals. For instance, the Company Letter discusses the possibility that setting these goals might lead it to divest assets that would then be developed by another Company. This would not be “in alignment” with the Paris Agreement, even if the Company reduced its GHG emissions, and therefore the proposal is not misleading in its framing.

The Company Letter repeats the Company’s prior efforts to use the perceived vagaries of public policies on climate change as a means of avoiding accountability through the shareholder proposal process. The 2017 2º C scenario planning proposal that was supported by 62.3% was the subject of a no action challenge by the Company in 2016, asserting that the term “preindustrial emissions” was vague and seeking exclusion under Rule 14a-8(i)(3). The Staff rejected this assertion. Exxon Mobil (March 22, 2016).

In the present no action request, while there may be varying nuances and legal interpretations possible regarding the Paris Agreement, the Company has not made a persuasive case that the Proposal in the current context is misleading. The Agreement itself calls for a redirection of financial flows to fulfill the agreement’s goals and in response, numerous investors and companies have begun tracking GHG’s and seeking alignment with a 1.5° C to 2º C scenario.

Discussion of GHGs, targets, the Paris Agreement and other elements of the Proposal are well understood and commonplace on proxy statements. These concepts are not alien or confusing to investors. In the investment community in particular, the focus of a proposal on targets in alignment with global climate goals is well understood. Shareholders have demonstrated substantial support for proposals and engagements with companies seeking GHG emissions targets. For instance, the climate and investment organization Ceres reports that during the 2018 proxy season, proposals asking companies to adopt GHG emissions reduction targets were filed at 17 companies. Five of these proposals were reportedly withdrawn with a commitment from the companies to take action. Seven of the proposals went to a vote, receiving an average of 35% support.

Support for the proposals is consistent with investor demand for climate disclosures in general, and science-based targets specifically, both of which have increased substantially as the risks have become more apparent. For instance:

Anne Simpson, Investment Director, Sustainability, at California Public Employees’ Retirement System stated: “Mapping a company’s carbon footprint, or the emissions it produces, and

---

19 www.ceres.org/resolutions
measuring its progress in this area is an important and growing part of our portfolio analysis. Over the long-term investors are saying to these companies that we want them to align their business strategy with the Paris Agreement.”

Jeanett Bergan, Head of Responsible Investment at KLP stated regarding the potential of better long term returns from setting SBTs: “If we as active owners improve the performance of CO2 intensive companies, that will help us secure better returns in the future.”

Andy Howard, Head of Sustainable Research at Schroders stated: “We want to know how exposed a particular business is to the changing context on climate and what it is practically doing to make the changes required; including its targets, timeframes and the extent of its ambition.”

**Investors are already tracking carbon footprints of their equities portfolios**

Numerous investing institutions have begun to track the carbon footprint and carbon trajectory of equities portfolios.

**Climate Action 100+ initiative** is currently backed by 324 investors with more than $33 trillion in assets under management, including 87 North American investors. Climate Action 100+, launched in December 2017, is an initiative led by investors to engage systemically important GHG emitters and other companies across the global economy that have significant opportunities to drive the clean energy transition and achieve the goals of the Paris Agreement. The aim of these engagements is to get companies to:

- Implement a strong governance framework which clearly articulates the board’s accountability and oversight of climate change risks and opportunities;

- Take action to reduce greenhouse gas emissions across the value chain, consistent with the Paris Agreement’s goal of limiting global average temperature increase to well below 2 degrees Celsius above pre-industrial level;

- Provide enhanced corporate disclosure in line with the final recommendations of the Task Force on Climate-related Financial Disclosures (TCFD) and, when applicable, sector-specific Global Investor Coalition on Climate Change Investor Expectations on Climate Change to enable investors to assess the robustness of companies’ business plans against a range of climate scenarios,
including well below 2-degrees Celsius, and improve investment decision-making.\(^{21}\)

The United Nations-supported Principles of Responsible Investment (PRI) launched the Montréal Carbon Pledge at its annual conference in September 2014. The pledge commits those that sign it to measure and disclose the carbon footprint of part or all of their equities portfolio. Such a footprint helps investors better understand, quantify and manage climate change-related impacts, risk and opportunities. The **Pledge has attracted commitment from over 120 investors with over USD 10 trillion in assets under management, as of the United Nations Climate Change Conference (COP21) in December 2015 in Paris.** Support for the Montréal Carbon Pledge comes from investors across Europe, the U.S., Canada, Australia, Japan, Singapore and South Africa. Signatories include Establissement du Régime Additionnel de la Fonction Publique (ERAFP), PGGM Investments, Bâtirente, CalPERS and University of California.\(^{22}\)

Building on the Montréal Carbon Pledge, the global Portfolio Decarbonization Coalition currently has members representing $800 billion in assets under management that are taking decarbonization approaches to their portfolios to support the transition to a low-carbon economy. PDC’s members implement decarbonization commitments including formal decarbonization related objectives and targets covering some or all of their investment portfolios, and measurement and periodic disclosure of their carbon exposure (or ‘footprint’) — the carbon intensity of their capital.\(^{23}\)

The largest investing institutions are also being monitored by **the Asset Owners Disclosure Project (AODP),** based in the UK, which rates and ranks the world’s largest institutional investors and assesses their response to climate-related risks and opportunities.

**Task Force on Climate-Related Financial Disclosures (TCFD).** The Financial Stability Board (FSB) set up the Task Force on Climate-Related Financial Disclosures (TCFD) under the chairmanship of Michael Bloomberg. The report focuses on recommendations for disclosure of climate risk in annual financial reports. The goal of the TCFD is to develop recommendations for voluntary climate-related financial disclosures that are consistent, comparable, reliable, clear, and efficient, and provide decision-useful information to lenders, insurers, and investors. The TCFD released its final recommendations report in June 2017. Notably, the TCFD recommendations include assessment of short-, medium- and long-term carbon risks and resilience. For investors who are implementing the TCFD on their portfolios in light of the 2°C goals, disclosures by portfolio companies of GHG emissions and reduction ambitions on short- medium and long-term timelines are relevant to portfolio management strategies.

**Principles of Responsible Investment (PRI) “Inevitable Policy Response” Investment Strategy for portfolio allocation,** anticipates the disruptive economic impacts of global regulatory responses as climate change worsens, and therefore provides strategies for diversification, engagement and risk transfer to protect the investors long-term portfolio value.

\(^{21}\) [https://www.ceres.org/initiatives/climate-action-100.](https://www.ceres.org/initiatives/climate-action-100.)

\(^{22}\) See Montréal Pledge campaign website [https://montrealpledge.org/](https://montrealpledge.org/).

\(^{23}\) [https://unepfi.org/pdc/](https://unepfi.org/pdc/)
The PRI, supported by investors with $80 trillion in assets under management, has begun a focus on the implications for investors of the “inevitable policy response” (IPR) when national and global policymakers come to realize that they must impose rapid, stringent carbon constraints to head off a worsening global climate change catastrophe.  

**The Transition Pathway Initiative (TPI)** is a global investor initiative that assesses companies’ preparedness for the transition to a low-carbon economy by: evaluating companies’ management of GHG emissions, management of climate-related risks and opportunities; evaluating how planned or expected future carbon performance compares to targets and pledges made as part of the Paris Agreement; and by publishing the analyses through a publicly-available tool hosted by its academic partner, the Grantham Research Institute on Climate Change and the Environment at the London School of Economics and Political Science. The TPI was launched in January 2017 and is currently supported by investors with $13.3 trillion AUM (as of Feb 2019).

**Sustainable Energy Investment (SEI) Metrics**, 2018, had tested $500 billion of equity for 2°C alignment (SEI Metrics, 2018). SEI Metrics covers a limited number of sectors with public equity and corporate portfolios. The project was recently relaunched as Paris Agreement Capital Transition Assessment (PACTA), which aims to measure the current and future alignment of investment portfolios with a 2°C scenario analysis, allowing investors to measure climate performance and address the challenge of shifting capital towards clean energy investments. Since its launch, over 2,000 portfolios have been tested for 2°C alignment with over $3 trillion in assets under management. **Of the 25% of surveyed investors involved in the road-test, 88% said they were likely or very likely to use the assessment in portfolio management, engagement, and / or investment mandate design.**

---

24 PRI notes: In effect, an IPR is what would need to happen if the world was to move towards a target of 1.5-1.75°C with 50-66% probability. Indeed, if policy actions do not ratchet up from current levels, we would need urgent and forceful policy action today to achieve anything close to attaining a 1.5°C outcome. IPR can thus be considered a “backstop” scenario — and a call to action — to accelerate current efforts to align with the Paris Agreement. An IPR trajectory is not being actively considered by most corporations and investors, hence the PRI’s support for assessing its effects and the preparatory actions that are needed. There are many permutations for an IPR in terms of when and what will occur. This outline contains assumptions about an announcement in 2025 for a 2030 implementation to address the overshoot, and specific policies that could be considered. The PRI has prepared papers to assist investors concerned with this future market disruption, including a paper on projecting the timelines and severity of the inevitable policy response: At its simplest level, an IPR would precipitate (in aggregate) substantial shifts in capital from high- to low-carbon activities that require preparatory actions for investors to take today. The technical papers build a framework for exploring the policy and technology pathways that would deliver a rapid economic transition. They also consider the investment risk and return implications at the sector and asset level to integrate an IPR into strategic asset allocation (SAA) and portfolio construction frameworks. Finally, the papers consider the actions that investors would need to take both prior to, during and in the aftermath of an IPR, in terms of reviewing governance arrangements, risk management processes and engagement activities, including the management of stranded assets. … It is evident that the longer the delay in reducing emissions, the higher will be the need for rapid transition and forceful policy action. … We believe this work bolsters the rationale for an escalation in actions now to refine and make decisions more efficiently, and to ultimately improve the resilience of investment portfolios and decision-making processes to what could soon be a more volatile environment.”

26 SEI Metrics Project, https://2degrees-investing.org/sei-metrics/. In 2017, the model was expanded to corporate
The Science Based Targets initiative (SBTi) is creating methods and implementation guidance to support financial institutions in setting targets for their investing and lending activities. This carbon reduction initiative mobilizes companies to set science-based targets and boost their competitive advantage in the transition to the low-carbon economy. The initiative defines and promotes best practices in setting targets, offers resources and guidance to reduce barriers to adoption, and independently assesses and approves companies’ targets. Science-based targets provide companies with a clearly defined pathway to future-proof growth by specifying how much and how quickly they need to reduce their GHG emissions. Targets adopted by companies to reduce GHG emissions are considered “science-based” if they are in line with the level of decarbonization required to keep global temperature increase below 2°C compared to pre-industrial temperatures, as described in the Fifth Assessment Report of the Intergovernmental Panel on Climate Change (IPCC AR5).

International Standards Organization in 2019 is developing a climate finance standard: ISO 14097, which will track the impact of investment decisions on GHG emissions; measure the alignment of investment and financing decisions with low-carbon transition pathways and the Paris Agreement; and identify the risk from international climate targets or national climate policies to financial value for asset owners. The standard will help define benchmarks for decarbonization pathways and goals, and track progress of investment portfolios and financing activities against those benchmarks; identify methodologies for the definition of science-based targets for investment portfolios; and develop metrics for tracking progress.

In light of all of these initiatives, and especially the focus among institutional investors regarding the largest GHG emitters such as ExxonMobil, the Proposal does not represent a context in which shareholders, board or management would lack sufficient understanding regarding how to interpret or implement the Proposal. In context the Proposal’s thrust is clear: encouraging the Company to track its GHG emissions across operations and products, scale up its ambition for reduction of those GHG emissions, and seek to align its efforts with global temperature goals.

The Company’s objections are, under the Staff Legal Bulletin 14B, the types of objections that the Staff stated are “appropriate under rule 14a-8 for companies to address these objections in their statements of opposition …” namely “factual assertions that, while not materially false or misleading, may be disputed or countered; factual assertions … [that ]may be interpreted by shareholders in a manner that is unfavorable to the company, its directors, or its officers; and/or statements [that] represent the opinion of the shareholder proponent or a referenced source.”

Accordingly, the Proposal is not excludable pursuant to Rule 14a-8(i)(3).

---

27 https://sciencebasedtargets.org/
II. Rule 14a-8(i)(7)

- The Proposal relates to a policy issue of great significance to Exxon Mobil - climate change.
- The Proposal contains reasonable details and methods.
- Therefore, the Proposal does not micromanage.

Overview of micromanagement issue

The Company Letter asserts that the Company may omit the Proposal pursuant to Rule 14a-8(i)(7), because it impermissibly seeks to micromanage the Company. The Company Letter summarizes this argument on page 7:

To achieve the Proposal’s objectives, management would be required to subject its day-to-day considerations to shareholder oversight. This is impractical because as described above in this letter resource deployment and management of the Company’s highly complex global operations are inherently fact-specific and require expert oversight on a daily basis. These types of decisions are not well suited to shareholder supervision.

Contrary to the Company’s assertions, the language of the Proposal is not directed toward day-to-day shareholder oversight. Instead, it is an effort of shareholders to advise the Company to redirect the company’s policies in alignment with the existential challenge posed to the Company and its investors by climate change.

The Proposal’s language, requesting that the Company disclose short-, medium-, and long-term GHG emissions targets in alignment with global temperature containment goals is not prescriptive, and does not dictate the minutiae of the company. However, it may well require a change in direction by the Company. The board and management’s articulated strategy in the Energy and Carbon Summary appears to be a focus on continuing to meet consumer demand for oil and gas. At a time when climate science demonstrates global leaders a need to slow consumption of fossil fuels, the Company is stepping up its development of new fossil fuel reserves and infrastructure.

By asserting that the Proposal delves too deeply into company decision-making, the Company is essentially preventing an accurate assessment of investor interest in redirecting the Company’s trajectory. The Company Letter implies that even if the Company is out of synch with global climate expectations, this is a decision reserved to the board and management. In other words, shareholders are not entitled to offer an advisory proposal that urges the board and management to realign its business plan with the changing circumstances of climate change.

Notably, the Company does not assert that its existing efforts are in alignment with the Paris Agreement. The Proposal is flexible and indeed, neutral, as to the exact strategy for the Company to come into alignment with the goals. Developing a Company strategy of consistency would
begin with calculating and disclosing the GHGs associated with its operations and products and then, as shown by other sector peers, could involve a mix of various options at the discretion of the board and management. For example, the Company could:

- invest in renewable energy or other low carbon energy generation strategies;
- escalate its efforts at carbon capture and sequestration to offset existing GHG emissions;
- time its efforts on transitional strategies like natural gas development as part of its targets;
- deploy fossil fuels for non-burning end uses such as chemical and plastics feedstocks;
- retire assets and instead return capital to investors; or
- continue to develop solutions that reduce consumer energy consumption and GHG emissions.

Any and all of these strategies might combine into a strategy consistent with GHG emissions targets in alignment with the temperature goals. The Proposal does not presuppose the pathway forward for the Company, but only encourages the Company to develop a strategy that is in alignment with those goals, in contrast to the current strategy which is clearly out of alignment with those goals.

**The Proposal is exclusively focused on a significant policy issue: climate change.**

The Proposal is not excludable under Rule 14a-8(i)(7) because it directly and solely focuses on a significant policy issue facing the Company and its shareholders: climate change.

It is well settled in Staff determinations that climate change is a significant policy issue that transcends ordinary business. Numerous prior Staff decisions at energy companies have made it clear that the kind of analysis sought in the Proposal is appropriate and not excludable based on the doctrine of micromanagement. This includes a predecessor of the current Proposal at the Company: *Exxon Mobil Corp.* (March 23, 2007) (proposal found not excludable under Rule 14a-8(i)(7), despite Company claim of micromanagement, asking board to “adopt quantitative goals, based on current technologies, for reducing total GHG emissions from the Company’s products and operations; and that the Company report to shareholders by September 30, 2007, on its plans to achieve these goals.”).

Numerous other Staff decisions have similarly found that proposals asking energy companies to set targets and goals for reducing GHG emissions were not excludable as under Rule 14a-8(i)(7). For instance, in *ONEOK, Inc.* (February 25, 2008) the proposal requested that the board of that oil and gas company prepare a report concerning the feasibility of adopting quantitative goals, based on current and emerging technologies, for reducing total GHG emissions from the company’s operations, the Staff rejected the Rule 14a-8(i)(7) argument. The same result occurred at other companies, including some in other sectors. In *Great Plains Energy Incorporated* (February 5, 2015) the proposal requested that the electric utility adopt quantitative, time bound, carbon dioxide reduction goals to reduce corporate carbon emissions, and issue a report to shareholders on its plans to achieve the carbon reduction goals it sets. As with *ONEOK, Great Plains* asserted that the proposal was micromanaging by potentially affecting the company’s mix of energy
sources. Dozens of proposals requesting greenhouse gas targets have been filed at companies as a result of these favorable rulings.

Similarly, numerous other proposals related to establishing a climate-responsive strategy were also determined by Staff to not be considered micromanagement. In *Chevron Corporation* (March 28, 2018) the Staff did not allow the company to exclude a proposal that requested a report describing how the company could adapt its business model to align with a decarbonizing economy by altering its energy mix to substantially reduce dependence on fossil fuels, including options such as buying, or merging with, companies with assets or technologies in renewable energy, and/or internally expanding its own renewable energy portfolio, as a means to reduce societal GHG emissions and protect shareholder value. In *Entergy Corporation* (March 14, 2018) the proposal asked the company to prepare a report describing how the company could adapt its enterprise-wide business model to significantly increase deployment of distributed-scale, non-carbon-emitting electricity resources as a means of reducing GHG emissions consistent with limiting global warming to no more than 2 degrees Celsius over pre-industrial levels. At *Hess Corporation* (February 29, 2016) the proposal requested that the company prepare and publish a report disclosing the financial risks to the company of stranded assets related to climate change and associated demand reductions. At *Spectra Energy Corp.* (February 21, 2013) the proposal requested that the board publish a report on how the company is measuring mitigating and disclosing methane emissions.

These follow a wide array of other climate-related decisions by the Staff, denying Rule 14a-8(i)(7) exclusions on climate proposals. See, e.g., *DTE Energy Company* (January 26, 2015), *J.B. Hunt Transport Services, Inc.* (January 12, 2015), *FirstEnergy Corp.* (March 4, 2015) (proposals not excludable as ordinary business because they focused on reducing GHG, and did not seek to micromanage the company); *Dominion Resources* (February 27, 2014), *Devon Energy Corp.* (March 19, 2014), *PNC Financial Services Group, Inc.* (February 13, 2013), *Goldman Sachs Group, Inc.* (February 7, 2011) (proposals not excludable as ordinary business because they focused on significant policy issue of climate change); *NRG Inc.* (March 12, 2009) (proposal seeking carbon principles report not excludable as ordinary business); *General Electric Co.* (January 31, 2007) (proposal asking board to prepare a global warming report not excludable as ordinary business).

The conclusion that climate change is a significant policy issue, and that it has a nexus to the Company — the largest U.S. fossil fuel company — seems to be without question, and these issues are not challenged in the Company Letter. Instead, the Company Letter asserts that the Proposal *micromanages*. As noted above, numerous prior Staff decisions have concluded that proposals like the present one do not micromanage.

However, because the staff has recently deviated from this approach, it is necessary for us to consider the meaning of micromanagement under the Commission’s guidance.

**Articulating and applying the micromanagement standard**

In Staff Legal Bulletin 14J, Staff attempted to consolidate its explanation of micromanagement:\(^{28}\)

\(^{28}\)https://www.sec.gov/corpfin/staff-legal-bulletin-14j-shareholder-proposals
“As the Commission explained, a proposal may probe too deeply into matters of a complex nature if it “involves intricate detail, or seeks to impose specific time-frames or methods for implementing complex policies. The Division applies this framework when evaluating whether a proposal micromanages a company and is therefore excludable. For example, the Division agreed that a proposal to generate a plan to reach net-zero greenhouse gas emissions by the year 2030, which sought to impose specific timeframes or methods for implementing complex policies, was excludable on the basis of micromanagement [Citing Apple Inc. (Dec. 5, 2016)].

This framework also applies to proposals that call for a study or report. For example, a proposal that seeks an intricately detailed study or report may be excluded on micromanagement grounds. [Citing Ford Motor Company (Mar. 2, 2004)]. In addition, the Staff would, consistent with Commission guidance, consider the underlying substance of the matters addressed by the study or report. Thus, for example, a proposal calling for a report may be excludable if the substance of the report relates to the imposition or assumption of specific timeframes or methods for implementing complex policies.”

However, the Bulletin also noted that it was the Staff’s intention to implement this new framework “consistent with the Commission’s guidance:”

“We believe that the above framework is consistent with the Commission’s guidance in this area…”

In this instance, turning to the Commission’s guidance is particularly helpful, because the Commission has made it abundantly clear that it has not endorsed or proposed a prohibition against requests for timelines or specific methods. Quite to the contrary, the Commission in the 1998 Release, the most recent and authoritative Commission-level statement regarding the application of micromanagement — made clear that requests regarding methods and timelines are not prohibited:

“. . . in the Proposing Release we explained that one of the considerations in making the ordinary business determination was the degree to which the proposal seeks to micromanage the company. We cited examples such as where the proposal seeks intricate detail, or seeks to impose specific timeframes or to impose specific methods for implementing complex policies. Some commenters thought that the examples cited seemed to imply that all proposals seeking detail, or seeking to promote timeframes or methods, necessarily amount to ordinary...”

---

business. . . We did not intend such an implication. Timing questions, for instance, could involve significant policy where large differences are at stake, and proposals may seek a reasonable level of detail without running afoul of these considerations.” (Emphasis added.)

Thus, the Commission has articulated the key criteria for determining whether a proposal micromanages. The question is not, “does the proposal suggest timelines or make specific recommendations,” but rather:

• Are there large differences at stake?
• Does the proposal include reasonable details and methods?

If a proposal is addressed to a significant policy issue, and the framework of the proposal complies with those two requirements, the proposal does not micromanage.

Defining “Large Differences”

Inherent in the shareholder proposal process is the right of shareholders of all sizes to pose questions regarding a Company’s societal impact. The right of shareholders to focus proposals on societal impacts by a company is in accord with positions set forth by the Commission and the courts. The Commission has made clear since 1976 that proposals addressing business choices with major implications for society transcend ordinary business:

“[A] proposal that a utility company not construct a proposed nuclear power plant has in the past been considered excludable … In retrospect, however, it seems apparent that the economic and safety considerations attendant to nuclear power plants are of such magnitude that a determination whether to construct one is not an “ordinary” business matter. Accordingly, proposals of that nature, as well as others that have major implications, will in the future be considered beyond the realm of an issuer’s ordinary business operations, and future interpretative letters of the Commission’s staff will reflect that view.” Exchange Act Release 3412999 (Nov. 22, 1976).

The Staff decisions in the decades subsequent to 1976 identified various significant policy issues that transcend ordinary business where the proposal asked the company to reduce its impacts on society in various arenas, some of which include: pollution, human rights violations, climate change, discrimination, slavery, and doing business with governments and companies implicated in genocide.

The shareholder right to weigh in on a company’s impacts on society was judicially clarified in Medical Committee for Human Rights v. SEC, 432 F.2d 659 (D.C. Cir. 1985) in which the D.C. Circuit Court of Appeals found that shareholder proposals are proper (not ordinary business) when they raise issues of corporate social responsibility or question the “political and moral predilections” of board or management. The takeaway from this decision is that the board and
management have no monopoly on expertise when it comes to guiding company strategy on issues with broad and significant social consequence. Investors are entitled to weigh in through the shareholder proposal process.

*Medical Committee* involved a proposal at Dow Chemical seeking an end to the production and sale of napalm during the Vietnam War. The proposal requested the Board of Directors adopt a resolution setting forth an amendment to the Composite Certificate of Incorporation of the Dow Chemical Company that napalm shall not be sold to any buyer unless that buyer gives reasonable assurance that the substance will not be used on or against human beings. The SEC initially found the proposal was excludable. The appellate court in *Medical Committee* remanded the no-action decision to the SEC for further deliberation by the SEC consistent with the court’s conclusion that the SEC should defend the rights of shareholders to file proposals directed toward significant social issues facing a company.

In deciding *Medical Committee*, the court noted that it would be appropriate for shareholders to use the mechanism of shareholder democracy to pose “to their co-owners, in accord with applicable state law, the question of whether they wish to have their assets used in a manner which they believe to be more socially responsible.” The court further noted such a choice was not appropriately reserved to the board or management. The same logic applies here — directing the business away from harmful and financially risky activities associated with carbon emissions is not a choice reserved exclusively to management or boards.

As stated in *Medical Committee*:

> [T]he clear import of the language, legislative history, and record of administration of section 14(a) is that its overriding purpose is to assure to corporate shareholders the ability to exercise their right — some would say their duty — to control the important decisions which affect them in their capacity as stockholders and owners of the corporation. (*SEC v. Transamerica Corp.*, 163 F.2d 511, 517 (3d Cir. 1947), cert. denied, 332 U.S. 847, 68 S. Ct. 351, 92 L. Ed. 418 (1948)).

* * *

What is of immediate concern…is the question of whether the corporate proxy rules can be employed as a shield to isolate such managerial decisions from shareholder control. After all, it must be remembered that “[t]he control of great corporations by a very few persons was the abuse at which Congress struck in enacting Section 14(a).” *SEC v. Transamerica Corp.*, supra, 163 F.2d at 518. We think that there is a clear and compelling distinction between management’s legitimate need for freedom to apply its expertise in matters of day-to-day business judgment, and management’s patently illegitimate claim of power to treat modern corporations with their vast resources as personal satrapies implementing personal political or moral predilections. It could scarcely be argued that management is more qualified or more entitled to make
these kinds of decisions than the shareholders who are the true beneficial owners of the corporation; and it seems equally implausible that an application of the proxy rules which permitted such a result could be harmonized with the philosophy of corporate democracy which Congress embodied in section 14(a) of the Securities Exchange Act of 1934.

In the decades that followed, numerous proposals on diverse subject matters have appropriately asked companies to change their business model in some way that reduced impact, and were not excluded. The strategic choices regarding reducing large impacts of the company on society have long been established as appropriate within shareholder proposals.

**Contrasting Small Differences**

What is a “small” difference that is excludable? An often-cited example of a “small” difference between a proposal’s request and company actions was highlighted by a proposal filed with DuPont over the timing of the phase-out of ozone-depleting CFCs. Where the company had effectively come into line with the proponent’s original requested phase-out date for CFCs, the court held that the negligible difference from the proponent’s requested date and the company’s planned phase-out date no longer amounted to a significant policy issue and could be considered a matter of ordinary business. *Roosevelt v. E.I. Du Pont De Nemours & Company*, 958 F.2d 416 (1992) (“*Dupont*”).

It is clear that under the Commission guidance and the *DuPont* precedent, that a request that a company set goals, even with regard to a specific year, can be a large difference that is not considered micromanagement.

**Defining “Reasonable Details and Methods”**

A long line of Staff decisions have held that Proposals are excludable on the basis of micromanagement where they seek prescriptive actions on day-to-day levels of minutiae. For instance, in *Marriott International Inc.* (March 17, 2010) the proposal addressed minutiae of operations — prescribing the flow limits on showerheads. In *Duke Energy Corporation* (February 16, 2001) the proposal attempted to set what were essentially regulatory limits on the company — an 80% reduction in nitrogen oxide emissions from the company’s coal-fired plant and a limit of 0.15 lbs of nitrogen oxide per million British Thermal Units of heat input for each boiler. This proposal was found excludable despite its objective of addressing significant environmental policy issues. Similarly, a highly detailed study was sought on global warming or cooling in *Ford Motor Company*, (March 2, 2004). These are important examples of proposals that sought “excess” detail, and stand in contrast to the current Proposal.

The *method* of seeking targets has long been an acceptable and appropriate request in Staff decisions. This includes a predecessor of the current Proposal at the Company: *Exxon Mobil Corp.* (March 23, 2007) (proposal found not excludable under Rule 14a-8(i)(7), despite Company claim of micromanagement, asking board to “adopt quantitative goals, based on current technologies,
Numerous other Staff decisions have similarly found that proposals asking energy companies to set targets and goals for reducing GHG emissions were not excludable as micromanagement. For instance, in ONEOK, Inc. (February 25, 2008) the proposal requested that the board of that oil and gas company prepare a report concerning the feasibility of adopting quantitative goals, based on current and emerging technologies, for reducing total GHG emissions from the company’s operations. The company argued the proposal related to its ordinary business operations, adding that ordinary business problems should be confined to management and the board of directors, “since it is impracticable for shareholders to decide how to solve such problems at an annual shareholder meeting.” The company’s no-action request noted that its GHG emissions are related to control of “line loss” of natural gas in its pipelines, which is a complex policy issue managed on a day-to-day basis and directly related to its profitability and therefore ordinary business and micromanagement. The proponent argued in response:

…the mere fact that the subject matter of the Proposal is “complex” is not dispositive. In fact, the Staff repeatedly has rejected arguments that the alleged complexity of a proposal’s subject matter renders it an attempt to micromanage… As the Proposal does not seek shareholder input on the analysis or resolution of complex issues — but, rather, asks nothing more than that the Board determine what is possible — the alleged complexity of its subject matter is beside the point.

Finally, that the Company evaluates pipeline integrity and formulates policies relating to GHG emissions in the ordinary course of its business is of no moment. Again, the Proposal does not purport to tell the Company how to perform these — or any other — functions. It merely asks for an assessment of whether a given course of action (i.e., the adoption of quantitative goals for the reduction of GHG emissions) is possible.

The Staff ultimately rejected the company’s micromanagement argument and did not allow the company to omit the proposal.

The same result occurred at other companies, including some in other sectors. In Great Plains Energy Incorporated (February 5, 2015) the proposal requested that the electric utility adopt quantitative, time bound, carbon dioxide reduction goals to reduce corporate carbon emissions, and issue a report to shareholders on its plans to achieve the carbon reduction goals it sets. As
with ONEOK, Great Plains asserted that the proposal was micromanaging by potentially affecting the company’s mix of energy sources.

Similarly, many other proposals found not excludable on the basis of micromanagement have requested company goals or targets and periodic reporting to implement those goals. To cite one example, in Tyson Foods (reconsideration granted Dec. 15, 2009) the proposal was found not to interfere with ordinary business or micromanage in requesting that the board adopt a policy and practices for both Tyson's own hog production and (except when precluded by existing contracts) its contract suppliers of hogs:

(1) phase out routine use of animal feeds containing antibiotics that belong to the same classes of drugs administered to humans, except for cases where a treatable bacterial illness has been identified in a herd or group of animals; and

(2) implement animal raising practices that do not require routine administration of antibiotics to prevent and control disease, and where this is not feasible, use only antibiotics unrelated to those used in human medicine; and

that the Board report to shareowners, at reasonable cost and omitting proprietary information, on the timetable and measures for implementing this policy and annually publish data on types and quantities of antibiotics in the feed given to livestock owned by or purchased by Tyson. (emphasis added)

This was a reasonable method for addressing the subject matter in Tyson Foods, just as the current proposal addresses a reasonable method for the Company to align its operations and products with global temperature containment needs.

The Company Letter cites the prior decisions excluding proposals seeking net zero GHG at Apple, Deere & Company and elsewhere. Many of these proposals excluded by the Staff as micromanaging were similarly detailed and prescriptive, and therefore were excludable consistent with the Commission’s 1998 Release.\(^{30}\)

\(^{30}\) For instance, the proposal at Apple (Dec. 5, 2016) stated: Shareholders request that the Board of Directors generate a feasible plan for the Company to reach a net-zero GHG emission status by the year 2030 for all aspects of the business which are directly owned by the Company and major suppliers, including but not limited to manufacturing and distribution, research facilities, corporate offices, and employee travel, and to report the plan to shareholders at reasonable expense, excluding confidential information, by one year from the 2017 annual meeting. Supporting Statement: For the purposes of this proposal, the proponent suggests that “net-zero greenhouse gas emissions status” be defined as reduction of GHG emissions attributed to company facilities and major suppliers to a target annual level, and offsetting the remaining GHG emissions by negative emissions strategies which result in a documented reduction equal to or greater than the company and supplier GHG emissions during the same year. As explained by the IPCC, “negative emissions solutions” can range from tree-planting to technological solutions that draw carbon from the air.

We recommend consistency of negative emissions strategies with Apple’s renewable energy sourcing principles:
- Displacement - displace polluting forms of energy;
- Additionality - select projects that wouldn’t be built without Apple’s involvement;
- Accountability - rigor in measuring and tracking.

For purposes of this proposal “company facilities” include company owned or operated manufacturing, distribution, research, design or support facilities, corporate offices, and also including GHG’s from employee travel. “Major suppliers” include operations contracted to produce and/or ship microchips, circuit boards, storage, screens,
The form of the proposal, rather than the subject matter, is determinative of micromanagement.

The Staff recognized in Staff Legal Bulletin 14J that it is the form of a proposal, rather than the subject matter, that makes it proper or improper for shareholder consideration:

“It is important to note, however, that the staff’s concurrence with a company’s micromanagement argument does not necessarily mean that the subject matter raised by the proposal is improper for shareholder consideration. Rather, in that case, it is the manner in which a proposal seeks to address an issue that results in exclusion on micromanagement grounds.”

Further, Staff Legal Bulletin 14H has made it clear that if a proposal addresses in its entirety a significant policy issue like climate change, it can certainly request information about “nitty-gritty” business matters that are directly related, such as strategic financial and investment decisions, etc. Indeed, any proposal addressing a complex policy issue like climate change necessarily must delve into such issues if it is to be meaningful to the company and its investors.

Finally, it is worth recognizing that Staff precedents are not necessarily determinative of the outcome on an individual proposal, because, as stated under the 1998 Release determinations as to whether a proposal may be excluded “will be made on a case-by-case basis, taking into account factors such as the nature of the proposal and the circumstances of the company to which it is directed.”

Examining the framing of the current Proposal against the Commission’s guidance

• The Proposal addresses large differences.

• The Proposal includes reasonable details and methods.

• Therefore, the Proposal does not micromanage.

The Proposal Is Directed Toward a Large Difference

The Proposal here addresses the significant policy issue of climate change and asks the company to set short-, medium- and long-term targets for reducing GHG emissions. Since the company has no such disclosures in place for the totality of its business, large differences — consistent with the Commission’s 1998 Release — exist between current Company action and the Proposal’s request.

The Proposal is intended to address the significant difference between the Company’s current climate-related practices (not tracking its GHG emissions, nor assessing its GHG emissions

 cameras, power supplies, or finished consumer electronics products on behalf of the company. In calculating net zero, the GHG impacts of emissions and activities can be considered using GHG equivalencies.

http://www.epa.gov/cleanenergy/energy-resources/calculator.html.

against global temperature increase goals) and the Proposal’s aim to address those issues with a set of short-, medium- and long-term goals and a plan for implementation. The difference between actions currently adopted by the Company and what shareholders expect is quite large.

The Proposal, therefore, recommends action that would constitute a large difference from existing Company policy, in response to the significant policy issue of climate change.

Notably, the items described in the Company’s current climate policies and reporting stop short of any targets that even purport to be in alignment with the global 1.5° and 2° goals. Instead, the Company’s plan is built on an assumption that the world is not on a trajectory to limit GHGs to contain temperature increase to 2º C. The Company makes it clear, in its final statement of both the 2018 and 2019 Energy and Carbon Summary Reports, that it believes the world will fail to meet the Paris Agreement’s global temperature goals. Thus ExxonMobil will be unconstrained in its business of extracting, producing, and marketing fossil fuels. The conclusion of the 2019 Energy and Carbon Summary states:

Existing policy frameworks (including the Paris NDCs), financial flows, and the availability of cost-effective technologies indicate that society is not currently on a 2°C pathway. Should society choose to more aggressively pursue a 2°C pathway, we will be positioned to contribute through our engagement on policy, development of needed technologies, improved operations, and customer solutions.  

At best, the Company’s plans are framed by Company documents reflecting a 2.4º global temperature increase. However, external analyses indicate that the Company’s activities are more aligned with a 2.7ºC to 4ºC temperature increase path:

“By its own projections [in their 2017 Energy and Carbon Summary] this will lead to continued high carbon emissions, driving increases in global average temperatures on a trajectory to increase 3-4 degrees Celsius this century, posing major risks of catastrophic climate change.”

This underlying assumption illustrates the wide chasm between the Company’s current practices and the thrust of the Proposal — the necessary “delta” or change to exhibit a “large difference”.

---

33 From the Exxon Mobil 2018 Energy and Carbon Summary: Although our Outlook does not extend to 2100 and we do not estimate global temperatures under our Outlook process, the IPCC projects its intermediate RCP 4.5 emissions profile would result in an average global temperature increase of approximately 2.4ºC by 2100 from the pre-industrial age. 2018 Energy and Carbon Summary, page 7.
The Proposal contains only reasonable details and methods

The Company Letter references the Apple decision as demonstrating that the current Proposal is too detailed, but as documented above, the Apple proposal contained extensive prescriptive details, while the current Proposal contains only a reasonable level of detail necessary for conveying the concept of strategic redirection in alignment with global temperature goals. Unlike in Apple and other of the “net zero GHG” proposals, in this instance the Proposal contains only “reasonable details” necessary for articulating advice from shareholders to the Company through the shareholder proposal process regarding the need for the Company to redirect its policies to align with global climate goals. Contrary to the Company’s claims, the Proposal strikes an appropriate balance of respecting board and management discretion while providing direction from shareholders that the Company should consider aligning its carbon footprint with global climate policy and needs.

Complexity of the Company’s operations does not preclude this Proposal

The implicit and explicit claims in the Company Letter that exclusion is appropriate because existing processes are complex, decisions and strategies are well-considered, and Company priorities have been set amounts to an assertion that the performance and goals that the Company has adopted are not subject to advice and critique through a shareholder proposal. If this were the case, it would eliminate the vast majority of shareholder proposals directed toward improving performance or reducing negative impact of companies.

Staff’s prior decisions do not support such a broad reading of micromanagement. Rather, Staff has consistently allowed proposals addressing a significant policy issue to go forward, even where those proposals might redirect company policy such as changing capital spending, or investment decisions made by the companies.

Reading the Company’s detailed narrative regarding the complexities of considering GHG emissions reduction, we believe their essential argument is not so much that the language of the Proposal prescribes numerous detailed elements of GHG emissions management, but rather that being asked to undertake the task of addressing long-term GHG emissions management strategy would necessitate the mobilization of many parts of the company, and could even require rethinking some policies and ways of doing business.

As demonstrated in the legal discussion above, the fact that a proposal asks a company to assess and mitigate a significant impact the company has on society does not constitute micromanagement. As long as the proposal addresses a large issue and has only reasonable details and methods, it does not micromanage, as any proposal addressing a complex policy issue like climate change necessarily must delve into nitty-gritty issues. Indeed, there must be sufficient detail in a proposal to allow shareholders and management to understand what is being requested, and how it differs from the company’s current policies. Every proposal must strike the

---

36 For instance, a proposal that merely asked the company to “step up the scale and pace of its responses to climate change” would be subject to challenge as vague or substantially implemented.
correct balance between specificity and flexibility.\textsuperscript{37}

The implied assertion that these issues are too complicated for shareholders’ comprehension and participation ignores the reality of the investment marketplace and the strategic focus of the Proposal. It also overrides the reality that most of the investing marketplace seeks the guidance of highly educated, experienced investment managers who evaluate and incorporate material risks into the stock selection and portfolio construction on a wide range of complex but fundamental financial, statistical, scientific, behavioral, economic, and technical factors in addition to the environmental factors, under consideration in the current Proposal.

As with other material factors, systematic and consistent factors are often sourced from third-party providers using standardized metrics for evaluating industry- and company-specific environmental risk. These environmental factors are neither more complex, different, or inappropriate for shareholder consideration as compared with many other material factors employed by investors in decision-making. Moreover, many investor strategies today rely explicitly on the type of ESG understanding sought by the Proposal.

**The Proposal does not impose specific timelines.**

Toward its assertion of micromanagement, the Company Letter recasts the Proposal in a micromanaging form by making the claim that setting medium- and long-term targets is the equivalent of specifying a timeframe. In striking contrast, the Company Letter cites prior precedents where the Staff found that proposals did not micromanage at the Company, but where the proposal was far more prescriptive in its request than the current one. For example, Exxon Mobil (March 12, 2007) the proposal recommended a goal in the range of 15 to 25\% of all energy sourcing, and staff declined to concur in exclusion.\textsuperscript{38}

Contrary to assertions of the Company Letter page 7, the proposal does not impose specific deadlines in seeking “short-, medium- and long-term” targets. These are flexible benchmarks, and are intentionally framed to allow discretion of the board and management in determining appropriate time frames.\textsuperscript{39}

We urge the Staff to consider the current Proposal first and foremost in consistency with the 1998 Release. The current Proposal is a strategic, big-picture request that is framed with the minimal

\begin{itemize}
  \item \textsuperscript{37} If a proposal is too vague in defining what is requested, the Staff will exclude it under Rule 14a-8(i)(3). Further, a vague proposal that fails to ask for action scaled and paced to global needs - merely asking for a climate strategy - may also be subject to challenge by even the most poorly performing companies under Rule 14a-8(i)(10).
  \item \textsuperscript{38} The Company Letter attempts to distinguish this prior Staff precedent by noting that this was a request for a “policy” rather than a “plan” as requested by the current proposal. In the context of the proposals, this is a distinction without a difference.
  \item \textsuperscript{39} The TCFD has stated that its use of short-, medium- and long-term time frames for financial reporting does not imply a specific timeframe. “The Task Force is not specifying time frames for short, medium, and long term given that the timing of climate-related impacts on businesses will vary. Instead, the Task Force recommends preparers define time frames according to the life of their assets, the profile of the climate-related risks they face, and the sectors and geographies in which they operate.” TCFD, Implementing the Recommendations of the Task Force on Climate Related Financial Disclosures, https://www.fsb-tcfd.org/wp-content/uploads/2017/06/FINAL-TCFD-Annex-062817.pdf, page 4.
\end{itemize}
details and methods needed to ask the Company to explain how it is aligning its long-term business strategy with the projected long-term constraints posed by climate change. The Proposal’s request to describe short-, medium- and long-term goals for GHG reduction is the leading strategy for allowing investors to assess whether a firm’s scale and pace of activity in response to climate change is in alignment with global climate goals and public expectations. The Proposal treads lightly on additional specifics.

In addition, in the context of a discussion of micromanagement, it also must be recognized that the Proposal is an advisory proposal. It does not control the day-to-day actions of the company, but only represents recommendations of the Company’s investors for the board and management to take under advisement.

Thus, the Proposal, presenting flexibility on timelines and goals, represents the Proponent’s best effort to work within the framework of the 1998 Release while remaining true to the needs for shareholders to ask the company to develop clarity about the scale and pace of its response to climate change.

Moreover, this Proposal is well within the grasp of investors. The relevance and importance for investing strategies of permitting a vote on the current Proposal is reflected in the groundswell of market activity seeking similar objectives in various segments of investor engagement and strategy.

The Proponent and many other investors believe that readiness for climate disruption requires a strategic appraisal and well-considered realignment, taking account of the carbon footprint of financing activities, and follows the directive of the Paris Agreement to redirect finance flows. This includes portfolio-wide engagement with companies to map GHG emissions and targets. These investment strategies are already resulting in demands from investors to require investee measurement and planning to anticipate the inevitable direction of increasing carbon stringency that global policy will require as the world reckons with the current climate change emergency. As such, the framing of the Proposal is not only practical for investor consideration — it is necessary.

Finally, the Proponent asserts that given the Commission’s statement that determinations pursuant to Rule 14a-8(i)(7) will be “on a case-by-case basis, taking into account factors such as the nature of the proposal and the circumstances of the company to which it is directed,” the circumstances of ExxonMobil as one of the single largest sources of GHG emissions, and the high level of demand among investors for the Company to set targets for reducing GHG emissions related to its operations and products merit a decision against exclusion under Rule 14a-8(i)(7).

In conclusion, the Proposal is not excludable under Rule 14a-8(i)(7).

40 Along the same vein, the economy-wide impacts posed by climate disruption, and responses of systemically important institutions is also reflected in reports like the Brookings Institution’s report: Climate change and monetary policy: Dealing with disruption. Warwick J. McKibbin, Adele Morris, Peter J. Wilcoxen, and Augustus J. Panton, Friday, December 1, 2017. https://www.brookings.edu/research/climate-change-and-monetary-policy-dealing-with-disruption/
III. Rule 14a-8(i)(10)

- The Company has not disclosed medium- and long-term GHG targets.

- The Company has not estimated or set targets for reducing GHG emissions attributable to its products.

- The Company has not calculated or set targets aligned with limiting global temperature increase to 2°C and pursuing 1.5°C of warming.

- Therefore, the activities of the Company do not substantially implement the request of the Proposal

The Company Letter asserts that the Proposal is excludable under Rule 14a-8(i)(10) as having been “substantially implemented” by the Company. The Staff has noted that a determination that a company has substantially implemented a proposal depends upon whether a company’s particular policies, practices, and procedures compare favorably with the guidelines of the proposal. Texaco, Inc. (Mar. 28, 1991). Substantial implementation under Rule 14a-8(i)(10) requires a company’s actions to have satisfactorily addressed both the proposal’s guidelines and its essential objective. See, e.g., Exelon Corp. (Feb. 26, 2010). Thus, when a company can demonstrate that it has already taken actions that meet most of the guidelines of a proposal and meet the proposal’s essential purpose, the Staff has concurred that the proposal has been “substantially implemented.” As demonstrated above, the Company’s described actions meet neither the Proposal’s essential purpose nor its guidelines, and so cannot be excluded on the basis of Rule 14a-8(i)(10).

The essential purpose of the Proposal is for the Company to proactively support and keep apace with the Paris Agreement’s goals by creating short-, medium and long-term targets for reducing the GHG emissions attributable to the Company’s operations and products consistent with global temperature goals. In context, this means that the Company would have to calculate the GHG footprint of its operations and products, and then set targets for reducing the GHG outcomes consistent with the global temperature increase goals.

The Company Letter page 2 describes its responses to climate change as involving:

“…four key areas of focus: developing scalable technology solutions; engaging on climate change policy; providing products to help customers reduce their own emissions; and mitigating emissions in the Company’s operations.”

We have reviewed the information presented in the summary table on pages 9 and 10 of the Company Letter, which includes several news articles stating short-range goals, the Company’s assessment of future energy demand scenarios, and description of some of the Company’s own technological developments. For example, pages 18-19 of the ECS Report describe the
Company’s technological advances in Carbon Capture and Storage (CCS), and biofuel, and that these are methods of reducing GHG emissions; the Company “continues to progress research on advanced biofuels to produce fuels from algae and cellulosic biomass with the potential to reduce GHG emissions by 50 percent or more compared to today’s transportation fuels.”

However, the Company Letter does not describe Company efforts consistent with the guidelines or essential purpose of the Proposal. Instead, the Company Letter and related disclosures indicate how the Company is responding to external changes in demand, and undertaking certain initiatives. This does not address the objective of the Proposal, which is to disclose complete and comparable metrics on GHG reduction ambitions across its operations and products.

While the Company Letter and existing disclosures describe the Company as supporting the Paris Agreement, and describe its investment in the research and development of carbon-reducing technologies, GHG emissions reductions to date, investment in wind and solar energy ways, it is impossible to conclude that the Company’s activities are at a scale, pace and level of ambition that is aligned with 1.5º C - 2º C. In fact, the available evidence suggests that the total effect of Company activities is in alignment with a temperature increase of 2.4º C or more. Indeed, none of the Company’s communications identifies or discloses short-, medium- and long-term GHG emissions targets for the Company’s operations and products overall, even without alignment with the global goals.

No disclosure of estimates or targets for GHG’s attributable to Company products.

Scope 3 emissions, the carbon emissions associated with the use of the Company’s products, are likely to constitute more than 80% of the Company’s carbon footprint.

The Science-based Targets Initiative and other investor initiatives request that companies commit to track and reduce the GHG emissions, including those associated with “Scope 3” emissions, which include emissions associated with a company’s products. The Climate Action 100+

---

41 From the Exxon Mobil 2018 Energy and Carbon Summary: Although our Outlook does not extend to 2100 and we do not estimate global temperatures under our Outlook process, the IPCC projects its intermediate RCP 4.5 emissions profile would result in an average global temperature increase of approximately 2.4ºC by 2100 from the pre-industrial age. Exxon Mobil, Energy and Carbon Summary, 2018, page 7.

42 For instance, CDP reports that for the oil & gas sector around 90% of emissions sit in Scope 3 categories, emphasizing the importance for improved Scope 3 disclosure and calculation methodologies. Goldman Sachs has stated that Scope 3 emissions are 86% of total emissions. https://www.goldmansachs.com/insights/pages/reports/re-imagining-big-oils-frre-imagining-big-oils-report-pdf.pdf

43 The Science-based Targets initiative requires inclusion of Scope 3 emissions for a company where Scope 3 emissions exceed 40% of GHG emissions, which would be applicable to oil and gas companies. https://sciencebasedtargets.org/wp-content/uploads/2017/02/SBTi-criteria.pdf
initiative urges the top GHG emitting companies to take action to reduce GHGs emissions across the value chain.\textsuperscript{44}

In line with those initiatives reflecting trillions of dollars of investing assets under management, the Proposal requests that the Company disclose short-, medium- and long-term targets related to its “operations and \textbf{products}.” In order to calculate targets regarding its products, the Company would first need to calculate the current GHG footprint of its products and then establish targets for reduction. Exxon Mobil has not disclosed the GHG’s associated with its products, and has not established targets for reduction of those emissions.\textsuperscript{45}

Yet, Exxon has refused to calculate or disclose GHG emissions associated with the use of its products, calling the emissions the responsibility of others.

\textbf{No medium- and long-term GHG goals: existing disclosures are for short-range goals attributable to a portion of company emissions.}

As described in the Company Letter, the Company has disclosed short range emission reduction goals for a portion of its emissions. These are:

\begin{itemize}
  \item Reducing methane emissions from its operations 15\% by 2020,\textsuperscript{46} and reducing methane emissions from flaring by 25\% by 2020 compared with 2016.\textsuperscript{47}
  \item Reducing GHG intensity at its Imperial Oil Sands Play 10\% by 2023, compared with 2016 levels.\textsuperscript{48}
\end{itemize}

\textsuperscript{44} https://www.ceres.org/initiatives/climate-action-100
\textsuperscript{45} The GHG Protocol Corporate Standard classifies a company’s GHG emissions into three ‘scopes’. Scope 1 emissions are direct emissions from owned or controlled sources. Scope 2 emissions are indirect emissions from the generation of purchased energy. Scope 3 emissions are all indirect emissions (not included in scope 2) that occur in the value chain of the reporting company, including both upstream and downstream emissions. https://ghgprotocol.org/sites/default/files/standards_supporting/FAQ.pdf
\textsuperscript{48} “The application of next-generation oil recovery technology at Imperial’s Cold Lake in-situ operations, improvements in reliability at its Kearl mining facility and continuous improvements in energy efficiency are expected to be key drivers behind the reductions, which are anticipated to result in a 10 percent decrease in greenhouse gas emissions intensity by 2023, compared with 2016 levels.” “Imperial applying new technologies to reduce oil sand greenhouse gas emissions intensity,” \textit{Business Wire} (August 28, 2018). https://www.businesswire.com/news/home/20180828005607/en/Imperial-applying-new-technologies-reduce-oil-sands
These targets are **short-range only**, and are limited in scope against the array of Company activities. They do not purport to address the full scale of the Company’s operations impacts.

None of these public disclosures — neither the news articles nor the Company’s ECS Report — address medium- or long-term GHG emissions targets.

Such GHG reduction targets are an important indicator of the Company’s transition resilience and the quality of its climate risk management.

**The Company’s focus on fulfilling potential market demand is not aligned with the 1.5º-2º goals.**

The Company’s existing disclosures, including the publications cited and the 2018 ECS, describe the Company’s assessment of the evolution of global demand for its products in the context of regulation and technological developments, and provides shareholders with information about how the Company plans to manage climate change risks by describing potential responses to a variety of potential changes in the global energy market.

Significantly, the Company’s description of the reasoning behind and rationale for this approach demonstrates a fiction in the Company’s position: that when it comes to energy demand and regulatory development it is a mere passive participant in global markets and regulatory domains. As one of the largest energy companies in the world, Exxon plays a significant role in shaping the market and public policy, including through lobbying activity and active participation in the creation of local, national, and international regulations that affect its business and influence demand. Shareholders know this, Company peers know this, and the Company knows this as well. This is why the Proposal calls for the Company to engage in proactive planning and true leadership in the response to climate change.

**Reported activities of Company peers dramatizes lack of implementation of the Proposal by Exxon.**

Instead, the Company’s posture that current efforts are “substantial implementation” of the intent of the Proposal stands in contrast to some of Exxon’s global peers who have already committed to GHG emissions reduction targets. For example, BP announced support for a 2019 resolution requesting targets for reducing GHG emissions from its operations aligned with the Paris goals and disclosure of estimates for future reductions in the carbon intensity of its products.\(^{49}\) Shell has set an ambition to reduce its net carbon footprint, including product-related emissions, by 50 percent by 2050, with interim targets.\(^{50}\) In its 2018 Climate Disclosure Project Report, Shell explains:

“Shell announced its ambition in November 2017 to reduce the net carbon footprint (NCF) of its energy products in step with society’s progress to reduce GHG emissions. We aim to cut our and our customers’ GHG emissions from energy products that Shell sells — expressed in grams of CO2 equivalent per megajoule consumed — by around half by 2050. As an interim step by 2035, and predicated on societal progress, we aim for a reduction of around 20% compared with 2017 levels.

Our approach to reducing the NCF covers emissions directly from Shell operations (including from the extraction, transportation and processing of raw materials, and transportation of products), those generated by third parties who supply energy to us for production, and our customers’ emissions from their consumption of our energy products. Also included are emissions from elements of this life cycle not owned by Shell, such as oil and gas processed by Shell but not produced by Shell, or from oil products and electricity marketed by Shell that have not been processed or generated at a Shell facility. Excluded are our emissions or our customers’ emissions from our chemicals and lubricants products, which are not used to produce energy.

We have applied our own unique Net Carbon Footprint methodology, using our Sky scenario analysis and the IEA’s Energy Technology Perspectives 2017 as inputs. This has identified the reduction in the Net Carbon Footprint of the energy system needed to achieve a reasonable chance of limiting global warming to well below two degrees Celsius (2°C).” 2018 CDP, C4.1b.

Equinor, a major Norwegian energy company, has announced a goal to further reduce the carbon intensity of its upstream production to 8 kilograms of CO2 per barrel of oil equivalent by 2030, and is investing in wind energy development. The company plans to devote up to 25% of research funds to new energy solutions and energy efficiency by 2020. According to Equinor’s website:

“Our strategy focuses on three main areas. We are building a high value and low carbon oil and gas portfolio, we are building a material industrial position in renewable energy and low carbon solutions, and we embed climate risk and performance into our decision-making. Our Climate Roadmap explains how we plan

---

to achieve our goals and how we will develop our business, in support of the ambitions set out in the Paris climate agreement.” (emphasis added)

Total, a major French energy company, has invested in solar energy and is reducing the carbon intensity of its energy products — goals for the company’s mix of energy products to include 15 - 20% renewables by 2035. The company’s climate action plan, disclosed in its report *Integrating Climate Into Our Strategy*, includes detailed description of its Carbon Intensity Indicator, and how it plans to gradually decrease the carbon intensity of its energy products in keeping with the Paris Agreement. This report also describes how the company includes avoided emissions, and is considering its options to increase natural gas production as a near-term step.

And DONG Energy, a major Danish oil and gas company, chose to sell its oil and gas portfolio and rebranded itself as Ørsted. Thomas Thune Andersen, chairman of the board of directors, said a new brand would underscore the company’s commitment to renewable technologies.

> “Our vision is a world that runs entirely on green energy,” he said. “Climate change is one of the most serious challenges facing the world today, and to avoid causing serious harm to the global ecosystems, we need to fundamentally change the way we power the world by switching from black to green energy.”

These peer companies provide models of active redirection of resources in line with the Paris Agreement’s goals, disclosure about these choices, and acknowledgement of their role in the global energy market. Their action demonstrates that ExxonMobil’s business as usual approach is not a neutral path and in no sense entails implementation of the Proposal.

Thus, the Proposal is not excludable pursuant to Rule 14a-8(i)(10).

**CONCLUSION**

Based upon the foregoing analysis, the Proposal is not excludable under Rule 14a-8(i)(3), Rule 14a-8(i)(7) or Rule 14a-8(i)(10). We urge the Staff to decline the Company’s request for no-action relief.

Ladies and Gentlemen:

On behalf of Exxon Mobil Corporation, a New Jersey corporation (the “Company”), we are writing to supplement the request from the Company, dated January 31, 2019 (the “No-Action Letter”), regarding the exclusion of a shareholder proposal (the “Proposal”) submitted by New York State Common Retirement Fund (the “Proponent”) from the Company’s proxy statement for its 2019 Annual Meeting of Shareholders (the “2019 Proxy Materials”). A copy of the No-Action Letter is included with this letter as Exhibit A.

The Company’s recently published 2019 Energy and Carbon Summary provides further proof that the Company may omit the Proposal pursuant to Rule 14a-8(i)(10) as it has been substantially implemented.

As noted in the No-Action Letter, in 2018 the Company published its Energy and Carbon Summary (“ECS”), which included a number of disclosures regarding the subject matter of the Proposal that demonstrate the Company has already substantially implemented the Proposal. After the date of the No-Action Letter, the Company published the 2019 version of its ECS (the “2019 ECS”); while we believe that the 2018 ECS and the other Company public disclosures cited in the No-Action Letter demonstrate substantial implementation, we are submitting this letter to briefly highlight the ways in which the 2019 ECS, which updates and enhances the 2018 ECS and other intervening Company disclosures in a single comprehensive report, strengthens this substantial implementation argument.

With respect to the Proposal’s request to set greenhouse gas (“GHG”) emissions targets, the 2019 ECS further establishes the Company’s commitment to GHG emissions reductions by restating the GHG reduction measures highlighted in the Company news releases cited in the No-Action Letter. In particular, the 2019 ECS states that the Company’s “commitment to mitigating emissions from our operations is unwavering” and discusses a “15 percent reduction in methane emissions by 2020 compared with 2016,” a “25 percent reduction in flaring by 2020 compared with 2016,” and a

"10 percent GHG emissions intensity reduction at [an affiliate company's] operated oil sands by 2023 compared with 2016."²

With respect to the Proposal’s request that these GHG emissions targets be “aligned with the greenhouse gas reduction goals established by the Paris Climate Agreement”, the 2019 ECS includes a statement from the Company’s Chairman and CEO supporting the Paris Agreement,³ and notes that the Company’s investments in technology solutions to reduce emissions (which are discussed in detail in the No-Action Letter and the 2019 ECS) are “critical[ ] in addressing the Paris Agreement goals.”⁴

With respect to the other statements in the Proposal’s supporting statements that are discussed in the No-Action Letter (the Proponent’s request for reporting that covers the Company’s operations and products; the references to technology breakthroughs, changes in demand and management of climate change risks), the 2019 ECS elaborates on the disclosure contained in the 2018 ECS and the press releases discussed in the No-Action Letter. In particular, the 2019 ECS provides detailed information regarding the Company’s algae biofuels and carbon capture and storage initiatives (two of many key areas in which the Company is investing in technology solutions to help reduce customer emissions),⁵ as well as its process intensification research to reduce emissions in its operations.⁶ The 2019 ECS also reiterates the Company’s climate change risk management procedures⁷ and its analysis of future changes in demand for its products,⁸ both of which were also covered in detail in the 2018 ECS as described in the No-Action Letter.

For these reasons as well as those stated in the No-Action Letter, we believe that the Company may exclude the Proposal because it has been substantially implemented by the Company, and the Company’s practices, policies and procedures compare favorably to the Proposal.

Sincerely,

James Earl Parsons

Office of Chief Counsel
Division of Corporation Finance
Securities and Exchange Commission
100 F Street, NE
Washington, D.C. 20549
via email: shareholderproposals@sec.gov

Ladies and Gentlemen:

On behalf of Exxon Mobil Corporation, a New Jersey corporation (the “Company” or “Exxon Mobil”), and in accordance with Rule 14a-8(j) under the Securities Exchange Act of 1934, as amended (the “Exchange Act”), we are filing this letter with respect to the shareholder proposal (the “Proposal”) submitted by New York State Common Retirement Fund (the “Proponent”) for inclusion in the proxy materials the Company intends to distribute in connection with its 2019 Annual Meeting of Shareholders (the “2019 Proxy Materials”). The Proposal is attached hereto as Exhibit A.

We hereby request confirmation that the Staff of the Division of Corporation Finance (the “Staff”) will not recommend any enforcement action if, in reliance on Rule 14a-8, the Company omits the Proposal from the 2019 Proxy Materials.

Pursuant to Staff Legal Bulletin No. 14D (CF), Shareholder Proposals (November 7, 2008), Question C, we have submitted this letter and any related correspondence via email to shareholderproposals@sec.gov. Also, in accordance with Rule 14a-8(j), a copy of this submission is being sent simultaneously to the Proponent as notification of the Company’s intention to omit the Proposal from the 2019 Proxy Materials. This letter constitutes the Company’s statement of the reasons it deems the omission of the Proposal to be proper.

THE PROPOSAL

The Proposal states:

“RESOLVED: Shareholders request that the Board of Directors, in annual reporting from 2020, include disclosure of short-, medium- and long-term greenhouse gas targets aligned with the greenhouse gas reduction goals established by the Paris Climate Agreement to keep the increase in global average temperature to well below 2°C and to pursue efforts to limit the increase to 1.5°C. This reporting should cover both the corporation’s operations and products, omit proprietary information, and be prepared at reasonable cost.”
The Company believes that the Proposal may be properly omitted from the 2019 Proxy Materials pursuant to Rule 14a-8(i)(3) because it is vague and indefinite, pursuant to Rule 14a-8(i)(7) because it impermissibly seeks to micro-manage the Company and pursuant to Rule 14a-8(i)(10) because the Company has already substantially implemented the Proposal.

**REASONS FOR EXCLUSION OF THE PROPOSAL**

1. The Company may omit the Proposal pursuant to Rule 14a-8(i)(3) because it is impermissibly vague and indefinite so as to be inherently misleading.

   Under Rule 14a-8(i)(3), a proposal may be excluded if the resolution or supporting statement is contrary to any of the Commission's proxy rules or regulations. The Staff has consistently taken the view that shareholder proposals that are "so inherently vague or indefinite that neither the shareholders voting on the proposal, nor the company in implementing the proposal (if adopted), would be able to determine with any reasonable certainty exactly what actions or measures the proposal requires" are materially false and misleading. See also Dyer v. SEC, 287 F.2d 773, 781 (8th Cir. 1961) ("[I]t appears to us that the proposal, as drafted and submitted to the company, is so vague and indefinite as to make it impossible for either the board of directors or the shareholders at large to comprehend precisely what the proposal would entail.").

   A proposal may also be vague, and thus materially misleading, when it fails to address essential aspects of its own implementation. For example, the Staff has allowed the exclusion of several executive compensation proposals where a crucial term relevant to implementing the proposal was not clear. See The Boeing Company (January 28, 2011, recon. granted March 2, 2011) (proposal requesting, among other things, that senior executives relinquish certain "executive pay rights" because the proposal did not sufficiently explain the meaning of the phrase); General Electric Company (January 21, 2011) (proposal requesting that the compensation committee make specified changes was vague because, when applied to the company, neither the shareholders nor the company would be able to determine exactly what actions or measures the proposal required); and General Electric Company (January 23, 2003) (proposal seeking an individual cap on salaries and benefits of one million dollars failed to define the critical term "benefits" or otherwise provide guidance on how benefits should be measured for purposes of implementing the proposal).

   The Proposal requests the disclosure of "short-, medium- and long-term greenhouse gas targets aligned with the greenhouse gas reduction goals established by the Paris Climate Agreement to keep the increase in global average temperature to well below 2°C and to pursue efforts to limit the increase to 1.5°C. The reporting should cover both the corporation's own operations as well as its products ..." As described in more detail in this letter with respect to Rule 14a-8(i)(10), we believe ExxonMobil's actions and its annual disclosure of those actions -- most recently in its 2018 Energy and Carbon Summary ("ECS") -- substantially address the principal objective of the Proposal: that the Company do its part to help address the risks of climate change and position itself to meet the demands of an evolving energy system and lower-carbon energy future and report to shareholders on those actions. As described further in the ECS and below in this letter the Company is meeting this objective through four key areas of focus: developing scalable technology solutions; engaging on climate change policy; providing products to help customers reduce their own emissions; and mitigating emissions in the Company's operations. ExxonMobil has taken a number of significant steps to reduce the energy intensity of its operations and emissions associated with flaring and

venting. These efforts include research into scalable carbon capture and storage, advanced fuel cells and advanced biofuels. The Company also purchases and uses wind and solar energy in its business operations.

However, we believe the particular framing of the Proposal reflects a misunderstanding both of the nature of the Paris Agreement and of the global energy economy which renders the Proposal fundamentally misleading. The Company simply could not implement the Proposal’s terms as presented. This is especially the case with respect to the Proposal’s call for company specific “targets” for the reduction of emissions from both the Company’s “operations and products” that are “aligned with the greenhouse gas reduction goals established by the Paris Climate Agreement.”

The Paris Agreement is a government-to-government accord under which countries seek to reduce their national GHG emissions according to pledges known as “Nationally Determined Contributions” (“NDCs”). To effect change, the specifics of country-level policy must ultimately resolve to change the demand for energy. How any particular participating country chooses to formulate and attempt to meet its NDC is a matter of complex interplay among that country’s legal and policy decisions as affected by local and global economic, technological and geopolitical objectives and developments. ExxonMobil’s alignment with the Paris Agreement will be achieved by effectively responding to the changes in energy demand driven by changes in country-specific policies. Unilateral action by ExxonMobil that is inconsistent with or disconnected from these changes in policy as well as consumer demand could harm ExxonMobil’s business, prevent the Company from meeting society’s needs for energy, and make it more rather than less difficult for countries to meet their NDCs under the Paris Agreement.

A few examples help illustrate the above point:

- Oil and gas produced by ExxonMobil is used by millions of commercial and individual consumers around the world. ExxonMobil does not control or in many cases know the identities of these consumers, who are best positioned to make appropriate decisions regarding their energy usage and resulting emissions. To the extent consumer demand evolves ExxonMobil believes it is well positioned to continue to be competitive in meeting that demand. Under all credible third-party scenarios, even if the world succeeds in moving to a 2°C pathway, significant demand for oil and gas will remain for decades to come. In its 2°C Sustainable Development Scenario, the International Energy Agency (“IEA”) forecasts liquids demand of 69.9 million barrels per day and natural gas demand of 4184 billion cubic meters (an increase from 2017 natural gas demand of 3752 billion cubic meters) in 2040 and estimates that more than $13 trillion of investment will be needed for oil and natural gas supply from 2018-2040. Even using the lowest liquids demand growth rate among the assessed 2°C scenarios available through the Energy Modeling Forum (“EMF”) at Stanford University,2 liquids demand would still be 53 million barrels per day in 2040.3 ExxonMobil provides products to meet a portion of this demand where we can compete most effectively and create value for shareholders. However, oil and gas consumption is a function of this global demand, not ExxonMobil’s production. Oil and gas are global commodities produced by hundreds of different producers ranging from small private companies to vast state-owned enterprises in countries whose

---

2 The EMF supports the assessments issued by the Intergovernmental Panel on Climate Change. The models assessed in ExxonMobil’s Outlook for Energy represent those scenarios -- prepared by independent third parties -- which achieve a 2°C pathway and do not exclude any potential technology options for doing so. See ECS p. 7.

3 See ECS p 10.
national economies are significantly dependent on oil and gas production. The Proposal seems to suggest that ExxonMobil as an individual company reduce its own production in order to achieve a "target" for reducing emissions from consumers' use of the oil and gas it produces in response to global demand for those products. However, such a reduction would not change global demand for oil and gas. Any market share ceded by ExxonMobil would simply be met by other producers, including resource owners and other participants who would continue to operate projects in which ExxonMobil currently participates. Hence, ExxonMobil could not set a "target" for the reduction of emissions from consumer use of our products that would affect overall national emissions or be "aligned with the greenhouse gas reduction goals" of the Paris Agreement, which as noted above must be effected by country-level policies not unilateral action by ExxonMobil. In fact, to the extent demand not met by ExxonMobil is met by producers who may lack ExxonMobil's operational expertise, technological advantages and commitment to conducting its operations efficiently, a reduction in production of oil and gas by ExxonMobil could result in an increase in actual energy-related CO2 emissions at the country level.

- Although the United States has indicated an intent to withdraw from the Paris Agreement, US energy-related CO2 emissions have declined in seven of the past 10 years and in 2017 fell to a level 14% lower than in 2005. A key driver in reduced US CO2 emissions has been the substitution of lower-carbon natural gas for coal in electric power generation. Continued fuel switching to lower carbon natural gas in the power generation and industrial sectors will play an important role in continued reductions of US energy-related emissions. Through the supply of liquefied natural gas ("LNG"), the emission-reducing benefits of natural gas can also be realized by countries in Asia and elsewhere that currently depend heavily on coal-fired power generation and lack sufficient indigenously available supplies of affordable natural gas. ExxonMobil is one of the leading producers of natural gas in the United States and is a major participant in current and planned LNG production facilities around the world. Thus, the growth of that business and associated emissions is more closely "aligned with the greenhouse gas reduction goals" of the Paris Agreement than would be a target for reducing the growth of ExxonMobil's business.

- As also discussed in more detail elsewhere in this letter and in the ECS, ExxonMobil produces a number of products that help others reduce their own emissions. For example, advanced plastics play an important role in reducing the weight of automobiles, thereby improving fuel efficiency and helping reduce transportation sector emissions per mile. Similar "lightweighting" of other products using advanced materials also reduces shipping weight and associated emissions. ExxonMobil also produces advanced lubricants that improve engine and powertrain efficiency and thereby reduce emissions. Growth in these businesses could lead to increased emissions at the Company level but contribute positively to reduced emissions at the national and global levels and thus be

---

4 The Company is aware that some oil and gas companies have been cited for the reduction in emissions from their products as a result of divesting certain oil and gas assets. However, our understanding is these assets generally continue to be developed and produced. Thus, a reduction of oil and gas production by an individual company did not necessarily reduce applicable national emissions in alignment with the goals of the Paris Agreement.

5 https://www.eia.gov/todayinenergy/detail.php?id=36953
more consistent with the goal of the Paris Agreement than a reduction target at the ExxonMobil corporate level.

In short, the goal of the Paris Agreement to reduce GHG emissions at the national and ultimately global level does not translate into meaningful and effective reduction “targets” for ExxonMobil that contribute to that goal. While ExxonMobil works to mitigate emissions from its operations and is investing in substantial research and development efforts to develop next-generation low net carbon energy sources for the future, oil and gas will remain significant components of the global energy system for decades to come. Moreover, many of our products contribute positively to the goals of the Paris Agreement by helping customers reduce emissions in other sectors of the economy. Thus, a reduction target that limited the growth of ExxonMobil’s businesses would reduce ExxonMobil’s ability to contribute to the goals of the Paris Agreement in the ways that best suit the Company’s core competencies. By suggesting that the national and global GHG reduction goals of the Paris Agreement translate meaningfully into unilateral reduction goals for an individual company within the complex global energy economy, rather than policy choices at the country level that change energy demand, the Proposal is inherently misleading. Accordingly, consistent with the Staff’s previous interpretations of Rule 14a-8(i)(3), the Company believes that the Proposal may be excluded.

2. The Company may omit the Proposal pursuant to Rule 14a-8(i)(7) because it relates to the Company’s ordinary business operations by impermissibly seeking to micro-manage the Company.

A. Background

Rule 14a-8(i)(7) allows a company to omit a shareholder proposal from its proxy materials if such proposal deals with a matter relating to the company’s ordinary business operations. The general policy underlying the “ordinary business” exclusion is “to confine the resolution of ordinary business problems to management and the board of directors, since it is impracticable for shareholders to decide how to solve such problems at annual shareholders meetings.” Exchange Act Release No. 34-40018 (May 21, 1998) (the “1998 Release”). This general policy reflects two central considerations: (i) “[c]ertain tasks are so fundamental to management’s ability to run a company on a day-to-day basis that they could not, as a practical matter, be subject to direct shareholder oversight” and (ii) the “degree to which the proposal seeks to ‘micro-manage’ the company by probing too deeply into matters of a complex nature upon which shareholders, as a group, would not be in a position to make an informed judgment.”

Although the Staff has stated that a proposal generally will not be excludable under Rule 14a-8(i)(7) where it raises a significant policy issue (Staff Legal Bulletin 14E (October 27, 2009)), even if a proposal involves a significant policy issue, the proposal may nevertheless be excluded under Rule 14a-8(i)(7) if it seeks to micro-manage the company by specifying in detail the manner in which the company should address the policy issue. See Apple Inc. (December 21, 2017) (proposal requesting the Apple board prepare a report evaluating potential for Apple to achieve net-zero GHG emissions by a fixed date excludable for micro-managing despite Apple’s acknowledgment that reduction of GHG emissions, which the proposal sought to address, is a significant policy issue). The staff has recognized that a shareholder’s casting of a proposal as a mere request for a report, rather than a request for a specific action, does not mean that the proposal does not seek to micro-manage the Company, even when the proposal addresses a significant policy issue. See Ford Motor Company (March 2, 2004) (proposal requesting the preparation and publication of scientific report
regarding the existence of global warming or cooling excludable "as relating to ordinary business operations" despite recognition that global warming is a significant policy issue).

B. The Proposal seeks to micro-manage the Company by imposing specific time frames and methods to implement complex policies.

The Proposal seeks to micro-manage the Company by asking the Company to set and disclose three GHG emissions reduction targets by the following timeframes: "short-, medium- and long-term". Although the exact terms are not defined and, as discussed earlier in this letter, it is not clear how the Company could set and enforce targets that would result in the reduction of emissions from global consumption of oil and gas by the millions of commercial and individual users who make up that demand and over whom the Company has no control, it is clear the Proposal requests three different targets within three different time frames. The Proposal thus would require management to prepare a plan that could feasibly achieve specific GHG reductions from both the Company's operations and from its products by three separate targets. Developing GHG emissions targets even with respect to the operations the Company itself conducts and controls requires complex decisions to be made by experts and management, taking into account among other things analyses and projections regarding the Company's current and future operations; anticipated technological, economic and geopolitical developments; anticipated changes in government policy stringency and evolution; and projected changes in the amount and mix of global energy and petroleum product requirements.

The Company's GHG emissions and the emissions resulting from use of its products by consumers result from the Company's highly complex operations and changes in those operations over time. The Company's operations encompass multiple business lines including the exploration and production of crude oil and natural gas; the manufacture of petroleum and petrochemical products; and the transportation and sale of crude oil, natural gas and petroleum and petrochemical products. The Company also makes substantial investments in the research and development of multiple technologies, some of which are at the forefront of early innovation and whose ultimate benefits may not be known for many years. These operations occur throughout the world at a significant number of properties and locations; similarly, the Company's products are sold throughout the world. These complex operations require the Company's management to manage countless factors on a day-to-day basis, including:

- specific management decisions regarding existing oil, gas, petroleum product and petrochemical projects around the world;
- expansions and enhancements to those projects as well as the development of similar new such projects to offset the natural decline of oil and gas fields and to grow the Company's businesses;
- anticipated customer demand and how best to succeed in highly competitive global markets;
- the portfolio of investment opportunities available to the Company that would provide attractive returns to shareholders;
- how best to manage GHG emissions from these operations as well as the wide variety of operational and other risks inherent in many of the Company's businesses;
how best to comply with complex and evolving legal and environmental requirements that vary widely across the many jurisdictions in which the Company, either directly or through affiliated entities, conducts business; and

many other technical and management considerations.

These are the types of complex day-to-day operational decisions that the 1998 Release stated are too impractical to subject to direct shareholder oversight. Consequently, the Proposal micro-manages the Company to a much greater degree than proposals that are limited to a company's own operations, such as a GHG reduction proposal submitted to the TJX Companies ("TJX"). In TJX Companies, Inc. (March 3, 2017), the proposal called for the company to prepare a report evaluating the potential for TJX to achieve "net-zero" GHG gas emissions from parts of the business owned and operated by TJX. Unlike the Proposal, the TJX proposal did not require the company to investigate and address emissions associated with TJX's products in its plan to reduce GHG emissions. In addition, as a global oil and gas exploration and production company (and a global producer of petroleum and petrochemical products), the Company's business operations involve far more complex business and technology planning and choices than the retail sale of apparel and home accessories manufactured by others at issue in TJX. Moreover, the Company's operations are subject to extensive regulation on an international, federal, state and local level; the Proposal does not take these and other considerations into account, and its efforts to impose specific time frames or methods for implementing complex policies curtails the ability of the Company's management to do so.

By requiring "short-, medium- and long-term" targets, the Proposal has set three specific deadlines and is significantly different from proposals that request general goals, or a range of acceptable degrees of compliance, for environmental objectives. The Staff has in the past declined to allow exclusion of proposals that request goals or ranges of compliance on micro-management grounds. See, e.g., FirstEnergy Corp. (March 4, 2015) (declining to concur in exclusion of proposal that called for preparation of a plan to address carbon dioxide emissions but did not "mandate what quantitative goals should be adopted, or how the quantitative targets should be set"); ExxonMobil Corporation (March 12, 2007) (declining to concur in exclusion of proposal requesting adoption of a policy (as opposed to a plan) to significantly increase renewable energy sourcing, with a "recommended goal" in the range of 15%-25% of all energy sourcing by 2015-2025). By contrast, the Proposal sets specific goals in reference to the Paris Agreement and specific short-, medium- and long-term deadlines. In order to implement the Proposal by setting credible, realistic GHG reduction targets by specific time periods, the Company would need to engage in a significant amount of complex day-to-day actions and calculations to a much greater degree than the FirstEnergy and ExxonMobil proposals cited above which merely requested a general GHG emissions reduction plan without specific targets and a renewable energy policy.

To achieve the Proposal's objectives, management would be required to subject its day-to-day considerations to shareholder oversight. This is impractical because as described above in this letter resource deployment and management of the Company's highly complex global operations are inherently fact-specific and require expert oversight on a daily basis. These types of decisions are not well-suited to shareholder supervision. The Proposal directly implicates the micro-management
of complex issues that the 1988 Release addressed. It is excludable under Rule 14a-8(i)(7) because it seeks to address the issue of specific emission reduction targets over three specific time periods and the Paris Agreement goals in a manner that directly impedes management's ability to operate the Company's day-to-day business.

3. The Company may omit the Proposal pursuant to Rule 14a-8(i)(10) as it has been substantially implemented and its practices, policies and procedures compare favorably to the Proposal.

Rule 14a-8(i)(10) permits a company to exclude a shareholder proposal if the company has already substantially implemented the proposal. The Commission has stated that "substantial" implementation under the rule does not require implementation in full or exactly as presented by the proponent. See Exchange Act Release No. 34-40018 (May 21, 1998, n.30). The Staff has provided no-action relief under Rule 14a-8(i)(10) when a company has substantially implemented and therefore satisfied the "essential objective" of a proposal, even if the company did not take the exact action requested by the proponent, did not implement the proposal in every detail or exercised discretion in determining how to implement the proposal. See Exxon Mobil Corporation (March 23, 2018) (permitting exclusion of a shareholder proposal requesting that the company issue a report describing how the company could adapt its business model to align with a decarbonizing economy where the requested information was already available in two published reports describing the company's long-term outlook for energy and how it would position itself for a lower-carbon energy future); Ford Motor Company (February 22, 2016) (permitting exclusion of a shareholder proposal requesting that the company adopt a policy disclosing the gender, race/ethnicity, skills and experiences of each board nominee where the requested information was already available in a chart disclosing the aggregate gender and minority status of the company's directors in its sustainability report and the specific qualifications required of board nominees as well as each director's actual skills and experiences as it relates to those qualifications in its proxy materials); Wal-Mart Stores, Inc. (March 25, 2015) (permitting exclusion of a shareholder proposal requesting an employee engagement metric for executive compensation where a "diversity and inclusion metric related to employee engagement" was already included in the company's management incentive plan); Entergy Corp. (February 14, 2014) (permitting exclusion of a shareholder proposal requesting a report "on policies the company could adopt . . . to reduce its greenhouse gas emissions consistent with the national goal of 80% reduction in greenhouse gas emissions by 2050" where the requested information was already available in its sustainability and carbon disclosure reports); Duke Energy Corp. (February 21, 2012) (permitting exclusion of a shareholder proposal requesting that the company assess potential actions to reduce greenhouse gas and other emissions where the requested information was available in the Form 10-K and its annual sustainability report); and Exelon Corp. (February 26, 2010) (concurring in the exclusion of a proposal that requested a report on different aspects of the company's political contributions when the company had already adopted its own set of corporate political contribution guidelines and issued a political contributions report that, together, provided "an up-to-date view of the [company's policies and procedures with regard to political contributions]"). "[A] determination that the company has substantially implemented the proposal depends upon whether [the Company's] particular policies, practices, and procedures compare favorably with the guidelines of the proposal." See Texaco, Inc. (March 28, 1991) (permitting exclusion on substantial implementation grounds of a proposal requesting that the company adopt the Valdez Principles where the company had already adopted policies, practices and procedures regarding the environment).

The core of the Proposal, or its "essential objective," is for the Company to disclose "short-, medium- and long-term greenhouse gas targets aligned with the greenhouse gas reduction goals
established by the Paris Climate Agreement." The Company's 2018 ECS report is available on its
website, and, along with other ExxonMobil press releases and written information available on the
Company's website, demonstrates that the essential objective of the Proposal has been substantially
implemented. While as described previously in this letter there are fundamental flaws in the
Proposal's purported linkage of company-specific reduction targets relating both to its operations
and its products with the achievement of the national and global objectives of the Paris Agreement,
the underlying premise of the Proposal -- that the Company take action, including through the
establishment of measures where practicable, to help address the risk of climate change and report
to shareholders on those actions -- is something the Company supports and is doing. As described
further below, the 2018 ECS report demonstrates that the Company has substantially implemented
the Proposal by satisfying its essential objective, and thus the Proposal is excludable under Rule
14a-8(i)(10). Please note that the Company intends to make publicly available an updated 2019
version of the ECS in the coming weeks and, if appropriate, will supplement this no-action letter
request with equally relevant information from this updated 2019 ECS.

In the table below we have succinctly demonstrated how the 2018 ECS report and other
Company public disclosures are responsive to the Proposals' request for "short-, medium- and long-
term greenhouse gas targets aligned with the greenhouse gas reduction goals established by the
Paris Climate Agreement." A more detailed discussion of the public disclosures the Company has
made that address the essential objective of the Proposal is set forth following the summary table.

\(^7\) In 2018, the Staff concurred that the 2018 ECS was sufficient to support the exclusion of the proposal regarding a transition to a low carbon economy at issue in Exxon Mobil Corporation (available March 23, 2018).
\(^11\) See footnote 8.
\(^12\) See footnote 9.
The 2018 ECS draws on the Company’s detailed analysis of the assessed 2°C scenarios in the Company’s Outlook for Energy (the “Outlook”). The Outlook considers the impacts of current and potential future public climate change policies including the NDCs to the Paris Agreement. The Company believes the NDCs are indicative of countries’ intentions to implement the Paris Agreement. The Outlook represents the Company’s “view of energy demand and supply through 2040” and is used by the Company “to help inform [the Company’s] long-term business strategies and investment plans.” This published analysis is conducted yearly and currently extends through 2040, based upon internal data and analyses as well as publicly available information from external sources including the IEA. The Outlook incorporates recent developments in economic conditions, policy and technology, using a data-driven, bottom-up approach to produce a most-likely view of future energy supply and demand, which “anticipates significant changes through 2040 across the

---

13 See footnote 10.
15 See footnote 14.
world to boost living standards, reshape the use of energy, broaden access to abundant energy supplies, and accelerate decarbonization of the world’s energy system to address the risks of climate change.” The Company’s Outlook already contemplates a future energy mix that shifts toward lower-carbon-intensive fuels.\(^{17}\)

The 2018 ECS describes the potential impact on the Company’s business of a hypothetical 2°C scenario, how the Company is adapting and implementing GHG emission reduction measures, and how the Company would be able to adapt to a lower-carbon future while remaining “well positioned for the continuing evolution of the energy system,”\(^{19}\) including how the Company is monitoring indicators that may serve as signposts for potential acceleration in shifts to the energy landscape.\(^{20}\)

With respect to the Proposal’s request to set GHG emissions targets, recent press releases and the 2018 ECS detail the Company’s commitment to mitigating emissions by describing various reduction measures. In particular, in May 2018, the Company announced “[GHG] reduction measures that are expected to lead to significant improvements in emissions performance by 2020, including a 15 percent decrease in methane emissions and a 25 percent reduction in flaring.”\(^{21}\) In addition, in August 2018, the Company’s affiliate, Imperial Oil, announced “plans to apply advanced technologies and improvements in efficiency to reduce the greenhouse gas emissions intensity of its operated oil sands facilities” that “are anticipated to result in a 10 percent decrease in greenhouse gas emissions intensity by 2023, compared with 2016 levels.”\(^{22}\) And in June 2018, ExxonMobil’s subsidiary XTO Energy announced that it reduced methane emissions from its operations by 9 percent since 2016, with a reduction of 4 percent achieved through XTO Energy’s voluntary program and other operational improvements.\(^{23}\)

In addition, with respect to the Proposal’s request that the Company’s “reporting should cover both the corporation’s operations and products,” the 2018 ECS describes how the Company provides “solutions that reduce [GHG] emissions for our customers”, including natural gas (which “emits up to 60 percent fewer GHGs than coal”), as well as “weight-reducing plastics, friction-reducing lubricants, and mileage-increasing tire liners that can significantly improve efficiency and lower emissions for consumers.”\(^{24}\) A March 2018 ExxonMobil press release noted a new phase in the Company’s research partnership with Synthetic Genomics that could lead to the ability to produce 10,000 barrels of algae biofuel (a lower-emission technology that could help customers reduce GHG emissions) by 2025.\(^{25}\) Further, with respect to the Company's operations, the 2018 ECS describes the steps taken in the Company’s operations to mitigate GHG emissions, such as increasing energy efficiency, reducing flaring, venting and fugitive emissions, implementing a methane management plan, and deploying technologies such as carbon capture and storage and

---

\(^{17}\) Outlook, p 2.

\(^{18}\) ECS, p 2.

\(^{19}\) ECS, p 2.

\(^{20}\) ECS, p 9.

\(^{24}\) ECS, p 19.

cogeneration. ExxonMobil currently has a working interest in more than one-fifth of the world’s carbon capture and storage capacity, capturing nearly 7 million tonnes of CO2 in 2017 for permanent and safe storage. Overall since 2011 ExxonMobil has avoided greater than 50 million metric tonnes of CO2. The Company also made a substantial purchase of wind and solar energy for use in its operations last year.

With respect to the Proposal’s request that these GHG emissions targets be “aligned with the greenhouse gas reduction goals established by the Paris Climate Agreement,” ExxonMobil states directly: “We . . . support the Paris Agreement.” ExxonMobil’s actions to address the risk of climate change as detailed in the 2018 ECS — developing scalable technology solutions, engaging on climate policy, providing products to help customers reduce their own emissions, and mitigating emissions in the Company’s operations — are undertaken in that context. As previously discussed, the Company’s Outlook, which was used to prepare the 2018 ECS and to inform the Company’s operational plans, incorporates an analysis of current and future public climate change policies such as the goals of the Paris Agreement including country NDCs made pursuant to that Agreement.

Finally, the 2018 ECS demonstrates how the Company has provided information responsive to various statements in the Proposal’s supporting statements. First, the Proposal references “technology increases due to technical breakthroughs”, and as mentioned above, the 2018 ECS and a 2018 algae biofuels press release discuss examples of such technology solutions. In addition, a September 2018 ExxonMobil press release about the Company joining the Oil and Gas Climate Initiative notes that this voluntary initiative of oil and gas producers is focused on developing solutions in areas such as carbon capture and storage. Second, the Proposal mentions potential future changes in “demand for [the Company’s] products,” and as discussed above the Company’s Outlook and the 2018 ECS address this scenario in detail in their assessment of future 2°C scenarios. Third, the Proposal mentions “[m]anagement of risks associated with climate change,” and the 2018 ECS addresses this by describing the Company’s climate-related risk oversight. And fourth, the Proposal seeks to “ensure that ExxonMobil is adequately prepared to be successful into the future,” and the 2018 ECS discusses throughout the various ways the Company is preparing its business for success in the future.

Substantial implementation does not require implementation in full or exactly as presented by a Proposal, and the Staff has found proposals related to climate change excludable pursuant to 14a-8(i)(10) even if the Company’s actions were not identical to the guidelines of the proposal. Both Entergy Corp. and Duke Energy Corp. permitted exclusion of a shareholder proposal pursuant to 14a-8(i)(10), even though the requested disclosures were not made in precisely the manner

26 ECS, pp 16-17.
27 ECS, p 16.
29 ECS, p 1.
30 ECS, pp 6-20.
31 ECS, pp 18-19.
34 ECS, pp 2, 6-12.
35 ECS, pp 3-7.
36 ECS, pp 6-23.
contemplated by the proponent. Numerous other letters reinforce this approach. See, e.g., *Merck & Co., Inc.* (March 14, 2012) (permitting exclusion of a shareholder proposal requesting a report on the safe and humane treatment of animals because the company had already provided information on its website and further information was publicly available through disclosures made to the United States Department of Agriculture); *ExxonMobil Corp.* (March 17, 2011) (permitting exclusion of a shareholder proposal requesting a report on the steps the company had taken to address ongoing safety concerns where the company’s “public disclosures compare[d] favorably with the guidelines of the proposal”); and *ExxonMobil Corp.* (January 24, 2001) (permitting exclusion of a shareholder proposal requesting the review of a pipeline project, the development of criteria for involvement in the project and a report to shareholders because it was substantially implemented by prior analysis of the project and publication of such information on the company’s website).

The essential objective of the Proposal is for the Company to disclose “short-, medium- and long-term greenhouse gas targets aligned with the greenhouse gas reduction goals established by the Paris Climate Agreement,” and this has been substantially implemented by the Company through its 2018 ECS and other public disclosure. The report prepared by the Company compares favorably with the essence of the Proposal, and thus the Proposal is excludable under Rule 14a-8(i)(10).

**CONCLUSION**

The Company requests confirmation that the Staff will not recommend any enforcement action if, in reliance on the foregoing, the Company omits the Proposal from its 2019 Proxy Materials.

If you have any questions or require additional information, please contact me directly at 972-940-6211. In my absence, please contact David A. Kern at (972) 940-7228.

This letter and enclosures are being submitted to the Staff by email. A copy of this letter and the enclosures is also being sent to the Proponent by email.

Sincerely,

Proposed

PROPOSAL REGARDING GREENHOUSE GAS TARGETS

This proposal was submitted by the New York State Common Retirement Fund, 59 Maiden Lane – 
30th Floor, New York, NY 10038, the beneficial owner of 10,584,905 shares and lead proponent of a 
fil ing group.

"RESOLVED: Shareholders request that the Board of Directors, in annual reporting from 2020, include disclosure of short-, medium- and long-term greenhouse gas targets aligned with the greenhouse gas reduction goals established by the Paris Climate Agreement to keep the increase in global average temperature to well below 2°C and to pursue efforts to limit the increase to 1.5°C. This reporting should cover both the corporation’s operations and products, omit proprietary information, and be prepared at reasonable cost.

SUPPORTING STATEMENT: It is widely accepted that a transition to a low carbon economy - driven by advances in technology and government policy aligned with the Paris Agreement - is underway. As the use of zero- and low-carbon technology increases due to technical breakthroughs and decreasing costs, and as governments take steps to limit greenhouse gas emissions, fossil fuel companies face enhanced risk. These trends could limit returns to ExxonMobil’s investors by increasing the company’s operating costs or by reducing demand for its products.

The Grantham Research Institute on Climate Change and the Environment has identified at least 1,512 climate change laws. Growing recognition of the risks from climate change will result in increasing numbers of, stringency of, and support for these laws.

Disclosing targets is an important means of assuring investors of the management of risks associated with climate change and investors welcome ExxonMobil’s recent announcement of a 2020 methane emission reduction goal. However, some of ExxonMobil’s peer companies, including Total and Shell, have disclosed much longer-term ambitions, including for emissions resulting from the use of their products. Investors participating in Climate Action 100+, representing over $32 trillion in assets under management, are seeking enhanced disclosure of targets and other measures demonstrating company alignment with the Paris Agreement.

To ensure that ExxonMobil is adequately prepared to be successful into the future for its shareholders and other stakeholders we believe it is essential for the company to identify and disclose targets that are aligned with the goals of the Paris Agreement.”
Mr. Neil Hansen  
Secretary  
Exxon Mobil Corporation  
5959 Las Colinas Boulevard  
Irving, TX 75039-2298

Dear Mr. Hansen:

The Comptroller of the State of New York, Thomas P. DiNapoli, is the trustee of the New York State Common Retirement Fund (the "Fund") and the administrative head of the New York State and Local Retirement System. The Comptroller has authorized me to inform of his intention to offer the enclosed shareholder proposal for consideration of stockholders at the next annual meeting.

I submit the enclosed proposal to you in accordance with rule 14a-8 of the Securities Exchange Act of 1934 and ask that it be included in your proxy statement.

A letter from J.P. Morgan Chase, the Fund's custodial bank verifying the Fund's ownership of Exxon Mobil Corporation shares, continually for over one year, is enclosed. The Fund intends to continue to hold at least $2,000 worth of these securities through the date of the annual meeting.

We would be happy to discuss this initiative with you. Should Exxon Mobil Corporation decide to endorse its provisions as company policy, the Comptroller will ask that the proposal be withdrawn from consideration at the annual meeting. Please feel free to contact me at (212) 383-1428 and/or email at pdoherty@osc.ny.gov should you have any further questions on this matter.

Very truly yours,

[Signature]

Patrick Doherty
Director of Corporate Governance

Enclosures
RESOLVED: Shareholders request that the Board of Directors, in annual reporting from 2020, include disclosure of short-, medium- and long-term greenhouse gas targets aligned with the greenhouse gas reduction goals established by the Paris Climate Agreement to keep the increase in global average temperature to well below 2°C and to pursue efforts to limit the increase to 1.5°C. This reporting should cover both the corporation's operations and products, omit proprietary information, and be prepared at reasonable cost.

SUPPORTING STATEMENT: It is widely accepted that a transition to a low carbon economy - driven by advances in technology and government policy aligned with the Paris Agreement - is under way. As the use of zero- and low-carbon technology increases due to technical breakthroughs and decreasing costs, and as governments take steps to limit greenhouse gas emissions, fossil fuel companies face enhanced risk. These trends could limit returns to ExxonMobil's investors by increasing the company's operating costs or by reducing demand for its products.

The Grantham Research Institute on Climate Change and the Environment has identified at least 1,512 climate change laws. Growing recognition of the risks from climate change will result in increasing numbers of, stringency of, and support for these laws.

Disclosing targets is an important means of assuring investors of the management of risks associated with climate change and investors welcome ExxonMobil's recent announcement of a 2020 methane emission reduction goal. To ensure that ExxonMobil is adequately prepared to be successful into the future for its shareholders and other stakeholders we believe it is essential for the company to identify and disclose targets that are aligned with the goals of the Paris Agreement.
November 20, 2018

Mr. Neil Hansen
Secretary
Exxon Mobil Corporation
5959 Las Colinas Boulevard
Irving, TX 75039-2298

Dear Mr. Hansen,

This letter is in response to a request by The Honorable Thomas P. DiNapoli, New York State Comptroller, regarding confirmation from JP Morgan Chase that the New York State Common Retirement Fund has been a beneficial owner of ExxonMobil Corporation continuously for at least one year as of and including November 20, 2018.

Please note that J.P. Morgan Chase, as custodian for the New York State Common Retirement Fund, held a total of 10,584,805 shares of common stock as of November 20, 2018 and continues to hold shares in the company. The value of the ownership stake continuously held by the New York State Common Retirement Fund had a market value of at least $2,000.00 for at least twelve months prior to, and including, said date.

If there are any questions, please contact me at (212) 623-8481.

Regards,

Miriam Awad

Ask UPS

Dear Mr. Doherty:

This will acknowledge receipt of the proposal regarding Greenhouse Gas Targets (the "Proposal"), which you have submitted on behalf of the New York State Common Retirement Fund (the "PropONENT") in connection with ExxonMobil's 2019 annual meeting of shareholders. By copy of a letter from J. P. Morgan, share ownership has been verified.

You should note that, if the Proposal is not withdrawn or excluded, the Proponents or the Proponent's representative, who is qualified under New Jersey law to present the Proposal on the Proponent's behalf, must attend the annual meeting in person to present the Proposal. Under New Jersey law, only shareholders or their duly constituted proxies are entitled as a matter of right to attend the meeting.

If the Proponent intends for a representative to present the Proposal, the Proponent must provide documentation that specifically identifies their intended representative by name and specifically authorizes the representative to act as the Proponent's proxy at the annual meeting. To be a valid proxy entitled to attend the annual meeting, the representative must have the authority to vote the Proponent's shares at the meeting. A copy of this authorization meeting state law requirements should be sent to my attention in advance of the meeting. The authorized representative should also bring an original signed copy of the proxy documentation to the meeting and present it at the admissions desk, together with photo identification if requested, so that our counsel may verify the representative's authority to act on the Proponent's behalf prior to the start of the meeting.

In the event there are co-filers for this Proposal and in light of the guidance in SEC Staff Legal Bulletin No. 14F dealing with co-filers of shareholder proposals, it is important to ensure that the lead filer has clear authority to act on behalf of all co-filers, including with respect to any potential negotiated withdrawal of the Proposal. Unless the lead filer can represent that it holds such authority on behalf of all co-filers, and considering SEC staff guidance, it will be difficult for us to engage in productive dialogue concerning this Proposal.
Note that under Staff Legal Bulletin No. 14F, the SEC will distribute no-action responses under Rule 14a-8 by email to companies and proponents. We encourage all proponents and any co-filers to include an email contact address on any additional correspondence to ensure timely communication in the event the Proposal is subject to a no-action request.

We are interested in discussing this Proposal and will contact you in the near future.

Sincerely,

[Signature]

Help and Support Center
Dear Mr Hansen,

I write as the Secretary of the Church Commissioners for England (the 'Commissioners').

I am authorised to submit the enclosed shareholder proposal to you in accordance with rule 14a-8 of the Securities Exchange Act of 1934 and ask that it be included in your proxy statement for consideration of stockholders at the next annual meeting.

The proposal has been submitted by the New York State Common Retirement Fund, who are the proponents. The Church Commissioners for England are lead co-filers. I confirm that the proponent is authorised to act on behalf of the Commissioners, including with respect to any potential negotiated withdrawal of the proposal.

I enclose a letter from J.P. Morgan Chase, the Commissioners' custodial bank, verifying the Commissioners' ownership of ExxonMobil shares, continually for over one year. The Commissioners intend to hold at least $2,000 worth of these securities through the date of the annual meeting.

Please address email correspondence regarding this proposal to Edward Mason on edward.mason@churchofengland.org.

Yours sincerely,

Andrew Brown
RESOLVED: Shareholders request that the Board of Directors, in annual reporting from 2020, include disclosure of short-, medium- and long-term greenhouse gas targets aligned with the greenhouse gas reduction goals established by the Paris Climate Agreement to keep the increase in global average temperature to well below 2°C and to pursue efforts to limit the increase to 1.5°C. This reporting should cover both the corporation's operations and products, omit proprietary information, and be prepared at reasonable cost.

SUPPORTING STATEMENT: It is widely accepted that a transition to a low carbon economy - driven by advances in technology and government policy aligned with the Paris Agreement - is under way. As the use of zero- and low-carbon technology increases due to technical breakthroughs and decreasing costs, and as governments take steps to limit greenhouse gas emissions, fossil fuel companies face enhanced risk. These trends could limit returns to ExxonMobil's investors by increasing the company's operating costs or by reducing demand for its products.

The Grantham Research Institute on Climate Change and the Environment has identified at least 1,512 climate change laws. Growing recognition of the risks from climate change will result in increasing numbers of, stringency of, and support for these laws.

Disclosing targets is an important means of assuring investors of the management of risks associated with climate change and investors welcome ExxonMobil's recent announcement of a 2020 methane emission reduction goal. However, some of ExxonMobil's peer companies, including Total and Shell, have disclosed much longer-term ambitions, including for emissions resulting from the use of their products. Investors participating in Climate Action 100+, representing over $32 trillion in assets under management, are seeking enhanced disclosure of targets and other measures demonstrating company alignment with the Paris Agreement.

To ensure that ExxonMobil is adequately prepared to be successful into the future for its shareholders and other stakeholders we believe it is essential for the company to identify and disclose targets that are aligned with the goals of the Paris Agreement.
December 5, 2018

Mr Nell Hansen
Corporate Secretary
ExxonMobil Corporation
5959 Las Colinas Boulevard
Irving, TX 75039-2298

Dear Mr Hansen,

This letter is in response to the request received from Mr Christopher Betterton, Investment Operations Manager at the Church Commissioners for England, to provide you directly with the details of market value and number of shares held in the security ExxonMobil Corporation (ISIN US30231G1022).

A total of 129,982 shares of the above referenced issuer are held by JPMorgan Chase Bank, N.A. London Branch as custodian on behalf of its client Church Commissioners for England who are the beneficial owner. The value of the ownership stake continuously held by the Church Commissioners for England for at least one year up to and including the date 5th December 2018 had a market value of at least $2,000.00 for at least twelve months prior to, and including the said date.

Please note that this information is strictly confidential, is provided to you at the request of Church Commissioners for England and is for informational purposes. The enclosed information reflects the details on our books and records as of the date 5th December 2018.

Regards

Subject: Shareholder proposal - Church Commissioners co-filing

Dear Sherry,

I should like to inform you that we have today dispatched to Neil by courier the paperwork for the Church Commissioners to co-file the shareholder proposal on greenhouse gas targets filed by New York State Common Retirement Fund. It should be with you in hard copy tomorrow.

In the meantime I attach an electronic copy and would be very grateful if you could confirm at your earliest convenience that the filing has been accepted as in order.

We hope to have productive dialogue with ExxonMobil on this matter given our now well established engagement relationship and the continued fast pace of change at ExxonMobil’s industry peers on climate-related strategy.

Kind regards,

Edward

Edward Mason
Head of Responsible Investment

January 2, 2018

Mr. Edward Mason
The Church of England
Church House, Great Smith Street
London SW1P 3AZ

Dear Mr. Mason:

This will acknowledge receipt of your letter indicating that you wish to co-file on behalf of Church of England, Church Commissioners (the "Co-filer"), the proposal previously submitted by the New York State Common Retirement Fund (the "Proponent") concerning a Report on Greenhouse Gas Targets (the "Proposal") in connection with ExxonMobil's 2019 annual meeting of shareholders. By copy of a letter from J. P. Morgan, share ownership has been verified.

In light of the guidance in SEC Staff Legal Bulletin No. 14F dealing with co-filers of shareholder proposals, it is important to ensure that the lead filer has clear authority to act on behalf of all co-filers, including with respect to any potential negotiated withdrawal of the Proposal. Unless the lead filer can represent that it holds such authority on behalf of all co-filers, and considering SEC staff guidance, it will be difficult for us to engage in productive dialogue concerning this Proposal.

Note that under Staff Legal Bulletin No. 14F, the SEC will distribute no-action responses under Rule 14a-8 by email to companies and proponents. We encourage all proponents and any co-filers to include an email contact address on any additional correspondence to ensure timely communication in the event the Proposal is subject to a no-action request.

Sincerely,

[Signature]

Dear Mr Hansen

I write as the Chief Investment Officer of the Church of England Pensions Board.

I am authorised to submit the enclosed shareholder proposal to you in accordance with rule 14a-8 of the Securities Exchange Act of 1934 and ask that it be included in your proxy statement for consideration of stockholders at the next annual meeting.

The proposal has been submitted by the New York State Common Retirement Fund, who are the proponents. The Church Commissioners for England are lead co-filers. I confirm that the proponent is authorised to act on behalf of the Board, including with respect to any potential negotiated withdrawal of the proposal.

I enclose a letter from Northern Trust, the Church of England Pensions Board's custodial bank, verifying the Board's ownership of ExxonMobil shares, continually for over one year. The Board intends to hold at least $2,000 worth of these securities through the date of the annual meeting.

Please address email correspondence regarding this proposal to Julie Dunne on julie.dunne@churchofengland.org.

Yours sincerely,

Pierre Jameson
Chief Investment Officer

Mr. Neil Hansen  
Vice President of Investor Relations and Secretary  
ExxonMobil Corporation  
5959 Las Colinas Blvd.  
Irving, TX 75039-2298

Dear Mr. Hansen,

The Sisters of St. Francis of Rochester, Minnesota (Sisters) are long term shareholders of Exxon Mobil Corporation. As a community of women religious, we are concerned for the care of creation and the impact that climate change has on the least of our brothers and sisters. We believe our company should set targets for reducing greenhouse gas emissions to reassure investors that we are properly managing the transition to a low carbon economy.

It is for these reasons, in accordance with Rule 14-a-8 of the General Rules and Regulations of the Securities and Exchange Act of 1934, that we respectfully submit the attached proposal for inclusion in the proxy statement for consideration and action by the shareholders the next annual meeting of the Company. The Sisters has owned at least $2,000 worth of Exxon Mobil Corporation common stock for over one year and will be holding this through next year’s annual meeting, which I plan to attend in person or by proxy. I am authorized by the Sisters to file the enclosed. You will be receiving verification of our ownership of this stock from our Custodian under separate cover.

We are co-filing this resolution with the New York State Common Retirement Fund as the primary lead, who is authorized to modify or withdraw the subject proposal on our behalf.

Please confirm receipt of this letter.

Sincerely,

Sr. Betty Kenny, OSF  
Sisters of St. Francis of Rochester, Minnesota

Enclosure:
RESOLVED: Shareholders request that the Board of Directors, in annual reporting from 2020, include disclosure of short-, medium- and long-term greenhouse gas targets aligned with the greenhouse gas reduction goals established by the Paris Climate Agreement to keep the increase in global average temperature to well below 2°C and to pursue efforts to limit the increase to 1.5°C. This reporting should cover both the corporation's operations and products, omit proprietary information, and be prepared at reasonable cost.

SUPPORTING STATEMENT: It is widely accepted that a transition to a low carbon economy - driven by advances in technology and government policy aligned with the Paris Agreement - is under way. As the use of zero- and low-carbon technology increases due to technical breakthroughs and decreasing costs, and as governments take steps to limit greenhouse gas emissions, fossil fuel companies face enhanced risk. These trends could limit returns to ExxonMobil's investors by increasing the company's operating costs or by reducing demand for its products.

The Grantham Research Institute on Climate Change and the Environment has identified at least 1,512 climate change laws. Growing recognition of the risks from climate change will result in increasing numbers of, stringency of, and support for these laws.

Disclosing targets is an important means of assuring investors of the management of risks associated with climate change and investors welcome ExxonMobil's recent announcement of a 2020 methane emission reduction goal. However, some of ExxonMobil's peer companies, including Total and Shell, have disclosed much longer-term ambitions, including for emissions resulting from the use of their products. Investors participating in Climate Action 100+, representing over $32 trillion in assets under management, are seeking enhanced disclosure of targets and other measures demonstrating company alignment with the Paris Agreement.

To ensure that ExxonMobil is adequately prepared to be successful into the future for its shareholders and other stakeholders we believe it is essential for the company to identify and disclose targets that are aligned with the goals of the Paris Agreement.

Dear Sister Kenny:

This will acknowledge receipt of your letter indicating that you wish to co-file on behalf of Academy of Our Lady of Lourdes (the "Co-filer"), the proposal previously submitted by the the New York State Common Retirement Fund (the "Proponent") concerning a Report on Greenhouse Gas Targets (the "Proposal") in connection with ExxonMobil's 2019 annual meeting of shareholders. However, date deficiencies exist between both the December 7, 2018 submission letter and the December 7, 2018 proof letter, and the submission date and therefore, do not meet requirements, as shown below.

In order to be eligible to submit a shareholder proposal, Rule 14a-8 (copy enclosed) requires a co-filer to submit sufficient proof that he or she has continuously held at least $2,000 in market value, or 1%, of the company's securities entitled to vote on the proposal for at least one year as of the date the shareholder proposal was submitted. For this Proposal, the date of submission is December 11, 2018, which is the date the Proposal was received for delivery by priority mail service.

The Co-filer does not appear in our records as a registered shareholder. Moreover, to date we have not received proof that the Co-filer has satisfied these ownership requirements. To remedy this defect, the Co-filer must submit sufficient proof verifying their continuous ownership of the requisite number of ExxonMobil shares for the one-year period preceding and including December 11, 2016.

As explained in Rule 14a-8(b), sufficient proof must be in the form of:

- a written statement from the "record" holder of the Co-filer's shares (usually a broker or a bank) verifying that the Co-filer continuously held the requisite number of ExxonMobil shares for the one-year period preceding and including December 11, 2018; or

- if the Co-filer has filed with the SEC a Schedule 13D, Schedule 13G, Form 3, Form 4 or Form 5, or amendments to those documents or updated forms, reflecting the Co-filer's ownership of the requisite number of ExxonMobil shares as of or before the date on which the one-year eligibility period begins, a copy of the schedule and/or form, and any subsequent amendments reporting a change in the ownership level and a written statement that the Co-filer continuously held the requisite number of ExxonMobil shares for the one-year period.
If you intend to demonstrate ownership by submitting a written statement from the "record" holder of your shares as set forth in the first bullet point above, please note that most large U.S. brokers and banks deposit their customers' securities with, and hold those securities through, the Depository Trust Company ("DTC"), a registered clearing agency that acts as a securities depository (DTC is also known through the account name of Cede & Co.). Such brokers and banks are often referred to as "participants" in DTC. In Staff Legal Bulletin No. 14F (October 18, 2011) (copy enclosed), the SEC staff has taken the view that only DTC participants should be viewed as "record" holders of securities that are deposited with DTC.

The Co-filer can confirm whether its broker or bank is a DTC participant by asking its broker or bank or by checking the listing of current DTC participants, which may be available on the internet at: http://www.dtcc.com/~media/Files/Downloads/client-center/DTC/alpha.ashx. In these situations, shareholders need to obtain proof of ownership from the DTC participant through which the securities are held, as follows:

- If the Co-filer's broker or bank is a DTC participant, then the Co-filer needs to submit a written statement from its broker or bank verifying that the Co-filer continuously held the requisite number of ExxonMobil shares for the one-year period preceding and including December 11, 2018.

- If the Co-filer's broker or bank is not a DTC participant, then the Co-filer needs to submit proof of ownership from the DTC participant through which the securities are held verifying that the Co-filer continuously held the requisite number of ExxonMobil shares for the one-year period preceding and including December 11, 2018. The Co-filer should be able to find out who this DTC participant is by asking the Co-filer's broker or bank. If the Co-filer's broker is an introducing broker, the Co-filer may also be able to learn the identity and telephone number of the DTC participant through the Co-filer's account statements because the clearing broker identified on the Co-filer's account statements will generally be a DTC participant. If the DTC participant that holds the Co-filer's shares knows the Co-filer's broker's or bank's holdings, but does not know the Co-filer's holdings, the Co-filer needs to satisfy the proof of ownership requirement by obtaining and submitting two proof of ownership statements verifying that for the one-year period preceding and including December 11, 2018, the required amount of securities were continuously held – one from the Co-filer's broker or bank, confirming the Co-filer's ownership, and the other from the DTC participant, confirming the broker or bank's ownership.

Pursuant to SEC Staff Legal Bulletin 14I, the submission of a proposal by proxy (i.e., by a representative rather than by the shareholder directly) must include proper documentation describing the shareholder's delegation of authority to the proxy. This documentation must:

- identify the shareholder-proponent and the person or entity selected as proxy;
- identify the company to which the proposal is directed;
- identify the annual or special meeting for which the proposal is submitted;
- identify the specific proposal to be submitted (e.g., proposal to lower the threshold for calling a special meeting from 25% to 10%); and
- be signed and dated by the shareholder.
The SEC's rules require that any response to this letter must be postmarked or transmitted electronically to us no later than 14 calendar days from the date this letter is received. Please mail any response to me at ExxonMobil at the address shown above. Alternatively, you may send your response to me via facsimile at 972-940-6748, or by email to jeanine.gilbert@exxonmobil.com.

In light of the SEC Staff Legal Bulletin No. 14F dealing with Co-filers of shareholder proposals, it is important to ensure that the lead filer has clear authority to act on behalf of all Co-filers, including with respect to any potential negotiated withdrawal of the Proposal. Unless the lead filer can represent that it holds such authority on behalf of all Co-filers, and considering SEC staff guidance, it will be difficult for us to engage in productive dialogue concerning this Proposal.

Note that under Staff Legal Bulletin No. 14F, the SEC will distribute no-action responses under Rule 14a-8 by email to companies and proponents. We encourage all proponents and co-filers to include an email contact address on any additional correspondence to ensure timely communication in the event the Proposal is subject to a no-action request.

Sincerely,

Sincerely,

SME/Jlg

Neil Hansen
Vice President - Investor Relations and Secretary
ExxonMobil Corporation
5959 Las Colinas Boulevard
Irving, TX 75039-2298

Dear Mr. Hansen:

The Portfolio Advisory Board for the Adrian Dominican Sisters has long been concerned not only with the financial returns of its investments, but also with the social and ethical implications of its investments. We believe that a demonstrated corporate responsibility in matters of the environment, social and governance concerns fosters long-term business success. The Adrian Dominican Sisters, a long-term investor, are currently the beneficial owner of shares of ExxonMobil Corporation.

The resolution requests annual reporting from 2020, to include disclosure of short-, medium- and long-term greenhouse gas targets aligned with the greenhouse gas reduction goals established by the Paris Climate Agreement to keep the increase in global average temperature to well below 2°C and to pursue efforts to limit the increase to 1.5°C. This reporting should cover both the corporation’s operations and products.

The Adrian Dominican Sisters are co-filing the enclosed shareholder proposal with lead filer, New York State Common Retirement Fund (New York State), for inclusion in the 2019 proxy statement, in accordance with Rule 14a-8 of the General Rules and Regulations of the Securities Exchange Act of 1934. We have been a shareholder continuously for more than one year and will continue to invest in these through the annual shareholders’ meeting. The verification of ownership by our custodian, a DTC participant, is enclosed. New York State may withdraw the proposal on our behalf. We respectfully request direct communications from ExxonMobil, and to have our supporting statement and organization name included in the proxy statement.

We look forward to having productive conversations with the company. Please direct all future correspondence, including an email acknowledgement of receipt of this letter and resolution, to Mary Minette, representative of the Adrian Dominican Sisters, email: mmminette@mercyinvestments.org; phone: 703-507-9651; address: 2039 No. Geyer Rd., St. Louis, MO 63131.

Best regards,

Re: Shareholder Proposal for 2019 Annual Meeting

Dear Mr. Hansen,

Enclosed please find our letter co-filing the attached proposal to be included in the proxy statement of Exxon Mobil Corporation ("Exxon Mobil" or the "Company") for its 2019 annual meeting of stockholders.

Zevin Asset Management is a socially responsible investment manager which integrates financial and environmental, social, and governance research in making investment decisions on behalf of our clients. We are co-filing the attached proposal asking for Exxon Mobil to disclose targets for its operational and product greenhouse gas (GHG) emissions aligned with the GHG reduction goals established by the Paris Climate Agreement to keep the increase in global average temperature well below 2°C and to pursue efforts to limit the increase to 1.5°C. Adopting the attached proposal would help Exxon Mobil reduce long-term risks stemming from climate change, and it is warranted in view of the urgency of climate change and recent moves among leading energy companies, among them Shell’s announcement regarding goals to reduce scope 3 GHG intensity.

We are co-filing this shareholder resolution on behalf of our client Alison S. Gottlieb Revocable Trust (the Proponent), which has continuously held, for at least one year of the date hereof, 148 shares of the Company’s stock, which would meet the requirements of Rule 14a-8 under the Securities Exchange Act of 1934, as amended. Verification of this ownership from our client’s custodian is enclosed. That documentation shows that the Proponent is beneficial owner of the above mentioned Exxon Mobil shares.

In consultation with our client (the Proponent), we confirm that the Proponent intends to continue to hold the requisite number of shares through the date of the Company’s 2019 annual meeting of stockholders.

Zevin Asset Management, LLC is a co-filer of this proposal. The New York State Common Retirement Fund and Church Commissioners for England are the lead filers of this resolution, and they can act on our behalf in withdrawal of this resolution. A representative
of the lead filers will be present at the stockholder meeting to present the proposal. We would appreciate being copied on any correspondence related to this matter.

Zevin Asset Management, LLC welcomes the opportunity to discuss the proposal with representatives of the Company. Please confirm receipt to me at 617-742-6666 or pat@zevin.com.

Sincerely,

[Signature]

Pat Miguel Tomaino
Director of Socially Responsible Investing
Zevin Asset Management, LLC

CC: Jeanine Gilbert, Shareholder Relations, Exxon Mobil

To Whom It May Concern:

This is to confirm that DTC participant (number 0221) UBS Financial Services Inc is the custodian for 148 shares of common stock in Exxon Mobil (XOM) owned by the Alison S. Gottlieb Revocable Trust.

We confirm that the above account has beneficial ownership of at least $2,000 in market value of the voting securities of XOM and that such beneficial ownership has continuously existed for one or more years in accordance with rule 14a-8(a)(1) of the Securities Exchange Act of 1934.

The shares are held at Depository Trust Company under the Nominee name of UBS Financial Services.

This letter serves as confirmation that the Alison S. Gottlieb Revocable Trust is the beneficial owner of the above referenced stock.

Zevin Asset Management, LLC is the Investment advisor to the Alison S. Gottlieb Revocable Trust and is planning to co-file a shareholder resolution on the Alison S. Gottlieb Revocable Trust’s behalf.

Sincerely,

Kelley A. Bowker
The Kolton Wood Group
Good evening,

On behalf of our client Alison S. Gottlieb Revocable Trust, Zevin Asset Management is co-filing the attached shareholder proposal regarding GHG emissions targets.

Please find the attached packet of materials with our co-filing letter, proposal text originally submitted by The New York State Common Retirement Fund and Church Commissioners for England, and custodial proof of ownership.

Your office should also receive these documents tomorrow via overnight UPS. Many thanks for confirming receipt at your earliest convenience.

Please contact me at this email address with any correspondence regarding this proposal.

My best,

PMT

Dear Mr. Hansen,

Enclosed please find our letter co-filing the attached proposal to be included in the proxy statement of Exxon Mobil Corporation ("Exxon Mobil" or the "Company") for its 2019 annual meeting of stockholders.

Zevin Asset Management is a socially responsible investment manager which integrates financial and environmental, social, and governance research in making investment decisions on behalf of our clients. We are co-filing the attached proposal asking for Exxon Mobil to disclose targets for its operational and product greenhouse gas (GHG) emissions aligned with the GHG reduction goals established by the Paris Climate Agreement to keep the increase in global average temperature well below 2°C and to pursue efforts to limit the increase to 1.5°C. Adopting the attached proposal would help Exxon Mobil reduce long-term risks stemming from climate change, and it is warranted in view of the urgency of climate change and recent moves among leading energy companies, among them Shell’s announcement regarding goals to reduce scope 3 GHG intensity.

We are co-filing this shareholder resolution on behalf of our client Alison S. Gottlieb Revocable Trust (the Proponent), which has continuously held, for at least one year of the date hereof, 148 shares of the Company's stock, which would meet the requirements of Rule 14a-8 under the Securities Exchange Act of 1934, as amended. Verification of this ownership from our client's custodian is enclosed. That documentation shows that the Proponent is beneficial owner of the above mentioned Exxon Mobil shares.

In consultation with our client (the Proponent), we confirm that the Proponent intends to continue to hold the requisite number of shares through the date of the Company's 2019 annual meeting of stockholders.

Zevin Asset Management, LLC is a co-filer of this proposal. The New York State Common Retirement Fund and Church Commissioners for England are the lead filers of this resolution, and they can act on our behalf in withdrawal of this resolution. A representative
of the lead filers will be present at the stockholder meeting to present the proposal. We would appreciate being copied on any correspondence related to this matter.

Zevin Asset Management, LLC welcomes the opportunity to discuss the proposal with representatives of the Company. Please confirm receipt to me at 617-742-6666 or pat@zevin.com.

Sincerely,

Pat Miguel Tomaino
Director of Socially Responsible Investing
Zevin Asset Management, LLC

CC: Jeanine Gilbert, Shareholder Relations, Exxon Mobil
RESOLVED: Shareholders request that the Board of Directors, in annual reporting from 2020, include disclosure of short-, medium- and long-term greenhouse gas targets aligned with the greenhouse gas reduction goals established by the Paris Climate Agreement to keep the increase in global average temperature to well below 2°C and to pursue efforts to limit the increase to 1.5°C. This reporting should cover both the corporation’s operations and products, omit proprietary information, and be prepared at reasonable cost.

SUPPORTING STATEMENT: It is widely accepted that a transition to a low carbon economy - driven by advances in technology and government policy aligned with the Paris Agreement - is under way. As the use of zero- and low-carbon technology increases due to technical breakthroughs and decreasing costs, and as governments take steps to limit greenhouse gas emissions, fossil fuel companies face enhanced risk. These trends could limit returns to ExxonMobil’s investors by increasing the company’s operating costs or by reducing demand for its products.

The Grantham Research Institute on Climate Change and the Environment has identified at least 1,512 climate change laws. Growing recognition of the risks from climate change will result in increasing numbers of, stringency of, and support for these laws.

Disclosing targets is an important means of assuring investors of the management of risks associated with climate change and investors welcome ExxonMobil’s recent announcement of a 2020 methane emission reduction goal. However, some of ExxonMobil’s peer companies, including Total and Shell, have disclosed much longer-term ambitions, including for emissions resulting from the use of their products. Investors participating in Climate Action 100+, representing over $32 trillion in assets under management, are seeking enhanced disclosure of targets and other measures demonstrating company alignment with the Paris Agreement.

To ensure that ExxonMobil is adequately prepared to be successful into the future for its shareholders and other stakeholders we believe it is essential for the company to identify and disclose targets that are aligned with the goals of the Paris Agreement.

December 28, 2018

Mr. Pat Miguel Tomaino
Director of Socially Responsible Investing
Zevin Asset Management, LLC
2 Oliver Street, Suite 806
Boston, MA 02109

Dear Mr. Tomaino:

This will acknowledge receipt of your letter indicating that you wish to co-file on behalf of the Alison S. Gottlieb Revocable Trust (the "Co-filer"), the proposal previously submitted by the New York State Common Retirement Fund (the "Proponent") concerning a Report on Greenhouse Gas Targets (the "Proposal") in connection with ExxonMobil’s 2019 annual meeting of shareholders. By copy of a letter from UBS, share ownership has been verified.

In light of the guidance in SEC Staff Legal Bulletin No. 14F dealing with co-filers of shareholder proposals, it is important to ensure that the lead filer has clear authority to act on behalf of all co-filers, including with respect to any potential negotiated withdrawal of the Proposal. Unless the lead filer can represent that it holds such authority on behalf of all co-filers, and considering SEC staff guidance, it will be difficult for us to engage in productive dialogue concerning this Proposal.

Note that under Staff Legal Bulletin No. 14F, the SEC will distribute no-action responses under Rule 14a-8 by email to companies and proponents. We encourage all proponents and any co-filers to include an email contact address on any additional correspondence to ensure timely communication in the event the Proposal is subject to a no-action request.

Sincerely,

[Signature]

Dear Mr. Hansen:

As You Sow is co-filing a shareholder proposal on behalf of Anne F. Bartol 12/28/60 Trust, a shareholder of Exxon Mobil Corporation, for action at the next annual meeting of Exxon Mobil. The Proponent of the proposal has submitted the enclosed shareholder proposal for inclusion in the 2019 proxy statement for consideration by shareholders in accordance with Rule 14a-8 of the General Rules and Regulations of the Securities Exchange Act of 1934.

We are co-filing this resolution with The New York State Common Retirement Fund, who is the lead filer of the proposal and is authorized to act on As You Sow's behalf with regard to withdrawal of the proposal.

A letter from the Proponent authorizing As You Sow to act on its behalf is enclosed. A representative of the Proponent will attend the stockholders' meeting to move the resolution as required.

Sincerely,

Re: Authorization to File Shareholder Resolution

Dear Mr. Behar,

The undersigned (the "Stockholder") authorizes As You Sow to file or co-file a shareholder resolution on Stockholder's behalf with Exxon Mobil Corporation (the "Company") for inclusion in the Company's 2019 proxy statement, in accordance with Rule 14a-8 of the General Rules and Regulations of the Securities and Exchange Act of 1934. The resolution at issue relates to a proposal to disclose Paris compliant emissions targets.

The Stockholder has continuously owned over $2,000 worth of Company stock, with voting rights, for over a year. The Stockholder intends to hold the required amount of stock through the date of the company's annual meeting in 2019.

The Stockholder gives As You Sow the authority to address on Stockholder's behalf any and all aspects of the shareholder resolution, including designating another entity as lead filer and representative of the shareholder. The Stockholder understands that the Stockholder's name may appear on the company's proxy statement as the filer of the aforementioned resolution and that the media may mention the Stockholder's name in relation to the resolution.

The shareholder further authorizes As You Sow to send a letter of support of the resolution on Stockholder's behalf concerning the resolution.

Sincerely,

Anne F Bartol 12/28/60 Trust

"Building a Safe, Just and Sustainable World since 1992"
VIA UPS – OVERNIGHT DELIVERY

December 28, 2018

Ms. Danielle Fugere
President
As You Sow
1511 Telegraph Ave., Suite 1450
Oakland, CA 94612

Dear Ms. Fugere:

This will acknowledge receipt of your letter indicating that you wish to co-file on behalf of Ann F. Bartol (the "Co-filer"), the proposal previously submitted by the New York State Common Retirement Fund (the "Proponent") concerning a Report on Greenhouse Gas Targets (the "Proposal") in connection with ExxonMobil’s 2019 annual meeting of shareholders. However, proof of share ownership was not included with your December 12, 2018, submission.

In order to be eligible to submit a shareholder proposal, Rule 14a-8 (copy enclosed) requires a co-filer to submit sufficient proof that he or she has continuously held at least $2,000 in market value, or 1%, of the company’s securities entitled to vote on the proposal for at least one year as of the date the shareholder proposal was submitted. For this Proposal, the date of submission is December 12, 2018, which is the date the Proposal was received by the overnight delivery service.

The Co-filer does not appear in our records as a registered shareholder. Moreover, to date we have not received proof that the Co-filer has satisfied these ownership requirements. To remedy this defect, the Co-filer must submit sufficient proof verifying their continuous ownership of the requisite number of ExxonMobil shares for the one-year period preceding and including December 12, 2018.

As explained in Rule 14a-8(b), sufficient proof must be in the form of:

- a written statement from the “record” holder of the Co-filer’s shares (usually a broker or a bank) verifying that the Co-filer continuously held the requisite number of ExxonMobil shares for the one-year period preceding and including December 12, 2018; or

- if the Co-filer has filed with the SEC a Schedule 13D, Schedule 13G, Form 3, Form 4 or Form 5, or amendments to those documents or updated forms, reflecting the Co-filer’s ownership of the requisite number of ExxonMobil shares as of or before the date on which the one-year eligibility period begins, a copy of the schedule and/or form, and any subsequent amendments reporting a change in the ownership level and a written statement that the Co-filer continuously held the requisite number of ExxonMobil shares for the one-year period.
If you intend to demonstrate ownership by submitting a written statement from the "record" holder of your shares as set forth in the first bullet point above, please note that most large U.S. brokers and banks deposit their customers' securities with, and hold those securities through, the Depository Trust Company ("DTC"), a registered clearing agency that acts as a securities depository (DTC is also known through the account name of Cede & Co.). Such brokers and banks are often referred to as "participants" in DTC. In Staff Legal Bulletin No. 14F (October 18, 2011) (copy enclosed), the SEC staff has taken the view that only DTC participants should be viewed as "record" holders of securities that are deposited with DTC.

The Co-filer can confirm whether its broker or bank is a DTC participant by asking its broker or bank or by checking the listing of current DTC participants, which may be available on the internet at: http://www.dtcc.com/~media/Files/Downloads/client-center/DTC/alpha.aspx. In these situations, shareholders need to obtain proof of ownership from the DTC participant through which the securities are held, as follows:

- If the Co-filer's broker or bank is a DTC participant, then the Co-filer needs to submit a written statement from its broker or bank verifying that the Co-filer continuously held the requisite number of ExxonMobil shares for the one-year period preceding and including December 12, 2018.

- If the Co-filer's broker or bank is not a DTC participant, then the Co-filer needs to submit proof of ownership from the DTC participant through which the securities are held verifying that the Co-filer continuously held the requisite number of ExxonMobil shares for the one-year period preceding and including December 12, 2018. The Co-filer should be able to find out who this DTC participant is by asking the Co-filer's broker or bank. If the Co-filer's broker is an introducing broker, the Co-filer may also be able to learn the identity and telephone number of the DTC participant through the Co-filer's account statements because the clearing broker identified on the Co-filer's account statements will generally be a DTC participant. If the DTC participant that holds the Co-filer's shares knows the Co-filer's broker's or bank's holdings, but does not know the Co-filer's holdings, the Co-filer needs to satisfy the proof of ownership requirement by obtaining and submitting two proof of ownership statements verifying that for the one-year period preceding and including December 12, 2018, the required amount of securities were continuously held – one from the Co-filer's broker or bank, confirming the Co-filer's ownership, and the other from the DTC participant, confirming the broker or bank's ownership.

Pursuant to SEC Staff Legal Bulletin 14F, the submission of a proposal by proxy (i.e., by a representative rather than by the shareholder directly) must include proper documentation describing the shareholder's delegation of authority to the proxy. This documentation must:

- identify the shareholder-proponent and the person or entity selected as proxy;
- identify the company to which the proposal is directed;
- identify the annual or special meeting for which the proposal is submitted;
- identify the specific proposal to be submitted (e.g., proposal to lower the threshold for calling a special meeting from 25% to 10%); and
- be signed and dated by the shareholder.
The SEC's rules require that any response to this letter must be postmarked or transmitted electronically to us no later than 14 calendar days from the date this letter is received. Please mail any response to me at ExxonMobil at the address shown above. Alternatively, you may send your response to me via facsimile at 972-940-6748, or by email to jeanine.gilbert@exxonmobil.com.

In light of the SEC Staff Legal Bulletin No. 14F dealing with Co-filers of shareholder proposals, it is important to ensure that the lead filer has clear authority to act on behalf of all Co-filers, including with respect to any potential negotiated withdrawal of the Proposal. Unless the lead filer can represent that it holds such authority on behalf of all Co-filers, and considering SEC staff guidance, it will be difficult for us to engage in productive dialogue concerning this Proposal.

Note that under Staff Legal Bulletin No. 14F, the SEC will distribute no-action responses under Rule 14a-8 by email to companies and proponents. We encourage all proponents and co-filers to include an email contact address on any additional correspondence to ensure timely communication in the event the Proposal is subject to a no-action request.

Sincerely,

[Signature]

RESOLVED: Shareholders request that the Board of Directors, in annual reporting from 2020, include disclosure of short-, medium- and long-term greenhouse gas targets aligned with the greenhouse gas reduction goals established by the Paris Climate Agreement to keep the increase in global average temperature to well below 2°C and to pursue efforts to limit the increase to 1.5°C. This reporting should cover both the corporation’s operations and products, omit proprietary information, and be prepared at reasonable cost.

SUPPORTING STATEMENT: It is widely accepted that a transition to a low carbon economy - driven by advances in technology and government policy aligned with the Paris Agreement - is under way. As the use of zero- and low-carbon technology increases due to technical breakthroughs and decreasing costs, and as governments take steps to limit greenhouse gas emissions, fossil fuel companies face enhanced risk. These trends could limit returns to ExxonMobil’s investors by increasing the company’s operating costs or by reducing demand for its products.

The Grantham Research Institute on Climate Change and the Environment has identified at least 1,512 climate change laws. Growing recognition of the risks from climate change will result in increasing numbers of, stringency of, and support for these laws.

Disclosing targets is an important means of assuring investors of the management of risks associated with climate change and investors welcome ExxonMobil’s recent announcement of a 2020 methane emission reduction goal. However, some of ExxonMobil’s peer companies, including Total and Shell, have disclosed much longer-term ambitions, including for emissions resulting from the use of their products. Investors participating in Climate Action 100+, representing over $32 trillion in assets under management, are seeking enhanced disclosure of targets and other measures demonstrating company alignment with the Paris Agreement.

To ensure that ExxonMobil is adequately prepared to be successful into the future for its shareholders and other stakeholders we believe it is essential for the company to identify and disclose targets that are aligned with the goals of the Paris Agreement.
November 10, 2018

Andrew Behar
CEO
As You Sow
1611 Telegraph Ave., Ste. 1450
Oakland, CA 94612

Re: Authorization to File Shareholder Resolution

Dear Mr. Behar,

The undersigned (the “Stockholder”) authorizes As You Sow to file or co-file a shareholder resolution on Stockholder's behalf with Exxon Mobil Corporation (the “Company”) for inclusion in the Company’s 2019 proxy statement, in accordance with Rule 14a-8 of the General Rules and Regulations of the Securities and Exchange Act of 1934. The resolution at issue relates to a proposal to disclose Paris compliant emissions targets.

The Stockholder has continuously owned over $2,000 worth of Company stock, with voting rights, for over a year. The Stockholder intends to hold the required amount of stock through the date of the company’s annual meeting in 2019.

The Stockholder gives As You Sow the authority to address on Stockholder’s behalf any and all aspects of the shareholder resolution, including designating another entity as lead filer and representative of the shareholder. The Stockholder understands that the Stockholder’s name may appear on the company’s proxy statement as the filer of the aforementioned resolution and that the media may mention the Stockholder’s name in relation to the resolution.

The shareholder further authorizes As You Sow to send a letter of support of the resolution on Stockholder’s behalf concerning the resolution.

Sincerely,

Anne Barton Butlerfield
Trustee
Anne F Barton 12/28/60 Trust
Ms. Danielle Fugere  
President  
As You Sow  
1611 Telegraph Ave., Suite 1450  
Oakland, CA 94612  

Dear Ms. Fugere:

This will acknowledge receipt of your letter indicating that you wish to co-file on behalf of the Ann F. Bartol 12/28/60 Trust (the "Co-filer"), the proposal previously submitted by the New York State Common Retirement Fund (the "Proponent") concerning a Report on Greenhouse Gas Targets (the "Proposal") in connection with ExxonMobil's 2019 annual meeting of shareholders. By copy of a letter from BNY Mellon, share ownership has been verified.

In light of the guidance in SEC Staff Legal Bulletin No. 14F dealing with co-filers of shareholder proposals, it is important to ensure that the lead filer has clear authority to act on behalf of all co-filers, including with respect to any potential negotiated withdrawal of the Proposal. Unless the lead filer can represent that it holds such authority on behalf of all co-filers, and considering SEC staff guidance, it will be difficult for us to engage in productive dialogue concerning this Proposal.

Note that under Staff Legal Bulletin No. 14F, the SEC will distribute no-action responses under Rule 14a-8 by email to companies and proponents. We encourage all proponents and any co-filers to include an email contact address on any additional correspondence to ensure timely communication in the event the Proposal is subject to a no-action request.

Sincerely,

[Signature]

December 13, 2018

Mr. Jeffrey J. Woodbury,
Secretary,
Exxon Mobil Corporation,
5959 Las Colinas Boulevard,
Irving,
TX,
75039-2298

Dear Mr. Woodbury,

Re: Shareholder Proposal for Circulation at 2019 Annual General Meeting (AGM)

I am writing to co-file the enclosed shareholder proposal with the lead filers, the New York State Common Retirement Fund and the Church Commissioners for England.

We hereby request that the proposal and the enclosed supporting statement be included in, or attached to, the management proxy circular to be issued in respect of the 2019 Annual General Meeting (AGM) for consideration by shareholders. We further request that the proposal be identified on the AGM’s form of proxy as a matter to be voted for or against by the beneficial and registered shareholders of ExxonMobil Corporation (the “Company”).

Attached is documentation from Northern Trust Company, Canada confirming that British Columbia Investment Management Corporation (“BCI”) has the requisite number of shares in the Company, and that it has held stock in the Company for a period of six months. BCI will continue to hold shares in the Company through to the date of the AGM.

Please be advised that BCI delegates authority for negotiated withdrawal to the lead filer of this proposal.

We trust that you will find the above to be in order. Should you have any questions concerning this letter, please direct all questions and correspondence regarding the Proposal to the undersigned.

Sincerely,

[Signature]

Ms. Jennifer Coulson
Vice President, ESG
jennifer.coulson@bci.ca
RESOLVED: Shareholders request that the Board of Directors, in annual reporting from 2020, include disclosure of short-, medium- and long-term greenhouse gas targets aligned with the greenhouse gas reduction goals established by the Paris Climate Agreement to keep the increase in global average temperature to well below 2°C and to pursue efforts to limit the increase to 1.5°C. This reporting should cover both the corporation’s operations and products, omit proprietary information, and be prepared at reasonable cost.

SUPPORTING STATEMENT: It is widely accepted that a transition to a low carbon economy - driven by advances in technology and government policy aligned with the Paris Agreement - is underway. As the use of zero- and low-carbon technology increases due to technical breakthroughs and decreasing costs, and as governments take steps to limit greenhouse gas emissions, fossil fuel companies face enhanced risk. These trends could limit returns to ExxonMobil’s investors by increasing the company’s operating costs or by reducing demand for its products.

The Grantham Research Institute on Climate Change and the Environment has identified at least 1,512 climate change laws. Growing recognition of the risks from climate change will result in increasing numbers of, stringency of, and support for these laws.

Disclosing targets is an important means of assuring investors of the management of risks associated with climate change and investors welcome ExxonMobil’s recent announcement of a 2020 methane emission reduction goal. However, some of ExxonMobil’s peer companies, including Total and Shell, have disclosed much longer-term ambitions, including for emissions resulting from the use of their products. Investors participating in Climate Action 100+, representing over $32 trillion in assets under management, are seeking enhanced disclosure of targets and other measures demonstrating company alignment with the Paris Agreement.

To ensure that ExxonMobil is adequately prepared to be successful into the future for its shareholders and other stakeholders we believe it is essential for the company to identify and disclose targets that are aligned with the goals of the Paris Agreement.

RE: EXXON MOBIL CORP COM

ISIN: US30231G1022
CUSIP: 30231G102

To Whom It May Concern:

Please be advised that we wish to confirm that at least 1,742,731 shares of the above security were beneficially owned by British Columbia Investment Management Corporation for a period of six months (June 30, 2018 to December 7, 2018) and held in the name of The Northern Trust Company through The Depository Trust & Clearing Corporation 02669. In addition, we confirm that British Columbia Investment Management Corporation holds 1,742,731 shares as of December 7, 2018.

British Columbia Investment Management Corporation has the authority to vote these shares at the upcoming 2018 annual general meeting of shareholders on the condition that they are still holding these shares as of the meeting record date.

Please do not hesitate to contact me if you have any questions.

Sincerely,

Kimi Young

Message

Dear Jeff,

Please find enclosed the relevant documentation for BCI's co-filing of a shareholder proposal at the 2019 ExxonMobil annual general meeting.

This documentation has also been sent to you via email.

I would be grateful if you could confirm receipt of this.

Kind regards,

Andrew Spurr
andrew.spurr@bci.ca

Ms. Jennifer Coulson  
Vice President, ESG  
British Columbia Investment Management Corporation  
750 Pandora Ave., Victoria BC  
V8W 0E4, Canada

Dear Ms. Coulson,

This will acknowledge receipt of your letter indicating that you wish to co-file on behalf of British Columbia Investment Management Corporation (the "Co-filer"), the proposal previously submitted by the New York State Common Retirement Fund (the "PropONENT") concerning a Report on Greenhouse Gas Targets (the "Proposal") in connection with ExxonMobil's 2019 annual meeting of shareholders. However, several deficiencies exist with the December 11, 2018, letter from Northern Trust and therefore, do not meet requirements. First, the Northern Trust letter verifies your ownership as of December 13, 2018 instead of the date of submission of December 13, 2018. Second, the Northern Trust letter verifies share ownership from June 30, 2018 thru December 7, 2018 instead of the one-year period preceding and including the December 13, 2018, date of your submission. Further information on each of these requirements is detailed below.

In order to be eligible to submit a shareholder proposal, Rule 14a-8 (copy enclosed) requires a co-filer to submit sufficient proof that he or she has continuously held at least $2,000 in market value, or 1%, of the company's securities entitled to vote on the proposal for at least one year as of the date the shareholder proposal was submitted. For this Proposal, the date of submission is December 13, 2018 which is the date the Proposal was received electronically by facsimile.

The Co-filer does not appear in our records as a registered shareholder. Moreover, to date we have not received proof that the Co-filer has satisfied these ownership requirements. To remedy this defect, the Co-filer must submit sufficient proof verifying their continuous ownership of the requisite number of ExxonMobil shares for the one-year period preceding and including December 13, 2018.

As explained in Rule 14a-8(b), sufficient proof must be in the form of:

- a written statement from the "record" holder of the Co-filer's shares (usually a broker or a bank) verifying that the Co-filer continuously held the requisite number of ExxonMobil shares for the one-year period preceding and including December 13, 2018; or

- if the Co-filer has filed with the SEC a Schedule 13D, Schedule 13G, Form 3, Form 4 or Form 5, or amendments to those documents or updated forms, reflecting the Co-filer's ownership of the requisite number of ExxonMobil shares as of or before the date on which the one-year eligibility period begins, a copy of the schedule and/or form, and any subsequent amendments reporting a change in the ownership level and a written statement that the Co-filer continuously held the requisite number of ExxonMobil shares for the one-year period.
If you intend to demonstrate ownership by submitting a written statement from the "record" holder of your shares as set forth in the first bullet point above, please note that most large U.S. brokers and banks deposit their customers' securities with, and hold those securities through, the Depository Trust Company ("DTC"), a registered clearing agency that acts as a securities depository (DTC is also known through the account name of Cede & Co.). Such brokers and banks are often referred to as "participants" in DTC. In Staff Legal Bulletin No. 14F (October 18, 2011) (copy enclosed), the SEC staff has taken the view that only DTC participants should be viewed as "record" holders of securities that are deposited with DTC.

The Co-filer can confirm whether its broker or bank is a DTC participant by asking its broker or bank or by checking the listing of current DTC participants, which may be available on the internet at: http://www.dtcc.com/~media/Files/Downloads/client-center/DTC/alpha.ashx. In these situations, shareholders need to obtain proof of ownership from the DTC participant through which the securities are held, as follows:

- If the Co-filer's broker or bank is a DTC participant, then the Co-filer needs to submit a written statement from its broker or bank verifying that the Co-filer continuously held the requisite number of ExxonMobil shares for the one-year period preceding and including December 13, 2018.

- If the Co-filer's broker or bank is not a DTC participant, then the Co-filer needs to submit proof of ownership of the DTC participant through which the securities are held verifying that the Co-filer continuously held the requisite number of ExxonMobil shares for the one-year period preceding and including December 13, 2018. The Co-filer should be able to find out who this DTC participant is by asking the Co-filer's broker or bank. If the Co-filer's broker is an introducing broker, the Co-filer may also be able to learn the identity and telephone number of the DTC participant through the Co-filer's account statements, because the clearing broker identified on the Co-filer's account statements will generally be a DTC participant. If the DTC participant that holds the Co-filer's shares knows the Co-filer's broker's or bank's holdings, but does not know the Co-filer's holdings, the Co-filer needs to satisfy the proof of ownership requirement by obtaining and submitting two proof of ownership statements verifying that, for the one-year period preceding and including December 13, 2018, the required amount of securities were continuously held – one from the Co-filer's broker or bank confirming the Co-filer's ownership, and the other from the DTC participant confirming the broker or bank's ownership.

Pursuant to SEC Staff Legal Bulletin 14F, the submission of a proposal by proxy (i.e., by a representative rather than by the shareholder directly) must include proper documentation describing the shareholder's delegation of authority to the proxy. This documentation must:

- identify the shareholder-proponent and the person or entity selected as proxy;
- identify the company to which the proposal is directed;
- identify the annual or special meeting for which the proposal is submitted;
- identify the specific proposal to be submitted (e.g., proposal to lower the threshold for calling a special meeting from 25% to 10%); and
- be signed and dated by the shareholder.
The SEC's rules require that any response to this letter must be postmarked or transmitted electronically to us no later than 14 calendar days from the date this letter is received. Please mail any response to me at ExxonMobil at the address shown above. Alternatively, you may send your response to me via facsimile at 972-940-6748, or by email to jeanine.gilbert@exxonmobil.com.

In light of the SEC Staff Legal Bulletin No. 14F dealing with Co-filers of shareholder proposals, it is important to ensure that the lead filer has clear authority to act on behalf of all Co-filers, including with respect to any potential negotiated withdrawal of the Proposal. Unless the lead filer can represent that it holds such authority on behalf of all Co-filers, and considering SEC staff guidance, it will be difficult for us to engage in productive dialogue concerning this Proposal.

Note that under Staff Legal Bulletin No. 14F, the SEC will distribute no-action responses under Rule 14a-8 by email to companies and proponents. We encourage all proponents and co-filers to include an email contact address on any additional correspondence to ensure timely communication in the event the Proposal is subject to a no-action request.

Sincerely,

[Signature]

Hi Sherry,

I received your letter dated December 30 about the deficiencies in our original submission of a shareholder proposal on December 13, 2018. For your records, we just received it yesterday even though it was noted that it was sent as overnight delivery.

The attached letter from our custodian who is a DTC participant should address the deficiencies you point out in your letter, namely the inclusion of the submission date in the minimum one year period of ownership as well as confirmation that we held these shares for a continuous period. I also re-sending the original shareholder proposal that we are co-filing and would reiterate that we are delegating the lead filer to act on behalf of the co-filers as stated in our original cover letter.

Please confirm that this meets your requirements. I look forward to hearing from you.

Regards,
Jennifer

To whom it may concern:

Arjuna Capital is an investment firm focused on sustainable and impact investing.

I am hereby authorized to notify you of our intention to co-file the enclosed shareholder resolution with Exxon Mobil Corporation on behalf of our client Jonathan M. Beall. Arjuna Capital delegates authority for a negotiated withdrawal to lead filers the New York State Common Retirement Fund and Church Commissioners for England. Arjuna Capital submits this shareholder proposal for inclusion in the 2019 proxy statement, in accordance with Rule 14a-8 of the General Rules and Regulations of the Securities and Exchange Act of 1934 (17 C.F.R. § 240.14a-8). Per Rule 14a-8, Jonathan M. Beall holds more than $2,000 of XOM common stock, acquired more than one year prior to today's date and held continuously for that time. Our client will remain invested in this position continuously through the date of the 2019 annual meeting.

Enclosed please find verification of this position and letter from Jonathan M. Beall authorizing Arjuna Capital to undertake this filing on his behalf. We will send a representative to the stockholders' meeting to move the shareholder proposal as required by the SEC rules.

We would welcome discussion with Exxon Mobil Corporation about the contents of our proposal.

Please direct any written communications to me at the address below or to natasha@arjuna-capital.com. Please also confirm receipt of this letter via email.

Sincerely,

Natasha Lamb
Managing Partner
Arjuna Capital

Dear Ms. Lamb,

I hereby authorize Arjuna Capital to file a shareholder proposal on my behalf at Exxon Mobile Corporation (XOM) on disclosure of short-, medium- and long-term greenhouse gas targets aligned with the greenhouse gas reduction goals established by the Paris Climate Agreement for the company’s annual meeting in 2019.

I am the beneficial owner of more than $2,000 worth of common stock in Exxon Mobile Corporation (XOM) that I have held continuously for more than one year. I intend to hold the aforementioned shares of stock through the date of the company's annual meeting in 2019.

I specifically give Arjuna Capital full authority to deal, on my behalf, with any and all aspects of the aforementioned shareholder proposal. I understand that my name may appear on the corporation's proxy statement as the filer of the aforementioned proposal.

Sincerely,

Jonathan M. Beall

Ms. Natasha Lamb
Managing Partner
Arjuna Capital
1 Elm Street
Manchester, MA 01944

Dear Ms. Lamb:

This will acknowledge receipt of your letter indicating that you wish to co-file on behalf of Jonathan M. Beall (the "Co-filer"), the proposal previously submitted by the New York State Common Retirement Fund (the "PropONENT") concerning a Report on Greenhouse Gas Targets (the "Proposition") in connection with ExxonMobil's 2019 annual meeting of shareholders. By copy of a letter from Charles Schwab, share ownership has been verified.

In light of the guidance in SEC Staff Legal Bulletin No. 14F dealing with co-filers of shareholder proposals, it is important to ensure that the lead filer has clear authority to act on behalf of all co-filers, including with respect to any potential negotiated withdrawal of the Proposal. Unless the lead filer can represent that it holds such authority on behalf of all co-filers, and considering SEC staff guidance, it will be difficult for us to engage in productive dialogue concerning this Proposal.

Note that under Staff Legal Bulletin No. 14F, the SEC will distribute no-action responses under Rule 14a-8 by email to companies and proponents. We encourage all proponents and any co-filers to include an email contact address on any additional correspondence to ensure timely communication in the event the Proposal is subject to a no-action request.

Sincerely,

Sherry R. Englund
Manager, Shareholder Relations

Via Federal Express:

Re: Shareholder Proposal Submission

Dear Mr. Hansen:

I am writing on behalf of BNP Paribas Asset Management (BNPP AM), the investment management arm of BNP Paribas. BNPP AM is a global asset manager with more than $640 billion in assets under management and advice, as of September 30, 2018. Across our firm’s portfolios, we hold more than 470,000 shares of ExxonMobil stock.

BNPP AM is committed to the Paris Agreement on climate change. We are members of the global Climate Action 100+ (CA100+) a five-year initiative led by investors to engage systemically important greenhouse gas emitters and other companies across the global economy that have significant opportunities to drive the clean energy transition and help achieve the goals of the Paris Agreement. We are calling on companies to improve governance on climate change, curb emissions and strengthen climate-related financial disclosures. We were pleased to see the recent agreement reached by Royal Dutch Shell and other members of CA100+ coalition (See: https://www.shell.com/media/news-and-media-releases/2018/joint-statement-between-institutional-investors-on-behalf-of-climate-action-and-shell.html).

You will recall that BNPP AM submitted a shareholder proposal to Exxon Mobil on climate change disclosure in 2016. As we have not seen the level of progress we believe the climate crisis demands, we have decided to join the New York State Common Retirement Fund and the Church Commissioners for England in submitting the attached proposal.

We are submitting the attached proposal for inclusion in the next proxy statement in accordance with Rule 14a-8 of the General Rules and Regulations of the Securities Act of 1934. We have held more than $2,000 worth of Exxon Mobil shares in our BNPP Easy MSCI N-AM Ex Cont W portfolio for greater than one year, and will maintain ownership of the required number of shares through the date of the next stockholders’ annual meeting. A letter verifying our ownership of Exxon Mobil shares from BNP Paribas Securities Services, our custodian, is forthcoming under separate cover. A representative of the filers will attend the stockholders’ meeting to move the resolution as required by SEC Rules.
RESOLVED: Shareholders request that the Board of Directors, in annual reporting from 2020, include disclosure of short-, medium- and long-term greenhouse gas targets aligned with the greenhouse gas reduction goals established by the Paris Climate Agreement to keep the increase in global average temperature to well below 2°C and to pursue efforts to limit the increase to 1.5°C. This reporting should cover both the corporation’s operations and products, omit proprietary information, and be prepared at reasonable cost.

SUPPORTING STATEMENT: It is widely accepted that a transition to a low carbon economy - driven by advances in technology and government policy aligned with the Paris Agreement - is under way. As the use of zero- and low-carbon technology increases due to technical breakthroughs and decreasing costs, and as governments take steps to limit greenhouse gas emissions, fossil fuel companies face enhanced risk. These trends could limit returns to ExxonMobil’s investors by increasing the company’s operating costs or by reducing demand for its products.

The Grantham Research Institute on Climate Change and the Environment has identified at least 1,512 climate change laws. Growing recognition of the risks from climate change will result in increasing numbers of, stringency of, and support for these laws.

Disclosing targets is an important means of assuring investors of the management of risks associated with climate change and investors welcome ExxonMobil’s recent announcement of a 2020 methane emission reduction goal. However, some of ExxonMobil’s peer companies, including Total and Shell, have disclosed much longer-term ambitions, including for emissions resulting from the use of their products. Investors participating in Climate Action 100+, representing over $32 trillion in assets under management, are seeking enhanced disclosure of targets and other measures demonstrating company alignment with the Paris Agreement.

To ensure that ExxonMobil is adequately prepared to be successful into the future for its shareholders and other stakeholders we believe it is essential for the company to identify and disclose targets that are aligned with the goals of the Paris Agreement.

Dear Mr. Hansen:

Attached, please find a letter from our custodian, attesting to our eligibility to submit the shareholder proposal on climate change you received from us on December 12.

I would appreciate it if you would acknowledge receipt, and please let me know if you need anything further. I look forward to dialogue on this proposal.

Sincerely,

Adam
Mr. Adam M. Kanzer
Head of Stewardship - Americas
BNP Paribas Asset Management
200 Park Avenue, 11th Floor
New York, NY 10166

Dear Mr. Kanzer:

This will acknowledge receipt of your letter indicating that you wish to co-file on behalf of BNP Paribas Asset Management (the "Co-filer"), the proposal previously submitted by the New York State Common Retirement Fund (the "Proponent") concerning a Report on Greenhouse Gas Targets (the "Proposal") in connection with ExxonMobil's 2019 annual meeting of shareholders. By copy of a letter from BNP Paribas Securities Services, share ownership has been verified.

In light of the guidance in SEC Staff Legal Bulletin No. 14F dealing with co-filers of shareholder proposals, it is important to ensure that the lead filer has clear authority to act on behalf of all co-filers, including with respect to any potential negotiated withdrawal of the Proposal. Unless the lead filer can represent that it holds such authority on behalf of all co-filers, and considering SEC staff guidance, it will be difficult for us to engage in productive dialogue concerning this Proposal.

Note that under Staff Legal Bulletin No. 14F, the SEC will distribute no-action responses under Rule 14a-8 by email to companies and proponents. We encourage all proponents and any co-filers to include an email contact address on any additional correspondence to ensure timely communication in the event the Proposal is subject to a no-action request.

Sincerely,

[Signature]

Neil Hansen
Vice President - Investor Relations and Secretary
ExxonMobil Corporation
5959 Las Colinas Boulevard
Irving, TX 75039-2298

Dear Mr. Hansen:

Bon Secours Mercy Health, formerly named Mercy Health, has long been concerned not only with the financial returns of its investments, but also with the social and ethical implications of its investments. We believe that a demonstrated corporate responsibility in matters of the environment, social and governance concerns fosters long term business success. Bon Secours Mercy Health, a long-term investor, is currently the beneficial owner of shares of ExxonMobil Corporation.

Bon Secours Mercy Health is filing the enclosed resolution which requests annual reporting from 2020, to include disclosure of short-, medium- and long-term greenhouse gas targets aligned with the greenhouse gas reduction goals established by the Paris Climate Agreement to keep the increase in global average temperature to well below 2°C and to pursue efforts to limit the increase to 1.5°C. This reporting should cover both the corporation’s operations and products.

Bon Secours Mercy Health is co-filing the enclosed shareholder proposal with lead investor the New York State Common Retirement Fund (New York State) for inclusion in the 2019 proxy statement, in accordance with Rule 14a-8 of the General Rules and Regulations of the Securities Exchange Act of 1934. Bon Secours Mercy Health has been a shareholder continuously for more than one year holding at least $2000 in market value and will continue to invest in at least the requisite number of shares for proxy resolutions through the annual shareholders’ meeting. The verification of ownership by our custodian, a DTC participant, is included in this packet. A representative of the filers will attend the Annual Meeting to present the resolution as required by SEC rules. New York State may withdraw the proposal on our behalf. We respectfully request direct communications from ExxonMobil and to have our supporting statement and organization name included in the proxy statement.

We look forward to having more productive conversations with the company. Please direct all future correspondence, including an email acknowledgement of receipt of this letter and resolution to Mary Minette, working on behalf of Bon Secours Mercy Health at: email: mminette@mercyinvestments.org; phone: (703) 507-9651; address: 2039 No. Geyer Rd., St. Louis, MO 63131.

Best regards,

Jerry Judd
Senior V.P. President and Treasurer
Bon Secours Mercy Health
RESOLVED: Shareholders request that the Board of Directors, in annual reporting from 2020, include disclosure of short-, medium- and long-term greenhouse gas targets aligned with the greenhouse gas reduction goals established by the Paris Climate Agreement to keep the increase in global average temperature to well below 2°C and to pursue efforts to limit the increase to 1.5°C. Re: Shareholder verification

Dear Mr. Hansen,

We, State Street Bank, hereby verify that our client, Mercy Health, held an aggregate of 53,226 ("Shares") of Exxon Mobile Corporation common stock Cusip 30231G102 as of December 11, 2018.

Please be advised that State Street Nominees Limited, held these shares of Exxon Mobile Corporation in our custody on behalf of our client Mercy Health, the Beneficial Owner of the shares, as of December 11, 2018.

The total value of Mercy Health’s Exxon Mobile Corporation positions was $4,073,918.04 ($76.54 per share) as of December 11, 2018.

Additionally, Mercy Health has continuously held at least $2,000 value of Exxon Mobile Corporation common stock for at least one year including a one year period preceding and including December 11, 2018.

Sincerely,

Karen Colitti

Dear Mr Woods

RE: Resolution for the 2019 Annual Shareholder Meeting

The City of Bradford Metropolitan District Council, as administering authority to the West Yorkshire Pension Fund (WYPF), the beneficial owner of 220,000 shares of Exxon Mobile Corp Common Stock, is filing the enclosed shareholder proposal calling for the Board of Directors, in annual reporting from 2020, to include disclosure of short-, medium and long-term greenhouse gas targets aligned with the greenhouse gas reduction goals established by the Paris Climate Agreement to keep the increase in global average temperature to well below 2°C and to pursue efforts to limit the increase to 1.5°C. This reporting should cover both the corporation’s operations and products, omit proprietary information, and be prepared at reasonable cost.

In accordance with the SEC Regulations 14a-8, WYPF has continuously held Exxon Mobile common stock totalling at least $2,000 in market value for at least one year prior to the date of filing. Attached is a copy of our proof of ownership from our custodian bank HSBC, of our long position of shares and the fulfilment of the market value amount and time requirements of SEC Rule 14a-8. It is WYPF’s intent to maintain ownership of at least $2,000 of Exxon Mobile Corp shares through the date of the 2019 Annual Meeting. WYPF is a co-filer of this resolution and is delegating its authority for negotiated withdrawal to the lead filer.

The resolution is enclosed.

Yours sincerely

Colin Standish, CIO.
RESOLVED: Shareholders request that the Board of Directors, in annual reporting from 2020, include disclosure of short-, medium-, and long-term greenhouse gas targets aligned with the greenhouse gas reduction goals established by the Paris Climate Agreement to keep the increase in global average temperature to well below 2°C and to pursue efforts to limit the increase to 1.5°C. This reporting should cover both the corporation’s operations and products, omit proprietary information, and be prepared at reasonable cost.

SUPPORTING STATEMENT: It is widely accepted that a transition to a low carbon economy - driven by advances in technology and government policy aligned with the Paris Agreement - is under way. As the use of zero- and low-carbon technology increases due to technical breakthroughs and decreasing costs, and as governments take steps to limit greenhouse gas emissions, fossil fuel companies face enhanced risk. This will acknowledge receipt of your letter indicating that you wish to co-file on behalf of the West Yorkshire Pension Fund (the "Co-filer"), the proposal previously submitted by the New York State Common Retirement Fund (the "Proponent") concerning a Report on Greenhouse Gas Targets (the "Proposal") in connection with ExxonMobil's 2019 annual meeting of shareholders. By copy of a letter from HSBC, share ownership has been verified.

In light of the guidance in SEC Staff Legal Bulletin No. 14F dealing with co-filers of shareholder proposals, it is important to ensure that the lead filer has clear authority to act on behalf of all co-filers, including with respect to any potential negotiated withdrawal of the Proposal. Unless the lead filer can represent that it holds such authority on behalf of all co-filers, and considering SEC staff guidance, it will be difficult for us to engage in productive dialogue concerning this Proposal.

Note that under Staff Legal Bulletin No. 14F, the SEC will distribute no-action responses under Rule 14a-8 by email to companies and proponents. We encourage all proponents and any co-filers to include an email contact address on any additional correspondence to ensure timely communication in the event the Proposal is subject to a no-action request.

Sincerely,

[Signature]

RE: Office of the Treasurer for the Bright Star College Savings Trust

Dear Mr. Hansen:

In my capacity as Treasurer for the State of Illinois and Trustee of the Bright Star College Savings Trust (the "Trust"), I write to give notice that pursuant to the 2018 proxy statement of Exxon Mobil Corporation (the "Company"), the Trust intends to present the attached proposal (the "Proposal") at the 2019 annual meeting of shareholders (the "Annual Meeting") as a co-filer with the New York State Common Retirement Fund and delegates authority for negotiations to the lead filer.

The Trust requests that the Company include the Proposal in the Company's proxy statement for the Annual Meeting.

A letter from the Trust's custodian documenting the Trust's continuous ownership of the requisite amount of the Company's stock for at least one year prior to the date of this letter will be sent under a separate cover. The Trust also intends to continue its ownership of at least the minimum number of shares required by the SEC regulations through the date of the Annual Meeting.

I represent that the Trust or its agent intends to appear in person or by proxy at the Annual Meeting to present the attached Proposal. I declare the Trust has no
"material interest" other than that believed to be shared by stockholders of the Company generally.

Please direct all questions or correspondence regarding the Proposal to the attention of:

Maureen O'Brien
Vice President and Director of Corporate Governance
Segal Marco Advisors
550 W. Washington Boulevard, 9th Floor
Chicago, IL 60661
312-612-8446
mobrien@segalmarco.com

Sincerely,

Michael Frerichs
Illinois State Treasurer
RESOLVED: Shareholders request that the Board of Directors, in annual reporting from 2020, include disclosure of short-, medium- and long-term greenhouse gas targets aligned with the greenhouse gas reduction goals established by the Paris Climate Agreement to keep the increase in global average temperature to well below 2°C and to pursue efforts to limit the increase to 1.5°C. This reporting should cover both the corporation’s operations and products, omit proprietary information, and be prepared at reasonable cost.

SUPPORTING STATEMENT: It is widely accepted that a transition to a low carbon economy - driven by advances in technology and government policy aligned with the Paris Agreement - is under way. As the use of zero- and low-carbon technology increases due to technical breakthroughs and decreasing costs, and as governments take steps to limit greenhouse gas emissions, fossil fuel companies face enhanced risk. These trends could limit returns to ExxonMobil’s investors by increasing the company's operating costs or by reducing demand for its products.

The Grantham Research Institute on Climate Change and the Environment has identified at least 1,512 climate change laws. Growing recognition of the risks from climate change will result in increasing numbers of, stringency of, and support for these laws.

Disclosing targets is an important means of assuring investors of the management of risks associated with climate change and investors welcome ExxonMobil’s recent announcement of a 2020 methane emission reduction goal. However, some of ExxonMobil's peer companies, including Total and Shell, have disclosed much longer-term ambitions, including for emissions resulting from the use of their products. Investors participating in Climate Action 100+, representing over $32 trillion in assets under management, are seeking enhanced disclosure of targets and other measures demonstrating company alignment with the Paris Agreement.

To ensure that ExxonMobil is adequately prepared to be successful into the future for its shareholders and other stakeholders we believe it is essential for the company to identify and disclose targets that are aligned with the goals of the Paris Agreement.

RE: Office of the Treasurer for the Bright Start College Savings Trust

Dear Mr. Hansen:

Northern Trust is the record owner of common stock ("shares") of Exxon Mobil Corporation, Inc. beneficially owned by The State of Illinois acting through its Treasurer. The shares are held by Northern Trust, a DTC participant. Per Northern Trust's records, as of the close of business on December 13, 2018, the Fund held at least $2,000 worth of shares in Exxon Mobil Corporation, Inc. stock. The Fund has held in excess of $2,000 worth of shares in Exxon Mobil Corporation, Inc. continuously since December 13, 2017.

If there are any other questions or concerns regarding this matter, please feel free to contact me at 312-444-5209 or KL13@ntrs.com.

Mr. Neil Hansen
Corporate Secretary
Exxon Mobil Corporation
5959 Las Colinas Boulevard
Irving, TX 75039-2228

Dear Mr. Hansen:

Home Missioners of America. Hold 400 shares of Exxon Mobil stock. As an investor we believe that companies with a commitment to customers, employees, communities and the environment will effective long-term investments.

We are co-filing the attached proposal for resolution in the 2019 proxy statement in accordance with Rule 14a-8 of the General Rules and Regulations of the Securities Act of 1934. We intend to maintain ownership of at least $2,000 worth of Exxon Mobil stock through the date of the next stockholder’s annual meeting.

We have been a continuous shareholder for more than one year, have held over $2,000 worth of stock and would be happy to provide verification of our ownership position upon request.

A representative will attend the shareholder’s meeting to move the resolution as required by SEC rules. We consider Church of England and New York State Common Retirement Fund as the “primary filers” of this resolution. We request that you copy correspondence both to me and to Timothy Smith (tsmith@bostontrust.com) at Walden Asset Management. Walden is our investment manager. We hereby deputize Church of England and New York State Common Retirement Fund to withdraw this resolution on our behalf.

Sincerely,

Michael A. Schneider
Treasurer / Director of Finance
The Home Missioners of America

Help and Support Center
Dear Mr Hansen,

I write as a Director of HSBC ETFs plc ('the Fund'). I am authorised to inform you of our intention to offer the enclosed shareholder proposal for consideration of stockholders at the next annual meeting.

I submit the enclosed proposal to you in accordance with rule 14a-8 of the Securities Exchange Act of 1934 and ask that it be included in your proxy statement.

A letter from HSBC Institutional Trust Services (Ireland) DAC custodial bank, verifying the Fund's ownership of ExxonMobil Corporation shares, continually for over one year, is enclosed. The Fund intends to hold at least $2,000 worth of these securities through the date of the annual meeting.

The Fund is a co-filer with the proponent New York State Common Retirement Fund and lead co-filers the Church Commissioners for England. We authorise New York State Common Retirement Fund and the Church Commissioners for England to withdraw on our behalf if an agreement is reached.

We hope that the Board will consider this proposal something that they may support.

Please address email correspondence regarding this proposal to Thomas O'Malley on thomas.omalley@hsbc.com or direct line +44 (0) 20 7024 0182.

Yours sincerely,

Carmen Gonzalez-Calatayud, Director
For and on behalf of HSBC ETFs plc

Mr Neil Hansen  
Corporate Secretary  
ExxonMobil Corporation  
5959 Las Colinas Boulevard  
Irving, TX 75039-2298

Dear Mr Hansen,

This letter is in response to a request by Ms Carmen Gonzalez-Calatayud, Director of the HSBC ETFs PLC, regarding confirmation from HSBC Institutional Trust Services (Ireland) DAC ("HTIE") in its capacity as Depositary to HSBC ETFs PLC (the "Company") that HSBC S&P 500 UCITS ETF (the "Fund"), a sub-fund of HSBC ETFs PLC, has held ISIN US30231G1022 Exxon Mobil Corporation ("Exxon") shares on behalf of the Company, continuously for at least one year as of and including December 7, 2018.

Please note that HTIE, as Depositary of the Fund, held a total of 501,487 shares of common stock as of December 7, 2018 and continues to hold shares in Exxon. The value of the ownership stake continuously held by the Fund had a market value of at least $2,000.00 for at least twelve months prior to, and including said date.

Yours sincerely,

For and on behalf of  
HSBC Institutional Trust Services (Ireland) DAC

Dear Mr Hansen

I write as a Director of HSBC ETFs plc ('the Fund'). I am authorised to inform you of our intention to offer the enclosed shareholder proposal for consideration of stockholders at the next annual meeting.

I submit the enclosed proposal to you in accordance with rule 14a-8 of the Securities Exchange Act of 1934 and ask that it be included in your proxy statement.

A letter from HSBC Institutional Trust Services (Ireland) DAC custodial bank, verifying the Fund's ownership of ExxonMobil Corporation shares, continually for over one year, is enclosed. The Fund intends to hold at least $2,000 worth of these securities through the date of the annual meeting.

The Fund is a co-filer with the proponent New York State Common Retirement Fund and lead co-filers the Church Commissioners for England. We authorise New York State Common Retirement Fund and the Church Commissioners for England to withdraw on our behalf if an agreement is reached.

We hope that the Board will consider this proposal something that they may support.

Please address email correspondence regarding this proposal to Thomas O’Malley on thomas.omalley@hsbc.com or direct line +44 (0) 20 7024 0182.

Yours sincerely

Carmen Gonzalez-Calatayud, Director
For and on behalf of HSBC ETFs plc
RESOLVED: Shareholders request that the Board of Directors, in annual reporting from 2020, include disclosure of short-, medium- and long-term greenhouse gas targets aligned with the greenhouse gas reduction goals established by the Paris Climate Agreement to keep the increase in global average temperature to well below 2°C and to pursue efforts to limit the increase to 1.5°C. This reporting should cover both the corporation’s operations and products, omit proprietary information, and be prepared at reasonable cost.

SUPPORTING STATEMENT: It is widely accepted that a transition to a low carbon economy - driven by advances in technology and government policy aligned with the Paris Agreement - is under way. As the use of zero- and low-carbon technology increases due to technical breakthroughs and decreasing costs, and as governments take steps to limit greenhouse gas emissions, fossil fuel companies face enhanced risk. These trends could limit returns to ExxonMobil’s investors by increasing the company’s operating costs or by reducing demand for its products.

The Grantham Research Institute on Climate Change and the Environment has identified at least 1,512 climate change laws. Growing recognition of the risks from climate change will result in increasing numbers of, stringency of, and support for these laws.

Disclosing targets is an important means of assuring investors of the management of risks associated with climate change and investors welcome ExxonMobil’s recent announcement of a 2020 methane emission reduction goal. However, some of ExxonMobil’s peer companies, including Total and Shell, have disclosed much longer-term ambitions, including for emissions resulting from the use of their products. Investors participating in Climate Action 100+, representing over $32 trillion in assets under management, are seeking enhanced disclosure of targets and other measures demonstrating company alignment with the Paris Agreement.

To ensure that ExxonMobil is adequately prepared to be successful into the future for its shareholders and other stakeholders we believe it is essential for the company to identify and disclose targets that are aligned with the goals of the Paris Agreement.
12 December 2018

Mr Neil Hansen
Corporate Secretary
ExxonMobil Corporation
5959 Las Colinas Boulevard
Irving, TX 75039-2298

Dear Mr Hansen,

This letter is in response to a request by Ms Carmen Gonzalez-Calatayud, Director of the HSBC ETFs PLC, regarding confirmation from HSBC Institutional Trust Services (Ireland) DAC ("HTIE") in its capacity as Depositary to HSBC ETFs PLC (the "Company") that HSBC S&P 500 UCITS ETF (the "Fund"), a sub-fund of HSBC ETFs PLC, has held ISIN US50231G1022 Exxon Mobil Corporation ("Exxon") shares on behalf of the Company, continuously for at least one year as of and including December 7, 2018.

Please note that HTIE, as Depositary of the Fund, held a total of 501,487 shares of common stock as of December 7, 2018 and continues to hold shares in Exxon. The value of the ownership stake continuously held by the Fund had a market value of at least $2,000.00 for at least twelve months prior to, and including said date.

Yours sincerely,

[Signature]

Mr. Thomas O’Malley  
HSBC ETFs plc  
25-28 North Wall Quay  
IFSC, Dublin 1

Dear Mr. O’Malley,

This will acknowledge receipt of your letter indicating that you wish to co-file on behalf of HSBC ETFs plc (the “Co-filer”), the proposal previously submitted by the New York State Common Retirement Fund (the “Proponent”) concerning a Report on Greenhouse Gas Targets (the “Proposal”) in connection with ExxonMobil’s 2019 annual meeting of shareholders. By copy of a letter from HSBC, share ownership has been verified.

In light of the guidance in SEC Staff Legal Bulletin No. 14F dealing with co-filers of shareholder proposals, it is important to ensure that the lead filer has clear authority to act on behalf of all co-filers, including with respect to any potential negotiated withdrawal of the Proposal. Unless the lead filer can represent that it holds such authority on behalf of all co-filers, and considering SEC staff guidance, it will be difficult for us to engage in productive dialogue concerning this Proposal.

Note that under Staff Legal Bulletin No. 14F, the SEC will distribute no-action responses under Rule 14a-8 by email to companies and proponents. We encourage all proponents and any co-filers to include an email contact address on any additional correspondence to ensure timely communication in the event the Proposal is subject to a no-action request.

Sincerely,

Dear Ms. Seabrook:

This letter is to confirm that I hereby authorize Miller/Howard Investments, Inc. to file a shareholder resolution on my behalf at Exxon Mobil Corporation at the 2019 annual meeting of shareholders.

This letter is to confirm that as of 12 December 2018, I am a record investor holding shares of Exxon Mobil Common Stock. This letter also confirms that I have held these shares continuously in excess of $2,000 in market value for at least twelve months prior to 12 December 2018, and that I will continue to hold sufficient shares through the date of the annual shareholders' meeting in 2019.

I give Miller/Howard Investments, Inc. the authority to deal on my behalf with any and all aspects of the shareholder resolution, including but not limited to presentation at the annual meeting, and withdrawal of the resolution.

Sincerely,

Jeffrey J. Woodbury
Secretary
ExxonMobil Corporation
5959 Las Colinas Boulevard
Irving, TX 75039-2298
Fax: 972-940-6749

Re: Shareholder Proposal Submission

Dear Mr. Woodbury,

On behalf of shareholder, Ian Martin, Miller/Howard Investments, Inc. ("Miller/Howard") writes to give notice that pursuant to the 2018 proxy statement of ExxonMobil Corporation ("ExxonMobil") and Rule 14a-8 under the Securities Exchange Act of 1934, Miller/Howard intends to file the attached proposal at the 2019 annual meeting of shareholders. Ian Martin is a beneficial owner of more than $2,000 in market value of ExxonMobil stock, has continuously held these shares for over one year, and has authorized Miller/Howard to file this proposal on his behalf. In addition, Mr. Martin intends to hold the shares through the date on which the annual meeting is held. Authorization from Ian Martin for Miller/Howard to file the proposal is attached. Verification of Mr. Martin’s shares will be submitted under separate cover.

Miller/Howard is an independent, research-driven investment boutique with over twenty-five years of experience managing portfolios for major institutions, mutual funds, and individuals in dividend-focused investment strategies. In addition to financial analysis, we perform rigorous research seeking high-quality companies that are contributing to the economy in meaningful ways and have demonstrated a strong commitment to good governance, the environment, and social responsibility. We are long-term investors in ExxonMobil.

We believe that reporting on environmental risk management makes a company more responsive to shareholders who are seeking information about how the company is navigating both changing/evolving regulation and legislation, and increasing public expectations around how corporate behavior impacts the environment.

As you are aware, the Paris Climate Agreement of 2015, agreed to by nearly 200 countries, established a target to limit global temperature increases to 2-degree Celsius above pre-industrial levels. To meet the 2-degree goal and mitigate the most severe impacts of climate change, climate scientists estimate it is necessary to reduce global emissions 55 percent by 2050 (relative to 2010 levels), entailing a U.S. reduction target of 80 percent.
Disclosing targets is an important means of assuring investors of the management of risks associated with climate change and investors welcome ExxonMobil's recent announcement of a 2020 methane emission reduction goal. However, some of ExxonMobil's peer companies, including Total and Shell, have disclosed much longer-term ambitions, including for emissions resulting from the use of their products. Investors participating in the Climate Action 100+ initiative, representing over $32 trillion in assets under management, are seeking enhanced disclosure of targets and other measures demonstrating company alignment with the Paris Agreement.

The New York State Common Retirement Fund has agreed to serve as lead filer of this proposal. Greetings, Mr. Hansen —

Kindly see attached documents related to Miller/Howard’s submission of a shareholder proposal, co-filed with New York State Common Retirement Fund, for inclusion on the 2019 proxy statement. This will be also submitted via FedEx, and was faxed earlier this morning. (Unfortunately, we referenced your predecessor’s name. The attached correctly references you, and all else remains the same.)

Best,  
Nicole

Ms. Luan Jenifer
Chief Operating Officer
Miller/Howard Investments
10 Dixon Avenue
Woodstock, NY 12498

Dear Ms. Jenifer:

This will acknowledge receipt of your letter indicating that you wish to co-file on behalf of your client, Ian Martin (the "Co-filer"), the proposal previously submitted by the New York State Common Retirement Fund (the "Proponent") concerning a Report on Greenhouse Gas Targets (the "Proposal") in connection with ExxonMobil's 2019 annual meeting of shareholders. By copy of a letter from Howard/Miller, share ownership has been verified.

In light of the guidance in SEC Staff Legal Bulletin No. 14F dealing with co-filers of shareholder proposals, it is important to ensure that the lead filer has clear authority to act on behalf of all co-filers, including with respect to any potential negotiated withdrawal of the Proposal. Unless the lead filer can represent that it holds such authority on behalf of all co-filers, and considering SEC staff guidance, it will be difficult for us to engage in productive dialogue concerning this Proposal.

Note that under Staff Legal Bulletin No. 14F, the SEC will distribute no-action responses under Rule 14a-8 by email to companies and proponents. We encourage all proponents and any co-filers to include an email contact address on any additional correspondence to ensure timely communication in the event the Proposal is subject to a no-action request.

Sincerely,

Sherry M. Enganou
Manager, Shareholder Relations

Re: E*TRADE Securities Account ***; IRA Rollover

Dear Ian Martin,

This letter is in response to your request for information pertaining to the purchases and sales of Exxon Mobil Corp. (XOM) in E*TRADE Securities account ***.

Account number *** is a brokerage retirement account registered in the name of Ian Martin. This account was opened on September 8, 2010 and is currently in good standing. Allow us to confirm, Ian Martin was the beneficial owner of 45 shares of XOM during the period of December 12, 2017 through the close of the market on December 12, 2018. The shares maintained a value in excess of $2,000.00 during the referenced period of time.

We hope that this information satisfies your request. Should you have any further questions, please feel free to contact a Financial Services Representative at 800-ETRADE-1 (800-387-2331, or +1 678 624 6210 internationally), 24 hours a day, seven days a week.

Sincerely,

Correspondence Department 26536

Woodstock, NY 12498

Dear Ms. Seabrook:

This letter is to confirm that I hereby authorize Miller/Howard Investments, Inc. to file a shareholder resolution on my behalf at Exxon Mobil Corporation at the 2019 annual meeting of shareholders.

This letter is to confirm that as of 12 December 2018, I am a record investor holding shares of Exxon Mobil Common Stock. This letter also confirms that I have held these shares continuously in excess of $2,000 in market value for at least twelve months prior to 12 December 2018, and that I will continue to hold sufficient shares through the date of the annual shareholders' meeting in 2019.

I give Miller/Howard Investments, Inc. the authority to deal on my behalf with any and all aspects of the shareholder resolution, including but not limited to presentation at the annual meeting, and withdrawal of the resolution.

Sincerely,

[Signature]

http://www.mhinvest.com/disclaimer.html
Dear Mr Hansen,

I write as the Chief Investment Officer and Managing Director (Investments) for Local Pensions Partnership Investment Ltd (LPP).

I am authorised to submit the enclosed shareholder proposal to you in accordance with rule 14a-6 of the Securities Exchange Act of 1934 and ask that it be included in your proxy statement for the consideration of stockholders at the next annual meeting.

The proposal has been submitted by the New York State Common Retirement Fund, who are the proponents. LPP is a co-filer. I confirm that the proponent is authorised to act on behalf of LPP, including with respect to any potential negotiated withdrawal of the proposal.

A letter from the Bank of New York Mellon, LPP’s custodial bank, will follow, verifying LPP’s ownership of the requisite value of ExxonMobil shares continually for over one year. LPP Global Equities Fund intends to hold at least $2,000 worth of these securities through the date of the annual meeting.

Please address your response and any queries regarding this proposal to Frances Deakin our Responsible Investment Manager by email.
frances.deakin@localpensionspartnership.org.uk.

Yours sincerely

Chris Rule
CIO and MD Investments
RESOLVED: Shareholders request that the Board of Directors, in annual reporting from 2020, include disclosure of short-, medium- and long-term greenhouse gas targets aligned with the greenhouse gas reduction goals established by the Paris Climate Agreement to keep the increase in global average temperature to well below 2°C and to pursue efforts to limit the increase to 1.5°C. This reporting should cover both the corporation's operations and products, omit proprietary information, and be prepared at reasonable cost.

SUPPORTING STATEMENT: It is widely accepted that a transition to a low carbon economy - driven by advances in technology and government policy aligned with the Paris Agreement - is under way. As the use of zero- and low-carbon technology increases due to technical breakthroughs and decreasing costs, and as governments take steps to limit greenhouse gas emissions, fossil fuel companies face enhanced risk. These trends could limit returns to ExxonMobil's investors by increasing the company's operating costs or by reducing demand for its products.

The Grantham Research Institute on Climate Change and the Environment has identified at least 1,512 climate change laws. Growing recognition of the risks from climate change will result in increasing numbers of, stringency of, and support for these laws.

Disclosing targets is an important means of assuring investors of the management of risks associated with climate change and investors welcome ExxonMobil's recent announcement of a 2020 methane emission reduction goal. However, some of ExxonMobil's peer companies, including Total and Shell, have disclosed much longer-term ambitions, including for emissions resulting from the use of their products. Investors participating in Climate Action 100+, representing over $32 trillion in assets under management, are seeking enhanced disclosure of targets and other measures demonstrating company alignment with the Paris Agreement.

To ensure that ExxonMobil is adequately prepared to be successful into the future for its shareholders and other stakeholders we believe it is essential for the company to identify and disclose targets that are aligned with the goals of the Paris Agreement.
Custodian Confirmation of Holding

Dear Mr. Hansen,

This letter is in response to a request received from Mr. Chris Rule, Chief Investment Officer and Managing Director of Local Pensions Partnership Investments Ltd (LPPP) to provide you with details of the market value and number of shares held in the security ExxonMobil Corporation (ISIN US30231G1022) by LPPP Global Equities Fund.

A total of 278,266 shares of the above referenced issuer are held by The Bank of New York Mellon (London Branch) as custodian on behalf of its client LPPP. The value of the ownership stake continuously held by LPPP Global Equities Fund for at least one year up to and including the date 12th December 2018 had a market value of at least $2,000.00 for at least twelve months prior to, and including, the said date.

Please note that this information is strictly confidential, is provided to you at the request of LPPP and reflects the details on our books and records as of the date 12th December 2018.

Sincerely,

Jim Gaulkett
Vice President,
Relationship Manager.

Subject: Submission to Co-File a Shareholder Proposal - 2019 AGM - ExxonMobil - Custodian Letter

Dear Neil,

Local Pensions Partnership Investments Ltd submitted papers to co-file a shareholder proposal at ExxonMobil’s 2019 AGM by email on 12th December, followed up by Fax.

As indicated, I am now providing a letter from our custodian bank confirming holdings at 12 December 2018 and that LPPI Global Equities Fund has held stock for a period in excess of 12 months.

I would be grateful for confirmation of your receipt of our documents by return email and for early notification of any issues with our submission.

Thank you in advance for your help with this matter,

Kind regards, Frances

Dear Nell,

I am contacting you as Corporate Secretary to formally submit the documents required to co-file a shareholder proposal at ExxonMobil's 2019 AGM.

Local Pensions Partnership Investments Ltd (LPP) is a participant in the Investor Initiative Climate Action 100+. Our filing letter and a copy of the proposal (already filed by New York State Common Retirement Fund as proponent) are attached.

A letter from our custodian (Bank of New York Mellon: London Branch) will follow confirming our holdings at 12 December 2018 and that LPP Global Equities Fund satisfies the condition of having held stock for a period in excess of 12 months. I will arrange for a repeat set of papers to be faxed to you later today as a secondary record.

I would be grateful for confirmation of safe receipt and for early notification of any issues with our submission by return email.

Thank you in advance for your help with this matter.

Kind regards
Frances

Ms. Frances Deakin
Local Pensions Partnership
2nd Floor, 166 Union Street
London SE1 0LL

Dear Ms. Deakin:

This will acknowledge receipt of your letter indicating that you wish to co-file on behalf of Local Pensions Partnership (LPP) (the "Co-filer"), the proposal previously submitted by the New York State Common Retirement Fund (the "PropONENT") concerning a Report on Greenhouse Gas Targets (the "Proposal") in connection with ExxonMobil's 2019 annual meeting of shareholders. By copy of a letter from BNY Mellon, share ownership has been verified.

In light of the guidance in SEC Staff Legal Bulletin No. 14F dealing with co-filers of shareholder proposals, it is important to ensure that the lead filer has clear authority to act on behalf of all co-filers, including with respect to any potential negotiated withdrawal of the Proposal. Unless the lead filer can represent that it holds such authority on behalf of all co-filers, and considering SEC staff guidance, it will be difficult for us to engage in productive dialogue concerning this Proposal.

Note that under Staff Legal Bulletin No. 14F, the SEC will distribute no-action responses under Rule 14a-8 by email to companies and proponents. We encourage all proponents and any co-filers to include an email contact address on any additional correspondence to ensure timely communication in the event the Proposal is subject to a no-action request.

Sincerely,

Sherry M. Engleson
Manager, Shareholder Relations

Mr. Neil A. Hansen, Secretary  
Exxon Mobil Corporation  
5959 Las Colinas Boulevard  
Irving, TX 75039-2298

Dear Mr. Hansen,

The Maryknoll Sisters of St. Dominic, Inc. are the beneficial owners of 100 shares of Exxon Mobil Corporation. The Maryknoll Sisters have held these shares continuously for over twelve months and will continue to do so at least until after the next annual meeting of shareholders. A letter of verification of ownership will follow.

I am authorized to notify you of our intention to present the attached proposal for consideration and action by the stockholders at the next annual meeting. I submit this resolution for inclusion in the proxy statement, in accordance with Rule 14-a-8 of the General Rules and Regulations of the Securities and Exchange Act of 1934.

The lead filers of this proposal are the New York State Common Retirement Fund and Church Commissioners for England. The Maryknoll Sisters delegate authority for negotiated withdraw to the lead filers.

Sincerely,

Catherine Rowan  
Corporate Responsibility Coordinator

crc

Mr. Neil A. Hansen, Corporate Secretary
Exxon Mobil Corporation
5959 Las Colinas Boulevard
Irving, TX 75039-2298
Ms. Catherine M. Rowan
Corporate Responsibility Coordinator
Maryknoll Sisters of St. Dominic, Inc.
766 Brady Avenue, Apt 535
Bronx, NY 10462

Dear Ms. Rowan:

This will acknowledge receipt of your letter indicating that you wish to co-file on behalf of Maryknoll Sisters of St. Dominic, Inc. (the "Co-filer"), the proposal previously submitted by the New York State Common Retirement Fund (the "PropONENT") concerning a Report on Greenhouse Gas Targets (the "Proposal") in connection with ExxonMobil's 2019 annual meeting of shareholders. However, proof of share ownership was not included with your December 11, 2018, submission.

In order to be eligible to submit a shareholder proposal, Rule 14a-8 (copy enclosed) requires a co-filer to submit sufficient proof that he or she has continuously held at least $2,000 in market value, or 1%, of the company's securities entitled to vote on the proposal for at least one year as of the date the shareholder proposal was submitted. For this Proposal, the date of submission is December 11, 2018, which is the date the Proposal was received for delivery by priority mail service. The Co-filer does not appear in our records as a registered shareholder. Moreover, to date we have not received proof that the Co-filer has satisfied these ownership requirements. To remedy this defect, the Co-filer must submit sufficient proof verifying their continuous ownership of the requisite number of ExxonMobil shares for the one-year period preceding and including December 11, 2018. As explained in Rule 14a-8(b), sufficient proof must be in the form of:

- a written statement from the "record" holder of the Co-filer's shares (usually a broker or a bank) verifying that the Co-filer continuously held the requisite number of ExxonMobil shares for the one-year period preceding and including December 11, 2018; or

- if the Co-filer has filed with the SEC a Schedule 13D, Schedule 13G, Form 3, Form 4 or Form 5, or amendments to those documents or updated forms, reflecting the Co-filer's ownership of the requisite number of ExxonMobil shares as of or before the date on which the one-year eligibility period begins, a copy of the schedule and/or form, and any subsequent amendments reporting a change in the ownership level and a written statement that the Co-filer continuously held the requisite number of ExxonMobil shares for the one-year period,
If you intend to demonstrate ownership by submitting a written statement from the "record" holder of your shares as set forth in the first bullet point above, please note that most large U.S. brokers and banks deposit their customers' securities with, and hold those securities through, the Depository Trust Company ("DTC"), a registered clearing agency that acts as a securities depository (DTC is also known through the account name of Cede & Co.). Such brokers and banks are often referred to as 'participants' in DTC. In Staff Legal Bulletin No. 14F (October 18, 2011) (copy enclosed), the SEC staff has taken the view that only DTC participants should be viewed as "record" holders of securities that are deposited with DTC.

The Co-filer can confirm whether its broker or bank is a DTC participant by asking its broker or bank or by checking the listing of current DTC participants, which may be available on the internet at: http://www.dtcc.com/-/media/Files/Downloads/client-center/DTC/alpha.ashx. In these situations, shareholders need to obtain proof of ownership from the DTC participant through which the securities are held, as follows:

- If the Co-filer's broker or bank is a DTC participant, then the Co-filer needs to submit a written statement from its broker or bank verifying that the Co-filer continuously held the requisite number of ExxonMobil shares for the one-year period preceding and including December 11, 2018.

- If the Co-filer's broker or bank is not a DTC participant, then the Co-filer needs to submit proof of ownership from the DTC participant through which the securities are held verifying that the Co-filer continuously held the requisite number of ExxonMobil shares for the one-year period preceding and including December 11, 2018. The Co-filer should be able to find out who this DTC participant is by asking the Co-filer's broker or bank. If the Co-filer's broker is an introducing broker, the Co-filer may also be able to learn the identity and telephone number of the DTC participant through the Co-filer's account statements because the clearing broker identified on the Co-filer's account statements will generally be a DTC participant. If the DTC participant that holds the Co-filer's shares knows the Co-filer's broker's or bank's holdings, but does not know the Co-filer's holdings, the Co-filer needs to satisfy the proof of ownership requirement by obtaining and submitting two proof of ownership statements verifying that for the one-year period preceding and including December 11, 2018, the required amount of securities were continuously held – one from the Co-filer's broker or bank, confirming the Co-filer's ownership, and the other from the DTC participant, confirming the broker or bank's ownership.

Pursuant to SEC Staff Legal Bulletin 141, the submission of a proposal by proxy (i.e., by a representative rather than by the shareholder directly) must include proper documentation describing the shareholder's delegation of authority to the proxy. This documentation must:

- identify the shareholder-proponent and the person or entity selected as proxy;
- identify the company to which the proposal is directed;
- identify the annual or special meeting for which the proposal is submitted;
- identify the specific proposal to be submitted (e.g., proposal to lower the threshold for calling a special meeting from 25% to 10%); and
- be signed and dated by the shareholder.
The SEC's rules require that any response to this letter must be postmarked or transmitted electronically to us no later than 14 calendar days from the date this letter is received. Please mail any response to me at ExxonMobil at the address shown above. Alternatively, you may send your response to me via facsimile at 972-940-6748, or by email to jeanine.gilbert@exxonmobil.com.

In light of the SEC Staff Legal Bulletin No. 14F dealing with Co-filers of shareholder proposals, it is important to ensure that the lead filer has clear authority to act on behalf of all Co-filers, including with respect to any potential negotiated withdrawal of the Proposal. Unless the lead filer can represent that it holds such authority on behalf of all Co-filers, and considering SEC staff guidance, it will be difficult for us to engage in productive dialogue concerning this Proposal.

Note that under Staff Legal Bulletin No. 14F, the SEC will distribute no-action responses under Rule 14a-8 by email to companies and proponents. We encourage all proponents and co-filers to include an email contact address on any additional correspondence to ensure timely communication in the event the Proposal is subject to a no-action request.

Sincerely,

[Signature]

Dear Mr Hansen,

I write as Member of the Executive Committee and Chief Investment Officer of MN ("MN").

I am authorised to submit the enclosed shareholder proposal to you in accordance with rule 14a-8 of the Securities Exchange Act of 1934 and ask that it be included in your proxy statement for consideration of stockholders at the next annual meeting.

The proposal has been submitted by the New York State Common Retirement Fund, who are the proponents. MN is co-filers. I confirm that the proponent is authorised to act on behalf of MN, including with respect to any potential negotiated withdrawal of the proposal.

I enclose a letter from Citibank, the MN's custodial bank, verifying MN's ownership of ExxonMobil shares, continually for over one year. MN intend to hold at least $2,000 worth of these securities through the date of the annual meeting.

Please address email correspondence regarding this proposal to Nando van Kleeff on nando.van.kleeff@mn.nl

Yours sincerely,

Robert Hanson
DIRECTOR
RESOLVED: Shareholders request that the Board of Directors, in annual reporting from 2020, include disclosure of short-, medium- and long-term greenhouse gas targets aligned with the greenhouse gas reduction goals established by the Paris Climate Agreement to keep the increase in global average temperature to well below 2°C and to pursue efforts to limit the increase to 1.5°C. This reporting should cover both the corporation’s operations and products, omit proprietary information, and be prepared at reasonable cost.

SUPPORTING STATEMENT: It is widely accepted that a transition to a low carbon economy - driven by advances in technology and government policy aligned with the Paris Agreement - is under way. As the use of zero- and low-carbon technology increases due to technical breakthroughs and decreasing costs, and as governments take steps to limit greenhouse gas emissions, fossil fuel companies face enhanced risk. These trends could limit returns to ExxonMobil’s investors by increasing the company’s operating costs or by reducing demand for its products.

The Grantham Research Institute on Climate Change and the Environment has identified at least 1,512 climate change laws. Growing recognition of the risks from climate change will result in increasing numbers of, stringency of, and support for these laws.

Disclosing targets is an important means of assuring investors of the management of risks associated with climate change and investors welcome ExxonMobil’s recent announcement of a 2020 methane emission reduction goal. However, some of ExxonMobil’s peer companies, including Total and Shell, have disclosed much longer-term ambitions, including for emissions resulting from the use of their products. Investors participating in Climate Action 100+, representing over $32 trillion in assets under management, are seeking enhanced disclosure of targets and other measures demonstrating company alignment with the Paris Agreement.

To ensure that ExxonMobil is adequately prepared to be successful into the future for its shareholders and other stakeholders we believe it is essential for the company to identify and disclose targets that are aligned with the goals of the Paris Agreement.
Dear Mr Hansen,

I write as Member of the Executive Committee and Chief Investment Officer of MN, the fiduciary of the asset owner, the pension fund PMT. Please see the power of attorney documentation attached.

I am authorised to submit the enclosed shareholder proposal to you in accordance with rule 14a-8 of the Securities Exchange Act of 1934 and ask that it be included in your proxy statement for consideration of stockholders at the next annual meeting.

The proposal has been submitted by the New York State Common Retirement Fund, who are the proponents. PMT is co-filer. I confirm that the proponent is authorised to act on behalf of PMT, including with respect to any potential negotiated withdrawal of the proposal.

I enclose a letter from Citibank, the PMT's custodial bank, verifying PMT's ownership of ExxonMobil shares, continually for over one year. PMT intend to hold at least $2,000 worth of these securities through the date of the annual meeting.

Please address email correspondence regarding this proposal to Nando van Kleeff on nando.van.kleeff@mn.nl

Yours sincerely,

Gerald Cartigny

11 December 2018
Power of Attorney Asset Management

The foundation Stichting Pensioenfonds Metaal en Techniek, established at The Hague (the Netherlands), hereafter to be referred to as "PMT", duly represented by Benne van Popta and Jos Brocken,

hereby grants to

the private company with limited liability Mn Services Vermogensbeheer B.V., established at The Hague (the Netherlands), hereafter referred to as "MN Vermogensbeheer", duly represented by Liesbeth Sinke and Gerald Cartigny,

power of attorney, with the right of substitution, to perform all (legal) acts which MN Vermogensbeheer in the best interest of PMT shall deem appropriate, useful and necessary within the scope of the management and investment of PMT’s assets, which power of attorney MN Vermogensbeheer hereby accepts; this power of attorney is expressly meant to include all acts of management and disposal.

Pursuant to this power of attorney, MN Vermogensbeheer and/or its representative is authorized to operate both in its own name and in its capacity as a sub-agent of PMT.

This power of attorney shall remain in full force and effect until such date that this power of attorney is terminated, upon which the expiration of this power of attorney shall be registered with the trade register of the Chamber of Commerce of The Hague. This power of attorney remains valid towards third parties until a third party receives written notice of termination or replacement of this power of attorney, and termination of this power of attorney does not affect the validity of acts performed while this power of attorney was in force. Upon termination of this power of attorney, MN Vermogensbeheer shall immediately return the original copy in the hands of PMT.

This power of attorney is governed by Dutch law.

Signed at The Hague this 5th day of December 2018

ROBERT RANSOM
DIRECTOR
This will acknowledge receipt of your letter indicating that you wish to co-file on behalf of MN Services N.V. (the "Co-filer"). the proposal previously submitted by the New York State Common Retirement Fund (the "PropONENT") concerning a Report on Greenhouse Gas Targets (the "Proposal") in connection with ExxonMobil's 2019 annual meeting of shareholders. By copy of a letter from Citibank N.A., London, share ownership has been verified.

In light of the guidance in SEC Staff Legal Bulletin No. 14F dealing with co-filers of shareholder proposals, it is important to ensure that the lead filer has clear authority to act on behalf of all co-filers, including with respect to any potential negotiated withdrawal of the Proposal. Unless the lead filer can represent that it holds such authority on behalf of all co-filers, and considering SEC staff guidance, it will be difficult for us to engage in productive dialogue concerning this Proposal.

Note that under Staff Legal Bulletin No. 14F, the SEC will distribute no-action responses under Rule 14a-8 by email to companies and proponents. We encourage all proponents and any co-filers to include an email contact address on any additional correspondence to ensure timely communication in the event the Proposal is subject to a no-action request.

Sincerely,

[Signature]

Co-filing of Shareholder Proposal to ExxonMobil Corporation

The purpose of this document is to provide written confirmation that on 11 December 2018, MP Pension formally submitted a co-filed shareholder proposal to ExxonMobil Corporation. The shareholder proposal is co-filed, supporting the shareholder proposal by New York State Common Retirement Fund and Church Commissioners for England.

MP Pension delegates authority for negotiated withdrawal to these two lead filers.

MP Pension held 337,802,000 shares of ExxonMobil Corporation, ISIN number US30231G1022, as of 12 December 2018. MP Pension has held more than $2,000 in common stock for ExxonMobil Corporation since 12 December 2017, which is more than one year prior to the submission. The shares are purchased through three (3) Alternative Investment Fund owned 100 pec. by MP Pension. Proof of ownership from custodian, Bank of New York Mellon, is enclosed, verifying that MP Pension, as beneficial owner is eligible to submit the proposal under Rule 14a-8 of US Securities & Exchange Commission (SEC). MP Pension will continue to maintain ownership of these shares through the date of the annual meeting. If you need additional proof of ownership, please do not hesitate to get back to me.

The shareholder proposal is being submitted abiding to the U.S. Securities & Exchange Commission (SEC), Rule 14a-8. The proposal focuses on aligning ExxonMobil Corporation’s greenhouse gas targets to the reduction goals of the Paris Climate Agreement.

Please find our enclosed proof of holdings and shareholder proposal text identical to the shareholder proposal submitted by New York State Common Retirement Fund and Church Commissioners for England.

Once again, please let me know if any additional information or clarification is required.

Best regards,

[Signature]

However, some of ExxonMobil's peer companies, including Total and Shell, have disclosed much longer-term ambitions, including for emissions resulting from the use of their products. Investors participating in Climate Action 100+, representing over $32 trillion in assets under management, are seeking enhanced disclosure of targets and other measures demonstrating company alignment with the Paris Agreement.

To ensure that ExxonMobil is adequately prepared to be successful into the future for its shareholders and other stakeholders we believe it is essential for the company to identify and disclose targets that are aligned with the goals of the Paris Agreement.
Helping the environment.

When you use envelopes that are part of our FedEx carbon-neutral envelope shipping program, you're helping support sustainable projects like wind farms and reforestation. Our investments in these projects help neutralize the carbon emitted when shipping, all at no extra cost to you. Now that's a breath of fresh air.

See how FedEx connects the world in responsible and resourceful ways at earthsmart.fedex.com. Join our efforts by recycling this envelope.
Dear Ms. Salling,

Thank you for reaching out to ExxonMobil.

We confirm receipt of your co-filing materials for the shareholder proposal filed by New York State Common Retirement Fund.

Your materials are being processed. You should expect to hear from us shortly regarding your co-filing.

In the meantime, if you have any questions, please do not hesitate to let me know.

Thank you,

Sherry M. Englande

Subject: VS: Co-filing of Shareholder Proposal
Importance: High

Dear Neil Hansen,

I trust this email finds you well.

I wanted to enquire whether you have received the email, sent by CEO of MP Pension, Jens Munch Holst, on the December 12, with the material to co-file the shareholder proposal filed by New York State Common Retirement Fund and Church Commissioners for England?

The material has also been sent through expedited shipping and we have received confirmation from FedEx that the material was received by ExxonMobil Corp. last week.
Please let me know if any additional information or clarification is required.

Best regards

Emne: Co-filing of Shareholder Proposal

Dear Neil Hansen,

I am writing you to inform you that today, December 12, MP Pension has formally submitted a co-filed shareholder proposal to ExxonMobil Corporation. The physical copy of the proposal has been sent to you by expedited shipping. The shareholder proposal is co-filed, supporting the shareholder proposal by New York State Common Retirement Fund and Church Commissioners for England.

Please find our enclosed letter, proof of our holdings and shareholder proposal text enclosed in the attached document.

Please let me know if any additional information or clarification is required.

Best regards,

Jens Munch Holst, CEO of MP Pension

VIA UPS - OVERNIGHT DELIVERY

Ms. Jens Munch Holst
CEO of Mill Pension
Magister & Psychologer
Smakkedalen 8
DK-2820 Gentofte, Denmark

Dear Ms. Holst:

This will acknowledge receipt of your letter indicating that you wish to co-file on behalf of MP Investment Management A/S (the “Co-filer”), the proposal previously submitted by the New York State Common Retirement Fund (the “Proponent”) concerning a Report on Greenhouse Gas Targets (the “Proposal”) in connection with ExxonMobil’s 2019 annual meeting of shareholders. By copy of a letter from BNY Mellon, share ownership has been verified.

In light of the guidance in SEC Staff Legal Bulletin No. 14F dealing with co-filers of shareholder proposals, it is important to ensure that the lead filer has clear authority to act on behalf of all co-filers, including with respect to any potential negotiated withdrawal of the Proposal. Unless the lead filer can represent that it holds such authority on behalf of all co-filers, and considering SEC staff guidance, it will be difficult for us to engage in productive dialogue concerning this Proposal.

Note that under Staff Legal Bulletin No. 14F, the SEC will distribute no-action responses under Rule 14a-8 by email to companies and proponents. We encourage all proponents and any co-filers to include an email contact address on any additional correspondence to ensure timely communication in the event the Proposal is subject to a no-action request.

Sincerely,

Sherry M. Englande
Manager - Shareholder Relations

December 6, 2018

Mr. Neil Hansen
Vice President and Corporate Secretary
Exxon Mobil Corporation
5959 Las Colinas Boulevard
Irving, TX 75038-2298

Dear Mr. Woodbury:

The Needmor Fund holds 100 shares of Exxon Mobil stock. We believe that companies with a commitment to customers, employees, communities and the environment will prosper long term. We strongly believe, as we know you do, that good governance is essential for building shareholder value.

Thus, we are co-filing the enclosed shareholder proposal with Church of England and the New York State Common Retirement Fund as the "primary filers" for inclusion in the 2019 proxy statement, in accordance with Rule 14a-8 of the General Rules and Regulations of the Securities Exchange Act of 1934. We are the beneficial owner, as defined in Rule 13d-3 of the Securities Exchange Act of 1934, of the above mentioned number of Exxon Mobil shares and will be pleased to provide proof of ownership from a DTC participant.

Needmor Fund has been a continuous shareholder of Exxon Mobil stock and has held $2,000 work of stock for over one year and will continue to hold at least $2,000 of Exxon Mobil stock through the next annual meeting.

Please copy correspondence both to myself and to Timothy Smith at Walden Asset Management at tsmith@bostontrust.com; phone 617-726-7155. Walden is the investment manager for Needmor. We hereby deputize Church of England and New York State Common Retirement Fund to act on our behalf.

Sincerely,

Mary Sobacki
Executive Director

The Needmor Fund
539 East Front Street
Perrysburg, OH 43551
RESOLVED: Shareholders request that the Board of Directors, in annual reporting from 2020, include disclosure of short-, medium- and long-term greenhouse gas targets aligned with the greenhouse gas reduction goals established by the Paris Climate Agreement to keep the increase in global average temperature to well below 2°C and to pursue efforts to limit the increase to 1.5°C. This reporting should cover both the corporation’s operations and products, omit proprietary information, and be prepared at reasonable cost.

SUPPORTING STATEMENT: It is widely accepted that a transition to a low carbon economy - driven by advances in technology and government policy aligned with the Paris Agreement - is under way. As the use of zero- and low-carbon technology increases due to technical breakthroughs and decreasing costs, and as governments take steps to limit greenhouse gas emissions, fossil fuel companies face enhanced risk. These trends could limit returns to ExxonMobil’s investors by increasing the company’s operating costs or by reducing demand for its products.

The Grantham Research Institute on Climate Change and the Environment has identified at least 1,512 climate change laws. Growing recognition of the risks from climate change will result in increasing numbers of, stringency of, and support for these laws.

Disclosing targets is an important means of assuring investors of the management of risks associated with climate change and investors welcome ExxonMobil’s recent announcement of a 2020 methane emission reduction goal. However, some of ExxonMobil’s peer companies, including Total and Shell, have disclosed much longer-term ambitions, including for emissions resulting from the use of their products. Investors participating in Climate Action 100+, representing over $32 trillion in assets under management, are seeking enhanced disclosure of targets and other measures demonstrating company alignment with the Paris Agreement.

To ensure that ExxonMobil is adequately prepared to be successful into the future for its shareholders and other stakeholders we believe it is essential for the company to identify and disclose targets that are aligned with the goals of the Paris Agreement.

Mr. Neil Hansen  
Corporate Secretary  
Exxon Mobil Corporation  
5959 Las Colinas Boulevard  
Irving, TX 75039-2298

Dear Mr. Hansen:

I own 150 shares of Exxon Mobil Corporation stock. One of my goals is the assurance that companies I invest in are leaders in environmental, social and corporate governance issues.

Therefore, I am submitting the enclosed shareholder proposal for inclusion in the 2019 proxy statement, in accordance with Rule 14a-8 of the General Rules and Regulations of the Securities Exchange Act of 1934. I am the beneficial owner, as defined in Rule 13d-3 of the Securities Exchange Act of 1934, of the above mentioned number of Exxon Mobil Corporation shares.

I have been a continuous shareholder for more than one year of over $2,000 worth of stock. I will continue to hold at least $2,000 in market value of Exxon Mobil Corporation stock through the next stockholder meeting. Proof of ownership will be provided by my custodian a DTC participant. A representative of the filers will attend the stockholders’ meeting to move the resolution as required by SEC rules. I am co-filing this resolution with the Church of England and New York State Common Retirement Fund as primary filers.

Please copy correspondence both to me and to Timothy Smith at Walden Asset Management (tsmith@bostontrust.com) as Walden is my investment manager. We hereby deputize the Church of England and New York State Common Retirement Fund to withdraw this resolution on our behalf. We look forward to your response.

Sincerely,

Gwendolen Noyes

Cc:  Timothy Smith, Walden Asset Management

Encl.  Resolution Text
RESOLVED: Shareholders request that the Board of Directors, in annual reporting from 2020, include disclosure of short-, medium- and long-term greenhouse gas targets aligned with the greenhouse gas reduction goals established by the Paris Climate Agreement to keep the increase in global average temperature to well below 2°C and to pursue efforts to limit the increase to 1.5°C. This reporting should cover both the corporation’s operations and products, omit proprietary information, and be prepared at reasonable cost.

SUPPORTING STATEMENT: It is widely accepted that a transition to a low carbon economy - driven by advances in technology and government policy aligned with the Paris Agreement - is under way. As the use of zero- and low-carbon technology increases due to technical breakthroughs and decreasing costs, and as governments take steps to limit greenhouse gas emissions, fossil fuel companies face enhanced risk. These trends could limit returns to ExxonMobil's investors by increasing the company's operating costs or by reducing demand for its products.

The Grantham Research Institute on Climate Change and the Environment has identified at least 1,512 climate change laws. Growing recognition of the risks from climate change will result in increasing numbers of, stringency of, and support for these laws.

Disclosing targets is an important means of assuring investors of the management of risks associated with climate change and investors welcome ExxonMobil's recent announcement of a 2020 methane emission reduction goal. However, some of ExxonMobil's peer companies, including Total and Shell, have disclosed much longer-term ambitions, including for emissions resulting from the use of their products. Investors participating in Climate Action 100+, representing over $32 trillion in assets under management, are seeking enhanced disclosure of targets and other measures demonstrating company alignment with the Paris Agreement.

To ensure that ExxonMobil is adequately prepared to be successful into the future for its shareholders and other stakeholders we believe it is essential for the company to identify and disclose targets that are aligned with the goals of the Paris Agreement.

To Whom It May Concern:

U.S. Bank is the sub-custodian for Boston Trust & Investment Management Company (Boston Trust) who is the custodian for the account of Gwendolen Noyes.

December 6, 2018 we are writing to confirm that Gwendolen Noyes has had continuous beneficial ownership of at least $2,000 in market value of the voting securities of Exxon Mobil Corporation (Cusip#30231G102) for more than one year.

U.S. Bank serves as the sub-custodian for Boston Trust and Investment Management Company. U.S. Bank is a DTC participant.

Sincerely,

Joanne MacVey
Officer, Client Service Manager
Institutional Trust & Custody
Ms. Gwendolen G. Noyes

Dear Ms. Noyes:

This will acknowledge receipt of your letter indicating that you wish to co-file the proposal previously submitted by the New York State Common Retirement Fund (the "Proponent") concerning a Report on Greenhouse Gas Targets (the "Proposal") in connection with ExxonMobil's 2019 annual meeting of shareholders. By copy of a letter from Northern Trust, share ownership has been verified.

In light of the guidance in SEC Staff Legal Bulletin No. 14F dealing with co-filers of shareholder proposals, it is important to ensure that the lead filer has clear authority to act on behalf of all co-filers, including with respect to any potential negotiated withdrawal of the Proposal. Unless the lead filer can represent that it holds such authority on behalf of all co-filers, and considering SEC staff guidance, it will be difficult for us to engage in productive dialogue concerning this Proposal.

Note that under Staff Legal Bulletin No. 14F, the SEC will distribute no-action responses under Rule 14a-8 by email to companies and proponents. We encourage all proponents and any co-filers to include an email contact address on any additional correspondence to ensure timely communication in the event the Proposal is subject to a no-action request.

Sincerely,

SME/lig

Dear Mr Hansen,

I write as Member of the Executive Committee and Chief Investment Officer of MN, the fiduciary of the asset owner, the pension fund PMT. Please see the power of attorney documentation attached.

I am authorised to submit the enclosed shareholder proposal to you in accordance with rule 14a-B of the Securities Exchange Act of 1934 and ask that it be included in your proxy statement for consideration of stockholders at the next annual meeting.

The proposal has been submitted by the New York State Common Retirement Fund, who are the proponents. PMT is co-filer. I confirm that the proponent is authorised to act on behalf of PMT, including with respect to any potential negotiated withdrawal of the proposal.

I enclose a letter from Citibank, the PMT’s custodial bank, verifying PMT’s ownership of ExxonMobil shares, continually for over one year. PMT intend to hold at least $2,000 worth of these securities through the date of the annual meeting.

Please address email correspondence regarding this proposal to Nando van Kleeft on nando.van.kleeft@mn.nl

Yours sincerely,

Gerald Cartigny

Irving, TX 75039-2298

Dear Mr Hansen,

This letter is in response to the request received from Mr Nando van Kleeff, Senior Advisor Responsible Investment & Governance at MN, to provide you directly with the details of market value and number of shares held in the security ExxonMobil Corporation (ISIN US30231G1022).

A total of 2,285,438 shares of the above referenced issuer are held by Citibank N.A., London Branch as custodian on behalf of its client Stichting Pensioenfonds Metaal en Techniek who are the beneficial owner. The value of the ownership stake continuously held by the Stichting Pensioenfonds Metaal en Techniek for at least one year up to and including the date 11th December 2018 had a market value of at least $2,000.00 for at least twelve months prior to, and including the said date.

Please note that this information is strictly confidential, is provided to you at the request of Stichting Pensioenfonds Metaal en Techniek and is for informational purposes. The enclosed information reflects the details on our books and records as of the date 11th December 2018.

Regards

For and on behalf of

Citibank, N.A., acting through its offices or branch located in London, England.
Power of Attorney Asset Management

The foundation Stichting Pensioenfonds Metaal en Techniek, established at The Hague (the Netherlands), hereafter to be referred to as "PMT", duly represented by Benne van Popla and Jos Brocken,

hereby grants to

the private company with limited liability Mn Services Vermogensbeheer B.V., established at The Hague (the Netherlands), hereafter referred to as "MN Vermogensbeheer", duly represented by Liesbeth Sinke and Gerald Cartigny,

power of attorney, with the right of substitution, to perform all (legal) acts which
MN Vermogensbeheer in the best interest of PMT shall deem appropriate, useful and necessary within the scope of the management and investment of PMT's assets, which power of attorney MN Vermogensbeheer hereby accepts; this power of attorney is expressly meant to include all acts of management and disposal.

Pursuant to this power of attorney, MN Vermogensbeheer and/or its representative is authorised to operate both in its own name and in its capacity as a sub-agent of PMT.

This power of attorney shall remain in full force and effect until such date that this power of attorney is terminated, upon which the expiration of this power of attorney shall be registered with the trade register of the Chamber of Commerce of The Hague. This power of attorney remains valid towards third parties until a third party receives written notice of termination or replacement of this power of attorney, and termination of this power of attorney does not affect the validity of acts performed while this power of attorney was in force. Upon termination of this power of attorney, MN Vermogensbeheer shall immediately return the original copy in the hands of PMT.

This power of attorney is governed by Dutch law.

Signed at The Hague this 5th day of December 2018

Stichting Pensioenfonds Metaal en Techniek

Mn Services Vermogensbeheer B.V.

Mr. Gerald Cartigny
MN Services N.V.
Prinses Beatrixlaan 15
The Hague, The Netherlands

Dear Mr. Cartigny:

This will acknowledge receipt of your letter indicating that you wish to co-file on behalf of Pensioenfonds Metaal en Techniek (the “Co-filer”), the proposal previously submitted by the New York State Common Retirement Fund (the “Proponent”) concerning a Report on GHG Reduction Targets and Plans (the “Proposal”) in connection with ExxonMobil's 2019 annual meeting of shareholders. By copy of a letter from Citibank N.A., London, share ownership has been verified.

In light of the guidance in SEC Staff Legal Bulletin No. 14F dealing with co-filers of shareholder proposals, it is important to ensure that the lead filer has clear authority to act on behalf of all co-filers, including with respect to any potential negotiated withdrawal of the Proposal. Unless the lead filer can represent that it holds such authority on behalf of all co-filers, and considering SEC staff guidance, it will be difficult for us to engage in productive dialogue concerning this Proposal.

Note that under Staff Legal Bulletin No. 14F, the SEC will distribute no-action responses under Rule 14a-8 by email to companies and proponents. We encourage all proponents and any co-filers to include an email contact address on any additional correspondence to ensure timely communication in the event the Proposal is subject to a no-action request.

Sincerely,

[Signature]

Hello Mr. van Kleeff,

This is in response to your email inquiry sent to Sherry Engande shown below. Thank you for your follow-up inquiry, we have reviewed your original submission dated December 11, 2018 and have determined that the second co-filing submission on behalf of PMT included with your co-filing on behalf of MN was inadvertently overlooked. We have processed and verified the PMT submission, and attached you will find a copy of our acknowledgement letter, please note that the original is being sent today via UPS.

Sincere thanks,

Jeanine Gilbert

---

Dear Sherry,

Thank you for acknowledging receipt of our letter. I have one question remaining. We co-filed on behalf of our inhouse managed pooled vehicle and for our client Pensioenfonds Metaal en Techniek. Can I assume the letter you sent is an acknowledgement for both of these entities?

Kind regards,

Nando van Kleeff
Responsible Investment & Governance

VIA OVERNIGHT DELIVERY

December 12, 2018

Mr. Neil Hansen
Vice President, Investor Relations and Corporate Secretary
Exxon Mobil Corporation
5959 Las Colinas Boulevard
Irving, TX 75039-2298

Dear Mr. Hansen:

The Presbyterian Church (USA) is a major Protestant denomination with nearly 1.6 million members. Our General Assembly believes its investments should promote the church’s mission goals and reflect its ethical values such as caring for the environment. The Committee on Mission Responsibility Through Investment (MRTI) was created to implement this policy. The General Assembly has worked on climate change since 1990, and has called for reduction of emissions in our church buildings, international agreements and adoption of reduction targets by corporations.

The Board of Pensions of the Presbyterian Church (USA) is the beneficial owner of 92,400 shares of Exxon Mobil Corporation common stock, 51 of these shares are designated for the filing of this resolution. In an effort to minimize the number of climate-related resolutions our company receives, the Presbyterian Church (USA) is joining the New York State Common Retirement Fund and The Church of England Pension Fund in submitting the enclosed shareholder resolution for consideration and action at the 2019 Annual Meeting. As co-filers on this resolution, we authorize the lead filer, New York State Common Retirement Fund, to act as our representative regarding this resolution.

In accordance with SEC Regulation 14A-8 of the Securities and Exchange Commission Guidelines, the Board of Pensions has continuously held Exxon Mobil shares for at least one year prior to the date of this filing. Proof of ownership from BNY Mellon Asset Servicing, the master custodian, will be forwarded separately. The Board will maintain the SEC-required ownership position of Exxon Mobil stock through the date of the Annual Meeting where our shares will be represented.
Sincerely yours,

Rob Fohr
Director of Faith-Based Investing and Corporate Engagement
Rob.Fohr@pcusa.org

Enclosure: 2019 ExxonMobil Shareholder Resolution

Cc: Mr. Joseph Kinard, MRTI Chairperson
    Rev. Kerri Allen, MRTI Vice-Chairperson
RESOLVED: Shareholders request that the Board of Directors, in annual reporting from 2020, include disclosure of short-, medium- and long-term greenhouse gas targets aligned with the greenhouse gas reduction goals established by the Paris Climate Agreement to keep the increase in global average temperature to well below 2°C and to pursue efforts to limit the increase to 1.5°C. This reporting should cover both the corporation’s operations and products, omit proprietary information, and be prepared at reasonable cost.

SUPPORTING STATEMENT: It is widely accepted that a transition to a low carbon economy - driven by advances in technology and government policy aligned with the Paris Agreement - is under way. As the use of zero- and low-carbon technology increases due to technical breakthroughs and decreasing costs, and as governments take steps to limit greenhouse gas emissions, fossil fuel companies face enhanced risk. These trends could limit returns to ExxonMobil’s investors by increasing the company’s operating costs or by reducing demand for its products.

The Grantham Research Institute on Climate Change and the Environment has identified at least 1,512 climate change laws. Growing recognition of the risks from climate change will result in increasing numbers of, stringency of, and support for these laws.

Disclosing targets is an important means of assuring investors of the management of risks associated with climate change and investors welcome ExxonMobil’s recent announcement of a 2020 methane emission reduction goal. However, some of ExxonMobil’s peer companies, including Total and Shell, have disclosed much longer-term ambitions, including for emissions resulting from the use of their products. Investors participating in Climate Action 100+, representing over $32 trillion in assets under management, are seeking enhanced disclosure of targets and other measures demonstrating company alignment with the Paris Agreement.

To ensure that ExxonMobil is adequately prepared to be successful into the future for its shareholders and other stakeholders we believe it is essential for the company to identify and disclose targets that are aligned with the goals of the Paris Agreement.
December 12, 2018

Mr. Neil Hansen
Vice President, Investor Relations and Corporate Secretary
ExxonMobil Corporation
5959 Las Colinas Boulevard
Irving, TX 75039-2298

Dear Mr. Hansen,

This letter is to verify that the Board of Pensions of the Presbyterian Church (U.S.A.) is
the beneficial owner of 51 shares of ExxonMobil Corporation as of December 12, 2018,
the day the filing letter was sent, and December 13, 2018, the day you received the filing
letter. This stock position is valued at over $2,000.00, and has been held continuously for
over one year prior to the date of the filing of the shareholder resolution.

Please note that resolution is being filed under the name of the Presbyterian Church
(U.S.A.), 100 Witherspoon Street, Louisville, Kentucky 40202.

Dear Mr. Fohr:

This will acknowledge receipt of your letter indicating that you wish to co-file on behalf of Presbyterian Church (USA) (the "Co-filer"), the proposal previously submitted by the New York State Common Retirement Fund (the "Proponent") concerning a Report on Greenhouse Gas Targets (the "Proposal") in connection with ExxonMobil's 2019 annual meeting of shareholders. By copy of a letter from BNY Mellon, share ownership has been verified.

In light of the guidance in SEC Staff Legal Bulletin No. 14F dealing with co-filers of shareholder proposals, it is important to ensure that the lead filer has clear authority to act on behalf of all co-filers, including with respect to any potential negotiated withdrawal of the Proposal. Unless the lead filer can represent that it holds such authority on behalf of all co-filers, and considering SEC staff guidance, it will be difficult for us to engage in productive dialogue concerning this Proposal.

Note that under Staff Legal Bulletin No. 14F, the SEC will distribute no-action responses under Rule 14a-8 by email to companies and proponents. We encourage all proponents and any co-filers to include an email contact address on any additional correspondence to ensure timely communication in the event the Proposal is subject to a no-action request.

Sincerely,

Dear Mr Hansen

We write as members of Ruffer LLP, the appointed investment manager of LF Ruffer Total Return Fund (the “Fund”). We are authorised to act as agent on behalf of the Fund and hereby file the enclosed shareholder proposal on the Fund’s behalf.

We are authorised to submit the enclosed shareholder proposal to you in accordance with rule 14a-8 of the Securities Exchange Act of 1934 and ask that it be included in your proxy statement for consideration of stockholders at the next annual meeting.

The proposal has been submitted by the New York State Common Retirement Fund, who are the proponent. We confirm that the proponent is authorised to act on behalf of Ruffer LLP, solely in relation to the above mentioned proposal which shall include any potential negotiated withdrawal of the proposal.

I enclose a letter from The Bank of New York Mellon (International) Limited as custodian of the Fund, verifying the Fund’s ownership of ExxonMobil shares, continuously for over one year. The Fund intends to hold at least $2,000 worth of these securities through the date of the annual meeting.

Please address email correspondence regarding this proposal to Franziska Jahn-Madell, fjahn-madell@ruffer.co.uk.

Yours faithfully

Steve Russell
Investment Director

David Benson
Investment Director

Ruffer LLP is a limited liability partnership, registered in England with registration number OC300611. The firm’s principal place of business and registered office is 80 Victoria Street, London SW1E 5JL. Ruffer LLP is authorised and regulated by the Financial Conduct Authority.
RESOLVED: Shareholders request that the Board of Directors, in annual reporting from 2020, include disclosure of short-, medium- and long-term greenhouse gas targets aligned with the greenhouse gas reduction goals established by the Paris Climate Agreement to keep the increase in global average temperature to well below 2°C and to pursue efforts to limit the increase to 1.5°C. London SW1E 5JL

Dear Mr. Russell,

This will acknowledge receipt of your letter indicating that you wish to co-file on behalf of Ruffer LLP (the "Co-filer"), the proposal previously submitted by the New York State Common Retirement Fund (the "Proponent") concerning a Report on Greenhouse Gas Targets (the "Proposal") in connection with ExxonMobil's 2019 annual meeting of shareholders. By copy of a letter from BNY Mellon, share ownership has been verified.

In light of the guidance in SEC Staff Legal Bulletin No. 14F dealing with co-filers of shareholder proposals, it is important to ensure that the lead filer has clear authority to act on behalf of all co-filers, including with respect to any potential negotiated withdrawal of the Proposal. Unless the lead filer can represent that it holds such authority on behalf of all co-filers, and considering SEC staff guidance, it will be difficult for us to engage in productive dialogue concerning this Proposal.

Note that under Staff Legal Bulletin No. 14F, the SEC will distribute no-action responses under Rule 14a-8 by email to companies and proponents. We encourage all proponents and any co-filers to include an email contact address on any additional correspondence to ensure timely communication in the event the Proposal is subject to a no-action request.

Sincerely,

SME/lgg
Gilbert, Jeanine

December 11, 2018

Mr. Jeffrey J. Woodbury
Secretary
ExxonMobil Corporation
5859 Las Colinas Blvd.
Irving, TX 75039-2299

Dear Mr. Woodbury:

I, Safiya Benaventure, am the beneficial owner of 655 shares of ExxonMobil Corporation ("Exxon") common stock held in the Safiya Benaventure 2000 Revocable Trust. I hereby file the enclosed shareholder proposal with ExxonMobil. In brief, the proposal requests that in annual reporting from 2020, ExxonMobil include disclosure of short, medium and long-term greenhouse gas targets aligned with the greenhouse gas reduction goals established by the Paris Climate Agreement, at reasonable cost and omitting proprietary information.

I am filing the enclosed shareholder proposal as a co-filer for inclusion in the 2019 proxy statement, in accordance with Rule 14a-8 of the General Rules and Regulations of the Securities and Exchange Act of 1934 for consideration and action by the shareholders at the next annual meeting. I am the beneficial owner of the above-mentioned number of ExxonMobil Corporation shares which I intend to hold until at least after the 2019 annual meeting. I have been a shareholder for more than one year, have held over $3,000 worth of stock for the last year and will own it going forward. Verification of my ownership is enclosed.

The New York State Common Retirement Fund is designated as the lead proponent on this resolution and it may also be filed by others as well. To that end, I am not submitting a separate proposal, but co-sponsoring this resolution. I am pleased to delegate the New York State Common Retirement Fund to withdraw the resolution on my behalf if an agreement has been reached.

The New York State Common Retirement Fund is the primary contact for this resolution. However, please also copy all correspondences regarding this proposal to Russell Bowman and Veredee Cunningham, Rockefeller Capital Management at rbowman@rockcap.com and v cunningham@rockcap.com.

Sincerely,

Safiya Benaventure
c/o Russell Bowman
RESOLVED: Shareholders request that the Board of Directors, in annual reporting from 2020, include disclosure of short-, medium- and long-term greenhouse gas targets aligned with the greenhouse gas reduction goals established by the Paris Climate Agreement to keep the increase in global average temperature to well below 2°C and to pursue efforts to limit the increase to 1.5°C. This reporting should cover both the corporation's operations and products, omit proprietary information, and be prepared at reasonable cost.

SUPPORTING STATEMENT: It is widely accepted that a transition to a low carbon economy - driven by advances in technology and government policy aligned with the Paris Agreement - is under way. As the use of zero- and low-carbon technology increases due to technical breakthroughs and decreasing costs, and as governments take steps to limit greenhouse gas emissions, fossil fuel companies face enhanced risk. These trends could limit returns to ExxonMobil's investors by increasing the company's operating costs or by reducing demand for its products.

The Grantham Research Institute on Climate Change and the Environment has identified at least 1,512 climate change laws. Growing recognition of the risks from climate change will result in increasing numbers of, stringency of, and support for these laws.

Disclosing targets is an important means of assuring investors of the management of risks associated with climate change and investors welcome ExxonMobil's recent announcement of a 2020 methane emission reduction goal. However, some of ExxonMobil's peer companies, including Total and Shell, have disclosed much longer-term ambitions, including for emissions resulting from the use of their products. Investors participating in Climate Action 100+, representing over $32 trillion in assets under management, are seeking enhanced disclosure of targets and other measures demonstrating company alignment with the Paris Agreement.

To ensure that ExxonMobil is adequately prepared to be successful into the future for its shareholders and other stakeholders we believe it is essential for the company to identify and disclose targets that are aligned with the goals of the Paris Agreement.

Irving, TX 75039-2298

Re: ExxonMobil Shares

Dear Mr. Woodbury,

JPMorgan Chase is the custodian for the account of Safiya Bonaventura 2000 Revocable Trust. As of December 11, 2018, the account of Safiya Bonaventura 2000 Revocable Trust held 666 shares of Exxon Mobil Corp common stock.

The above account has continuously owned at least 666 shares of Exxon Mobil Corp common stock for at least 12 months prior to and through December 11, 2018.

Sincerely,

Tasha Harris Mighty, VP
Senior Client Service Associate

cc. Verdelle Cunningham, Rockefeller Capital Management

VIA UPS – OVERNIGHT DELIVERY

December 30, 2019

Ms. Safiya Bonaventura
Safiya Bonaventura c/o Russell Bowman
Rockefeller Capital Management
10 Rockefeller Plaza, 3rd Floor
New York, NY 10020

Dear Ms. Bonaventura:

This will acknowledge receipt of your letter indicating that you wish to co-file the proposal previously submitted by the New York State Common Retirement Fund (the “Proponent”) concerning a Report on Greenhouse Gas Targets (the “Proposal”) in connection with ExxonMobil’s 2019 annual meeting of shareholders. However, date deficiencies exist between the J. P. Morgan proof letter date, and the submission date and therefore, do not meet requirements, as shown below.

In order to be eligible to submit a shareholder proposal, Rule 14a-8 (copy enclosed) requires a co-filer to submit sufficient proof that he or she has continuously held at least $2,000 in market value, or 1%, of the company’s securities entitled to vote on the proposal for at least one year as of the date the shareholder proposal was submitted. For this Proposal, the date of submission is December 12, 2018, which is the date the Proposal was received electronically by facsimile.

The Co-filer does not appear in our records as a registered shareholder. Moreover, to date we have not received proof that the Co-filer has satisfied these ownership requirements. To remedy this defect, the Co-filer must submit sufficient proof verifying their continuous ownership of the requisite number of ExxonMobil shares for the one-year period preceding and including December 12, 2018.

As explained in Rule 14a-8(b), sufficient proof must be in the form of:

- a written statement from the “record” holder of the Co-filer’s shares (usually a broker or a bank) verifying that the Co-filer continuously held the requisite number of ExxonMobil shares for the one-year period preceding and including December 12, 2018, or

- if the Co-filer has filed with the SEC a Schedule 13D, Schedule 13G, Form 3, Form 4 or Form 5, or amendments to those documents or updated forms, reflecting the Co-filer’s ownership of the requisite number of ExxonMobil shares as of or before the date on which the one-year eligibility period begins, a copy of the schedule and/or form, and any subsequent amendments reporting a change in the ownership level and a written statement that the Co-filer continuously held the requisite number of ExxonMobil shares for the one-year period.
If you intend to demonstrate ownership by submitting a written statement from the "record" holder of your shares as set forth in the first bullet point above, please note that most large U.S. brokers and banks deposit their customers’ securities with, and hold those securities through, the Depository Trust Company ("DTC"), a registered clearing agency that acts as a securities depository (DTC is also known through the account name of Cede & Co.). Such brokers and banks are often referred to as "participants" in DTC. In Staff Legal Bulletin No. 14F (October 18, 2011) (copy enclosed), the SEC staff has taken the view that only DTC participants should be viewed as "record" holders of securities that are deposited with DTC.

The Co-filer can confirm whether its broker or bank is a DTC participant by asking its broker or bank or by checking the listing of current DTC participants, which may be available on the internet at: http://www.dtcc.com/~media/Files/Downloads/client-center/DTC/alpha.ashx. In these situations, shareholders need to obtain proof of ownership from the DTC participant through which the securities are held, as follows:

- If the Co-filer's broker or bank is a DTC participant, then the Co-filer needs to submit a written statement from its broker or bank verifying that the Co-filer continuously held the requisite number of ExxonMobil shares for the one-year period preceding and including December 12, 2018.

- If the Co-filer's broker or bank is not a DTC participant, then the Co-filer needs to submit proof of ownership from the DTC participant through which the securities are held verifying that the Co-filer continuously held the requisite number of ExxonMobil shares for the one-year period preceding and including December 12, 2018. The Co-filer should be able to find out who this DTC participant is by asking the Co-filer's broker or bank. If the Co-filer's broker is an introducing broker, the Co-filer may also be able to learn the identity and telephone number of the DTC participant through the Co-filer's account statements because the clearing broker identified on the Co-filer's account statements will generally be a DTC participant. If the DTC participant that holds the Co-filer's shares knows the Co-filer's broker's or bank's holdings, but does not know the Co-filer's holdings, the Co-filer needs to satisfy the proof of ownership requirement by obtaining and submitting two proof of ownership statements verifying that for the one-year period preceding and including December 12, 2018, the required amount of securities were continuously held - one from the Co-filer's broker or bank, confirming the Co-filer's ownership, and the other from the DTC participant confirming the broker or bank's ownership.

Pursuant to SEC Staff Legal Bulletin 141, the submission of a proposal by proxy (i.e., by a representative rather than by the shareholder directly) must include proper documentation describing the shareholder's delegation of authority to the proxy. This documentation must:

- identify the shareholder-proponent and the person or entity selected as proxy;
- identify the company to which the proposal is directed;
- identify the annual or special meeting for which the proposal is submitted;
- identify the specific proposal to be submitted (e.g., proposal to lower the threshold for calling a special meeting from 25% to 10%); and
- be signed and dated by the shareholder.
The SEC's rules require that any response to this letter must be postmarked or transmitted electronically to us no later than 14 calendar days from the date this letter is received. Please mail any response to me at ExxonMobil at the address shown above. Alternatively, you may send your response to me via facsimile at 972-940-6748, or by email to jeanine.gilbert@exxonmobil.com.

In light of the SEC Staff Legal Bulletin No. 14F dealing with Co-filers of shareholder proposals, it is important to ensure that the lead filer has clear authority to act on behalf of all Co-filers, including with respect to any potential negotiated withdrawal of the Proposal. Unless the lead filer can represent that it holds such authority on behalf of all Co-filers, and considering SEC staff guidance, it will be difficult for us to engage in productive dialogue concerning this Proposal.

Note that under Staff Legal Bulletin No. 14F, the SEC will distribute no-action responses under Rule 14a-8 by email to companies and proponents. We encourage all proponents and co-filers to include an email contact address on any additional correspondence to ensure timely communication in the event the Proposal is subject to a no-action request.

Sincerely,

[Signature]

Irving, TX 75039

Dear Mr. Hansen:

Mercy Investment Services, Inc. (Mercy), the investment program of the Sisters of Mercy of the Americas, has long been concerned not only with the financial returns of its investments, but also with their social and ethical implications. We believe that demonstrated corporate responsibility in matters of the environment, and social and governance concerns fosters long-term business success. Mercy Investment Services, Inc., a long-term investor, is currently the beneficial owner of shares of ExxonMobil Corporation.

Mercy is filing the enclosed proposal to request that the Board of Directors, in annual reporting from 2020, include disclosure of short-, medium- and long-term greenhouse gas targets aligned with the greenhouse gas reduction goals established by the Paris Climate Agreement to keep the increase in global average temperature to well below 2°C and to pursue efforts to limit the increase to 1.5°C. This reporting should cover both the corporation's operations and products, omit proprietary information, and be prepared at reasonable cost.

Mercy Investment Services, Inc., is co-filing the enclosed shareholder proposal with the New York State Common Retirement Fund for inclusion in the 2019 proxy statement, in accordance with Rule 14a-8 of the General Rules and Regulations of the Securities Exchange Act of 1934. Mercy Investment Services, Inc. has been a shareholder continuously for more than one year holding at least $2,000 in market value and will continue to invest in at least the requisite number of shares for proxy resolutions through the annual shareholders' meeting. A representative of the filers will attend the Annual Meeting to move the resolution as required by SEC rules. The verification of ownership by our custodian, a DTC participant, is enclosed with this letter.

New York State Common Retirement Fund may withdraw the proposal on our behalf; however, we respectfully request direct communications from ExxonMobil Corporation, and to have our supporting statement and organization name included in the proxy statement.

We look forward to having productive conversations with the company. Please direct your responses to me via my contact information below.

Best regards,

Mary Minette
Director of Shareholder Advocacy

Re: Mercy Investment Services Inc.

Dear Neil,

This letter will certify that as of December 7, 2018, Northern Trust held for the beneficial interest of Mercy Investment Services Inc., 44 shares of Exxon Mobil Corporation. We confirm that Mercy Investment Services Inc. has beneficial ownership of at least $2,000 in market value of the voting securities of Exxon Mobil Corporation, and that such beneficial ownership has existed continuously for at least one year including a one year period preceding and including December 7, 2018, in accordance with rule 14a-8 of the Securities Exchange Act of 1934. Further, it is Mercy Investment Services Inc., intent to hold at least $2,000 in market value through the next annual meeting.

We also confirm that as of the filing date, December 7, 2018, Mercy Investment Services Inc., held 83,650 additional shares of Exxon Mobil Corporation with a market value of $6,497,095.50.

Please be advised, Northern Trust is a DTC Participant, whose DTC number is 2669.

If you have any questions please feel free to give me a call.

Sincerely,

Melissa Becker

After printing this label:
1. Use the 'Print' button on this page to print your label to your laser or inkjet printer.
2. Fold the printed page along the horizontal line.
3. Place label in shipping pouch and affix it to your shipment so that the barcode portion of the label can be read and scanned.

Warning: Use only the printed original label for shipping. Using a photocopy of this label for shipping purposes is fraudulent and could result in additional billing charges, along with the cancellation of your FedEx account number.

Use of this system constitutes your agreement to the service conditions in the current FedEx Service Guide, available on fedex.com. FedEx will not be responsible for any claim in excess of $100 per package, whether the result of loss, damage, delay, non-delivery, misdelivery, or misinformation, unless you declare a higher value, pay an additional charge, document your actual loss and file a timely claim. Limitations found in the current FedEx Service Guide apply. Your right to recover from FedEx for any loss, including intrinsic value of the package, loss of sales, income interest, profit, attorney's fees, costs, and other forms of damage whether direct, incidental, consequential, or special is limited to the greater of $100 or the authorized declared value. Recovery cannot exceed actual documented loss. Maximum for items of extraordinary value is $1,000, e.g., jewelry, precious metals, negotiable instruments and other items listed in our Service Guide. Written claims must be filed within strict time limits, see current FedEx Service Guide.

Ms. Mary Minette  
Director, Shareholder Advocacy  
Sisters of Mercy of the Americas  
2039 North Geyer Road  
St. Louis, MO 63131

Dear Ms. Minette:

This will acknowledge receipt of your letter indicating that you wish to co-file on behalf of Sisters of Mercy of the Americas (the "Co-filer"), the proposal previously submitted by the New York State Common Retirement Fund (the "Proponent") concerning a Report on Greenhouse Gas Targets (the "Proposal") in connection with ExxonMobil's 2019 annual meeting of shareholders. By copy of a letter from Northern Trust, share ownership has been verified.

In light of the guidance in SEC Staff Legal Bulletin No. 14F dealing with co-filers of shareholder proposals, it is important to ensure that the lead filer has clear authority to act on behalf of all co-filers, including with respect to any potential negotiated withdrawal of the Proposal. Unless the lead filer can represent that it holds such authority on behalf of all co-filers, and considering SEC staff guidance, it will be difficult for us to engage in productive dialogue concerning this Proposal.

Note that under Staff Legal Bulletin No. 14F, the SEC will distribute no-action responses under Rule 14a-8 by email to companies and proponents. We encourage all proponents and any co-filers to include an email contact address on any additional correspondence to ensure timely communication in the event the Proposal is subject to a no-action request.

Sincerely,

SME/jig

Help and Support Center
December 11, 2018

Mr. Jeffrey Woodbury
Corporate Secretary
ExxonMobil Corporation
5959 Las Colinas Boulevard
Irving, TX 75039-2298

Dear Mr. Woodbury,

The members of the Congrégation des Soeurs des Saints Noms de Jésus et de Marie once again call on ExxonMobil to be a leader in transitioning to a low carbon economy. We believe that in order for the Company to progress toward this future, it must identify and disclose targets that are aligned with the greenhouse gas reduction goals set by the Paris Agreement.

Therefore the Congrégation des Soeurs des Saints Noms de Jésus et de Marie is co-filing the enclosed resolution with the New York State Common Retirement Fund and Church Commissioners for England for action at the annual meeting in 2019. We submit it for inclusion in the proxy statement under Rule 14a-8 of the general rules and regulations of the Securities Exchange Act of 1934. A representative of the shareholders will attend the annual meeting to move the resolution as required by SEC rules.

As of December 11, 2018 the Congrégation des Soeurs des Saints Noms de Jésus et de Marie held, and has held continuously for at least one year, 100 shares of ExxonMobil Corporation common stock. A letter verifying ownership in the Company is enclosed. We will continue to hold the required number of shares in Exxon Mobil Corporation through the annual meeting in 2019.

We designate the New York State Common Retirement Fund and Church Commissioners for England as the lead filers to act on our behalf for all purposes in connection with this proposal. Lead filer is specifically authorized to engage in discussions with the company concerning the proposal and to agree on modifications or a withdrawal of the proposal on my behalf. In addition, I authorize ExxonMobil and the Securities and Exchange Commission to communicate solely with the above named lead filer as representative of the filer group in connection with any no-action letter or other correspondence. Please copy our Executive Director on all communications: Bernard Voyer, bvoyer@snjm.org

Sincerely,

Mary Ellen Holohan, SNJM
Congregation Councilor, Treasurer

Encl.: Verification of ownership
Resolution
RESOLVED: Shareholders request that the Board of Directors, in annual reporting from 2020, include disclosure of short-, medium- and long-term greenhouse gas targets aligned with the greenhouse gas reduction goals established by the Paris Climate Agreement to keep the increase in global average temperature to well below 2°C and to pursue efforts to limit the increase to 1.5°C. This reporting should cover both the corporation’s operations and products, omit proprietary information, and be prepared at reasonable cost.

SUPPORTING STATEMENT: It is widely accepted that a transition to a low carbon economy - driven by advances in technology and government policy aligned with the Paris Agreement - is under way. As the use of zero- and low-carbon technology increases due to technical breakthroughs and decreasing costs, and as governments take steps to limit greenhouse gas emissions, fossil fuel companies face enhanced risk. These trends could limit returns to ExxonMobil’s investors by increasing the company’s operating costs or by reducing demand for its products.

The Grantham Research Institute on Climate Change and the Environment has identified at least 1,512 climate change laws. Growing recognition of the risks from climate change will result in increasing numbers of, stringency of, and support for these laws.

Disclosing targets is an important means of assuring investors of the management of risks associated with climate change and investors welcome ExxonMobil’s recent announcement of a 2020 methane emission reduction goal. However, some of ExxonMobil’s peer companies, including Total and Shell, have disclosed much longer-term ambitions, including for emissions resulting from the use of their products. *Investors participating in Climate Action 100+, representing over $32 trillion in assets under management, are seeking enhanced disclosure of targets and other measures demonstrating company alignment with the Paris Agreement.*

To ensure that ExxonMobil is adequately prepared to be successful into the future for its shareholders and other stakeholders we believe it is essential for the company to identify and disclose targets that are aligned with the goals of the Paris Agreement.
December 11th, 2018

To whom it may concern,

Subject: Verification of Ownership

This letter is to verify that the Congrégation des Soeurs des Saints Noms de Jésus et de Marie owns 100 shares of Exxon Mobil Corporation common stock.

Furthermore, the Congrégation des Soeurs des Saints Noms de Jésus et de Marie has held these shares continuously since the purchase date of March 31st, 2008 including the one year period preceding and including December 11th, 2018. At least the minimum number of shares required will continue to be held through the time of the company’s next annual meeting.

This security is currently held by Desjardins Trust who serves as custodian for the Congrégation des Soeurs des Saints Noms de Jésus et de Marie. The shares are registered in our nominee name at Desjardins Trust. Please note that Desjardins Trust is a DTC participant.

Sincerely,

Mr. Jeffrey Woodbury
Secretary
ExxonMobil Corporation
5959 Las Colinas Blvd.
Irving, TX 75039-2298
Fax 972-444-1505

Dear Mr. Woodbury,

The Sisters of St. Dominic, Congregation of the Most Holy Name, have been long time investors in ExxonMobil, and, as members of the Interface Center for Corporate Responsibility, have collaborated with other members to address climate change, especially since the Paris Agreement.

We believe ExxonMobil has the responsibility and capacity to lead in the climate crisis.

Our Congregation is joining the New York State Common Retirement Fund and The Church of England Pension Fund by co-filing this resolution, which will be presented at the next annual meeting for consideration by stockholders in accordance with rule 14-a-8 of the general rules and regulations of The Securities and Exchange Act of 1934.

The Sisters of St. Dominic, Congregation of the Most Holy Name, have been the beneficial owner of at least two thousand dollars' worth of stock of ExxonMobil, have owned it for more than one year and intend to hold at least until after the next annual meeting. Verification of ownership is attached.

Patrick Doherty of the New York State Common Retirement Fund is the primary contact for this resolution, to whom we delegate authority for a negotiated withdrawal. However, all co-filers respectfully request direct communication from the company.

Sincerely,

Sister Patricia Boss, OP

December 29, 2018

Sister Patricia Boss, OP
Chief Financial Officer
Sisters of St. Dominic Congregation of the Most Holy Name
1520 Grand Avenue
San Rafael, CA 94901-2236

Dear Sister Boss:

This will acknowledge receipt of your letter indicating that you wish to co-file on behalf of the Sisters of St. Dominic Congregation of the Most Holy Name (the "Co-filer"), the proposal previously submitted by the New York State Common Retirement Fund (the "Proponent") concerning a Report on Greenhouse Gas Targets (the "Proposal") in connection with ExxonMobil's 2019 annual meeting of shareholders. By copy of a letter from Charles Schwab, share ownership has been verified.

In light of the guidance in SEC Staff Legal Bulletin No. 14F dealing with co-filers of shareholder proposals, it is important to ensure that the lead filer has clear authority to act on behalf of all co-filers, including with respect to any potential negotiated withdrawal of the Proposal. Unless the lead filer can represent that it holds such authority on behalf of all co-filers, and considering SEC staff guidance, it will be difficult for us to engage in productive dialogue concerning this Proposal.

Note that under Staff Legal Bulletin No. 14F, the SEC will distribute no-action responses under Rule 14a-8 by email to companies and proponents. We encourage all proponents and any co-filers to include an email contact address on any additional correspondence to ensure timely communication in the event the Proposal is subject to a no-action request.

Sincerely,

SME/ljg

Mr. Jeffrey Woodbury
Secretary
ExxonMobil Corporation
5959 Las Colinas Blvd.
Irving, TX 75039-2298
Fax 972-444-1505

Dear Mr. Woodbury,

Sisters of St. Joseph of Orange have been long time investors in ExxonMobil, and, as members of the Interface Center for Corporate Responsibility, have collaborated with other members to address climate change, especially since the Paris Agreement.

We believe ExxonMobil has the responsibility and capacity to lead in the climate crisis.

Our Congregation is joining the New York State Common Retirement Fund and The Church of England Pension Fund by co-filing this resolution, which will be presented at the next annual meeting for consideration by stockholders in accordance with rule 14-a-8 of the general rules and regulations of The Securities and Exchange Act of 1934.

Sisters of St. Joseph of Orange have been the beneficial owner of at least two thousand dollars' worth of stock of ExxonMobil, have owned it for more than one year and intend to hold at least until after the next annual meeting. Verification of ownership is attached.

Patrick Doherty of the New York State Common Retirement Fund is the primary contact for this resolution, to whom we delegate authority for a negotiated withdrawal. However, all co-filers respectfully request direct communication from the company.

Sincerely,

Sisters of St. Joseph of Orange

cc: Patrick Doherty
cc: Christina Cobourn Herman
cc: ICCR
cc: M. Gaillac, CA-CCRI
RESOLVED: Shareholders request that the Board of Directors, in annual reporting from 2020, include disclosure of short-, medium- and long-term greenhouse gas targets aligned with the greenhouse gas reduction goals established by the Paris Climate Agreement to keep the increase in global average temperature to well below 2°C and to pursue efforts to limit the increase to 1.5°C. This reporting should cover both the corporation’s operations and products, omit proprietary information, and be prepared at reasonable cost.

SUPPORTING STATEMENT: It is widely accepted that a transition to a low carbon economy - driven by advances in technology and government policy aligned with the Paris Agreement - is under way. As the use of zero- and low-carbon technology increases due to technical breakthroughs and decreasing costs, and as governments take steps to limit greenhouse gas emissions, fossil fuel companies face enhanced risk. These trends could limit returns to ExxonMobil’s investors by increasing the company’s operating costs or by reducing demand for its products.

The Grantham Research Institute on Climate Change and the Environment has identified at least 1,512 climate change laws. Growing recognition of the risks from climate change will result in increasing numbers of, stringency of, and support for these laws.

Disclosing targets is an important means of assuring investors of the management of risks associated with climate change and investors welcome ExxonMobil’s recent announcement of a 2020 methane emission reduction goal. However, some of ExxonMobil’s peer companies, including Total and Shell, have disclosed much longer-term ambitions, including for emissions resulting from the use of their products. Investors participating in Climate Action 100+, representing over $32 trillion in assets under management, are seeking enhanced disclosure of targets and other measures demonstrating company alignment with the Paris Agreement.

To ensure that ExxonMobil is adequately prepared to be successful into the future for its shareholders and other stakeholders we believe it is essential for the company to identify and disclose targets that are aligned with the goals of the Paris Agreement.

Lourdes Siangco & Sharon Becker &
Mary McNulty, Agents for
Sisters of St Joseph of Orange
480 S Batavia St
Orange, CA 92868

Dear Sharon Becker, Mary McNulty and Lourdes Siangco,

I am writing in response to your request for information regarding ownership of Exxon Mobil Corp (XOM) in the above referenced account.

As of December 4, 2018, Sisters of St. Joseph of Orange has owned at least $2,000.00 Exxon Mobil Corp (XOM) for a period of one year.

This letter is for informational purposes only and is not an official record. Please refer to your statements and/or trade confirmations as they are the official record of your account(s).

Thank you for choosing Schwab. We appreciate your business and look forward to serving you in the future. If you have any questions, please call me or any Client Service Specialist at +1 (877) 594-2578 x48558.

Sincerely,

Jonathan Dick

Jonathan Dick
Sr Specialist, Escalation Support
9800 Schwab Way

Dear Sister McNulty,

This will acknowledge receipt of your letter indicating that you wish to co-file on behalf of the Sisters of St. Joseph of Orange (the "Co-filer") the proposal previously submitted by the New York State Common Retirement Fund (the "Proponent") concerning a Report on Greenhouse Gas Targets (the "Proposal") in connection with ExxonMobil's 2019 annual meeting of shareholders. However, as explained in more detail below there are deficiencies in your submission that must be corrected in order to establish that you are eligible to submit a proposal — including as a co-filer — under SEC Rule 14a-8 (copy enclosed).

In order to be eligible to submit a shareholder proposal, Rule 14a-8 requires a co-filer to submit sufficient proof that he or she has continuously held at least $2,000 in market value, or 1%, of the company's securities entitled to vote on the proposal for at least one year as of the date the shareholder proposal was submitted. For this Proposal, the date of submission is December 7, 2018, which is the date the package was postmarked for delivery by U.S. postal service.

The Co-filer does not appear in our records as a registered shareholder. Moreover, the letter provided by Charles Schwab only establishes Proponent's continuous ownership of sufficient ExxonMobil shares for the period to and including December 4, 2018, not the date of the Proposal December 7, 2018. To remedy this defect, the Co-filer must submit sufficient proof verifying their continuous ownership of the requisite number of ExxonMobil shares for the one-year period preceding and including December 7, 2018.

As explained in Rule 14a-8(b), sufficient proof must be in the form of:

+ a written statement from the "record" holder of the Co-filer's shares (usually a broker or a bank) verifying that the Co-filer continuously held the requisite number of ExxonMobil shares for the one-year period preceding and including December 7, 2018; or
• If the Co-filer has filed with the SEC a Schedule 13D, Schedule 13G, Form 3, Form 4 or Form 5, or amendments to those documents or updated forms, reflecting the Co-filer's ownership of the requisite number of ExxonMobil shares as of or before the date on which the one-year eligibility period begins, a copy of the schedule and/or form, and any subsequent amendments reporting a change in the ownership level and a written statement that the Co-filer continuously held the requisite number of ExxonMobil shares for the one-year period.

If you intend to demonstrate ownership by submitting a written statement from the "record" holder of your shares as set forth in the first bullet point above, please note that most large U.S. brokers and banks deposit their customers' securities with, and hold those securities through, the Depository Trust Company ("DTC"), a registered clearing agency that acts as a securities depository (DTC is also known through the account name of Cede & Co.). Such brokers and banks are often referred to as "participants" in DTC. In Staff Legal Bulletin No. 14F (October 18, 2011) (copy enclosed), the SEC staff has taken the view that only DTC participants should be viewed as "record" holders of securities that are deposited with DTC.

The Co-filer can confirm whether its broker or bank is a DTC participant by asking its broker or bank or by checking the listing of current DTC participants, which may be available on the internet at: http://www.dtcc.com/~media/Files/Downloads/client-center/DTC/alpha.aspx. In these situations, shareholders need to obtain proof of ownership from the DTC participant through which the securities are held, as follows:

• If the Co-filer's broker or bank is a DTC participant, then the Co-filer needs to submit a written statement from its broker or bank verifying that the Co-filer continuously held the requisite number of ExxonMobil shares for the one-year period preceding and including December 7, 2018.

• If the Co-filer's broker or bank is not a DTC participant, then the Co-filer needs to submit proof of ownership from the DTC participant through which the securities are held verifying that the Co-filer continuously held the requisite number of ExxonMobil shares for the one-year period preceding and including December 7, 2018. The Co-filer should be able to find out who this DTC participant is by asking the Co-filer's broker or bank. If the Co-filer's broker is an introducing broker, the Co-filer may also be able to learn the identity and telephone number of the DTC participant through the Co-filer's account statements because the clearing broker identified on the Co-filer's account statements will generally be a DTC participant. If the DTC participant that holds the Co-filer's shares knows the Co-filer's broker's or bank's holdings, but does not know the Co-filer's holdings, the Co-filer needs to satisfy the proof of ownership requirement by obtaining and submitting two proof of ownership statements verifying that for the one-year period preceding and including December 7, 2018, the required amount of securities were continuously held - one from the Co-filer's broker or bank, confirming the Co-filer's ownership, and the other from the DTC participant, confirming the broker or bank's ownership. The SEC's rules require that any response to this letter must be postmarked or transmitted electronically to us no later than 14 calendar days from the date this letter is received. Please mail any response to me at ExxonMobil at the address shown above. Alternatively, you may send your response to me via facsimile at 972-940-5748, or by email to shareholderrelations@exxonmobil.com.
In light of the SEC Staff Legal Bulletin No. 14F dealing with Co-filers of shareholder proposals, it is important to ensure that the lead filer has clear authority to act on behalf of all Co-filers, including with respect to any potential negotiated withdrawal of the Proposal. Unless the lead filer can represent that it holds such authority on behalf of all Co-filers, and considering SEC staff guidance, it will be difficult for us to engage in productive dialogue concerning this Proposal.

Note that under Staff Legal Bulletin No. 14F, the SEC will distribute no-action responses under Rule 14a-8 by email to companies and proponents. We encourage all proponents and co-filers to include an email contact address on any additional correspondence to ensure timely communication in the event the Proposal is subject to a no-action request.

Sincerely,

[Signature]

Help and Support Center
Dear Mr Hansen,

RE: Co-filing a resolution

The Surrey County Council pension fund owns shares in the Exxon Mobil Corporation stock and is a member of the Local Authority Pension Fund Forum. One of the principles of the Surrey County Council pension fund Investment Strategy Statement is an assurance that the companies we invest in are diligent with regard to environmental, social and corporate governance issues.

Therefore, the Surrey County Council pension fund submits the enclosed shareholder proposal for inclusion in the 2019 proxy statement, in accordance with Rule 14a-8 of the General Rules and Regulations of the Securities Act of 1934. The Surrey Pension Fund is the beneficial owner, as defined in Rule 13d-3 of the Securities Exchange Act of 1934, of the above mentioned Exxon Mobil Corporation shares.

Proof of ownership can be provided by our custodian, Northern Trust. We are co-filing this resolution with the Church of England and New York State Common Retirement Fund as primary filers.

We hereby deputise the Church of England and New York State Common Retirement Fund to withdraw this resolution on our behalf. We look forward to your response.

Yours sincerely

Neil Mason
Head of Pensions at Surrey County Council
RESOLVED: Shareholders of the Surrey County Council pension fund request that the Board of Directors, in annual reporting from 2020, include disclosure of short-, medium- and long-term greenhouse gas targets aligned with the greenhouse gas reduction goals established by the Paris Climate Agreement to keep the increase in global average temperature to well below 2°C and to pursue efforts to limit the increase to 1.5°C. December 29, 2018

Mr. Neil Mason
Head of Pensions at Surrey County Council
Surrey County Council
Room G40, County Hall, Penrhy Road
Kingston upon Thames KT1 2DN

Dear Mr. Mason:

This will acknowledge receipt of your letter indicating that you wish to co-file on behalf of the Surrey County Council Pension Fund (the "Co-filer"), the proposal previously submitted by the New York State Common Retirement Fund (the "Proponent") concerning a Report on Greenhouse Gas Targets (the "Proposal") in connection with ExxonMobil's 2019 annual meeting of shareholders. However, proof of share ownership was not included with your December 12, 2018, submission.

In order to be eligible to submit a shareholder proposal, Rule 14a-8 (copy enclosed) requires a co-filer to submit sufficient proof that he or she has continuously held at least $2,000 in market value, or 1%, of the company's securities entitled to vote on the proposal for at least one year as of the date the shareholder proposal was submitted. For this Proposal, the date of submission is December 12, 2018, which is the date the Proposal was received electronically by email.

The Co-filer does not appear in our records as a registered shareholder. Moreover, to date we have not received proof that the Co-filer has satisfied these ownership requirements. To remedy this defect, the Co-filer must submit sufficient proof verifying their continuous ownership of the requisite number of ExxonMobil shares for the one-year period preceding and including December 12, 2018.

As explained in Rule 14a-8(b), sufficient proof must be in the form of:

- a written statement from the "record" holder of the Co-filer's shares (usually a broker or a bank) verifying that the Co-filer continuously held the requisite number of ExxonMobil shares for the one-year period preceding and including December 12, 2018; or

- if the Co-filer has filed with the SEC a Schedule 13D, Schedule 13G, Form 3, Form 4 or Form 5, or amendments to those documents or updated forms, reflecting the Co-filer's ownership of the requisite number of ExxonMobil shares as of or before the date on which the one-year eligibility period begins, a copy of the schedule and/or form, and any subsequent amendments reporting a change in the ownership level and a written statement that the Co-filer continuously held the requisite number of ExxonMobil shares for the one-year period.
If you intend to demonstrate ownership by submitting a written statement from the "record" holder of your shares as set forth in the first bullet point above, please note that most large U.S. brokers and banks deposit their customers' securities with, and hold those securities through, the Depository Trust Company ("DTC"), a registered clearing agency that acts as a securities depository (DTC is also known through the account name of Cede & Co.). Such brokers and banks are often referred to as "participants" in DTC. In Staff Legal Bulletin No. 14F (October 18, 2011) (copy enclosed), the SEC staff has taken the view that only DTC participants should be viewed as "record" holders of securities that are deposited with DTC.

The Co-filer can confirm whether its broker or bank is a DTC participant by asking its broker or bank or by checking the listing of current DTC participants, which may be available on the internet at: http://www.dtcc.com/-/media/Files/Downloads/client-center/DTC/alpha.ashx. In these situations, shareholders need to obtain proof of ownership from the DTC participant through which the securities are held, as follows:

- If the Co-filer's broker or bank is a DTC participant, then the Co-filer needs to submit a written statement from its broker or bank verifying that the Co-filer continuously held the requisite number of ExxonMobil shares for the one-year period preceding and including December 12, 2018.

- If the Co-filer's broker or bank is not a DTC participant, then the Co-filer needs to submit proof of ownership from the DTC participant through which the securities are held verifying that the Co-filer continuously held the requisite number of ExxonMobil shares for the one-year period preceding and including December 12, 2018. The Co-filer should be able to find out who this DTC participant is by asking the Co-filer's broker or bank. If the Co-filer's broker is an introducing broker, the Co-filer may also be able to learn the identity and telephone number of the DTC participant through the Co-filer's account statements because the clearing broker identified on the Co-filer's account statements will generally be a DTC participant. If the DTC participant that holds the Co-filer's shares knows the Co-filer's broker's or bank's holdings, but does not know the Co-filer's holdings, the Co-filer needs to satisfy the proof of ownership requirement by obtaining and submitting two proof of ownership statements verifying that for the one-year period preceding and including December 12, 2018, the required amount of securities were continuously held — one from the Co-filer's broker or bank, confirming the Co-filer's ownership, and the other from the DTC participant, confirming the broker or bank's ownership.

Pursuant to SEC Staff Legal Bulletin 141, the submission of a proposal by proxy (i.e., by a representative rather than by the shareholder directly) must include proper documentation describing the shareholder's delegation of authority to the proxy. This documentation must:

- identify the shareholder-proponent and the person or entity selected as proxy;
- identify the company to which the proposal is directed;
- identify the annual or special meeting for which the proposal is submitted;
- identify the specific proposal to be submitted (e.g., proposal to lower the threshold for calling a special meeting from 25% to 10%); and
- be signed and dated by the shareholder.
The SEC's rules require that any response to this letter must be postmarked or transmitted electronically to us no later than 14 calendar days from the date this letter is received. Please mail any response to me at ExxonMobil at the address shown above. Alternatively, you may send your response to me via facsimile at 972-940-6748, or by email to jeanine.gilbert@exxonmobil.com.

In light of the SEC Staff Legal Bulletin No. 14F dealing with Co-filers of shareholder proposals, it is important to ensure that the lead filer has clear authority to act on behalf of all Co-filers, including with respect to any potential negotiated withdrawal of the Proposal. Unless the lead filer can represent that it holds such authority on behalf of all Co-filers, and considering SEC staff guidance, it will be difficult for us to engage in productive dialogue concerning this Proposal.

Note that under Staff Legal Bulletin No. 14F, the SEC will distribute no-action responses under Rule 14a-8 by email to companies and proponents. We encourage all proponents and co-filers to include an email contact address on any additional correspondence to ensure timely communication in the event the Proposal is subject to a no-action request.

Sincerely,

[Signature]

Help and Support Centre
December 11, 2018

Mr. Neil A. Hansen, Secretary
Exxon Mobil Corporation
5959 Las Colinas Boulevard
Irving, TX 75039-2298

Dear Mr. Hansen,

Trinity Health is the beneficial owner of over $2,000 worth of stock in Exxon Mobil Corporation. Trinity Health has held these shares continuously for over twelve months and will continue to do so at least until after the next annual meeting of shareholders. A letter of verification of ownership is enclosed.

I am authorized to notify you of our intention to present the attached proposal for consideration and action by the stockholders at the next annual meeting. I submit this resolution for inclusion in the proxy statement, in accordance with Rule 14-a-8 of the General Rules and Regulations of the Securities and Exchange Act of 1934.

The lead filers of this proposal are the New York State Common Retirement Fund and Church Commissioners for England. Trinity Health delegates authority for negotiated withdraw to the lead filers.

Sincerely,

Catherine Rowan

enc
RESOLVED: Shareholders request that the Board of Directors, in annual reporting from 2020, include disclosure of short-, medium- and long-term greenhouse gas targets aligned with the greenhouse gas reduction goals established by the Paris Climate Agreement to keep the increase in global average temperature to well below 2°C and to pursue efforts to limit the increase to 1.5°C. This reporting should cover both the corporation’s operations and products, omit proprietary information, and be prepared at reasonable cost.

SUPPORTING STATEMENT: It is widely accepted that a transition to a low carbon economy - driven by advances in technology and government policy aligned with the Paris Agreement - is under way. As the use of zero- and low-carbon technology increases due to technical breakthroughs and decreasing costs, and as governments take steps to limit greenhouse gas emissions, fossil fuel companies face enhanced risk. These trends could limit returns to ExxonMobil’s investors by increasing the company’s operating costs or by reducing demand for its products.

The Grantham Research Institute on Climate Change and the Environment has identified at least 1,512 climate change laws. Growing recognition of the risks from climate change will result in increasing numbers of, stringency of, and support for these laws.

Disclosing targets is an important means of assuring investors of the management of risks associated with climate change and investors welcome ExxonMobil’s recent announcement of a 2020 methane emission reduction goal. To ensure that ExxonMobil is adequately prepared to be successful into the future for its shareholders and other stakeholders we believe it is essential for the company to identify and disclose targets that are aligned with the goals of the Paris Agreement.
TO WHOM IT MAY CONCERN,

Please accept this letter as verification that as of December 11, 2018 Northern Trust as custodian held for the beneficial interest of Trinity Health 217,716 shares of Exxon Mobil Corp..

As of December 11, 2018 Trinity Health has held at least $2,000 worth of Exxon Mobil Corp. continuously for over one year. Trinity Health has informed us it intends to continue to hold these shares through the date of the company's next annual meeting.

This letter is to confirm that the aforementioned shares of stock are registered with Northern Trust, Participant Number 2668, at the Depository Trust Company.

Sincerely,

Trinity Health

Dear Ms. Rowan:

This will acknowledge receipt of your letter indicating that you wish to co-file on behalf of Trinity Health (the "Co-filer"), the proposal previously submitted by the New York State Common Retirement Fund (the "Proponent") concerning a Report on Greenhouse Gas Targets (the "Proposal") in connection with ExxonMobil’s 2019 annual meeting of shareholders. By copy of a letter from Northern Trust, share ownership has been verified.

In light of the guidance in SEC Staff Legal Bulletin No. 14F dealing with co-filers of shareholder proposals, it is important to ensure that the lead filer has clear authority to act on behalf of all co-filers, including with respect to any potential negotiated withdrawal of the Proposal. Unless the lead filer can represent that it holds such authority on behalf of all co-filers, and considering SEC staff guidance, it will be difficult for us to engage in productive dialogue concerning this Proposal.

Note that under Staff Legal Bulletin No. 14F, the SEC will distribute no-action responses under Rule 14a-8 by email to companies and proponents. We encourage all proponents and any co-filers to include an email contact address on any additional correspondence to ensure timely communication in the event the Proposal is subject to a no-action request.

Sincerely,

SME/lg

Mr. Neil Hansen
Vice President – Investor Relations and Secretary
ExxonMobil Corporation
5959 Las Colinas Boulevard
Irving, TX 75039-2298

Dear Mr. Neil Hansen,

The Vermont Pension Investment Committee (VPIC) considers social, environmental, governance, and financial factors in our investment decisions. The VPIC has a long-term investment strategy consistent with the duration of Retirement System liabilities. It strives to be a thoughtful, analytical, and patient investor that believes portfolio risk management is a central fiduciary responsibility. The VPIC believes that the development, disclosure, and reporting of greenhouse gas emissions targets equips management teams to effectively monitor the company’s exposure to climate-related risks and track performance outcomes. The VPIC understands that this monitoring and reporting strengthens the company’s competitive position among Industry peers and protects long-term shareholder value as the industry confronts changing regulatory and market environments. The VPIC emphasizes the importance that climate-related disclosure and reporting be consistent with industry-recognized guidelines, such as those developed by the Sustainability Accounting Standards Board of which the VPIC is a member, the Task Force on Climate-related Financial Disclosures, as well as targets set forth by the Paris Climate Agreement.

Vermont Pension Investment Committee is the owner of over $2,000 of ExxonMobil Corporation stock held continuously for over one year. Vermont Pension Investment Committee intends to continue to hold this stock until after the upcoming Annual Meeting. I hereby notify ExxonMobil Corporation of Vermont Pension Investment Committee’s intention to co-file the enclosed shareholder resolution and am submitting the enclosed shareholder proposal for inclusion in the 2019 proxy statement, in accordance with Rule 14a-8 of the General Rules and Regulations of the Securities Exchange Act of 1934. Vermont Pension Investment Committee is co-filing this resolution with the New York State Common Retirement Fund and the Church Commissioners for England, who are the lead filers of this resolution and are authorized to act on our behalf in all aspects of the resolution including negotiation and withdrawal of the resolution.

A proof of ownership is attached. A representative of the lead filer will attend the stockholders’ meeting to move the resolution as required. We look forward to discussing the issues surrounding the requested disclosure at your earliest convenience.

Sincerely,

Elizabeth A. Pearce
Vermont State Treasurer
RESOLVED: Shareholders request that the Board of Directors, in annual reporting from 2020, include disclosure of short-, medium- and long-term greenhouse gas targets aligned with the greenhouse gas reduction goals established by the Paris Climate Agreement to keep the increase in global average temperature to well below 2°C and to pursue efforts to limit the increase to 1.5°C. This reporting should cover both the corporation’s operations and products, omit proprietary information, and be prepared at reasonable cost.

SUPPORTING STATEMENT: It is widely accepted that a transition to a low carbon economy - driven by advances in technology and government policy aligned with the Paris Agreement - is under way. As the use of zero- and low-carbon technology increases due to technical breakthroughs and decreasing costs, and as governments take steps to limit greenhouse gas emissions, fossil fuel companies face enhanced risk. These trends could limit returns to ExxonMobil’s investors by increasing the company’s operating costs or by reducing demand for its products.

The Grantham Research Institute on Climate Change and the Environment has identified at least 1,512 climate change laws. Growing recognition of the risks from climate change will result in increasing numbers of, stringency of, and support for these laws.

Disclosing targets is an important means of assuring investors of the management of risks associated with climate change and Investors welcome ExxonMobil’s recent announcement of a 2020 methane emission reduction goal. However, some of ExxonMobil’s peer companies, including Total and Shell, have disclosed much longer-term ambitions, including for emissions resulting from the use of their products. Investors participating in Climate Action 100+, representing over $32 trillion in assets under management, are seeking enhanced disclosure of targets and other measures demonstrating company alignment with the Paris Agreement.

To ensure that ExxonMobil is adequately prepared to be successful into the future for its shareholders and other stakeholders we believe it is essential for the company to identify and disclose targets that are aligned with the goals of the Paris Agreement.

Exxon Mobil Corp.
Re: State of Vermont Pension and Investment Committee

To whom it may concern:

As custodian of The State of Vermont Pension and Investment Committee (the “Fund”), we are writing to report that as of the close of business December 13, 2018 the Fund held 4,100 shares of Exxon Mobil Corporation (“Company”) stock in our account at stock in our account at Depository Trust Company and registered in its nominee name of Cede & Co. The Fund has held in excess of $2,000 worth of shares in your Company continuously since December 13, 2017.

If there are any other questions or concerns regarding this matter, please feel free to contact me at 212-623-8787.

Dear Ms. Pearce:

This will acknowledge receipt of your letter indicating that you wish to co-file on behalf of the Vermont Pension Investment Committee (the "Co-filer"), the proposal previously submitted by the New York State Common Retirement Fund (the "Proponent") concerning a Report on Greenhouse Gas Targets (the "Proposal") in connection with ExxonMobil's 2019 annual meeting of shareholders. By copy of a letter from J. P. Morgan, share ownership has been verified.

In light of the guidance in SEC Staff Legal Bulletin No. 14F dealing with co-filers of shareholder proposals, it is important to ensure that the lead filer has clear authority to act on behalf of all co-filers, including with respect to any potential negotiated withdrawal of the Proposal. Unless the lead filer can represent that it holds such authority on behalf of all co-filers, and considering SEC staff guidance, it will be difficult for us to engage in productive dialogue concerning this Proposal.

Note that under Staff Legal Bulletin No. 14F, the SEC will distribute no-action responses under Rule 14a-8 by email to companies and proponents. We encourage all proponents and any co-filers to include an email contact address on any additional correspondence to ensure timely communication in the event the Proposal is subject to a no-action request.

Sincerely,

December 19, 2018

Mr. Bruce T. Herbert, AIF
Chief Executive & Accredited Investment Fiduciary
Investor Voice, SPC
111 Queen Anne Ave. N, Suite 500
Seattle, WA 98109

Dear Mr. Herbert:

This will acknowledge receipt of your letter indicating that you wish to co-file on behalf of Diane B. Turner (the "Co-filer"), the proposal previously submitted by the New York State Common Retirement Fund (the "Proponent") concerning a Report on Greenhouse Gas Targets (the "Proposal") in connection with ExxonMobil's 2019 annual meeting of shareholders. However, proof of share ownership was not included with your December 7, 2018, submission.

In order to be eligible to submit a shareholder proposal, Rule 14a-8 (copy enclosed) requires a co-filer to submit sufficient proof that he or she has continuously held at least $2,000 in market value, or 1%, of the company's securities entitled to vote on the proposal for at least one year as of the date the shareholder proposal was submitted. For this Proposal, the date of submission is December 7, 2018, which is the date the Proposal was received electronically by facsimile.

The Co-filer does not appear in our records as a registered shareholder. Moreover, to date we have not received proof that the Co-filer has satisfied these ownership requirements. To remedy this defect, the Co-filer must submit sufficient proof verifying their continuous ownership of the requisite number of ExxonMobil shares for the one-year period preceding and including December 7, 2018.

As explained in Rule 14a-8(b), sufficient proof must be in the form of:

- a written statement from the "record" holder of the Co-filer's shares (usually a broker or a bank) verifying that the Co-filer continuously held the requisite number of ExxonMobil shares for the one-year period preceding and including December 7, 2018; or

- if the Co-filer has filed with the SEC a Schedule 13D, Schedule 13G, Form 3, Form 4 or Form 5, or amendments to those documents or updated forms, reflecting the Co-filer's ownership of the requisite number of ExxonMobil shares as of or before the date on which the one-year eligibility period begins, a copy of the schedule and/or form, and any subsequent amendments reporting a change in the ownership level and a written statement that the Co-filer continuously held the requisite number of ExxonMobil shares for the one-year period.
If you intend to demonstrate ownership by submitting a written statement from the "record" holder of your shares as set forth in the first bullet point above, please note that most large U.S. brokers and banks deposit their customers' securities with, and hold those securities through, the Depository Trust Company ("DTC"), a registered clearing agency that acts as a securities depository (DTC is also known through the account name of Cede & Co.). Such brokers and banks are often referred to as "participants" in DTC. In Staff Legal Bulletin No. 14F (October 18, 2011) (copy enclosed), the SEC staff has taken the view that only DTC participants should be viewed as "record" holders of securities that are deposited with DTC.

The Co-filer can confirm whether its broker or bank is a DTC participant by asking its broker or bank or by checking the listing of current DTC participants, which may be available on the internet at: http://www.dtcc.com/~/media/Files/Downloads/client-center/DTC/alpha.ashx. In these situations, shareholders need to obtain proof of ownership from the DTC participant through which the securities are held, as follows:

- If the Co-filer's broker or bank is a DTC participant, then the Co-filer needs to submit a written statement from its broker or bank verifying that the Co-filer continuously held the requisite number of ExxonMobil shares for the one-year period preceding and including December 7, 2018.

- If the Co-filer's broker or bank is not a DTC participant, then the Co-filer needs to submit proof of ownership from the DTC participant through which the securities are held verifying that the Co-filer continuously held the requisite number of ExxonMobil shares for the one-year period preceding and including December 7, 2018. The Co-filer should be able to find out who this DTC participant is by asking the Co-filer's broker or bank. If the Co-filer's broker is an introducing broker, the Co-filer may also be able to learn the identity and telephone number of the DTC participant through the Co-filer's account statements because the clearing broker identified on the Co-filer's account statements will generally be a DTC participant. If the DTC participant that holds the Co-filer's shares knows the Co-filer's broker's or bank's holdings, but does not know the Co-filer's holdings, the Co-filer needs to satisfy the proof of ownership requirement by obtaining and submitting two proof of ownership statements verifying that for the one-year period preceding and including December 7, 2018, the required amount of securities were continuously held — one from the Co-filer's broker or bank, confirming the Co-filer's ownership, and the other from the DTC participant, confirming the broker or bank's ownership.

Pursuant to SEC Staff Legal Bulletin 141, the submission of a proposal by proxy (i.e., by a representative rather than by the shareholder directly) must include proper documentation describing the shareholder's delegation of authority to the proxy. This documentation must:

- identify the shareholder-proponent and the person or entity selected as proxy;
- identify the company to which the proposal is directed;
- identify the annual or special meeting for which the proposal is submitted;
- identify the specific proposal to be submitted (e.g., proposal to lower the threshold for calling a special meeting from 25% to 10%); and
- be signed and dated by the shareholder.
The SEC's rules require that any response to this letter must be postmarked or transmitted electronically to us no later than 14 calendar days from the date this letter is received. Please mail any response to me at ExxonMobil at the address shown above. Alternatively, you may send your response to me via facsimile at 972-940-6748, or by email to shareholderrelations@exxonmobil.com.

In light of the SEC Staff Legal Bulletin No. 14F dealing with Co-filers of shareholder proposals, it is important to ensure that the lead filer has clear authority to act on behalf of all Co-filers, including with respect to any potential negotiated withdrawal of the Proposal. Unless the lead filer can represent that it holds such authority on behalf of all Co-filers, and considering SEC staff guidance, it will be difficult for us to engage in productive dialogue concerning this Proposal.

Note that under Staff Legal Bulletin No. 14F, the SEC will distribute no-action responses under Rule 14a-8 by email to companies and proponents. We encourage all proponents and co-filers to include an email contact address on any additional correspondence to ensure timely communication in the event the Proposal is subject to a no-action request.

Sincerely,

[Signature]

Re: Response to Deficiency Notice on Emission Targets Proposal
Proponent: Diane B. Turner

Dear Mr. Woodbury:

We are in receipt of the Company’s letter dated 12/19/2018 (received via overnight delivery on 12/21/2018) that requested the following items in regard to the filing of a shareholder proposal on the separation of the positions of Board Chair and CEO:

a. Verification of share ownership
b. Proof of authorization for Investor Voice

Appended is a letter from Charles Schwab & Co. which verifies that the shares for the above-named Proponent have been continuously held in the amount and for the period of time established by Rule 14a-8(b)(2).

Also attached is a copy of the Proponent’s letter of authorization, which includes authority to issue a Statement of Intent on the Proponent’s behalf.

We feel this fulfills the requirements of Rule 14a-8 and Staff Legal Bulletin 141 in their entirety – please let us know in a timely way should you feel otherwise.

Now that formalities have been properly addressed, we invite a discussion of this core governance topic. All the best for a prosperous New Year.

Sincerely,

Bruce T. Herbert, AIF

Re: Verification of Shares of Exxon Mobil Corporation for Diane B. Turner

To Whom It May Concern:

This letter is to verify that as-of this date, the above-referenced client has continuously owned:

- 32 shares of common stock, for longer than 13 months.

Charles Schwab & Co. serves as the custodian and/or record holder of these shares.

Sincerely,

Edward Scheinblum
Senior Manager
Advisor Custody & Trading Services
Authorization, Appointment, and Statement of Intent
Related to Conduct of Shareholder Engagement (ver. SE-7.0g)

In furtherance of our investment goals, the undersigned issue this statement of Authorization, Appointment, and Intent. It confers authorization, as detailed below, to Newground Social Investment and/or Investor Voice, or their agents. This is in respect to shareholder proposals that either entity may file or has filed on our behalf with specific companies detailed in the attached Exhibits.

Each Exhibit outlines the specifics for: (a) an individual Company, (b) the specific Years of engagement, and (c) the specific Issue to be addressed by each respective shareholder proposal.

Throughout this document, references to “I”, “me”, or “my” are intended to be synonymous with and equivalent to “we”, “us”, or “our” (as the case may be), and are intended to apply equally whether signed individually, jointly, or on behalf of an organization. Likewise, references made in the singular or plural are intended to be synonymous, interchangeable, and equivalent (as the case may be) one to the other.

Authorization and Appointment

I do hereby authorize, appoint, and grant agency authority to Newground Social Investment, SPC (“Newground”) and/or Investor Voice, SPC (“Investor Voice”), or their agents, for the purpose of representing me in regard to the securities that I hold in all matters related to shareholder engagement, including (but not limited to):

- The submission, negotiation, and withdrawal of shareholder proposals.
- Issuing Statements of Intent to companies in accordance with SEC Rule 14a-8(b)(1).
- Attending, speaking, and presenting at shareholder meetings.
- Requesting Letters of Verification from custodians.

This authorization, appointment, and grant of agency authority (the “Appointment”) is intended to be both retroactive and forward-looking: it shall remain in effect and endure until rescinded in writing – except as noted under “Exception” below – and is to be afforded the greatest breadth of interpretation as may currently or in future be allowed.

Exception: It shall expire when rescinded in writing, except in regard to shareholder Proposals that may have been initiated but not yet concluded (withdrawn, omitted, or voted on). For such items (if any), this Authorization and Appointment shall remain in effect until the Proposal in question is either withdrawn, omitted, or voted on by shareholders.

To a company receiving a shareholder proposal under this Authorization and Appointment, please consider it as both authorization and instruction to:

- Dialogue with Newground (or Investor Voice).
- Receive, accept, and promptly act upon materials, communications, statements, and instructions related to the matters noted above.
- Direct all correspondence, questions, or communication regarding same exclusively to Newground (or Investor Voice).
Statement of Intent

In accordance with SEC rules, by this letter I do hereby express and affirmatively state an intent to continue to hold a sufficient value of a Company's stock, as defined within SEC Rule 14a-8(b)(1), from the time a shareholder proposal is filed at that Company through the date of the subsequent annual meeting of shareholders.

By this letter I also authorize, appoint, and grant agency authority to Newground Social Investment, SPC ("Newground") and/or Investor Voice, SPC ("Investor Voice"), or their agents, to issue on my behalf a Statement of Intent to Hold Shares.

This Statement of Intent to Hold Shares (my "Statement") applies to any company in which I own shares (whether individually, jointly, or organizationally) at which a shareholder proposal is or has been filed (whether directly or on my behalf). This Statement, or any form of such Statement that has or may be issued by our agent, is to be accepted by a company that receives it as my Statement in accordance with SEC Rule 14a-8(b)(1).

This Statement is intended to be both retroactive and forward-looking: it shall remain in effect and endure until rescinded in writing — except as noted under "Exception" below — and is to be afforded the greatest breadth of interpretation as may currently or in future be allowed.

Exception: It shall expire when rescinded in writing, except in regard to shareholder Proposals that may have been initiated but not yet concluded (withdrawn, omitted, or voted on). For such items (if any), this Statement shall remain in effect until the Proposal in question is either withdrawn, omitted, or voted on by shareholders.

The undersigned represent that I (whether individually, jointly, or organizationally) hold all appropriate authority to enter into this Agreement.

Memo:

Re: Deficiency Notice  Re: Emission Targets

Please see the attached materials in response to a 12/19/2018 Deficiency Notice.

Thank you.
Dear Mr. Woodbury:

On clients' behalf, Investor Voice reviews the financial, social, and governance implications of the policies and practices of publicly-traded companies. In so doing, we seek insights that enhance profitability and also create higher levels of environmental, social, and governance wellbeing.

We are strong proponents of responsible action around climate change - because clear targets and public disclosure are necessary to allow investors to evaluate the risk a company may be subjecting itself to. We see this not only as a matter of risk management but also of good governance, and believe it is demonstrably in the best interest of stockholders for companies to adopt, and to make public, their policies and targets around responding to climate change - and especially for them to be in line with internationally-set norms and goals, such as those set by the Paris Agreement.

In line with this, Investor Voice is authorized on behalf of Diane B. Turner, the Proponent, to co-file with the New York State Common Retirement Fund and the Church Commissioners for England the enclosed Proposal that the Proponent submits for consideration and action by stockholders at the next annual meeting, and for inclusion in the proxy statement in accordance with Rule 14a-8 of the general rules and regulations of the Securities Exchange Act of 1934. We request that the proxy statement indicate that Investor Voice, as the representative of the Proponent noted above, co-filed this proposal.

Ms. Turner is the beneficial owners of more than $2,000 worth of common stock entitled to be voted at the next stockholders meeting, which has been continuously held for more than thirteen months. Verification of share ownership and other supporting documentation is available upon request.
In accordance with SEC rules, the Proponent acknowledges her responsibility under Rule 14a-8(b)(1), and Investor Voice is authorized to state – and does hereby affirmatively state – that she intends to continue to hold a requisite quantity of shares in Company stock through the date of the next annual meeting of stockholders. Investor Voice is also authorized to withdraw the Proposal on behalf of the Proponent – and hereby delegates authority to the New York State Common Retirement Fund and the Church Commissioners for England to act in this regard on Investor Voice’s behalf. If required, a representative of the filers will attend the meeting to move the resolution.

There is ample time to discuss these matters between now and the proxy printing deadline, and we hope that ExxonMobil will take steps that allow the Proposal to be withdrawn. We would appreciate taking part in discussions, whenever possible.

Toward that end, please direct correspondence to the New York State Common Retirement Fund and the Church Commissioners for England, and cc or contact Investor Voice via the address or phone listed above, or by the following e-mail address:

team@investorvoice.net

For purposes of clarity and consistency of communication, we ask that you commence all e-mail subject lines with your ticker symbol "XOM." (including the period), and we will do the same.

Thank you, we look forward to a discussion of these critical issues.

Sincerely,

Bruce Herbert

enc: Shareholder Proposal on Emission Targets
RESOLVED: Shareholders request that the Board of Directors, in annual reporting from 2020, include disclosure of short-, medium-, and long-term greenhouse gas targets aligned with the greenhouse gas reduction goals established by the Paris Climate Agreement to keep the increase in global average temperature to well below 2°C and to pursue efforts to limit the increase to 1.5°C.

This reporting should cover both the corporation’s operations and products, omit proprietary information, and be prepared at reasonable cost.

SUPPORTING STATEMENT:

It is widely accepted that a transition to a low carbon economy — driven by advances in technology and government policy aligned with the Paris Agreement — is under way. As the use of zero- and low-carbon technology increases due to technical breakthroughs and decreasing costs, and as governments take steps to limit greenhouse gas emissions, fossil fuel companies face enhanced risk. These trends could limit returns to ExxonMobil’s investors by increasing the company’s operating costs or by reducing demand for its products.

The Grantham Research Institute on Climate Change and the Environment has identified at least 1,512 climate change laws. Growing recognition of the risks from climate change will result in increasing numbers of, stringency of, and support for these laws.

Disclosing targets is an important means of assuring investors of the management of risks associated with climate change, and investors welcome ExxonMobil’s recent announcement of a 2020 methane emission reduction goal. However, some of ExxonMobil’s peer companies, including Total and Shell, have disclosed much longer-term ambitions, including for emissions resulting from the use of their products. Investors participating in Climate Action 100+, representing over $32 trillion in assets under management, are seeking enhanced disclosure of targets and other measures demonstrating company alignment with the Paris Agreement.

To ensure that ExxonMobil is adequately prepared to be successful into the future for its shareholders and other stakeholders we believe it is essential for the company to identify and disclose targets that are aligned with the goals of the Paris Agreement.

Re: Response to Deficiency Notice on Emission Targets Proposal
Proponent: Diane B. Turner

Dear Mr. Woodbury:

We are in receipt of the Company’s letter dated 12/19/2018 (received via overnight delivery on 12/21/2018) that requested the following items in regard to the filing of a shareholder proposal on the separation of the positions of Board Chair and CEO:

a. Verification of share ownership
b. Proof of authorization for Investor Voice

Appended is a letter from Charles Schwab & Co. which verifies that the shares for the above-named Proponent have been continuously held in the amount and for the period of time established by Rule 14a-8(b)(2).

Also attached is a copy of the Proponent’s letter of authorization, which includes authority to issue a Statement of Intent on the Proponent’s behalf.

We feel this fulfills the requirements of Rule 14a-8 and Staff Legal Bulletin 141 in their entirety – please let us know in a timely way should you feel otherwise.

Now that formalities have been properly addressed, we invite a discussion of this core governance topic. All the best for a prosperous New Year.

Sincerely,

Bruce T. Herbert
Chief Executive and ACCREDITED INVESTMENT FIDUCIARY

Re: Verification of Shares of Exxon Mobil Corporation for Diane B. Turner

To Whom It May Concern:

This letter is to verify that as-of this date, the above-referenced client has continuously owned:

- 32 shares of common stock, for longer than 13 months.

Charles Schwab & Co. serves as the custodian and/or record holder of these shares.

Sincerely,

[Signature]

Edward Scheinblum
Senior Manager
Advisor Custody & Trading Services
Authorization, Appointment, and Statement of Intent
Related to Conduct of Shareholder Engagement (ver. SE-7.0g)

In furtherance of our investment goals, the undersigned issue this statement of Authorization, Appointment, and Intent. It confers authorization, as detailed below, to Newground Social Investment and/or Investor Voice, or their agents. This is in respect to shareholder proposals that either entity may file or has filed on our behalf with specific companies detailed in the attached Exhibits.

Each Exhibit outlines the specifics for: (a) an individual Company, (b) the specific Years of engagement, and (c) the specific Issue to be addressed by each respective shareholder proposal.

Throughout this document, references to “I”, “me”, or “my” are intended to be synonymous with and equivalent to “we”, “us”, or “our” (as the case may be), and are intended to apply equally whether signed individually, jointly, or on behalf of an organization. Likewise, references made in the singular or plural are intended to be synonymous, interchangeable, and equivalent (as the case may be) one to the other.

Authorization and Appointment

I do hereby authorize, appoint, and grant agency authority to Newground Social Investment, SPC (“Newground”) and/or Investor Voice, SPC (“Investor Voice”), or their agents, for the purpose of representing me in regard to the securities that I hold in all matters related to shareholder engagement, including (but not limited to):

- The submission, negotiation, and withdrawal of shareholder proposals.
- Issuing Statements of Intent to companies in accordance with SEC Rule 14a-8(b)(1).
- Attending, speaking, and presenting at shareholder meetings.
- Requesting Letters of Verification from custodians.

This authorization, appointment, and grant of agency authority (the “Appointment”) is intended to be both retroactive and forward-looking: it shall remain in effect and endure until rescinded in writing – except as noted under “Exception” below – and is to be afforded the greatest breadth of interpretation as may currently or in future be allowed.

Exception: It shall expire when rescinded in writing, except in regard to shareholder Proposals that may have been initiated but not yet concluded (withdrawn, omitted, or voted on). For such items (if any), this Authorization and Appointment shall remain in effect until the Proposal in question is either withdrawn, omitted, or voted on by shareholders.

To a company receiving a shareholder proposal under this Authorization and Appointment, please consider it as both authorization and instruction to:

- Dialogue with Newground (or Investor Voice).
- Receive, accept, and promptly act upon materials, communications, statements, and instructions related to the matters noted above.
- Direct all correspondence, questions, or communication regarding same exclusively to Newground (or Investor Voice).
Statement of Intent

In accordance with SEC rules, by this letter I do hereby express and affirmatively state an Intent to continue to hold a sufficient value of a Company's stock, as defined within SEC Rule 14a-8(b)(1), from the time a shareholder proposal is filed at that Company through the date of the subsequent annual meeting of shareholders.

By this letter I also authorize, appoint, and grant agency authority to Newground Social Investment, SPC ("Newground") and/or Investor Voice, SPC ("Investor Voice"), or their agents, to issue on my behalf a Statement of Intent to Hold Shares.

This Statement of Intent to Hold Shares (my "Statement") applies to any company in which I own shares (whether individually, jointly, or organizationally) at which a shareholder proposal is or has been filed (whether directly or on my behalf). This Statement, or any form of such Statement that has or may be issued by our agent, is to be accepted by a company that receives it as my Statement in accordance with SEC Rule 14a-8(b)(1).

This Statement is intended to be both retroactive and forward-looking: it shall remain in effect and endure until rescinded in writing – except as noted under “Exception” below – and is to be afforded the greatest breadth of interpretation as may currently or in future be allowed.

Exception: It shall expire when rescinded in writing, except in regard to shareholder Proposals that may have been initiated but not yet concluded (withdrawn, omitted, or voted on). For such items (if any), this Statement shall remain in effect until the Proposal in question is either withdrawn, omitted, or voted on by shareholders.

The undersigned represent that I (whether individually, jointly, or organizationally) hold all appropriate authority to enter into this Agreement.

On behalf of: Diane B. Turner

(A) Diane B. Turner

Please print name (and title, if appropriate) Date Signature 1st Person (Authorized Party or Trustee)

(B) Date Signature 2nd Person (Authorized Party or Trustee)

(C) Date Signature 3rd Person (Authorized Party or Trustee)

(D) Date Signature 4th Person (Authorized Party or Trustee)
I/we fully authorize Newground Social Investment (or Investor Voice) to file the following Shareholder Proposal on my/our behalf:

Company: Exxon Mobil Corporation

Topic of Proposal: Set Emission Targets in Line With Goals of the Paris Agreement

Year(s) of Presentation: For presentation at the next three Annual General Meetings of shareholders following the date of execution

(A) [Signature 1st Person (Authorized Party or Trustee)]

(B) [Signature 2nd Person (Authorized Party or Trustee)]

(C) [Signature 3rd Person (Authorized Party or Trustee)]
