Information presented in this report is based upon data reported by filers for the period ending January 31, 2018, except where specifically noted that a chart incorporates staff judgments. The presented information does reflect data from amended filings submitted after the required reporting deadline. Some calculations in the change column in the above table of contents and in the tables below may not appear to total as expected due to rounding. If staff identify data in this report that requires correction, an amended report will be published with the corrected information.

SEC staff had to make judgments in some limited cases as to whether certain securities held in prime money market funds were issued by a specific bank. The banks were then grouped by country based on location of their global headquarters. In general, the calculations include asset-backed CP sponsored by a bank and all repos with that bank as counterparty. If identifiable with a specific bank, money market tranches of ABS are included in the calculation. Securities guaranteed, but not issued by, bank-related entities are not included.

| Country     | Change (Millions) |
|-------------|-------------------|

Eurozone is a subset of Europe and Eurozone values are also included in totals for Europe.

SEC staff had to make judgments in some limited cases as to whether certain securities held in prime money market funds were issued by a specific bank. The banks were then grouped by country based on location of their global headquarters. In general, the calculations include asset-backed CP sponsored by a bank and all repos with that bank as counterparty. If identifiable with a specific bank, money market tranches of ABS are included in the calculation. Securities guaranteed, but not issued by, bank-related entities are not included.

<sup>\*</sup>Revisions to Form N-MFP, effective for April 2016, made certain changes to the classification of portfolio securities; the staff grouped data reported under the new classifications into the summary categories contained in these charts. Because of the classification changes, however, the types of securities included in the categories beginning in April 2016 may differ somewhat from prior periods.
