**Market Data Fees:**

**Definitions**

\* \* \* \* \*

- An “API Service” is a type of data feed distribution in which a Distributor delivers an API or similar distribution mechanism to a third-party entity for use within one or more platforms. The service allows Distributors to provide Derived Data to a third-party entity for use within one or more downstream platforms that are operated and maintained by the third-party entity. The Distributor maintains control of the entitlements, but does not maintain technical control of the usage or the display.
- A “Platform Service” is a type of hosted display solution in which a Distributor provides derivative products to Platform Service Data Users within their infrastructure. The service allows Distributors to make Derived Data available as part of a platform, providing users remote access to derivative products based in whole or in part on Exchange Data.
- A “White Label Service” is a type of hosted display solution in which a Distributor hosts or maintains a website or platform on behalf of a third-party entity. The service allows Distributors to make Derived Data available on a platform that is branded with a third-party brand, or co-branded with a third party and a Distributor. The Distributor maintains control of the application's data, entitlements and display.

<u>Professional User Fee</u>		<u>\$10.00 / month</u>

<u>Non-Professional User Fee</u>		<u>\$0 / month</u>
----------------------------------	--	--------------------

### **Derived Data Platform Service**

A Distributor that provides derivative products based on EDGX Top or Cboe One Summary through an approved Derived Data Platform Service will be subject to the normal external distribution fees applicable for the distribution of EDGX Top or Cboe One Summary except that they will not be subject to the Non-Professional User fees normally applicable for the distribution of EDGX Top or Cboe One Summary. For Cboe One Summary, the Data Consolidation fee will also apply.

\* A Distributor that provides a White Label Service, [or] API Service, or Platform Service for Derived Data taken from EDGX Top or Cboe One Summary is liable for these fees instead of the fees normally applicable for the distribution of EDGX Top or Cboe One Summary. A Distributor that provides a White Label Service, [ or] API Service, or Platform Service for EDGX Top or Cboe One Summary data that is not Derived Data or distributes Derived Data through a platform other than an approved White Label Service, [ or] API Service, or Platform Service would be liable for the fees normally applicable for the distribution of EDGX Top or Cboe One Summary.

\*\* The External Subscriber Fee is non-progressive and is based on the number of White Label Service Platforms (i.e., "External Subscribers") that receive Derived Data from the Distributor. For example, a Distributor providing Derived Data based on EDGX Top to six External Subscribers that are White Label Service Platforms would be charged a monthly fee of \$1,500 (i.e., 6 External Subscribers x \$250 each). Similarly, a Distributor providing Derived Data based on Cboe One Summary to six External Subscribers that are White Label Service Platforms would be charged a monthly fee of \$4,500 (i.e., 6 External Subscribers x \$750 each).

\*\*\* The External Subscriber Fee is non-progressive and is based on the number of API Service Platforms (i.e., "External Subscribers") that receive Derived Data from the Distributor. For example, a Distributor providing Derived Data based on EDGX Top to six External Subscribers that are API Service Platforms would be charged a monthly fee of \$12,000 (i.e., 6 External Subscribers x \$2,000 each). Similarly, a Distributor providing Derived Data based on Cboe One Summary to six External Subscribers that are API Service Platforms would be charged a monthly fee of \$24,000 (i.e., 6 External Subscribers x \$4,000 each).
