7.   The rebate for the highest tier volume achieved is applied retroactively to all eligible Priority Customer Complex volume once the threshold has been reached. For purposes of determining Priority Customer Complex ADV, any day that the complex order book is not open for the entire trading day or the Exchange instructs members in writing to route their orders to other markets may be excluded from such calculation; provided that the Exchange will only remove the day for members that would have a lower ADV with the day included.

13.   Members will not receive rebates for net zero complex orders entered on behalf of originating market participants that execute an ADV of at least 10,000 net zero complex orders in a given month. For purposes of determining which complex orders qualify as "net zero" the Exchange will count all complex orders that leg in to the regular order book and are executed at a net price that is within a range of $0.01 credit and $0.01 debit.
