<u>Description</u>	<u>MIAX Monthly Port Fees</u> <u>Includes connectivity to the Primary, Secondary and Disaster Recovery Data Centers³²</u>
<u>FIX Drop Copy Port</u>	<u>\$500 per month</u>

³² MIAX has primary and secondary data centers and a disaster recovery center. Each port provides access to all three data centers for a single fee.

The FIX Drop Copy Port is a messaging interface that will provide a copy of real-time trade execution information to FIX Drop Copy Port users who subscribe to the service. FIX Drop Copy Port users are those users who are designated by an EEM to receive the information and the information is restricted for use by the EEM only. The Exchange proposes to assess a monthly per port fee to users of the FIX Drop Copy Ports.
