Sec. 6 Market Maker Quotations

(a) through (c) No Change.

d) *Continuous Quotes*. A Market Maker must enter continuous bids and offers for the options to which it is registered, as follows:

i. On a daily basis, a Market Maker must during regular market hours make markets consistent with the applicable quoting requirements specified in these rules, on a continuous basis in options in which the Market Maker is registered.

1) To satisfy this requirement, a Market Maker must quote 60% of the trading day (as a percentage of the total number of minutes in such trading day) or such higher percentage as Nasdaq may announce in advance. Nasdaq Regulation may consider exceptions to the requirement to quote 60% (or higher) of the trading day based on demonstrated legal or regulatory requirements or other mitigating circumstances. This obligation will apply to all of a Market Maker's registered options collectively to all appointed issues, rather than on an option-by-option basis. Compliance with this obligation will be determined on a monthly basis. However, determining compliance with the continuous quoting requirement on a monthly basis does not relieve a Market Maker of the obligation to provide continuous two-sided quotes on a daily basis, nor will it prohibit the Exchange from taking disciplinary action against a Market Maker for failing to meet the continuous quoting obligation each trading day.

2) Notwithstanding the foregoing, Market Makers shall not be required to make two-sided markets pursuant to Section 5(a)(i) of these rules in any Quarterly Option Series, any adjusted option series, and any option series until the time to expiration for such series is less than nine months. Accordingly, the continuous quotation obligations set forth in this rule shall not apply to Market Makers respecting Quarterly Option Series, adjusted option series, and series with an expiration of nine months or greater. For purposes of this subsection (2), an adjusted option series is an option series wherein one option contract in the series represents the delivery of other than 100 shares of underlying stock or Exchange-Traded Fund Shares.

3) If a technical failure or limitation of a system of Nasdaq prevents a Market Maker from maintaining, or prevents a Market Maker from communicating to NOM, timely and accurate quotes, the duration of such failure or limitation shall not be included in any of the calculations under this subparagraph (i) with respect to the affected quotes.

ii. Bid/ask Differentials (Quote Spread Parameters). Options on equities (including Exchange-Traded Fund Shares), and on index options must be quoted with a difference not to exceed $5 between the bid and offer regardless of the price of the bid, including before and during the opening. However, respecting in-the-money series where the market for the underlying security is wider than $5, the bid/ask differential may be as wide as the [quotation for the underlying security on the primary market]<u>spread between the national best bid and offer in the underlying security</u>. The Exchange may establish differences other than the above for one or more series or classes of options.
