4702. Order Types.

(a) No Change.

(b) Except where stated otherwise, the following Order Types are available to all Participants:

(1) – (3) No Change.

(4) (A) A "Post-Only Order" is an Order Type designed to have its price adjusted as needed to post to the Nasdaq Book in compliance with Rule 610(d) under Regulation NMS by avoiding the display of quotations that lock or cross any Protected Quotation in a System Security during Market Hours, or to execute against locking or crossing quotations in circumstances where economically beneficial to the Participant entering the Post-Only Order.

During Market Hours, a Post-Only Order is evaluated at the time of entry with respect to locking or crossing other Orders on the Nasdaq Book, Protected Quotations, and potential execution as follows:

• If a Post-Only Order would lock or cross a Protected Quotation, <u>the Post Only Order may either be adjusted or be cancelled back to the Participant, depending on the Participant's choice; provided, however, the Post-Only Order will execute if (i) it is priced below $1.00 and the value of price improvement associated with executing against an Order on the Nasdaq Book (as measured against the original limit price of the Order) equals or exceeds the sum of fees charged for such execution and the value of any rebate that would be provided if the Order posted to the Nasdaq Book and subsequently provided liquidity, or (ii) it is priced at $1.00 or more and the value of price improvement associated with executing against an Order on the Nasdaq Book (as measured against the original limit price of the Order) equals or exceeds $0.01 per share. If the Participant elects to have the Post Only Order adjusted,</u> the price of the Order will first be adjusted. If the Order is Attributable, its adjusted price will be one minimum price increment lower than the current Best Offer (for bids) or higher than the current Best Bid (for offers). If the Order is not Attributable, its adjusted price will be equal to the current Best Offer (for bids) or the current Best Bid (for offers). However, the Order will not post or execute until the Order, as adjusted, is evaluated with respect to Orders on the Nasdaq Book.

— If the adjusted price of the Post-Only Order would not lock or cross an Order on the Nasdaq Book, the Order will be posted in the same manner as a Price to Comply Order (if it is not Attributable) or a Price to Display Order (if it is Attributable). Specifically, if the Post-Only Order is not Attributable, it will be displayed on the Nasdaq Book at a price one minimum price increment lower than the current Best Offer (for bids) or higher than the current Best Bid (for offers) but will be ranked on the Nasdaq Book with a non-displayed price equal to the current Best Offer (for bids) or to the current Best Bid (for offers). For example, if a Post- Only Order to buy at $11 would lock a Protected Offer of $11, the Order will be ranked at a non-displayed price of $11 but will be displayed at $10.99. If the Post-Only Order is Attributable, it will be ranked and displayed on the Nasdaq Book at a price one minimum increment lower than the current Best Offer (for bids) or higher than the current Best Bid (for offers). Thus, in the preceding example, the Post-Only Order to buy would be ranked and displayed at $10.99.

— If the adjusted price of the Post-Only Order would lock or cross a displayed Order at its displayed price on the Nasdaq Book, the Post Only Order may either be adjusted or be cancelled back to the Participant, depending on the Participant's choice; provided, however, the Post-Only Order will execute if (i) it is priced below $1.00 and the value of price improvement associated with executing against an Order on the Nasdaq Book (as measured against the original limit price of the Order) equals or exceeds the sum of fees charged for such execution and the value of any rebate that would be provided if the Order posted to the Nasdaq Book and subsequently provided liquidity, or (ii) it is priced at $1.00 or more and the value of price improvement associated with executing against an Order on the Nasdaq Book (as measured against the original limit price of the Order) equals or exceeds $0.01 per share. If the Participant elects to have the Post Only Order adjusted, the Post Only Order will be repriced, ranked, and displayed at one minimum price increment below the current best displayed price to sell on the Nasdaq Book (for bids) or above the current best displayed price to buy on the Nasdaq Book (for offers); provided, however, the Post-Only Order will execute if it meets the criteria above[(i) it is priced below $1.00 and the value of price improvement associated with executing against an Order on the Nasdaq Book (as measured against the original limit price of the Order) equals or exceeds the sum of fees charged for such execution and the value of any rebate that would be provided if the Order posted to the Nasdaq Book and subsequently provided liquidity, or (ii) it is priced at $1.00 or more and the value of price improvement associated with executing against an Order on the Nasdaq Book (as measured against the original limit price of the Order) equals or exceeds $0.01 per share]. For example, if a Participant entered a Non-Attributable Post-Only Order to buy at $11.01, another market center is displaying a Protected Offer at $11, and there is an Order on the Nasdaq Book to sell at $11, the adjusted price of the Post-Only Order will be $11. However, because the Post-Only Order would be executable against the Order on the Nasdaq Book and would receive $0.01 price

improvement (as measured against the original $11.01 price of the Post- Only Order), the Post-Only Order would execute.

— If the adjusted price of the Post-Only Order would lock or cross a non-displayed price on the Nasdaq Book, the Post-Only Order will be posted in the same manner as a Price to Comply Order; provided, however, the Post-Only Order will execute if (i) it is priced below $1.00 and the value of price improvement associated with executing against an Order on the Nasdaq Book (as measured against the original limit price of the Order) equals or exceeds the sum of fees charged for such execution and the value of any rebate that would be provided if the Order posted to the Nasdaq Book and subsequently provided liquidity, or (ii) it is priced at $1.00 or more and the value of price improvement associated with executing against an Order on the Nasdaq Book (as measured against the original limit price of the Order) equals or exceeds $0.01 per share. For example, if a Participant entered a Non-Attributable Post-Only Order to buy at $11.01, another market center is displaying a Protected Offer at $11, and there is a Non-Displayed Order on the Nasdaq Book to sell at $11, the adjusted price of the Post-Only Order will be $11. However, because the Post-Only Order would be executable against the Non-Displayed Order on the Nasdaq Book and would receive $0.01 price improvement (as measured against the original $11.01 price of the Post-Only Order), the Post-Only Order would execute.

• If the Post-Only Order would not lock or cross a Protected Quotation but would lock or cross a displayed Order at its displayed price on the Nasdaq Book, the Post Only Order may either be adjusted or be cancelled back to the Participant, depending on the Participant's choice; provided, however, the Post-Only Order will execute if (i) it is priced below $1.00 and the value of price improvement associated with executing against an Order on the Nasdaq Book (as measured against the original limit price of the Order) equals or exceeds the sum of fees charged for such execution and the value of any rebate that would be provided if the Order posted to the Nasdaq Book and subsequently provided liquidity, or (ii) it is priced at $1.00 or more and the value of price improvement associated with executing against an Order on the Nasdaq Book (as measured against the original limit price of the Order) equals or exceeds $0.01 per share. If the Participant elects to have the Post Only Order adjusted, the Post Only Order will be repriced, ranked, and displayed at one minimum price increment below the current best-priced Order to sell on the Nasdaq Book (for bids) or above the current best-priced Order to buy on the Nasdaq Book (for offers); provided, however, the Post-Only Order will execute if it meets the criteria above[(i) it is priced below $1.00 and the value of price improvement associated with executing against an Order on the Nasdaq Book equals or exceeds the sum of fees charged for such execution and the value of any rebate that would be provided if the Order posted to the Nasdaq Book and subsequently provided liquidity, or (ii) it is priced at $1.00 or more and the value of price improvement associated with executing against an Order on the Nasdaq Book equals or exceeds $0.01 per share]. For example, if a

Participant entered a Post-Only Order to buy at $11.02, the Best Offer on an away exchange was $11.04, and there was a Displayed Order on the Nasdaq Book to sell at $11.02, the Post-Only Order would be ranked and displayed at $11.01. However, if a Participant entered a Post-Only Order to buy at $11.03, the Order would execute against the Order on the Nasdaq Book at $11.02, receiving $0.01 per share price improvement.

• If the Post-Only Order would not lock or cross a Protected Quotation but would lock or cross a non-displayed Order on the Nasdaq Book, the Post-Only Order will be posted, ranked, and displayed at its limit price; provided, however, the Post-Only Order will execute if (i) it is priced below $1.00 and the value of price improvement associated with executing against an Order on the Nasdaq Book equals or exceeds the sum of fees charged for such execution and the value of any rebate that would be provided if the Order posted to the Nasdaq Book and subsequently provided liquidity, or (ii) it is priced at $1.00 or more and the value of price improvement associated with executing against an Order on the Nasdaq Book equals or exceeds $0.01 per share. For example, if a Participant entered a Post-Only Order to buy at $11.02, the Best Offer was $11.04, and there was a Non-Displayed Order on the Nasdaq Book to sell at $11.02, the Post-Only Order would be ranked and displayed at $11.02. However, if a Participant entered a Post-Only Order to buy at $11.03, the Order would execute against the Order on the Nasdaq Book at $11.02, receiving $0.01 per share price improvement.

• If a Post-Only Order is entered with a Time-in-Force of IOC, the Order will be evaluated for possible execution in the same manner as any other Post-Only Order but will be cancelled rather than posted if the Order cannot execute.

• If a Post-Only Order would not lock or cross an Order on the Nasdaq Book or any Protected Quotation, it will be posted on the Nasdaq Book at its entered limit price.

During Pre-Market and Post-Market Hours, a Post-Only Order will be processed in a manner identical to Market Hours with respect to locking or crossing Orders on the Nasdaq Book, but will not be cancelled or have its price adjusted with respect to locking or crossing the quotations of other market centers.

(B) – (C) No Change.

(5) – (13) No Change.
