4759. Data Feeds Utilized

The NASDAQ System utilizes the below proprietary and network processor feeds for the handling, routing, and execution of orders, as well as for the regulatory compliance processes related to those functions. The Primary Source of data is used unless it is delayed by a configurable amount compared to the Secondary Source of data. The Exchange will revert to the Primary Source of data once the delay has been resolved. The configurable amount described in this rule will be made available to members via Equity Trader Alert. [The Secondary Source of data is, where applicable, utilized only in emergency market conditions and only until those emergency conditions are resolved.]
