#### Rule 6.91. Electronic Complex Order Trading

For purposes of this Rule, an “Electronic Complex Order” means any Complex Order as defined in Rule 6.62(e) or any Stock/Option Order or Stock/Complex Order as defined in Rule 6.62(h) that is entered into the NYSE Arca System.

(a)- (c) No Change

#### *Commentary:*

.01 - .02 No Change

.03 [Reserved.] Complex Order Table Cap: Electronic Complex Orders in the Consolidated Book are ranked and tracked in a “complex order table,” the capacity of which is determined by the Exchange. A cap will be set to prevent OTP Holders or OTP Firms (collectively “OTPs”) from utilizing more than “n%” of the capacity of the complex order table during the trading day (“Complex Order Table Cap”). If an OTP utilizes more than “n%-x” of the complex order table, the OTP’s Electronic Complex Orders will be rejected until such time that the OTP has notified the Exchange to re-enable the submission of Electronic Complex Orders. If, however, the Complex Order Table Cap is breached (i.e., the OTP submits orders in excess of “n%” of the complex order table), all Electronic Complex Orders submitted by that OTP will be rejected for the remainder of the trading day. Unless determined otherwise by the Exchange and announced to OTPs via Trader Update, the specified percentage (i.e., “n%”) will be no less than 60%, and “n%-x” will be no less than 40%.
