Rule 3304. Data Feeds Utilized
(a) The PSX System [utilizes] consumes quotation data from the below proprietary and
network processor feeds for the handling, routing, and execution of orders, as well as for
the regulatory compliance processes related to those functions. The Primary Source of
data is used unless it is delayed by a configurable amount compared to the Secondary
Source of data. The Exchange will revert to the Primary Source of data once the delay
has been resolved. The configurable amount described in this rule will be made available
to members via Equity Trader Alert.
