9 **UNITED STATES DISTRICT COURT**  
10 **NORTHERN DISTRICT OF CALIFORNIA**  
11 **SAN FRANCISCO DIVISION**

13 UNITED STATES SECURITIES AND  
14 EXCHANGE COMMISSION,

15 Plaintiff,

16 vs.

17 VOLKSWAGEN  
18 AKTIENGESELLSCHAFT, MARTIN  
19 WINTERKORN, VOLKSWAGEN GROUP  
20 OF AMERICA FINANCE, LLC, and VW  
CREDIT, INC.,

21 Defendants.

Case No.

**COMPLAINT**

Hon.

**JURY DEMANDED**

22 **COMPLAINT**

23  
24 Plaintiff United States Securities and Exchange Commission (“SEC”) brings this  
25 action against defendants Volkswagen Aktiengesellschaft (“VWAG”), Martin Winterkorn  
26 (“Winterkorn”), Volkswagen Group of America Finance, LLC (“VWGoAF”), and VW Credit,  
27 Inc. (“VCI”), and alleges as follows:  
28

I.  
SUMMARY

1  
2  
3 1. From at least 2007 through September 2015, VW perpetrated a massive  
4 fraud.<sup>1</sup> VW, including its CEO Martin Winterkorn and numerous other senior officials,  
5 repeatedly lied to and misled United States investors, consumers, and regulators as part  
6 of an illegal scheme to sell its purportedly “clean diesel” cars and billions of dollars of  
7 corporate bonds and other securities in the United States. VW marketed these bonds and  
8 other securities without disclosing that its “clean diesel” cars used defeat devices to  
9 conceal substantial emissions problems.

10 2. Winterkorn and other VW executives were made aware of the defeat device  
11 as early as November 2007, during a meeting with VW engineers, to discuss the emissions  
12 problems with VW’s “clean diesel” vehicles. Although at least one meeting participant  
13 warned that putting the existing vehicles on the road in the U.S. would damage VW’s  
14 reputation if the vehicles’ high emissions were later discovered, those concerns were  
15 ignored.

16 3. VW subsequently sold in the U.S. hundreds of thousands of “clean diesel”  
17 vehicles containing the defeat device. Meanwhile, it raised billions of dollars from U.S.  
18 investors to fund its expanding sales of “clean diesel” cars across the globe. Years later,  
19 when U.S. authorities began investigating emissions problems with VW vehicles, the  
20 company misled government investigators, concocted a sham software fix, and destroyed  
21 thousands of incriminating documents and other evidence.

22 4. Eventually, U.S. regulators exposed the long-running fraud and ensuing  
23 cover-up, and VW was forced to admit its criminal behavior. On March 10, 2017, VW pled  
24 guilty in a United States District Court to conspiracy to commit fraud, obstruction of  
25 justice, and importing goods by false statements.

26  
27  
28 

---

<sup>1</sup> Unless otherwise indicated, “VW” refers to VWAG including its subsidiaries and  
affiliated companies.

1           5.       Although the seeds of VW’s “clean diesel” fraud were sown in 2005, the  
2 scheme firmly took root in early 2007. That is when defendant Martin Winterkorn was  
3 named CEO and Chairman of VWAG’s Board of Management. Winterkorn, who had spent  
4 decades climbing the corporate ladder at VW, announced a bold and aggressive plan to  
5 make VW the biggest, most profitable, and most environmentally-friendly car company in  
6 the world by 2018.

7           6.       The success of Winterkorn’s plan—dubbed “Strategy 2018”—depended in  
8 large part on VW’s ability to develop, market, and sell its diesel vehicles, particularly in  
9 the United States. Known historically for being more powerful and fuel efficient than their  
10 gasoline counterparts, diesel engines emitted far more harmful pollutants into the  
11 environment. Diesel vehicles, therefore, had difficulty complying with the strict vehicle  
12 emissions laws in the United States and were unpopular with American consumers.

13          7.       But VW claimed to have developed a revolutionary solution to this problem—  
14 the “clean diesel” engine. During Winterkorn’s reign as CEO, VW unleashed a global  
15 marketing campaign touting its groundbreaking “clean diesel” engines and its supposed  
16 commitment to reducing toxic vehicle emissions. The successful production and sale of cars  
17 with “clean diesel” engines was the cornerstone of Winterkorn’s plan to dominate the  
18 world auto industry.

19          8.       Over the next several years, Winterkorn’s plan began bearing fruit. By the  
20 end of 2013, VW increased its annual sales of diesel vehicles in the United States from  
21 approximately 43,000 in 2009 to over 111,000 in 2013—a more than 150% increase in 4  
22 years. Globally, sales of all VW vehicles increased 54% over the same period. And by mid-  
23 2015, VW reached the first milestone of Winterkorn’s ambitious goal. It surpassed Toyota  
24 in global sales, becoming the largest carmaker in the world.

25          9.       To finance their ambitious Strategy 2018, VW and Winterkorn needed  
26 money. And they relied on the U.S. capital markets to get it. From 2010 to 2015, VW sold  
27 billions of dollars of corporate bonds and asset-backed securities (“ABS”) in the United  
28 States. In its offering documents, VW stressed its continuing commitment to and

1 dependence upon developing energy-efficient vehicles and the reduction of vehicle  
2 emissions. VW assured bond underwriters that its cars complied with all applicable  
3 emissions laws and regulations.

4 10. But it was all a lie. VW's "clean diesel" engines were a fraud. They did not  
5 exist. In fact, the engines emitted pollutants, including nitrogen oxides ("NOx")—described  
6 by the U.S. Environmental Protection Agency ("EPA") as a family of poisonous, highly  
7 reactive gases—into the environment at levels nearly 40-times greater than U.S.  
8 emissions limits.

9 11. To hide this fact, VW installed illegal software (called a "defeat device") in 11  
10 million diesel vehicles sold worldwide, including more than 580,000 in the United States.  
11 The defeat device software recognized when the car was being tested on a treadmill and  
12 then reduced the car's emissions to legal levels. When the defeat device sensed the car was  
13 being driven in normal road conditions, it deactivated the car's emission control system,  
14 causing it to emit excessive amounts of NOx gas into the environment.

15 12. For years, VW lied and made misleading omissions to conceal the existence of  
16 a defeat device. VW lied about its cars' compliance with environmental regulations and its  
17 commitment to protecting the environment. It lied to U.S. investors, who then paid  
18 artificially inflated prices for VW's bonds and ABS. These investors did not know that VW  
19 was lying to consumers to fool them into buying its "clean diesel" cars and lying to  
20 government authorities in order to sell cars in the United States that did not comply with  
21 U.S. emission standards. The entire time, Winterkorn and other senior officials at VW  
22 knew the truth: VW's "clean diesel" engine was a sham.

23 13. VW's elaborate fraud started to unravel in March 2014. During an industry  
24 conference held in San Diego, researchers from West Virginia University disclosed the  
25 results of a study commissioned by the International Council on Clean Transportation  
26 ("ICCT Study"). Using equipment capable of testing a car's emission levels while it was  
27 being driven in normal road conditions (as opposed to on a treadmill), the researchers  
28

1 announced that two of the three cars they tested discharged NOx pollutants at levels  
2 greatly exceeding legal limits.

3 14. Although the ICCT researchers did not reveal the makes and models of the  
4 cars tested, VW employees in attendance knew immediately the two cars that  
5 dramatically failed the emissions tests were Volkswagens. It was only a matter of time  
6 before U.S. regulators began asking questions and demanding answers from VW about its  
7 cars' elevated NOx emissions.

8 15. Word of the ICCT Study spread quickly throughout VW. By May 2014,  
9 multiple internal memos were circulating inside VW among its most senior officials,  
10 including Winterkorn, detailing the depth of the problems VW was facing:

- 11 (a) VW's "clean diesel" engines were emitting deadly NOx at levels nearly  
12 40-times legal limits;
- 13 (b) there was no way to fix the problem; and
- 14 (c) U.S. regulators were investigating and would look for a defeat device.

15 16. By VW's own assessment, its potential financial liability for the fraud  
16 exceeded \$20 billion. VW faced a choice. It could admit its scheme or cover it up. It chose a  
17 cover-up.

18 17. Senior VW employees and engineers repeatedly told U.S. regulators they did  
19 not know what was causing VW's cars to exceed U.S. emissions limits; they implemented a  
20 bogus software fix they knew would not solve the emissions problems with their cars; and,  
21 when discovery of the fraud became inevitable, VW employees began destroying  
22 documents and ditching their cell phones.

23 18. At the same time VW was deceiving U.S. regulators, it pressed ahead with  
24 Winterkorn's strategy of conquering the world automotive industry. And it needed more  
25 and more money from U.S. investors to do it. Between May 2014 and June 2015, VW  
26 conducted three separate bonding offerings in the U.S., selling over \$8 billion of bonds to  
27 U.S. investors. It also sold over \$4.9 billion of ABS in the United States in 2014 and 2015.

1           19. The U.S. capital markets, including the corporate bond market, depend on  
2 true, complete, and honest disclosures by market participants. By keeping the defeat  
3 device and the scope of VW's legal exposure on this issue hidden from U.S investors, VW  
4 was able to pay lower interest rates on these securities, thereby defrauding investors out  
5 of hundreds of millions of dollars.

6           20. Eventually, VW's "clean diesel" fraud and ensuing cover-up collapsed in  
7 August 2015. That is when one of its employees confessed unexpectedly to EPA and  
8 California state regulators that VW had been using a defeat device in its "clean diesel"  
9 cars. Following its employee's unauthorized confession, VW was forced to formally admit  
10 its fraud to U.S. regulators on September 3, 2015. The EPA issued a Notice of Violation  
11 ("NOV") to VW on September 18, 2015, and announced that it would not certify any of  
12 VW's model year 2016 vehicles for sale in the United States.

13           21. When notice of VW's fraud became public, the price of its bonds and ABS fell  
14 in secondary market trading. Major ratings agencies downgraded VW's bonds. VW did not  
15 conduct another bond or public ABS offering in the United States for over three years.

16           22. On March 10, 2017, VWAG pled guilty in a United States District Court  
17 to three criminal felony counts arising out of its massive "clean diesel" conspiracy. VW  
18 paid the Department of Justice a \$2.8 billion penalty for its crimes. It paid billions more to  
19 resolve civil claims brought by the EPA, state attorneys general, and consumers who  
20 unwittingly purchased cars with defeat devices.

21           23. VW, however, has never repaid the hundreds of millions of dollars in benefit  
22 it fraudulently obtained from the sale of its corporate bonds and ABS. Had the truth been  
23 known, VW never would have gotten away with charging U.S. investors artificially  
24 inflated prices for its bonds and ABS.

25           24. The SEC brings this civil enforcement action seeking permanent injunctions,  
26 disgorgement with prejudgment interest, and civil penalties against the corporate  
27 defendants, as well as permanent injunctions, civil penalties and an officer-and-director  
28 bar against Winterkorn, as a result of their violations of Section 17(a) of the Securities Act

1 of 1933 (“Securities Act”) [15 U.S.C. § 77q(a)] and Section 10(b) of the Securities Exchange  
2 Act of 1934 (“Exchange Act”) [15 U.S.C. § 78j(b)] and Rule 10b-5 [17 C.F.R. § 240.10b-5]  
3 thereunder.

4 **II.**

5 **JURISDICTION AND VENUE**

6 25. The SEC brings this action pursuant to Sections 20(b) and 20(d) of the  
7 Securities Act [15 U.S.C. §§ 77t(b), (d)] and Sections 21(d) and 21(e) of the Exchange Act  
8 [15 U.S.C. §§ 78u(d), (e)].

9 26. This Court has jurisdiction over this action pursuant to Section 22 of the  
10 Securities Act [15 U.S.C. § 77v], Section 27 of the Exchange Act [15 U.S.C. § 78aa], and  
11 28 U.S.C. § 1331.

12 27. Venue is proper in this Court pursuant to Section 22(a) of the Securities Act  
13 [15 U.S.C. § 77v(a)] and Section 27 of the Exchange Act [15 U.S.C. § 78aa]. Defendants  
14 offered and sold securities in this district. Acts, practices, and courses of business  
15 constituting violations alleged herein occurred within this district and elsewhere.  
16 Moreover, defendants transacted business in this district.

17 28. Venue also is appropriate pursuant to 28 U.S.C. § 1391. A substantial part of  
18 the events or omissions giving rise to the claims occurred within this district. [28 U.S.C. §  
19 1391(b)(2).] In addition, any defendant not resident in the United States may be sued in  
20 any judicial district. [28 U.S.C. § 1391(c)(3) and (d).]

21 29. Defendants, directly and indirectly, made use of means or instruments of  
22 transportation or communication in interstate commerce, or of the mails, or of any facility  
23 of a national securities exchange in connection with the alleged acts, practices, and  
24 courses of business.

25 30. There is a reasonable likelihood that defendants will, unless enjoined,  
26 continue to engage in the transactions, acts, practices and courses of business set forth in  
27 this complaint, and transactions, acts, practices and courses of business of similar purport  
28 and object.

**III.**  
**DEFENDANTS**

1  
2  
3       31.     **Volkswagen Aktiengesellschaft (“VWAG”)** is a multinational automotive  
4 manufacturing company headquartered in Wolfsburg, Germany. VWAG is the ultimate  
5 parent and controlling company of numerous subsidiary companies and organizations,  
6 including the Volkswagen Group (“VW Group”). VWAG, through the VW Group, develops,  
7 produces, and sells vehicles for twelve automotive brands: Volkswagen Passenger Cars,  
8 Volkswagen Commercial Vehicles, Audi, Porsche, Bentley, Bugatti, Lamborghini, Ducati,  
9 Scania, Man, Seat, and Skoda.

10       32.     VWAG is managed by a Board of Management, which has responsibility for  
11 managing the business activities of VWAG, including the VW Group. Each member of the  
12 Board of Management is designated responsibility for supervising one or more specific  
13 functions with the VW Group—such as Research and Development (“R&D”). VWAG also  
14 has a Supervisory Board that appoints and supervises the VWAG Board of Management.

15       33.     VW Group and each of its twelve brands also have their own boards of  
16 management, all of which report to and must follow the directives of the VWAG Board of  
17 Management. The members of the VWAG Board of Management also sit on the VW Group  
18 Board of Management.

19       34.     VWAG is the ultimate parent and controlling company of several financing  
20 subsidiaries, including defendants VWGoAF and VCI. At all relevant times, VWAG was  
21 involved in the daily operations of and exercised power and control over VWGoAF  
22 including by, among other things, appointing its boards of directors and executive officers  
23 and by directing and approving its financial and operational activities.

24       35.     At all relevant times, VWAG, through subsidiaries such as VWGoAF and  
25 VCI, offered and sold securities in the United States to U.S. investors in order to finance  
26 its and its subsidiaries’ business operations. VWAG is and was exempt from the  
27 registration requirements of Section 12(g) of the Exchange Act pursuant to Rule 12g3-2(b)  
28 promulgated thereunder. Pursuant to Rule 12g3-2(b) and other applicable rules pursuant

1 to which it offered and sold securities in the United States, VWAG published in English on  
2 its website certain required financial information, including its annual and interim  
3 financial statements, for the benefit of U.S. investors.

4       **36. Martin Winterkorn**, age 71, resides in or near Wolfsburg, Germany.  
5 Winterkorn worked directly for VWAG or affiliated companies for 30 years, until his  
6 resignation in or about September 2015. Winterkorn was appointed Chief Executive  
7 Officer and Chairman of VWAG's Board of Management in 2007. From approximately  
8 January 2007 until at least September 2015, Winterkorn held, among others, the following  
9 positions:

- 10           (a) CEO of VWAG;
- 11           (b) Chairman of VWAG's Board of the Management;
- 12           (c) Head of the R&D department for VWAG; and
- 13           (d) Chairman of the Board of Directors of  
14                Volkswagen Group of America, Inc.

15       **37.** Winterkorn also served as Chairman of the Board of Management of Porsche  
16 Automobil Holding SE ("Porsche") until his resignation on October 17, 2015, and  
17 Chairman of the Supervisory Board of Audi AG ("Audi") until his resignation on November  
18 11, 2015.

19       **38.** In 2014, Winterkorn's compensation was approximately €15.8 million. In  
20 2015, he received €7.3 million in compensation through September 2015. In addition,  
21 Winterkorn had a vested pension benefit valued at more than €28.5 million by 2015.

22       **39. Volkswagen Group of America Finance, LLC ("VWGoAF")** is a  
23 Delaware limited liability company with its principal place of business in Herndon,  
24 Virginia. VWGoAF is a wholly-owned subsidiary of Volkswagen Group of America, Inc.  
25 ("VWGoA"), which itself is a wholly-owned subsidiary of VWAG. VWGoAF was  
26 incorporated on February 14, 2014 to serve as a "finance subsidiary" for VW. VWAG's  
27 Board of Management, including Winterkorn, directed and approved the incorporation of  
28

1 VWGoAF for the sole purpose of financing VW's business operations through the issuance  
2 of corporate debt in the United States (with VWAG as the guarantor of the debt).

3 40. VWGoAF has no employees of its own and has no business operations other  
4 than issuing debt securities in the United States. All VWGoAF executives and directors  
5 were and are employed by a different VW entity. As a finance subsidiary for VW, VWGoAF  
6 is and was exempt from the registration requirements of the U.S. securities laws pursuant  
7 to Rule 3a-5 of the Investment Company Act of 1940. As a result of the public disclosure of  
8 VW's "clean diesel" fraud in 2015, it did not conduct another bond offering in the United  
9 States for over three years.

10 41. **VW Credit, Inc. ("VCI")** is a Delaware corporation with its principal place  
11 of business in Herndon, Virginia. Like VWGoAF, it too is a wholly-owned subsidiary of  
12 VWGoA. VCI's principal activity is acting as a finance subsidiary of VWGoA, including  
13 purchasing retail installment sales contracts, loans, and leases from Volkswagen and Audi  
14 dealers. VCI has sponsored numerous public and private securities offerings in the United  
15 States since 2009, including several publicly offered vehicle lease and loan ABS. VCI  
16 stopped issuing public ABS in 2015, as a result of the public disclosure of VW's "clean  
17 diesel" fraud.

#### 18 IV.

#### 19 RELATED PARTIES

20 42. **Volkswagen Group of America, Inc.** is a New Jersey corporation with its  
21 principal place of business in Herndon, Virginia. VWGoA is a wholly-owned subsidiary of  
22 VWAG. VWGoA advertises, markets, sells, and leases Volkswagen and Audi vehicles  
23 through dealers and independent distributors across the United States. At all relevant  
24 times, Winterkorn was the Chairman of the Board of Directors of VWGoA.

25 43. **Audi AG** ("Audi") is a motor vehicle manufacturer based in Ingolstadt,  
26 Germany and a subsidiary of VWAG. At all relevant times, VWAG owned 99.55% of Audi.

## V.

FACTSA. VW Stakes Its Future On “Clean Diesel” Technology.

44. In 2005, VW made a strategic decision to launch a large-scale promotion of diesel vehicles in the United States. Rather than follow the lead of carmakers like Toyota and General Motors, who were investing in hybrid technology, VW committed to developing a “clean diesel” engine to satisfy the public’s growing demand for environmentally-friendly vehicles, especially in the United States.

45. Traditional diesel engines, although generally more fuel efficient and powerful than gasoline engines, emitted far greater amounts of toxic and ecologically harmful pollutants into the air. Diesel vehicles, therefore, had difficulty complying with U.S. environmental laws and regulations, which placed strict limits on the level of pollutants that could be emitted from new cars sold in the United States. Already among the most demanding in the world, the emissions regulations in place in the U.S. were scheduled to get even tougher in 2007.

46. In the mid-2000s, Martin Winterkorn was a member of VWAG’s powerful Board of Management and the Head of the R&D department for VW. VW was spending billions of dollars on research and development, including millions of dollars to develop a clean diesel engine. Winterkorn, a detail-oriented and hands-on manager, was committed to introducing a new diesel vehicle to the United States market.

47. In January 2007, Winterkorn was promoted to CEO and Chairman of the Board of Management of VWAG. Soon after his ascension to the apex of VW, Winterkorn announced an ambitious and aggressive plan to make VW the largest, most profitable, and most environmentally-friendly car maker in the world by 2018. Winterkorn’s plan was called “Strategy 2018.”

48. Achieving a dramatic growth in sales of VW vehicles in the United States, particularly sales of diesel vehicles, was a vital component of Winterkorn’s Strategy 2018. But it was no easy task. For years, VW tried unsuccessfully to develop a diesel car that

1 both complied with U.S. environmental regulations and appealed to the American  
2 consumer.

3 49. In 2006, the year prior to Winterkorn taking control, VW sold fewer than  
4 240,000 cars in the U.S., with only about 35,000 of those being diesels. And after the U.S.  
5 tightened its emissions laws in 2007, VW was forced to withdraw from the U.S. diesel car  
6 market altogether.

7 50. Around the time Winterkorn was named CEO in January 2007, VW claimed  
8 it had solved the engineering enigma that had long-stumped car manufacturers. VW  
9 announced it was developing a 2.0-liter “clean TDI [turbo direct injection]” diesel engine  
10 that would comply with U.S. emissions laws without sacrificing the power and fuel-  
11 efficiency of a traditional diesel engine. VW’s new “clean diesel” cars were expected to be  
12 released in the United States in late 2008, as part of its Model Year (“MY”) 2009 lineup.

13 51. With the introduction of VW’s “clean diesel” cars, its sales steadily increased  
14 both in the United States and across the world. By 2012, VW was selling approximately  
15 100,000 “clean diesel” vehicles annually in the United States. By mid-2015, VW checked  
16 off the first of its Strategy 2018 goals. It moved past both General Motors and Toyota in  
17 global sales, becoming the largest carmaker in the world—three years ahead of  
18 Winterkorn’s schedule. VW’s “clean diesel” vehicles were a smashing success, with over 11  
19 million sold worldwide, including nearly 600,000 in the United States.

20 52. During this time, VW relied heavily on the U.S. financial markets to fuel its  
21 aggressive growth, selling billions of dollars of bonds and asset-backed securities in the  
22 United States. As part of its pitch to potential investors and underwriters, VW  
23 championed its “clean diesel” technology, emphasized its commitment to reducing  
24 emissions and producing environmentally-friendly vehicles, and guaranteed that its cars  
25 complied with “all environmental laws” in the United States.

26 53. But there was one problem. It was all a lie.  
27  
28

1 **B. Defendant Martin Winterkorn Rises to the Top of VW.**

2 54. Defendant Martin Winterkorn devoted his entire professional life to the  
3 German automobile industry. Shortly after obtaining his doctorate in Metal Research and  
4 Metal Physics in 1977, he went to work for Robert Bosch GmbH. In 1981, Winterkorn  
5 joined Audi, as an assistant to the member of Audi's Board of Management responsible for  
6 Quality Assurance. From there, he spent the next 30 years ascending the ranks of Audi  
7 and its parent company VWAG, all in positions devoted to quality assurance and technical  
8 development.

9 55. In 1993, Winterkorn was made the Head of Quality Assurance for the entire  
10 VW Group. In 1996, he was appointed to be the Member of the VW Brand Board of  
11 Management responsible for the Technical Development department. He joined VWAG's  
12 Board of Management in 2000 and was made the Head of the R&D department for VW.

13 56. In 2002, Winterkorn was named CEO and Chairman of the Board of  
14 Management for Audi. In 2003, he became the Head of the Technical Development  
15 department at Audi. He held these positions until the end of 2006.

16 57. In or about January 1, 2007, Winterkorn was appointed CEO of VWAG and  
17 Chairman of the VWAG Board of Management. He continued to serve as the Head of R&D  
18 for VW. He remained in these positions until he resigned from VW in September 2015.

19 58. During a professional career that spanned over three decades, Winterkorn  
20 earned a reputation as a demanding, detail-oriented micro-manager who took pride in his  
21 hands-on management style.

22 59. After he was named CEO and Chairman of the VWAG Board of Management  
23 in January 2007, Winterkorn made certain there was no confusion among the public about  
24 whether he would retain control of the technical aspects of the business. During a March  
25 2007 earnings call, Winterkorn proclaimed: "I, myself, will assume responsibility for [VW]  
26 Group research and development."

27 60. In VWAG's 2010 annual report, the company highlighted a conversation  
28 between Winterkorn and German astronaut Hans Wilhelm Schlegel, in which the two

1 compared their “share[d] passion for scientific analysis combined with hands-on  
2 expertise.” The annual report described Winterkorn as “someone who is *au fait* [*i.e.*,  
3 knowledgeable or skilled] with every last technical detail,” and quoted Winterkorn as  
4 stating:

5           The Volkswagen Group is so successful today because this  
6 notion of ‘digging deeper’ has become part of our corporate  
7 culture. . . . As an automotive manager, it is not enough simply  
8 to enjoy driving cars—you have to understand them right down  
9 to every last detail. Many things in our Group today only work  
10 because my Board of Management colleagues and I are  
11 extremely well versed in all aspects of the business. If  
12 developers say that a solution is not possible from a technical,  
13 timing, or financial point of view, I am able to challenge them.  
14 And everyone knows that.

15           61. As CEO and Chairman of VWAG, Winterkorn frequently traveled the world  
16 to attend and make presentations at car shows to promote VW’s cars and its “clean diesel”  
17 technology. He traveled to the United States more than 20 different times during this  
18 period.

19           62. Winterkorn did not attend the shows simply as a figurehead, there to draw a  
20 spotlight and drum up media attention for the VW Group. While there, he inspected cars,  
21 both VW’s and its competitors. He used micrometers and tape measures to verify technical  
22 specifications, even getting down on his hands and knees to inspect a car’s undercarriage  
23 or tailpipe assembly.

24           63. The following pictures (a. through d.) show Winterkorn examining various  
25 vehicles during visits to auto shows while he was the CEO and Chairman of VWAG’s  
26 Board of Management:  
27  
28

a.

b.

c.

d.

64. By Winterkorn’s own admission, his “love for details” and “perfect processing” were personal trademarks known to “[e]veryone.” And he was proud of it. As CEO, he boasted that he could “identify with” managers who “keep [their] finger[s] on the pulse of events.”

**C. VW’s “Clean Diesel” Engines Were Anything But Clean.**

65. When VW first introduced its new “clean diesel” engine to the U.S. market with the launch of its MY 2009 Jetta, it appeared to the world that VW had solved the emissions mystery that had tormented developers for years. Winterkorn and other senior officials and engineers inside VW, however, knew the truth. VW’s “clean diesel” engine was a complete fraud.

66. VW’s so-called “clean diesel” cars sold in the U.S. failed to comply with applicable U.S. emissions laws. As environmentally-conscious consumers proudly piloted their new “clean diesel” cars over the roads, streets, and highways of America’s smallest

1 towns and biggest cities, they unwittingly spewed alarming quantities of toxic pollution  
2 into the environment.

3 67. Defendants, meanwhile, continued peddling the success of VW's "clean diesel"  
4 technology and its supposed commitment to protecting the environment in order to sell  
5 billions of dollars of bonds and ABS to American investors at inflated prices. VW used the  
6 money to finance its growing operations and fulfill Winterkorn's promise to make VW the  
7 biggest and most profitable car company in the world—even if not the most  
8 environmentally-friendly.

9 **1. The Use of a "Defeat Device" is Illegal**  
10 **Under Applicable Federal and State Laws.**

11 68. At all relevant times, applicable environmental laws in the United States  
12 prohibited vehicle manufacturers from selling or offering for sale any new motor vehicle  
13 unless the vehicle complied with U.S. emissions requirements, including NOx emissions  
14 standards, and was issued an EPA certificate of conformity.

15 69. To obtain a certificate of conformity, a manufacturer had to submit an  
16 application to the EPA for each model year and for each test group of vehicles that it  
17 intended to sell in the United States. It had to include, among other things, a  
18 description of the engine, the emission control system, and fuel system components,  
19 including a detailed description of each Auxiliary Emission Control Device ("AECD")  
20 installed on the vehicle.

21 70. U.S. law defines an AECD as "any element of design which senses  
22 temperature, vehicle speed, engine RPM, transmission gear, manifold vacuum, or any  
23 other parameter for the purpose of activating, modulating, delaying, or deactivating the  
24 operation of any part of the emission control system."

25 71. The manufacturer was also required to include a justification for each AECD.  
26 If the EPA determined the AECD "reduced the effectiveness of the emission control system  
27 under conditions which may reasonably be expected to be encountered in normal vehicle  
28 operation and use," and the need for it was not otherwise justified, the AECD was

1 considered a “*defeat device*.” It was called a “defeat device” because the AECD defeated  
2 regulators’ efforts to measure the vehicle’s actual emission levels by activating the  
3 emission control system only during testing. At all relevant times, U.S. and state laws  
4 prohibited the installation of any “defeat device” on vehicles sold in the United States, a  
5 fact that was known to all defendants.

6 72. The California Air Resources Board (“CARB”) (together with the EPA,  
7 “U.S. regulators”) issued its own certificates, called executive orders, for the sale of  
8 motor vehicles in the State of California. To obtain such a certificate, the  
9 manufacturer was required to satisfy the standards set forth by the State of  
10 California, which were equal to or more stringent than those of the EPA.

11 **2. VW Installs “Defeat Devices” in Millions of Diesel Vehicles.**

12 73. Beginning in or about 2008, VW installed defeat devices in over 11 million of  
13 its “clean diesel” vehicles sold worldwide, including over 580,000 sold in the United States.  
14 The defeat device designed and used by VW was computer software installed in the  
15 vehicle’s electronic control module that sensed when the vehicle was being tested on a  
16 treadmill (a “dynamometer”—also known as a “dyno” or “roller”), or when it was being  
17 operated under normal road driving conditions.

18 74. VW’s defeat device was made possible by the way regulators tested vehicles  
19 for emissions compliance. In the United States, emissions tests are performed on a  
20 dynamometer. During the test, a vehicle follows precise “drive cycles” which define the  
21 conditions of the test, such as temperature, acceleration, speed, engine RPMs, etc. The  
22 specifics of the drive cycles are both standardized and publicly available. Knowing the  
23 exact test conditions made it possible for VW to design software that could accurately  
24 detect when the vehicle was being tested and when it was not.

25 75. When the defeat device recognized an EPA/CARB drive cycle, it caused  
26 the vehicle to operate in “dyno mode.” In “dyno mode,” the emission control system  
27 functioned at full capacity, thereby reducing NOx emissions to levels that complied  
28 with federal and state standards, but also reducing the vehicle’s power and torque.

1           76.    When the defeat device software sensed the vehicle was being driven on  
2 the road, it caused the vehicle to operate under a different “road mode” (sometimes  
3 called “street mode” or “normal mode”) that produced full power and torque, but  
4 reduced the effectiveness of the emission control system. As a result, during normal  
5 road operation (*i.e.*, street mode), the vehicles emitted NO<sub>x</sub> at levels nearly 40-times  
6 the EPA and CARB limits.

7           77.    The “dual mode” defeat device VW installed in its vehicles was originally  
8 developed and implemented by Audi, while Winterkorn served as Audi’s CEO and the  
9 Head of the Technical Development department.

10          78.    Audi ran into early emissions-related engineering challenges in 1999, as it  
11 embarked on the development of its large, 3.0-liter V6 diesel engine luxury cars for the  
12 European market. Audi later “solved” the problem by developing and installing defeat  
13 device software in its European-market Audi 3.0-liter V6 diesels from 2004 to 2008.

14          79.    Two of Audi’s top engineers during this time were ENGINEER 1 and  
15 ENGINEER 2. ENGINEER 1 was the Head of Engines and Transmissions Development  
16 for Audi. ENGINEER 2 was Audi’s chief engineer. Both reported to Winterkorn.

17           **3.    Winterkorn is Told About VW’s Use of a Defeat Device in 2007.**

18          80.    In or about February 2007, shortly after he became CEO of VWAG,  
19 Winterkorn brought over ENGINEER 1 and ENGINEER 2 to VWAG. At the time, VW  
20 engineers were struggling to develop a marketable diesel engine that would comply with  
21 strict emissions laws in the United States. Winterkorn made ENGINEER 1 the Head of  
22 Powertrain, and ENGINEER 2 the Head of Development for the VW Brand. ENGINEER 1  
23 and ENGINEER 2 were involved in the development of the “clean diesel” engine. They  
24 would subsequently become two of the first VW executives suspended once VW’s emissions  
25 cheating became public.

26          81.    In November 2007, engineers from VW’s Brand Engine Development  
27 Department met with Winterkorn and a few other members of the VW Brand Board of  
28 Management to discuss problems the engineers were encountering trying to develop a

1 diesel engine that complied with U.S. NO<sub>x</sub> emissions limits, and to discuss possible  
2 hardware and software modifications. ENGINEER 1 and ENGINEER 2 also attended this  
3 meeting.

4 82. The engineers from the Brand Engine Development department informed  
5 Winterkorn and the others present that the VW diesel vehicles being developed for sale in  
6 the U.S. used a dual-mode emissions system with an “on-cycle” and “off-cycle.” It was  
7 further explained that emissions are higher in the off-cycle mode than in the on-cycle  
8 mode. The participants also used the term “emissions-tight” to describe the on-cycle mode,  
9 where the engine would produce lower emissions. Winterkorn was present and  
10 participated in these discussions.

11 83. The engineers used presentation slides during the November 2007 meeting.  
12 They also prepared a set of backup slides that included additional details for the engineers  
13 to support their presentation. The backup slides referenced the dual-mode capability of  
14 the emission control software. They specifically mentioned both a “normal operation” mode  
15 and an “emission-tight operation” mode. They also referenced the software’s “[r]ecognition  
16 of other driving cycles” and its “[r]ecognition of a roller adjustment.”

17 84. During the November 2007 meeting, Jens Hadler, the Head of the VW Brand  
18 Engine Development department, advocated that VW should not put the diesel vehicles on  
19 the road without improving the exhaust system hardware and adjusting the software.  
20 Hadler was concerned that, without these proposed modifications, the vehicles’ emissions  
21 were too high under U.S. law and that future discovery of the high emissions could  
22 damage VW’s reputation. Hadler’s request led to a dispute with the board members  
23 (including Winterkorn) since the proposed modifications would lead to a significant  
24 increase in cost and also delay the start of production.

25 85. The proposed modifications were not approved. Instead, VW produced and  
26 sold to consumers throughout the world three generations of 2.0 liter and 3.0 liter “clean  
27 diesel” vehicles, all of which contained a modified version of Audi’s original dual-mode  
28 defeat device. From late 2008 to 2015, VW sold 500,000 2.0 liter diesel vehicles and 80,000

1 3.0 liter diesel vehicles in the United States with a defeat device. These vehicles are  
2 sometimes collectively referred to as the “Subject Vehicles.”

3 **4. VW Improves the Defeat Device.**

4 86. In or around 2012, exhaust system hardware failures developed in certain 2.0  
5 liter Subject Vehicles being driven by consumers in the United States. VW discovered that  
6 vehicles equipped with the defeat device stayed in “dyno mode” even when driven on the  
7 road outside of testing conditions. Since the 2.0 liter Subject Vehicles were not designed to  
8 be driven for longer periods of time in “dyno mode,” the increased stress on the exhaust  
9 system components caused them to fail.

10 87. In or around July 2012, engineers from the VW Brand Engine Development  
11 Department met with Berndt Gottweis, the Head of VW Product Safety and a member of  
12 VW’s Product Safety Committee, to discuss the hardware failures and the defeat device.  
13 During the meeting, the engineers used a document to illustrate the operation of the  
14 defeat device. When the meeting ended, Gottweis ordered the engineers to destroy the  
15 document.

16 88. Around the same time, the engineers used a similar document illustrating  
17 the operation of the defeat device during a meeting with Heinz-Jakob Neusser to discuss  
18 the hardware failures. Neusser was VW’s Head of Group Engine Development and  
19 reported directly to Winterkorn. Like Gottweis, Neusser instructed the engineers to  
20 destroy the document after the meeting.

21 89. Following their meetings with Gottweis and Neusser, VW engineers modified  
22 the defeat device software. To increase the likelihood that the Subject Vehicles would  
23 recognize when the vehicles were being tested on a treadmill, VW installed a “steering  
24 wheel angle recognition” feature. The steering wheel angle recognition interacted with the  
25 defeat device software by enhancing the vehicle’s ability to detect whether it was being  
26 tested on a dynamometer (where the steering wheel is not turned), or being driven on the  
27 road.

28

1 90. The steering wheel modification was approved by senior VW executives,  
2 including Neusser, in or around April 2013.

3 91. But even with this improvement, VW's defeat device had a weak spot: if the  
4 vehicles' emissions levels were ever tested under real-world driving conditions, without  
5 the use of a treadmill, VW knew its diesel vehicles would fail to meet emissions standards.  
6 Fortunately for VW, state and federal regulators conducted emissions tests on a  
7 dynamometer pursuant to publicly available drive cycles. Enterprising third party  
8 researchers, however, were free to conduct emissions tests under any circumstances,  
9 including on-road tests.

10 **D. The ICCT Study Threatens to Expose VW's "Clean Diesel" Fraud.**

11 92. After years of lies and deceit, VW's "clean diesel" fraud began slowly  
12 unraveling in March 2014. On March 31, 2014, at a conference in San Diego, presenters  
13 from West Virginia University's Center for Alternative Fuels, Engines & Emissions  
14 revealed the results of a study commissioned by the International Council on Clean  
15 Transportation (previously defined as the "ICCT Study"). The ICCT Study found that two  
16 unidentified 2.0 liter diesel vehicles emitted NO<sub>x</sub> during normal road operation at levels  
17 nearly 40-times the legal limit. These two unidentified cars were Volkswagens.

18 93. The ICCT researchers conducted their testing over multiple real-world test  
19 routes, using a portable emissions measurement system, a lightweight transportable  
20 emissions testing device that is generally attached to a vehicle's tailpipe.

21 94. The graph<sup>2</sup> below—modified to identify the specific vehicles tested—  
22 illustrates the ICCT Study's findings relating to the Volkswagen vehicles:

23

<sup>2</sup> Guilbert Gates, *et al.*, *How Volkswagen's 'Defeat Device' Worked*, N.Y. TIMES, Mar. 16, 2017.

**Average emissions of nitrogen oxides in on-road testing**

Source: Arvind Thiruvengadam, Center for Alternative Fuels, Engines and Emissions at West Virginia University

95. Because VW's defeat device was designed to evade only treadmill testing, it did not reduce the cars' emissions levels during the road testing performed by the ICCT researchers. As a result, the VW vehicles produced excessively high levels of NO<sub>x</sub> emissions.

96. Although the ICCT researchers did not understand the reason for the high NO<sub>x</sub> levels at the time they presented the results of their study in San Diego on March 31, 2014, the reason was already known to many inside VW, including Winterkorn.

**E. The Results of the ICCT Study Spread Rapidly to the Highest Levels of VW, Including to Winterkorn.**

97. VW and Audi employees in attendance at the presentation realized instantly that two of the unidentified vehicles were VWs. Alarmed, an Audi employee took screen shots of the presentation with his phone and immediately sent an email attaching the pictures to Oliver Schmidt, the General Manager of VWGoA's Engineering and Environmental Office in the U.S. ("EEO"). The EEO is the office within VWGoA

1 responsible for interfacing with U.S. regulators. In his email to Schmidt, the Audi  
2 employee described the ICCT presentation as “explosive.”

3 98. Over the next several weeks, the results of the ICCT Study and VW’s own  
4 internal assessment of its potential consequences were communicated both orally and in  
5 writing to senior managers, officers, and board members throughout VWAG and its  
6 subsidiaries, including defendants VWGoAF and VCI. As described more fully below,  
7 between March 31, 2014 and July 2014, the following VW board members, executives, and  
8 supervisors, among many others, were made aware of the ICCT Study and the significant  
9 problems it created for VW:

- 10 (a) Martin Winterkorn
- 11 • CEO of VWAG;
  - 12 • Chairman of VWAG Board of Management;
  - 13 • Head of R&D for VW;
  - 14 • Chairman of VWGoA Board of Directors.
- 15 (b) VWAG BOARD MEMBER 1
- 16 • Member of VWAG Board of Management;
  - 17 • Head of VW Sales and Marketing.
- 18 (c) VWAG MANAGER 1
- 19 • Head of VW Quality Management;
  - 20 • Direct report to Winterkorn.
- 21 (d) Bernd Gottweis
- 22 • Head of VW Product Safety;
  - 23 • Member of VW Product Safety Committee;
  - 24 • Direct report to Winterkorn and VWAG MANAGER 1.
- 25 (e) Heinz-Jakob Neusser
- 26 • Head of VW Brand Engine Development;
  - 27 • Head of Development for VW Brand;
  - 28 • Member of VW Brand Board of Management;
  - Direct report to Winterkorn.
- (f) VWAG ATTORNEY 1
- Associate General Counsel in VW Group Legal;
  - Member of VW Product Safety Committee.
- (g) VWGoA CEO
- CEO of VWGoA;
  - Member of VCI’s Board of Directors.

- 1
- 2 (h) VWGoA GENERAL COUNSEL
- 3 • General Counsel of VWGoA;
- 4 • Vice President of VWGoAF.
- 5
- 6 (i) Oliver Schmidt
- 7 • General Manager of VW EEO.
- 8
- 9 (j) EEO MANAGER 1
- 10 • Senior Manager in VW EEO.
- 11
- 12 (k) VWAG QUALITY EMPLOYEE 1
- 13 • Employee in VW Quality Management.
- 14
- 15 (l) Carsten Nagel
- 16 • Senior Manager of Emissions Certification at Audi.
- 17
- 18 (m) Zaccheo Giovanni Pamio
- 19 • Head of Thermodynamics in Audi Diesel Engine Development
- 20 Department.
- 21
- 22 (n) PORSCHE MANAGER 1
- 23 • Director of Emission Certification, Legislation and Regulatory
- 24 Affairs at Porsche.
- 25
- 26 (o) VWGoA CFO
- 27 • CFO of VWGoA.
- 28
- 29 (p) VCI BOARD MEMBER 1
- 30 • Member of VCI's Board of Directors.
- 31
- 32 (q) VCI MANAGER 1
- 33 • VCI Director of Business Operations.

34 99. Promptly after receiving the Audi employee's email, Schmidt forwarded it to

35 his EEO colleagues, including EEO MANAGER 1. On April 2, 2014, Schmidt sent another

36 email to an EEO colleague complaining that the ICCT Study was "not good."

37 100. Schmidt knew U.S. regulators soon would start asking VW questions about

38 the ICCT Study. In his email, Schmidt assured his colleague that now was not the time for

39 VW to come clean. "If we are not honest," Schmidt calculated, "everything stays as it is."

40 101. Schmidt would later be indicted by the U.S. Department of Justice for his role

41 in the scheme. On August 4, 2017, he pled guilty to conspiring to defraud the United

1 States, to committing wire fraud, and to violating the Clean Air Act. He was sentenced to  
2 84 months in prison.

3 102. Shortly after receiving Schmidt's email, EEO MANAGER 1 called VWGoA  
4 ATTORNEY 1, who was responsible for evaluating possible vehicle recalls, and told him  
5 about the ICCT Study results. EEO MANAGER 1 specifically mentioned the excess  
6 emissions discovered with VW's cars.

7 103. The following Monday, April 7, VWGoA ATTORNEY 1 spoke with VWAG  
8 ATTORNEY 1, Associate General Counsel in the VW Group Legal department in  
9 Germany. VWGoA ATTORNEY 1 told VWAG ATTORNEY 1 about the ICCT Study results  
10 and the emissions problems with VW's diesel cars.

11 104. VWAG ATTORNEY 1—along with Gottweis—was a member of VW's  
12 Product Safety Committee. The Product Safety Committee was responsible for reviewing  
13 and addressing issues involving product safety and product defects. This included a  
14 product's failure to "comply with statutory regulations and standards set by the  
15 authorities," and "any other defects which could result in high consequential costs or could  
16 cause significant damage to the [VWAG's] image." Winterkorn, as the VWAG  
17 Management Board member in charge of R&D, had ultimate responsibility for monitoring  
18 the activities of the Product Safety Committee.

19 105. Soon after learning about the ICCT Study, including the specific makes and  
20 models of cars tested, CARB and EPA contacted VW about the results. Engineers in the  
21 VW Brand Engine Development department formed a task force ("ICCT Task Force") to  
22 formulate possible responses to the U.S. regulators.

23 106. The ICCT Task Force did *not* attempt to figure out why VW's diesel cars  
24 failed emissions testing during real world driving. Nobody at VW asked them to do that  
25 and, in any event, they already knew why: the cars were using defeat devices that lowered  
26 emissions levels only during treadmill testing.

27 107. They also already knew the makes, models, and approximate number of cars  
28 containing defeat devices. And they knew the defeat device software could not be modified

1 to bring the vehicles into compliance with U.S. emissions laws. Their mission, instead, was  
2 to come up with responses that might satisfy the U.S. regulators without disclosing the  
3 existence of the defeat device. Disclosure of the defeat device to U.S. regulators would  
4 jeopardize VW's efforts to obtain EPA and CARB certifications for the next year's vehicles.

5 108. By April 2014, the ICCT Task Force prepared a memo ("Task Force Memo")  
6 and PowerPoint ("Task Force PowerPoint") (collectively, "Task Force Presentation") that:  
7 (a) discussed the emissions violations discovered by ICCT researchers, (b) outlined the  
8 significant risks and potential consequences associated with investigations by U.S.  
9 regulators into those violations, and (c) proposed a communication strategy for responding  
10 to the U.S. regulators.

11 109. Among other things, the Task Force Presentation:

- 12 (a) summarized the ICCT Study's findings, including that NO<sub>x</sub> emissions  
13 of VW vehicles were "15 to 35 times over the [legal] limit";  
14 (b) noted that VW could install modified software in the affected vehicles  
15 to help "reduce [real world driving] emissions in [VW's diesel vehicles],  
16 but not to comply with the limits."  
17 (c) analyzed the "risks" facing VW and the potential "consequences,"  
18 including:  
19 i. monetary penalties of \$43,000 for each of the 500,000 to 600,000  
20 affected vehicles (*i.e.*, \$21.5 to \$25.8 billion); and  
21 ii. recalls or buybacks of the affected vehicles;  
22 and  
23 (d) proposed a communication strategy for dealing with U.S. regulators,  
24 which did not include telling them about the defeat device.

25 110. In describing the risks, the ICCT Task Force Presentation warned that "[t]he  
26 authorities can carry out their own engineering tests (defeat device testing/analysis)" and  
27 "[t]he difference road/dynamometer must be explained. (intentional conduct = penalties!)."  
28

111. The 500,000 to 600,000 affected vehicles identified by the Task Force  
constituted nearly 100% of all diesel cars VW sold in the United States from 2008 to 2014.

1 112. On April 15, 2014, Schmidt sent an email to Gottweis in the Quality  
2 Assurance department, who already knew about the defeat device. Schmidt's email  
3 notified Gottweis of the results of the ICCT Study and attached the Task Force  
4 PowerPoint. VW employees referred to Gottweis, a long-time confidant of Winterkorn, as  
5 the "Fireman" because of his ability to put out fires at VW. He was known within VW as  
6 an expert crisis manager.

7 113. Gottweis met with the ICCT Task Force on April 28, 2014. During that  
8 meeting, the ICCT Task Force explained to Gottweis:

- 9 (a) it was likely U.S. regulators would figure out that VW has a defeat  
10 device;
- 11 (b) the substantial financial consequences VW could face if the defeat  
12 device was discovered by U.S. regulators, including but not limited to  
13 applicable fines per vehicle; and
- 14 (c) it was impossible to fix the vehicles to comply with U.S. emissions  
15 standards.

16 At the end of the meeting, Gottweis said he would talk to Winterkorn.

17 114. On or about May 15, 2014, Schmidt sent an email attaching the Task Force  
18 Presentation to: (a) VWGoA CEO, who also was a member of VCI's Board of Directors; and  
19 (b) VWGoA GENERAL COUNSEL, who also was a Vice President of VWGoAF.

20 115. Schmidt's email noted that he previously sent the ICCT Study to VWGoA  
21 GENERAL COUNSEL and that EPA was investigating the results of the ICCT Study.  
22 VWGoA GENERAL COUNSEL was responsible for identifying business risks and  
23 reporting the risks to VW's Risk and Compliance department in Germany.

24 116. On May 19, 2014, VWGoA CEO responded to Schmidt's May 15th email,  
25 informing Schmidt that he (VWGoA CEO) already notified VWAG BOARD MEMBER 1  
26 about the ICCT Study.

27 117. On or about May 19, 2014, VWAG MANAGER 1 told Winterkorn about the  
28 ICCT Study during a VW Brand Board of Management meeting. He told Winterkorn that  
the ICCT Study reported that NOx emissions for certain VW diesel vehicles were up to 35-

1 times legal limits. At this time, Winterkorn already knew that VW engineers had  
2 developed and installed dual-mode defeat device software in its “clean diesel” vehicles sold  
3 in the United States.

4 118. On May 20, 2014, VWAG BOARD MEMBER 1’s assistant sent a series of  
5 emails to EEO MANAGER 1 and others requesting additional information on the diesel  
6 emissions testing done by the ICCT researchers. EEO MANAGER 1 advised VWAG  
7 BOARD MEMBER 1’s assistant to contact VWGoA GENERAL COUNSEL. However, he  
8 also warned her against sending any more emails because they may be discoverable in any  
9 future litigation: “We should write as few [emails] as possible regarding this topic because  
10 of eDiscovery.”

11 119. Also on May 20, 2014, Schmidt forwarded to Gottweis the May 15th email he  
12 previously sent to VWGoA CEO and VWGoA GENERAL COUNSEL, including the Task  
13 Force Presentation. That same day, Gottweis forwarded Schmidt’s May 15 email to VWAG  
14 QUALITY EMPLOYEE 1 along with the Task Force Memo.

15 120. On May 22, 2014, Gottweis emailed a memo (“Gottweis Memo”) to VWAG  
16 MANAGER 1. The Gottweis Memo stated:

- 17 (a) Researchers measured the emissions of VW diesel vehicles under real  
18 world driving conditions and recorded NOx emissions 15 to 35 times  
19 greater than regulatory limits;
- 20 (b) The issue affected VW’s “EA 189 GenI and GenII vehicles,” which were  
21 nearly 100% of the 2.0 liter diesel vehicles that VW sold in the United  
22 States from 2009 through 2014;
- 23 (c) “A thorough explanation for the dramatic increase in NOx emissions  
24 cannot be given to the authorities”;
- 25 (d) “It can be assumed that the authorities will then investigate the VW  
26 systems to determine whether Volkswagen implemented ... a so-called  
27 defeat device [ ]”; and
- 28 (e) The vehicles’ software could be modified to reduce emissions levels, but  
not enough to comply with legal limits.

1 121. VWAG MANAGER 1 gave the Gottweis Memo to Winterkorn the next day,  
2 May 23. With it, he attached a one-page cover memo (“Winterkorn Memo”).

3 122. The Winterkorn Memo repeated for Winterkorn the ICCT Study’s use of real-  
4 world testing conditions and that researchers recorded NOx emissions in VW’s diesel  
5 vehicles that were 15 to 35 times greater than legal limits. VWAG MANAGER 1 promised  
6 to report to Winterkorn on further developments and VW’s discussions with U.S.  
7 authorities.

8 123. Thus, in under two months, news of the ICCT Study results spread from two  
9 VW employees attending a conference in San Diego to:

- 10 (a) the General Manager and other senior employees in VW’s EEO;  
11 (b) the CEO of VWGoA;  
12 (c) the General Counsel of VWGoA, who also was a Vice President at  
13 VWGoAF;  
14 (d) the Head of VW’s Quality Assurance department in Germany;  
15 (e) VWAG’s Group Legal department in Germany;  
16 (f) VW’s Product Safety Committee; and  
17 (g) Members of VWAG’s Board of Management, including  
18 its Chairman and CEO Martin Winterkorn.

19 124. In July 2014, Schmidt provided additional updates on the ICCT Study to: (a)  
20 VWGoA CEO; (b) VWGoA CFO; (c) VCI BOARD MEMBER 1; (d) VCI MANAGER 1; and  
21 (e) the VW Product Safety Committee.

22 **F. VW Lies to U.S. Regulators, Implements a Sham Software “Fix,”  
23 and Destroys Evidence.**

24 125. In the Spring and Summer of 2014, U.S. regulators were communicating with  
25 VW about the ICCT Study results and VW’s response. VW’s representatives stalled,  
26 claiming VW was conducting its own emissions testing and working to resolve the issues.  
27 They did not tell the regulators VW was using a defeat device.

28 126. On or about October 1, 2014, VW representatives met with CARB officials to  
further discuss the ICCT Study and the significant differences in emissions recorded when

1 VW vehicles were subjected to on-road testing as compared to dyno testing. During the  
2 meeting, VW's representatives conceded the accuracy of the ICCT Study's test results but  
3 continued concealing the existence of the defeat device. In fact, they gave CARB false  
4 reasons for the discrepancies in emissions testing results, such as differences in driving  
5 patterns and other technical issues.

6 127. In November 2014, VW told the U.S. regulators it had developed a software  
7 "fix" to address the high NOx emissions. VW representatives proposed conducting a recall  
8 of its diesel cars to install updated software that would, according to them, fix the  
9 emissions problems.

10 128. The software "fix" was never going to work, and VW knew it. It was just  
11 another lie designed to conceal the existence of the defeat device, to obstruct the  
12 investigation by U.S. authorities, and to buy VW time. As the Task Force Presentation  
13 (April 2014) and Gottweis Memo (May 2014) clearly stated, a software update might help  
14 reduce emissions levels but it could not make the Subject Vehicles comply with legal  
15 emissions limits.

16 129. EEO MANAGER 1 later admitted that VW rolled out the software update "to  
17 further its cheat."

18 130. The EPA, however, did not know VW's software update was a charade.  
19 Consequently, it authorized the recall based on VW's misrepresentations.

20 131. Although the software update scheme did buy VW time, it did not bring an  
21 end to the investigations by U.S. regulators. From November 2014 through July 2015,  
22 CARB continued to ask detailed questions about VW's diesel emissions. VW continued to  
23 lie, always providing evasive and misleading answers to conceal its defeat device.

24 132. When U.S. regulators learned by mid-2015 that the software update did not  
25 fix the emissions violations, they continued to press VW for answers. In or about late July  
26 2015, a meeting was held in Wolfsburg, Germany among members of the ICCT Task Force  
27 and VW's top executives, including Winterkorn and VWAG MANAGER 1. A member of  
28 the ICCT Task Force and Schmidt updated Winterkorn on the defeat device, the current

1 status of discussions with U.S. regulators, and CARB's refusal to certify VW's MY 2016  
2 vehicles due to the outstanding emissions issues.

3 133. Winterkorn blamed the situation on "[HJ]'s software." Up to that point in the  
4 meeting, no one had mentioned HJ, who was the Head of Software Development in VW's  
5 Engine Development department. But Winterkorn already knew about the defeat device,  
6 and knew its development could be traced back to HJ's team.

7 134. During the meeting, Winterkorn requested input on how VW should proceed  
8 with U.S. regulators. Schmidt suggested that he meet with CARB to try to gain  
9 certification for VW's MY 2016 vehicles. Winterkorn agreed but instructed Schmidt not to  
10 disclose the existence of the defeat device. At the end of the meeting, VWAG MANAGER 1  
11 collected from the attendees all documents used to discuss the defeat device.

12 135. Over the next few weeks, CARB and VW representatives met multiple times  
13 to discuss the emissions issues. Following Winterkorn's directive, VW's representatives  
14 continued lying about the cause for the emissions problems in VW's diesel vehicles.

15 136. Then, in a meeting with CARB in El Monte, California on or about August  
16 19, 2015, a VW employee admitted to U.S. regulators, for the first time, that VW had been  
17 using a defeat device in its diesel vehicles.

18 137. With its defeat device secret now out, VW was forced to come clean. On  
19 September 3, 2015, after obstructing U.S. regulators for over a year, VW formally  
20 confessed to EPA and CARB that it had installed defeat device software in hundreds of  
21 thousands of its diesel vehicles imported and sold in the United States.

22 138. VW, however, was not done scheming. With its near decade-long fraud now  
23 exposed, it quickly sought to minimize the damage. As VW prepared to admit its use of a  
24 defeat device to U.S. regulators, VWAG ATTORNEY 1 made statements that several VW  
25 employees understood as suggesting they destroy documents relating to the diesel  
26 emissions issues.

27 139. VW later admitted that at least 40 individuals destroyed thousands of  
28 documents relating to the diesel emissions issue. Many key executives—including VWGoA

1 GENERAL COUNSEL, VWGoA Senior Vice President of Industry and Government  
2 Relations for VWGoA, and the Director of VW's Emissions Test Center in Oxnard,  
3 California—"lost" or wiped clean their phones before they could be imaged.

4 140. The public first learned of VW's fraud on September 18, 2015, when the EPA  
5 issued a Notice of Violation ("NOV") stating that VW's use of the defeat device in its 2.0  
6 liter Subject Vehicles violated the Clean Air Act. On September 22, 2015, VW issued a  
7 press release revealing that as many as 11 million of its vehicles worldwide contained  
8 defeat devices. On November 2, 2015, EPA issued a second NOV stating that VW had  
9 installed similar defeat devices in its 3.0 liter Subject Vehicles.

10 141. Winterkorn apologized that Volkswagen had "broken the trust of our  
11 customers and the public." Winterkorn further announced that "Volkswagen has ordered  
12 an external investigation of this matter," and that VW would "do everything necessary in  
13 order to reverse the damage this has caused." Winterkorn said, "I am endlessly sorry that  
14 we have disappointed this trust" that "millions of people across the world" had in "our  
15 brands, our cars, and our technology."

16 142. Likewise, VWGoA President and CEO Michael Horn admitted that VW had  
17 lied, stating "Let's be clear about this. Our company was dishonest. With the EPA, and the  
18 California Air Resources Board, with all of you. And in my German words, we have totally  
19 screwed up."

20 143. By late September 2015, several VW executives had either been suspended or  
21 resigned, including: (a) Winterkorn; (b) VWAG BOARD MEMBER 1; (c) ENGINEER 1; (d)  
22 ENGINEER 2; (d) VWAG MANAGER 1; and (e) Gottweis.

23 144. By October 2015, VW suspended 10 senior executives in the Engine  
24 Development and Quality Assurance departments, including direct reports to Winterkorn.  
25 Winterkorn and VWAG BOARD MEMBER 1—the two board members initially notified  
26 about the ICCT Study—were the only member of VWAG's Board of Management who  
27 resigned as a result of the scandal.  
28

1 145. The United States Department of Justice later brought criminal charges  
2 against VWAG and many of its executives and senior officials for their participation in  
3 VW's "clean diesel" conspiracy, including: (a) Winterkorn; (b) Gottweis; (c) Neusser; and  
4 (d) Schmidt.

5 146. On January 11, 2017, VWAG pled guilty to three criminal felony counts as a  
6 result of the company's emissions fraud scheme and for obstructing justice by intentionally  
7 destroying documents. As part of its plea agreement, VWAG admitted, among other  
8 things, that for nearly a decade, it and its employees (including some who reported  
9 directly to Winterkorn): (a) knew the Subject Vehicles did not meet U.S. emissions  
10 standards; (b) knew VWAG was using a defeat device to cheat the U.S. emissions  
11 standards testing process; and (c) conspired to deceive U.S. regulators into believing that  
12 the Subject Vehicles complied with U.S. emissions standards.

13 147. VWAG also admitted: (a) Neusser, Gottweis, and other senior employees  
14 knew of the defeat device scheme since at least 2012; and (b) those employees, along with  
15 VWAG ATTORNEY 1, instructed or suggested to engineers and other employees that they  
16 destroy documents relating to VW's use of the defeat device.

17 **G. VW's Bond Offerings**

18 148. In the years before VW's massive "clean diesel" scandal was made public, VW  
19 relied heavily on the U.S. capital markets to sustain its global business operations and  
20 fuel Winterkorn's Strategy 2018. In a May 2014 internal memo, senior officers of VWAG  
21 and VWGoAF stressed that participation in the U.S. capital markets "is of utmost  
22 importance to the [VW Group] in order to assure its funding requirements and growth."  
23 Later, in its Annual Report for 2014, VWAG claimed it was "able to exploit [a] favorable  
24 pricing situation to its advantage" through the completion of two bond offerings in the U.S.  
25 during 2014.

26 149. And it was right. Even after learning of the "explosive" ICCT Study on March  
27 31, 2014, VW sold over \$8 billion worth of bonds to U.S. investors who had no inkling of  
28 the existence or scope of VW's global fraud.

1 150. None of VW's bond offering documents, financial statements, or other  
2 information provided to investors or underwriters made any mention of:

- 3 (a) VW's defeat device;  
4 (b) the ICCT Study;  
5 (c) the EPA and CARB investigations;  
6 (d) the emissions violations affecting nearly 600,000 VW diesel vehicles  
7 sold in the U.S. and over 11 million worldwide;  
8 (e) the more than \$20 billion in potential fines and penalties VW was  
9 facing in the U.S. alone; or  
10 (f) any other fact relating to its near decade-long "clean diesel" fraud.

11 151. To the contrary, as part of each bond offering, VW promised that its cars  
12 complied with applicable laws, that there were no pending or threatened governmental  
13 investigations involving its diesel vehicles, and that it was committed to reducing harmful  
14 emissions and manufacturing environmentally-friendly cars.

15 152. None of this was true.

16 153. Following the public disclosure of VW's fraud, the value of its bonds fell. By  
17 September 22, 2015, the price of the bonds plummeted, falling by more than 7% of par  
18 value in some cases. Furthermore, ratings agencies cut the credit ratings on some bonds,  
19 the risk of default on the bonds increased, and all of the bonds were trading below par  
20 value.

21 154. In the end, U.S. investors purchased billions of dollars of VW debt, with low  
22 interest rates, based on their understanding that they were buying a safe investment in a  
23 world-class company. Instead, when VW's decade-long scheme finally came to light,  
24 investors were left holding bonds that were far riskier than they were told, thought, or  
25 were compensated for.

1           **1. Winterkorn and VWAG Board of Management Approved**  
2           **the Sale of Bonds in the United States.**

3           155. From at least as early as 2010, the VWAG Supervisory Board established a  
4 debt issuance framework (“Debt Framework”) to finance VW’s operations. The Debt  
5 Framework authorized the VWAG Board of Management: (a) to sell bonds in the United  
6 States, (b) to create special-purpose vehicles to serve as issuer of the bonds, and (c) to have  
7 VWAG guarantee the payment of principal and interest on the bonds.

8           156. Each year, including for the years 2010 through 2015, VWAG’s Board of  
9 Management, including Winterkorn, prepared and approved budgets reflecting VW’s  
10 anticipated financing needs. Pursuant to the Debt Framework, each budget relied upon  
11 the issuance and sale of corporate bonds in the United States to meet VW’s financing  
12 requirements. The bond offerings were private placements offered and sold to U.S.  
13 investors pursuant to an exemption from registration under Rule 144A promulgated under  
14 the Securities Act (the “144A Bond Offerings”). *See* 17 C.F.R. § 230.144A(a)(1).

15           157. In or about February 2014, VWAG’s Board of Management, including  
16 Winterkorn, authorized the formation of VWGoAF for the sole purpose of issuing and  
17 selling corporate bonds in the United States. At all times, VWGoAF had no employees of  
18 its own and no operations other than serving as a financing shell for VWAG. All persons  
19 listed as officers or directors of VWGoAF were employed by VWAG or an affiliate.

20           158. As CEO and Chairman of the VWAG Board of Management and as Chairman  
21 of the Board of Directors of VWGoA (VWAG’s wholly-owned subsidiary), Winterkorn  
22 possessed and exercised power and control over VWGoAF and its day-to-day business  
23 operations, which consisted entirely of issuing bonds in the United States. He also  
24 possessed the power and ability to modify and correct the bond offering documents alleged  
25 below to be misleading—both before and after their issuance—and/or to prevent their  
26 issuance altogether.

**2. VWAG's Fraudulent 2014 and 2015 144A Bond Offerings**

159. Between May 2014 and May 2015, VWGoAF and VWAG issued and sold bonds in the United States as part of three separate 144A Bond Offerings, totaling \$8.3 billion:

Bond Issuance Date	Amount
May 23, 2014	\$3,500,000,000
November 20, 2014	\$2,000,000,000
May 22, 2015	\$2,800,000,000

160. On or about the date of each 144A Bond Offering, VWGoAF, as issuer, and VWAG, as guarantor, offered and sold the bonds to U.S. institutional investors through a syndicate of investment banks ("Underwriters"). All but one of the Underwriters was based in the United States.

161. Each 144A Bond Offering included separate classes of notes (e.g., Class A Notes, Class B Notes, etc.). If an issuer wishes to issue a security with more risk, it generally must pay investors a higher rate of return.

162. VWAG and VWGoAF prepared a number of documents in connection with each 144A Bond Offering, including: (a) an Offering Memorandum; (b) a Subscription Agreement; and (c) responses to due diligence questions submitted by the Underwriters.

163. U.S. investors and Underwriters relied on VW to provide accurate and complete information in connection with the 144A Bond Offerings. VW knew that U.S. investors and Underwriters relied on the information set forth in these materials to make their investment decisions.

1 (a) The Offering Memorandum

2 164. For each 144A Bond Offering, VWAG and VWGoAF prepared, approved, and  
3 distributed to U.S. investors and Underwriters an Offering Memorandum. Each Offering  
4 Memorandum set forth, among other things, the terms of the investment, the principal  
5 risk factors that may affect VWAG's ability to fulfill its obligations under the guarantee,  
6 and descriptions of VW's business and regulatory environment applicable to its operations.

7 (i) *The Offering Memorandum*  
8 *Preparation and Review Process*

9 165. VWAG and VWGoAF used a standardized process to prepare the Offering  
10 Memorandum. They started with an Offering Memorandum used with an earlier bond  
11 offering; they then reviewed and updated it. Three VWAG departments—Group Legal,  
12 Group Treasury, and Group Accounting—were primarily responsible for coordinating the  
13 assembly, review and approval of information for inclusion in the Offering Memorandum.

14 166. The Offering Memorandum was divided into sections and distributed to  
15 various VW departments based on the particular subject matters or risk factors discussed  
16 in each section. Each department was responsible for reviewing and updating its assigned  
17 sections of the Offering Memorandum with the information necessary to make its sections  
18 accurate and complete. Charts identifying specific misleading sections of the Offering  
19 Memorandum as well as the VW department assigned responsibility for ensuring the  
20 accuracy of those sections are contained below at Paragraphs 175 and 176.

21 167. By way of example, VW Group Legal was responsible for preparing,  
22 reviewing, and ensuring the accuracy of the “Emission Control” sections of each Offering  
23 Memorandum. (See Paragraph 176, below, §§10.1.2, 10.1.2.2, and 10.1.2.2.1.) Those  
24 sections discussed the applicable laws and regulations relating to automotive emissions.  
25 VW Group Legal also was responsible for the “risks in connection with ... recall  
26 campaigns” section of each Offering Memorandum. That section discussed the risks  
27 relating to potential recalls of VW vehicles. (See Paragraph 175, §2.5.6.)  
28

1 168. Within VW Group Legal, VWAG ATTORNEY 1 was one of the principal  
2 reviewers responsible for approving the accuracy and completeness of this information. By  
3 the time of each 144A Bond Offering, VWAG ATTORNEY 1 already knew, at a minimum,  
4 (a) about the ICCT Study results, (b) that VW's diesel vehicles were violating U.S.  
5 emissions laws, and (c) that EPA and CARB were investigating VW's emissions violations.

6 169. As another example, the VW Quality Assurance department was assigned  
7 responsibility for the portion of the "Risk Factors" section of each Offering Memorandum  
8 relating to the performance and operation of VW's vehicles. (*See* Paragraph 175, §2.2.5.)  
9 Within Quality Assurance, VWAG MANAGER 1 and VWAG QUALITY EMPLOYEE 1 had  
10 primary responsibility for approving the accuracy and completeness of the disclosures in  
11 this section. Gottweis—VW's "Fireman"—was a supervisor in the Quality Assurance  
12 department and reported directly to VWAG MANAGER 1.

13 170. By the time of each 144A Bond Offering, VWAG MANAGER 1, VWAG  
14 QUALITY EMPLOYEE 1, and Gottweis collectively already knew, at a minimum: (a)  
15 about the ICCT Study; (b) that VW's diesel vehicles were violating U.S. emissions laws; (c)  
16 that the emissions problems affected nearly every VW diesel vehicle sold in the United  
17 States since late 2008; (d) that EPA and CARB were investigating; (e) that VW could not  
18 bring its cars into compliance with U.S. emissions laws; and (f) VW was facing more than  
19 \$20 billion in fines and penalties in the U.S. alone. Moreover, Gottweis had known since at  
20 least 2012 that VW was using a defeat device in its "clean diesel" vehicles.

21 171. Other sections in the Offering Memoranda cautioned investors that VWAG's  
22 "future business success" depended on its "ability to develop new, attractive and energy-  
23 efficient products" (§2.2.2), represented that VW's top priority in recent years had been  
24 developing vehicles that "reduce emissions" (§9.5), and stressed that reducing vehicle  
25 emissions would remain a primary focus for VW research and development going forward  
26 (§9.5.3). These sections of the Offering Memorandum were assigned to Winterkorn's R&D  
27 department to ensure they were updated, accurate and complete. Specifically,  
28 Winterkorn's executive assistants, who reported directly to him (hereinafter EXECUTIVE

1 ASSISTANT 1 and EXECUTIVE ASSISTANT 2), were assigned responsibility for  
2 updating these sections.

3 172. By the time of each 144A Bond Offering, Winterkorn already knew, at a  
4 minimum: (a) that VW was using a defeat device in its “clean diesel” vehicles; (b) about the  
5 ICCT Study results; (c) that VW’s diesel vehicles were violating U.S. emissions laws; (d)  
6 that the emissions problems affected nearly every VW diesel vehicle sold in the United  
7 States since late 2008; (e) that EPA and CARB were investigating VW’s emissions  
8 violations; and (f) that VW could not bring its cars into compliance with U.S. emissions  
9 laws.

10 173. The Offering Memorandum for each of the 144A Bond Offerings identified in  
11 was reviewed, updated, and otherwise prepared and approved in this manner.

12 (ii) *VWAG and VWGoAF Made False and Misleading Statements*  
13 *and Omissions in the Offering Memoranda.*

14 174. VWAG and VWGoAF made materially misleading statements and omissions  
15 in each and every Offering Memorandum prepared and distributed for the 144A Bond  
16 Offerings identified in Paragraph 159.

17 175. In each Offering Memorandum, VWAG and VWGoAF misleadingly stated:

OM §	Misleading Statement	Reviewing Dep’t	Individual(s) (Issuance Date)
2.2.2	“Our future business success depends on our ability to develop new, attractive and energy-efficient products that are tailored to our customers’ needs and to offer these products on competitive terms and conditions. In their purchasing decisions, customers are increasingly emphasizing lower fuel consumption and exhaust emissions.”	Research & Development	Winterkorn’s EXEC. ASST. 1 (5/23, 11/20);  Winterkorn’s EXEC. ASST. 2 (5/22)

1 2 3 4 5 6 7 8	2.2.5	“Our future business success depends on our ability to maintain the high quality of our vehicles. ... Product quality significantly influences consumers’ decision to purchase vehicles. A decline in our product quality or consumer perception... could have a material adverse effect on our general business activities, net assets, financial position and results of operations.”	Quality Assurance	VWAG QUALITY 1 (5/23, 5/22); VWAG MANAGER 1 (11/20, 5/22)
9 10 11 12 13 14 15 16 17	2.5.6	“We may face additional liability depending on the applicable laws and contractual obligations... Responsible supervisory authorities may request that we perform recall campaigns and could compel us to perform a recall. ... [S]ubstantial numbers of vehicles could also be affected. The risk of a recall of a substantial number of vehicles could be exacerbated due to our application of modular vehicle components that are used for the production of vehicles across brands and classes ...”	Group Legal	VWAG ATTORNEY 1 (5/23, 11/20, 5/22)
18 19 20 21 22	9.5	“Volkswagen’s top priority for research and development in [2011], 2012, 2013, and [2014] was to develop engines and drivetrain concepts to reduce emissions.”	Research & Development	Winterkorn’s EXEC. ASST. 1 (5/23, 11/20); Winterkorn’s EXEC. ASST. 2 (5/22)
23 24 25 26 27 28	9.5.3	“A focal point of Volkswagen’s current and future development activities is and will be ... the reduction of fuel consumption and emissions of the fleet.... With a broad range of development activities in the drivetrain sector, Volkswagen will continue to reduce the emissions of our vehicles in the coming years.”	Research & Development	Winterkorn’s EXEC. ASST. 1 (5/23, 11/20); Winterkorn’s EXEC. ASST. 2 (5/22)

1 176. Each Offering Memorandum also made materially misleading statements  
 2 concerning VW's supposed compliance with the environmental laws and other regulations  
 3 in the United States:

OM §	Misleading Statement	Reviewing Dep't	Individual(s)
10.1.2	"Volkswagen must comply with ... increasingly technical product requirements, particularly with regard to environmental protection ...."	Group Legal	VWAG ATTORNEY 1 (5/23, 11/20, 5/22)
10.1.2.2	"Volkswagen is subject to laws and regulations that require it to control automotive emissions, including exhaust emissions standards, vehicle evaporation standards and onboard diagnostic system requirements."	Group Legal	VWAG ATTORNEY 2 VWAG ATTORNEY 3 (5/23, 11/20, 5/22)
10.1.2.2.1	"Volkswagen's vehicles must comply with increasingly stringent requirements concerning emissions."	Group Legal	VWAG ATTORNEY 2 VWAG ATTORNEY 3 (5/23, 11/20, 5/22)
10.1.2.2.2	"U.S. federal and state governments and agencies... have created a suite of vehicle emission regulations aimed at improving local air quality and minimizing the potential effect of global climate change. Automotive manufacturers must ensure that their individual vehicles... comply with various pollutant, carbon dioxide, fuel economy and zero-emission technology requirements.... Volkswagen is responsible under these	Group Legal	VWAG ATTORNEY 2 VWAG ATTORNEY 3 (5/23, 11/20, 5/22)

	regulations for the performance of vehicle emission control systems, as well as the emission performance of its sold cars and light duty trucks over certain time and mileage periods.”		
--	---	--	--

177. The statements in the Offering Memoranda quoted in Paragraphs 175 and 176 were materially misleading. The Offering Memoranda omitted material facts that were necessary in order to make the statements made, in light of the circumstances under which they were made, not misleading.

178. Each Offering Memorandum omitted, among others, the following necessary and material facts:

- (a) VW had installed and was continuing to install illegal defeat devices in millions of diesel vehicles sold worldwide to cheat emissions standards.
- (b) VW had installed and was continuing to install defeat devices in hundreds of thousands of diesel vehicles sold in the United States to cheat emissions standards.
- (c) VW installed defeat devices in nearly all diesel vehicles VW sold in the United States since late 2008.
- (d) VW’s “clean diesel” vehicles sold in the United States did not and could not comply with U.S. federal and state emissions standards.
- (e) VW’s “clean diesel” vehicles sold in the United States was spewing toxic pollution into the environment at levels many multiples higher than permitted by law.
- (f) VW had submitted and was continuing to submit false and misleading applications to EPA and CARB to obtain certifications for the Subject Vehicles.
- (g) VW had submitted and was continuing to submit false and misleading information to U.S. authorities in order to import the Subject Vehicles into the United States.
- (h) VW could not fix the Subject Vehicles or otherwise bring them into compliance with U.S. federal and state emissions standards.

- 1 (i) As of early May 2014, EPA and CARB were investigating the toxic  
2 emissions coming from the Subject Vehicles.
- 3 (j) As a result of the conduct described in sub-paragraphs (a)-(i), VW was  
4 in violation of federal and state environmental laws and regulations.
- 5 (k) As a result of the conduct described in sub-paragraphs (a)-(i), hundreds  
6 of thousands of vehicles were subject to potential recalls costing  
7 billions of dollars.
- 8 (l) As a result of the conduct described in sub-paragraphs (a)-(i), VW faced  
9 potential fines, penalties, and other costs exceeding \$20 billion in the  
10 U.S. alone.

11 179. These facts would have been important to a reasonable investor because,  
12 among other reasons, they materially impacted the profitability and creditworthiness of  
13 VW, its ability to pay the bonds and other debts, the risk associated with the bonds, the  
14 interest rates paid on the bonds, and the value of the bonds. These facts also contradicted  
15 VW's repeated statements that it was committed to producing energy-efficient and  
16 environmentally-friendly vehicles.

17 180. After VW's "clean diesel" fraud was made public in September 2015, the  
18 value of the bonds decreased by a material amount and credit ratings agencies  
19 downgraded the bonds. The decrease in value was greatest for the bonds with the longest  
20 maturity dates. After the public disclosure of its fraud, VW did not conduct any new bond  
21 offerings in the United States for over three years.

22 (iii) *VWAG's Financial Statements Falsely Understated*  
23 *Liabilities and Failed to Disclose Material Contingencies.*

24 181. VWAG's financial statements, which were included in the Offering  
25 Memoranda, were also materially misstated because they failed to disclose a provision or  
26 record a contingent liability relating to the defeat device scheme.

27 182. Each Offering Memorandum included (a) VWAG's audited consolidated  
28 financial statements for the prior two years; and (b) its most recent unaudited  
consolidated interim financial statements. VWAG's Board of Management, including  
Winterkorn, reviewed and approved each of these financial statements.

1 183. VWAG, including all members of its Board of Management, and VWGoAF  
 2 knew VWAG's financial statements were being used to solicit U.S. bond investors. And  
 3 they knew that investors would consider VWAG's financial statements in deciding  
 4 whether or not to buy the bonds. In addition to including VWAG's financial statements in  
 5 the Offering Memoranda, VWAG published English translations of its financial  
 6 statements on its website for use by U.S. investors and underwriters.

7 184. As VWAG's CEO and Chairman of the Board of Management and as the  
 8 Chairman of VWGoA's Board of Directors, Winterkorn reviewed and approved the  
 9 financial statements included with each Offering Memorandum, and he possessed the  
 10 power and ability to control the content and accuracy of those financial statements.

11 185. VWAG's interim and annual financial statements were included in the  
 12 Offering Memorandum for each 144A Bond Offering, as shown in the following chart:

<b>Bond Deal</b>	<b>Annual Statements (Board Approval Date)</b>	<b>Interim Statement (Board Approval Date)</b>
May 23, 2014	December 31, 2013 (2/11/14)  December 31, 2012 (2/12/13)	March 31, 2014 (4/29/14)
November 20, 2014	December 31, 2013 (2/11/14)  December 31, 2012 (2/12/13)	September 30, 2014 (10/30/14)
May 22, 2015	December 31, 2014 (2/17/15)  December 31, 2013 (2/11/14)	March 31, 2015 (4/29/15)

1 186. As a German corporation, VWAG was at all relevant times required to  
2 prepare its financial statements in accordance with International Financial Reporting  
3 Standards, which includes applicable International Accounting Standards (“IAS”)  
4 (collectively, “IFRS”). A fundamental objective of IFRS is to ensure that a company  
5 provides accurate and reliable information concerning its financial performance during the  
6 period being represented.

7 187. IFRS required VWAG and those individuals signing its financial statements  
8 (including Winterkorn) to ensure that VWAG’s financial statements were accurate and  
9 complied with all relevant provisions of IFRS. In the Notes to its annual and interim  
10 financial statements, VWAG represented that its consolidated financial statements were  
11 prepared in compliance with IFRS. Each member of VWAG’s Board of Management,  
12 including Winterkorn, signed the annual financial statements and certified, among other  
13 things, that the statements “give a true and fair view of the assets, liabilities, [and]  
14 financial position and profit or loss” of VWAG.

15 188. IAS 37, which is included within IFRS and made applicable to VWAG,  
16 governs when a company is required to recognize a provision in its financial statements.  
17 Under IAS 37, a provision must be recognized when: (a) a company has a present  
18 obligation (legal or constructive) as a result of a past event; (b) it is probable that an  
19 outflow of resources embodying economic benefits will be required to settle the obligation;  
20 and (c) a reliable estimate can be made of the amount of the obligation, including when  
21 there is a range of possible outcomes.

22 189. If there is a range of possible outcomes, IAS 37 states that the amount  
23 accrued should be either the best estimate of the obligation or, if there is no best estimate,  
24 the midpoint of the range. IAS 37 further provides that “[e]xcept in extremely rare cases,  
25 an entity will be able to determine a range of possible outcomes and can therefore make an  
26 estimate of the obligation that is sufficiently reliable to use in recognising a provision.” In  
27 those rare cases, a past event is still deemed to give rise to a present obligation if, taking  
28

1 into account all available evidence, it is more likely than not (*i.e.*, a greater than 50%  
2 chance) that a present obligation exists at the end of each reporting period.

3 190. IAS 37 specifically cites “penalties or clean-up costs for unlawful  
4 environmental damage” as an example of a present obligation arising from past events  
5 that should be recognized as a provision because it would lead to an outflow of resources  
6 embodying economic benefits in settlement regardless of the future actions of the entity.

7 191. Even if the likelihood of an outflow of resources embodying economic benefits  
8 is not *probable*, IAS 37 requires companies to disclose a contingent liability for *possible* or  
9 present obligations, when the possibility of an outflow of resources embodying economic  
10 benefits is more than “remote.”

11 192. VWAG represented in each of its annual financial statements identified in  
12 Paragraph 185 that “[t]he assets and liabilities of the German and foreign companies  
13 included in the consolidated financial statements are recognized in accordance with the  
14 uniform accounting policies used within the Volkswagen Group.” VWAG also represented,  
15 in its financial statements, that it recognized a provision “where a present obligation  
16 exists to third parties as a result of a past event, where a future outflow of resources is  
17 probable and where a reliable estimate of that outflow can be made.”

18 193. These statements were false. VWAG recognized no provision for its present  
19 obligations and made no disclosure of any contingent liability relating to its “clean diesel”  
20 fraud in any of its financial statements included with the Offering Memoranda.

21 194. At the time the financial statements were authorized and approved by the  
22 Board of Management, VWAG faced over \$20 billion in exposure because of the emissions  
23 fraud, including: (a) the financial costs of fixing, replacing, or repurchasing the affected  
24 diesel vehicles in light of warranty claims and recalls; (b) legal and regulatory fines and  
25 penalties in the United States and abroad; and (c) civil and criminal liability in the United  
26 States, Europe, and elsewhere.

27 195. These present and reliably estimable costs and expenses were probable and  
28 were required to be recognized as a provision in all of VWAG’s financial statements. At a

1 minimum, they were more than remotely possible, and VWAG should have disclosed them  
2 as a contingent liability.

3 196. VWAG's failure to recognize a provision or disclose a contingent liability  
4 relating to its use of defeat devices to circumvent emissions standards caused its operating  
5 profit, net assets, and shareholders' equity to be materially overstated and its liabilities to  
6 be materially understated in all financial statements included with the Offering  
7 Memoranda.

8 197. In April 2016, after VW's "clean diesel" fraud was made public, VWAG  
9 recognized a \$16.2 billion provision relating to the fraud in its 2015 audited financial  
10 statements. To date, VWAG has incurred over \$30 billion in criminal and civil fines,  
11 penalties, damages and other costs and expenses as a direct result of its emissions fraud.

12 198. In addition, VWAG stated in each of its interim financial statements  
13 identified in Paragraph 185 that "[t]here were no significant changes . . . in the contingent  
14 assets and liabilities described in the [previous annual report]" and that there "were no  
15 significant events" after the balance sheet date. These representations, which the VWAG  
16 Board of Management (including Winterkorn) authorized and approved, were false for the  
17 same reasons as detailed above. Due to the "clean diesel" fraud scheme, there were  
18 significant changes in the contingent assets and liabilities described in the previous  
19 annual report, which should have been disclosed (but were not), and there were significant  
20 events following the balance sheet date, which should have been disclosed (but were not).

21 (b) DDQ Responses

22 199. In addition to the Offering Memoranda, for each 144A Bond Offering, the  
23 Underwriters sent VWAG and VWGoAF two sets of due diligence questions to answer. The  
24 due diligence process facilitated the Underwriters' ability to discharge their obligation to  
25 conduct a reasonable investigation of VW and to identify material issues in connection  
26 with the sale of bonds to investors.

27 200. The Underwriters' first set of questions required VWAG and VWGoAF to  
28 provide information on numerous areas relating to, among many other things, VW's

1 business operations and strategy, possible recalls, government investigations, and its  
 2 legal, environmental, and regulatory compliance. VWAG and VWGoAF provided their  
 3 responses to the first set of questions (“First DDQ Responses”), during a conference call  
 4 with Underwriters, days or weeks prior to the issuance date for the bonds.

5 201. The Underwriters’ second set of questions required VWAG and VWGoAF to  
 6 update their original responses with any new information learned since they responded to  
 7 the first set of due diligence questions (“Second DDQ Responses”). (Collectively, the “DDQ  
 8 Responses”) VWAG and VWGoAF provided their Second DDQ Responses, during a  
 9 conference call with Underwriters, on or about the day the bonds were issued.

10 202. VWAG and VWGoAF provided the DDQ Responses to the Underwriters for  
 11 the 144A Bond Offerings as follows:

Bond Offering	First DDQ Responses	Second DDQ Responses
May 23, 2014	5/14/14	5/23/14
November 20, 2014	11/11/14	11/20/14
May 22, 2015	5/18/15	5/22/15

18 203. As with the Offering Memoranda, VWAG and VWGoAF used a standardized  
 19 process for preparing its DDQ Responses. This process existed for many years and was  
 20 followed for each 144A Bond Offering.

21 204. After the written questions were received from the Underwriters, the VWAG  
 22 Group Legal department distributed them to various departments within VWAG, with  
 23 each department being responsible for preparing, reviewing, and approving responses to  
 24 the questions pertaining to that department’s business area. The specific DDQ Responses  
 25 were prepared, reviewed, and approved by the same departments and employees who  
 26 prepared, reviewed, and approved the sections of the Offering Memoranda covering the  
 27 same topic.  
 28

1           205. For example, the Group Legal department, including VWAG ATTORNEY 1,  
2 prepared, reviewed, and approved the DDQ Responses relating to recalls.

3           206. Group Legal, including VWAG ATTORNEY 1, also was responsible for  
4 preparing, reviewing, and approving the DDQ Responses relating to: (a) “material  
5 exposure to environmental issues,” and (b) “potential, pending or threatened  
6 investigations” and “legal or regulatory issues that may affect VW Group’s operations.”

7           207. As another example, the Quality Assurance department, including VWAG  
8 MANAGER 1 and VWAG QUALITY EMPLOYEE 1, prepared, reviewed, and approved the  
9 DDQ Responses relating to the quality of VW’s vehicles.

10          208. The Underwriters asked VWAG and VWGoAF the following questions,  
11 among others, in connection with each bond offering:

- 12           (a) “Please confirm that there is no material exposure to  
13 environmental issues, which could give rise to material claims.”
- 14           (b) “Have you discovered any material quality issues (*e.g.*,  
15 potentially leading to recall programs)?”
- 16           (c) “Have any new... regulatory developments, [or] contingent  
17 liabilities... in relation to the VW Group occurred or are they  
18 expected in the near future?”
- 19           (d) “Have there been any material changes impacting the business  
20 operations or financial condition or VWAG, the VW Group or  
21 any direct or indirect participants of VWAG consolidated at  
22 equity...?”
- 23           (e) “Are there any potential, pending or threatened investigations  
24 ... or legal or regulatory issues that may adversely affect the VW  
25 Group’s operations?”
- 26           (f) “Please confirm that as of today all statements, including the  
27 risk factors in the offering memorandum for the bond offering,  
28 and information incorporated by reference therein are correct  
and accurately reflect Group’s views and current situation and  
that the bond offering does not omit any information which  
might reasonably be considered to be relevant to an investor in  
the bond offering so as to enable such investor to fully assess the  
risks inherent in an investment in this offering.”

(g) “Please confirm that there are no other matters which should be drawn to the [Underwriters] attention in the context of the envisaged bond offering.”

209. Although VWAG and VWGoAF responded to each due diligence question (including each question listed above), they never disclosed any information related to the defeat device, the illegal emissions by VW’s vehicles, the ICCT Study, or the EPA and CARB investigations into those issues.

210. VWAG’s and VWGoAF’s false and misleading responses to the Underwriters first set of due diligence questions for each bond deal, as specific in Paragraph 208(a)-(g) above, are set forth in the chart below:

Question	May 23, 2014 Bond Offering	November 20, 2014 Bond Offering	May 22, 2015 Bond Offering
(a)	“Responsible internal departments have confirmed that we have no such material environmental issues which could give rise to material claims.”	“Responsible internal departments have confirmed that we have no such material environmental issues which could give rise to material claims.”	“Responsible internal departments have confirmed that we have no such material environmental issues which could give rise to material claims.”

27				
28				

1           211. For the May 2014 144A Bond Offering, the second set of due diligence  
2 questions required VWAG and VWGoAF to answer the following questions:

- 3           (a) With respect to Volkswagen Aktiengesellschaft and its subsidiaries  
4 and affiliates (“VW AG”) as well as Volkswagen Group of America  
5 Finance, LLC (“VWGoAF”) have there been any material  
6 developments, including, but not limited to, developments in respect of  
7 the financial and operating condition, projected future performance, or  
8 funding and liquidity position of VW AG or VWGoAF, or any legal or  
9 regulatory developments, that would affect any of the statements made  
10 in the due diligence call held on May 14, 2014?
- 11           (b) Please confirm that as of today all statements in the [May 2014  
12 Offering Memorandum] (title “Prospectus”) are correct and accurately  
13 reflect VWAG’s and VWGoAF’s views and that the Prospectus does not  
14 omit any information, including known or anticipated matters of a  
15 material nature, which might reasonably be considered to be relevant  
16 to an investor in the notes issued under the Prospectus.
- 17           (c) Please confirm that there are no other matters which should be drawn  
18 to our attention in the context of the proposed transaction.

19           212. The second set of due diligence questions for the November 2014 and May  
20 2015 144A Bond Offerings contained substantially the same questions except that they  
21 referenced different dates.

22           213. In response to the second set of due diligence questions (*see* Paragraph 211  
23 above), VWAG and VWGoAF disclosed VWAG’s acquisition of shares of Scania, which was  
24 announced in May 2014. They did not disclose any information related to the defeat  
25 device, the illegal emissions by VW’s vehicles, the ICCT Study, or the EPA and CARB  
26 investigations into those issues.

27           214. The above statements by VWAG and VWGoAF in response to the  
28 Underwriters’ due diligence questions were materially false and misleading. At all  
relevant times, due to VW’s “clean diesel” fraud, the truth was:

- 29           (a) VW had material exposure to environmental issues, which could  
30 give rise to material claims;
- 31           (b) VW had material quality issues (*e.g.*, potentially leading to  
recall programs);

- 1 (c) VW had expected material regulatory developments, or  
2 contingent liabilities;
- 3 (d) VW had material changes impacting its business operations or  
4 financial condition;
- 5 (e) VW had potential, pending or threatened investigations or legal  
6 or regulatory issues that may adversely affect the VW Group's  
7 operations; and
- 8 (f) The offering documents, including the Offering Memoranda,  
9 were inaccurate and incomplete and omitted material  
10 information.

11 (c) Subscription Agreements

12 215. For each 144A Bond Offering, the Underwriters also required VWAG and  
13 VWGoAF to enter into Subscriptions Agreements. In the Subscription Agreements, VWAG  
14 and VWGoAF made numerous representations and disclosures about their business  
15 operations and practices; VW's compliance with applicable environmental, health, and  
16 safety laws; and the existence or nonexistence of legal disputes, proceedings, or  
17 investigations.

18 216. VWAG and VWGoAF also used a standardized process to prepare the  
19 Subscription Agreements. VWAG's Group Legal department prepared, reviewed, and  
20 approved the Subscription Agreement using the information it gathered and received  
21 through the preparation and approval processes for the Offering Memorandum and DDQ  
22 Responses, as well as through VWAG's centralized risk management system.

23 217. With each new bond offering, VW Group Legal started with a finalized  
24 Subscription Agreement used in an earlier bond offering. VW Group Legal then revised  
25 and updated the disclosures in the Subscription Agreement using the information it  
26 collected from the other departments during the review and approval of their respective  
27 sections of the Offering Memorandum and DDQ Responses. VWAG ATTORNEY 1 assisted  
28 in the assembly, review, and approval of the information contained in the Subscription  
Agreement.

1           218. Also, VWAG's centralized risk management system and employee Code of  
2 Conduct required VW employees to identify and report material issues up, through their  
3 departments, to Group Legal. Prior to the completion of the Subscription Agreement,  
4 VWAG's General Counsel, who had access to the risk management system, informed  
5 attorneys within Group Legal whether there were any additional issues identified through  
6 the system that required disclosure in the Subscription Agreement. Group Legal then  
7 approved the final Subscription Agreement.

8           219. In each Subscription Agreement for the Subject Bond Offerings, VWAG and  
9 VWGoAF falsely stated that the Offering Memorandum did not contain:

10                   “any untrue statement of a material fact, or omit to state a  
11                   material fact necessary to make the statements therein, in the  
12                   light of the circumstances under which they are made, not  
                    misleading.”

13 This statement was materially false when made. As alleged above, the Offering  
14 Memoranda contained numerous false and misleading statements of material fact.

15           220. Additionally, VWAG and VWGoAF made the following materially false and  
16 misleading representations in the Subscription Agreements:

17           (a) There are no legal disputes, arbitration or administrative  
18 proceedings or investigations or other out-of-court proceedings  
19 pending or, to the best knowledge of the Issuer and [VWAG],  
20 threatened to which the Issuer or any of its subsidiaries, if any,  
21 is a party which could constitute or likely result in an Issuer  
22 Material Adverse Effect or that are otherwise material in the  
context of the issue of the Notes. [§2(t) (by VWGoAF and  
VWAG).]

23                   [“**Issuer Material Adverse Effect**” includes anything “which  
24 could impair the ability of the Issuer or the Guarantor to  
25 consummate the transactions contemplated under the  
26 Agreements or could otherwise materially adversely affect the  
affairs of the Issuer or the transactions contemplated under the  
Agreements.”] [§1(h).]

27           (b) There are no legal disputes, arbitration or administrative  
28 proceedings or investigations or other out-of-court proceedings  
pending or, to the best knowledge of [VWAG], threatened to

1 which [VWAG] or any of its subsidiaries is a party, which could,  
 2 separately or taken as a whole, reasonably be expected to have a  
 3 material adverse effect on the business or financial results or  
 4 prospects of the Volkswagen Group or which could impair the  
 5 ability of the Issuer or [VWAG] to consummate the transactions  
 6 contemplated under the Agreements or could otherwise  
 7 materially adversely affect the affairs of the Volkswagen Group  
 8 or the transactions contemplated under the Agreements (such  
 9 effect a “**Material Adverse Effect**”) or that are otherwise  
 10 material in the context of the issue of the Notes.” [§2(v) (by  
 11 VWAG).]

12 (c) “[I]n the ordinary course of its business, [VWAG] periodically  
 13 reviews the effects of environmental, health and safety laws on  
 14 the business, operations and properties of [VWAG] and its  
 15 Material Subsidiaries, in the course of which it identifies and  
 16 evaluates associated costs and liabilities (including, without  
 17 limitation, any capital or operating expenditures required for  
 18 clean-up, closure of properties or compliance with  
 19 environmental, health and safety laws, or any permit, license or  
 20 approval, any related constraints on operating activities and any  
 21 potential liabilities to third parties); on the basis of such review,  
 22 [VWAG] has reasonably concluded that such associated costs  
 23 and liabilities would not, individually or in the aggregate, have a  
 24 Material Adverse Effect.” [§2(l) (by VWAG).]

25 (d) “In conducting their business, [VWAG] and its Material  
 26 Subsidiaries have complied with all environmental, health and  
 27 safety laws applicable to such companies, their assets and  
 28 properties (including, without limitation, real estate owned or  
 used by such companies), ...” [§2(l) (by VWAG).]

21 The Subscription Agreements defined VWAG’s “Material Subsidiaries” as including  
 22 Audi and Porsche, among others.

23 221. The true facts, which were omitted, were very different from these  
 24 false representations.

25 222. At all relevant times, VWAG and VWGoAF, through their respective  
 26 board members and/or numerous other executives and senior officials, knew:

27 (a) there were pending, or at least threatened, investigations, legal  
 28 disputes or other out-of-court proceedings by the EPA and CARB  
 which could, separately or taken as a whole, (i) reasonably be

1 expected to have a material adverse effect on the business,  
2 financial results, or prospects of the VW Group; (ii) impair the  
3 ability of VWGoAF or VWAG to consummate the transactions  
4 contemplated under the Subscription Agreements; (iii) otherwise  
5 materially adversely affect the affairs of the VW Group or the  
6 transactions contemplated under the Subscription Agreements;  
7 or (iv) otherwise be material in the context of the issue of the  
8 bonds;

9 (b) VWAG and its Material Subsidiaries *were not* complying with  
10 *and had not been* complying with all applicable environmental,  
11 health and safety laws; and

12 (c) VWAG had not reasonably concluded that the costs and  
13 liabilities associated with the effects of environmental, health,  
14 and safety laws on its and its Material Subsidiaries' business,  
15 operations, and properties *would not*, individually or in the  
16 aggregate, have a Material Adverse Effect. To the contrary,  
17 VWAG estimated those costs and liabilities could exceed \$20  
18 billion for the U.S. alone.

#### 13 **H. ABS Offerings by Defendant VCI**

14 223. As the name implies, an asset-backed security ("ABS") is a class of  
15 investment whose cash flow is backed by a pool of assets. Generally, asset-backed  
16 securities are created by lenders who wish to convert balance sheet assets, such as car  
17 loans and leases, into a tradable security. By bundling hundreds or thousands of loans  
18 together into a security and selling the security to investors, a lender (*i.e.*, the ABS issuer)  
19 obtains money to write more loans and leases.

20 224. An auto ABS, the second largest class of ABS in the United States, is a  
21 security backed by auto loans and leases. In a typical transaction, the ABS issuer receives  
22 payments upfront from investors and the investors receive a portion of the income stream,  
23 plus interest, generated by the loans or leases that make up the ABS.

24 225. ABS are often divided into separate tranches with different levels of risk and  
25 returns. The loan or lease payments are distributed to the holders of the lower-risk, lower-  
26 interest securities first, and then to the holders of the higher-risk securities. An investor's  
27  
28

1 rate of return depends on the level of risk. If an ABS issuer wishes to issue a security with  
2 more risk, it generally must pay investors a higher rate of return.

3 226. The creditworthiness of an ABS derives from the anticipated ability of the  
4 underlying collateral to generate sufficient funds to timely pay interest and principal to  
5 investors.

6 227. Since 2009, VCI has sponsored the issuance of billions of dollars of  
7 automobile ABS offerings in the United States. The VCI automobile ABS offerings are  
8 securities as defined by the United States securities laws.

9 228. There are three categories of VCI auto ABS offerings:

- 10 (a) Volkswagen Auto Lease Trust (“VALT”) offerings are based on  
11 collateral pools of consumer automobile leases;
- 12 (b) Volkswagen Auto Loan Enhanced Trust (“VALET”) offerings are based  
13 on collateral pools of consumer automobile loans; and
- 14 (c) Volkswagen Auto Master Owner Trust (“VWMT”) offerings are based  
15 on collateral pools of inventory financing loans to VW and Audi  
dealerships (“dealer floorplan”).

16 229. The VALT and VALET offerings were public offerings of securities pursuant  
17 to Regulation AB promulgated under the federal securities laws. [17 C.F.R. §§ 229.1100 –  
18 229.1125.] The VWMT offerings were private offerings of securities pursuant to Rule  
19 144A.

20 230. The VALT and VALET ABS depend on consumers continuing to make their  
21 lease and loan payments and on the resale value of the vehicles, after either the  
22 completion of the lease term (for the VALT ABS) or the repossession or return of  
23 purchased vehicles (for the VALET ABS). The VWMT ABS depend on the dealers being  
24 able to sell new VW and Audi vehicles to pay back their inventory financing loans.

25 231. VCI sponsored four auto ABS offerings between March 2014 and September  
26 2015 (“ABS Offerings”):

Issuance Date	Name	Amount
April 16, 2014	VALET 2014-1	\$1,250,000,000
August 12, 2014	VWMT 2014-1	\$1,250,000,000
October 9, 2014	VALET 2014-2	\$1,000,000,000
February 19, 2015	VALT 2015-A	\$1,450,000,000

232. Leases or loans tied to Subject Vehicles were a material part of the collateral for VALET 2014-1, VALET 2014-2, and VALT 2015-A. Subject Vehicles were a material part of the collateral for VWMT 2014-1.

ABS <sup>3</sup>	Number of Subject Vehicles	Total Number of Loans / Leases	Subject Vehicles as % of Total Leases	Subject Vehicles as % of Total Securitized Value
VALET 2014-1	11,812	42,466	27.8%	29.3%
VWMT 2014-1	6,140	54,334	11.3%	11.4%
VALET 2014-2	10,871	40,585	26.8%	28.5%
VALT 2015-A	3,738	62,742	6.0%	6.8%

<sup>3</sup> Data in chart for ABS other than VWMT 2014-1, is as of September 30, 2015. Data regarding VWMT 2014-1 is as of December 31, 2015.

1           **1.     ABS Prospectus and Prospectus Supplement**

2           233. For each VALET and VALT ABS Offering, VCI, jointly with the issuer trust  
3 and another VW affiliate as depositor, distributed a prospectus and prospectus  
4 supplement (collectively, “Prospectus”) to U.S. investors that made representations  
5 regarding, among other things, the deal terms, information about the underlying  
6 collateral, and risk factors. VCI prepared, approved, and had ultimate authority over the  
7 content of each ABS Prospectus.

8           234. In preparing each Prospectus, VCI was required to comply with, among other  
9 rules and regulations, Regulation AB. Regulation AB required VCI to disclose certain  
10 material information in the Prospectus, including:

- 11           (a) “Where appropriate, provide under the caption ‘Risk Factors’ a  
12 discussion of the most significant factors that make the offering  
13 speculative or risky.” *See* § 1103(b) (incorp. 17 C.F.R. § 229.503(c)).
- 14           (b) A description of the ABS sponsor [VCI] including “to the extent  
15 material[,] information regarding the size, composition and growth of  
16 the sponsor’s portfolio of assets of the type to be securitized and  
17 information or factors related to the sponsor *that may be material to an*  
18 *analysis of the origination or performance of the pool assets*, such as  
whether any prior securitizations organized by the sponsor have  
defaulted or experienced an early amortization triggering event.” §  
1104(c) (emph. supplied).
- 19           (c) A description of the material characteristics of the pool including: “If  
20 legal or regulatory provisions (such as bankruptcy, consumer  
21 protection, predatory lending, privacy, property rights or foreclosure  
22 laws or regulations) may materially affect pool asset performance or  
payments or expected payments on the [ABS], briefly identify these  
provisions and their effects on such items.” § 1111.

23           235. The Prospectus for each VALET and VALT ABS Offering included:

- 24           (a) a discussion of significant “Risk Factors” (*see, e.g.*, VALET 2014-2  
25 Prospectus, at 1, S-12);
- 26           (b) a description of VCI, as the ABS sponsor (*id.* at S-22), including factors  
27 that may be material to the performance of the pool assets (*e.g., id.* at  
28 5, S-33);

- 1 (c) a generic warning that the characteristics of the static pool “may vary  
2 materially from the characteristics of the receivables in this  
3 transaction,” (*id.* at S-33); and
- 4 (d) an assurance that the disclosures required by Section 1111 of  
5 Regulation AB “were accurate in all material respects,” including the  
6 Prospectus’s description “of the legal and regulatory provisions that  
7 may materially and adversely affect the performance of the receivables  
8 or payments on the notes.” (*id.* at S-33.)

9 236. Despite the requirements of Regulation AB, VCI did not disclose in the  
10 Prospectus any information about the “clean diesel” fraud; the ICCT Study; the  
11 environmental laws and regulations VW was violating; the investigations by U.S.  
12 regulators; the possible recalls or warranty claims affecting every “clean diesel” vehicle  
13 sold in the U.S. and 11 million worldwide; or the tens of billions of dollars in fines,  
14 penalties, and other costs and expenses VW was facing in the U.S. alone.

15 237. These facts represented significant risks to the ABS offerings, were material  
16 to the performance of the asset pool underlying the ABS and the expected payments on the  
17 ABS, and were required to be disclosed in the Prospectus. A significant percentage of the  
18 asset pools underlying the ABS were auto leases and loans tied to VW’s “clean diesel”  
19 vehicles.

20 238. For example, although each Prospectus provided investors with historical loss  
21 and delinquency information for static pools comprised of loans and leases on VW  
22 automobiles, the presentation of this information—which was provided so potential  
23 investors could evaluate the existing ABS investment—was materially misleading without  
24 the disclosure of the significant risks that the existing ABS pools may materially  
25 underperform due to the emission scheme that rendered illegal many of the vehicles  
26 included in the pools.

27 239. As another example, although each Prospectus identified a number of laws  
28 and regulations that may materially and adversely affect the performance of the loan and  
lease receivables or payments on the notes—such as the Uniform Commercial Code (*id.* at  
38), the Servicemembers Civil Relief Act (*id.* at 49), federal and state consumer protection

1 laws (*id.* at 43, 50), and the Dodd-Frank Wall Street Reform and Consumer Protection Act  
2 (*id.* at 46)—the Prospectuses made no mention of the state and federal environmental  
3 laws and regulations that rendered illegal many of the vehicles included in the asset pools  
4 for the ABS—such as the Clean Air Act and the EPA and CARB regulations governing  
5 vehicle emissions.

## 6 **2. ABS 144A Offering Memorandum**

7 240. The “Risk Factor” section of the Offering Memorandum for VWMT 2014-1  
8 claimed to summarize the “principal material risks of investing in [that ABS].” This  
9 statement is false and misleading. The Offering Memorandum does not contain any  
10 information related to the defeat device, diesel vehicle emissions, the ICCT Study, or the  
11 EPA and CARB investigations into those issues, nor does it describe the potential impact  
12 of those issues upon the ABS. These were principal material risks of investing in the ABS  
13 and should have been disclosed.

## 14 **3. ABS DDQ Responses**

15 241. Each ABS Offering was underwritten by a group of financial institutions (the  
16 “ABS Underwriters”) located in the United States. As part of their agreement to  
17 participate in the ABS Offerings, the ABS Underwriters required VCI to answer a list of  
18 due diligence questions (“ABS DDQ Responses”).

19 242. The ABS Underwriters conducted due diligence into VW’s business  
20 operations and strategy, its financials, and its legal, environmental, and regulatory  
21 compliance by submitting written questions to VW regarding these topics. The due  
22 diligence process facilitated the ABS Underwriters’ ability to discharge their obligation to  
23 conduct a reasonable investigation of VW and to identify material issues in connection  
24 with the sale of ABS notes to investors.

25 243. U.S. investors and ABS Underwriters relied on VW to provide accurate and  
26 complete information in connection with the ABS Offerings. Defendants knew that U.S.  
27 investors and ABS Underwriters relied on the information disclosed during the due  
28 diligence process to make their investment decisions.

1           244. The questions asked as part of the due diligence process identified issues  
2 material to the ABS Underwriters. The ABS Underwriters sought assurances from VCI on  
3 a number of topics and issues, including the following:

- 4           (a) Are there any material changes expected in the performance of the  
5 collateral pool that are likely to be materially adverse to investors?
- 6           (b) Are there any reasons that would cause VCI to expect the collateral  
7 pool to perform differently from: (i) the delinquency and credit loss  
8 data presented in the prospectus [VALT and VALET ABS]; or (ii) the  
9 loss and aging data presented in the offering documents [VAMT ABS]?
- 10           (c) Are there any material pending or threatened federal or state  
11 regulatory developments or actions that are likely to have a material  
12 adverse effect on VCI or its affiliates?
- 13           (d) Have there been any recent regulatory investigations or audits?
- 14           (e) Are you aware of other matters that are material to the transaction  
15 that are not disclosed in the offering materials?
- 16           (f) Are you aware of any material noncompliance by VCI or any of its  
17 affiliates with any laws or regulations that is likely to have a material  
18 adverse effect on the ABS investors [VAMT ABS]?

19           245. Although VCI responded, during telephone conferences with the ABS  
20 Underwriters, to each due diligence question (including each question listed above), it  
21 never disclosed any information related to the defeat device, diesel vehicle emissions, the  
22 ICCT Study, or the EPA and CARB investigations into those issues.

23           246. For example, for the VALET 2014-1 ABS, VCI provided its responses to the  
24 ABS Underwriters on or after April 21, 2014. In response to the question asking whether  
25 VCI expected material changes in the performance of the collateral pool (see Paragraph  
26 244(a) above), VCI told the ABS Underwriters: “We do not expect any material changes in  
27 the performance of the automobile loan portfolio.” In response to the question asking if  
28 there were any reasons that would cause VCI to expect the ABS pool to perform differently  
than the static pool data provided in the prospectus (see Paragraph 244(b) above), VCI  
said: “No.”

1           247. For the VALET 2014-2 ABS, VCI provided its responses to the Underwriters  
2 on or about October 14, 2014. In response to the question asking whether VCI expected  
3 material changes in the performance of the collateral pool (*see* Paragraph 244(a) above),  
4 VCI told the ABS Underwriters: “Retail loss trend track in line from 2011-2013.  
5 Delinquencies 60-70 basis points and recent performance on low end. No material changes  
6 expected in performance and nothing unusual.”

7           248. In response to the question asking if there were any reasons that would cause  
8 VCI to expect the ABS pool to perform differently than the static pool data provided in the  
9 prospectus (*see* Paragraph 244(b) above), VCI said: “No unusual developments.”

10           249. For the VALET 2014-2 ABS, in response to the questions asking about  
11 regulatory developments, investigations, actions, or audits (*see* Paragraphs 244(c) and  
12 244(d) above), VCI disclosed to the ABS Underwriters only: (a) a “NY DFS [Department of  
13 Financial Services] Fair Lending Subpoena Industry-Wide Review; (b) a “Bear hunting  
14 review”; and (c) “[standard] state reg[ulatory] exams” with “satisfactory results.”

15           250. For the VALT 2015-A ABS, VCI provided its responses to the ABS  
16 Underwriters during a conference call on or about February 19, 2015. In response to the  
17 question asking whether VCI expected material changes in the performance of the  
18 collateral pool (*see* Paragraph 244(a) above), VCI disclosed that they were experiencing “a  
19 rising trend in our delinquency and credit loss metrics compared to the prior 2 years of  
20 performance ... [as] a result of natural portfolio aging from a period of significant growth  
21 combined with an increased risk appetite.”

22           251. In response to the questions asking about regulatory developments,  
23 investigations, actions, or audits (*see* Paragraphs 244(c) and 244(d) above), VCI gave  
24 responses nearly identical to its responses for the VALET 2014-2 ABS, disclosing only the  
25 NY DFS subpoena matter and various state compliance examinations.

26           252. VCI’s preparation of the Prospectuses, 144A Offering Memorandum, and the  
27 ABS DDQ Responses was reckless and/or negligent. VCI did not seek input from any other  
28

1 VW affiliate to determine whether any material information or risk factors existed that  
2 needed to be disclosed, and it had no policies or procedures requiring it to do so.

3 253. VCI and its employees did not investigate or make any inquiries into these  
4 matters before making the representations described above. For example, VCI did not ask  
5 its affiliates, such as VWAG or VWGoA, whether there were any pending or threatened  
6 regulatory developments or actions. In fact, VCI had no policies or procedures in place  
7 requiring them to do so. VCI thus made these false and misleading statements and  
8 omissions without any regard to whether they were true.

9 254. VCI was negligent and/or reckless by not having in place, and following,  
10 policies and procedures designed to ensure that it conducted a reasonable investigation of  
11 the information possessed or known to it and its affiliate companies before making the  
12 statements described above in connection with its offering of ABS to investors.

13 255. It is the custom and practice in the applicable industry, including of similarly  
14 situated finance companies, to implement and follow policies and procedures requiring  
15 them to contact affiliated entities regarding issues such as recalls, significant regulatory  
16 changes, significant litigation, government investigations, and any other material issues  
17 that could affect the auto company and/or pool asset performance prior to issuing ABS.

18 **COUNT I**  
19 **VWAG, WINTERKORN, AND VWGoAF**  
20 **SECTION 10(b) OF THE EXCHANGE ACT AND RULE 10b-5(b) THEREUNDER**  
**[15 U.S.C. § 78j(b); 17 C.F.R. § 240.10b-5]**

21 256. The Commission realleges and incorporates by reference the allegations set  
22 forth in Paragraphs 1 through 255 above.

23 257. VWAG, Winterkorn, and VWGoAF, by engaging in the conduct described  
24 above, directly or indirectly, with knowledge or recklessness, in connection with the  
25 purchase or sale of securities, and by use of the means or instruments of interstate  
26 commerce, or of the mails, or of any facility of any national securities exchange, have:  
27 made untrue statements of a material fact or omitted to state material facts necessary in  
28

1 order to make the statements made, in the light of the circumstances under which they  
2 were made, not misleading.

3 258. By reason of the foregoing acts and practices, VWAG, Winterkorn, and  
4 VWGoAF violated and, unless enjoined, will continue to violate Section 10(b) of the  
5 Exchange Act [15 U.S.C. § 78j(b)] and Rule 10b-5(b) [17 C.F.R. § 240.10b-5] thereunder.

6 **COUNT II**  
7 **WINTERKORN**  
8 **AIDING AND ABETTING**  
9 **SECTION 10(b) OF THE EXCHANGE ACT AND RULE 10b-5(b) THEREUNDER**  
10 **[15 U.S.C. § 78t(a)]**

11 259. The Commission realleges and incorporates by reference the allegations set  
12 forth in Paragraphs 1 through 255 above.

13 260. Winterkorn substantially assisted VWAG's and VWGoAF's violations of  
14 Section 10(b) of the Exchange Act [15 U.S.C. § 78j(b)] and Rule 10b-5(b) [17 C.F.R. §  
15 240.10b-5(b)] thereunder; he had actual knowledge of their violations and his role in  
16 furthering them.

17 261. By engaging in the conduct described above, Winterkorn aided and abetted  
18 VWAG and VWGoAF in their violation of Section 10(b) of the Exchange Act [15 U.S.C. §  
19 78j(b)] and Rule 10b-5(b) [17 C.F.R. § 240.10b-5(b)] thereunder.

20 **COUNT III**  
21 **VWAG AND VWGoAF**  
22 **SECTION 17(a)(2) OF THE SECURITIES ACT**  
23 **[15 U.S.C. § 77q(a)(2)]**

24 262. The Commission realleges and incorporates by reference the allegations set  
25 forth in Paragraphs 1 through 255 above.

26 263. VWAG and VWGoAF, directly or indirectly, in the offer or sale of securities,  
27 and by use of the means and instrumentalities of interstate commerce, or the mails, or any  
28 facility of a national security exchange, have obtained money or property by means of  
untrue statements of material fact and omitted to state material facts necessary in order

1 to make the statements made, in light of the circumstances under which they were made,  
2 not misleading.

3 264. VWAG and VWGoAF acted negligently, recklessly, and/or knowingly in  
4 connection with the misconduct alleged in this count.

5 265. For these reasons, VWAG and VWGoAF have violated and, unless enjoined,  
6 will continue to violate Section 17(a)(2) of the Securities Act [15 U.S.C. 77q(a)(2)].

7  
8 **COUNT IV**  
9 **WINTERKORN**  
10 **AIDING AND ABETTING**  
11 **SECTION 17(a)(2) OF THE SECURITIES ACT**  
12 **[15 U.S.C. § 77o(b)]**

13 266. The Commission realleges and incorporates by reference the allegations set  
14 forth in Paragraphs 1 through 255 above.

15 267. Winterkorn substantially assisted VWAG's and VWGoAF's violations of  
16 Section 17(a)(2) of the Securities Act [15 U.S.C. § 77q(a)(2)]; he had actual knowledge of  
17 their violations and his role in furthering them.

18 268. By engaging in the conduct described above, Winterkorn aided and abetted  
19 VWAG and VWGoAF in their violations of Section 17(a)(2) of the Securities Act [15 U.S.C.  
20 § 77q(a)(2)].

21 **COUNT V**  
22 **VCI**  
23 **SECTION 17(a)(2) AND (a)(3) OF THE SECURITIES ACT**  
24 **[15 U.S.C. § 77q(a)(2), (a)(3)]**

25 269. The Commission realleges and incorporates by reference the allegations set  
26 forth in Paragraphs 1 through 255 above.

27 270. VCI, directly or indirectly, in the offer or sale of securities, and by use of the  
28 means and instrumentalities of interstate commerce, or the mails, or any facility of a  
national security exchange, has: (a) obtained money or property by means of untrue  
statements of material fact and omitted to state material facts necessary in order to make

1 the statements made, in light of the circumstances under which they were made, not  
2 misleading; and (b) engaged in transactions, practices, or courses of business which  
3 operated or would operate as a fraud or deceit upon purchasers of securities.

4 271. VCI acted negligently and/or recklessly in connection with the misconduct  
5 alleged in this count.

6 272. For these reasons, VCI has violated and, unless enjoined, will continue to  
7 violate Sections 17(a)(2) and 17(a)(3) of the Securities Act [15 U.S.C. §§ 77q(a)(2), (a)(3)].

8 **COUNT VI**  
9 **VWAG and WINTERKORN AS CONTROLLING PERSONS**  
10 **SECTION 20(a) OF THE EXCHANGE ACT**  
11 **[15 U.S.C. § 78t(a)]**

12 273. The Commission realleges and incorporates by reference the allegations set  
13 forth in Paragraphs 1 through 255 above.

14 274. As alleged above, VWGoAF violated Section 10(b) of the Exchange Act and  
15 Rule 10b-5(b) thereunder.

16 275. During the relevant period, VWAG and Winterkorn each possessed the power  
17 to direct or cause the direction of the management, policies, and actions of VWGoAF.  
18 VWAG and Winterkorn each exercised that power by, directly or indirectly, inducing  
19 VWGoAF to engage in the acts and omissions alleged in this Complaint.

20 276. VWAG and Winterkorn are each a “controlling person” of VWGoAF pursuant  
21 to Section 20(a) of the Exchange Act.

22 277. As a controlling person of VWGoAF, VWAG and Winterkorn are each liable  
23 for VWGoAF’s violations of Section 10(b) of the Exchange Act and Rule 10b-5(b)  
24 thereunder.  
25  
26  
27  
28

1  
2 **COUNT VII**  
3 **WINTERKORN AS A CONTROLLING PERSON**  
4 **SECTION 20(a) OF THE EXCHANGE ACT**  
5 **[15 U.S.C. § 78t(a)]**

6 278. The Commission realleges and incorporates by reference the allegations set  
7 forth in Paragraphs 1 through 255 above.

8 279. As alleged above, VWAG violated Section 10(b) of the Exchange Act and Rule  
9 10b-5(b)(b) thereunder.

10 280. During the relevant period, Winterkorn possessed the power to direct or  
11 cause the direction of the management, policies, and actions of VWAG. Winterkorn  
12 exercised that power by, directly or indirectly, inducing VWAG to engage in the acts and  
13 omissions alleged in this Complaint.

14 281. Winterkorn is a “controlling person” of VWAG pursuant to Section 20(a) of  
15 the Exchange Act.

16 282. As a controlling person of VWAG, Winterkorn is liable for VWAG’s violations  
17 of Section 10(b) of the Exchange Act and Rule 10b-5(b) thereunder.

18 **PRAYER FOR RELIEF**

19 (1) Enter an Order finding that Defendants committed, and unless enjoined, will  
20 continue to commit, the violations alleged in this Complaint;

21 (2) Permanently enjoin Defendants VWAG, Winterkorn, and VWGoAF from  
22 future violations of Section 17(a)(2) of the Securities Act [15 U.S.C. § 77q(a)] and Section  
23 10(b) of the Exchange Act [15 U.S.C. § 78j(b)] and Rule 10b-5(b) [17 C.F.R. § 240.10b-5]  
24 thereunder;

25 (3) Permanently enjoin Defendant VCI from future violations of Sections 17(a)(2)  
26 and 17(a)(3) of the Securities Act [15 U.S.C. §§ 77q(a)(2) and 77q(a)(3)];

27 (4) Bar Defendant Winterkorn from serving as an officer or director of a public  
28 company pursuant to Section 20(e) of the Securities Act [15 U.S.C. § 77w(e)] and Section  
21(d)(2) of the Exchange Act [15 U.S.C. § 78u(d)(2)].

1 (5) Order Defendants VWAG, VWGoAF, and VCI to disgorge all ill-gotten gains  
2 from the conduct alleged herein, with prejudgment interest;

3 (6) Order civil penalties against Defendants VWAG, Winterkorn, and VWGoAF  
4 pursuant to Section 20(d) of the Securities Act [15 U.S.C. § 77t(d)] and Section 21(d)(3) of  
5 the Exchange Act [15 U.S.C. § 78u(d)(3)] for violations of the federal securities laws as  
6 alleged herein;

7 (7) Order civil penalties against Defendant VCI pursuant to Section 20(d) of the  
8 Securities Act [15 U.S.C. § 77t(d)] for violations of the federal securities laws as alleged  
9 herein; and

10 (8) Order such other and further relief as the Court may deem just and proper.

11 Plaintiff United States Securities and Exchange Commission demands a trial by  
12 jury on all issues and claims so triable.

13  
14  
15 Dated: March 14, 2019

Respectfully submitted,

16
