1 **Overview**

The Regulation A Data Sets provides information from exemption from registration for public offerings extracted from Regulation A XML submissions in a flat file format to assist users in more easily constructing the data for analysis. These data includes any amendments to those submissions. The data has been automatically and directly taken from submissions created by the registrants and provided as-filed. The data will be published quarterly. Data contained in documents filed after 5:30pm EST on the last business day of the quarter will be included in the next quarterly posting.

The following table lists the submission types for Regulation A that are included in the data sets. The data sets do not included unstructured Regulation A filings or Draft Offering Statements made public.

Finally, the data does not reflect all available information, including certain metadata associated with Commission filings. The data is intended to assist the public in analyzing data contained in Commission filings; however, it is not a substitute for such filings.
