are not required to respond unless the form displays a currently valid OMB control number.

FORM ADV
Part II - Page 2

Applicant:
Eqis Capital Management, Inc.

SEC File Number:
801-68642

Date:
1/21/2011

1. A. Advisory Services and Fees. (check the applicable boxes)

For each type of service provided, state the approximate
% of total advisory billings from that service.
(See instruction below.)

Applicant:

<input checked="" type="checkbox"/> (1) Provides investment supervisory services.....	100 %
<input type="checkbox"/> (2) Manages investment advisory accounts not involving investment supervisory services.....	%
<input type="checkbox"/> (3) Furnishes investment advice through consultations not included in either service described above.....	%
<input type="checkbox"/> (4) Issues periodicals about securities by subscription.....	0 %
<input type="checkbox"/> (5) Issues special reports about securities not included in any service described above.....	%
<input type="checkbox"/> (6) Issues, not as part of any service described above, any charts, graphs, formulas, or other devices which clients may use to evaluate securities.....	%
<input type="checkbox"/> (7) On more than an occasional basis, furnishes advice to clients on matters not involving securities.....	%
<input type="checkbox"/> (8) Provides a timing service.....	%
<input type="checkbox"/> (9) Furnishes advice about securities in any manner not described above.....	%

(Percentages should be based on applicant's last fiscal year. If applicant has not completed its first fiscal year, provide
estimates of advisory billings for that year and state that the percentages are estimates.)

	Yes	No
B. Does applicant call any of the services it checked above financial planning or some similar term?.....	<input type="checkbox"/>	<input checked="" type="checkbox"/>

C. Applicant offers investment advisory services for: (check all that apply)

<input checked="" type="checkbox"/> (1) A percentage of assets under management	<input type="checkbox"/> (4) Subscription fees
<input type="checkbox"/> (2) Hourly charges	<input type="checkbox"/> (5) Commissions
<input type="checkbox"/> (3) Fixed fees (not including subscription fees)	<input type="checkbox"/> (6) Other

D. For each checked box in A above, describe on Schedule F:

- the services provided, including the name of any publication or report issued by the adviser on a subscription basis or for a fee
- applicant's basic fee schedule, how fees are charged and whether its fees are negotiable
- when compensation is payable, and if compensation is payable before service is provided, how a client may get a refund or may terminate an investment advisory contract before its expiration date

2. Types of Clients — Applicant generally provides investment advice to: (check those that apply)

<input checked="" type="checkbox"/> A. Individuals	<input type="checkbox"/> E. Trusts, estates, or charitable organizations
<input type="checkbox"/> B. Banks or thrift institutions	<input type="checkbox"/> F. Corporations or business entities other than those listed above
<input checked="" type="checkbox"/> C. Investment companies	<input checked="" type="checkbox"/> G. Other (describe on Schedule F)
<input checked="" type="checkbox"/> D. Pension and profit sharing plans	

3. Types of Investments. Applicant offers advice on the following: (check those that apply)

- | | |
|--|--|
| <input checked="" type="checkbox"/> A. Equity Securities | <input checked="" type="checkbox"/> H. Unites States government securities |
| <input checked="" type="checkbox"/> (1) exchange-listed securities | <input type="checkbox"/> I. Options contracts on: |
| <input checked="" type="checkbox"/> (2) Securities traded over-the-counter | <input type="checkbox"/> (1) securities |
| <input checked="" type="checkbox"/> (3) foreign issuers | <input type="checkbox"/> (2) commodities |
| <input type="checkbox"/> B. Warrants | <input type="checkbox"/> J. Futures contracts on: |
| <input type="checkbox"/> C. Corporate debt securities
(other than commercial paper) | <input type="checkbox"/> (1) tangibles |
| <input type="checkbox"/> D. Commercial paper | <input type="checkbox"/> (2) intangibles |
| <input checked="" type="checkbox"/> E. Certificates of deposit | <input type="checkbox"/> K. Interests in partnerships investing in: |
| <input checked="" type="checkbox"/> F. Municipal securities | <input type="checkbox"/> (1) real estate |
| <input type="checkbox"/> G. Investment company securities | <input type="checkbox"/> (2) oil and gas interests |
| <input type="checkbox"/> (1) variable life insurance | <input type="checkbox"/> (3) other (explain on Schedule F) |
| <input type="checkbox"/> (2) variable annuities | <input type="checkbox"/> L. Other (explain on Schedule F) |
| <input checked="" type="checkbox"/> (3) mutual fund shares | |

4. Methods of Analysis, Sources of Information, and Investment Strategies.

A. Applicant's security analysis methods include: (check those that apply)

- | | |
|---|---|
| (1) <input type="checkbox"/> Charting | (4) <input type="checkbox"/> Cyclical |
| (2) <input checked="" type="checkbox"/> Fundamental | (5) <input checked="" type="checkbox"/> Other (explain on Schedule F) |
| (3) <input type="checkbox"/> Technical | |

B. The main sources of information applicant uses include: (check those that apply)

- | | |
|---|--|
| (1) <input checked="" type="checkbox"/> Financial newspapers and magazines | (5) <input type="checkbox"/> Timing services |
| (2) <input type="checkbox"/> Inspections of corporate activities | (6) <input checked="" type="checkbox"/> Annual reports, prospectuses, filings with the
Securities and Exchange Commission |
| (3) <input checked="" type="checkbox"/> Research materials prepared by others | (7) <input checked="" type="checkbox"/> Company press releases |
| (4) <input checked="" type="checkbox"/> Corporate rating services | (8) <input checked="" type="checkbox"/> Other (explain on Schedule F) |

C. The investment strategies used to implement any investment advice given to clients include: (check those that apply)

- | | |
|--|--|
| (1) <input checked="" type="checkbox"/> Long term purchases
(securities held at least a year) | (5) <input type="checkbox"/> Margin transactions |
| (2) <input checked="" type="checkbox"/> Short term purchases
(securities sold within a year) | (6) <input type="checkbox"/> Option writing, including covered options,
uncovered options or spreading strategies |
| (3) <input checked="" type="checkbox"/> Trading (securities sold within 30 days) | (7) <input type="checkbox"/> Other (explain on Schedule F) |
| (4) <input type="checkbox"/> Short sales | |

5. Education and Business Standards.

Are there any general standards of education or business experience that applicant requires of those involved in determining or giving investment advice to clients? Yes No
[x] []

(If yes, describe these standards on Schedule F.)

6. Education and Business Background.

For:

- each member of the investment committee or group that determines general investment advice to be given to clients, or
- if the applicant has no investment committee or group, each individual who determines general investment advice given to clients (if more than five, respond only for their supervisors)
- each principal executive officer of applicant or each person with similar status or performing similar functions.

On Schedule F, give the:

- name
- year of birth
- formal education after high school
- business background for the preceding five years

7. Other Business Activities. (check those that apply)

- ☐ A. Applicant is actively engaged in a business other than giving investment advice.
- ☐ B. Applicant sells products or services other than investment advice to clients.
- ☐ C. The principal business of applicant or its principal executive officers involves something other than providing investment advice.

(For each checked box describe the other activities, including the time spent on them, on Schedule F.)

8. Other Financial Industry Activities or Affiliations. (check those that apply)

- ☐ A. Applicant is registered (or has an application pending) as a securities broker-dealer.
- ☐ B. Applicant is registered (or has an application pending) as a futures commission merchant, commodity pool operator or commodity trading adviser.
- C. Applicant has arrangements that are material to its advisory business or its clients with a related person who is a:
- | | |
|--|--|
| <input type="checkbox"/> (1) broker-dealer | <input type="checkbox"/> (7) accounting firm |
| <input type="checkbox"/> (2) investment company | <input type="checkbox"/> (8) law firm |
| <input type="checkbox"/> (3) other investment adviser | <input type="checkbox"/> (9) insurance company or agency |
| <input type="checkbox"/> (4) financial planning firm | <input type="checkbox"/> (10) pension consultant |
| <input type="checkbox"/> (5) commodity pool operator, commodity trading adviser or futures commission merchant | <input type="checkbox"/> (11) real estate broker or dealer |
| <input type="checkbox"/> (6) banking or thrift institution | <input type="checkbox"/> (12) entity that creates or packages limited partnerships |

(For each checked box in C, on Schedule F identify the related person and describe the relationship and the arrangements.)

- D. Is applicant or a related person a general partner in any partnership in which clients are solicited to invest?..... Yes No
[] [x]

(If yes, describe on Schedule F the partnerships and what they invest in.)

FORM ADV
Part II - Page 5

Applicant:

Egis Capital Management, Inc.

SEC File Number:

801-68642

Date:

1/21/2011

9. Participation or Interest in client Transactions. (check those that apply)

Applicant or a related person:

- ☐ A. As principal, buys securities for itself from or sells securities it owns to any client.
- ☐ B. As broker or agent effects securities transactions for compensation for any client.
- ☐ C. As broker or agent for any person other than a client effects transactions in which client securities are sold to or bought from a brokerage customer.
- ☐ D. Recommends to clients that they buy or sell securities or investment products in which the applicant or a related person has some financial interest.
- ☒ E. Buys or sells for itself securities that it also recommends to clients.

(For each box checked, describe on Schedule F when the applicant or a related person engages in these transactions and what restrictions, internal procedures, or disclosures are used for conflicts of interest in those transactions.)

Describe, on Schedule F, your code of ethics, and stat that you will provide a copy of your code of ethics to any client or prospective client upon request.

10. Conditions for Managing Accounts. Does the applicant provide investment supervisory services, manage investment advisory accounts or hold itself out as providing financial planning or some similarly termed services *and* impose a minimum dollar value of assets or other conditions for starting or maintaining an account? ☒ Yes ☐ No

(If yes, describe on Schedule F.)

11. Review of Accounts. If applicant provides investment supervisory services, manages investment advisory accounts, or holds itself out as providing financial planning or some similarly termed services:

- A. See Schedule F for details
- B. See Schedule F for details

12. Investment or Brokerage Discretion.

A. Does applicant or any related person have authority to determine, without obtaining specific client consent, the:

- | | | |
|---|--------------------------|-------------------------------------|
| | Yes | No |
| (1) securities to be bought or sold?..... | <input type="checkbox"/> | <input checked="" type="checkbox"/> |
| | Yes | No |
| (2) amount of the securities to be bought or sold?..... | <input type="checkbox"/> | <input checked="" type="checkbox"/> |
| | Yes | No |
| (3) broker or dealer to be used?..... | <input type="checkbox"/> | <input checked="" type="checkbox"/> |
| | Yes | No |
| (4) commission rates paid?..... | <input type="checkbox"/> | <input checked="" type="checkbox"/> |

	Yes	No
B. Does applicant or a related person suggest brokers to clients?.....	<input type="checkbox"/>	<input checked="" type="checkbox"/>

For each yes answer to A describe on Schedule F any limitations on the authority. For each yes to A(3), A(4) Or B, describe on Schedule F the factors considered in selecting brokers and determining the reasonableness Of their commissions. If the value of products, research and services given to the applicant or a related person is a factor, describe:

- the products, research and services
- whether clients may pay commissions higher than those obtainable from other brokers in return for those products and services
- whether research is used to service all of applicant's accounts or just those accounts paying for it; and
- any procedures the applicant used during the last fiscal year to direct client transactions to a particular broker in return for products and research services received.

13. Additional Compensation.

Does the applicant or a related person have any arrangements, oral or in writing, where it:

- | | | |
|--|-------------------------------------|-------------------------------------|
| A. is paid cash by or receives some economic benefit (including commissions, equipment or non-research services) from a non-client in connection with giving advice to clients?..... | Yes | No |
| | <input type="checkbox"/> | <input checked="" type="checkbox"/> |
| | Yes | No |
| B. directly or indirectly compensates any person for client referrals?..... | <input checked="" type="checkbox"/> | <input type="checkbox"/> |

(For each yes, describe the arrangements on Schedule F.)

14. Balance Sheet. Applicant must provide a balance sheet for the most recent fiscal year on Schedule G if applicant:

- has custody of client funds or securities (unless applicant is registered or registering with the Securities and Exchange Commission); or
 - requires prepayment of more than \$500 in fees per client and 6 or more months in advance
- | | | |
|---|--------------------------|-------------------------------------|
| | Yes | No |
| Has applicant provided a Schedule G balance sheet?..... | <input type="checkbox"/> | <input checked="" type="checkbox"/> |

**Schedule F of

Continuation Sheet for Form ADV Part II**

Applicant:	SEC File Number:	Date:
Egis Capital Management, Inc.	801-68642	1/21/2011

(Do not use this Schedule as a continuation sheet for Form ADV Part I or any other schedules.)

1. Full name of applicant exactly as stated in Item 1A of Part I of Form ADV: Egis Capital Management, Inc.	IRS Empl. Ident. No.: 680540584
Item of Form	
Answer	

Item 1. A. (1)
Item A 1(d)

The Registrant provides investment advisory services under a solicitor_s platform using a multi-manager, multi-disciplined approach that is intended to meet client's individual needs through the Egis Program ("Program"), including the creation, monitoring and maintenance of various Model Portfolios. These services are offered in the form of managed accounts to individuals, corporations, retirement plans, banks, trusts and other entities. Egis Capital provides investment advisory services to its clients through a wrap fee program (_Program_). As the sponsor of the Program, Registrant is responsible for: (i) assisting clients in developing an investment strategy to meet their investment objectives, (ii) identifying an appropriate asset allocation model for the client_s Program account, (iii) investing and monitoring the client_s Program account across those Model Manager Portfolios and investments comprising the client_s Program account, and (iv) facilitating the execution of brokerage model manager transactions through Foliofn Clearing. The Registrant takes proper care in the due diligence, selection and monitoring of investments, and internal and external model managers participating in the Program.

Regular Wrap Fee Program: (note: 401K / 403B Qualified Plans discussed separately below)

Egis charges an annual _Wrap-Fee_ for participation in the Program. The Wrap-Fee is made up of two separate and distinctive parts, but charged to the client as one fee. The two parts are as follows: Part 1 the Egis Program Fee, and Part 2 the Financial Professional Fee (_FP_ fee). Both parts are detailed in Table 1. The Wrap-Fee will be charged as a percentage of assets under management on a blended fee schedule. Clients will be invoiced and fees will be directly debited from client accounts after the end of each calendar month. When there is not enough cash or funds in an account to pay a fee, the account will be rebalanced so as to generate a sufficient level of cash or funds to meet this expense. As part of this agreement you authorize the Clearing Firm (FolioFn) to deduct the Wrap-Fees from your account as directed by Egis. The fee calculation will be based on the average closing market value of the assets in the client_s Program account over the previous calendar month. Value is calculated as the market value, or fair market value in the absence of market value, plus any credit balance or minus any debit balance. Each client Program Account is mutually exclusive for purposes of determining the declining fee schedule. Your Egis account may contain investments that charge a separate fee not included within the Wrap-Fee.

In addition to the Wrap-Fee charged by Egis, clients may also be charged, at the Financial Professional_s discretion, an additional Initial Consulting Fee (_IC_ fee) of up to 1% of the initial investment, and of any subsequent investments. The Initial Consulting Fee compensates the Financial Professional for gathering and communicating clients_ financial information, as well as assisting in the manager selection process from the Egis Contracted manager list. The Initial Consulting Fee of up to 1% will be deducted upon the deposit of cash, securities or any instrument of value into the client_s Program Account at the end of the month in which the deposits were received, and will be paid in full to the Financial Professional_s firm. The Initial Consulting Fee will not be assessed until the program account has been established for five days. The Initial Consulting Fee may be reduced or waived at the Financial Professional_s discretion. The Initial Consulting Fee will be considered fully earned upon deduction of the Initial Consulting Fee from the client_s Program Account. See Table 2.

BREAKDOWN OF WRAP-FEE

Part 1, Program Fee

The Egis Program Fee will be charged as a percentage of assets under management on a blended fee schedule.

There are four options that determine the Program Fee. Option 1 (All Equis) includes an account comprised of portfolios managed solely by Equis. Option 2 (Multi Manager) includes managers other than Equis (i.e., managers contracted by Equis), but not excluding Equis. Option 3 (Managed ETF) includes only exchange traded funds (ETF's) and no individual stocks or contracted managers. Option 4 (Unified Managed Account) can include portfolio managed by Equis, portfolios managed by firms contracted by Equis and exchange traded funds. It will be up to the client and their Financial Professional to determine whether Option 1, Option 2, Option 3, or Option 4 is best for the client's particular circumstances. See Table 3.

Part 2, Financial Professional Fee

The Financial Professional Fee is the portion of the overall Wrap Fee that is used to compensate the Financial Professional. The services that the Financial Professional will be compensated for include: introducing clients to Equis, gathering and communicating clients' financial information, assisting in the manager selection process from the Equis approved manager list, acting as a liaison between Equis and clients, staying in contact with clients and informing Equis of any material changes in clients' financial picture, and other various clerical or administrative duties. The Financial Professional Fee is negotiated between the client, the Financial Professional and Equis. The Financial Professional Fees shall under no circumstances exceed 1.5% per annum. The client may be able to negotiate a higher or lower Financial Professional Fee based on the individual Financial Professional that introduces the client to the program.

Other Wrap-Fee Details

The Wrap-Fee includes the Equis Program Fee that covers all advisory fees, online performance reporting costs, separate account money manager fees and any fees that Equis pays to a third party in conjunction with marketing the program (i.e. internal or external wholesalers or platform inclusion fees). In addition, the Wrap-Fee is inclusive of the Financial Professional Fee. The Wrap-Fee does not include certain administrative fees; for example, wire transfers, annual charges for qualified accounts, or certificate issues. Custodian charges a separate fee for brokerage, execution and custodial services (this fee is exclusive of the Equis Wrap Fee Program fee.) The current negotiated rate for FolioFN is 20 basis points, charged monthly pro rata. This fee is charge separate from the Equis Wrap Program fee and subject to change. A minimum of \$25,000 of assets under management is required to participate in this program. Securities transactions affected for the clients' accounts may also include, mark-ups, mark-downs, or dealer spreads to market makers or other principals from whom securities were obtained by FolioFn. These mark-ups, mark-downs, or dealer spreads will be retained by the market maker or other principal and will not be credited or reimbursed to the client's account.

Some of the model portfolios available to clients are managed by employees and/or principals of Equis. Managers of these model portfolios are paid salary by Equis and therefore do not directly receive any particular percentage of the wrap fee. Other model portfolios are managed by managers who are not employees or principals of Equis. These outside managers that are contracted by Equis receive a percentage of assets under management as compensation. Outside manager compensation is negotiated and based on the asset class, equity style, and tenure of manager, among other various criteria judged by Equis to be important. Contracted Manager compensation is included in the Wrap-Fee of Option 2. Alternative Strategies (Alt. Strat) is only available as an asset class within the UMA program. Some managers are limited to a maximum investment of 75% of the entire account in Alt. Strat. based on Equis assessment of that managers diversification.

Negotiability of Fees and Account Minimums: In certain circumstances, all of Equis fees and account minimums may be negotiable.

Fee Calculation: The fee charged is calculated as described above and is not charged on the basis of a share of capital gains upon or capital appreciation of the funds or any portion of the funds of an advisory client, pursuant to Section 205(a)(1) of the Investment Advisers Act of 1940, as amended (hereinafter "IA Act").

Fee Payment: Clients will be invoiced and Wrap Fees will be directly debited from client accounts at the beginning of each calendar month. The fee calculation will be based on the average daily market value of the assets in the client's Program account over the previous calendar month. Value is calculated as the market value, or fair market value in the absence of market value, plus any credit balance or minus any debit balance. Fees will be directly debited in accordance with the Client Services Agreement.

Termination of Advisory Relationship: A client agreement may be canceled at any time, by either party, for any reason upon receipt of written notice. The client has the right to terminate an agreement without penalty within five (5) business days after entering into the agreement. Thereafter, either Equis or Client may terminate this Agreement upon fifteen days written notice. Upon termination of any account, any prepaid, unearned fees will be

promptly refunded, and any earned, unpaid fees for any unbilled portion of a month will be collected prior to disbursement of funds.

Mutual Fund Fees and Expenses: All fees paid to Equis for investment advisory services are separate and distinct from the fees and expenses charged by ETF_s or mutual funds to their shareholders. These fees and expenses are described in each fund's prospectus. These fees will generally include a management fee, other fund expenses, and a possible distribution fee. A client could invest in an ETF or mutual fund directly, without the services of Equis. In that case, the client would not receive the services provided by Equis which are designed, among other things, to assist the client in determining which ETF_s or funds are most appropriate to each client's financial condition and objectives. Accordingly, the client should review both the fees charged by the ETF_s or funds and the fees charged by Equis to fully understand the total amount of fees to be paid by the client and to thereby evaluate the advisory services being provided.

Fee Schedule Tables

Table 1

The maximum Wrap-Fee (inclusive of parts 1 and 2) charged to clients is as follows:

Assets Under Management	MAXIMUM Annual Fee (%)
First \$100,000	Up to 2.30%*
Next \$150,000	Up to 2.20%*
Next \$250,000	Up to 2.10%*
Next \$2,000,000	Up to 2.00%*
Amounts Over \$2,500,000	Up to 1.90%*

* The actual Wrap-Fee charged to each client will depend in part on the negotiated _Financial Professionals_ Fee, as detailed in Part 2 below. The exact Financial Professional fee charged to you will be specified in section #9 (Financial Profession_s Report) of this Account Application. Similar advisory services may be available from other registered investment advisers for similar or lower fees.

Table 2

The Maximum combined Wrap-Fee and IC-Fee during the first year of program participation is as follows:

Assets Under Management	MAXIMUM First Year Fee (%)
First \$100,000	Up to 3.30%*
Next \$150,000	Up to 3.20%*
Next \$250,000	Up to 3.10%*
Next \$2,000,000	Up to 3.00%*
Amounts Over \$2,500,000	Up to 2.90%*

* The actual First year Fee charged to each client will depend in part on the negotiated _Financial Professionals_ Fee, as detailed in Part 2 below, as well as the Initial Consulting Fee charged by the Financial Professional. The exact Financial Professional fee and Initial Consultation Fee charged to you will be specified in section #9 (Financial Profession_s Report) of this Account Application. Similar advisory services may be available from other registered investment advisers for similar or lower fees.

Table 3

If client invests in an All Equis Managed account, the Program Fee will be:

Assets Under Management	MAXIMUM Annual Fee (%)
First \$250,000	Up to 0.55%*
Next \$250,000	Up to 0.45%*
Next \$1,500,000	Up to 0.35%*
Next \$3,000,000	Up to 0.25%*
Amounts Over \$5,000,000	Up to 0.15%*

If client invests in a Multi Manager Managed account, the Program Fee will be:

Assets Under Management	MAXIMUM Annual Fee (%)
First \$100,000	Up to 0.75%*
Next \$150,000	Up to 0.65%*
Next \$250,000	Up to 0.55%*
Next \$2,000,000	Up to 0.45%*
Amounts Over \$2,500,000	Up to 0.35%*

If client invests in a Managed ETF account, the Program Fee will be:

Assets Under Management	MAXIMUM Annual Fee (%)
First \$250,000	Up to 0.65%*
Next \$250,000	Up to 0.45%*
Next \$1,500,000	Up to 0.35%*
Next \$3,000,000	Up to 0.25%*
Amounts Over \$5,000,000	Up to 0.15%*

If client invests in a Managed UMA account, the Program Fee will be:

Assets Under Management	MAXIMUM Annual Fee (%)
First \$250,000	Up to 0.80%*
Next \$250,000	Up to 0.70%*
Next \$1,500,000	Up to 0.60%*
Next \$3,000,000	Up to 0.50%*
Amounts Over \$5,000,000	Up to 0.40%*

Note: Custodian charges a separate fee for brokerage, execution and custodial services (this fee is exclusive of the Equis Wrap Fee Program fee.) The current negotiated rate for FolioFN is 20 basis points, charged monthly pro rata. This fee is charge separate from the Equis Wrap Program fee and subject to change.

Wrap-Fee Program for 401 K / 403 B Qualified Accounts

Equis charges an annual _Wrap-Fee_ for participation in the Program. The Wrap-Fee is made up of two separate and distinctive parts, but charged to the client as one fee. The two parts are as follows: Part 1 the Equis Program Fee, and Part 2 the Financial Professional Fee (_FP_ fee). Both parts are detailed in Table 1. The Wrap-Fee will be charged as a percentage of assets under management. Clients will be invoiced and fees will be directly debited from client accounts after the end of each calendar month. Where there is not enough cash or funds in an account to pay a fee, the account will be rebalanced so as to generate a sufficient level of cash or funds to meet this expense. As part of this agreement you authorize the Clearing Firm (FolioFN) to deduct the Wrap-Fees from your account as directed by Equis. The fee calculation will be based on the average closing market value of the assets in the client_s Program account over the previous calendar month. Value is calculated as the market value, or fair market value in the absence of market value, plus any credit balance or minus any debit balance. Your Equis account may contain investments that charge a separate fee not included within the Wrap-Fee.

BREAKDOWN OF WRAP-FEE

Part 1, Program Fee

The Equis Program Fee will be charged as a percentage of assets under management. There are three options that determine the Program Fee. Option 1 (Multi-Manager) includes managers other than Equis (i.e., managers contracted by Equis), but not excluding Equis. Option 2 (Managed ETF) includes only exchange traded funds (ETFs) and no individual stocks or contracted managers. Option 3 (Unified Managed Account) includes managers other than Equis (i.e., managers contracted by Equis), but not excluding Equis and ETFs. It will be up to the sponsor, the participants, and the Financial Professional to determine whether Option 1, Option 2, or Option 3 is best for the participant_s particular circumstances. See Table 2.

Part 2, Financial Professional Fee

The Financial Professional Fee is the portion of the overall Wrap Fee that is used to compensate the Financial Professional. The services that the Financial Professional will be compensated for include: introducing clients to Equis, gathering and communicating clients_ financial information, assisting in the manager selection process from the Equis approved manager list, acting as a liaison between Equis and clients, staying in contact with clients and informing Equis of any material changes in clients_ financial picture, and other various clerical or administrative duties. The Financial Professional Fee is negotiated between the Plan Sponsor, the Financial Professional and Equis. The Financial Professional Fees shall under no circumstances exceed 1.5% per annum. The client may be able to negotiate a higher or lower Financial Professional Fee based on the individual Financial Professional that introduces the client to the program.

Other Wrap-Fee Details

The Wrap-Fee includes the Equis Program Fee that covers all advisory fees, online performance reporting costs, separate account money manager fees and any fees that Equis pays to a third party in conjunction with marketing

the program (i.e. internal or external wholesalers or platform inclusion fees). In addition, the Wrap-Fee is inclusive of the Financial Professional Fee. The Wrap-Fee does not include certain administrative fees; for example, wire transfers, annual charges for qualified accounts, fees associated with the administration of the 401K/403B performed by a third party administrator, or certificate issues. Custodian charges a separate fee for brokerage, execution and custodial services (this fee is exclusive of the Equis Wrap Fee Program fee.) The current negotiated rate for FolioFN is 20 basis points, charged monthly pro rata. This fee is charge separate from the Equis Wrap Program fee and subject to change. A minimum of \$100 of assets under management is required to participate in this program. Securities transactions affected for the clients_ accounts may also include, mark-ups, mark-downs, or dealer spreads to market makers or other principals from whom securities were obtained by FolioFn. These mark-ups, mark-downs, or dealer spreads will be retained by the market maker or other principal and will not be credited or reimbursed to the client_s account.

Some of the model portfolios available to clients are managed by employees and/or principals of Equis. Managers of these model portfolios are paid salary by Equis and therefore do not directly receive any particular percentage of the wrap fee. Other model portfolios are managed by managers who are not employees or principals of Equis. These outside managers that are contracted by Equis receive a percentage of assets under management as compensation. Outside manager compensation is negotiated and based on the asset class, equity style, and tenure of manager, among other various criteria judged by Equis to be important. Contracted Manager compensation is included in the Wrap-Fee of Option 1. Alternative Strategies (Alt. Strat) is only available as an asset class within the UMA program. Some managers are limited to a maximum investment of 75% of the entire account in Alt. Strat. based on Equis assessment of that managers diversification.

Negotiability of Fees and Account Minimums: In certain circumstances, all of Equis fees and account minimums may be negotiable.

Fee Calculation: The fee charged is calculated as described above and is not charged on the basis of a share of capital gains upon or capital appreciation of the funds or any portion of the funds of an advisory client, pursuant to Section 205(a)(1) of the Investment Advisers Act of 1940, as amended (hereinafter _IA Act_).

Fee Payment: Clients will be invoiced and Wrap Fees will be directly debited from client accounts at the beginning of each calendar month. The fee calculation will be based on the average daily market value of the assets in the client_s Program account over the previous calendar month. Value is calculated as the market value, or fair market value in the absence of market value, plus any credit balance or minus any debit balance. Fees will be directly debited in accordance with the Client Services Agreement.

Manager Selection: Plan Sponsor selects the money managers for the Plan Participants from a pre-approved list provided by Equis Capital Management. These selected money managers may be changed by the Plan Sponsor from time to time.

Termination of Advisory Relationship: A client agreement may be canceled at any time, by either party, for any reason upon receipt of written notice. The client has the right to terminate an agreement without penalty within five (5) business days after entering into the agreement. Thereafter, either Equis or Client may terminate this Agreement upon fifteen days written notice. Upon termination of any account, any prepaid, unearned fees will be promptly refunded, and any earned, unpaid fees for any unbilled portion of a month will be collected prior to disbursement of funds.

Mutual Fund Fees and Expenses: All fees paid to Equis for investment advisory services are separate and distinct from the fees and expenses charged by ETF_s or mutual funds to their shareholders. These fees and expenses are described in each fund's prospectus. These fees will generally include a management fee, other fund expenses, and a possible distribution fee. A client could invest in an ETF or mutual fund directly, without the services of Equis. In that case, the client would not receive the services provided by Equis which are designed, among other things, to assist the client in determining which ETF_s or funds are most appropriate to each client's financial condition and objectives. Accordingly, the client should review both the fees charged by the ETF_s or funds and the fees charged by Equis to fully understand the total amount of fees to be paid by the client and to thereby evaluate the advisory services being provided.

Fee Schedule Tables

Table 1

The maximum Wrap-Fee (inclusive of parts 1 and 2) charged to clients is as follows:

Assets Under Management	MAXIMUM Annual Fee (%)
All Account Values	Up to 2.25%*

* The actual Wrap-Fee charged to each client will depend in part on the negotiated _Financial Professionals_ Fee, as detailed in Part 2 below. The exact Financial Professional fee charged to you will be specified in section #9 (Financial Profession_s Report) of this Account Application. Similar advisory services may be available from other registered investment advisers for similar or lower fees.

Table 2

If client invests in a Multi Manager Managed account, the Program Fee will be:

Assets Under Management	Annual Fee (%)
All Account Values	0.75%*

If client invests in a Managed ETF account, the Program Fee will be:

Assets Under Management	Annual Fee (%)
All Account Values	0.55%*

If client invests in a Unified Managed account, the Program Fee will be:

Assets Under Management	Annual Fee (%)
All Account Values	0.80%*

Note: Custodian charges a separate fee for brokerage, execution and custodial services (this fee is exclusive of the Equis Wrap Fee Program fee.) The current negotiated rate for FolioFN is 20 basis points, charged monthly pro rata. This fee is charge separate from the Equis Wrap Program fee and subject to change.

Item 2. G.

Item 4. A. (5)

Item 4.A.(5) and 4.B.(8)

Methods of Analysis, Sources of Information, and Investment Strategies

Registrant utilizes various methods of analysis depending on the advisory service. Registrant_s primary method of analysis, information and investment strategy for the Equis Program is to employ an internet based structured asset allocation strategy in order to develop and maintain the appropriate asset allocation model for each particular client of an introducing Financial Professional, based upon each particular client_s investment goals, time horizons and risk tolerances. Assets for each client are allocated among up to 10 separately managed model portfolios all managed to represent a particular equity style both domestic and foreign; and fixed income. The managers within the program are periodically monitored by Registrant to make certain they are investing within their respective disciplines. Registrant researches investment managers and their security analysis methods for a different classes and investment styles. Registrant_s other sources of information for evaluating investments and Model Managers are the qualitative and quantitative materials prepared by in-house analysts; publicly available information contained in the financial press and other sources; information, research and statistical materials prepared by others; computer readable financial databases containing business and financial statistics, both current and historical. Registrant may also employ outside consultants to support the ongoing evaluation process of investment.

Item 4. B. (8)

See above.

Item 5.

The Registrant has set high standards of education and experience for its personnel. Those persons responsible for determining investment advice are required to have college degrees and many have advanced degrees and/or other professional credentials. In addition those persons responsible for determining investment advice must pass all required securities exams and maintain all necessary licenses required by the appropriate regulator authorities.

Item 6.

William Robert Nelson Jr. is the Chief Financial Strategist of Equis Capital Management (2003-Present) with the primary responsibility of managing clients_ portfolios. Born in 1971, he graduated from San Diego State University with a degree in Finance. He moved to Chicago where as a member of the Chicago Board of Trade he made a market in financial futures. Subsequently, he earned a Ph.D. in economics from George Mason University and was appointed as a professor to the department of Finance and Managerial Economics in the State University of New York at Buffalo School of Management (2001-2005). His original research has been published in the American Economic Review, DePaul Journal of Healthcare Law, The International Conference on Information Technology ITCC 2004 Proceedings, the Journal of Economic Behavior and Organization, Latin American Finance

and Capital Markets, and the Latin American Law and Business Report.

Curtis C. Brown, Jr. graduated from San Diego State University with a degree in Political Science. He received an MBA degree from National University and completed advanced business and leadership studies at the Wharton School, University of Pennsylvania. Prior to joining Equis in October of 2010, he spent thirty years with the investment firm of Merrill Lynch. His career started as a Financial Advisor and he moved onto a variety of leadership positions, including Managing Director, National Sales Manager, Assistant to the Chairman and President, and Regional Managing Director.

Duane Menting, Esq. is the Chief Financial Officer and the Chief Legal Counsel. He was born in 1952. He graduated with a B.S. degree 1976 from the University of Wisconsin - Stevens Point. He received his JD degree in 1980 from Indiana University - Bloomington. He completed his LLM - Tax degree in 1991 at Golden Gate University - San Francisco. He has run a successful private legal practice for 20 years working with Fortune 500 companies. He joined Equis Capital Management in March of 2008.

Jennifer C Winters is the Chief Compliance Officer. She was born in 1971. She graduated from Lewis University with a B.A. in Communications. She has been with Equis Capital Management since February of 2003.

Item 9. Code of Ethics
Code of Ethics

The Adviser has adopted a Code of Ethics for the purpose of instructing its personnel in their ethical obligations and to provide rules for their personal securities transactions. The Adviser and its personnel owe a duty of loyalty, fairness and good faith towards their clients, and the obligation to adhere not only to the specific provisions of the Code but to the general principles that guide the Code.

The Code covers a range of topics that may include: general ethical principles, reporting personal securities trading, exceptions to reporting securities trading, reportable securities, initial public offerings and private placements, reporting ethical violations, distribution of the Code, review and enforcement processes, amendments to Form ADV and supervisory procedures. The Adviser will provide a copy of the Code to any client or prospective client upon request.

Associated persons may own an interest in or buy or sell for their accounts the same securities, which may be purchased or sold in the accounts of advisory clients. Associated persons seek to ensure that they do not personally benefit from the short-term market effects of their recommendations to clients and their personal transactions are regularly monitored. Associated persons are aware of the rules regarding material non-public information and insider trading. Associated persons may also buy or sell specific securities for their accounts based on personal investment considerations, which the Adviser does not deem appropriate to buy or sell for clients.

Item 9. E.

On occasion, William Nelson or other employees or representatives of Equis Capital may buy or sell securities that Equis Capital recommends to clients. There is no conflict of interest as the securities are widely held and publicly traded. They always place client interests before their own interests. In addition Equis Capital outlines policies and procedures to assure that clients' interest are put first in the Equis Capital Code of Ethics. Equis Capital will provide a copy of our Code of Ethics to any client or prospective client upon request.

Item 10.

Conditions for Managing Accounts - for Regular Wrap Fee Program

Registrant generally manages accounts on a discretionary basis. Registrant will generally only provide Program services when the client makes a minimum, initial Program Account investment of \$25,000. Registrant retains the right to waive this requirement in certain circumstances at its sole discretion. Client monies are not invested in a Program Account until Registrant has received the agreed upon investment minimum. Monies below the agreed upon minimum are invested in a money market fund. Clients may also make subsequent contributions or withdrawals to their Program Account. Contributions in excess of \$1,000 will be invested in their Program Account. Amounts below \$1,000 may or may not be allocated to a FDIC cash account and invested when the cumulative amount in the FDIC cash account reaches \$1,000. Clients may make a withdrawal or arrange for periodic withdrawals in amounts of \$100 or more from their Program Account. The Financial Professional should contact Registrant's Client Services Department to receive any necessary instructions to expedite these requests.

Conditions for Managing Accounts - for 401 K / 403 B Qualified Accounts

Eqis requires a minimum account size of 100 for participation in the Program. This account size may be negotiable under certain circumstances. Clients may also make subsequent investments of \$25 or more, although any subsequent investment will be invested in a money market security within the program account until such time where there is a minimum of \$500 to reallocate into the designated asset allocation within the program account.

Item 11. A.

Section 11 _ Part A - Review of Accounts

At a minimum, all Program accounts are reviewed by the Asset Management team (final review will be conducted by Dr. William Nelson) for rebalancing at least once during a running twelve month period. The review process considers factors relevant to the determination of whether or not the assets held by the account and the investment strategy employed are consistent with each client's investment objectives. Clients in the Program will receive, at a minimum, a monthly brokerage statement, and in addition have access to online real time performance reporting through FolioFn clearing. Depending on the information requested by the client, these reports and statements may include the following information: 1) description of the assets held, 2) the quantity and market value for each position, 3) the market value of the account, 4) a transaction history, 5) interest and expense items and 6) fee calculations. In addition to the above, from time to time upon the request of the client, if there is a significant change in the investment environment or a significant change in the client's results (triggering events), the Registrant may provide a client with additional supplemental information. There may be significant dispersion between the holdings and performance of the Model Portfolios and the Program Accounts that are managed by Registrant using the Model Portfolios. Account dispersion may be due to differences in recommendations made by a Model Manager as well as differences in account size, cash flow, the timing and terms of execution of trades by Registrant and the Model Manager, individual client-imposed restrictions, account rebalancing schedules, certain trading and system limitations, and other factors. Accordingly, Registrant will undertake reasonable efforts to mitigate the effects of significant dispersion by: (i) periodically reviewing and monitoring Program Accounts to identify significant dispersion, and (ii) where appropriate, executing trades or account rebalances to minimize dispersion. Any performance dispersion Registrant deems significant between the Model Manager's performance and the actual client account performance is reviewed periodically by Registrant to determine if any action is necessary to address performance dispersion.

Item 11. B.

The applicant makes available client reports monthly via the custody and clearing firms that we domicile accounts that are managed on a discretionary basis by Eqis Capital. Clients get statements from their broker/dealers, mutual funds and other money managers, as appropriate.

Item 13. B.

Additional Compensation

Registrant enters into Master Soliciting/Selling Agreements with Financial Professional firms providing cash compensation to persons who introduce or refer clients to the Eqis Program. These agreements are governed by, and require that the solicitors meet the disclosure and other requirements of, Rule 206(4)-3 under the Investment Advisers Act of 1940, as well as comply with other applicable laws and regulations. Generally, these agreements provide for compensation equal to a specified percentage of the fees received by the firm. Prior to compensating, Eqis will ensure that the Financial Professional firm is properly registered or exempt from the registration requirement.

Financial Professionals may receive incentive awards for the recommendation or introduction of investment products to advisory clients. The receipt of this compensation may affect a representative's judgment in recommending products to clients.

If the Financial Professional (FP)/solicitor meets certain business related qualifications, Eqis may provide up to 5 basis points of the fee paid by the client as an incentive to the client's FP/solicitor for the purpose of marketing and servicing new and existing clients. In order to participate in the incentive provided by Eqis, the FP/solicitor needs to maintain certain asset levels and achieve certain new asset levels. The level of incentive increases based upon the previously mentioned criteria. This incentive creates a potential conflict of interest for the FP/solicitor because the FP/solicitor receives compensation that increases based on the level of assets managed through the program. This compensation does not impact the level of fees that clients pay and clients are under no obligation to follow the recommendations of their FP/solicitor regarding using the program.

MODEL PORTFOLIO DESCRIPTIONS

Egis provides access to model portfolios that provide diversification across the spectrum of domestic and international equity styles and fixed income. Each client of Egis will be assigned an asset allocation comprised of up to ten of the model portfolios. The assignment of an asset allocation will be based solely on the client's needs and risk preferences. Some of the model portfolios are managed in house by Egis; others are managed by independent, contracted managers. Below is a brief description of model portfolios arranged by asset class and equity style.

Large Cap Growth Model Portfolios-Benchmarked to the Russell 1000 Growth Index

Advisor Partners / AP Tax Managed Index LCG

The U.S. Equity Large Cap Tax Managed Index Strategy seeks to maximize after-tax returns while maintaining risk characteristics similar to the broad U.S. equity market through a managed portfolio of individual securities. The portfolio's benefits include diversification across sectors combined with tax efficiency. Tax efficiency is achieved by selecting tax efficient vehicles and/or through active tax management. The sectors with the greatest representations within the portfolio tend towards finance, information technology, and healthcare. Advisor Partners is an investment management firm specializing in providing customized, tax-managed, index-based investment solutions for advisors and their clients. The average tenure of the principals exceeds two decades and contributes to their depth of investment judgment and expertise. They are privately owned and managed by the principals.

Egis Capital Management / Egis Large Cap Growth

Egis Large Cap Growth is managed to provide clients diversification, primarily among U.S. large capitalization companies oriented towards growth. Equities are selected partially through a proprietary screening mechanism utilizing an augmented version of the Porter Five Forces Model. The Egis proprietary Model explains how market structures determine the intensity of competition. We invest in firms that face less competition and thus have prospects for greater long term profits. The Porter Five Forces Model considers five sources of competition: customers demanding lower prices, suppliers demanding higher prices, substitute products providing alternatives, direct competitors cutting prices and increasing quality, and potential entrants increasing direct competition. An additional consideration is technological innovation which influences the five forces. Egis places an emphasis on a long-term buy and hold approach. When selecting individual equities Egis also takes into consideration the industry in the interest of maintaining diversification to maximize risk adjusted returns.

Financial Trust Asset Management / American Disciplined LCG

The American Disciplined Equity Strategy Invests in the highest rated stock within each of the 12 industry sectors of the Standard & Poor's 500. Stocks within each sector are ranked according to FTAM's proprietary rating system which compares the companies in 3 broad areas. Their Earnings Momentum index ranking compares each company's revenue and net income growth in each of the last 3 years. The profitability + quality index ranking compares profitability and quality factors such as return on equity, return on assets, profit margin, and financial leverage. Their Value Momentum index ranking compares valuation and momentum, rating each stock by low price to sales ratio and high 1 year, 3 month, and 1 month momentum factors. The scores are then combined to come up with an overall rating. The ADE portfolio is invested on an equally weighed basis in the top 20% of the stocks in each industry sector with industry weights that are kept equal to the S&P 500. On a quarterly basis the portfolio is rebalanced.

Hanseatic Management Services, Inc /Hanseatic LCG

Managers use a multi-time dimensional system that identifies large-cap stocks whose emergent price trends have better than normal probability of persisting into the 6-36 month target holding period with positive alpha. Lower time dimension patterns are then used to identify shorter term entry and exit points. Research has shown that time parameters in the relevant time dimensions, monthly and weekly in particular, also play an important role. It is the intersection of multi-time dimensional trend measurement and time boundaries that is the foundation of the buy-sell disciplines. The portfolio typically contains at least 100 stocks providing for diversification. Another interesting characteristic of the portfolio is its relatively low correlation with indexes in its asset class. Since 1991 Hanseatic has applied proprietary quantitative buy and sell disciplines to manage equity portfolios' returns, risk, and structure. Their buy disciplines provide a consistent stock selection process that is adaptable to varying market environments.

Laidlaw Group / Laidlaw Group LCG

The Laidlaw Group's Large Cap Value portfolio focuses investments in companies with the following characteristics: high cash flow to market value ratio, high asset to debt ratio, profitability, and growth potential. Close attention is also paid to the sectors in which firms operate. The management may overweigh or underweigh

sectors based on their analysis of economic trends. The Laidlaw Group is a family business founded by Robert Laidlaw and his son David. Robert, the current Chairman, is an industry veteran who began his career on the floor of the New York Stock Exchange in 1958 after graduating from Yale, with a degree in philosophy. His nearly 50 years of industry experience provide the foundation from which the Laidlaw Group excels.

Martin Investment Management, LLC / Martin Quality Growth

Martin Investment Management, LLC of Evanston, Illinois is an employee-owned, SEC- registered equity investment adviser and the winner of numerous industry distinctions including "Equity Manager of the Year" at Opal's 2008 Emerging Manager Conference and was a finalist for the same award in 2009, "Notable Outperformer" in a study entitled "Women Owned Firms" by Altura Capital in February 2009, Top Ten Performer in the Informa Investment Solutions's PSN Investment Manager Database for the eighth time in the last fourteen quarters ending December 31, 2009 .

Our "Best Ideas" Long Term Growth strategy typically contains 20-30 of 2,000 stocks that are screened for high returns on invested capital, projected long-term growth, strong cash flow and capital structure. Stocks selected for portfolios should ideally have understandable business, distinct strategies, products, and services, growing earnings and sales, and strong competitive positions. Turnover has averaged about 20% annually. A stock is sold if the company's fundamentals decline, the valuation becomes excessive, the position becomes too large, or more attractive ideas are found.

Patrick Martin is the founder, a managing director, and the primary portfolio manager. His educational accomplishments include an A.B. in economics from Dartmouth College in 1972 and an M.B.A. from Dartmouth's Amos Tuck School in 1974. He holds the professional designations of Chartered Financial Analyst (CFA) and Certified Public Accountant (CPA). Mr. Martin is a member of the CFA Society of Chicago and the CFA Institute.

Sandra Martin and Mary Ellen Zellerbach assist in managing the firm's strategy. Ms. Martin has been a Managing Director since 2003. She holds an A.B. from St. Xavier College, an A.M. from the University of Illinois and an M.B.A. from Loyola University of Chicago. Ms. Zellerbach joined Martin Investment Management, LLC in 2003 after founding Mellon Capital Management. She earned an A.B. in Economics from Wellesley College and an M.B.A. from the Graduate School of Business at Stanford University.

Navellier / Global Large Cap

Navellier implements its investment philosophy through a combination of quantitative and fundamental analysis. The initial portfolio universe includes foreign listed equities and American Depositary Receipts (ADRs) with market capitalizations equal to or greater than \$1 billion and domestic stocks with market capitalizations equal to or greater than \$5 billion. Stocks must have ample liquidity in both the domestic listed market and their home market. The process begins with a computer driven analysis based on Modern Portfolio Theory. The firm calculates reward (alpha) and risk (standard deviation) characteristics for the initial universe of stocks. Trailing 52-week "alphas" are divided by trailing 52-week "standard deviations" to create a "reward/risk" ratio for each stock. These stocks are then reviewed on a fundamental basis. The fundamentals reviewed and measured are based on Navellier's proprietary analysis of what is currently "in favor" on Wall Street and the Accounting and Governance Risk rating (AGR). Stocks are ranked on both the quantitative and fundamental analyses, and the final step is the portfolio construction process, which combines country allocation, weighting of stocks, and portfolio formation. Country allocation is determined by three factors: (1) the direction of interest rates relative to other economies; (2) the level of the average reward/risk ratio for all companies in a given country relative to other countries; and (3) the country's weight in the relevant index. The portfolio is adjusted monthly based on market conditions.

James O'Leary, CFA is the lead Portfolio Manager for the Navellier Asia, Navellier Europe, and Navellier Latin America, Global Small Cap, and Global Growth strategies. He joined Navellier in 1996 and has thirty-five years of experience in the securities industry. Prior to joining Navellier, Mr. O'Leary was Managing Director at Lexington Management Corporation and a Director at Federated Investment Counseling. His B.S. in business administration is from Bowling Green State University and his M.B.A. is from the University of Cincinnati.

Sawgrass Asset Management / Sawgrass LCG Best Ideas

Sawgrass Asset Management, L.L.C. is a 100 percent employee-owned, SEC-registered investment advisor. The firm provides innovative growth equity investment management services to institutional and high net worth investors. The firm was founded on January 15, 1998 in Jacksonville, Florida, by principals Andrew Cantor, Dean McQuiddy and Brian Monroe. The firm consists of a core group of key investment professionals who have worked together for more than 20 years. The core investment team of portfolio managers, equity traders, and client service professionals came to Sawgrass from Barnett Capital Advisors, Inc. and have been with the firm since its inception.

Windward Capital Management Co / CapApp

Windward Capital Management Co., based in Los Angeles, California, offers several large cap growth strategies. It has emerged as a top-rated money manager and continues to produce superior risk-adjusted performance. The firm is 100% employee-owned.

The investment process incorporates a top-down thematic approach combined with a disciplined, fundamental, bottom-up research. Thematic investing involves the initial determination of a number of compelling cyclical and secular investment themes. After these themes are identified, rigorous financial analysis of those companies is conducted at the individual company level.

Our portfolios display the following fundamental characteristics:

Quality: Dominant companies displaying financial strength within their economic sector. These are leading companies with best-in-class managements, high incremental returns on invested capital, and business models with sustainable competitive advantages.

Growth: Companies with predictable and sustainable above-average growth in revenue, earnings, and free cash flow.

Value: Companies that are undervalued on either an absolute or relative basis, based upon our projections of future cash flow and earnings.

Robert Nichols, Ph.D. is the founder, Chief Executive Officer, and Portfolio Manager of Windward Capital Management Co. For the twenty-one years prior to founding Windward (1971 to 1992), he was President of the Roley, Nichols Capital Group, Inc., in Los Angeles. While at the firm, he was President of RNC Capital Management where he managed more than \$1.25 billion in portfolios of taxable, municipal, corporate and multi-employer retirement plans and foundation clients. In addition to his corporate responsibilities, he was a senior member of the Investment Policy Committee and Research Committee. In 1990, he and his partners sold the firm to an Austrian bank. His academic degrees include a Ph.D. in Management from the Claremont Graduate School's Drucker School of Business.

Donald Bessler, CPA, Chief Investment Officer and Portfolio Manager, came to Windward Capital Management Co. from First American Capital Management where he was a Senior Portfolio Manager/Senior Vice President. Prior to First American Capital Management, he was a Principal and the Director of Research at Roxbury Capital Management LLC, a \$14 billion asset management firm in Los Angeles. As Director of Research and a voting member of the Investment Committee, he supervised a team of six Equity Research Analysts in addition to personally managing more than \$1 billion in client assets. He was also responsible for managing the Roxbury Special Situations Portfolio and the Special Situations Hedge Fund. Mr. Bessler began his career as a Certified Public Accountant and attained the level of Audit Manager with the accounting firm Price Waterhouse. Mr. Bessler graduated *summa cum laude* from Lehigh University with a B.S. in Finance, a B.S. in Accounting, and a B.A. in Psychology.

Large Cap Value Model Portfolios-Benchmarked to the Russell 1000 Value Index

Advisor Partners / AP US High Dividend Yield LCV

The U.S. Equity High Dividend Tax Managed Index Strategy seeks to maximize after-tax returns while maintaining risk characteristics similar to the broad U.S. equity market through a managed portfolio of individual securities. The portfolio's benefits include diversification across sectors combined with tax efficiency. Tax efficiency is achieved by selecting tax efficient vehicles and/or through active tax management. The sectors with the greatest representations within the portfolio tend towards finance, information technology, and industrials. Advisor Partners is an investment management firm specializing in providing customized, tax-managed, index-based investment solutions for advisors and their clients. The average industry tenure of the principals exceeds two decades and contributes to their depth of investment judgment and expertise. They are privately owned and managed by the principals.

Egis Capital Management / Egis Large Cap Value

Egis Large Cap Value is managed to provide clients diversification primarily among U.S. large capitalization companies oriented toward value. This portfolio often features investments in consumer staples, financial, or manufacturing sectors. Equities are selected partially through a proprietary screening mechanism utilizing an augmented version of the Porter Five Forces Model. The Egis Proprietary Model explains how market structures determine the intensity of competition. We invest in firms that face less competition and thus have prospects for greater long-term profits. The Porter Five Forces Model considers five sources of competition: customers demanding lower prices, suppliers demanding higher prices, substitute products providing alternatives, direct competitors cutting prices and increasing quality, and potential entrants increasing direct competition. An additional consideration is technological innovation which influences the five forces. Egis places an emphasis on a long term buy and hold approach. When selecting individual equities Egis also takes into consideration the industry in the interest of maintaining diversification to maximize risk adjusted returns.

Golub Group LLC / Golub Group Equity

The Golub Group of San Mateo, California has managed the wealth of high-net-worth individuals and institutions since 2003. The six investment professionals and 12 client service and operations professionals own 100% of the Golub Group that managed approximately \$600 million in total assets as of December 31, 2009.

The large cap value portfolio typically invests in 30-35 companies with strong cash flows, solid balance sheets, histories of consistent profitability, high returns on equity, successful and proven management teams, the capacity to pay and raise dividends, and honest reporting of financial results. Securities are purchased when we think they are temporarily undervalued relative to their intrinsic values. Estimated intrinsic values are triangulated using several valuation techniques, including discounted cash flow models, dividend discount models, net asset value models, sum-of-the-parts models and comparing standard multiples, such as P/E, P/B, EV/EBITDA, etc., to peer companies and historical trends. The average market capitalization of our equity holdings is approximately \$100 billion. Typical portfolio turnover is low, averaging between 20-25% annually. Golub Group Equity Composite has outperformed the S&P 500 in seven of the past eight years and achieved a Morningstar™ Overall 5-Star rating.

The six-person Investment Committee has decades of cumulative experience. Michael Golub, the firm's founder, leads the Investment Committee and has over 40 years' investing experience. Colin Higgins, President and Director of Research, has 13 years' experience as a portfolio manager and research analyst. In addition, the team consists of Kurt Hoefer, CFA (19 years' experience), Tim Rich, CFA (11 years' experience), John Dowling, CFA (11 years' experience) and Dave Ogburn (12 years' experience). There has been no turnover in the Investment Committee since the firm's inception.

Loudon Investment Management, LLC / LIM Equity Income

Since its founding in 2003, Loudon Investment Management (LIM) has implemented its thorough and unique investment process that contains three overlays: statistical, fundamental and thematic.

Objective Statistical analysis – All stocks considered for purchase must pass several tests, the most important of which is that at the time of purchase, the current dividend yield for every stock must exceed the market yield and be considerably higher than its average yield of the past 4-5 years. Thus, we do not just buy high-yielding stocks but only those whose yields are historically high because either the dividends have risen faster than the stock price or the stock price has declined to a level that substantially increases the current yield relative to its own history.

Subjective fundamental analysis is oriented toward the long term. It specifically concentrates on the potential growth and health of the business over a full market cycle. We are primarily high-quality, large company investors.

Subjective thematic analysis of macro industry trends may lead to substantial over or under weightings of sectors relative to the general stock market, but security and company specific hurdle must still be met.

The application of the above principles currently results in portfolios with equity income yields of about 4.0% characterized by “unbalanced” diversification and below-average equity volatility. Investments are long term in nature with an average turnover rate of around 20%. The investment horizon is open-ended, but if the price of an individual stock moves up at a rate well ahead of its fundamental progress as measured by cash flow and a declining income yield, we are perfectly willing to realize the gain. The process is repeated by buying another high-quality depressed issue producing current income above both the general stock market and also what we have sold. Over time, this discipline ratchets up the growth in current income production and the investment performance versus what it would have been were we just buy and hold investors.

LIM's equity income style was founded by Douglas M. Loudon. Mr. Loudon began his investment career at Scudder Stevens & Clark in New York in 1971. He was named a General Partner in 1982 and became a Managing Director when the firm incorporated in 1985. In 1986, he was named Investment Director for the American Association of Retired Persons' (AARP) Investment Program. This program consisted of a group of mutual funds concentrating on producing competitive investment returns with below-average investment risk, the same approach that is employed by LIM today. Early in 2003, Mr. Loudon formed LIM to more fully implement the approach he had developed over many years. Mr. Loudon holds a B.A. in Economics from the University of North Carolina and an M.B.A. in Financial Management from Pace University and is a Chartered Financial Analyst.

Texas First Investment Management Company / Texas First LCV

Texas First Investment Management Company has provided significant equity returns with relatively low risk by combining a long term, conservative, and value-oriented approach with an unparalleled expertise acquired by investing solely in Texas-based publicly-held companies. The stock selection criteria include, but are not limited to, value measures of sustainable earnings, sustainable cash flow, and adjusted book value. Potential catalysts to unleash value are also critical considerations. Holdings are carefully diversified among industries. Money Manager Review rated the Large Cap Value portfolio as the top performing large cap value portfolio in the country, for the 5 year period 2001 – 2005. It has outperformed the S&P 500 for seven consecutive years, with below-average risk. During no calendar year has the portfolio ever lost money.

Tom Johnson Investment Management, Inc. / TJIM LCV

The goal of the TJIM Core/Relative Value Stock Portfolio is to maximize total return over a business cycle. We believe in creating a prudent, well-diversified, high-quality portfolio that addresses capital preservation and risk. The focus is on purchasing common stock of companies that have valuations lower than their peer group in industries and sectors that provide the best opportunity in the foreseeable future. Historically, this portfolio has a blend of equity issues that match "value" and "growth" descriptions. Some consultants classify our style as core

with a value bias. The portfolio will under normal circumstances contain 30 to 50 securities and is diversified across most sectors. Tax efficiency is addressed by focusing on turnover and realizing gains and losses when in general they provide the most benefit to clients under the U.S. tax code. TJIM was established in 1983 to provide independent investment management services for high net worth individuals and families, public funds, corporations, foundations, endowments, and unions throughout the United States. TJIM's conservative investment philosophy has always maintained that a quality, well-diversified portfolio that addresses both capital appreciation and capital preservation is the most prudent and consistent way to achieve clients' investment goals. In all our efforts, we seek to provide above average returns in good markets while preserving our clients' wealth when down markets occur.

Mid Cap Growth Model Portfolios-Benchmarked to the Russell Mid Cap Growth Index

Egis Capital Management / Egis Mid Cap Growth

Egis Mid Cap Growth is managed to provide clients diversification among U.S. mid capitalization companies primarily oriented towards growth. Many of these stocks are found in the volatile technology, health-care, and services sectors. Equities are selected partially through a proprietary screening mechanism utilizing an augmented version of the Porter Five Forces Model. The Egis Proprietary Model explains how market structures determine the intensity of competition. We invest in firms that face less competition and thus have prospects for greater long-term profits. The Porter Five Forces Model considers five sources of competition: customers demanding lower prices, suppliers demanding higher prices, substitute products providing alternatives, direct competitors cutting prices and increasing quality, and potential entrants increasing direct competition. An additional consideration is technological innovation which influences the five forces. Egis places an emphasis on a long-term buy and hold approach. When selecting individual equities, Egis also takes into consideration the industry in the interest of maintaining diversification to maximize risk adjusted returns.

Gaineswood Investment Management, Inc. / Gaineswood Standard

Gaineswood Investment Management, Inc. began in 1995 as a publisher of small and mid cap equity research for the institutional investment marketplace. The firm has 10 employees, 5 of whom are analysts whose work is utilized by the firm's portfolio manager and founder, William Baker, CFA. The analysts and manager have a fundamental investment process known as "Persistent Growth Investing," which stresses long-term growth drivers and competitive advantages when selecting stocks. Meticulous investigative research and modeling is used to gain a complete understanding of investments. Institutions, family offices, registered investment advisors, and high-net-worth individuals benefit from Gaineswood's expertise and independence as a private, founder-owned corporation that is not affiliated with a major investment broker or advisor. The affiliates of Gaineswood Investment Management, Inc. are its research broker-dealer, GARP Research & Securities Co. (founded 2003) and the general partner of its private limited partnership, GARP Capital LLC (founded in late 1999). GARP Research & Securities Co. serves the professional money management sector.

The portfolios within the Standard composite seek investment in companies capable of substantial earnings growth over multiple years. Turnover of positions is limited and very long-term. Gaineswood's Standard composite of portfolios contains 30-50 common stocks, generally with a market cap between \$500 million and \$10 billion. Position sizes are usually between 2% and 3%, with some at 5%. The broadly-defined medical and technology sectors are habitually well-represented, but others can be significant depending upon fundamentals. Cash can be 10% but is usually lower. Derivatives are not used in this strategy.

Before founding Gaineswood, William Baker, CFA previously managed in excess of \$100 million for nine years at Oppenheimer Mutual Funds, and earlier was an analyst at what is now Van Kampen Investments. Mr. Baker received an M.B.A. from the Amos Tuck School (Dartmouth College) in 1980 and a B.A. from the University of Pennsylvania in 1978.

Hanseatic Management Services, Inc. / Hanseatic MCG

Managers use a multi-time dimensional system that identifies mid-cap stocks whose emergent price trends have better than normal probability of persisting into the 6-36 month target holding period with positive alpha. Lower time dimension patterns are then used to identify shorter term entry and exit points. Research has shown that time parameters in the relevant time dimensions, monthly and weekly in particular, also play an important role. It is the intersection of multi-time dimensional trend measurement and time boundaries that is the foundation of the buy-sell disciplines. The portfolio typically contains at least 100 stocks providing for diversification. Another interesting characteristic of the portfolio is its relatively low correlation with indexes in its asset class. Since 1991 Hanseatic has applied proprietary quantitative buy and sell disciplines to manage equity portfolios' returns, risk, and structure. Their buy disciplines provide a consistent stock selection process that is adaptable to varying market environments. Returns displayed are based on a backtest of this methodology and are hypothetical. No assets were actually invested using this methodology during the backtest period.

StoneRidge Investment Partners, LLC / StoneRidge Mid Cap Growth

The StoneRidge Small to Mid (SMID) Cap Growth Equity Portfolio seeks to outperform the Russell 2500 Growth Index. StoneRidge believes in a blend of fundamental research, quantitative tools, and qualitative judgments are required to consistently add value in equity investment management. The investment process employed by StoneRidge is built upon a team of six sector specialists performing intensive fundamental equity research. This bottom-up, fundamental investment process is supported by a proprietary, multi-factor screening tool, the purpose of which is to narrow the scope of the investment universe to the most attractive candidates, upon which to perform detailed fundamental analysis. This quantitative tool also provides an ongoing objective analysis of StoneRidge's existing portfolio. The SMID investment universe is comprised of stocks with market capitalizations between \$500 million and \$10 billion as well as those stocks which are constituents of the Russell 2500 Growth Index. The proprietary, quantitative tool screens and then ranks this universe of over 2400 U.S. stocks. The goal of the screening tool is to narrow opportunities to a focused list of stocks that possess the characteristics most likely to lead to superior investment performance. StoneRidge's screening tool is constructed around five broad factors which are critical to predicting future stock performance: earnings momentum, valuation, technical condition, accounting/financials, and insider activity. Each stock is ranked relative to the entire SMID universe; the result is a list of companies with the most attractive combination of attributes. These stocks are then subjected to in-depth fundamental research by our team of sector specialists.

Tributary Capital Management /Tributary MCG

An average earnings growth rate for the previous five years that exceeds the benchmark is a primary criterion for equity selection into the Tributary Mid Cap Growth portfolio. All fundamental factors play a role in the valuing of a company for investment, but the price-to-earnings ratio provides the most visible, universally applied metric. Our approach avoids absolute concentrations in individual industry sectors, attempting on an absolute basis to keep allocations to individual industries and economic sectors as low as possible. Some of the fundamental factors include revenue, cash flow, and earnings growth. Tributary Capital Management seeks to maximize long-term total return with appropriate diversification into market sectors to reduce risk. Our style of equity investing emphasizes growth companies in a broad range of industries and does not believe in sector speculation. Stocks are selected using a "bottom-up" process rather than relying entirely on information that Wall Street has developed. This fundamental research predominantly defines a universe of medium sized companies (approximately \$1 to \$15 billion in market cap) from which portfolios are constructed. Our approach takes into consideration intrinsic value, profitability, current valuation, and growth potential. Intrinsic value measures include cash flow, growth in revenue, and gains in market share among others. Active portfolio management, based on intensive, original research, can add value by limiting risk and increasing investment returns.

Mid Cap Value Model Portfolios-Benchmarked to the Russell Mid Cap Value Index

Ativo Capital Management / Ativo Mid

Ativo's goal is to recognize Mid Cap firms that earn significantly more than their cost of capital as it is these earnings that drive growth in shareholder value and stock price. Firms that don't earn their cost of capital destroy shareholder value. An accurate residual income model is key to implementing this approach. Our model incorporates discounted cash flow return on investment, cost of capital, and growth and life cycle theory. Each week Ativo converts 13,000 stocks GAAP financial statements to cash based statements. More than 50 adjustments are made in this process. Correction for pension liabilities, option values, and lease capitalizations are just a few. Cost of capital is calculated using a company's size, risk, industry, and other factors. Ativo is a Portuguese word that means both "active" and "assets" - together they illustrate their approach to the management of equity portfolios. Ativo develops portfolios based on a history of quantitative securities research covering nearly four decades that is the basis for a stable and consistent investment philosophy. They start with sound financial theory. Then this theory is applied to real-time experiments in actual markets to develop investment rules that transcend specific market conditions. Consistently applied, these rules pick the stocks for our portfolios. Ativo combine cutting-edge financial theory and clear objectives that are integrated into quantitative models that drive portfolio composition. The results are impressive and are consistent over time.

Cloud Neff / CNM Quant Value

The CN Quantitative value fund equally targets income generation and long term growth by screening stocks according to proprietary valuation measures. This "deep value portfolio" provides a very high dividend by purchasing equities in any industry, though holdings are often concentrated in energy, financial, utility, and real estate. The portfolio tends to have a low tracking correlation with its peer group and benchmark index, due to both its deep value approach and industry concentration. Typically, about 70 stocks are owned and turnover is approximately 70% per annum.

Egis Capital Management / Egis Mid Cap Value

Egis Mid Cap Value is managed to provide clients diversification primarily among U.S. mid capitalization companies oriented toward value. Many of their holdings come from financial and industrial sectors. Equities are selected

partially through a proprietary screening mechanism utilizing an augmented version of the Porter Five Forces Model. The Equis Proprietary Model explains how market structures determine the intensity of competition. We invest in firms that face less competition and thus have prospects for greater long-term profits. The Porter Five Forces Model considers five sources of competition: customers demanding lower prices, suppliers demanding higher prices, substitute products providing alternatives, direct competitors cutting prices and increasing quality, and potential entrants increasing direct competition. An additional consideration is technological innovation which influences the five forces. Equis places an emphasis on a long-term buy and hold approach. When selecting individual equities Equis also takes into consideration the industry in the interest of maintaining diversification to maximize risk adjusted returns.

Financial Trust Asset Management / ValueMomentum Leaders MCV

The Value Momentum Leaders Strategy invests in the top 50 stocks that comprise the Value Momentum index. The Value Momentum index rates stocks according to three factors: low Price/Sales ratio, 1-month relative strength, and 1-week relative strength. In addition, the stocks must have a price to sales ratio that is at least 10% less than the average price to sales of the S&P 500. Companies must also have current quarterly earnings that are higher than the same quarter in the previous year. The portfolio is equally weighed among the top 50 stocks. The portfolio is reweighed and rebalanced on a monthly basis. Quantitative research underlies the impressive performance of Financial Trust Asset Management.

Fraser Management Associates / Fraser Contrarian SMA

Fraser Management Associates applies a unique contrarian discipline to produce superior long-term investment results for institutions and private clients. Their unique headquarters in Burlington, Vermont is consistent with their independent thinking. Since their founding in 1969, investment management has been their sole focus and passion. The team has been tempered by sixty-eight years of combined investment management experience. Client value is created by identifying overlooked and under-appreciated trends. Human behavior, market psychology, global trends, and industry dynamics are studied to identify securities poised to profit. Some of the themes guiding current investments are long-term climate change, water scarcity, Hispanic migration, and consolidation within the financial services industry. After theme or trends are identified, the focus narrows to select the specific securities best positioned to capitalize on them. The top down methodology, from general trend to specific security, tends to concentrate the portfolio in a few sectors. Largely due to this concentration, the portfolio has a very low correlation with other money managers and the stock market indexes. The portfolio typically contains 30 to 35 value type stocks with a Median market capitalization of \$2 billion. Historically, turnover has been a low 25% annually, meaning on average securities are held about four years.

Retirement Wealth Advisors / Mid Cap Formula

RWA (Retirement Wealth Advisors) Mid Cap FormulaFolio is a quantitatively managed portfolio of individual equities and cash equivalents. RWA, Inc.'s proprietary step-by-step mechanical approach to selecting positions eliminates emotional trading and is designed to only select above average positions based on both fundamental and macro economic indicators. The portfolio is an individual equity portfolio that uses top-down fundamental analysis to choose only positions that currently and continuously rank highly using a quantitative model developed by RWA. In addition to the fundamental analysis, there is also a macro economic model used to determine the overall percentage of equities in the portfolio to minimize short-term risk and enhance long-term returns. Due to risk management processes contained within the quantitative models, the portfolio may not be fully invested at all times.

Mr. Wenk's firm, Retirement Wealth Advisors, Inc. is currently the #1 Ranked Private Asset Management firm in the State of Michigan and #8 in the United States by Money Manager Review*. The ranking; based on return, risk and risk adjusted return, is compared to industry giants such as Goldman Sachs, Alliance Bernstein, Oppenheimer Investments, Baird Asset Management, T. Rowe Price and a number of high profile West Michigan managers. Mr. Wenk has been featured in The Grand Rapids Press, numerous industry specific magazines and has been invited as guest speaker to area colleges. In addition, he has taught educational seminars to over 2,500 investors in West Michigan. In 2007 and 2008 Reuters listed Mr. Wenk as one of the United States' top 500 financial advisors (with only one other advisor from West Michigan on the list) and in 2008 was named by Reuters as one of the Top Advisors Under 40 as well as one of the Top Advisors with Retirement Focus. Retirement Wealth Advisors, Inc. is headquartered in West Michigan (offices in Grand Rapids and Spring Lake) and is an SEC Registered Investment Advisory Firm.

Small Cap Growth Model Portfolios-Benchmarked to the Russell 2000 Growth Index

Equis Capital Management / Equis Small Cap Growth

Equis Small Cap Growth is managed to provide clients diversification primarily among U.S. small capitalization companies oriented towards growth. Many of these stocks are in the technology, health-care, and services sectors. Because these businesses are fast-

growing and often richly valued, their stocks tend to be volatile, but often can provide for some of the most explosive returns. Equities are selected partially through a proprietary screening mechanism utilizing an augmented version of the Porter Five Forces Model. The Equis Proprietary Model explains how market structures determine the intensity of competition. We invest in firms that face less competition and thus have prospects for greater long-term profits. The Porter Five Forces Model considers five sources of competition: customers demanding lower prices, suppliers demanding higher prices, substitute products providing alternatives, direct competitors cutting prices and increasing quality, and potential entrants increasing direct competition. An additional consideration is technological innovation which influences the five forces. Equis places an emphasis on a long-term buy and hold approach. When selecting individual equities Equis also takes into consideration the industry in the interest of maintaining diversification to maximize risk adjusted returns.

Hanseatic Management Services, Inc. / Hanseatic SCG

Managers use a multi-time dimensional system that identifies small-cap stocks whose emergent price trends have better than normal probability of persisting into the 6-36 month target holding period with positive alpha. Lower time dimension patterns are then used to identify shorter term entry and exit points. Research has shown that time parameters in the relevant time dimensions, monthly and weekly in particular, also play an important role. It is the intersection of multi-time dimensional trend measurement and time boundaries that is the foundation of the buy-sell disciplines. The portfolio typically contains at least 100 stocks providing for diversification. Another interesting characteristic of the portfolio is its relatively low correlation with indexes in its asset class. Since 1991 Hanseatic has applied proprietary quantitative buy and sell disciplines to manage equity portfolios' returns, risk, and structure. Their buy disciplines provide a consistent stock selection process that is adaptable to varying market environments.

Laidlaw Group / Laidlaw Group SCG

The Laidlaw Group's, Small Cap Value portfolio focuses investments in companies with the following characteristics: high cash flow to market value ratio, high asset to debt ratio, profitability, and growth potential. Close attention is also paid to the sectors in which firms operate. The management may overweigh or underweigh sectors based on their analysis of economic trends. The Laidlaw Group is a family business founded by Robert Laidlaw and his son David. Robert, the current Chairman, is an industry veteran who began his career on the floor of the New York Stock Exchange in 1958 after graduating from Yale, with a degree in philosophy. His nearly 50 years of industry experience provide the foundation from which the Laidlaw Group excels.

LanderNorth Asset Management, LLC / LanderNorth Small Cap

LanderNorth Asset Management, LLC is a Registered Investment Advisor founded in 2003 and based in suburban Cleveland, Ohio. As an affiliated successor RIA, the principals of LanderNorth have been managing client assets since 1997. The firm provides asset management services to a variety of clients including trusts, foundations and endowments, Taft-Hartley plans, municipalities, and high-net-worth investors.

The firm was formed as a division of a private equity organization with invested assets in excess of \$400 million. LanderNorth utilizes its background in private equity to invest in small and micro cap public stocks using a proprietary discipline similar to that used in private equity investing. The principals of the firm have over seventy-five years of collective asset management experience and rely on a combination of external and internal research in the construction of client portfolios.

LanderNorth applies private equity-like due diligence to small public companies that are substantially overlooked and undervalued by institutional investors. The investment team employs a bottom-up fundamental approach to valuation and a proprietary screening methodology in tandem with external research in identifying the most attractive investment opportunities.

Understanding a company's core business is critical to the investment decision. LanderNorth puts a high level of focus on making both a qualitative and quantitative decision on companies prior to any investment. As in private equity investing, the portfolio team meets regularly with the senior management group of companies being considered for investment and uses additional external analytical resources to identify those companies with the greatest potential for growth. LanderNorth incorporates a GARP style of investing and will not override core valuation modeling in favor of momentum.

LanderNorth's process begins with a universe of 4,000 small cap companies with market cap between less than \$200 million and \$2 billion. Applying a series of proprietary screens, fundamental analysis is performed resulting in a focus list of 100 to 125 names, all of which are attractive relative to earnings and revenue growth, debt ratios, and return on equity.

Qualitative reviews are conducted by the team with a focus on the company's business and the quality of its management team. LanderNorth does not invest in startups or turnarounds; rather, only companies that are industry leaders with proven performance records are considered for investment. The result of this qualitative analysis is a short list of 50 to 70 names suitable for inclusion in the portfolio.

Finally, a proprietary valuation model is used to determine price targets based on a series of metrics. Companies are added to the portfolio only if the management team determines the current price to be attractive relative to these valuations. Valuations are not ignored in favor of sector diversification.

In order to control risks, LanderNorth adheres to a well-defined sell discipline. There is no hesitation to lock in gains as appropriate given certain valuation triggers. Changes in business fundamentals, industry, or company management can result in a sale based on the investment team's on-going due diligence.

Michael J. Finn, the President & Chief Investment Officer, founded LanderNorth Asset Management in 2003 with 30+ years' experience in Private Equity and Small Cap public investing. He is the former Director of Alternative Investment, State of Michigan Treasury and earned a B.S. and M.S. in Economics from Michigan State University.

Navellier / Global Small Cap

Navellier implements its investment philosophy through a combination of quantitative and fundamental analysis. The initial portfolio universe includes foreign listed equities and American Depositary Receipts (ADRs) with market capitalizations equal to or less than \$5 billion and domestic stocks with market capitalizations between \$200 million and \$2 billion. Stocks must have ample liquidity in both the domestic listed market and their home market. The process begins with a computer driven analysis based on Modern Portfolio Theory. The firm calculates reward (alpha) and risk (standard deviation) characteristics for the initial universe of stocks. Trailing 52-week "alphas" are divided by trailing 52-week "standard deviations" to create a "reward/risk" ratio for each stock. These stocks are then reviewed on a fundamental basis. The fundamentals reviewed and measured are based on Navellier's proprietary analysis of what is currently "in favor" on Wall Street and the Accounting and Governance Risk rating (AGR). Stocks are ranked on both the quantitative and fundamental analyses, and the final step is the portfolio construction process, which combines country allocation, weighting of stocks, and portfolio formation. Country allocation is determined by three factors: (1) the direction of interest rates relative to other economies; (2) the level of the average reward/risk ratio for all companies in a given country relative to other countries; and (3) the country's weight in the relevant index. The portfolio is adjusted monthly based on market conditions.

James O'Leary, CFA is the lead Portfolio Manager for the Navellier Asia, Navellier Europe, and Navellier Latin America, Global Small Cap, and Global Growth strategies. He joined Navellier in 1996 and has thirty-five years of experience in the securities industry. Prior to joining Navellier, Mr. O'Leary was Managing Director at Lexington Management Corporation and a Director at Federated Investment Counseling. His B.S. in business administration is from Bowling Green State University and his M.B.A. is from the University of Cincinnati.

Sawgrass Asset Management / Sawgrass SCG Best Ideas

Sawgrass Asset Management, L.L.C. is a 100 percent employee-owned, SEC-registered investment advisor. The firm provides innovative growth equity investment management services to institutional and high net worth investors. The firm was founded on January 15, 1998 in Jacksonville, Florida, by principals Andrew Cantor, Dean McQuiddy and Brian Monroe. The firm consists of a core group of key investment professionals who have worked together for more than 20 years. The core investment team of portfolio managers, equity traders, and client service professionals came to Sawgrass from Barnett Capital Advisors, Inc. and have been with the firm since its inception.

Small Cap Value Model Portfolios-Benchmarked to the Russell 2000 Value Index

Advisor Partners / Small Cap Value

The Advisor partners' U.S. Equity Small Cap Value Index Strategy mimics the returns of the small cap U.S. equity market as represented by the S&P Small Cap 600 Value index. The Strategy captures the index's risk characteristics and sector diversification using a managed portfolio of individual securities. The sectors with the greatest representations within the portfolio tend towards Financials, Industrials, Consumer Discretionary and Information Technology. Advisor Partners is an investment management firm specializing in providing customized, tax-managed, index-based investment solutions for advisors and their clients. The average industry tenure of the principals exceeds two decades and contributes to their depth of investment judgment and expertise.

Andrew Rudd, the Chairman, and Jim Blachman, the Chief Investment Officer are members of Advisor Partners' Investment Management Committee. Dr. Rudd, a finance industry veteran, holds a Ph.D. from UC Berkeley and co-founded BARRA Inc. Jim Blachman holds a master's degree in economics from UC Berkeley. His investment career spans 20 years. He is a CFA charterholder.

Ativo Capital Management / Ativo Small Dynamic Select SCV

Ativo's goal is to recognize Small Cap firms that earn significantly more than their cost of capital since it is these earnings that drive growth in shareholder value and stock price. Firms that don't earn their cost of capital destroy shareholder value. An accurate residual income model is key to implementing this approach. Our model incorporates discounted cash flow return on investment, cost of capital, and growth and life cycle theory. Each week Ativo converts 13,000 stocks GAAP financial statements to cash based statements. More than 50 adjustments are made in this process. Correction for pension liabilities, option values, and lease capitalizations are just a few. Cost of capital is calculated using a company's size, risk, industry, and other factors. Ativo is a Portuguese word that means both "active" and "assets" - together they illustrate their approach to the management of equity portfolios. Ativo develops portfolios based on a history of quantitative securities research covering nearly

four decades that is the basis for a stable and consistent investment philosophy. They start with sound financial theory. Then this theory is applied to real-time experiments in actual markets to develop investment rules that transcend specific market conditions. Consistently applied, these rules pick the stocks for our portfolios. Ativo combine cutting-edge financial theory and clear objectives that are integrated into quantitative models that drive portfolio composition. The results are impressive and are consistent over time.

Bird Rock Asset Management, LP / BirdRock Small Cap Value

BirdRock Asset Management is a value-oriented, independent registered investment advisor. As a fee-only firm, our interests are closely aligned with those of our clients. We begin with the premise that trust, integrity and objective financial advice are the hallmarks of a successful financial relationship. Our mission is to help our clients achieve their goals through vigilant financial research, disciplined planning and continuous review. Our portfolio management team has combined investment experience of over 22 years, and an outstanding performance track record.

Our investment philosophy for the BirdRock Small Cap Value portfolio is based on the theory that value investing (buying companies trading at what we believe to be a discount to their future value) provides investors with long-term rewards as well as risk mitigation during times of market turbulence. While we believe that the market is fairly efficient at discounting current information, this is not always the case, especially with regard to smaller market cap securities. To exploit these inefficiencies and add value through active management, we believe one must take a contrarian approach to information that may be interpreted differently and perhaps incorrectly by other interested parties.

As we begin our search for the underappreciated, misunderstood, or simply overlooked securities, our approach is to dig deep by using quantitative, qualitative, and empirical data to help us add alpha for our clients. The essence of BirdRock Asset Management's value investment style is to buy stocks at less than their intrinsic value. Our extensive research process evaluates a company's intrinsic value through cash flow and book value comparison, financial statements, financial health, competitive advantages, management, and market competition.

Steve Levy is the lead portfolio manager for the BirdRock Small Cap Value and serves as President of BirdRock Asset Management. He is responsible for overseeing the Small Cap Value and Large Cap Value portfolios and is a member of the Investment Committee. Mr. Levy began his career as a reinsurance analyst with The JI Companies in Austin, Texas before joining Janus Capital in 1999. He served on the Investment Committee of Slaughter & Associates for five years and has managed the Small Cap Value portfolio since its inception in January of 2004.

Mr. Levy has an undergraduate degree in Political Science and Spanish with an emphasis in International Relations from San Diego State University, and studied emerging markets, economics and U.S. Foreign Policy in Latin America at the Universidad Colegio Anahuac in Guadalajara, Mexico in 1986-87. Mr. Levy holds an Accredited Wealth Management Advisor (AWMA) designation from the College for Financial Planning.

Eqis Capital Management / Eqis Small Cap Value

Eqis Small Cap Value is managed to provide clients diversification primarily among U.S. small capitalization companies oriented toward value. Investments tend towards the manufacturing and financial sectors. Equities are selected partially through a proprietary screening mechanism utilizing an augmented version of the Porter Five Forces Model. The Eqis Proprietary Model explains how market structures determine the intensity of competition. We invest in firms that face less competition and thus have prospects for greater long term profits. The Porter Five Forces Model considers five sources of competition: customers demanding lower prices, suppliers demanding higher prices, substitute products providing alternatives, direct competitors cutting prices and increasing quality, and potential entrants increasing direct competition. An additional consideration is technological innovation which influences the five forces. Eqis places an emphasis on a long-term buy and hold approach. When selecting individual equities Eqis also takes into consideration the industry in the interest of maintaining diversification to maximize risk adjusted returns.

Texas First Investment Management Company / Texas First SCV

Texas First Investment Management Company has provided significant equity returns with relatively low risk by combining a long term, conservative, and value-oriented approach with an unparalleled expertise acquired by investing solely in Texas-based publicly-held companies. The stock selection criteria include, but are not limited to, value measures of sustainable earnings, sustainable cash flow, and adjusted book value. Potential catalysts to unleash value are also critical considerations. Holdings are carefully diversified among industries. The Small Cap Value portfolio ranked among the top ten in the country over the 5 year period 2001 – 2005. It has outperformed the Russell 2000 small-cap index for six of the previous seven years, with below-average risk.

Eqis Utilities Model Portfolio- Benchmarked to the Dow Jones USA (US) (Dev) Utilities (7000) Broad US dollar Index

Eqis Capital Management/ Eqis Utilities Model Portfolio

Eqis Utilities is managed to provide clients diversification primarily among US utilities stocks of all

capitalizations. Utility stocks are usually some combination of U.S. power, telecommunications, and water companies. These stocks usually represent a more stable investment with less emphasis placed on growth and more on dividends. Equities are selected partially through a proprietary screening mechanism utilizing an augmented version of the Porter Five Forces Model. The Equis proprietary Model explains how market structures determine the intensity of competition. We invest in firms that face less competition and thus have prospects for greater long term profits. The Porter Five Forces Model considers five sources of competition: customers demanding lower prices, suppliers demanding higher prices, substitute products providing alternatives, direct competitors cutting prices and increasing quality, and potential entrants increasing direct competition. An additional consideration is technological innovation which influences the five forces. Equis places an emphasis on a long term buy and hold approach. When selecting individual equities Equis also takes into consideration the industry in the interest of maintaining diversification to maximize risk adjusted returns.

Asian Model Portfolio-Benchmarked to the Dow Asia Pacific (P1) Aggregate Index Broad US Dollar Index

Equis Capital Management / Equis Asia

Equis Asia is managed to provide clients diversification primarily among Asian stocks of all capitalizations through investing in ADR's. Equities are selected partially through a proprietary screening mechanism utilizing an augmented version of the Porter Five Forces Model. The Equis Proprietary Model explains how market structures determine the intensity of competition. We invest in firms that face less competition and thus have prospects for greater long-term profits. The Porter Five Forces Model considers five sources of competition: customers demanding lower prices, suppliers demanding higher prices, substitute products providing alternatives, direct competitors cutting prices and increasing quality, and potential entrants increasing direct competition. An additional consideration is technological innovation which influences the five forces. Equis places an emphasis on a long-term buy and hold approach. When selecting individual equities Equis also takes into consideration the industry in the interest of maintaining diversification to maximize risk adjusted returns.

Financial Trust Asset Management / Asia ValueMomentum

The Asia Value Momentum Strategy invests in the top 20 stocks that comprise the Asia Value Momentum index. The Asia Value Momentum index rates stocks according to three factors: low Price/Sales ratio, 1-month relative strength, and 1-week relative strength. The Asia Value Momentum strategy invests only in ADR's (American Depositary Receipts) of Asian companies that trade on U.S. exchanges. Companies must also have current quarterly earnings which are higher than the same quarter in the previous year. The portfolio is equally weighed among the top 20 stocks. The portfolio is rebalanced on a monthly basis. Returns displayed are based on a backtest of this methodology and are hypothetical. No assets were actually invested using this methodology during the backtest period.

Hanseatic Management Services, Inc / Hanseatic Asia

Managers use a multi-time dimensional system designed to identify domestically traded Asian stocks whose emergent price trends have better than normal probability of persisting into the 6-36 month target holding period with positive alpha. Lower time dimension patterns are then used to identify shorter term entry and exit points. Research has shown that time parameters in the relevant time dimensions, monthly and weekly in particular, also play an important role. It is the intersection of multi-time dimensional trend measurement and time boundaries that is the foundation of the buy-sell disciplines. Initial position size in the portfolio is 2-3% of capital. The manager's objective is to maintain a portfolio structure that provides good diversification relative to the available universe of liquidity-screened stocks. Since 1991 Hanseatic has applied proprietary quantitative buy and sell disciplines to manage equity portfolios' returns, risk, and structure. Their buy disciplines provide a consistent stock selection process that is adaptable to varying market environments.

Ed Meihaus, (BSME, University of Louisville; MBA, University of Memphis), joined Hanseatic in 1985. Since then, he has continued to develop quantitative model-based investment applications, primarily the set of disciplines which underlie the company's equity portfolios. He currently serves as the Chief Investment Officer.

Navellier / Navellier Asia

Navellier implements its investment philosophy through a combination of quantitative and fundamental analysis. The initial portfolio universe includes Asian foreign listed equities and American Depositary Receipts (ADRs) with market capitalizations equal to or greater than \$500 million. Stocks must have ample liquidity in both the listed market and their home market.

The process begins with a computer driven analysis based on Modern Portfolio Theory. The firm calculates reward (alpha) and risk (standard deviation) characteristics for the initial universe of stocks. Trailing 52-week "alphas" are divided by trailing 52-week "standard deviations" to create a "reward/risk" ratio for each stock. These stocks are then reviewed on a fundamental basis. The fundamentals reviewed and measured are based on Navellier's proprietary analysis of what is currently "in favor" on Wall Street and the Accounting and Governance Risk rating (AGR).

Stocks are ranked on both the quantitative and fundamental analyses, and the final step is the portfolio construction process, which combines country allocation, weighting of stocks, and portfolio formation. Country allocation is determined by three factors (1) the direction of interest rates relative to other economies (2) the level of the average reward/risk ratio for all companies in a given country relative to other countries (3) the country's weight in the relevant index. The portfolio is adjusted to reflect changes on a monthly basis.

Mr. O'Leary CFA is the lead Portfolio Manager for the Navellier Asia, Navellier Europe, and Navellier Latin America strategies. He joined Navellier in 1996 and has thirty-four years of experience in the securities industry. Prior to joining Navellier, Mr. O'Leary was Managing Director at Lexington Management Corporation and a Director at Federated Investment Counseling. His B.S. in business administration is from Bowling Green State University and his M.B.A. is from the University of Cincinnati.

Mr. Mitteldorf, Portfolio Manager, joined Navellier in 1995 and has thirteen years of experience in the securities industry. After becoming an essential member of several investment teams, Navellier promoted him to Research Analyst and then Portfolio Manager. Mr. Mitteldorf received a B.S. in physiological psychology from the University of California, Santa Barbara and an M.B.A. in finance and marketing from the University of Nevada, Reno.

Navellier / Navellier Asia Ex-Japan

Navellier implements its investment philosophy through a combination of quantitative and fundamental analysis. The initial portfolio universe includes Asian Ex-Japan foreign listed equities and American Depositary Receipts (ADRs) with market capitalizations equal to or greater than \$500 million. Stocks must have ample liquidity in both the listed market and their home market. The process begins with a computer driven analysis based on Modern Portfolio Theory. The firm calculates reward (alpha) and risk (standard deviation) characteristics for the initial universe of stocks. Trailing 52-week "alphas" are divided by trailing 52-week "standard deviations" to create a "reward/risk" ratio for each stock. These stocks are then reviewed on a fundamental basis. The fundamentals reviewed and measured are based on Navellier's proprietary analysis of what is currently "in favor" on Wall Street and the Accounting and Governance Risk rating (AGR). European Model Portfolio- Benchmarked to the Dow Jones Western Europe (E1) Aggregate Index Broad US dollar Index.

Egis Capital Management / Egis Europe

Egis Europe is managed to provide clients diversification primarily among European stocks of all capitalizations through investing in ADR's. Equities are selected partially through a proprietary screening mechanism utilizing an augmented version of the Porter Five Forces Model. The Egis Proprietary Model explains how market structures determine the intensity of competition. We invest in firms that face less competition and thus have prospects for greater long-term profits. The Porter Five Forces Model considers five sources of competition: customers demanding lower prices, suppliers demanding higher prices, substitute products providing alternatives, direct competitors cutting prices and increasing quality, and potential entrants increasing direct competition. An additional consideration is technological innovation which influences the five forces. Egis places an emphasis on a long-term buy and hold approach. When selecting individual equities, Egis also takes into consideration the industry in the interest of maintaining diversification to maximize risk adjusted returns.

Financial Trust Asset Management / Europe ValueMomentum

The Europe Value Momentum Strategy invests in the top 20 stocks that comprise the Europe Value Momentum index. The Europe Value Momentum index rates stocks according to three factors: low Price/Sales ratio, 1-month relative strength, and 1-week relative strength. The Europe Value Momentum strategy invests only in ADR's (American Depositary Receipts) of European companies that trade on U.S. exchanges. Companies must also have current quarterly earnings which are higher than the same quarter in the previous year. The portfolio is equally weighed among the top 20 stocks. The portfolio is rebalanced on a monthly basis. Returns displayed are based on a backtest of this methodology and are hypothetical. No assets were actually invested using this methodology during the backtest period.

Hanseatic Management Services, Inc / Hanseatic Europe

Managers use a multi-time dimensional system designed to identify domestically traded European stocks whose emergent price trends have better than normal probability of persisting into the 6-36 month target holding period with positive alpha. Lower time dimension patterns are then used to identify shorter term entry and exit points. Research has shown that time parameters in the relevant time dimensions, monthly and weekly in particular, also play an important role. It is the intersection of multi-time dimensional trend measurement and time boundaries that is the foundation of the buy-sell disciplines. Initial position size in the portfolio is 2-3% of capital. The manager's objective is to maintain a portfolio structure that provides good diversification relative to the available universe of liquidity-screened stocks. Since 1991 Hanseatic has applied proprietary quantitative buy and sell disciplines to manage equity portfolios' returns, risk, and structure. Their buy disciplines provide a consistent stock selection process that is adaptable to varying market environments.

Ed Meihaus, (BSME, University of Louisville; MBA, University of Memphis), joined Hanseatic in 1985. Since then, he has continued to develop quantitative model-based investment applications, primarily the set of disciplines which underlie the company's equity portfolios. He currently serves as the Chief Investment Officer.

Navellier / Navellier Europe

Navellier implements its investment philosophy through a combination of quantitative and fundamental analysis. The initial portfolio universe includes European foreign listed equities and American Depositary Receipts (ADRs) with market capitalizations equal to or greater than \$500 million. Stocks must have ample liquidity in both the listed market and their home market.

The process begins with a computer driven analysis based on Modern Portfolio Theory. The firm calculates reward (alpha) and risk (standard deviation) characteristics for the initial universe of stocks. Trailing 52-week "alphas" are divided by trailing 52-week "standard deviations" to create a "reward/risk" ratio for each stock. These stocks are then reviewed on a fundamental basis. Alternative Strategies (Alt. Strat) Model Portfolios –

Inflation Fighters:

iSectors / iSectors® Inflation Protection Allocation

iSectors® Inflation Protection Allocation: With a diversified core strategic portfolio of commodities, precious metals, inflation-protected bonds, and other investments that historically have been resistant to inflationary pressures, the iSectors® Inflation Protection Allocation offers investors a tool with which to prepare their portfolios for the possibility of inflation.

iSectors believes that the empirical evidence strongly suggests that asset allocation is the predominant factor behind the returns of any investment approach. As such, many of the iSectors models are Strategic in nature, utilizing an indexing approach within the asset allocation models. Vehicles utilized to execute the allocation process within the models are primarily low-cost, primarily index-based ETFs.

Management of iSectors Asset Allocation strategies is overseen by an investment committee of four professionals, each with significant investment, business and accounting experience along and multiple professional designations, including Prateek Mehrotra, MBA, CFA, CAIA as their Chief Investment Officer and Timothy J. Landolt, MBA as their Strategies Manager. Mr. Mehrotra holds a MBA in Finance from Lehigh University and Mr. Landolt holds a MBA from Loyola Marymount University.

Strategic:

iSectors / iSectors® Domestic 60-40 Allocation

iSectors® Domestic models are strategic asset allocation models that employ a Modern Portfolio Theory (MPT) - based approach to asset allocation. The equity portion of the models is allocated using a diversified basket of domestic, low-cost, equity index-based ETFs. The fixed income portion of the allocations is invested in diversified, low-cost ETFs that hold baskets of investment-grade domestic, government and corporate bonds of various maturities. The models, with respect to their use of ETFs and an annual rebalance process, are designed to be tax-sensitive. Moderate asset allocation strategy consists of approximately 60% domestic (U.S.-only) equities and 40% domestic fixed-income securities.

iSectors believes that the empirical evidence strongly suggests that asset allocation is the predominant factor behind the returns of any investment approach. As such, many of the iSectors models are Strategic in nature, utilizing an indexing approach within the asset allocation models. Vehicles utilized to execute the allocation process within the models are primarily low-cost, primarily index-based ETFs.

iSectors / iSectors® Institutional 40-60 Allocation

iSectors® Institutional models employ a Modern Portfolio Theory (MPT)-based approach, with a review of Resampling, Black Litterman and Monte Carlo Simulation to optimally allocate the model portfolios. The equity portion of the models is allocated across a number of domestic, international and emerging markets index-based exchange traded funds. Fundamentally-weighted index ETFs are included in the model in an effort to enhance return and reduce volatility. The fixed income portion of each model is invested in diversified, low-cost ETFs that hold baskets of domestic, international and emerging market government and corporate bonds of various maturities. The models, with respect to their use of ETFs and an annual rebalance process, are designed to be tax-sensitive. Conservative Moderate allocation strategy is intended to consist of approximately 40% equity and 60% fixed-income investments.

iSectors believes that the empirical evidence strongly suggests that asset allocation is the predominant factor behind the returns of any investment approach. As such, many of the iSectors models are Strategic in nature, utilizing an indexing approach within the asset allocation models. iSectors / iSectors® Endowment 20-80 Allocation

iSectors Endowment models embrace the philosophy pursued by the managers of Endowment portfolios at institutions like Yale and Harvard, which have been aggressively allocating to "alternative investments" such as hedge funds, private equity and real assets for decades. Not only has this enabled their longer-term performance to be superior to their peer group, but also at a reduced risk level. While iSectors Endowment models are not designed to mirror the Yale asset allocation to the fullest extent, but significant allocations are made to "alternative

investments" in each model of the Endowment Series. iSectors Endowment models offer investors substantial diversification to more than 50, primarily index-based securities, a significant allocation to liquid alternative asset classes, as well as traditional domestic and international equity and fixed income asset classes. Conservative allocation strategy is designed with the objective of achieving returns in excess of a simple 20-80 Equity/Fixed Income portfolio (as measured by a composite portfolio of 20% S&P 500 Index and 80% Barclays Aggregate Bond Index) over a complete market cycle, while maintaining a similar or better risk profile. This comprehensive, strategic model is enhanced by diversification into alternative asset classes and is intended to be utilized as long-term core holding.

iSectors believes that the empirical evidence strongly suggests that asset allocation is the predominant factor behind the returns of any investment approach. As such, many of the iSectors models are Strategic in nature, utilizing an indexing approach within the asset allocation models. Vehicles utilized to execute the allocation process within the models are primarily low-cost, primarily index-based ETFs.

iSectors / iSectors® Post-MPT Growth Allocation

iSectors® Post-MPT Allocations utilize advancements in Modern Portfolio Theory (MPT) to allocate the portfolio among up to 9 unique, uncorrelated asset classes. In addition, iSectors also utilizes advanced, more pragmatic approaches for applying these principles of MPT. The objective of the iSectors® Post-MPT Growth Allocation is to achieve investment returns that outperform the S&P500 stock market index with lower downside risk over a complete market cycle. The portfolio manager objectively allocates and rebalances the portfolio among up to 9 specific, low-correlated asset classes. The mathematical process is guided by a series of economic and capital market factors. Portfolios may be invested up to 30% at any one time into any single asset class, with the exception of government bonds, to which the model may allocate up to 50%. The iSectors Post-MPT Growth Allocation may utilize leveraged ETFs up to a maximum of 33%. However, because iSectors does not use borrowed money in its strategy, the service is available for retirement and non-profit accounts.

iSectors believes that the empirical evidence strongly suggests that asset allocation is the predominant factor behind the returns of any investment approach. As such, many of the iSectors models are Strategic in nature, utilizing an indexing approach within the asset allocation models. Vehicles utilized to execute the allocation process within the models are primarily low-cost, primarily index-based ETFs.

Management of iSectors Asset Allocation strategies is overseen by an investment committee of four professionals, each with significant investment, business and accounting experience along and multiple professional designations, including Prateek Mehrotra, MBA, CFA, CAIA as their Chief Investment Officer and Timothy J. Landolt, MBA as their Strategies Manager. Mr. Mehrotra holds a MBA in Finance from Lehigh University and Mr. Landolt holds a MBA from Loyola Marymount University.

iSectors / iSectors® Post-MPT Moderate Allocation

iSectors® Post-MPT Allocations utilize advancements in Modern Portfolio Theory (MPT) to allocate the portfolio among up to 9 unique, uncorrelated asset classes. In addition, iSectors also utilizes advanced, more pragmatic approaches for applying these principles of MPT. The objective of the iSectors® Post-MPT Moderate Allocation is to achieve investment returns that outperform a 60/40 stock/bond index (as measured by the S&P500 stock market index + Lehman Aggregate Bond Index) with lower downside risk over a complete market cycle. The portfolio manager objectively allocates and rebalances the portfolio among up to 9 specific, low-correlated asset classes. The mathematical process is guided by a series of economic and capital market factors. Portfolios may be invested up to 30% at any one time into any single asset class, with the exception of government bonds, to which the model may allocate up to 50%. The iSectors® Post-MPT Moderate Allocation does not use borrowed money in its strategy and remains 100% invested at all times.

iSectors believes that the empirical evidence strongly suggests that asset allocation is the predominant factor behind the returns of any investment approach. As such, many of the iSectors models are Strategic in nature, utilizing an indexing approach within the asset allocation models. Vehicles utilized to execute the allocation process within the models are primarily low-cost, primarily index-based ETFs.

Management of iSectors Asset Allocation strategies is overseen by an investment committee of four professionals, each with significant investment, business and accounting experience along and multiple professional designations, including Prateek Mehrotra, MBA, CFA, CAIA as their Chief Investment Officer and Timothy J. Landolt, MBA as their Strategies Manager. Mr. Mehrotra holds a MBA in Finance from Lehigh University and Mr. Landolt holds a MBA from Loyola Marymount University.

Tactical:

Avatar Associates, LLC / Avatar Aggressive Portfolio

Avatar Associates is an independent asset allocator, specializing in risk reduction investment strategies. Since 1970, institutional and private clients have entrusted Avatar with their assets to help them participate in market advances and protect them against market losses.

The Avatar Aggressive Portfolio (the "Portfolio") seeks to provide capital appreciation with no expectations for current income. The Portfolio is an all-equity portfolio and is designed for investors with a long amount of time until retirement and/or a high tolerance for risk. With no fixed income exposure, this portfolio is expected to be the most aggressive implementation of the eight Portfolios currently managed by Avatar. The Fund seeks to outperform its designated benchmark by raising and lowering asset class exposures, industry sector exposures, and international country exposures to anticipate relative price movements. The total weighting of indirect stock holdings in ETFs consist of a larger percentage of large-capitalization U.S. stocks and some mid- and small-capitalization U.S. stocks. This Fund also has the largest exposure to international stocks in the Avatar Portfolio Series. The Portfolio may invest in cash, cash equivalents or various short-term money market instruments.

Portfolio Benchmark: 80% S&P 500 and 20% MSCI EAFE

As Chairman and Chief Investment Officer, Ted Theodore manages the firm's asset allocation models. Previously, Mr. Theodore served as Strategist/Portfolio Manager at Morgan Stanley Asset Management, and as Director of Equity Strategy at Citibank, N.A. Mr. Theodore earned his M.B.A. in Finance and B.A. in Economics from the University of Michigan.

Larry Seibert is Vice Chairman and Head of Security Selection. Previously, he has served at Goldman Sachs and KPMG Peat Marwick. Larry received his B.A. in Economics from Columbia University, and an M.B.A. in Finance from New York University.

Avatar Associates, LLC / Avatar Capital Preservation Portfolio

Avatar Associates is an independent asset allocator, specializing in risk reduction investment strategies. Since 1970, institutional and private clients have entrusted Avatar with their assets to help them participate in market advances and protect them against market losses.

The Avatar Capital Preservation Portfolio (the "Portfolio") seeks to provide current income with limited capital appreciation and is designed for investors with a short amount of time until retirement and/or a low tolerance for

risk. This portfolio is the most conservative implementation of the seven portfolios currently managed by Avatar. The Portfolio seeks to outperform its designated benchmark by raising and lowering asset class exposures, industry sector exposures, and international country exposures in anticipation of relative price movements. To this end, the Portfolio utilizes equity ETFs, international ETFs and fixed income ETFs to adjust exposures where appropriate. Small portions of U.S. and international equities are used. The majority of the portfolio is invested in U.S. Treasury and corporate bond ETFs. Cash, cash equivalents or various short-term money market instruments may also be used.

Portfolio Benchmark: 15% S&P 500, 5% MSCI EAFE, and 80% BarCap Aggregate Bond

As Chairman and Chief Investment Officer, Ted Theodore manages the firm's asset allocation models. Previously, Mr. Theodore served as Strategist/Portfolio Manager at Morgan Stanley Asset Management, and as Director of Equity Strategy at Citibank, N.A. Mr. Theodore earned his M.B.A. in Finance and B.A. in Economics from the University of Michigan.

Larry Seibert is Vice Chairman and Head of Security Selection. Previously, he has served at Goldman Sachs and KPMG Peat Marwick. Larry received his B.A. in Economics from Columbia University, and an M.B.A. in Finance from New York University.

Avatar Associates, LLC / Avatar Conservative Portfolio

Avatar Associates is an independent asset allocator, specializing in risk reduction investment strategies. Since 1970, institutional and private clients have entrusted Avatar with their assets to help them participate in market advances and protect them against market losses.

The Avatar Conservative Portfolio (the "Portfolio") seeks to provide current income with capital appreciation and is designed for investors with a reasonably short amount of time until retirement and/or a relatively low tolerance for risk. The Portfolio seeks to outperform its designated benchmark by raising and lowering asset class exposures, industry sector exposures, and international country exposures in anticipation of relative price movements. The total weighting of indirect stock holdings in ETFs consist of a moderate percentage of large-capitalization U.S. stocks and small allocation to mid- and small-capitalization U.S. stocks. This Portfolio also has a small exposure to international stocks. The larger weighting of indirect bond holdings in ETFs are a diversified mix of intermediate- and long-term investment grade, taxable U.S. government, U.S. agency and corporate bonds. The Portfolio may invest in cash, cash equivalents or various short-term money market instruments.

Portfolio Benchmark: 35% S&P 500, 5% MSCI EAFE, and 60% BarCap Aggregate Bond

Avatar Associates, LLC / Avatar Fixed Income Plus Portfolio

Avatar Associates is an independent asset allocator, specializing in risk reduction investment strategies. Since 1970, institutional and private clients have entrusted Avatar with their assets to help them participate in market advances and protect them against market losses.

The Avatar Fixed Income Plus Portfolio (the "Portfolio") seeks to provide a modest positive return over time through active fixed income and inflationary asset class management. The strategy has a focus on protection of capital. The model is a tactically managed all-ETF strategy that is unconstrained in its ability to utilize non-fixed income ETFs to help protect against inflation. The Portfolio is designed for investors with a short amount of time until retirement and/or a low tolerance for risk. The Portfolio seeks to outperform its designated benchmark by raising and lowering asset class exposures, credit exposures, duration, and industry sector exposures to anticipate relative price movements. Cash, cash equivalents or various short-term money market instruments may also be used.

Portfolio Benchmark: 100% BarCap Aggregate Bond

As Chairman and Chief Investment Officer, Ted Theodore manages the firm's asset allocation models. Previously, Mr. Theodore served as Strategist/Portfolio Manager at Morgan Stanley Asset Management, and as Director of Equity Strategy at Citibank, N.A. Mr. Theodore earned his M.B.A. in Finance and B.A. in Economics from the University of Michigan.

Day Hagan Asset Management / Day Hagan Asset Management

Day Hagan Asset Management developed mathematical models conjunction with Ned Davis Research. The models quantitatively evaluate business conditions, fundamentals, price-trends, sentiment, economic trends, and valuation to identify when a confluence of evidence indicate opportunity. ETF portfolios are updated monthly to include the most attractive asset classes. Advantages of following a model based approach include the flexibility to respond to market opportunities while controlling the irrationality and temptations imposed by human emotions.

Day Hagan Asset Management's philosophy of investing is founded upon the following tenets: make decisions based on an objective and model-based framework, utilize only time-tested and robust financial market indicators, allocate based on a "weight-of-the-evidence" approach, stay on the right side of major trends using trend-following indicators, and remain disciplined and un-emotional at all times.

Don Hagan, CFA, began his career in 1988 at Ned Davis Research and rose to Chief Sector Analyst where he developed decision-based asset allocation and individual stock and sector buy/sell programs at the institutional level for over 20 years. He was Director of Research and Lead Portfolio Manager for SCI Capital Management's SCI Traditional Value Equity, Blue Chip Bellwether Growth, Industry Select and Tactical Balanced investment strategies. After acquisition of SCI by Wells Fargo, Don was Senior Vice-President and Senior Portfolio Manager for Wells Fargo Bank's Private Client Services and concurrently served on Wells Fargo's National Asset Allocation Committee and National Investment Policy Committees. He has been quoted in several financial publications including the Wall Street Journal (for the first time in April, 1993), Barron's, Atlanta Constitution, and USA Today and is a frequent speaker at conferences and on radio. Don has a B.A. and CFA and is a member of the Association for Investment Management Research and the Investment Management Consultants Association.

Emerald Allocation Strategies / Emerald Concentrated Equity Discipline

All of our strategies have specific risk-control measures within them, in addition to the general risk reduction achieved by a diversified portfolio. Our firm's style and accomplishments have been highlighted in many national media outlets including Bloomberg, The Wall Street Transcript, Investment News, Registered Rep and Wealth Manager Magazine. We have presented our expertise and views at various industry conferences, and our Chief Investment Officer has been recognized as one of Worth Magazine's "Top 100 US Wealth Advisors" from 2005 – 2007 and one of Worth Magazine's "Top 250 US Wealth Advisors" in 2008.

Concentrated Equity seeks to generate investment "alpha" (excess return versus stock market benchmarks) through the purchase of a carefully selected group of equity mutual funds, whose managers each confine their portfolios to a very limited number of holdings (typically under 30 stocks) and generate those returns using distinctly different methods. The combination of these funds seeks to combat the tendency for traditional "style-box" equity approaches (investing by growth vs. value, large cap vs. small cap) that often produce mediocre or negative levels of alpha over longer periods of time. We may also buy dedicated short funds as a portfolio hedge in

perceived periods of high market risk.

Mr. Isbitts co-founded Emerald in 1998, chairs the firm's Investment Committee, and is the creator of Emerald's proprietary investment approach. He is a 20+ year veteran of the investment business, holding portfolio management positions at firms such as Fuji Bank & Trust, Morgan Stanley and DLJ. Mr. Isbitts has published over 100 investment articles and commentaries in publications including Wealth Manager, Registered Rep, Financial Planning, and Investment News. In 2006, he published "Wall Street's Bull and How to Bear It." Education includes an undergraduate degree from the State University of New York at Albany, an MBA in Finance is from Rutgers University.

Emerald Allocation Strategies / Emerald Global Cycle Discipline:

All of our strategies have specific risk-control measures within them, in addition to the general risk reduction achieved by a diversified portfolio. Our firm's style and accomplishments have been highlighted in many national media outlets including Bloomberg, The Wall Street Transcript, Investment News, Registered Rep and Wealth Manager Magazine. We have presented our expertise and views at various industry conferences, and our Chief Investment Officer has been recognized as one of Worth Magazine's "Top 100 US Wealth Advisors" from 2005 – 2007 and one of Worth Magazine's "Top 250 US Wealth Advisors" in 2008.

Global Cycle is a true long-term approach to growing capital. It involves the research and identification of global investment themes that are in the midst of a long, positive business cycle. (e.g. – alternative energy, potable water, India equity, China equity, etc). Some of these themes may take place, in our opinion, over many years, even decades. Others may start and finish in periods as short as three years. This is a long-term strategy, and often involves investing in areas of the markets that exhibit high short-term volatility in their returns. Patience is required to be successful. We may also buy dedicated short funds as a portfolio hedge in perceived periods of high market risk or as a way to capture alpha in a certain sector that we feel may be in decline.

Mr. Isbitts co-founded Emerald in 1998, chairs the firm's Investment Committee, and is the creator of Emerald's proprietary investment approach. He is a 20+ year veteran of the investment business, holding portfolio management positions at firms such as Fuji Bank & Trust, Morgan Stanley and DLJ. Mr. Isbitts has published over 100 investment articles and commentaries in publications including Wealth Manager, Registered Rep, Financial Planning, and Investment News. In 2006, he published "Wall Street's Bull and How to Bear It." Education includes an undergraduate degree from the State University of New York at Albany, an MBA in Finance is from Rutgers University.

Emerald Allocation Strategies / Emerald Hybrid Discipline:

All of our strategies have specific risk-control measures within them, in addition to the general risk reduction achieved by a diversified portfolio. Our firm's style and accomplishments have been highlighted in many national media outlets including Bloomberg, The Wall Street Transcript, Investment News, Registered Rep and Wealth Manager Magazine. We have presented our expertise and views at various industry conferences, and our Chief Investment Officer has been recognized as one of Worth Magazine's "Top 100 US Wealth Advisors" from 2005 – 2007 and one of Worth Magazine's "Top 250 US Wealth Advisors" in 2008.

Hybrid's objective is to achieve real, absolute returns (positive net of inflation) over any three-year period, regardless of market conditions, without resorting to the use of high-quality bond funds (which, despite their reputation as conservative investments, can produce large losses in periods of rising interest rates and inflation). Our Hybrid holdings typically come from the 11 sub-sectors/styles we have defined in the alternative mutual fund universe through our own research (such as equity long-short, market-neutral, arbitrage, commodities, high-yield and bond hedge). As a result, Hybrid investing is similar to the approach employed by low volatility hedge fund-of-funds managers but without all the unfavorable characteristics of hedge funds, such as lock-up periods, illiquidity, lack of transparency, excessive leverage, high fees, high investment minimums, and tax inefficiency.

Mr. Isbitts co-founded Emerald in 1998, chairs the firm's Investment Committee, and is the creator of Emerald's proprietary investment approach. He is a 20+ year veteran of the investment business, holding portfolio management positions at firms such as Fuji Bank & Trust, Morgan Stanley and DLJ. Mr. Isbitts has published over 100 investment articles and commentaries in publications including Wealth Manager, Registered Rep, Financial Planning, and Investment News. In 2006, he published "Wall Street's Bull and How to Bear It." Education includes an undergraduate degree from the State University of New York at Albany, an MBA in Finance is from Rutgers University.

Horizon Investments, LLC / Horizon Investments Balanced Portfolio

Horizon follows a 6 step process in developing asset allocations for Equis Clients.

- (1) Compute Style Indices, meaning the categories under which assets are categorized; such as, very large value, mid growth, and international.
- (2) Compute Fundamental Factor Overweight Score using a regression analysis involving eighty different financial ratios to calculate the expected return for the indexes in each asset category.
- (3) Compute Market Sentiment Factor Overweight Score to determine which asset categories should be overweighted or under-weighted.
- (4) Compute the Base Portfolio using the "Returns Based Attribution" technique.
- (5) Set Portfolio Allocations for the four risk profiles that vary according to the percentage of equity typically in the

portfolio.. (6) Choose specific investments using a Linear Optimizer to solve for the combinations of investments (typically ETFs and mutual funds) that provide the best match to the desired asset allocation. The balanced portfolio seeks the potential for growth with equity investments that have historically delivered higher, but more variable, long term returns. The strategy also seeks to balance the variability of stock market investments with investments in less volatile assets, such as core fixed income securities.

Dr. Jeffrey Roach is Chairman of the Investment Committee and the Chief Economist of Horizon Investments. Prior to joining Horizon Investments LLC in 2006, he was Senior Economist at Bank of America. Dr. Roach earned a B.S. in Mathematics from Bob Jones University, an M.A. in Economics from Clemson University, and a Ph.D. in Economics from Clemson University.

Dr. William Breen is Senior Investment Strategist for Horizon Investments. He is also Emeritus Professor of Finance at the Kellogg Graduate School of Management at Northwestern University. Dr. Breen has published more than 40 articles and scholarly papers and co-authored three books on investment strategy, corporate finance, asset pricing, and econometric theory. In addition, he served or serves as a director of the LaSalle Trust Company, Barton-Ashmann, X10ion Inc., and the Evanston Community Foundation. He earned a Ph.D. in Econometrics from Cornell University, was an Associate Professor of Economics at Purdue University, and Associate Professor and Professor of Finance at the Kellogg Graduate School.

Horizon Investments, LLC / Horizon Investments Focused Portfolio

Horizon follows a 6 step process in developing asset allocations for Equis Clients.

(1) Compute Style Indices, meaning the categories under which assets are categorized; such as, very large value, mid growth, and international. (2) Compute Fundamental Factor Overweight Score using a regression analysis involving eighty different financial ratios to calculate the expected return for the indexes in each asset category. (3) Compute Market Sentiment Factor Overweight Score to determine which asset categories should be overweighted or unde-weighted. HS Dent Investment Management, LLC / HS Dent Investment Management

The Dent Portfolio investment approach identifies broad sectors of the US economy, economic sub-sectors, or even geographic regions of the world that appear to be poised for growth over a short horizon. These results are assessed according to a relative strength/momentum model that tells which ETFs to purchase and when to purchase them. In more detail, a pool of possible investment areas (including the money market) is ranked according to HS Dent's proprietary methods. To warrant investment a security must rank above the money market and show strong relative strength. If no security is above money market, or not enough securities to create an entire portfolio, then all or part of the portfolio may be invested in cash or cash equivalents. If we are 100% invested, we are considered to be in an "offensive" position. If any portion of our portfolio is in cash due to not enough securities ranking highly enough to complete the portfolio, then we are in a "defensive" position. We have used this methodology since May 1, 2008, through the worst of the current economic crisis. We have been either mostly defensive or completely defensive four times since then - November and December of 2008, and February and March of 2009. The portfolio typically holds relatively few positions and does have significant turnover.

Harry S. Dent, Jr. is the Founder, Managing Member and majority owner. For two decades Mr. Dent has been principally engaged, as the Managing Member of HS Dent Publishing, LLC., in authoring books, special reports, and a newsletter on the topic of economic change and how to estimate economic change by analyzing demographics, predictable consumer spending patterns, and technological innovation. Mr. Dent earned a bachelor's degree from University of South Carolina and an MBA from Harvard University.

Rodney G. Johnson is the President and Chief Compliance Officer as well as a minority owner. Mr. Johnson began working directly with Mr. Dent in 1997 to develop investment approaches based on the demographic research of Mr. Dent. Mr. Johnson earned a bachelor's degree from Georgetown University and an MBA from Southern Methodist University.

iSectors / iSectors® Tactical Global Balanced Allocation

iSectors® Tactical Global Balanced Allocation offers a comprehensive investment approach diversified across major global asset classes, including Domestic Equities, International and Emerging Market Equities, Bonds, Commodities, Gold and Real Estate. The model actively manages the investments within the portfolio, utilizing a trend following methodology to allocate among the model's targeted asset classes and to cash. This model's objective is to be in cash during prolonged declines in individual asset classes to reduce overall portfolio draw down. The iSectors® Tactical Global Balanced model seeks to invest in exchange-traded funds (ETFs) to achieve its objectives.

iSectors believes that the empirical evidence strongly suggests that asset allocation is the predominant factor behind the returns of any investment approach. Vehicles utilized within the models are primarily low-cost, primarily index-based ETFs. For its dynamic and tactical models, iSectors utilizes objective, quantitative-based models in an active-passive approach. Quite simply, quantitative-based algorithms utilizing updated data are consistently and systematically applied.

Management of iSectors Asset Allocation strategies is overseen by an investment committee of four professionals, each with significant investment, business and accounting experience along and multiple professional designations, including Prateek Mehrotra, MBA, CFA, CAIA as their Chief Investment Officer and Timothy J. Landolt, MBA as their Strategies Manager. Mr. Mehrotra holds a MBA in Finance from Lehigh University and Mr. Landolt holds a MBA from Loyola Marymount University.

iSectors / iSectors® Tactical International Allocation

iSectors® Tactical International Allocation is designed to help investors diversify their portfolios into international markets and participate in worldwide economic growth. Although international and emerging markets can be volatile, iSectors believes these markets move in identifiable trends based upon the respective countries' trade, fiscal, and monetary policies. The proprietary momentum-based algorithm is designed to position the model to profit from these trends. In an effort to reduce volatility and increase returns, the algorithm will allocate up to 100% to cash during periods when securities do not meet the momentum-based investment criteria. The model will allocate up to 10% of the overall portfolio to any single country, regional, or diversified international exchange-traded fund (ETF) at any given time, subject to a maximum of 10 securities, at which point the model will be 100% invested (subject to a 2% cash position for liquidity purposes). The algorithm is applied with updated data and the model rebalanced accordingly on a monthly basis.

iSectors believes that the empirical evidence strongly suggests that asset allocation is the predominant factor behind the returns of any investment approach. Vehicles utilized within the models are primarily low-cost, primarily index-based ETFs. For its dynamic and tactical models, iSectors utilizes objective, quantitative-based models in an active-passive approach. Quite simply, quantitative-based algorithms utilizing updated data are consistently and systematically applied.

Mench Financial Inc. / International Sector Enhanced

Mench Financial, Inc. has managed assets for individual and institutional clients since 1994. Mench strives to deliver superior performance to a national clientele by decreasing volatility and protecting assets during down markets. The key to our success is an econometric investment process and the use of exchange traded funds (ETFs) to participate in major changes in market trends. A composite of indicators triggers portfolio purchases and sales in a highly-disciplined manner. We believe 75% of our ability to outperform the market comes from this process of asset allocation. During weekly Investment Policy Committee meetings, current portfolio, market, sector and industry allocations are determined. These allocations allow us to decrease the volatility in a portfolio by pinpointing the markets or sectors of a market which we believe have the greatest potential for outperforming the general market. In turn, assets are moved away from sectors that we think have a high probability of underperforming. Once we have identified the industries poised to do well in the coming economic environment, we use fundamental and correlation analysis, combined with broad diversification, to shift the risk/reward ratio in our clients' favor.

The exchange traded funds (ETFs) we invest in represent ownership in an index of country- and region-specific common stocks intended to closely track the price performance and dividend yield of that specific country or region. These highly-liquid securities provide clients with a diversified portfolio at lower costs and allow for more consistent returns over a market cycle.

With over 35 years' experience in the investment industry, Mr. Mench, with the assistance of his family, has created a firm in which to implement the strategy he developed back in 1977. He earned a B.A. in Business from Butler University.

Retirement Wealth Advisors / Retirement Wealth Advisors Market Rotator

RWA (Retirement Wealth Advisors) Market Rotator is a quantitatively managed portfolio of exchange traded funds and cash equivalents. RWA, Inc.'s proprietary step-by-step mechanical approach to selecting positions eliminates emotional trading and is designed to only select above average positions based on both fundamental and technical indicators. The investment strategy utilizes 13 separate ETFs. Using no outside leverage or margin, the strategy seeks to identify the most probable direction of major US equity markets as well as the most statistically probable global asset classes for generating maximum total investor returns. Exchange traded funds are used exclusively to take advantage of these probabilities. Due to risk management processes contained within the quantitative models, the portfolio may not be fully invested at all times.

Mr. Wenk's firm, Retirement Wealth Advisors, Inc. is currently the #1 Ranked Private Asset Management firm in the State of Michigan and #8 in the United States by Money Manager Review*. The ranking; based on return, risk and risk adjusted return, is compared to industry giants such as Goldman Sachs, Alliance Bernstein, Oppenheimer Investments, Baird Asset Management, T. Rowe Price and a number of high profile West Michigan managers. Mr.

Wenk has been featured in The Grand Rapids Press, numerous industry specific magazines and has been invited as guest speaker to area colleges. In addition, he has taught educational seminars to over 2,500 investors in West Michigan. In 2007 and 2008 Reuters listed Mr. Wenk as one of the United States' top 500 financial advisors (with only one other advisor from West Michigan on the list) and in 2008 was named by Reuters as one of the Top Advisors Under 40 as well as one of the Top Advisors with Retirement Focus. Retirement Wealth Advisors, Inc. is headquartered in West Michigan (offices in Grand Rapids and Spring Lake) and is an SEC Registered Investment Advisory Firm.

Robbins Capital Management Inc. / Large Cap Core Flex

Robbins Capital Management of Atlanta, Georgia has managed assets for high-net-worth individuals and institutions since 2004.

Robbins Capital Management focuses on sector strength and diligent risk management. The strongest among 500 subgroups and sectors are identified as locations for screening of specific securities. Both fundamental and technical momentum and trend analyses are used to isolate the strongest 2%. Stocks demonstrating weakness over a three-month period are progressively sold. The sell discipline results in the portfolio maintaining an average of about 25% in cash/money market-type investments. Diversification is maintained by not investing more than 25% of the portfolio in any one sector and not allowing any one sector to appreciate to over 40% of the portfolio value. Typically, 25-50 stocks each represent less than 5% of the portfolio, yet some can occasionally increase to 7.5%.

Robert Robbins is both the firm's founder and its Chief Investment Officer who makes all substantive investment decisions. Confidence is inspired by his academic pedigree, military experience, and extensive tenure in research and portfolio management for large institutions.

An early interest in investing motivated Bob to earn a B.A. in economics from Dartmouth College. Following his undergraduate studies, Bob was a United States Army officer, rising to the rank of First Lieutenant. His pursuit of excellence continued upon returning to Dartmouth where he earned his M.B.A. from the Amos Tuck School of Business Administration in 1973. Between 1973 and 2002, Citibank, Bankers Trust, Thomson McKinnon, and Suntrust employed Bob's investment expertise in a variety of research and portfolio management positions. Investors can be certain that Bob's decisions are carefully considered because the majority of his personal assets are invested in the same companies as his clients'.

SignalPoint Asset Management, LLC / SignalPoint 10 Portfolio

Everyone understands the basic principle of investing: buy low and sell high. It is extremely difficult, if not impossible, to consistently predict the market tops and bottoms, but this is the objective of most tactical managers. SignalPoint conversely seeks to sell high and buy low. At least a little cash is held at all times and the amount increases with risk of each sector as calculated with our Risk Assessment Model. Cash is then redeployed the calculated risk in each sector declines, thus creating a tax-friendly continuous dollar-cost averaging. Our Risk Assessment Model constantly evaluates real time indicators including: speculation, relative valuation, divergence, and even IPO zeal. Disciplined adherence to our quantitative process removes emotion from investment decisions. During the last two years, our cash position has moved from a high of 48.5% in October 2007 when the market peaked, to a low of 1% in both November of 2008 and March of 2009. We manage only long positions and do not use levered or inverse ETFs. SignalPoint domestic and global portfolio betas range from .50-.72. Clients who seek reduced volatility, but want to maintain market exposure, will find our portfolios to be exactly what they are looking for.

The ten business sectors included in the S&P 500 are represented by individual ETFs and managed both individually and collectively. A money market component is also included and used as an active part of the portfolios management. The performance objective is to reduce risk in contrast to the overall market and outperform the S&P 500 benchmark, while reducing some of the emotional stress of the client.

Thomas M. Veale's responsibilities include management of portfolios, investment strategy, research, and trading. Mr. Veale is also the Chair of Investment Committee and provides general input into firm operations and management. For more than 20 years, Tom has helped a range of clients increase their wealth by guiding the growth of their portfolios. He also devised investment strategies for trusts, foundations and charities.

SignalPoint Asset Management, LLC / SignalPoint Balanced Point

Everyone understands the basic principle of investing: buy low and sell high. It is extremely difficult, if not impossible, to consistently predict the market tops and bottoms, but this is the objective of most tactical managers. SignalPoint conversely seeks to sell high and buy low. At least a little cash is held at all times and the amount increases with risk of each sector as calculated with our Risk Assessment Model. We manage only long positions and do not use levered or inverse ETFs. SignalPoint domestic and global portfolio betas range from .50-.72. Clients who seek reduced volatility, but want to maintain market exposure, will find our portfolios to be exactly what they are looking for.

This portfolio is comprised of 9 select ETFs, and a money market position. The portfolio provides exposure to higher quality fixed income securities, such as treasuries and investment grade corporate bonds. Limited exposure to REITs and high yield debt is also provided to enhance yield. The portfolio is designed for more conservative investors due to the portfolio's goal of achieving a relatively flat deviation curve and relatively stable Net Asset Value (NAV).

Thomas M. Veale's responsibilities include management of portfolios, investment strategy, research, and trading. Mr. Veale is also the Chair of Investment Committee and provides general input into firm operations and management. For more than 20 years, Tom has helped a range of clients increase their wealth by guiding the growth of their portfolios. He also devised investment strategies for trusts, foundations and charities.

Strategic Capital Alternatives / SCA Moderate Growth

STRATEGIC CAPITAL ALTERNATIVES, of Gig Harbor, Washington is a privately-held firm of 22 employees.

INVESTMENT PROCESS

SCA believes that active managers can and do add value to a portfolio. To identify the stock most likely to outperform in each category, we screen the universe of money managers and hire the best for each specialty. Each money manager supplies SCA with the 10-15 stocks in which they have the most confidence, allowing us to capture the highest conviction positions out of each manager's portfolio, typically between 30-50. As a result, SCA clients benefit from a portfolio that leverages the combined wisdom of top money managers covering each equity sub-category. Alternative asset classes designed to have returns less correlated with the equity and bond markets are provided through hedge funds via a fund of fund approach. In the fixed income space a core / satellite EFT strategy is used. The Core is built around the broad base aggregate index, 50% - 75% of the overall allocation, while the satellite positions will be dictated by current market opportunities and will include, high yield, floating rate, inflation protected, corporate credit and mortgage backed securities

INVESTMENT PHILOSOPHY

SCA believes investment risk can be controlled by maintaining a non-traditional asset allocation across three dimensions:

1. Equity market exposure correlated with the S&P 500 Index
2. Fixed Income exposure correlated with the BCAG Index
3. Alternative asset exposure typically less correlated with the equity market (S&P 500 Index) and bond market (BCAG Index)

Based upon a SECULAR market outlook created by our Investment Committee, the three dimensions are weighted based upon client risk tolerance with the goal of achieving a sufficient return with minimum risk.

INVESTMENT STRATEGY

The strategy is designed to offer downside protection during times of receding value while eliminating the need to specifically time the sharp swings of equity performance. The three-dimensional approach is accomplished by utilizing "traditional" as well as "non-traditional" asset classes historically employed by institutional investors. In short, the relative performance of long equities is balanced with investment vehicles that are designed to produce a stable, absolute return.

INVESTMENT COMMITTEE

Gary Price – Managing Director Mr. Price has over 18 years of investment experience. Mr. Price is the CEO of Genesis Capital, the manager of a family of hedge fund of funds as well as a Managing Director at Strategic Capital Alternatives. Mr. Price was a member of the advisory board that developed Russell Investments separate account manager platform. Mr. Price holds a finance degree from the University of Pennsylvania's Wharton School of Business.

Ron Robertson – Managing Director Mr. Robertson has over 13 years of investment experience and is a founder of Strategic Capital Group which manages or advises on just under \$1 billion for foundations and individuals. Mr. Robertson is the President of Genesis Capital, the manager of a family of hedge fund of funds as well as a Managing Director at Strategic Capital Alternatives. Mr. Robertson holds a B.S. from Western Washington University. He formally served as a member of the Frank Russell Company Alternative Investment Advisory Board and as President of the Strategic Leadership Foundation.

Michael Dubinsky, CFA – Chief Financial Officer Mr. Dubinsky has over 18 years' experience in finance and accounting for hedge funds, venture capital funds and investment management firms. Prior to joining Strategic Capital Alternatives, Mr. Dubinsky spent four years working for the Russell Investment Group, where he managed the operations of hedge funds, private equity funds and domestic and international mutual funds. Mr. Dubinsky also spent four years working for Deloitte & Touche LLP, where he served clients within the hedge fund, venture capital and financial service industries. Mr. Dubinsky holds a Business Administration degree from the University of Washington and is a CFA charterholder.

Michael Dubinsky, CFA – Chief Financial Officer Mr. Dubinsky has over 18 years' experience in finance and accounting for hedge funds, venture capital funds and investment management firms. Prior to joining Strategic Capital Alternatives, Mr. Dubinsky spent four years working for the Russell Investment Group, where he managed the operations of hedge funds, private equity funds and domestic and international mutual funds. Mr. Dubinsky also spent four years working for Deloitte & Touche LLP, where he served clients within the hedge fund, venture capital and financial service industries. Mr. Dubinsky holds a Business Administration degree from the University of Washington and is a CFA charterholder.

Wentworth, Hauser and Violich / WHV International Mutual Fund

Wentworth, Hauser and Violich (WHV) is one of the oldest and most respected investment management firms on the West Coast. Founded in San Francisco in 1937. The firm serves individuals, foundations, endowments, and institutions. WHV currently has more than \$11.6 billion in assets under management. The investment philosophy of the WHV International Equity Fund is grounded in the belief that investing in the most attractive global economic sectors can generate superior investment performance. Particular attention is devoted to the identification of investment "Supercycles." These are defined as supply and demand imbalances that are likely to persist over time. WHV believes that the world's investment landscape has evolved from being influenced by regional or country-specific events to an environment defined primarily by two dominant global forces: 1) globalization by economic sectors and 2) categorization of stocks by sectors rather than by country. The WHV International Equity strategy is

designed to take advantage of this environment through a top-down sector allocation investment process. The Fund utilizes a five-step, top-down investment process. First, the relative attractiveness of 10 global economic sectors is analyzed. Second, the potential of 67 industry groups is examined. Third, the attractiveness of 51 countries is analyzed. Fourth, a universe of 1,500 foreign equity securities is researched. Lastly, a portfolio of 30 to 60 stocks is constructed representing economic sectors that have the potential for long-term earnings growth.

Mr. Hirayama developed the WHV International Equity Strategy in 1995 and the WHV Global Equity Strategy in 2005. In 2008, Mr. Hirayama, along with WHV, founded Hirayama Investments, LLC, an affiliated investment adviser. Mr. Hirayama was a Computer Research Analyst with the Bank of America Trust Department and BA Investment Management from 1969 to 1982. He became a Security Analyst and Portfolio Manager at BAIMCO in 1983 and at Associated Capital Investors in 1988. He joined Wentworth, Hauser and Violich in 1990. Ms. Stankard joined Wentworth, Hauser and Violich in 1998 as a Portfolio Accountant and was promoted to Operations Officer in 2000. In 2001 she joined the International Equity Team as an International Security Analyst and was promoted to Portfolio Manager in 2008. In 2009, Ms. Stankard became a Member of Hirayama Investments, LLC, WHV's affiliated investment adviser. Ms. Goodson, Associate Portfolio Manager and International Security Analyst, joined Wentworth, Hauser and Violich in 2008 upon receiving her MBA from the Wharton School.

Municipal Fixed Income Model Portfolio

Egis Capital Management / Egis Municipal Fixed Income

The Egis Fixed Income Municipal Portfolio is managed to provide clients with diversification among mostly municipal debt securities through investing in bond ETF's and bond mutual funds. The Egis Municipal Fixed Income Portfolio is utilized within a client's asset allocation to add diversification and reduce volatility. The duration of investments are managed based on anticipated interest rates and the yield curve.

Taxable Fixed Income Model Portfolio

Egis Capital Management / Egis Taxable Fixed Income

The Egis Taxable Fixed Income Portfolio is managed to provide clients with diversification among mostly Treasury and corporate debt securities through investing in bond ETF's and bond mutual funds. The Egis Taxable Fixed Income Portfolio is utilized within a client's asset allocation to add diversification and reduce volatility. The duration of investments are managed based on anticipated interest rates and the yield curve.

iSectors® Capital Preservation Allocation

iSectors® Capital Preservation Allocation has been constructed for investors with a desire for principal stability by creating a portfolio of investments with relatively low volatility. Nominal portfolio yield is a secondary goal of the model. The model holds fixed income Exchange-Traded Funds (ETFs), primarily those that invest in short-term, AAA-rated or investment-grade debt instruments. A smaller portion of the assets may be placed in ETFs holding short-term international instruments. The model will generally target ETFs holding bond portfolios with a duration of approximately 3 years or less. While stability of principal is the primary goal of this portfolio, an investment in the iSectors® Capital Preservation Allocation is not guaranteed and will fluctuate in value.

iSectors believes that the empirical evidence strongly suggests that asset allocation is the predominant factor behind the returns of any investment approach. As such, many of the iSectors models are Strategic in nature, utilizing an indexing approach within the asset allocation models. Vehicles utilized to execute the allocation process within the models are primarily low-cost, primarily index-based ETFs.

Management of iSectors Asset Allocation strategies is overseen by an investment committee of four professionals, each with significant investment, business and accounting experience along and multiple professional designations, including Prateek Mehrotra, MBA, CFA, CAIA as their Chief Investment Officer and Timothy J. Landolt, MBA as their Strategies Manager. Mr. Mehrotra holds a MBA in Finance from Lehigh University and Mr. Landolt holds a MBA from Loyola Marymount University.

Strategic Capital Group / SCA Fixed income

Strategic Capital Alternatives' Fixed Income strategy starts with a core and satellite approach utilizing ETF's to capture our market exposures. The Core is built on the broad base aggregate index with a range of 50-75% of the portfolio allocation in the BC Aggregate. The Satellite positions will be dictated by current market opportunities and will include high yield, floating rate, inflation protection, corporate credit, and mortgage backed securities. The strategy is dynamic and can change as the market environment for fixed income changes. The goal of the strategy is to capture the long term, low volatility, single digit returns of the broad bond market net of fees.

Investment Committee:

Gary Price – Managing Director Mr. Price has over 18 years of investment experience. Mr. Price is the CEO of Genesis Capital, the manager of a family of hedge fund of funds as well as a Managing Director at Strategic Capital Alternatives. Mr. Price was a member of the advisory board that developed Russell Investments separate

account manager platform. Mr. Price holds a finance degree from the University of Pennsylvania's Wharton School of Business.

Ron Robertson--Managing Director: He has over 13 years of investment experience, is a founder of Strategic Capital Group, is the President of Genesis Capital , and is a Managing Director at Strategic Capital Alternatives. Mr. Robertson holds a B.S. from Western Washington University.

Municipal/Taxable Fixed Income Model Portfolio

Egis Capital Management / Egis Municipal/Taxable Fixed Income

The Egis Fixed Income Municipal/Taxable Portfolio is managed to provide clients with diversification among municipal and taxable debt securities through investing in ETF's and mutual funds. The Egis Municipal/Taxable Fixed Income Portfolio is utilized within a client's asset allocation to add diversification and reduce volatility. The duration of investments are managed based on anticipated interest rates and the yield curve.

iSectors / iSectors® Domestic Fixed Income Allocation

iSectors® Domestic models are strategic asset allocation models that employ a Modern Portfolio Theory (MPT) - based approach to asset allocation. The equity portion of the models is allocated using a diversified basket of domestic, low-cost, equity index-based ETFs. The fixed income portion of the allocations is invested in diversified, low-cost ETFs that hold baskets of investment-grade domestic, government and corporate bonds of various maturities. The models, with respect to their use of ETFs and an annual rebalance process, are designed to be tax-sensitive. Conservative allocation strategy is intended to consist of approximately 100% domestic (U.S. Only) fixed-income investments.

iSectors believes that the empirical evidence strongly suggests that asset allocation is the predominant factor behind the returns of any investment approach. As such, many of the iSectors models are Strategic in nature, utilizing an indexing approach within the asset allocation models. Vehicles utilized to execute the allocation process within the models are primarily low-cost, primarily index-based ETFs.

Management of iSectors Asset Allocation strategies is overseen by an investment committee of four professionals, each with significant investment, business and accounting experience along and multiple professional designations, including Prateek Mehrotra, MBA, CFA, CAIA as their Chief Investment Officer and Timothy J. Landolt, MBA as their Strategies Manager. Mr. Mehrotra holds a MBA in Finance from Lehigh University and Mr. Landolt holds a MBA from Loyola Marymount University.

iSectors / iSectors® Institutional Fixed Income Allocation

iSectors® Institutional models employ a Modern Portfolio Theory (MPT)-based approach, with a review of Resampling, Black Litterman and Monte Carlo Simulation to optimally allocate the model portfolios. The equity portion of the models is allocated across a number of domestic, international and emerging markets index-based exchange traded funds. Fundamentally-weighted index ETFs are included in the model in an effort to enhance return and reduce volatility. The fixed income portion of each model is invested in diversified, low-cost ETFs that hold baskets of domestic, international and emerging market government and corporate bonds of various maturities. The models, with respect to their use of ETFs and an annual rebalance process, are designed to be tax-sensitive. Conservative allocation strategy is intended to consist of approximately 100% domestic (U.S. Only) fixed-income investments.

iSectors believes that the empirical evidence strongly suggests that asset allocation is the predominant factor behind the returns of any investment approach. As such, many of the iSectors models are Strategic in nature, utilizing an indexing approach within the asset allocation models. Vehicles utilized to execute the allocation process within the models are primarily low-cost, primarily index-based ETFs.

Management of iSectors Asset Allocation strategies is overseen by an investment committee of four professionals, each with significant investment, business and accounting experience along and multiple professional designations, including Prateek Mehrotra, MBA, CFA, CAIA as their Chief Investment Officer and Timothy J. Landolt, MBA as their Strategies Manager. Mr. Mehrotra holds a MBA in Finance from Lehigh University and Mr. Landolt holds a MBA from Loyola Marymount University.

Applicant: Egis Capital Management	SEC File Number: 801-68642	Date: 1.21.2011
---	-----------------------------------	------------------------

(for sponsors of wrap fee programs)

Name of wrap fee program described in attached brochure:

Egis Capital Advisor Wrap-Fee Program

1. Applicability of Schedule. This Schedule must be completed by applicants that are compensated under a wrap fee program for sponsoring, organizing, or administering the program, or for selecting, or providing advice to clients regarding the selection of, other investment advisers in the program ("sponsors"). A wrap fee program is any program under which a specified fee or fees not based directly upon transactions in a client's account is charged for investment advisory services (which may include portfolio management or advice concerning the selection of other investment advisers) and execution of client transactions.

2. Use of Schedule. This Schedule sets forth the information the sponsor must include in the wrap fee brochure it is required to deliver or offer to deliver to clients and prospective clients of its wrap fee programs under Rule 204-3 under the federal Advisers Act and similar rules of the jurisdictions. The wrap fee brochure prepared in response to this Schedule must be filed with the Commission and the jurisdictions as part of Form ADV by completing the identifying information on this Schedule and attaching the brochure. Brochures should be prepared separately, not on copies of this Schedule. Any wrap fee brochure filed with the Commission as part of an amendment to Form ADV shall contain in the upper right hand corner of the cover page the sponsor's registration number (801-).

3. General Contents of Brochure. Unlike Parts I and II of this form, this Schedule is not organized in "check-the-box" format. These instructions, including the requests for information in Item 7 below, should not be repeated in the brochure. Rather, this Schedule describes minimum disclosures that must be made in the brochure to satisfy the sponsor's duty to disclose all material facts about the sponsor and its wrap fee programs. **Nothing in this Schedule relieves the sponsor from any obligation under any provision of the federal Advisers Act or rules thereunder, or other federal or state law to disclose information to its advisory clients or prospective advisory clients not specifically required by this Schedule.** **4. Multiple Sponsors.** If two or more persons fall within

the definition of "sponsor" in Item 1 above for a single wrap fee program, only one such sponsor need complete the Schedule. The sponsors may choose among themselves the sponsor that will complete the Schedule.

5. Omission of Inapplicable Information. Any information not specifically required by this Schedule that is included in the brochure should be applicable to clients and prospective clients of the sponsor's wrap fee programs. If the sponsor is required to complete this Schedule with respect to more than one wrap fee program, the sponsor may omit from the brochure furnished to clients and prospective clients of any wrap fee program or programs information required by this Schedule that is not applicable to clients or prospective clients of that wrap fee program or programs. If a sponsor of more than one wrap fee program prepares separate wrap fee brochures for clients of different programs, each brochure prepared must be filed with the Commission and the jurisdictions attached to a separate copy of this Schedule. Each such brochure must state that the sponsor sponsors other wrap fee programs and state how brochures for those programs may be obtained.

6. Updating. Sponsors are required to file an amendment to the brochure promptly after any information in the brochure becomes materially inaccurate. Amendments may be made by use of a "sticker," *i.e.*, a supplement affixed to the brochure that indicates what information is being added or updated and states the new or revised information, as long as the resulting brochure is readable. Stickers should be dated and should be incorporated into the text of the brochure when the brochure itself is revised.

7. Contents of Brochure. Include in the brochure prepared in response to this Schedule:

- (a) on the cover page, the sponsor's name, address, telephone number, and the following legend in bold type or some other prominent fashion:

This brochure provides clients with information about [name of sponsor] and the [name of program or programs] that should be considered before becoming a client of the [name of program or programs]. This information has not been approved or verified by any governmental authority.

- (b) a table of contents reflecting the subject headings in the sponsor's brochure

- (c) the amount of the wrap fee charged for each program or if fees vary according to a schedule established by the sponsor a table setting forth the fee schedule, whether such fees are negotiable, the portion of the total fee (or the range of such amounts) paid to persons providing advice to clients regarding the purchase or sale of specific securities under the program ("portfolio managers"), and the services provided under each program (including the types of portfolio management services);

Applicant: Egis Capital Management	SEC File Number: 801-68642	Date: 1.21.2011
---------------------------------------	-------------------------------	--------------------

- (d) a statement that the program may cost the client more or less than purchasing such services separately and a statement of the factors that bear upon the relative cost of the program (*e.g.*, the cost of the services if provided separately and the trading activity in the client's account);
- (e) if applicable, a statement that the person recommending the program to the client receives compensation as a result of the client's participation in the program, that the amount of this compensation may be more than what the person would receive if the client participated in other programs of the sponsor or paid separately for investment advice, brokerage, and other services, and that the person may therefore have a financial incentive to recommend the wrap fee program over other programs or services;
- (f) a description of the nature of any fees that the client may pay in addition to the wrap fee and the circumstances under which these fees may be paid (including, if applicable, mutual fund expenses and mark-ups, mark-downs or spreads paid to market makers from whom securities were obtained by the wrap fee broker);
- (g) how the program's portfolio managers are selected and reviewed, the basis upon which portfolio managers are recommended or chosen for particular clients, and the circumstances under which the sponsor will replace or recommend the replacement of the portfolio manager;
- (h) (1) if applicable, a statement to the effect that portfolio manager performance information is not reviewed by the sponsor or a third party and/or that performance information is not calculated on a uniform and consistent basis,
(2) if performance information is reviewed to determine its accuracy, the name of the party who reviews the information and a brief description of the nature of the review,
(3) a reference to any standards (*i.e.*, industry standards or standards used solely by the sponsor) under which performance information may be calculated;
- (i) a description of the information about the client that is communicated by the sponsor to the client's portfolio manager, and how often or under what circumstances the sponsor provides updated information about the client to the portfolio manager;
- (j) any restrictions on the ability of clients to contact and consult with portfolio managers;
- (k) in narrative text, the information required by Items 7 and 8 of Part II of this form and as applicable to clients of the wrap fee program, the information required by Items 2, 5, 6, 9A and C, 10, 11, 13 and 14 of Part II
- (l) if any practice or relationship disclosed in response to Item 7, 8, 9A, 9C and 13 of Part II presents a conflict between the interests of the sponsor and those of the clients, explain the nature of any such conflict of interest; and
- (m) if the sponsor or its divisions or employees covered under the same investment adviser registration as the sponsor act as portfolio managers for a wrap fee program described in the brochure, a brief, general description of the investments and investment strategies utilized by those portfolio managers.

8. Organization and Cross References. Except for the cover page requirements in Item 7(a) above, information contained in the brochure need not follow the order of the items listed in Item 7. However, the brochure should not be organized in such a manner that important information called for by the form is obscured.

Set forth below the page(s) of the brochure on which the various disclosures required by Item 7 are provided.

General Information

Eqis Capital Management (hereinafter "Eqis"), offers the following wrap-fee program, where appropriate, to interested prospects and advisory clients. Eqis, a corporation organized under Illinois law, is a registered investment adviser. Eqis' Corporate Headquarters are located at 1299 4th St., Ste 502, San Rafael, CA 94901. If you have questions regarding the material contained herein, please contact Eqis at 800.949.9936

Additional information about Eqis is available on the Internet at <http://www.adviserinfo.sec.gov>. You can search this site by a unique identifying number, known as a CRD number. The CRD number for Eqis is 126052.

Eqis Capital Wrap-Fee Program Description

Eqis is the sponsor of the Eqis Capital Wrap-Fee Program (hereinafter the "Program"). A "wrap-fee" program is one that provides the client with advisory services and access to institutional money managers and investment products, exclusive of brokerage, execution, and custodial services. Eqis actively solicits advisory clients for the Program through its independent contractor relationships with financial advisors, financial planners, stock brokers, and other designees (hereinafter "Financial Professional(s)") that are duly licensed to offer fee based financial products. Eqis will not accept a client into the program that isn't introduced by a Financial Professional. Financial Professionals are responsible for introducing clients to Eqis, gathering and communicating client's financial information, acting as a liaison between Eqis and the client, staying in contact with the client and informing Eqis of any material changes in the client's financial picture, and various other clerical or administrative duties. Financial Professionals may also assist in the determination of the client's asset allocation and the manager selection process (pursuant to the Eqis "Approved Managers" list). All investment advisory decisions with regard to securities, types of investments, timing of buys and sells, etc. will be made by Eqis and/or sub-managers contracted by Eqis (hereinafter "Contracted Managers"). Eqis is also responsible for the marketing of the Program. The Program is offered to individuals, retirement accounts and other business entities. With respect to retirement accounts that are regulated by ERISA, Eqis will only market the Program to such accounts in compliance with applicable Prohibited Transaction rules.

The Program is designed to continuously manage the client's Program Account based on the individual needs of the client through the use of professional money manager(s) that are either employed by Eqis and/or contracted by Eqis. The Program distinguishes between portfolios managed by Eqis (hereinafter "Eqis Managed Portfolios") and portfolios managed by managers that Eqis has contracted with to sub-advise all or a portion of certain advisory accounts ("Contracted Managers"). The Program defines a Portfolio as a group of investments managed by an individual manager or team with a specific criteria, e.g., Large Cap Growth US Equities.

At the time of clients' initial investments in the program, Eqis (in conjunction with the client's Financial Professional) will assist the client in determining the client's current financial situation, financial goals and attitudes towards risk. Clients' information will be collected and analyzed through the use of Eqis's proprietary proposal generation system, which in turn will allow Eqis and the client's Financial Professional to review the client's situation and determine an appropriate asset allocation. With regard to the Program account, asset allocation refers to the combining of individually managed portfolios to create diversification across asset classes, equity styles, foreign markets, etc. With respect to Benefit Plan Clients, the plan fiduciaries will be provided with predefined asset allocations, along with adequate descriptions of strategies and each strategy's associated level of risk. The plan fiduciaries will be responsible for choosing the allocation for inclusion in their plan. The client will maintain all ownership rights to all securities held within the Program account.

Once an appropriate asset allocation is determined with a client, and the Contracted Managers (if any) have been selected to fulfill the asset allocation, the individual portfolios will be managed by Eqis and the Contracted Managers on a discretionary basis. All Eqis Managed and Multi-Manger SMA Program accounts may consist of up to ten separately managed portfolios. ETF and UMA program accounts (accounts composed entirely of exchanged traded funds and accounts able to contain both exchange traded funds and separately managed accounts) have up to 20 portfolios in ETF Program accounts and up to 25 portfolios in the UMA Program accounts. These are combined to create an asset allocation that is appropriate for the client's needs, risk preferences and/or desires. Within an individual Program account all ten portfolios may be managed by Eqis (hereinafter "All Eqis Managed Account"); or all ten portfolios may be managed by Contracted Managers (hereinafter "Multi-Manager Managed Account"). In the alternative, a program account may contain a combination of Eqis managed portfolios and Contracted Manager portfolios. In regard to the Program, any asset allocation that contains a

portfolio that is managed by a Contracted Manager is considered a Multi-Manager Managed Account. The appropriate mix of managers will be determined by the client in conjunction with guidance from the client's Financial Professional. Model portfolios (and thus clients accounts) can be invested in a wide variety of securities and other assets such as (but not limited to) stocks, American Depositary Receipts (ADR's), exchange traded funds (ETF's), target term trusts, U.S Government bonds, money market funds and mutual funds. Eqis and/or Eqis Contracted Managers will make changes on a discretionary basis with respect to a client's account based on market, economic and political circumstances, and the individual characteristics of securities. Eqis and/or Eqis Contracted Managers will typically utilize a long term buy and hold approach, although other strategies may be used where appropriate for a client's circumstances. Clients should refer to the Contracted Manager(s) information in Exhibit 1 herein for information regarding the methods of analysis, sources of information and investment strategies used by the independent registered investment adviser in servicing client accounts. Upon request, a client may shift between program types and will be charged the subsequent fee associated with that program type.

FolioFn Investments Inc., a NASD registered broker dealer, provides all clearing and custodial services for the program. Pursuant to contractual authority from the client, Eqis will arrange for the execution of all securities transactions in client accounts. As Eqis does not have the discretionary authority to determine the broker dealer to be used, clients must direct Eqis as to the broker dealer to be used. Participation in the Program requires the appointment of FolioFn Investments Inc. as broker and custodian (hereinafter referred to as "FolioFn" or "Custodian"). Eqis does not have the discretion to change broker/custodian without the client's written permission. In directing the use of FolioFn, it should be understood that Eqis will not have authority to negotiate commissions among various brokers and best execution may not be achieved. Clients should consider whether or not the appointment of FolioFn as the sole broker may or may not result in certain costs or advantages or disadvantages to the client as a result of possibly more or less favorable executions. The client should consider that, depending upon the level of the wrap-fee charged by Eqis, the amount of portfolio activity in the client's account, the value of custodial and other services which are provided under the arrangement, and other factors, the wrap-fee may or may not exceed the aggregate cost of such services if they were to be provided separately or if Eqis were to negotiate commissions and seek best price and execution of transactions for the client's account.

Eqis will block trades where possible and when advantageous to clients. This blocking of trades permits the trading of aggregate blocks of securities composed of assets from multiple clients' accounts so long as transaction costs are shared equally and on a pro-rated basis between all accounts included in any such block. Block trading allows Eqis to execute equity trades in a more timely, equitable manner and to reduce overall costs. No personal trades will ever be included in any client blocks.

Eqis requires a minimum account size of \$25,000 for participation in the Program. This account size may be negotiable under certain circumstances. Clients may also make subsequent investments of \$100 or more, although any subsequent investment may be invested in a money market security within the program account until such time where there is a minimum of \$1,000 to reallocate into the designated asset allocation within the program account.

Eqis will update this Wrap-Fee brochure at least annually, no later than December 31 of each year. In addition, any material changes to the program during the year will dictate an interim update to this brochure. All updates will be made available to clients of Eqis.

Proxy Policy: As a matter of firm policy, Eqis does not vote proxies for Program client accounts. However the program custodian provides for online access to a proxy voting system that enables clients to vote their own proxies if they so desire.

Contracted Manager and Use of Contracted Model Managers Portfolios

How we use outside managers

Eqis hires Contracted Managers, who are not employees or affiliates of Eqis, to manage client assets within the Program. Clients' assets are managed by tracking each account's asset allocation to one or more model portfolios. Clients' portfolios are divided among these models based on the client's asset allocation. Clients' assets track the securities holdings of model portfolios. Strictly speaking, model portfolios do not in fact contain any assets, but rather clients' accounts track model portfolios which determine what assets will be purchased and sold within clients'

accounts. Clients' assets are held in their own accounts and are not commingled with the assets of other clients.

Information provided by clients and their financial professionals is critical for the selection of the asset allocation and thus the appropriate model managers. Changes in clients' priorities must be communicated to Eqis so that Eqis, the client's Financial Professional and the client can coordinate and adjust the allocation among model portfolios and Contracted Managers accordingly. Initially, the selection of

Contracted Managers is determined by each client and the client's financial professional. The client and associated financial professional may also choose to have Equis manage all assets thereby using no Contracted Managers.

Contract Managers have no information about individual clients, but rather are charged with managing one or more model portfolios appropriate for the asset classes to which the model portfolios are assigned.

How We Select Managers

Managers consistent with our asset allocation methodology are selected according to their track record, risk controls, and investment methodology. We hire managers who we believe (inclusive of price) will provide the best risk adjusted return for all asset class and/or equity styles that comprise clients' asset allocations.

How we Monitor Managers

Performance of the Contracted Managers is monitored by Equis. Contracted Managers who under-perform relative to their asset class and/or equity style will, pursuant to the discretion of Equis, likely be replaced. Equis practices careful judgment and discretion when determining whether to hire and retain each Contracted Manager. When hiring Contracted Managers, we do not independently verify their returns, but rather rely of the returns presented by the contracted firm and/or third party sources.

Changing Managers

The Contracted Manager or managers assigned to a particular portion of clients' asset allocations may be changed at the discretion of Equis. Such changes would typically be made when a Contracted Manager is underperforming relative to its peers. When the Contracted Manager of a portfolio is fired, Equis will, for all clients tracking that model, select an alternative portfolio to fill that portion of clients' asset allocations.

If a client or his financial professional desire to switch between managers they may do so for no charge. The Equis Capital program is not designed for investors who plan to change managers frequently and reasonable limits to the number of manager changes allowed may be applied. For this purpose, Equis typically places an annual limit of 7 manager changes per year. Equis may provide relief from this limit at its discretion.

The Use of Contracted Managers

Adverse price movements and thus less favorable prices might be caused by Contracted Managers' outside activities (activities in accounts other than the model account) or due to the large orders created based on changes in the model account. Orders for clients' Equis accounts may be initiated at the same time or a different time than when the change in model portfolio is made by the model portfolio's manager. Equis does not typically evaluate changes made to model portfolios by their Contracted Managers. Rather, Equis typically limits our oversight to the results provided by a Contracted Manager, and all investment decisions made in a particular Contract Manager's model are made at the discretion of the Contracted Manager.

Some Contracted Managers may be paid more for sub-advisory management services than others. For Multi-Manager Account clients, the wrap fee charged by Equis to clients does not vary based on the Contracted Managers selected by Equis for a Multi-Manager Account.

Some of the available model portfolios are managed by Equis Capital, meaning that the fee that would otherwise be paid to a Contracted Manager is retained by Equis. Moreover, certain clients or Financial Professionals may choose for Equis to manage all assets without Contracted Managers. A lower program fee is charged for accounts entirely managed by Equis Capital with no Contracted Managers.

Investment Strategies and Securities Analysis

Equis manages several separate model portfolios that provide diversification across the spectrum of domestic and international equity styles and fixed income. Portfolios typically consist of one or more of the following: individual equities, ADR's, ETF's, mutual funds, FDIC cash deposits and U.S. Government securities. Each client of Equis will be assigned an asset allocation comprised of up to ten of the Equis model portfolios. The assignment of an asset allocation will be based on the clients need, risk preferences and desires.

Individual equities are selected partially through a proprietary screening mechanism utilizing an augmented version of the Porter Five Forces Model. The Equis proprietary model explains how market structures determine the intensity of competition. We invest in firms that face less competition and thus have prospects for greater long term profits. The Porter Five Forces Model considers five sources of competition: customers demanding lower prices, suppliers demanding higher prices, substitute products providing alternatives, direct competitors cutting prices and increasing quality, and potential entrants increasing direct competition. An additional consideration is technological innovation, which influences the five forces. When selecting individual equities, Equis also takes the industry into consideration in the interest of maintaining diversification to maximize risk adjusted returns. ETF's or mutual funds will be selected on the basis of any or all of the following criteria: the fund's performance history; the industry sector in which the fund invests; the track record of the fund's manager; the fund's investment objectives; the fund's management style and philosophy; and the fund's management fee structure. Portfolio weighting between funds and market sectors will be determined by each client's individual needs and circumstances. Clients will have the opportunity to

Based on the fee structures outlined below, Equis stands to save operating costs (and thereby increase profit) if its own model portfolios (or low-cost Contracted Manager portfolios) are selected by clients and Financial Professionals rather than higher-priced Contracted Managers' portfolios. Equis, therefore, has an incentive to offer its own portfolios and lower-cost Contracted Managers as part of the Program. This is a conflict of interest that may affect the Contracted Managers and model portfolios selected by Equis for inclusion in the Program. Nevertheless, Equis has a significant interest in making sure that its clients and their financial advisors are happy with all aspects of the Equis Capital Wrap Fee Program. Toward this end, Equis will endeavor to select managers and portfolios we believe will provide the best risk adjusted return for clients.

Contracted Manager Disclosures

Contracted Managers have discretion over what assets are selected within the model(s) they manage. A Contracted Manager might have outside business or personal relationships that provide an incentive for the Contracted Manager to include certain assets rather than others. A Contracted Manager is not contractually obligated to include in model portfolio(s) any securities included in outside portfolios. Similarly, a Contracted Manager may include assets in models that are not included in portfolios managed outside of the Equis program.

Assets that Can be Contained in Clients Accounts

Model portfolios (and thus clients accounts) can be invested in a wide variety of securities and other assets such as (but not limited to) stocks, American Depository Receipts (ADR's), exchange traded funds (ETF's), target term trusts, and mutual funds.

Equis Capital Provides Asset Management, But Does Not Provide Tax Advice.

Buying and selling specific securities as part of a tax planning strategy is available to clients of Equis, but tax related decisions or counseling is not provided by Equis. If a client and the associated financial professional desire to buy and/or sell specific securities within an account, then specific orders should be emailed to us and we will make the requested transactions. Management of model portfolios might not be coordinated, and accordingly it is possible for wash sales to occur.

Dispersion

The performance of a model portfolio and a client's actual performance within that model can vary. There can also be dispersion between the performance of a client's assets that are allocated to a model portfolio and the actual model portfolio (managed outside the Equis Multi Manager Program) that the client's allocation is managed to match. This dispersion can cause a client's actual return for the portion of the client's account allocated to a particular model portfolio to be either greater than, equal to or less than the performance of the actual model portfolio (or the portfolio managed outside of the Equis Multi Manager Program that the model portfolio is managed to track, if any). In addition, dispersion can account for slightly different holdings or percentage holdings in a client program account versus the model portfolio.

Contracted Managers may manage portfolios outside of the Equis program and there may be dispersion between the performance reported by these services and those received by Equis clients. Finally, there may be dispersion between the returns earned by different clients whose investments are tracking the same model portfolio(s).

Dispersion among clients' accounts is common because of the combination of each client's assets being held directly in their own account and the differences between the timing of trade execution, size of accounts, client additions or withdrawals, and client imposed restrictions among other factors.

place reasonable restrictions on the types of investments which will be made on the client's behalf. Clients will retain individual ownership of all securities.

Equis utilizes several data resources in gathering historical information, as well as annual and quarterly reports. Using fundamental analysis, securities are actively monitored and evaluated relative to market and industry conditions.

Equis may use FDIC cash deposits to "sweep" unused cash balances until they can be appropriately invested.

Equis may utilize one or more of the following investment strategies when servicing Program participants: long-term and short-term investment strategies, and trading (securities sold within 30 days). Nevertheless, Equis places an emphasis on a long term buy and hold approach. Because these investment strategies involve certain additional degrees of risk, they may be recommended when consistent with the client's stated tolerance for risk.

Equis utilizes a number of sources of financial information in the firm's analysis of securities including financial newspapers and magazines, research materials and reports, corporate rating services, annual reports, prospectuses, SEC filings and company press releases. Research services are received in various forms, which may include written reports, or information obtained on the World Wide Web.

The above types of investments, methods of analysis, sources of information and investment strategies utilized by Equis are only applicable to portfolios managed directly by Equis. With respect to outside money managers, clients are requested to

refer to the description of Contracted Managers portfolios in Exhibit 1 for more information on that manager's investment strategies, methods of analysis, and other

pertinent investment information.

Fee Schedule

Eqis charges an annual "Wrap-Fee" for participation in the Program. The Wrap-Fee is made up of two separate and distinctive parts, but charged to the client as one fee. The two parts are as follows: Part 1 the Eqis Program Fee, and Part 2 the Financial Professional Fee ("FP" fee). Both parts are detailed in **Table 1**. The Wrap-Fee will be charged as a percentage of assets under management on a blended fee schedule. Clients will be invoiced and fees will be directly debited from client accounts after the end of each calendar month. When there is not enough cash or funds in an account to pay a fee, the account will be rebalanced so as to generate a sufficient level of cash or funds to meet this expense. As part of this agreement you authorize the Clearing Firm (FolioFn) to deduct the Wrap-Fees from your account as directed by Eqis. The fee calculation will be based on the average closing market value of the assets in the client's Program account over the previous calendar month. Value is calculated as the market value, or fair market value in the absence of market value, plus any credit balance or minus any debit balance. Each client Program Account is mutually exclusive for purposes of determining the declining fee schedule. Your Eqis account may contain investments that charge a separate fee not included within the Wrap-Fee.

In addition to the Wrap-Fee charged by Eqis, clients may also be charged, at the Financial Professional's discretion, an additional Initial Consulting Fee ("IC" fee) of up to 1% of the initial investment, and of any subsequent investments. The Initial Consulting Fee compensates the Financial Professional for gathering and communicating clients' financial information, as well as assisting in the manager selection process from the Eqis Contracted manager list. The Initial Consulting Fee of up to 1% will be deducted upon the deposit of cash, securities or any instrument of value into the client's Program Account at the end of the month in which the deposits were received, and will be paid in full to the Financial Professional's firm. The Initial Consulting Fee will not be assessed until the program account has been established for five days. The Initial Consulting Fee may be reduced or waived at the Financial Professional's discretion. The Initial Consulting Fee will be considered fully earned upon deduction of the Initial Consulting Fee from the client's Program Account. See **Table 2**.

BREAKDOWN OF WRAP-FEE

Part 1, Program Fee

The Eqis Program Fee will be charged as a percentage of assets under management on a blended fee schedule. There are four options that determine the Program Fee. Option 1 (All Eqis) includes an account comprised of portfolios managed solely by Eqis. Option 2 (Multi Manager) includes managers other than Eqis (i.e., managers contracted by Eqis), but not excluding Eqis. Option 3 (Managed ETF) includes only exchange traded funds (ETF's) and no individual stocks or contracted managers. Option 4 (Unified Managed Account) can include portfolio managed by Eqis, portfolios managed by firms contracted by Eqis and exchange traded funds. It will be up to the client and their Financial Professional to determine whether Option 1, Option 2, Option 3, or Option 4 is best for the client's particular circumstances. See **Table 3**.

Part 2, Financial Professional Fee

The Financial Professional Fee is the portion of the overall Wrap Fee that is used to compensate the Financial Professional. The services that the Financial Professional will be compensated for include: introducing clients to Eqis, gathering and communicating clients' financial information, assisting in the manager selection process from the Eqis approved manager list, acting as a liaison between Eqis and clients, staying in contact with clients and informing Eqis of any material changes in clients' financial picture, and other various clerical or administrative duties. The Financial Professional Fee is negotiated between the client, the Financial Professional and Eqis. The Financial Professional Fees shall under no circumstances exceed 1.5% per annum. The client may be able to negotiate a higher or lower Financial Professional Fee based on the individual Financial Professional that introduces the client to the program.

Other Wrap-Fee Details

The Wrap-Fee includes the Eqis Program Fee that covers all advisory fees, online performance reporting costs, separate account money manager fees and any fees that Eqis pays to a third party in conjunction with marketing the program (i.e. internal or external wholesalers or platform inclusion fees). In addition, the Wrap-Fee is inclusive of the Financial Professional Fee. The Wrap-Fee does not include certain administrative fees; for example, wire transfers, annual charges for qualified accounts, or certificate issues. Custodian charges a separate fee for brokerage, execution and custodial services (this fee is exclusive of the Eqis Wrap Fee Program fee.) The current negotiated rate for FolioFN is 20 basis points, charged monthly pro rata. This fee is charge separate from the Eqis Wrap Program fee and subject to change. A minimum of \$25,000 of assets under management is required to participate in this program. Securities transactions affected for the clients' accounts may also include, mark-ups, mark-downs, or dealer spreads to market makers or other principals from whom securities were obtained by FolioFn. These mark-ups, mark-downs, or dealer spreads will be retained by the market maker or other principal and will not be credited or reimbursed to the client's account.

Some of the model portfolios available to clients are managed by employees and/or principals of Eqis. Managers of these model portfolios are paid salary by Eqis and therefore do not directly receive any particular percentage of the wrap fee. Other model portfolios are managed by managers who are not employees or principals of Eqis. These outside managers that are contracted by Eqis receive a percentage of assets under management as compensation. Outside manager compensation is negotiated and based on the asset class, equity style, and tenure of manager, among other various criteria judged by Eqis to be important. Contracted Manager compensation is included in the Wrap-Fee of Option 2. **Alternative Strategies (Alt. Strat)** is only available as an asset class within the UMA program. Some managers are limited to a maximum investment of 75% of the entire account in Alt. Strat. based on Eqis assessment of that managers diversification.

Negotiability of Fees and Account Minimums: In certain circumstances, all of Eqis fees and account minimums may be negotiable.

Fee Calculation: The fee charged is calculated as described above and is not charged on the basis of a share of capital gains upon or capital appreciation of the funds or any portion of the funds of an advisory client, pursuant to Section 205(a)(1) of the Investment Advisers Act of 1940, as amended (hereinafter "IA Act").

Fee Payment: Clients will be invoiced and Wrap Fees will be directly debited from client accounts at the beginning of each calendar month. The fee calculation will be based on the average daily market value of the assets in the client's Program account over the previous calendar month. Value is calculated as the market value, or fair market value in the absence of market value, plus any credit balance or minus any debit balance. Fees will be directly debited in accordance with the Client Services Agreement.

Termination of Advisory Relationship: A client agreement may be canceled at any time, by either party, for any reason upon receipt of written notice. The client has the right to terminate an agreement without penalty within five (5) business days after entering into the agreement. Thereafter, either Eqis or Client may terminate this Agreement upon fifteen days written notice. Upon termination of any account, any prepaid, unearned fees will be promptly refunded, and any earned, unpaid fees for any unbilled portion of a month will be collected prior to disbursement of funds.

Mutual Fund Fees and Expenses: All fees paid to Eqis for investment advisory services are separate and distinct from the fees and expenses charged by ETF's or mutual funds to their shareholders. These fees and expenses are described in each fund's prospectus. These fees will generally include a management fee, other fund expenses, and a possible distribution fee. A client could invest in an ETF or mutual fund directly, without the services of Eqis. In that case, the client would not receive the services provided by Eqis which are designed, among other things, to assist the client in determining which ETF's or funds are most appropriate to each client's financial condition and objectives. Accordingly, the client should review both the fees charged by the ETF's or funds and the fees charged by Eqis to fully understand the total amount of fees to be paid by the client and to thereby evaluate the advisory services being provided.

Fee Schedule Tables

Table 1

The maximum Wrap-Fee (inclusive of parts 1 and 2) charged to clients is as follows:

<u>Assets Under Management</u>	<u>MAXIMUM Annual Fee (%)</u>
First \$100,000	Up to 2.30%*
Next \$150,000	Up to 2.20%*
Next \$250,000	Up to 2.10%*
Next \$2,000,000	Up to 2.00%*
Amounts Over \$2,500,000	Up to 1.90%*

* The actual Wrap-Fee charged to each client will depend in part on the negotiated "Financial Professionals" Fee, as detailed in Part 2 below. The exact Financial Professional fee charged to you will be specified in section #9 (Financial Professional's Report) of this Account Application. Similar advisory services may be available from other registered investment advisers for similar or lower fees.

Table 2

The Maximum combined Wrap-Fee and IC-Fee during the first year of program participation is as follows:

<u>Assets Under Management</u>	<u>MAXIMUM First Year Fee (%)</u>
First \$100,000	Up to 3.30%*
Next \$150,000	Up to 3.20%*
Next \$250,000	Up to 3.10%*
Next \$2,000,000	Up to 3.00%*
Amounts Over \$2,500,000	Up to 2.90%*

* The actual First year Fee charged to each client will depend in part on the negotiated "Financial Professionals" Fee, as detailed in Part 2 below, as well as the Initial Consulting Fee charged by the Financial Professional. The exact Financial Professional fee and Initial Consultation Fee charged to you will be specified in section #9 (Financial Professional's Report) of this Account Application. Similar advisory services may be available from other registered investment advisers for similar or lower fees.

Table 3

If client invests in an All Equis Managed account, the Program Fee will be:

<u>Assets Under Management</u>	<u>MAXIMUM Annual Fee (%)</u>
First \$250,000	Up to 0.55%*
Next \$250,000	Up to 0.45%*
Next \$1,500,000	Up to 0.35%*
Next \$3,000,000	Up to 0.25%*
Amounts Over \$5,000,000	Up to 0.15%*

If client invests in a Multi Manager Managed account, the Program Fee will be:

<u>Assets Under Management</u>	<u>MAXIMUM Annual Fee (%)</u>
First \$100,000	Up to 0.75%*
Next \$150,000	Up to 0.65%*
Next \$250,000	Up to 0.55%*
Next \$2,000,000	Up to 0.45%*
Amounts Over \$2,500,000	Up to 0.35%*

If client invests in a Managed ETF account, the Program Fee will be:

<u>Assets Under Management</u>	<u>MAXIMUM Annual Fee (%)</u>
First \$250,000	Up to 0.65%*
Next \$250,000	Up to 0.45%*
Next \$1,500,000	Up to 0.35%*
Next \$3,000,000	Up to 0.25%*
Amounts Over \$5,000,000	Up to 0.15%*

If client invests in a Managed UMA account, the Program Fee will be:

<u>Assets Under Management</u>	<u>MAXIMUM Annual Fee (%)</u>
First \$250,000	Up to 0.80%*
Next \$250,000	Up to 0.70%*
Next \$1,500,000	Up to 0.60%*
Next \$3,000,000	Up to 0.50%*
Amounts Over \$5,000,000	Up to 0.40%*

Note: Custodian charges a separate fee for brokerage, execution and custodial services (this fee is exclusive of the Equis Wrap Fee Program fee.) The current negotiated rate for FolioFN is 20 basis points, charged monthly pro rata. This fee is charge separate from the Equis Wrap Program fee and subject to change.

Additional Information about Fees and Services

In considering the investment program described in this brochure, a prospective client should be aware that the Program may cost a client more or less than purchasing the actual services separately from other advisers or broker-dealers. Clients should also be aware that the charge of an Initial Consulting Fee may not be considered standard in the investment advisory industry.

In addition, the amount of compensation received by Equis and the Financial Professional(s) as a result of the client's participation in the Program may be more or less than what Equis and/or the Financial Professional would receive if the client paid separately for investment advice, brokerage and other services. Therefore, Equis and the Financial Professional(s) may have a financial incentive to recommend the Program over other advisory programs or services.

The factors that should be considered by a prospective client include the size of a client's portfolio, the nature of the investments to be managed, commission costs,

custodial expenses (if any), the anticipated level of trading activity, and the amount of advisory fees charged for managing the client portfolio.

Advisory fees may vary among Equis clients based upon a number of factors, including the size of the client's account, the negotiated financial professional fee, the types of investments, the nature of related services provided, and the length of the advisory relationship with a client, among other things.

Clients should understand that similar advisory services may be available from other registered investment advisers for a higher or lower fee.

Clients should understand that if they go to a cash position, their account will still be charged the fee associated with their current Program Type.

Clients may be charged (by the custodian) up to \$4.50 for liquidating each security transferred to the clients' accounts to be managed under an Equis program.

Conflicts of Interest

Equis utilizes FolioFm for all brokerage and custodial services. For this reason, the decision by any client to authorize Equis to place a trade is the functional equivalent of directing Equis to execute the trade through FolioFm. Certain associated individuals of Equis are also licensed insurance agents. As such, these individuals can sell insurance products to advisory clients and the licensed agent may receive separate yet typical insurance-based compensation and/or commissions. While these individuals endeavor at all times to put the interest of Equis's advisory clients first as part of Equis's fiduciary duty, clients should be aware that the receipt of additional compensation itself creates a conflict of interest, and may affect the judgment of these individuals when making advisory/investment recommendations.

Equis or individuals associated with Equis may buy or sell securities identical to, or different from those recommended to clients for their personal accounts. In addition, any related person(s) may have an interest or position in a certain security(ies) which may also be recommended to a client.

It is the expressed policy of Equis that no person employed by Equis may purchase or sell any security immediately prior to a transaction(s) being implemented for an advisory account, and therefore, prevents such employees from benefiting from transactions placed on behalf of advisory accounts.

If the Financial Professional (FP)/solicitor meets certain business related qualifications, Equis may provide up to 5 basis points of the fee paid by the client as an incentive to the client's FP/solicitor for the purpose of marketing and servicing new and existing clients. In order to participate in the incentive provided by Equis, the FP/solicitor needs to maintain certain asset levels and achieve certain new asset levels. The level of incentive increases based upon the previously mentioned criteria. This incentive creates a potential conflict of interest for the FP/solicitor because the FP/solicitor receives compensation that increases based on the level of assets managed through the program. This compensation does not impact the level

of fees that clients pay and clients are under no obligation to follow the recommendations of their FP/solicitor regarding using the program.

As these situations represent a conflict of interest, Equis has established the following restrictions in order to ensure its fiduciary responsibilities:

1. A Director, officer or employee of Equis shall not buy or sell securities for their personal portfolio(s) where their decision is substantially derived, in whole or in part, by reason of his or her employment unless the information is also available to the investing public on reasonable inquiry. No person of Equis shall prefer his or her own interest to that of the advisory client.
2. Equis maintains a list of all securities holdings for itself, and anyone associated with this advisory practice with access to advisory recommendations. These holdings are reviewed on a regular basis by an appropriate officer of Equis.
3. All clients are fully informed that certain individuals may receive separate compensation when effecting transactions outside of the wrap fee Portfolio Management service.
4. Equis requires that all individuals must act in accordance with all applicable Federal and State regulations governing registered investment advisory practices.
5. Any individual not in observance of the above may be subject to termination.

Equis will not aggregate trades for its associated persons with client trades.

Education and Business Standards

Equis requires that investment adviser representatives maintain general standards of education and business experience, especially related to investments. Investment adviser representatives must also satisfy state-by-state qualification requirements within the states in which the representatives have places of business. Generally, states require

representatives to complete the Series 65, or Series 7 and 66 NASD examinations. Equis also requires that all Financial Professionals be properly registered as investment advisers or licensed as investment adviser representatives where required pursuant to relevant federal and/or state regulations.

Officers of Equis

William R Nelson BORN: 6/15/1971

William Robert Nelson Jr. graduated from San Diego State University with a degree in Finance. He moved to Chicago where as a member of the Chicago Board of Trade he made markets in financial futures. Subsequently, he earned a Ph.D. in economics from George Mason University and was appointed as a professor to the department of Finance and Managerial Economics in the State University of New York at Buffalo School of Management. His original research has been published in the American Economic Review, DePaul Journal of Healthcare Law, The International Conference on Information Technology ITCC 2004 Proceedings, the Journal of Economic Behavior and Organization, Latin American Finance and Capital Markets, and the Latin American Law and Business Report.

Curtis C. Brown, Jr. BORN: 9/14/1951

Curtis C. Brown, Jr. graduated from San Diego State University with a degree in Political Science. He received an MBA degree from National University and completed advanced business and leadership studies at the Wharton School, University of Pennsylvania. Prior to joining Equis in October of 2010, he spent thirty

years with the investment firm of Merrill Lynch. His career started as a Financial Advisor and he moved onto a variety of leadership positions, including Managing Director, National Sales Manager, Assistant to the Chairman and President, and Regional Managing Director.

Duane Menting BORN: 3/03/1952

Duane Menting, Esq. graduated with a B.S. degree 1976 from the University of Wisconsin - Stevens Point. He received his JD degree in 1980 from Indiana University - Bloomington. He completed his LLM - Tax degree in 1991 at Golden Gate University - San Francisco. He has run a successful private legal practice for 20 years working with Fortune 500 companies. He joined Equis Capital Management in March of 2008. He is the Chief Financial Officer and the Chief Legal Counsel.

Jennifer C Winters BORN: 9/25/1971

Jennifer C Winters graduated from Lewis University with a B.A. in Communications. She has been with Equis Capital Management since February of 2003. She is the Chief Compliance Officer.

Portfolio Manager Selection and Review

Dr. William R. Nelson is the Chief Financial Strategist of Eqis and the primary Portfolio Manager for portfolios managed by Eqis for the Program. Dr. Nelson performs the day to day management of the portfolios managed by Eqis. In addition Dr. Nelson designs asset allocation models for the Program that are based on the needs and risk preferences of clients. These models are used within Eqis's proprietary proposal generation system. The core of Eqis's management philosophy is distilled into the Eqis System that employs an augmented version of the Porter Five Forces Model in conjunction with the implications of modern portfolio theory and recent empirical evidence. The processes employed by Eqis are continuously updated to provide what Eqis and Dr. Nelson believe to be the best possible money management for Eqis clients. Additional insights into the market are provided by Eqis's distinguished business advisory board. Fortunately, advanced technology allows Dr. Nelson to act as the Portfolio Manager for all clients in the Program that are invested in an Eqis

Managed Portfolio.

Clients' Financial Professionals will communicate clients' needs to Eqis which will in turn update Dr. Nelson with changes in the financial circumstances and needs of clients, so that their portfolios can be appropriately managed.

Dr. Nelson is not personally available to address clients' questions and concerns. Rather, questions should be sent through clients' Financial Professional(s), who will forward the questions to Eqis should the financial professional be unable to respond. Eqis will provide the answer to the Financial Professional(s), who will relay the answer to the client. Dr. Nelson's performance information is not reviewed by the sponsor or a third party, nor calculated on a uniform and consistent basis.

Client Reports

All Documents Are Delivered Electronically

We believe we are one of the most advanced registered investment advisory firm in terms of providing account information to our customers electronically. Our opening and maintaining your account is conditioned on your agreement to receive all notices, documents, and other information related to your account and investments electronically. This may be done through an online posting on our Web site, email, Adobe Acrobat's portable document format (PDF), hypertext mark-up language (HTML), or other electronic media to which you consent. Your consent to electronic delivery extends to all information required to be provided by us, the issuers of the securities in which you invest, and other third parties. Program clients will receive account statements and confirmations of transactions directly from the custodian. Fees are calculated by Eqis and invoices are made available to the client before fees are debited from clients' accounts. All clients should verify the accuracy of fee calculations. The above mentioned client reports will be made available to clients through electronic mail and the Internet. They are stored and available for viewing or printing from your filing cabinet or elsewhere on our Web site. You agree that when we send these email notices to you that they constitute delivery to you of the information mentioned in the email even if you do not actually access the information on our Web

site. You may revoke this consent to electronic delivery at any time by providing written notice to us. However, since we have priced our services based on the considerable savings of electronic delivery, we reserve the right to terminate your account or, in certain instances, charge you an extra fee if you ask for paper documents. Clients participating in the program who choose to receive reports in hard copy will be assessed up to an additional \$100 annual administrative fee per account. You agree to keep a working email address and other current contact information and will update your account information immediately if your email address or other contact information changes. If you do not maintain an e-mail address that is working and accessible to us, and we believe we are required to provide you paper notice or documents of particular matters or actions, and we do so, we may charge you an additional annual administrative fee of up to \$100 per account. You acknowledge that you may incur costs (such as online service provider charges or printing costs) associated with the electronic delivery of information to you. To view PDF files, you will need to download the Adobe Acrobat Reader, which is provided for free. If your email address or other contact information changes at any time, you need to update your account information.

Review of Accounts

While the underlying securities within the Program accounts are actively monitored, these accounts will be formally reviewed at least quarterly by Dr. Nelson or a member of his team, designated by Dr. Nelson. The review will be conducted to determine if the current investment holdings of the account are consistent with the client's investment objectives as outlined at the inception of the advisory

relationship. More frequent reviews may be triggered by material changes in variables such as the client's individual circumstances, drift from the model portfolio weighting, and economic environment. Eqis or a designee (typically the Financial Professional) will contact the client on at least an annual basis to discern changes to the client's financial circumstances or investment objectives.

Additional Compensation

Eqis does not accept soft dollars or any other additional compensation above the fees paid by the client to Eqis outlined in the Fee Schedule. Nevertheless, Eqis may receive research reports from FolioFn. The receipt of such reports is not related to any commitment with FolioFn for transaction levels in exchange for any services or products from FolioFn, but does create a possible conflict of interest of which clients should be aware in assessing Eqis's brokerage recommendation.

Financial Professionals may receive incentive awards for the recommendation or introduction of investment products to advisory clients. The receipt of this compensation may affect a representative's judgment in recommending products to clients.

Exhibit 1**MODEL PORTFOLIO DESCRIPTIONS**

Eqis provides access to model portfolios that provide diversification across the spectrum of domestic and international equity styles and fixed income. Each client of Eqis will be assigned an asset allocation comprised of up to ten of the model portfolios. The assignment of an asset allocation will be based solely on the client's needs and risk preferences. Some of the model portfolios are managed in house by Eqis; others are managed by independent, contracted managers. Below is a brief description of model portfolios arranged by asset class and equity style.

Large Cap Growth Model Portfolios-Benchmarked to the Russell 1000 Growth Index**Advisor Partners / AP Tax Managed Index LCG**

The U.S. Equity Large Cap Tax Managed Index Strategy seeks to maximize after-tax returns while maintaining risk characteristics similar to the broad U.S. equity market through a managed portfolio of individual securities. The portfolio's benefits include diversification across sectors combined with tax efficiency. Tax efficiency is achieved by selecting tax efficient vehicles and/or through active tax management. The sectors with the greatest representations within the portfolio tend towards finance, information technology, and healthcare. Advisor Partners is an investment management firm specializing in providing customized, tax-managed, index-based investment solutions for advisors and their clients. The average tenure of the principals exceeds two decades and contributes to their depth of investment judgment and expertise. They are privately owned and managed by the principals.

Eqis Capital Management / Eqis Large Cap Growth

Eqis Large Cap Growth is managed to provide clients diversification, primarily among U.S. large capitalization companies oriented towards growth. Equities are selected partially through a proprietary screening mechanism utilizing an augmented version of the Porter Five Forces Model. The Eqis proprietary Model explains how market structures determine the intensity of competition. We invest in firms that face less competition and thus have prospects for greater long term profits. The Porter Five Forces Model considers five sources of competition: customers demanding lower prices, suppliers demanding higher prices, substitute products providing alternatives, direct competitors cutting prices and increasing quality, and potential entrants increasing direct competition. An additional consideration is technological innovation which influences the five forces. Eqis places an emphasis on a long-term buy and hold approach. When selecting individual equities Eqis also takes into consideration the industry in the interest of maintaining diversification to maximize risk adjusted returns.

Financial Trust Asset Management / American Disciplined LCG

The American Disciplined Equity Strategy invests in the highest rated stock within each of the 12 industry sectors of the Standard & Poor's 500. Stocks within each sector are ranked according to FTAM's proprietary rating system which compares the companies in 3 broad areas. Their Earnings Momentum index ranking compares each company's revenue and net income growth in each of the last 3 years. The profitability + quality index ranking compares profitability and quality factors such as return on equity, return on assets, profit margin, and financial leverage. Their Value Momentum index ranking compares valuation and momentum, rating each stock by low price to sales ratio and high 1 year, 3 month, and 1 month momentum factors. The scores are then combined to come up with an overall rating. The ADE portfolio is invested on an equally weighed basis in the top 20% of the stocks in each industry sector with industry weights that are kept equal to the S&P 500. On a quarterly basis the portfolio is rebalanced.

Hanseatic Management Services, Inc /Hanseatic LCG

Managers use a multi-time dimensional system that identifies large-cap stocks whose emergent price trends have better than normal probability of persisting into the 6-36 month target holding period with positive alpha. Lower time dimension patterns are then used to identify shorter term entry and exit points. Research has shown that time parameters in the relevant time dimensions, monthly and weekly in particular, also play an important role. It is the intersection of multi-time dimensional trend measurement and time boundaries that is the foundation of the buy-sell disciplines. The portfolio typically contains at least 100 stocks providing for diversification. Another interesting characteristic of the portfolio is its relatively low correlation with indexes in its asset class. Since 1991 Hanseatic has applied proprietary quantitative buy and sell disciplines to manage equity portfolios' returns, risk, and structure. Their buy disciplines provide a consistent stock selection process that is adaptable to varying market environments.

Laidlaw Group / Laidlaw Group LCG

The Laidlaw Group's Large Cap Value portfolio focuses investments in companies with the following characteristics: high cash flow to market value ratio, high asset to debt ratio, profitability, and growth potential. Close attention is also paid to the sectors in which firms operate. The management may overweigh or underweigh sectors based on their analysis of economic trends. The Laidlaw Group is a family business founded by Robert Laidlaw and his son David. Robert, the current Chairman, is an industry veteran who began his career on the floor of the New York Stock Exchange in 1958 after graduating from Yale, with a degree in philosophy.

His nearly 50 years of industry experience provide the foundation from which the Laidlaw Group excels.

Martin Investment Management, LLC / Martin Quality Growth

Martin Investment Management, LLC of Evanston, Illinois is an employee-owned, SEC-registered equity investment adviser and the winner of numerous industry distinctions including "Equity Manager of the Year" at Opal's 2008 Emerging Manager Conference and was a finalist for the same award in 2009, "Notable Outperformer" in a study entitled "Women Owned Firms" by Altura Capital in February 2009, Top Ten Performer in the Informa Investment Solutions's PSN Investment Manager Database for the eighth time in the last fourteen quarters ending December 31, 2009.

Our "Best Ideas" Long Term Growth strategy typically contains 20-30 of 2,000 stocks that are screened for high returns on invested capital, projected long-term growth, strong cash flow and capital structure. Stocks selected for portfolios should ideally have understandable business, distinct strategies, products, and services, growing earnings and sales, and strong competitive positions. Turnover has averaged about 20% annually. A stock is sold if the company's fundamentals decline, the valuation becomes excessive, the position becomes too large, or more attractive ideas are found.

Patrick Martin is the founder, a managing director, and the primary portfolio manager. His educational accomplishments include an A.B. in economics from Dartmouth College in 1972 and an M.B.A. from Dartmouth's Amos Tuck School in 1974. He holds the professional designations of Chartered Financial Analyst (CFA) and Certified Public Accountant (CPA). Mr. Martin is a member of the CFA Society of Chicago and the CFA Institute.

Sandra Martin and Mary Ellen Zellerbach assist in managing the firm's strategy. Ms. Martin has been a Managing Director since 2003. She holds an A.B. from St. Xavier College, an A.M. from the University of Illinois and an M.B.A. from Loyola University of Chicago. Ms. Zellerbach joined Martin Investment Management, LLC in 2003 after founding Mellon Capital Management. She earned an A.B. in Economics from Wellesley College and an M.B.A. from the Graduate School of Business at Stanford University.

Navellier / Global Large Cap

Navellier implements its investment philosophy through a combination of quantitative and fundamental analysis. The initial portfolio universe includes foreign listed equities and American Depositary Receipts (ADRs) with market capitalizations equal to or greater than \$1 billion and domestic stocks with market capitalizations equal to or greater than \$5 billion. Stocks must have ample liquidity in both the domestic listed market and their home market. The process begins with a computer driven analysis based on Modern Portfolio Theory. The firm calculates reward (alpha) and risk (standard deviation) characteristics for the initial universe of stocks. Trailing 52-week "alphas" are divided by trailing 52-week "standard deviations" to create a "reward/risk" ratio for each stock. These stocks are then reviewed on a fundamental basis. The fundamentals reviewed and measured are based on Navellier's proprietary analysis of what is currently "in favor" on Wall Street and the Accounting and Governance Risk rating (AGR). Stocks are ranked on both the quantitative and fundamental analyses, and the final step is the portfolio construction process, which combines country allocation, weighting of stocks, and portfolio formation. Country allocation is determined by three factors: (1) the direction of interest rates relative to other economies; (2) the level of the average reward/risk ratio for all companies in a given country relative to other countries; and (3) the country's weight in the relevant index. The portfolio is adjusted monthly based on market conditions.

James O'Leary, CFA is the lead Portfolio Manager for the Navellier Asia, Navellier Europe, and Navellier Latin America, Global Small Cap, and Global Growth strategies. He joined Navellier in 1996 and has thirty-five years of experience in the securities industry. Prior to joining Navellier, Mr. O'Leary was Managing Director at Lexington Management Corporation and a Director at Federated Investment Counseling. His B.S. in business administration is from Bowling Green State University and his M.B.A. is from the University of Cincinnati.

Sawgrass Asset Management / Sawgrass LCG Best Ideas

Sawgrass Asset Management, L.L.C. is a 100 percent employee-owned, SEC-registered investment advisor. The firm provides innovative growth equity investment management services to institutional and high net worth investors. The firm was founded on January 15, 1998 in Jacksonville, Florida, by principals Andrew Cantor, Dean McQuiddy and Brian Monroe. The firm consists of a core group of key investment professionals who have worked together for more than 20 years. The core investment team of portfolio managers, equity traders, and client service professionals came to Sawgrass from Barnett Capital Advisors, Inc. and have been with the firm since its inception.

Windward Capital Management Co / CapApp

Windward Capital Management Co., based in Los Angeles, California, offers several large cap growth strategies. It has emerged as a top-rated money manager and continues to produce superior risk-adjusted performance. The firm is 100% employee-owned.

The investment process incorporates a top-down thematic approach combined with a disciplined, fundamental, bottom-up research. Thematic investing involves the

initial determination of a number of compelling cyclical and secular investment themes. After these themes are identified, rigorous financial analysis of those companies is conducted at the individual company level.

Our portfolios display the following fundamental characteristics:

Quality: Dominant companies displaying financial strength within their economic sector. These are leading companies with best-in-class managements, high incremental returns on invested capital, and business models with sustainable competitive advantages.

Growth: Companies with predictable and sustainable above-average growth in revenue, earnings, and free cash flow.

Value: Companies that are undervalued on either an absolute or relative basis, based upon our projections of future cash flow and earnings.

Robert Nichols, Ph.D. is the founder, Chief Executive Officer, and Portfolio Manager of Windward Capital Management Co. For the twenty-one years prior to founding Windward (1971 to 1992), he was President of the Roley, Nichols Capital Group, Inc., in Los Angeles. While at the firm, he was President of RNC Capital Management where he managed more than \$1.25 billion in portfolios of taxable, municipal, corporate and multi-employer retirement plans and foundation clients. In addition to his corporate responsibilities, he was a senior member of the Investment Policy Committee and Research Committee. In 1990, he and his partners sold the firm to an Austrian bank. His academic degrees include a Ph.D. in Management from the Claremont Graduate School's Drucker School of Business.

Donald Bessler, CPA, Chief Investment Officer and Portfolio Manager, came to Windward Capital Management Co. from First American Capital Management where he was a Senior Portfolio Manager/Senior Vice President. Prior to First American Capital Management, he was a Principal and the Director of Research at Roxbury Capital Management LLC, a \$14 billion asset management firm in Los Angeles. As Director of Research and a voting member of the Investment Committee, he supervised a team of six Equity Research Analysts in addition to personally managing more than \$1 billion in client assets. He was also responsible for managing the Roxbury Special Situations Portfolio and the Special Situations Hedge Fund. Mr. Bessler began his career as a Certified Public Accountant and attained the level of Audit Manager with the accounting firm Price Waterhouse. Mr. Bessler graduated *summa cum laude* from Lehigh University with a B.S. in Finance, a B.S. in Accounting, and a B.A. in Psychology.

Large Cap Value Model Portfolios-Benchmarked to the Russell 1000 Value Index

Advisor Partners / AP US High Dividend Yield LCV

The U.S. Equity High Dividend Tax Managed Index Strategy seeks to maximize after-tax returns while maintaining risk characteristics similar to the broad U.S. equity market through a managed portfolio of individual securities. The portfolio's benefits include diversification across sectors combined with tax efficiency. Tax efficiency is achieved by selecting tax efficient vehicles and/or through active tax management. The sectors with the greatest representations within the portfolio tend towards finance, information technology, and industrials. Advisor Partners is an investment management firm specializing in providing customized, tax-managed, index-based investment solutions for advisors and their clients. The average industry tenure of the principals exceeds two decades and contributes to their depth of investment judgment and expertise. They are privately owned and managed by the principals.

Egis Capital Management / Egis Large Cap Value

Egis Large Cap Value is managed to provide clients diversification primarily among U.S. large capitalization companies oriented toward value. This portfolio often features investments in consumer staples, financial, or manufacturing sectors. Equities are selected partially through a proprietary screening mechanism utilizing an augmented version of the Porter Five Forces Model. The Egis Proprietary Model explains how market structures determine the intensity of competition. We invest in firms that face less competition and thus have prospects for greater long-term profits. The Porter Five Forces Model considers five sources of competition: customers demanding lower prices, suppliers demanding higher prices, substitute products providing alternatives, direct competitors cutting prices and increasing quality, and potential entrants increasing direct competition. An additional consideration is technological innovation which influences the five forces. Egis places an emphasis on a long term buy and hold approach. When selecting individual equities Egis also takes into consideration the industry in the interest of maintaining diversification to maximize risk adjusted returns.

Golub Group LLC / Golub Group Equity

The Golub Group of San Mateo, California has managed the wealth of high-net-worth individuals and institutions since 2003. The six investment professionals and 12 client service and operations professionals own 100% of the Golub Group that managed approximately \$600 million in total assets as of December 31, 2009.

The large cap value portfolio typically invests in 30-35 companies with strong cash flows, solid balance sheets, histories of consistent profitability, high returns on equity, successful and proven management teams, the capacity to pay and raise dividends, and honest reporting of financial results. Securities are purchased when we think they are temporarily undervalued relative to their intrinsic values. Estimated intrinsic values are triangulated using several valuation techniques, including discounted cash flow models, dividend discount models, net asset value models, sum-of-the-parts models and comparing standard multiples, such as P/E,

P/B, EV/EBITDA, etc., to peer companies and historical trends. The average market capitalization of our equity holdings is approximately \$100 billion. Typical portfolio turnover is low, averaging between 20-25% annually. Golub Group Equity Composite has outperformed the S&P 500 in seven of the past eight years and achieved a Morningstar™ Overall 5-Star rating.

The six-person Investment Committee has decades of cumulative experience. Michael Golub, the firm's founder, leads the Investment Committee and has over 40 years' investing experience. Colin Higgins, President and Director of Research, has 13 years' experience as a portfolio manager and research analyst. In addition, the team consists of Kurt Hoefer, CFA (19 years' experience), Tim Rich, CFA (11 years' experience), John Dowling, CFA (11 years' experience) and Dave Ogburn (12 years' experience). There has been no turnover in the Investment Committee since the firm's inception.

Loudon Investment Management, LLC / LIM Equity Income

Since its founding in 2003, Loudon Investment Management (LIM) has implemented its thorough and unique investment process that contains three overlays: statistical, fundamental and thematic.

Objective Statistical analysis – All stocks considered for purchase must pass several tests, the most important of which is that at the time of purchase, the current dividend yield for every stock must exceed the market yield and be considerably higher than its average yield of the past 4-5 years. Thus, we do not just buy high-yielding stocks but only those whose yields are historically high because either the dividends have risen faster than the stock price or the stock price has declined to a level that substantially increases the current yield relative to its own history.

Subjective fundamental analysis is oriented toward the long term. It specifically concentrates on the potential growth and health of the business over a full market cycle. We are primarily high-quality, large company investors.

Subjective thematic analysis of macro industry trends may lead to substantial over or under weightings of sectors relative to the general stock market, but security and company specific hurdle must still be met.

The application of the above principles currently results in portfolios with equity income yields of about 4.0% characterized by "unbalanced" diversification and below-average equity volatility. Investments are long term in nature with an average turnover rate of around 20%. The investment horizon is open-ended, but if the price of an individual stock moves up at a rate well ahead of its fundamental progress as measured by cash flow and a declining income yield, we are perfectly willing to realize the gain. The process is repeated by buying another high-quality depressed issue producing current income above both the general stock market and also what we have sold. Over time, this discipline ratchets up the growth in current income production and the investment performance versus what it would have been were we just buy and hold investors.

LIM's equity income style was founded by Douglas M. Loudon. Mr. Loudon began his investment career at Scudder Stevens & Clark in New York in 1971. He was named a General Partner in 1982 and became a Managing Director when the firm incorporated in 1985. In 1986, he was named Investment Director for the American Association of Retired Persons' (AARP) Investment Program. This program consisted of a group of mutual funds concentrating on producing competitive investment returns with below-average investment risk, the same approach that is employed by LIM today. Early in 2003, Mr. Loudon formed LIM to more fully implement the approach he had developed over many years. Mr. Loudon holds a B.A. in Economics from the University of North Carolina and an M.B.A. in Financial Management from Pace University and is a Chartered Financial Analyst.

Texas First Investment Management Company / Texas First LCV

Texas First Investment Management Company has provided significant equity returns with relatively low risk by combining a long term, conservative, and value-oriented approach with an unparalleled expertise acquired by investing solely in Texas-based publicly-held companies. The stock selection criteria include, but are not limited to, value measures of sustainable earnings, sustainable cash flow, and adjusted book value. Potential catalysts to unleash value are also critical considerations. Holdings are carefully diversified among industries. Money Manager Review rated the Large Cap Value portfolio as the top performing large cap value portfolio in the country, for the 5 year period 2001 – 2005. It has outperformed the S&P 500 for seven consecutive years, with below-average risk. During no calendar year has the portfolio ever lost money.

Tom Johnson Investment Management, Inc. / TJIM LCV

The goal of the TJIM Core/Relative Value Stock Portfolio is to maximize total return over a business cycle. We believe in creating a prudent, well-diversified, high-quality portfolio that addresses capital preservation and risk. The focus is on purchasing common stock of companies that have valuations lower than their peer group in industries and sectors that provide the best opportunity in the foreseeable future. Historically, this portfolio has a blend of equity issues that match "value" and "growth" descriptions. Some consultants classify our style as core with a value bias. The portfolio will under normal circumstances contain 30 to 50 securities and is diversified across most sectors. Tax efficiency is addressed by focusing on turnover and realizing gains and losses when in general they provide the most benefit to clients under the U.S. tax code. TJIM was established in 1983 to provide independent investment management services for high net worth individuals and families, public funds, corporations, foundations, endowments, and unions throughout the United States. TJIM's conservative investment philosophy has always maintained that a quality, well-diversified portfolio that addresses both capital appreciation and capital preservation is the most prudent and consistent way

to achieve clients' investment goals. In all our efforts, we seek to provide above average returns in good markets while preserving our clients' wealth when down markets occur.

Mid Cap Growth Model Portfolios-Benchmarked to the Russell Mid Cap Growth Index

Egis Capital Management / Egis Mid Cap Growth

Egis Mid Cap Growth is managed to provide clients diversification among U.S. mid capitalization companies primarily oriented towards growth. Many of these stocks are found in the volatile technology, health-care, and services sectors. Equities are selected partially through a proprietary screening mechanism utilizing an augmented version of the Porter Five Forces Model. The Egis Proprietary Model explains how market structures determine the intensity of competition. We invest in firms that face less competition and thus have prospects for greater long-term profits. The Porter Five Forces Model considers five sources of competition: customers demanding lower prices, suppliers demanding higher prices, substitute products providing alternatives, direct competitors cutting prices and increasing quality, and potential entrants increasing direct competition. An additional consideration is technological innovation which influences the five forces. Egis places an emphasis on a long-term buy and hold approach. When selecting individual equities, Egis also takes into consideration the industry in the interest of maintaining diversification to maximize risk adjusted returns.

Gaineswood Investment Management, Inc. / Gaineswood Standard

Gaineswood Investment Management, Inc. began in 1995 as a publisher of small and mid cap equity research for the institutional investment marketplace. The firm has 10 employees, 5 of whom are analysts whose work is utilized by the firm's portfolio manager and founder, William Baker, CFA. The analysts and manager have a fundamental investment process known as "Persistent Growth Investing," which stresses long-term growth drivers and competitive advantages when selecting stocks. Meticulous investigative research and modeling is used to gain a complete understanding of investments. Institutions, family offices, registered investment advisors, and high-net-worth individuals benefit from Gaineswood's expertise and independence as a private, founder-owned corporation that is not affiliated with a major investment broker or advisor. The affiliates of Gaineswood Investment Management, Inc. are its research broker-dealer, GARP Research & Securities Co. (founded 2003) and the general partner of its private limited partnership, GARP Capital LLC (founded in late 1999). GARP Research & Securities Co. serves the professional money management sector.

The portfolios within the Standard composite seek investment in companies capable of substantial earnings growth over multiple years. Turnover of positions is limited and very long-term. Gaineswood's Standard composite of portfolios contains 30-50 common stocks, generally with a market cap between \$500 million and \$10 billion. Position sizes are usually between 2% and 3%, with some at 5%. The broadly-defined medical and technology sectors are habitually well-represented, but others can be significant depending upon fundamentals. Cash can be 10% but is usually lower. Derivatives are not used in this strategy.

Before founding Gaineswood, William Baker, CFA previously managed in excess of \$100 million for nine years at Oppenheimer Mutual Funds, and earlier was an analyst at what is now Van Kampen Investments. Mr. Baker received an M.B.A. from the Amos Tuck School (Dartmouth College) in 1980 and a B.A. from the University of Pennsylvania in 1978.

Hanseatic Management Services, Inc. / Hanseatic MCG

Managers use a multi-time dimensional system that identifies mid-cap stocks whose emergent price trends have better than normal probability of persisting into the 6-36 month target holding period with positive alpha. Lower time dimension patterns are then used to identify shorter term entry and exit points. Research has shown that time parameters in the relevant time dimensions, monthly and weekly in particular, also play an important role. It is the intersection of multi-time dimensional trend measurement and time boundaries that is the foundation of the buy-sell disciplines. The portfolio typically contains at least 100 stocks providing for diversification. Another interesting characteristic of the portfolio is its relatively low correlation with indexes in its asset class. Since 1991 Hanseatic has applied proprietary quantitative buy and sell disciplines to manage equity portfolios' returns, risk, and structure. Their buy disciplines provide a consistent stock selection process that is adaptable to varying market environments. Returns displayed are based on a backtest of this methodology and are hypothetical. No assets were actually invested using this methodology during the backtest period.

StoneRidge Investment Partners, LLC / StoneRidge Mid Cap Growth

The StoneRidge Small to Mid (SMID) Cap Growth Equity Portfolio seeks to outperform the Russell 2500 Growth Index. StoneRidge believes in a blend of fundamental research, quantitative tools, and qualitative judgments are required to consistently add value in equity investment management. The investment process employed by StoneRidge is built upon a team of six sector specialists performing intensive fundamental equity research. This bottom-up, fundamental investment process is supported by a proprietary, multi-factor screening tool, the purpose of which is to narrow the scope of the investment universe to the most attractive candidates, upon which to perform detailed fundamental analysis. This quantitative tool also provides an ongoing objective analysis of StoneRidge's existing portfolio. The SMID investment universe is comprised of stocks with market capitalizations between \$500 million and \$10 billion as well as those stocks which are constituents

of the Russell 2500 Growth Index. The proprietary, quantitative tool screens and then ranks this universe of over 2400 U.S. stocks. The goal of the screening tool is to narrow opportunities to a focused list of stocks that possess the characteristics most likely to lead to superior investment performance. StoneRidge's screening tool is constructed around five broad factors which are critical to predicting future stock performance: earnings momentum, valuation, technical condition, accounting/financials, and insider activity. Each stock is ranked relative to the entire SMID universe; the result is a list of companies with the most attractive combination of attributes. These stocks are then subjected to in-depth fundamental research by our team of sector specialists.

Tributary Capital Management /Tributary MCG

An average earnings growth rate for the previous five years that exceeds the benchmark is a primary criterion for equity selection into the Tributary Mid Cap Growth portfolio. All fundamental factors play a role in the valuing of a company for investment, but the price-to-earnings ratio provides the most visible, universally applied metric. Our approach avoids absolute concentrations in individual industry sectors, attempting on an absolute basis to keep allocations to individual industries and economic sectors as low as possible. Some of the fundamental factors include revenue, cash flow, and earnings growth. Tributary Capital Management seeks to maximize long-term total return with appropriate diversification into market sectors to reduce risk. Our style of equity investing emphasizes growth companies in a broad range of industries and does not believe in sector speculation. Stocks are selected using a "bottom-up" process rather than relying entirely on information that Wall Street has developed. This fundamental research predominantly defines a universe of medium sized companies (approximately \$1 to \$15 billion in market cap) from which portfolios are constructed. Our approach takes into consideration intrinsic value, profitability, current valuation, and growth potential. Intrinsic value measures include cash flow, growth in revenue, and gains in market share among others. Active portfolio management, based on intensive, original research, can add value by limiting risk and increasing investment returns.

Mid Cap Value Model Portfolios-Benchmarked to the Russell Mid Cap Value Index

Ativo Capital Management / Ativo Mid

Ativo's goal is to recognize Mid Cap firms that earn significantly more than their cost of capital as it is these earnings that drive growth in shareholder value and stock price. Firms that don't earn their cost of capital destroy shareholder value. An accurate residual income model is key to implementing this approach. Our model incorporates discounted cash flow return on investment, cost of capital, and growth and life cycle theory. Each week Ativo converts 13,000 stocks GAAP financial statements to cash based statements. More than 50 adjustments are made in this process. Correction for pension liabilities, option values, and lease capitalizations are just a few. Cost of capital is calculated using a company's size, risk, industry, and other factors. Ativo is a Portuguese word that means both "active" and "assets" - together they illustrate their approach to the management of equity portfolios. Ativo develops portfolios based on a history of quantitative securities research covering nearly four decades that is the basis for a stable and consistent investment philosophy. They start with sound financial theory. Then this theory is applied to real-time experiments in actual markets to develop investment rules that transcend specific market conditions. Consistently applied, these rules pick the stocks for our portfolios. Ativo combine cutting-edge financial theory and clear objectives that are integrated into quantitative models that drive portfolio composition. The results are impressive and are consistent over time.

Cloud Neff / CNM Quant Value

The CN Quantitative value fund equally targets income generation and long term growth by screening stocks according to proprietary valuation measures. This "deep value portfolio" provides a very high dividend by purchasing equities in any industry, though holdings are often concentrated in energy, financial, utility, and real estate. The portfolio tends to have a low tracking correlation with its peer group and benchmark index, due to both its deep value approach and industry concentration. Typically, about 70 stocks are owned and turnover is approximately 70% per annum.

Egis Capital Management / Egis Mid Cap Value

Egis Mid Cap Value is managed to provide clients diversification primarily among U.S. mid capitalization companies oriented toward value. Many of their holdings come from financial and industrial sectors. Equities are selected partially through a proprietary screening mechanism utilizing an augmented version of the Porter Five Forces Model. The Egis Proprietary Model explains how market structures determine the intensity of competition. We invest in firms that face less competition and thus have prospects for greater long-term profits. The Porter Five Forces Model considers five sources of competition: customers demanding lower prices, suppliers demanding higher prices, substitute products providing alternatives, direct competitors cutting prices and increasing quality, and potential entrants increasing direct competition. An additional consideration is technological innovation which influences the five forces. Egis places an emphasis on a long-term buy and hold approach. When selecting individual equities Egis also takes into consideration the industry in the interest of maintaining diversification to maximize risk adjusted returns.

Financial Trust Asset Management / ValueMomentum Leaders MCV

The Value Momentum Leaders Strategy invests in the top 50 stocks that comprise the Value Momentum index. The Value Momentum index rates stocks according to three factors: low Price/Sales ratio, 1-month relative strength, and 1-week relative strength. In addition, the stocks must have a price to sales ratio that is at least 10% less than the average price to sales of the S&P 500. Companies must also have current quarterly earnings that are higher than the same quarter in the previous year. The portfolio is equally weighed among the top 50 stocks. The portfolio is reweighed and rebalanced on a monthly basis. Quantitative research underlies the impressive performance of Financial Trust Asset Management.

Fraser Management Associates / Fraser Contrarian SMA

Fraser Management Associates applies a unique contrarian discipline to produce superior long-term investment results for institutions and private clients. Their unique headquarters in Burlington, Vermont is consistent with their independent thinking. Since their founding in 1969, investment management has been their sole focus and passion. The team has been tempered by sixty-eight years of combined investment management experience. Client value is created by identifying overlooked and under-appreciated trends. Human behavior, market psychology, global trends, and industry dynamics are studied to identify securities poised to profit. Some of the themes guiding current investments are long-term climate change, water scarcity, Hispanic migration, and consolidation within the financial services industry. After theme or trends are identified, the focus narrows to select the specific securities best positioned to capitalize on them. The top down methodology, from general trend to specific security, tends to concentrate the portfolio in a few sectors. Largely due to this concentration, the portfolio has a very low correlation with other money managers and the stock market indexes. The portfolio typically contains 30 to 35 value type stocks with a Median market capitalization of \$2 billion. Historically, turnover has been a low 25% annually, meaning on average securities are held about four years.

Retirement Wealth Advisors / Mid Cap Formula

RWA (Retirement Wealth Advisors) Mid Cap FormulaFolio is a quantitatively managed portfolio of individual equities and cash equivalents. RWA, Inc.'s proprietary step-by-step mechanical approach to selecting positions eliminates emotional trading and is designed to only select above average positions based on both fundamental and macro economic indicators. The portfolio is an individual equity portfolio that uses top-down fundamental analysis to choose only positions that currently and continuously rank highly using a quantitative model developed by RWA. In addition to the fundamental analysis, there is also a macro economic model used to determine the overall percentage of equities in the portfolio to minimize short-term risk and enhance long-term returns.

Due to risk management processes contained within the quantitative models, the portfolio may not be fully invested at all times.

Mr. Wenk's firm, Retirement Wealth Advisors, Inc. is currently the #1 Ranked Private Asset Management firm in the State of Michigan and #8 in the United States by Money Manager Review*. The ranking; based on return, risk and risk adjusted return, is compared to industry giants such as Goldman Sachs, Alliance Bernstein, Oppenheimer Investments, Baird Asset Management, T. Rowe Price and a number of high profile West Michigan managers. Mr. Wenk has been featured in The Grand Rapids Press, numerous industry specific magazines and has been invited as guest speaker to area colleges. In addition, he has taught educational seminars to over 2,500 investors in West Michigan. In 2007 and 2008 Reuters listed Mr. Wenk as one of the United States' top 500 financial advisors (with only one other advisor from West Michigan on the list) and in 2008 was named by Reuters as one of the Top Advisors Under 40 as well as one of the Top Advisors with Retirement Focus. Retirement Wealth Advisors, Inc. is headquartered in West Michigan (offices in Grand Rapids and Spring Lake) and is an SEC Registered Investment Advisory Firm.

Small Cap Growth Model Portfolios-Benchmarked to the Russell 2000 Growth Index

Egis Capital Management / Egis Small Cap Growth

Egis Small Cap Growth is managed to provide clients diversification primarily among U.S. small capitalization companies oriented towards growth. Many of these stocks are in the technology, health-care, and services sectors. Because these businesses are fast-growing and often richly valued, their stocks tend to be volatile, but often can provide for some of the most explosive returns. Equities are selected partially through a proprietary screening mechanism utilizing an augmented version of the Porter Five Forces Model. The Egis Proprietary Model explains how market structures determine the intensity of competition. We invest in firms that face less competition and thus have prospects for greater long-term profits. The Porter Five Forces Model considers five sources of competition: customers demanding lower prices, suppliers demanding higher prices, substitute products providing alternatives, direct competitors cutting prices and increasing quality, and potential entrants increasing direct competition. An additional consideration is technological innovation which influences the five forces. Egis places an emphasis on a long-term buy and hold approach. When selecting individual equities Egis also takes into consideration the industry in the interest of maintaining diversification to maximize risk adjusted returns.

Hanseatic Management Services, Inc. / Hanseatic SCG

Managers use a multi-time dimensional system that identifies small-cap stocks whose emergent price trends have better than normal probability of persisting into the 6-36 month target holding period with positive alpha. Lower time dimension patterns are then used to identify shorter term entry and exit points. Research has shown that time parameters in the relevant time dimensions, monthly and weekly in particular, also play an important role. It is the intersection of multi-time dimensional trend measurement and time boundaries that is the foundation of the buy-sell disciplines. The portfolio typically contains at least 100 stocks providing for diversification. Another interesting characteristic of the portfolio is its relatively low correlation with indexes in its asset class. Since 1991 Hanseatic has applied proprietary quantitative buy and sell disciplines to manage equity portfolios' returns, risk, and structure. Their buy disciplines provide a consistent stock selection process that is adaptable to varying market environments.

Laidlaw Group / Laidlaw Group SCG

The Laidlaw Group's, Small Cap Value portfolio focuses investments in companies with the following characteristics: high cash flow to market value ratio, high asset to debt ratio, profitability, and growth potential. Close attention is also paid to the sectors in which firms operate. The management may overweigh or underweigh sectors based on their analysis of economic trends. The Laidlaw Group is a family business founded by Robert Laidlaw and his son David. Robert, the current Chairman, is an industry veteran who began his career on the floor of the New York Stock Exchange in 1958 after graduating from Yale, with a degree in philosophy. His nearly 50 years of industry experience provide the foundation from which the Laidlaw Group excels.

Navellier / Global Small Cap

Navellier implements its investment philosophy through a combination of quantitative and fundamental analysis. The initial portfolio universe includes foreign listed equities and American Depositary Receipts (ADRs) with market capitalizations equal to or less than \$5 billion and domestic stocks with market capitalizations between \$200 million and \$2 billion. Stocks must have ample liquidity in both the domestic listed market and their home market. The process begins with a computer driven analysis based on Modern Portfolio Theory. The firm calculates reward (alpha) and risk (standard deviation) characteristics for the initial universe of stocks. Trailing 52-week "alphas" are divided by trailing 52-week "standard deviations" to create a "reward/risk" ratio for each stock. These stocks are then reviewed on a fundamental basis. The fundamentals reviewed and measured are based on Navellier's proprietary analysis of what is currently "in favor" on Wall Street and the Accounting and Governance Risk rating (AGR). Stocks are ranked on both the quantitative and fundamental analyses, and the final step is the portfolio construction process, which combines country allocation, weighting of stocks, and portfolio formation. Country allocation is determined by three factors: (1) the direction of interest rates relative to other economies; (2) the level of the average reward/risk ratio for all companies in a given country relative to other countries; and (3) the country's weight in the relevant index. The portfolio is adjusted monthly based on market conditions.

James O'Leary, CFA is the lead Portfolio Manager for the Navellier Asia, Navellier Europe, and Navellier Latin America, Global Small Cap, and Global Growth strategies. He joined Navellier in 1996 and has thirty-five years of experience in the securities industry. Prior to joining Navellier, Mr. O'Leary was Managing Director at Lexington Management Corporation and a Director at Federated Investment Counseling. His B.S. in business administration is from Bowling Green State University and his M.B.A. is from the University of Cincinnati.

Sawgrass Asset Management / Sawgrass SCG Best Ideas

Sawgrass Asset Management, L.L.C. is a 100 percent employee-owned, SEC-registered investment advisor. The firm provides innovative growth equity investment management services to institutional and high net worth investors. The firm was founded on January 15, 1998 in Jacksonville, Florida, by principals Andrew Cantor, Dean McQuiddy and Brian Monroe. The firm consists of a core group of key investment professionals who have worked together for more than 20 years. The core investment team of portfolio managers, equity traders, and client service professionals came to Sawgrass from Barnett Capital Advisors, Inc. and have been with the firm since its inception.

Small Cap Value Model Portfolios-Benchmarked to the Russell 2000 Value Index

Advisor Partners / Small Cap Value

The Advisor Partners' U.S. Equity Small Cap Value Index Strategy mimics the returns of the small cap U.S. equity market as represented by the S&P Small Cap 600 Value index. The Strategy captures the index's risk characteristics and sector diversification using a managed portfolio of individual securities. The sectors with the greatest representations within the portfolio tend towards Financials, Industrials, Consumer Discretionary and Information Technology. Advisor Partners is an investment management firm specializing in providing customized, tax-managed, index-based investment solutions for advisors and their clients. The average industry tenure of the principals exceeds two decades and contributes to their depth of investment judgment and expertise.

Andrew Rudd, the Chairman, and Jim Blachman, the Chief Investment Officer are members of Advisor Partners' Investment Management Committee. Dr. Rudd, a finance industry veteran, holds a Ph.D. from UC Berkeley and co-founded BARRA

Inc. Jim Blachman holds a master's degree in economics from UC Berkeley. His investment career spans 20 years. He is a CFA charterholder.

Ativo Capital Management / Ativo Small Dynamic Select SCV

Ativo's goal is to recognize Small Cap firms that earn significantly more than their cost of capital since it is these earnings that drive growth in shareholder value and stock price. Firms that don't earn their cost of capital destroy shareholder value. An accurate residual income model is key to implementing this approach. Our model incorporates discounted cash flow return on investment, cost of capital, and growth and life cycle theory. Each week Ativo converts 13,000 stocks GAAP financial statements to cash based statements. More than 50 adjustments are made in this process. Correction for pension liabilities, option values, and lease capitalizations are just a few. Cost of capital is calculated using a company's size, risk, industry, and other factors. Ativo is a Portuguese word that means both "active" and "assets" - together they illustrate their approach to the management of equity portfolios. Ativo develops portfolios based on a history of quantitative securities research covering nearly four decades that is the basis for a stable and consistent investment philosophy. They start with sound financial theory. Then this theory is applied to real-time experiments in actual markets to develop investment rules that transcend specific market conditions. Consistently applied, these rules pick the stocks for our portfolios. Ativo combine cutting-edge financial theory and clear objectives that are integrated into quantitative models that drive portfolio composition. The results are impressive and are consistent over time.

BirdRock Asset Management, LP / BirdRock Small Cap Value

BirdRock Asset Management is a value-oriented, independent registered investment advisor. As a fee-only firm, our interests are closely aligned with those of our clients. We begin with the premise that trust, integrity and objective financial advice are the hallmarks of a successful financial relationship. Our mission is to help our clients achieve their goals through vigilant financial research, disciplined planning and continuous review. Our portfolio management team has combined investment experience of over 22 years, and an outstanding performance track record.

Our investment philosophy for the BirdRock Small Cap Value portfolio is based on the theory that value investing (buying companies trading at what we believe to be a discount to their future value) provides investors with long-term rewards as well as risk mitigation during times of market turbulence. While we believe that the market is fairly efficient at discounting current information, this is not always the case, especially with regard to smaller market cap securities. To exploit these inefficiencies and add value through active management, we believe one must take a contrarian approach to information that may be interpreted differently and perhaps incorrectly by other interested parties.

As we begin our search for the underappreciated, misunderstood, or simply overlooked securities, our approach is to dig deep by using quantitative, qualitative, and empirical data to help us add alpha for our clients. The essence of BirdRock Asset Management's value investment style is to buy stocks at less than their intrinsic value. Our extensive research process evaluates a company's intrinsic value through cash flow and book value comparison, financial statements, financial health, competitive advantages, management, and market competition.

Steve Levy is the lead portfolio manager for the BirdRock Small Cap Value and serves as President of BirdRock Asset Management. He is responsible for overseeing the Small Cap Value and Large Cap Value portfolios and is a member of the Investment Committee. Mr. Levy began his career as a reinsurance analyst with The JI Companies in Austin, Texas before joining Janus Capital in 1999. He served on the Investment Committee of Slaughter & Associates for five years and has managed the Small Cap Value portfolio since its inception in January of 2004.

Mr. Levy has an undergraduate degree in Political Science and Spanish with an emphasis in International Relations from San Diego State University, and studied emerging markets, economics and U.S. Foreign Policy in Latin America at the Universidad Colegio Anahuac in Guadalajara, Mexico in 1986-87. Mr. Levy holds an Accredited Wealth Management Advisor (AWMA) designation from the College for Financial Planning.

Egis Capital Management / Egis Small Cap Value

Egis Small Cap Value is managed to provide clients diversification primarily among U.S. small capitalization companies oriented toward value. Investments tend towards the manufacturing and financial sectors. Equities are selected partially through a proprietary screening mechanism utilizing an augmented version of the Porter Five Forces Model. The Egis Proprietary Model explains how market structures determine the intensity of competition. We invest in firms that face less competition and thus have prospects for greater long term profits. The Porter Five Forces Model considers five sources of competition: customers demanding lower prices, suppliers demanding higher prices, substitute products providing alternatives, direct competitors cutting prices and increasing quality, and potential entrants increasing direct competition. An additional consideration is technological innovation which influences the five forces. Egis places an emphasis on a long-term buy and hold approach. When selecting individual equities Egis also takes into consideration the industry in the interest of maintaining diversification to maximize risk adjusted returns.

Texas First Investment Management Company / Texas First SCV

Texas First Investment Management Company has provided significant equity returns with relatively low risk by combining a long term, conservative, and value-oriented approach with an unparalleled expertise acquired by investing solely in

Texas-based publicly-held companies. The stock selection criteria include, but are not limited to, value measures of sustainable earnings, sustainable cash flow, and adjusted book value. Potential catalysts to unleash value are also critical considerations. Holdings are carefully diversified among industries. The Small Cap Value portfolio ranked among the top ten in the country over the 5 year period 2001 – 2005. It has outperformed the Russell 2000 small-cap index for six of the previous seven years, with below-average risk.

Egis Utilities Model Portfolio- Benchmarked to the Dow Jones USA (US) (Dev) Utilities (7000) Broad US dollar Index

Egis Capital Management/ Egis Utilities Model Portfolio

Egis Utilities is managed to provide clients diversification primarily among US utilities stocks of all capitalizations. Utility stocks are usually some combination of U.S. power, telecommunications, and water companies. These stocks usually represent a more stable investment with less emphasis placed on growth and more on dividends. Equities are selected partially through a proprietary screening mechanism utilizing an augmented version of the Porter Five Forces Model. The Egis Proprietary Model explains how market structures determine the intensity of competition. We invest in firms that face less competition and thus have prospects for greater long term profits. The Porter Five Forces Model considers five sources of competition: customers demanding lower prices, suppliers demanding higher prices, substitute products providing alternatives, direct competitors cutting prices and increasing quality, and potential entrants increasing direct competition. An additional consideration is technological innovation which influences the five forces. Egis places an emphasis on a long term buy and hold approach. When selecting individual equities Egis also takes into consideration the industry in the interest of maintaining diversification to maximize risk adjusted returns.

Asian Model Portfolio-Benchmarked to the Dow Asia Pacific (P1) Aggregate Index Broad US Dollar Index

Egis Capital Management / Egis Asia

Egis Asia is managed to provide clients diversification primarily among Asian stocks of all capitalizations through investing in ADR's. Equities are selected partially through a proprietary screening mechanism utilizing an augmented version of the Porter Five Forces Model. The Egis Proprietary Model explains how market structures determine the intensity of competition. We invest in firms that face less competition and thus have prospects for greater long-term profits. The Porter Five Forces Model considers five sources of competition: customers demanding lower prices, suppliers demanding higher prices, substitute products providing alternatives, direct competitors cutting prices and increasing quality, and potential entrants increasing direct competition. An additional consideration is technological innovation which influences the five forces. Egis places an emphasis on a long-term buy and hold approach. When selecting individual equities Egis also takes into consideration the industry in the interest of maintaining diversification to maximize risk adjusted returns.

Financial Trust Asset Management / Asia ValueMomentum

The Asia Value Momentum Strategy invests in the top 20 stocks that comprise the Asia Value Momentum index. The Asia Value Momentum index rates stocks according to three factors: low Price/Sales ratio, 1-month relative strength, and 1-week relative strength. The Asia Value Momentum strategy invests only in ADR's (American Depositary Receipts) of Asian companies that trade on U.S. exchanges. Companies must also have current quarterly earnings which are higher than the same quarter in the previous year. The portfolio is equally weighed among the top 20 stocks. The portfolio is rebalanced on a monthly basis. Returns displayed are based on a backtest of this methodology and are hypothetical. No assets were actually invested using this methodology during the backtest period.

Hanseatic Management Services, Inc / Hanseatic Asia

Managers use a multi-time dimensional system designed to identify domestically traded Asian stocks whose emergent price trends have better than normal probability of persisting into the 6-36 month target holding period with positive alpha. Lower time dimension patterns are then used to identify shorter term entry and exit points. Research has shown that time parameters in the relevant time dimensions, monthly and weekly in particular, also play an important role. It is the intersection of multi-time dimensional trend measurement and time boundaries that is the foundation of the buy-sell disciplines. Initial position size in the portfolio is 2-3% of capital. The manager's objective is to maintain a portfolio structure that provides good diversification relative to the available universe of liquidity-screened stocks. Since 1991 Hanseatic has applied proprietary quantitative buy and sell disciplines to manage equity portfolios' returns, risk, and structure. Their buy disciplines provide a consistent stock selection process that is adaptable to varying market environments. Ed Meihaus, (BSME, University of Louisville; MBA, University of Memphis), joined Hanseatic in 1985. Since then, he has continued to develop quantitative model-based investment applications, primarily the set of disciplines which underlie the company's equity portfolios. He currently serves as the Chief Investment Officer.

Navellier / Navellier Asia

Navellier implements its investment philosophy through a combination of quantitative and fundamental analysis. The initial portfolio universe includes Asian foreign listed equities and American Depositary Receipts (ADRs) with market

capitalizations equal to or greater than \$500 million. Stocks must have ample liquidity in both the listed market and their home market.

The process begins with a computer driven analysis based on Modern Portfolio Theory. The firm calculates reward (alpha) and risk (standard deviation) characteristics for the initial universe of stocks. Trailing 52-week "alphas" are divided by trailing 52-week "standard deviations" to create a "reward/risk" ratio for each stock. These stocks are then reviewed on a fundamental basis. The fundamentals reviewed and measured are based on Navellier's proprietary analysis of what is currently "in favor" on Wall Street and the Accounting and Governance Risk rating (AGR).

Stocks are ranked on both the quantitative and fundamental analyses, and the final step is the portfolio construction process, which combines country allocation, weighting of stocks, and portfolio formation. Country allocation is determined by three factors (1) the direction of interest rates relative to other economies (2) the level of the average reward/risk ratio for all companies in a given country relative to other countries (3) the country's weight in the relevant index. The portfolio is adjusted to reflect changes on a monthly basis.

Mr. O'Leary CFA is the lead Portfolio Manager for the Navellier Asia, Navellier Europe, and Navellier Latin America strategies. He joined Navellier in 1996 and has thirty-four years of experience in the securities industry. Prior to joining Navellier, Mr. O'Leary was Managing Director at Lexington Management Corporation and a Director at Federated Investment Counseling. His B.S. in business administration is from Bowling Green State University and his M.B.A. is from the University of Cincinnati.

Mr. Mitteldorf, Portfolio Manager, joined Navellier in 1995 and has thirteen years of experience in the securities industry. After becoming an essential member of several investment teams, Navellier promoted him to Research Analyst and then Portfolio Manager. Mr. Mitteldorf received a B.S. in physiological psychology from the University of California, Santa Barbara and an M.B.A. in finance and marketing from the University of Nevada, Reno.

Navellier / Navellier Asia Ex-Japan

Navellier implements its investment philosophy through a combination of quantitative and fundamental analysis. The initial portfolio universe includes Asian Ex-Japan foreign listed equities and American Depositary Receipts (ADRs) with market capitalizations equal to or greater than \$500 million. Stocks must have ample liquidity in both the listed market and their home market. The process begins with a computer driven analysis based on Modern Portfolio Theory. The firm calculates reward (alpha) and risk (standard deviation) characteristics for the initial universe of stocks. Trailing 52-week "alphas" are divided by trailing 52-week "standard deviations" to create a "reward/risk" ratio for each stock. These stocks are then reviewed on a fundamental basis. Alternative Strategies (Alt. Strat) Model Portfolios –

Inflation Fighters:

iSectors / iSectors® Inflation Protection Allocation

iSectors® Inflation Protection Allocation: With a diversified core strategic portfolio of commodities, precious metals, inflation-protected bonds, and other investments that historically have been resistant to inflationary pressures, the iSectors® Inflation Protection Allocation offers investors a tool with which to prepare their portfolios for the possibility of inflation.

iSectors believes that the empirical evidence strongly suggests that asset allocation is the predominant factor behind the returns of any investment approach. As such, many of the iSectors models are Strategic in nature, utilizing an indexing approach within the asset allocation models. Vehicles utilized to execute the allocation process within the models are primarily low-cost, primarily index-based ETFs.

Management of iSectors Asset Allocation strategies is overseen by an investment committee of four professionals, each with significant investment, business and accounting experience along and multiple professional designations, including Prateek Mehrotra, MBA, CFA, CAIA as their Chief Investment Officer and Timothy J. Landolt, MBA as their Strategies Manager. Mr. Mehrotra holds a MBA in Finance from Lehigh University and Mr. Landolt holds a MBA from Loyola Marymount University.

Strategic:

iSectors / iSectors® Domestic 60-40 Allocation

iSectors® Domestic models are strategic asset allocation models that employ a Modern Portfolio Theory (MPT) -based approach to asset allocation. The equity portion of the models is allocated using a diversified basket of domestic, low-cost, equity index-based ETFs. The fixed income portion of the allocations is invested in diversified, low-cost ETFs that hold baskets of investment-grade domestic, government and corporate bonds of various maturities. The models, with respect to their use of ETFs and an annual rebalance process, are designed to be tax-sensitive. Moderate asset allocation strategy consists of approximately 60% domestic (U.S.-only) equities and 40% domestic fixed-income securities.

iSectors believes that the empirical evidence strongly suggests that asset allocation is the predominant factor behind the returns of any investment approach. As such, many of the iSectors models are Strategic in nature, utilizing an indexing approach within the asset allocation models. Vehicles utilized to execute the allocation process within the models are primarily low-cost, primarily index-based ETFs.

As such, many of the iSectors models are Strategic in nature, utilizing an indexing approach within the asset allocation models. Vehicles utilized to execute the allocation process within the models are primarily low-cost, primarily index-based ETFs. Management of iSectors Asset Allocation strategies is overseen by an investment committee of four professionals, each with significant investment, business and accounting experience along and multiple professional designations, including Prateek Mehrotra, MBA, CFA, CAIA as their Chief Investment Officer and Timothy J. Landolt, MBA as their Strategies Manager. Mr. Mehrotra holds a MBA in Finance from Lehigh University and Mr. Landolt holds a MBA from Loyola Marymount University.

iSectors / iSectors® Institutional 80-20 Allocation

iSectors® Institutional models employ a Modern Portfolio Theory (MPT)-based approach, with a review of Resampling, Black Litterman and Monte Carlo Simulation to optimally allocate the model portfolios. The equity portion of the models is allocated across a number of domestic, international and emerging markets index-based exchange traded funds. Fundamentally-weighted index ETFs are included in the model in an effort to enhance return and reduce volatility. The fixed income portion of each model is invested in diversified, low-cost ETFs that hold baskets of domestic, international and emerging market government and corporate bonds of various maturities. The models, with respect to their use of ETFs and an annual rebalance process, are designed to be tax-sensitive. Growth asset allocation strategy consists of approximately 80% equities and 20% fixed-income securities. iSectors believes that the empirical evidence strongly suggests that asset allocation is the predominant factor behind the returns of any investment approach. As such, many of the iSectors models are Strategic in nature, utilizing an indexing approach within the asset allocation models. Vehicles utilized to execute the allocation process within the models are primarily low-cost, primarily index-based ETFs. Management of iSectors Asset Allocation strategies is overseen by an investment committee of four professionals, each with significant investment, business and accounting experience along and multiple professional designations, including Prateek Mehrotra, MBA, CFA, CAIA as their Chief Investment Officer and Timothy J. Landolt, MBA as their Strategies Manager. Mr. Mehrotra holds a MBA in Finance from Lehigh University and Mr. Landolt holds a MBA from Loyola Marymount University.

iSectors / iSectors® Endowment 20-80 Allocation

iSectors Endowment models embrace the philosophy pursued by the managers of Endowment portfolios at institutions like Yale and Harvard, which have been aggressively allocating to "alternative investments" such as hedge funds, private equity and real assets for decades. Not only has this enabled their longer-term performance to be superior to their peer group, but also at a reduced risk level. While iSectors Endowment models are not designed to mirror the Yale asset allocation to the fullest extent, but significant allocations are made to "alternative investments" in each model of the Endowment Series. iSectors Endowment models offer investors substantial diversification to more than 50, primarily index-based securities, a significant allocation to liquid alternative asset classes, as well as traditional domestic and international equity and fixed income asset classes. Conservative allocation strategy is designed with the objective of achieving returns in excess of a simple 20-80 Equity/Fixed Income portfolio (as measured by a composite portfolio of 20% S&P 500 Index and 80% Barclays Aggregate Bond Index) over a complete market cycle, while maintaining a similar or better risk profile. This comprehensive, strategic model is enhanced by diversification into alternative asset classes and is intended to be utilized as long-term core holding.

iSectors believes that the empirical evidence strongly suggests that asset allocation is the predominant factor behind the returns of any investment approach. As such, many of the iSectors models are Strategic in nature, utilizing an indexing approach within the asset allocation models. Vehicles utilized to execute the allocation process within the models are primarily low-cost, primarily index-based ETFs. iSectors / iSectors® Post-MPT Growth Allocation

iSectors® Post-MPT Allocations utilize advancements in Modern Portfolio Theory (MPT) to allocate the portfolio among up to 9 unique, uncorrelated asset classes. In addition, iSectors also utilizes advanced, more pragmatic approaches for applying these principles of MPT. The objective of the iSectors® Post-MPT Growth Allocation is to achieve investment returns that outperform the S&P500 stock market index with lower downside risk over a complete market cycle. The portfolio manager objectively allocates and rebalances the portfolio among up to 9 specific, low-correlated asset classes. The mathematical process is guided by a series of economic and capital market factors. Portfolios may be invested up to 30% at any one time into any single asset class, with the exception of government bonds, to which the model may allocate up to 50%. The iSectors Post-MPT Growth Allocation may utilize leveraged ETFs up to a maximum of 33%. However, because iSectors does not use borrowed money in its strategy, the service is available for retirement and non-profit accounts.

iSectors believes that the empirical evidence strongly suggests that asset allocation is the predominant factor behind the returns of any investment approach. As such, many of the iSectors models are Strategic in nature, utilizing an indexing approach within the asset allocation models. Vehicles utilized to execute the allocation process within the models are primarily low-cost, primarily index-based ETFs.

Management of iSectors Asset Allocation strategies is overseen by an investment committee of four professionals, each with significant investment, business and accounting experience along and multiple professional designations, including Prateek Mehrotra, MBA, CFA, CAIA as their Chief Investment Officer and Timothy J. Landolt, MBA as their Strategies Manager. Mr. Mehrotra holds a MBA in Finance from Lehigh University and Mr. Landolt holds a MBA from Loyola Marymount University.

iSectors / iSectors® Post-MPT Moderate Allocation

iSectors® Post-MPT Allocations utilize advancements in Modern Portfolio Theory (MPT) to allocate the portfolio among up to 9 unique, uncorrelated asset classes. In addition,

iSectors also utilizes advanced, more pragmatic approaches for applying these principles of MPT. The objective of the iSectors® Post-MPT Moderate Allocation is to achieve investment returns that outperform a 60/40 stock/bond index (as measured by the S&P500 stock market index + Lehman Aggregate Bond Index) with lower downside risk over a complete market cycle. The portfolio manager objectively allocates and rebalances the portfolio among up to 9 specific, low-correlated asset classes. The mathematical process is guided by a series of economic and capital market factors. Portfolios may be invested up to 30% at any one time into any single asset class, with the exception of government bonds, to which the model may allocate up to 50%. The iSectors® Post-MPT Moderate Allocation does not use borrowed money in its strategy and remains 100% invested at all times.

iSectors believes that the empirical evidence strongly suggests that asset allocation is the predominant factor behind the returns of any investment approach. As such, many of the iSectors models are Strategic in nature, utilizing an indexing approach within the asset allocation models. Vehicles utilized to execute the allocation process within the models are primarily low-cost, primarily index-based ETFs.

Tactical:

Avatar Associates, LLC / Avatar Aggressive Portfolio

Avatar Associates is an independent asset allocator, specializing in risk reduction investment strategies. Since 1970, institutional and private clients have entrusted Avatar with their assets to help them participate in market advances and protect them against market losses.

The Avatar Aggressive Portfolio (the "Portfolio") seeks to provide capital appreciation with no expectations for current income. The Portfolio is an all-equity portfolio and is designed for investors with a long amount of time until retirement and/or a high tolerance for risk. With no fixed income exposure, this portfolio is expected to be the most aggressive implementation of the eight Portfolios currently managed by Avatar. The Fund seeks to outperform its designated benchmark by raising and lowering asset class exposures, industry sector exposures, and international country exposures to anticipate relative price movements. The total weighting of indirect stock holdings in ETFs consist of a larger percentage of large-capitalization U.S. stocks and some mid- and small-capitalization U.S. stocks. This Fund also has the largest exposure to international stocks in the Avatar Portfolio Series. The Portfolio may invest in cash, cash equivalents or various short-term money market instruments.

Portfolio Benchmark: 80% S&P 500 and 20% MSCI EAFE

As Chairman and Chief Investment Officer, Ted Theodore manages the firm's asset allocation models. Previously, Mr. Theodore served as Strategist/Portfolio Manager at Morgan Stanley Asset Management, and as Director of Equity Strategy at Citibank, N.A. Mr. Theodore earned his M.B.A. in Finance and B.A. in Economics from the University of Michigan.

Larry Seibert is Vice Chairman and Head of Security Selection. Previously, he has served at Goldman Sachs and KPMG Peat Marwick. Larry received his B.A. in Economics from Columbia University, and an M.B.A. in Finance from New York University.

Avatar Associates, LLC / Avatar Capital Preservation Portfolio

Avatar Associates is an independent asset allocator, specializing in risk reduction investment strategies. Since 1970, institutional and private clients have entrusted Avatar with their assets to help them participate in market advances and protect them against market losses.

The Avatar Capital Preservation Portfolio (the "Portfolio") seeks to provide current income with limited capital appreciation and is designed for investors with a short amount of time until retirement and/or a low tolerance for risk. This portfolio is the most conservative implementation of the seven portfolios currently managed by Avatar. The Portfolio seeks to outperform its designated benchmark by raising and lowering asset class exposures, industry sector exposures, and international country exposures in anticipation of relative price movements. To this end, the Portfolio utilizes equity ETFs, international ETFs and fixed income ETFs to adjust exposures where appropriate. Small portions of U.S. and international equities are used. The majority of the portfolio is invested in U.S. Treasury and corporate bond ETFs. Cash, cash equivalents or various short-term money market instruments may also be used.

Portfolio Benchmark: 15% S&P 500, 5% MSCI EAFE, and 80% BarCap Aggregate Bond

As Chairman and Chief Investment Officer, Ted Theodore manages the firm's asset allocation models. Previously, Mr. Theodore served as Strategist/Portfolio Manager at Morgan Stanley Asset Management, and as Director of Equity Strategy at Citibank, N.A. Mr. Theodore earned his M.B.A. in Finance and B.A. in Economics from the University of Michigan.

Larry Seibert is Vice Chairman and Head of Security Selection. Previously, he has served at Goldman Sachs and KPMG Peat Marwick. Larry received his B.A. in Economics from Columbia University, and an M.B.A. in Finance from New York University.

Avatar Associates, LLC / Avatar Conservative Portfolio

Avatar Associates is an independent asset allocator, specializing in risk reduction investment strategies. Since 1970, institutional and private clients have entrusted Avatar with their assets to help them participate in market advances and protect them against market losses.

The Avatar Conservative Portfolio (the "Portfolio") seeks to provide current income with capital appreciation and is designed for investors with a reasonably short amount of time until retirement and/or a relatively low tolerance for risk. The Portfolio seeks to outperform its designated benchmark by raising and lowering asset class exposures, industry sector exposures, and international country exposures in anticipation of relative price movements. The total weighting of indirect stock holdings in ETFs consist of a moderate percentage of large-capitalization U.S. stocks and small allocation to mid- and small-capitalization U.S. stocks. This Portfolio also has a small exposure to international stocks. The larger weighting of indirect bond holdings in ETFs are a diversified mix of intermediate- and long-term investment grade, taxable U.S. government, U.S. agency and corporate bonds. The Portfolio may invest in cash, cash equivalents or various short-term money market instruments.

Portfolio Benchmark: 35% S&P 500, 5% MSCI EAFE, and 60% BarCap Aggregate Bond

As Chairman and Chief Investment Officer, Ted Theodore manages the firm's asset allocation models. Previously, Mr. Theodore served as Strategist/Portfolio Manager at Morgan Stanley Asset Management, and as Director of Equity Strategy at Citibank, N.A. Mr. Theodore earned his M.B.A. in Finance and B.A. in Economics from the University of Michigan.

Larry Seibert is Vice Chairman and Head of Security Selection. Previously, he has served at Goldman Sachs and KPMG Peat Marwick. Larry received his B.A. in Economics from Columbia University, and an M.B.A. in Finance from New York University.

Avatar Associates, LLC / Avatar Conservative Growth Portfolio

Avatar Associates is an independent asset allocator, specializing in risk reduction investment strategies. Since 1970, institutional and private clients have entrusted Avatar with their assets to help them participate in market advances and protect them against market losses.

The Avatar Conservative Growth Portfolio (the "Portfolio") seeks to provide current income with capital appreciation consistent with its allocation. The Portfolio is designed for investors with a reasonably short amount of time until retirement and/or a relatively low tolerance for risk. The Portfolio seeks to outperform its designated benchmark by raising and lowering asset class exposures, industry sector exposures, and international country exposures to anticipate relative price movements. The total weighting of indirect stock holdings in ETFs consist of a moderate percentage of large-capitalization U.S. stocks and small allocation to mid- and small-capitalization U.S. stocks. This Portfolio also has a small exposure to international stocks. The larger weighting of indirect bond holdings in ETFs are a diversified mix of intermediate- and long-term investment grade, taxable U.S. government, U.S. agency and corporate bonds. The Portfolio may invest in cash, cash equivalents or various short-term money market instruments.

Portfolio Benchmark: 50% S&P 500, 10% MSCI EAFE, and 40% BarCap Aggregate Bond

As Chairman and Chief Investment Officer, Ted Theodore manages the firm's asset allocation models. Previously, Mr. Theodore served as Strategist/Portfolio Manager at Morgan Stanley Asset Management, and as Director of Equity Strategy at Citibank, N.A. Mr. Theodore earned his M.B.A. in Finance and B.A. in Economics from the University of Michigan.

Larry Seibert is Vice Chairman and Head of Security Selection. Previously, he has served at Goldman Sachs and KPMG Peat Marwick. Larry received his B.A. in Economics from Columbia University, and an M.B.A. in Finance from New York University.

Avatar Associates, LLC / Avatar Fixed Income Plus Portfolio

Avatar Associates is an independent asset allocator, specializing in risk reduction investment strategies. Since 1970, institutional and private clients have entrusted Avatar with their assets to help them participate in market advances and protect them against market losses.

The Avatar Fixed Income Plus Portfolio (the "Portfolio") seeks to provide a modest positive return over time through active fixed income and inflationary asset class management. The strategy has a focus on protection of capital. The model is a tactically managed all-ETF strategy that is unconstrained in its ability to utilize non-fixed income ETFs to help protect against inflation. The Portfolio is designed for investors with a short amount of time until retirement and/or a low tolerance for risk. The Portfolio seeks to outperform its designated benchmark by raising and lowering asset class exposures, credit exposures, duration, and industry sector exposures to anticipate relative price movements. Cash, cash equivalents or various short-term money market instruments may also be used.

Portfolio Benchmark: 100% BarCap Aggregate Bond

As Chairman and Chief Investment Officer, Ted Theodore manages the firm's asset allocation models. Previously, Mr. Theodore served as Strategist/Portfolio Manager at Morgan Stanley Asset Management, and as Director of Equity Strategy at Citibank, N.A. Mr. Theodore earned his M.B.A. in Finance and B.A. in Economics from the University of Michigan.

Larry Seibert is Vice Chairman and Head of Security Selection. Previously, he has served at Goldman Sachs and KPMG Peat Marwick. Larry received his B.A. in Economics from Columbia University, and an M.B.A. in Finance from New York University.

Avatar Associates, LLC / Avatar Growth Portfolio

Avatar Associates is an independent asset allocator, specializing in risk reduction investment strategies. Since 1970, institutional and private clients have entrusted Avatar with their assets to help them participate in market advances and protect them against market losses.

The Avatar Growth Portfolio (the "Portfolio") seeks to provide capital appreciation with no expectations for current income. The Portfolio is designed for investors with a long amount of time until retirement and/or a high tolerance for risk. This Portfolio is a very aggressive implementation with a small fixed income allocation when compared to the other Avatar Portfolios. The Portfolio seeks to outperform its designated benchmark by raising and lowering asset class exposures, industry sector exposures, and international country exposures to anticipate relative price movements. The total weighting of indirect stock holdings in ETFs consist of a larger percentage of large-capitalization U.S. stocks and some mid- and small-capitalization U.S. stocks. The much smaller weighting of indirect bond holdings in ETFs are a diversified mix of intermediate- and long-term investment grade, taxable U.S. government, U.S. agency and corporate bonds. This Portfolio also has a strong exposure to international stocks. The Portfolio may invest in cash, cash equivalents or various short-term money market instruments.

Portfolio Benchmark: 80% S&P 500, 15% MSCI EAFE, and 5% BarCap Aggregate Bond

As Chairman and Chief Investment Officer, Ted Theodore manages the firm's asset allocation models. Previously, Mr. Theodore served as Strategist/Portfolio Manager at Morgan Stanley Asset Management, and as Director of Equity Strategy at Citibank, N.A. Mr. Theodore earned his M.B.A. in Finance and B.A. in Economics from the University of Michigan.

Larry Seibert is Vice Chairman and Head of Security Selection. Previously, he has served at Goldman Sachs and KPMG Peat Marwick. Larry received his B.A. in Economics from Columbia University, and an M.B.A. in Finance from New York University.

Avatar Associates, LLC / Avatar Moderate Portfolio

Avatar Associates is an independent asset allocator, specializing in risk reduction investment strategies. Since 1970, institutional and private clients have entrusted Avatar with their assets to help them participate in market advances and protect them against market losses.

The Avatar Moderate Portfolio (the "Portfolio") seeks to provide moderate capital appreciation with current income. The Portfolio is designed for investors with a reasonably long amount of time until retirement and/or a moderate tolerance for risk. This portfolio is expected to be an all-round portfolio for the average investor. The Portfolio seeks to outperform its designated benchmark by raising and lowering asset class exposures, industry sector exposures, and international country exposures to anticipate relative price movements. The total weighting of indirect stock holdings in ETFs consist of a larger percentage of large-capitalization U.S. stocks and some mid- and small-capitalization U.S. stocks. This Portfolio also has a moderate exposure to international stocks. The moderate weighting of indirect bond holdings in ETFs are a diversified mix of intermediate- and long-term investment grade, taxable U.S. government, U.S. agency and corporate bonds. The Portfolio may invest in cash, cash equivalents or various short-term money market instruments.

Portfolio Benchmark: 60% S&P 500, 10% MSCI EAFE, and 30% BarCap Aggregate Bond

As Chairman and Chief Investment Officer, Ted Theodore manages the firm's asset allocation models. Previously, Mr. Theodore served as Strategist/Portfolio Manager at Morgan Stanley Asset Management, and as Director of Equity Strategy at Citibank, N.A. Mr. Theodore earned his M.B.A. in Finance and B.A. in Economics from the University of Michigan.

Larry Seibert is Vice Chairman and Head of Security Selection. Previously, he has served at Goldman Sachs and KPMG Peat Marwick. Larry received his B.A. in Economics from Columbia University, and an M.B.A. in Finance from New York University.

Avatar Associates, LLC / Avatar Moderate Growth Portfolio

Avatar Associates is an independent asset allocator, specializing in risk reduction investment strategies. Since 1970, institutional and private clients have entrusted Avatar with their assets to help them participate in market advances and protect them against market losses.

The Avatar Moderate Growth Portfolio (the "Portfolio") seeks to provide capital appreciation with some to moderate current income. The Portfolio is designed for investors with a reasonably long amount of time until retirement and/or a moderately high tolerance for risk. This portfolio is expected to be the third least aggressive implementation of the seven Portfolios currently managed by Avatar. The Portfolio seeks to outperform its designated benchmark by raising and lowering asset class exposures, industry sector exposures, and international country exposures to anticipate relative price movements. The total weighting of indirect stock holdings in ETFs consist of a large percentage of large-capitalization U.S. stocks and some mid- and small-capitalization U.S. stocks. This Portfolio also has a moderate exposure to international stocks. The relatively smaller weighting of indirect bond holdings in ETFs are a diversified mix of intermediate- and long-term investment grade, taxable U.S. government, U.S. agency and corporate bonds. The Portfolio may invest in cash, cash equivalents or various short-term money market instruments.

Portfolio Benchmark: 70% S&P 500, 15% MSCI EAFE, and 15% BarCap Aggregate Bond

As Chairman and Chief Investment Officer, Ted Theodore manages the firm's asset allocation models. Previously, Mr. Theodore served as Strategist/Portfolio Manager at Morgan Stanley Asset Management, and as Director of Equity Strategy at Citibank, N.A. Mr. Theodore earned his M.B.A. in Finance and B.A. in Economics from the University of Michigan.

Larry Seibert is Vice Chairman and Head of Security Selection. Previously, he has served at Goldman Sachs and KPMG Peat Marwick. Larry received his B.A. in Economics from Columbia University, and an M.B.A. in Finance from New York University.

Day Hagan Asset Management / Day Hagan Asset Management

Day Hagan Asset Management developed mathematical models in conjunction with Ned Davis Research. The models quantitatively evaluate business conditions, fundamentals, price-trends, sentiment, economic trends, and valuation to identify when a confluence of evidence indicates opportunity. ETF portfolios are updated monthly to include the most attractive asset classes. Advantages of following a model based approach include the flexibility to respond to market opportunities while controlling the irrationality and temptations imposed by human emotions.

Day Hagan Asset Management's philosophy of investing is founded upon the following tenets: make decisions based on an objective and model-based framework, utilize only time-tested and robust financial market indicators, allocate based on a "weight-of-the-evidence" approach, stay on the right side of major trends using trend-following indicators, and remain disciplined and un-emotional at all times.

Don Hagan, CFA, began his career in 1988 at Ned Davis Research and rose to Chief Sector Analyst where he developed decision-based asset allocation and individual stock and sector buy/sell programs at the institutional level for over 20 years. He was Director of Research and Lead Portfolio Manager for SCI Capital Management's SCI Traditional Value Equity, Blue Chip Bellwether Growth, Industry Select and Tactical Balanced investment strategies. After acquisition of SCI by Wells Fargo, Don was Senior Vice-President and Senior Portfolio Manager for Wells Fargo Bank's Private Client Services and concurrently served on Wells Fargo's National Asset Allocation Committee and National Investment Policy Committees. He has been quoted in several financial publications including the Wall Street Journal (for the first time in April, 1993), Barron's, Atlanta Constitution, and USA Today and is a frequent speaker at conferences and on radio. Don has a B.A. and CFA and is a member of the Association for Investment Management Research and the Investment Management Consultants Association.

Emerald Allocation Strategies / Emerald Concentrated Equity Discipline

All of our strategies have specific risk-control measures within them, in addition to the general risk reduction achieved by a diversified portfolio. Our firm's style and accomplishments have been highlighted in many national media outlets including Bloomberg, The Wall Street Transcript, Investment News, Registered Rep and Wealth Manager Magazine. We have presented our expertise and views at various industry conferences, and our Chief Investment Officer has been recognized as one of Worth Magazine's "Top 100 US Wealth Advisors" from 2005 – 2007 and one of Worth Magazine's "Top 250 US Wealth Advisors" in 2008.

Concentrated Equity seeks to generate investment "alpha" (excess return versus stock market benchmarks) through the purchase of a carefully selected group of equity mutual funds, whose managers each confine their portfolios to a very limited number of holdings (typically under 30 stocks) and generate those returns using distinctly different methods. The combination of these funds seeks to combat the tendency for traditional "style-box" equity approaches (investing by growth vs. value, large cap vs. small cap) that often produce mediocre or negative levels of alpha over longer periods of time. We may also buy dedicated short funds as a portfolio hedge in perceived periods of high market risk.

Mr. Isbitts co-founded Emerald in 1998, chairs the firm's Investment Committee, and is the creator of Emerald's proprietary investment approach. He is a 20+ year veteran of the investment business, holding portfolio management positions at firms such as Fuji Bank & Trust, Morgan Stanley and DLJ. Mr. Isbitts has published over 100 investment articles and commentaries in publications including Wealth Manager, Registered Rep, Financial Planning, and Investment News. In 2006, he published "Wall Street's Bull and How to Bear It." Education includes an undergraduate degree from the State University of New York at Albany, an MBA in Finance from Rutgers University.

Emerald Allocation Strategies / Emerald Global Cycle Discipline:

All of our strategies have specific risk-control measures within them, in addition to the general risk reduction achieved by a diversified portfolio. Our firm's style and accomplishments have been highlighted in many national media outlets including Bloomberg, The Wall Street Transcript, Investment News, Registered Rep and Wealth Manager Magazine. We have presented our expertise and views at various industry conferences, and our Chief Investment Officer has been recognized as one of Worth Magazine's "Top 100 US Wealth Advisors" from 2005 – 2007 and one of Worth Magazine's "Top 250 US Wealth Advisors" in 2008.

Global Cycle is a true long-term approach to growing capital. It involves the research and identification of global investment themes that are in the midst of a long, positive business cycle. (e.g. – alternative energy, potable water, India equity, China equity, etc). Some of these themes may take place, in our opinion, over many years, even decades. Others may start and finish in periods as short as three years. This is a long-term strategy, and often involves investing in areas of the markets

that exhibit high short-term volatility in their returns. Patience is required to be successful. We may also buy dedicated short funds as a portfolio hedge in perceived periods of high market risk or as a way to capture alpha in a certain sector that we feel may be in decline.

Mr. Isbitts co-founded Emerald in 1998, chairs the firm's Investment Committee, and is the creator of Emerald's proprietary investment approach. He is a 20+ year veteran of the investment business, holding portfolio management positions at firms such as Fuji Bank & Trust, Morgan Stanley and DLJ. Mr. Isbitts has published over 100 investment articles and commentaries in publications including Wealth Manager, Registered Rep, Financial Planning, and Investment News. In 2006, he published "Wall Street's Bull and How to Bear It." Education includes an undergraduate degree from the State University of New York at Albany, an MBA in Finance from Rutgers University.

Emerald Allocation Strategies / Emerald Hybrid Discipline:

All of our strategies have specific risk-control measures within them, in addition to the general risk reduction achieved by a diversified portfolio. Our firm's style and accomplishments have been highlighted in many national media outlets including Bloomberg, The Wall Street Transcript, Investment News, Registered Rep and Wealth Manager Magazine. We have presented our expertise and views at various industry conferences, and our Chief Investment Officer has been recognized as one of Worth Magazine's "Top 100 US Wealth Advisors" from 2005 – 2007 and one of Worth Magazine's "Top 250 US Wealth Advisors" in 2008.

Hybrid's objective is to achieve real, absolute returns (positive net of inflation) over any three-year period, regardless of market conditions, without resorting to the use of high-quality bond funds (which, despite their reputation as conservative investments, can produce large losses in periods of rising interest rates and inflation). Our Hybrid holdings typically come from the 11 sub-sectors/styles we have defined in the alternative mutual fund universe through our own research (such as equity long-short, market-neutral, arbitrage, commodities, high-yield and bond hedge). As a result, Hybrid investing is similar to the approach employed by low volatility hedge fund-of-funds managers but without all the unfavorable characteristics of hedge funds, such as lock-up periods, illiquidity, lack of transparency, excessive leverage, high fees, high investment minimums, and tax inefficiency.

Mr. Isbitts co-founded Emerald in 1998, chairs the firm's Investment Committee, and is the creator of Emerald's proprietary investment approach. He is a 20+ year veteran of the investment business, holding portfolio management positions at firms such as Fuji Bank & Trust, Morgan Stanley and DLJ. Horizon Investments, LLC / Horizon Investments Balanced Portfolio

Horizon follows a 6 step process in developing asset allocations for Equis Clients.

(1) Compute Style Indices, meaning the categories under which assets are categorized; such as, very large value, mid growth, and international. (2) Compute Fundamental Factor Overweight Score using a regression analysis involving eighty different financial ratios to calculate the expected return for the indexes in each asset category. (3) Compute Market Sentiment Factor Overweight Score to determine which asset categories should be overweighted or under-weighted. (4) Compute the Base Portfolio using the "Returns Based Attribution" technique. (5) Set Portfolio Allocations for the four risk profiles that vary according to the percentage of equity typically in the portfolio. (6) Choose specific investments using a Linear Optimizer to solve for the combinations of investments (typically ETFs and mutual funds) that provide the best match to the desired asset allocation. The balanced portfolio seeks the potential for growth with equity investments that have historically delivered higher, but more variable, long term returns. The strategy also seeks to balance the variability of stock market investments with investments in less volatile assets, such as core fixed income securities.

Dr. Jeffrey Roach is Chairman of the Investment Committee and the Chief Economist of Horizon Investments. Prior to joining Horizon Investments LLC in 2006, he was Senior Economist at Bank of America. Dr. Roach earned a B.S. in Mathematics from Bob Jones University, an M.A. in Economics from Clemson University, and a Ph.D. in Economics from Clemson University.

Dr. William Breen is Senior Investment Strategist for Horizon Investments. He is also Emeritus Professor of Finance at the Kellogg Graduate School of Management at Northwestern University. Dr. Breen has published more than 40 articles and scholarly papers and co-authored three books on investment strategy, corporate finance, asset pricing, and econometric theory. In addition, he served or serves as a director of the LaSalle Trust Company, Barton-Ashmann, X10ion Inc., and the Evanston Community Foundation. He earned a Ph.D. in Econometrics from Cornell University, was an Associate Professor of Economics at Purdue University, and Associate Professor and Professor of Finance at the Kellogg Graduate School.

Horizon Investments, LLC / Horizon Investments Focused Portfolio

Horizon follows a 6 step process in developing asset allocations for Equis Clients.

(1) Compute Style Indices, meaning the categories under which assets are categorized; such as, very large value, mid growth, and international. (2) Compute Fundamental Factor Overweight Score using a regression analysis involving eighty different financial ratios to calculate the expected return for the indexes in each asset category. (3) Compute Market Sentiment Factor Overweight Score to

determine which asset categories should be overweighted or under-weighted. (4) Compute the Base Portfolio using the "Returns Based Attribution" technique. (5) Set Portfolio Allocations for the four risk profiles that vary according to the percentage of equity typically in the portfolio.. (6) Choose specific investments using a Linear Optimizer to solve for the combinations of investments (typically ETFs and mutual funds) that provide the best match to the desired asset allocation. The Focused portfolio seeks capital appreciation in any market cycle. This diversified portfolio utilizes a variety of equity strategies for the aggressive investor. Dr. Jeffrey Roach is Chairman of the Investment Committee and the Chief Economist of Horizon Investments. Prior to joining Horizon Investments LLC in 2006, he was Senior Economist at Bank of America. Dr. Roach earned a B.S. in Mathematics from Bob Jones University, an M.A. in Economics from Clemson University, and a Ph.D. in Economics from Clemson University. HS Dent Investment Management, LLC / HS Dent Investment Management

The Dent Portfolio investment approach identifies broad sectors of the US economy, economic sub-sectors, or even geographic regions of the world that appear to be poised for growth over a short horizon. These results are assessed according to a relative strength/momentum model that tells which ETFs to purchase and when to purchase them. In more detail, a pool of possible investment areas (including the money market) is ranked according to HS Dent's proprietary methods. To warrant investment a security must rank above the money market and show strong relative strength. If no security is above money market, or not enough securities to create an entire portfolio, then all or part of the portfolio may be invested in cash or cash equivalents. If we are 100% invested, we are considered to be in an "offensive" position. If any portion of our portfolio is in cash due to not enough securities ranking highly enough to complete the portfolio, then we are in a "defensive" position. We have used this methodology since May 1, 2008, through the worst of the current economic crisis. We have been either mostly defensive or completely defensive four times since then - November and December of 2008, and February and March of 2009. The portfolio typically holds relatively few positions and does have significant turnover.

Harry S. Dent, Jr. is the Founder, Managing Member and majority owner. For two decades Mr. Dent has been principally engaged, as the Managing Member of HS Dent Publishing, LLC., in authoring books, special reports, and a newsletter on the topic of economic change and how to estimate economic change by analyzing demographics, predictable consumer spending patterns, and technological innovation. Mr. Dent earned a bachelor's degree from University of South Carolina and an MBA from Harvard University.

Rodney G. Johnson is the President and Chief Compliance Officer as well as a minority owner. Mr. Johnson began working directly with Mr. Dent in 1997 to develop investment approaches based on the demographic research of Mr. Dent. Mr. Johnson earned a bachelor's degree from Georgetown University and an MBA from Southern Methodist University.

iSectors / iSectors® Tactical Global Balanced Allocation

iSectors® Tactical Global Balanced Allocation offers a comprehensive investment approach diversified across major global asset classes, including Domestic Equities, International and Emerging Market Equities, Bonds, Commodities, Gold and Real Estate. The model actively manages the investments within the portfolio, utilizing a trend following methodology to allocate among the model's targeted asset classes and to cash. This model's objective is to be in cash during prolonged declines in individual asset classes to reduce overall portfolio draw down. The iSectors® Tactical Global Balanced model seeks to invest in exchange-traded funds (ETFs) to achieve its objectives.

iSectors believes that the empirical evidence strongly suggests that asset allocation is the predominant factor behind the returns of any investment approach. Vehicles utilized within the models are primarily low-cost, primarily index-based ETFs. For its dynamic and tactical models, iSectors utilizes objective, quantitative-based models in an active-passive approach. Quite simply, quantitative-based algorithms utilizing updated data are consistently and systematically applied.

Management of iSectors Asset Allocation strategies is overseen by an investment committee of four professionals, each with significant investment, business and accounting experience along and multiple professional designations, including Prateek Mehrotra, MBA, CFA, CAIA as their Chief Investment Officer and Timothy J. Landolt, MBA as their Strategies Manager. Mr. Mehrotra holds a MBA in Finance from Lehigh University and Mr. Landolt holds a MBA from Loyola Marymount University.

iSectors / iSectors® Tactical International Allocation

iSectors® Tactical International Allocation is designed to help investors diversify their portfolios into international markets and participate in worldwide economic growth. Although international and emerging markets can be volatile, iSectors believes these markets move in identifiable trends based upon the respective countries' trade, fiscal, and monetary policies. The proprietary momentum-based algorithm is designed to position the model to profit from these trends. In an effort to reduce volatility and increase returns, the algorithm will allocate up to 100% to cash during periods when securities do not meet the momentum-based investment criteria. The model will allocate up to 10% of the overall portfolio to any single country, regional, or diversified international exchange-traded fund (ETF) at any given time, subject to a maximum of 10 securities, at which point the model will be 100% invested (subject to a 2% cash position for liquidity purposes). The algorithm is applied with updated data and the model rebalanced accordingly on a monthly basis.

iSectors believes that the empirical evidence strongly suggests that asset allocation is the predominant factor behind the returns of any investment approach. Vehicles utilized within the models are primarily low-cost, primarily index-based ETFs. For its dynamic and tactical models, iSectors utilizes objective, quantitative-based models in an active-passive approach. Quite simply, quantitative-based algorithms utilizing updated data are consistently and systematically applied.

Mench Financial Inc. / International Sector Enhanced

Mench Financial, Inc. has managed assets for individual and institutional clients since 1994. Mench strives to deliver superior performance to a national clientele by decreasing volatility and protecting assets during down markets. The key to our success is an econometric investment process and the use of exchange traded funds (ETFs) to participate in major changes in market trends. A composite of indicators triggers portfolio purchases and sales in a highly-disciplined manner. We believe 75% of our ability to outperform the market comes from this process of asset allocation. During weekly Investment Policy Committee meetings, current portfolio, market, sector and industry allocations are determined. These allocations allow us to decrease the volatility in a portfolio by pinpointing the markets or sectors of a market which we believe have the greatest potential for outperforming the general market. In turn, assets are moved away from sectors that we think have a high probability of under-performing. Once we have identified the industries poised to do well in the coming economic environment, we use fundamental and correlation analysis, combined with broad diversification, to shift the risk/reward ratio in our clients' favor.

The exchange traded funds (ETFs) we invest in represent ownership in an index of country- and region-specific common stocks intended to closely track the price performance and dividend yield of that specific country or region. These highly-liquid securities provide clients with a diversified portfolio at lower costs and allow for more consistent returns over a market cycle.

With over 35 years' experience in the investment industry, Mr. Mench, with the assistance of his family, has created a firm in which to implement the strategy he developed back in 1977. He earned a B.A. in Business from Butler University.

Retirement Wealth Advisors / Retirement Wealth Advisors Market Rotator

RWA (Retirement Wealth Advisors) Market Rotator is a quantitatively managed portfolio of exchange traded funds and cash equivalents. RWA, Inc.'s proprietary step-by-step mechanical approach to selecting positions eliminates emotional trading and is designed to only select above average positions based on both fundamental and technical indicators. The investment strategy utilizes 13 separate ETFs. Using no outside leverage or margin, the strategy seeks to identify the most probable direction of major US equity markets as well as the most statistically probable global asset classes for generating maximum total investor returns. Exchange traded funds are used exclusively to take advantage of these probabilities. Due to risk management processes contained within the quantitative models, the portfolio may not be fully invested at all times.

Mr. Wenk's firm, Retirement Wealth Advisors, Inc. is currently the #1 Ranked Private Asset Management firm in the State of Michigan and #8 in the United States by Money Manager Review*. The ranking, based on return, risk and risk adjusted return, is compared to industry giants such as Goldman Sachs, Alliance Bernstein, Oppenheimer Investments, Baird Asset Management, T. Rowe Price and a number of high profile West Michigan managers. Mr. Wenk has been featured in The Grand Rapids Press, numerous industry specific magazines and has been invited as guest speaker to area colleges. In addition, he has taught educational seminars to over 2,500 investors in West Michigan. In 2007 and 2008 Reuters listed Mr. Wenk as one of the United States' top 500 financial advisors (with only one other advisor from West Michigan on the list) and in 2008 was named by Reuters as one of the Top Advisors Under 40 as well as one of the Top Advisors with Retirement Focus. Retirement Wealth Advisors, Inc. is headquartered in West Michigan (offices in Grand Rapids and Spring Lake) and is an SEC Registered Investment Advisory Firm.

Robbins Capital Management Inc. / Large Cap Core Flex

Robbins Capital Management of Atlanta, Georgia has managed assets for high-net-worth individuals and institutions since 2004.

Robbins Capital Management focuses on sector strength and diligent risk management. The strongest among 500 subgroups and sectors are identified as locations for screening of specific securities. Both fundamental and technical momentum and trend analyses are used to isolate the strongest 2%. Stocks demonstrating weakness over a three-month period are progressively sold. The sell discipline results in the portfolio maintaining an average of about 25% in cash/money market-type investments. Diversification is maintained by not investing more than 25% of the portfolio in any one sector and not allowing any one sector to appreciate to over 40% of the portfolio value. Typically, 25-50 stocks each represent less than 5% of the portfolio, yet some can occasionally increase to 7.5%.

Robert Robbins is both the firm's founder and its Chief Investment Officer who makes all substantive investment decisions. Confidence is inspired by his academic pedigree, military experience, and extensive tenure in research and portfolio management for large institutions.

An early interest in investing motivated Bob to earn a B.A. in economics from Dartmouth College. Following his undergraduate studies, Bob was a United States Army officer, rising to the rank of First Lieutenant. His pursuit of excellence continued upon returning to Dartmouth where he earned his M.B.A. from the Amos Tuck School of Business Administration in 1973. Between 1973 and 2002, Citibank, Bankers Trust, Thomson McKinnon, and Suntrust employed Bob's investment expertise in a variety of research and portfolio management positions. Investors can be certain that Bob's decisions are carefully considered because the majority of his personal assets are invested in the same companies as his clients'.

SignalPoint Asset Management, LLC / SignalPoint 10 Portfolio

Everyone understands the basic principle of investing: buy low and sell high. It is extremely difficult, if not impossible, to consistently predict the market tops and bottoms, but this is the objective of most tactical managers. SignalPoint conversely seeks to sell high and buy low. At least a little cash is held at all times and the amount increases with risk of each sector as calculated with our Risk Assessment Model. Cash is then redeployed the calculated risk in each sector declines, thus creating a tax-friendly continuous dollar-cost averaging. Our Risk Assessment Model constantly evaluates real time indicators including: speculation, relative valuation, divergence, and even IPO zeal. Disciplined adherence to our quantitative process removes emotion from investment decisions. During the last two years, our cash position has moved from a high of 48.5% in October 2007 when the market peaked, to a low of 1% in both November of 2008 and March of 2009. We manage only long positions and do not use levered or inverse ETFs. SignalPoint domestic and global portfolio betas range from .50-.72. Clients who seek reduced volatility, but want to maintain market exposure, will find our portfolios to be exactly what they are looking for.

The ten business sectors included in the S&P 500 are represented by individual ETFs and managed both individually and collectively. A money market component is also included and used as an active part of the portfolios management. The performance objective is to reduce risk in contrast to the overall market and outperform the S&P 500 benchmark, while reducing some of the emotional stress of the client.

Thomas M. Veale's responsibilities include management of portfolios, investment strategy, research, and trading. Mr. Veale is also the Chair of Investment Committee and provides general input into firm operations and management. For more than 20 years, Tom has helped a range of clients increase their wealth by guiding the growth of their portfolios. He also devised investment strategies for trusts, foundations and charities.

SignalPoint Asset Management, LLC / SignalPoint Balanced Point

Everyone understands the basic principle of investing: buy low and sell high. It is extremely difficult, if not impossible, to consistently predict the market tops and bottoms, but this is the objective of most tactical managers. SignalPoint conversely seeks to sell high and buy low. At least a little cash is held at all times and the amount increases with risk of each sector as calculated with our Risk Assessment Model. STRATEGIC CAPITAL ALTERNATIVES, of Gig Harbor, Washington is a privately-held firm of 22 employees.

INVESTMENT PROCESS

SCA believes that active managers can and do add value to a portfolio. To identify the stock most likely to outperform in each category, we screen the universe of money managers and hire the best for each specialty. Each money manager supplies SCA with the 10-15 stocks in which they have the most confidence, allowing us to capture the highest conviction positions out of each manager's portfolio, typically between 30-50. As a result, SCA clients benefit from a portfolio that leverages the combined wisdom of top money managers covering each equity sub-category. Alternative asset classes designed to have returns less correlated with the equity and bond markets are provided through hedge funds via a fund of fund approach. In the fixed income space a core / satellite EFT strategy is used. The Core is built around the broad base aggregate index, 50% - 75% of the overall allocation, while the satellite positions will be dictated by current market opportunities and will include, high yield, floating rate, inflation protected, corporate credit and mortgage backed securities

INVESTMENT PHILOSOPHY

SCA believes investment risk can be controlled by maintaining a non-traditional asset allocation across three dimensions:

1. Equity market exposure correlated with the S&P 500 Index
2. Fixed Income exposure correlated with the BCAG Index
3. Alternative asset exposure typically less correlated with the equity market (S&P 500 Index) and bond market (BCAG Index)

Based upon a SECULAR market outlook created by our Investment Committee, the three dimensions are weighted based upon client risk tolerance with the goal of achieving a sufficient return with minimum risk.

INVESTMENT STRATEGY

The strategy is designed to offer downside protection during times of receding value while eliminating the need to specifically time the sharp swings of equity performance. The three-dimensional approach is accomplished by utilizing "traditional" as well as "non-traditional" asset classes historically employed by institutional investors. In short, the relative performance of long equities is balanced with investment vehicles that are designed to produce a stable, absolute return.

INVESTMENT COMMITTEE

Gary Price – Managing Director Mr. Price has over 18 years of investment experience. Mr. Price is the CEO of Genesis Capital, the manager of a family of hedge fund of funds as well as a Managing Director at Strategic Capital Alternatives. Mr. Price was a member of the advisory board that developed Russell Investments separate account manager platform. Mr. Price holds a finance degree from the University of Pennsylvania's Wharton School of Business.

Ron Robertson – Managing Director Mr. Robertson has over 13 years of investment experience and is a founder of Strategic Capital Group which manages or advises on just under \$1 billion for foundations and individuals. Mr. Robertson is the President of Genesis Capital, the manager of a family of hedge fund of funds as well as a Managing Director at Strategic Capital Alternatives. Mr. Robertson holds a B.S. from Western Washington University. He formally served as a member of the Frank Russell Company Alternative Investment Advisory Board and as President of the Strategic Leadership Foundation.

Michael Dubinsky, CFA – Chief Financial Officer Mr. Dubinsky has over 18 years' experience in finance and accounting for hedge funds, venture capital funds and investment management firms. Prior to joining Strategic Capital Alternatives, Mr. Dubinsky spent four years working for the Russell Investment Group, where he managed the operations of hedge funds, private equity funds and domestic and international mutual funds. Mr. Dubinsky also spent four years working for Deloitte & Touche LLP, where he served clients within the hedge fund, venture capital and financial service industries. Mr. Dubinsky holds a Business Administration degree from the University of Washington and is a CFA charterholder.

Wentworth, Hauser and Violich / WHV International Mutual Fund

Wentworth, Hauser and Violich (WHV) is one of the oldest and most respected investment management firms on the West Coast. Founded in San Francisco in 1937. The firm serves individuals, foundations, endowments, and institutions. WHV currently has more than \$11.6 billion in assets under management. The investment philosophy of the WHV International Equity Fund is grounded in the belief that investing in the most attractive global economic sectors can generate superior investment performance. Particular attention is devoted to the identification of investment "Supercycles." These are defined as supply and demand imbalances that are likely to persist over time. WHV believes that the world's investment landscape has evolved from being influenced by regional or country-specific events to an environment defined primarily by two dominant global forces: 1) globalization by economic sectors and 2) categorization of stocks by sectors rather than by country. The WHV International Equity strategy is designed to take advantage of this environment through a top-down sector allocation investment process. The Fund utilizes a five-step, top-down investment process. First, the relative attractiveness of 10 global economic sectors is analyzed. Second, the potential of 67 industry groups is examined. Third, the attractiveness of 51 countries is analyzed. Fourth, a universe of 1,500 foreign equity securities is researched. Lastly, a portfolio of 30 to 60 stocks is constructed representing economic sectors that have the potential for long-term earnings growth.

Mr. Hirayama developed the WHV International Equity Strategy in 1995 and the WHV Global Equity Strategy in 2005. In 2008, Mr. Hirayama, along with WHV, founded Hirayama Investments, LLC, an affiliated investment adviser. Mr. Hirayama was a Computer Research Analyst with the Bank of America Trust Department and BA Investment Management from 1969 to 1982. He became a Security Analyst and Portfolio Manager at BAIMCO in 1983 and at Associated Capital Investors in 1988. He joined Wentworth, Hauser and Violich in 1990. Ms. Stankard joined Wentworth, Hauser and Violich in 1998 as a Portfolio Accountant and was promoted to Operations Officer in 2000. In 2001 she joined the International Equity Team as an International Security Analyst and was promoted to Portfolio Manager in 2008. In 2009, Ms. Stankard became a Member of Hirayama Investments, LLC, WHV's affiliated investment adviser. Ms. Goodson, Associate Portfolio Manager and International Security Analyst, joined Wentworth, Hauser and Violich in 2008 upon receiving her MBA from the Wharton School.

Municipal Fixed Income Model Portfolio

Egis Capital Management / Egis Municipal Fixed Income

The Egis Fixed Income Municipal Portfolio is managed to provide clients with diversification among mostly municipal debt securities through investing in bond ETF's and bond mutual funds. The Egis Municipal Fixed Income Portfolio is utilized within a client's asset allocation to add diversification and reduce volatility. The duration of investments are managed based on anticipated interest rates and the yield curve.

Taxable Fixed Income Model Portfolio

Egis Capital Management / Egis Taxable Fixed Income

The Egis Taxable Fixed Income Portfolio is managed to provide clients with diversification among mostly Treasury and corporate debt securities through investing in bond ETF's and bond mutual funds. The Egis Taxable Fixed Income Portfolio is utilized within a client's asset allocation to add diversification and reduce volatility. The duration of investments are managed based on anticipated interest rates and the yield curve.

iSectors / iSectors® Capital Preservation Allocation

iSectors® Capital Preservation Allocation has been constructed for investors with a desire for principal stability by creating a portfolio of investments with relatively low volatility. Nominal portfolio yield is a secondary goal of the model. The model holds fixed income Exchange-Traded Funds (ETFs), primarily those that invest in short-term, AAA-rated or investment-grade debt instruments. A smaller portion of the assets may be placed in ETFs holding short-term international instruments. The model will generally target ETFs holding bond portfolios with a duration of approximately 3 years or less. While stability of principal is the primary goal of this portfolio, an investment in the iSectors® Capital Preservation Allocation is not guaranteed and will fluctuate in value.

iSectors believes that the empirical evidence strongly suggests that asset allocation is the predominant factor behind the returns of any investment approach. As such, many of the iSectors models are Strategic in nature, utilizing an indexing approach within the asset allocation models. Vehicles utilized to execute the allocation process within the models are primarily low-cost, primarily index-based ETFs.

Management of iSectors Asset Allocation strategies is overseen by an investment committee of four professionals, each with significant investment, business and accounting experience along and multiple professional designations, including Prateek Mehrotra, MBA, CFA, CAIA as their Chief Investment Officer and Timothy

J. Landolt, MBA as their Strategies Manager. Mr. Mehrotra holds a MBA in Finance from Lehigh University and Mr. Landolt holds a MBA from Loyola Marymount University.

Strategic Capital Group / SCA Fixed income

Strategic Capital Alternatives' Fixed Income strategy starts with a core and satellite approach utilizing ETF's to capture our market exposures. The Core is built on the broad base aggregate index with a range of 50-75% of the portfolio allocation in the BC Aggregate. The Satellite positions will be dictated by current market opportunities and will include high yield, floating rate, inflation protection, corporate credit, and mortgage backed securities. The strategy is dynamic and can change as the market environment for fixed income changes. The goal of the strategy is to capture the long term, low volatility, single digit returns of the broad bond market net of fees.

Investment Committee:

Gary Price – Managing Director Mr. Price has over 18 years of investment experience. Mr. Price is the CEO of Genesis Capital, the manager of a family of hedge fund of funds as well as a Managing Director at Strategic Capital Alternatives. Mr. Price was a member of the advisory board that developed Russell Investments separate account manager platform. Mr. Price holds a finance degree from the University of Pennsylvania's Wharton School of Business.

Ron Robertson--Managing Director: He has over 13 years of investment experience, is a founder of Strategic Capital Group, is the President of Genesis Capital, and is a Managing Director at Strategic Capital Alternatives. Mr. Robertson holds a B.S. from Western Washington University.

Municipal/Taxable Fixed Income Model Portfolio

Egis Capital Management / Egis Municipal/Taxable Fixed Income

The Egis Fixed Income Municipal/Taxable Portfolio is managed to provide clients with diversification among municipal and taxable debt securities through investing in ETF's and mutual funds. The Egis Municipal/Taxable Fixed Income Portfolio is utilized within a client's asset allocation to add diversification and reduce volatility. The duration of investments are managed based on anticipated interest rates and the yield curve.

iSectors / iSectors® Domestic Fixed Income Allocation

iSectors® Domestic models are strategic asset allocation models that employ a Modern Portfolio Theory (MPT) -based approach to asset allocation. The equity portion of the models is allocated using a diversified basket of domestic, low-cost, equity index-based ETFs. The fixed income portion of the allocations is invested in diversified, low-cost ETFs that hold baskets of investment-grade domestic, government and corporate bonds of various maturities. The models, with respect to their use of ETFs and an annual rebalance process, are designed to be tax-sensitive. Conservative allocation strategy is intended to consist of approximately 100% domestic (U.S. Only) fixed-income investments.

iSectors believes that the empirical evidence strongly suggests that asset allocation is the predominant factor behind the returns of any investment approach. As such, many of the iSectors models are Strategic in nature, utilizing an indexing approach within the asset allocation models. Vehicles utilized to execute the allocation process within the models are primarily low-cost, primarily index-based ETFs.

Management of iSectors Asset Allocation strategies is overseen by an investment committee of four professionals, each with significant investment, business and accounting experience along and multiple professional designations, including Prateek Mehrotra, MBA, CFA, CAIA as their Chief Investment Officer and Timothy J. Landolt, MBA as their Strategies Manager. Mr. Mehrotra holds a MBA in Finance from Lehigh University and Mr. Landolt holds a MBA from Loyola Marymount University.

iSectors / iSectors® Institutional Fixed Income Allocation

iSectors® Institutional models employ a Modern Portfolio Theory (MPT)-based approach, with a review of Resampling, Black Litterman and Monte Carlo Simulation to optimally allocate the model portfolios. The equity portion of the models is allocated across a number of domestic, international and emerging markets index-based exchange traded funds. Fundamentally-weighted index ETFs are included in the model in an effort to enhance return and reduce volatility. The fixed income portion of each model is invested in diversified, low-cost ETFs that hold baskets of domestic, international and emerging market government and corporate bonds of various maturities. The models, with respect to their use of ETFs and an annual rebalance process, are designed to be tax-sensitive. Conservative allocation strategy is intended to consist of approximately 100% domestic (U.S. Only) fixed-income investments.

iSectors believes that the empirical evidence strongly suggests that asset allocation is the predominant factor behind the returns of any investment approach. As such, many of the iSectors models are Strategic in nature, utilizing an indexing approach within the asset allocation models. Vehicles utilized to execute the allocation process within the models are primarily low-cost, primarily index-based ETFs.

Management of iSectors Asset Allocation strategies is overseen by an investment committee of four professionals, each with significant investment, business and accounting experience along and multiple professional designations, including Prateek Mehrotra, MBA, CFA, CAIA as their Chief Investment Officer and Timothy J. Landolt, MBA as their Strategies Manager. Mr. Mehrotra holds a MBA in Finance from Lehigh University and Mr. Landolt holds a MBA from Loyola Marymount University.

Exhibit 2**PRIVACY DISCLOSURE DOCUMENT**

As part of Equis Capital Management's long tradition of trust, the confidentiality of personal information is paramount. We maintain high standards to safeguard your personal information. We will remain vigilant and professional in protecting that information and in using it in a fair and lawful manner. As part of this commitment to fulfilling your trust we have formulated this Privacy Policy.

Safeguarding Customer Information and Documents

To conduct regular business, we may collect nonpublic personal information from sources such as:

To conduct regular business we collect non-public customer data in checklists, forms, in written notations, and in documentation provided to us by our customers for evaluation, registration, licensing or related consulting services. We also create internal lists of such data.

Equis Capital Management will internally safeguard your nonpublic personal information by restricting access to only those employees who provide products or services to you or those who need access to your information to service your account. In addition, we will maintain physical, electronic and procedural safeguards that meet federal and/or state standards to guard your nonpublic personal information. Failure to observe Equis Capital Management's procedures regarding customer and consumer privacy will result in discipline and may lead to termination.

Sharing Nonpublic Personal and Financial Information

As the Firm shares nonpublic information solely to service our client accounts, we do not disclose any nonpublic personal information about our customers or former Customers to anyone, except as permitted by law or otherwise disclosed herein.

Equis Capital Management is committed to the privacy and protection of our customers' personal and financial information. We will not share any such information with any affiliated or nonaffiliated third party except:

- When necessary to complete transactions in a customer account, such as clearing firm.
- When required to service and/or maintain your account
- In order to resolve a customer dispute or inquiry
- With persons acting in a fiduciary or representative capacity on behalf of the customer
- With rating agencies, persons assessing compliance with industry standards, or to the attorneys, accountants and auditors of the firm
- In connection with any sale and / or merger of Equis Capital Management's business.
- To prevent or protect against actual or potential fraud, identity theft, unauthorized transactions, claims or other liability.
- To comply with all federal, state or local laws, rules, statutes and other applicable legal requirements.
- In connection with a written agreement to provide advisory services or investment management when the information is released solely for the purpose of providing products or services covered by pursuant to the Equis Capital Wrap Fee Program.
- Upon the customer's specific instruction, consent or request
- Pursuant to any other exceptions enumerated in the California Information Privacy Act

Note: When we share your nonpublic information with any third party for the reasons stated above, we make certain that there are written restrictions in place regarding the use and/or disclosure of said information.

Opt-Out Provisions

It is not a policy of Equis Capital Management to share nonpublic personal and financial information with affiliated or unaffiliated third parties except under the circumstances noted above. Since sharing under the circumstances noted above is necessary to service customer accounts or is mandated by law, there are no allowances made for clients to opt out.

Exhibit 3**CUSTOMER IDENTIFICATION PROGRAM****Important Information You Need to Know About Opening a New Account**

To help the government fight the funding of terrorism and money laundering activities, federal law requires financial institutions to obtain, verify, and record information that identifies each person who opens an account.

This Notice answers some questions about Equis Capital Management's Customer Identification Program.

What types of information will I need to provide?

When you open an account, Equis Capital Management is required to collect information such as the following from you:

- Your name
- Date of birth
- Address
- Identification number:
- U.S. Citizen: taxpayer identification number (social security number or employer identification number)
- Non-U.S. Citizen: taxpayer identification number, passport number, and country of issuance, alien identification card number, or government-issued identification showing nationality, residence, and a photograph of you

You may also need to show your driver's license or other identifying documents.

A corporation, partnership, trust or other legal entity may need to provide other information, such as its principal place of business, local office, employer identification number, certified articles of incorporation, government-issued business license, a partnership agreement, or a trust agreement.

U.S. Department of the Treasury, Securities and Exchange Commission, FINRA, and New York Stock Exchange rules already require you to provide most of this information. These rules also may require you to provide additional information, such as your net worth, annual income, occupation, employment information, investment experience and objectives, and risk tolerance.

What happens if I don't provide the information requested or my identity can't be verified?

Equis Capital Management may not be able to open an account or carry out transactions for you. If Equis Capital Management has already opened an account for you, we may have to close it.

We thank you for your patience and hope that you will support the financial industry's efforts to deny terrorists and money launderers access to America's financial system.

Exhibit 4**Business Continuity Plan (BCP) - Summary and Disclosure**

Securities industry regulations require that brokerage and investment advisor firms inform their clients of their plans to address the possibility of a business disruption that potentially results from a power outage, natural disaster, or other event. Equis Capital Management has a comprehensive business continuity program in place, which we review, update and test on a regular basis. This plan provides for continuation of client services in the event of various types of interruptions, such as those at our facilities as well as the services we provide. Although we obviously we cannot plan for or guarantee against all contingencies, we have developed this plan in an effort to stem off and / or prepare for most contingencies.

To conform with regulatory expectations, Equis Capital Management's strategy is designed so that we can meet our present obligations to our clients in the event of an unplanned interruption in business, such as in an emergency or a Significant Business Disruption (SBD). In order to facilitate this, we make strive to respond to significant business disruptions by safeguarding employees' lives and firm assets, making a financial and operational assessment, safely and swiftly recovering and resuming operations, protecting all of our books and records, and ensuring that our customers can continue to transact business. In the event that we determine we are unable to continue our business, we will assure customers prompt access to their funds and securities (if applicable).

Our plan anticipates two kinds of SBDs, internal and external. Internal SBDs affect only our firm's ability to communicate and do business, such as a fire or power outage in our building. External SBDs prevent the operation of the securities markets or a number of firms, such as a terrorist attack, a city flood, earthquake, or a wide-scale, regional disruption. Our response to an external SBD relies more heavily on other organizations and systems, especially on the capabilities of our clearing firm.

Key points to our plan include:

- Operational assessments
- Provisions for rapid resumption of mission critical systems
- Back-up arrangements for material relationships with business constituents, banks and appraisals of counter-party impact

- Back up system for recovery of data (both hard copy and electronic data)
- Alternate means for communications for use between employees and the firm, as well as between customers and the firm
- Instructions for communications with regulators and regulatory reporting requirements in the event of a disaster
- Description of the alternate physical locations of employees and/or certain departments
- Assurance for customers' prompt access to their funds and securities in the event the firm determines it is unable to continue its business
- Provisions for updating the plan
- Provisions for periodic testing of the plan
- Notification of relevant provisions of the plan to customers of the firm

No contingency plan can eliminate all risk of service interruption or temporarily impeded account access. Nevertheless, we assess and update our plans to mitigate risks to the extent reasonable. In creating our BCP, certain assumptions have been made such as alternative facilities being accessible, sufficient personnel being available, and external organizations including securities markets and government agencies being operational. If these assumptions are not valid under particular circumstances, we will evaluate possibilities for minimizing the disruption to services as feasible at that time and will promptly provide clients with information about how to access their funds and securities. In an effort to provide support and updated information, clients may contact us through our website at www.eqiscapital.com or via phone at 800-949-9936. In addition, for alternative access they may contact the Custodians(s) directly to access their funds in the event of an emergency at www.foliofn.com or 888-485-3456. We will review, update and test our BCP as needed in the event of changes to our business processes, technology and staff at a minimum annually. We will continue to post updated information on our website. You may also obtain our current BCP summary by submitting a written request to: Equis Capital Management, Inc. ATTN: Business Continuity Plan, 1299 4th St., Ste 502, San Rafael, CA 94901 or via email sent to support@eqiscapital.com.

Making sure that any type of disruption does not unduly impact our clients is extremely important to us, and our BCP is designed to allow us to continue to provide the high quality service you have come to expect from Equis Capital.

General Information

Eqis Capital Management (hereinafter "Eqis"), offers the following wrap-fee program, where appropriate, to interested prospects and advisory clients. Eqis, a corporation organized under Illinois law, is a registered investment adviser. Eqis maintains its principal office at 1299 4th St., Ste 506, San Rafael, CA 94901. Eqis' mailing address is: Eqis Capital Management, 228 Park Ave S #15750, New York, NY 10003. If you

have questions regarding the material contained herein, please contact Eqis at 630-929-3012.

Additional information about Eqis is available on the Internet at <http://www.adviserinfo.sec.gov>. You can search this site by a unique identifying number, known as a CRD number. The CRD number for Eqis is 126052.

Eqis Capital Wrap-Fee Program Description

Eqis is the sponsor of the Eqis Capital Wrap-Fee Program (hereinafter the "Program"). A "wrap-fee" program is one that provides the client with advisory services and access to institutional money managers and investment products, exclusive of brokerage, execution, and custodial services. Eqis actively solicits advisory clients for the Program through its independent contractor relationships with financial advisors, financial planners, stock brokers, and other designees (hereinafter "Financial Professional(s)") that are duly licensed to offer fee based financial products. Eqis will not accept a client into the program that isn't introduced by a Financial Professional. Financial Professionals are responsible for introducing clients to Eqis, gathering and communicating client's financial information, acting as a liaison between Eqis and the client, staying in contact with the client and informing Eqis of any material changes in the client's financial picture, and various other clerical or administrative duties. Financial Professionals may also assist in the determination of the client's asset allocation and the manager selection process (pursuant to the Eqis "Approved Managers" list). All investment advisory decisions with regard to securities, types of investments, timing of buys and sells, etc. will be made by Eqis and/or sub-managers contracted by Eqis (hereinafter "Contracted Managers"). Eqis is also responsible for the marketing of the Program. The Program is offered to individuals, retirement accounts and other business entities. With respect to retirement accounts that are regulated by ERISA, Eqis will only market the Program to such accounts in compliance with applicable Prohibited Transaction rules.

The Program is designed to continuously manage the client's Program Account based on the individual needs of the client through the use of professional money manager(s) that are either employed by Eqis and/or contracted by Eqis. The Program distinguishes between portfolios managed by Eqis (hereinafter "Eqis Managed Portfolios") and portfolios managed by managers that Eqis has contracted with to sub-advise all or a portion of certain advisory accounts ("Contracted Managers"). The Program defines a Portfolio as a group of investments managed by an individual manager or team with a specific criteria, e.g., Large Cap Growth US Equities.

At the time of clients' initial investments in the program, Eqis (in conjunction with the client's Financial Professional) will assist the client in determining the client's current financial situation, financial goals and attitudes towards risk. Clients' information will be collected and analyzed through the use of Eqis's proprietary proposal generation system, which in turn will allow Eqis and the client's Financial Professional to review the client's situation and determine an appropriate asset allocation. With regard to the Program account, asset allocation refers to the combining of individually managed portfolios to create diversification across asset class, equity styles, foreign markets, etc. With respect to Benefit Plan Clients, the plan fiduciaries will be provided with predefined asset allocations, along with adequate description of strategies and the associated levels of risk. The plan fiduciaries will be responsible for choosing the allocation for inclusion in their plan. The client will maintain all ownership rights to all securities held within the Program account.

Once an appropriate asset allocation is determined with a client, and the Contracted Managers (if any) have been selected to fulfill the asset allocation, the individual portfolios will be managed by Eqis and the Contracted Managers on a discretionary basis. A Program account may consist of up to ten separately managed portfolios, or in the case of a managed EFT account (account composed entirely of exchanged traded funds) have up to 20 portfolios in ETF Program accounts and up to 25 portfolios in the UMA Program accounts. These are combined to create an asset allocation that is appropriate for the client's needs, risk preferences and/or desires. Within an individual Program account all ten portfolios may be managed by Eqis or all ten portfolios may be managed by Contracted Managers (hereinafter "Multi-Manager Managed Account"). In this alternative, a program account may contain a combination of Eqis managed portfolios and Contracted Manager portfolios. The appropriate mix of managers will be determined by the client in conjunction with guidance from the client's Financial Professional. Model portfolios (and thus clients accounts) can be invested in a wide variety of securities and other assets such as (but not limited to) stocks, American Depositary Receipts (ADR's), exchange traded funds (ETF's), target term trusts, U.S Government bonds, money market funds and mutual funds. Eqis and/or Eqis Contracted Managers will make changes on a discretionary basis with respect to a client's account based on market, economic and political circumstances, and the individual characteristics of securities. Eqis

and/or Eqis Contracted Managers will typically utilize a long term buy and hold approach, although other strategies may be used where appropriate for a client's circumstances. Clients should refer to the Contracted Manager(s) information in Exhibit 1 herein for information regarding the methods of analysis, sources of information and investment strategies used by the independent registered investment adviser in servicing client accounts. Upon request, a client may shift between program types and will be charged the subsequent fee associated with that program type.

FolioFn Investments Inc., a FINRA registered broker dealer, provides all clearing and custodial services for the program. Pursuant to contractual authority from the client, Eqis will arrange for the execution of all securities transactions in client accounts. As Eqis does not have the discretionary authority to determine the broker dealer to be used, clients must direct Eqis as to the broker dealer to be used. Participation in the Program requires the appointment of FolioFn Investments Inc. as broker and custodian (hereinafter referred to as "FolioFn" or "Custodian"). Eqis does **not** have the discretion to change broker/custodian without the client's written permission. In directing the use of FolioFn, it should be understood that Eqis will not have authority to negotiate commissions among various brokers and best execution may not be achieved. Clients should consider whether or not the appointment of FolioFn as the sole broker may or may not result in certain costs or advantages or disadvantages to the client as a result of possibly more or less favorable executions. The client should consider that, depending upon the level of the wrap-fee charged by Eqis, the amount of portfolio activity in the client's account, the value of custodial and other services which are provided under the arrangement, and other factors, the wrap-fee may or may not exceed the aggregate cost of such services if they were to be provided separately and if Eqis were to negotiate commissions and seek best price and execution of transactions for the client's account.

Eqis will block trades where possible and when advantageous to clients. This blocking of trades permits the trading of aggregate blocks of securities composed of assets from multiple clients' accounts so long as transaction costs are shared equally and on a pro-rated basis between all accounts included in any such block. Block trading allows Eqis to execute equity trades in a more timely, equitable manner and to reduce overall costs. No personal trades will ever be included in any client blocks.

Eqis requires a minimum account size of \$100 for participation in the Program. This account size may be negotiable under certain circumstances. Clients may also make subsequent investments of \$25 or more, although any subsequent investment may be invested in a money market security within the program account until such time where there is a minimum of \$500 to reallocate into the designated asset allocation within the program account.

Eqis will update this Wrap-Fee brochure at least annually, no later than December 31 of each year. In addition, any material changes to the program during the year will dictate an interim update to this brochure. All updates will be made available to clients of Eqis.

Proxy Policy: As a matter of firm policy, Eqis does not vote proxies for Program client accounts. However the program custodian provides for online access to a proxy voting system that enables clients to vote their own proxies if they so desire.

If this Agreement is entered into by a trustee or other fiduciary; including but not limited to someone meeting the definition of "fiduciary" under the Employee Retirement Income Security Act of 1974 ("ERISA") or an employee benefit plan subject to ERISA, such trustee or other fiduciary represents and warrants to the Adviser, each Investment Manager and Eqis Capital Management that Client's participation in the Program is permitted by the relevant governing instrument of such plan, and that Client is duly authorized to enter into this Agreement. Client agrees to furnish Adviser with such documents as it shall reasonably request with respect to the foregoing. Client further agrees to notify Adviser in writing of any event which might affect this authority or the validity of this Agreement. Client additionally represents and warrants (a) that its governing instruments provide that an "investment manager" as defined in ERISA may be appointed, and (b) that the person executing and delivering this Agreement on behalf of Client is a "named fiduciary" (as defined in ERISA) who has the power under the plan to appoint an investment manager.

Contracted Manager and Use of Contracted Model Managers Portfolios

How we use outside managers

Eqis hires Contracted Managers, who are not employees or affiliates of Eqis, to manage client assets within the Program. Clients' assets are managed by tracking

each account's asset allocation to one or more model portfolios. Clients' portfolios are divided among these models based on the client's asset allocation. Clients' assets track the securities holdings of model portfolios. Strictly speaking, model

portfolios do not in fact contain any assets, but rather clients' accounts track model portfolios which determine what assets will be purchased and sold within clients' accounts. Clients' assets are held in their own accounts and are not commingled with the assets of other clients.

Information provided by clients and their financial professionals is critical for the selection of the asset allocation and thus the appropriate model managers. Changes in clients' priorities must be communicated to Equis so that Equis, the client's Financial Professional and the client can coordinate and adjust the allocation among model portfolios and Contracted Managers accordingly. Initially, the selection of Contracted Managers is determined by each client and the client's financial professional.

Contract Managers have no information about individual clients, but rather are charged with managing one or more model portfolios appropriate for the asset classes to which the model portfolios are assigned.

How We Select Managers

Managers consistent with our asset allocation methodology are selected according to their track record, risk controls, and investment methodology. We hire managers who we believe (inclusive of price) will provide the best risk adjusted return for all asset class and/or equity styles that comprise clients' asset allocations.

How we Monitor Managers

Performance of the Contracted Managers is monitored by Equis. Contracted Managers who under-perform relative to their asset class and/or equity style will, pursuant to the discretion of Equis, likely be replaced. Equis practices careful judgment and discretion when determining whether to hire and retain each Contracted Manager. When hiring Contracted Managers, we do not independently verify their returns, but rather rely of the returns presented by the contracted firm and/or third party sources.

Changing Managers

The Contracted Manager or managers assigned to a particular portion of clients' asset allocations may be changed at the discretion of Equis. Such changes would typically be made when a Contracted Manager is underperforming relative to its peers. When the Contracted Manager of a portfolio is fired, Equis will, for all clients tracking that model, select an alternative portfolio to fill that portion of clients' asset allocations.

If a client or his financial professional desire to switch between managers they may do so for no charge. The Equis Capital program is not designed for investors who plan to change managers frequently and reasonable limits to the number of manager changes allowed may be applied. For this purpose, Equis typically places an annual limit of 7 manager changes per year. Equis may provide relief from this limit at its discretion.

The Use of Contracted Managers

Adverse price movements and thus less favorable prices might be caused by Contracted Managers' outside activities (activities in accounts other than the model account) or due to the large orders created based on changes in the model account. Orders for clients' Equis accounts may be initiated at the same time or a different time than when the change in model portfolio is made by the model portfolio's manager. Equis does not typically evaluate changes made to model portfolios by their Contracted Managers. Rather, Equis typically limits our oversight to the results provided by a Contracted Manager, and all investment decisions made in a particular Contract Manager's model are made at the discretion of the Contracted Manager.

Some Contracted Managers may be paid more for sub-advisory management services than others. For Multi-Manager Account clients, the wrap fee charged by Equis to clients does not vary based on the Contracted Managers selected by Equis for a Multi-Manager Account.

Investment Strategies and Securities Analysis

Equis manages several separate model portfolios that provide diversification across the spectrum of domestic and international equity styles and fixed income. Portfolios typically consist of one or more of the following: individual equities, ADR's, ETF's, mutual funds, FDIC cash deposits and U.S. Government securities. Each client of Equis will be assigned an asset allocation comprised of up to ten of the Equis model portfolios. The assignment of an asset allocation will be based on the clients need, risk preferences and desires.

Individual equities are selected partially through a proprietary screening mechanism utilizing an augmented version of the Porter Five Forces Model. The Equis proprietary model explains how market structures determine the intensity of competition. We invest in firms that face less competition and thus have prospects for greater long term profits. The Porter Five Forces Model considers five sources of competition: customers demanding lower prices, suppliers demanding higher prices, substitute products providing alternatives, direct competitors cutting prices and increasing quality, and potential entrants increasing direct competition. An additional consideration is technological innovation, which influences the five forces. When selecting individual equities, Equis also takes the industry into consideration in the interest of maintaining diversification to maximize risk adjusted returns. ETF's or mutual funds will be selected on the basis of any or all of the following criteria: the fund's performance history; the industry sector in which the fund invests; the track

record of the fund's manager; the fund's investment objectives; the fund's management style and philosophy; and the fund's management fee structure. Portfolio weighting between funds and market sectors will be determined by each client's individual needs and circumstances. Clients will have the opportunity to place reasonable restrictions on the types of investments which will be made on the client's behalf. Clients will retain individual ownership of all securities.

Based on the fee structures outlined below, Equis stands to save operating costs (and thereby increase profit) if its own model portfolios (or low-cost Contracted Manager portfolios) are selected by clients and Financial Professionals rather than higher-priced Contracted Managers' portfolios. Equis, therefore, has an incentive to offer its own portfolios and lower-cost Contracted Managers as part of the Program. This is a conflict of interest that may affect the Contracted Managers and model portfolios selected by Equis for inclusion in the Program. Nevertheless, Equis has a significant interest in making sure that its clients and their financial advisors are happy with all aspects of the Equis Capital Wrap Fee Program. Toward this end, Equis will endeavor to select managers and portfolios we believe will provide the best risk adjusted return for clients.

Contracted Manager Disclosures

Contracted Managers have discretion over what assets are selected within the model(s) they manage. A Contracted Manager might have outside business or personal relationships that provide an incentive for the Contracted Manager to include certain assets rather than others. A Contracted Manager is not contractually obligated to include in model portfolio(s) any securities included in outside portfolios. Similarly, a Contracted Manager may include assets in models that are not included in portfolios managed outside of the Equis program.

Assets that Can be Contained in Clients Accounts

Model portfolios (and thus clients accounts) can be invested in a wide variety of securities and other assets such as (but not limited to) stocks, American Depository Receipts (ADR's), exchange traded funds (ETF's), target term trusts, and mutual funds.

Equis Capital Provides Asset Management, But Does Not Provide Tax Advice.

Buying and selling specific securities as part of a tax planning strategy is available to clients of Equis, but tax related decisions or counseling is not provided by Equis. If a client and the associated financial professional desire to buy and/or sell specific securities within an account, then specific orders should be emailed to us and we will make the requested transactions. Management of model portfolios might not be coordinated, and accordingly it is possible for wash sales to occur.

Dispersion

The performance of a model portfolio and a client's actual performance within that model can vary. There can also be dispersion between the performance of a client's assets that are allocated to a model portfolio and the actual model portfolio (managed outside the Equis Multi Manager Program) that the client's allocation is managed to match. This dispersion can cause a client's actual return for the portion of the client's account allocated to a particular model portfolio to be either greater than, equal to or less than the performance of the actual model portfolio (or the portfolio managed outside of the Equis Multi Manager Program that the model portfolio is managed to track, if any). In addition, dispersion can account for slightly different holdings or percentage holdings in a client program account versus the model portfolio.

Contracted Managers may manage portfolios outside of the Equis program and there may be dispersion between the performance reported by these services and those received by Equis clients. Finally, there may be dispersion between the returns earned by different clients whose investments are tracking the same model portfolio(s).

Dispersion among clients' accounts is common because of the combination of each client's assets being held directly in their own account and the differences between the timing of trade execution, size of accounts, client additions or withdrawals, and client imposed restrictions among other factors.

Equis utilizes several data resources in gathering historical information, as well as annual and quarterly reports. Using fundamental analysis, securities are actively monitored and evaluated relative to market and industry conditions.

Equis may use FDIC cash deposits to "sweep" unused cash balances until they can be appropriately invested.

Equis may use FDIC cash deposits to "sweep" unused cash balances until they can be appropriately invested.

Equis may utilize one or more of the following investment strategies when servicing Program participants: long-term and short-term investment strategies, and trading (securities sold within 30 days). Nevertheless, Equis places an emphasis on a long term buy and hold approach. Because these investment strategies involve certain additional degrees of risk, they may be recommended when consistent with the client's stated tolerance for risk.

Eqis utilizes a number of sources of financial information in the firm's analysis of securities including financial newspapers and magazines, research materials and reports, corporate rating services, annual reports, prospectuses, SEC filings and company press releases. Research services are received in various forms, which may include written reports, or information obtained on the World Wide Web.

Fee Schedule

Eqis charges an annual "Wrap-Fee" for participation in the Program. The Wrap-Fee is made up of two separate and distinctive parts, but charged to the client as one fee. The two parts are as follows: Part 1 the Eqis Program Fee, and Part 2 the Financial Professional Fee ("FP" fee). Both parts are detailed in [Table 1](#). The Wrap-Fee will be charged as a percentage of assets under management. Clients will be invoiced and fees will be directly debited from client accounts after the end of each calendar month. Where there is not enough cash or funds in an account to pay a fee, the account will be rebalanced so as to generate a sufficient level of cash or funds to meet this expense. As part of this agreement you authorize the Clearing Firm (FolioFn) to deduct the Wrap-Fees from your account as directed by Eqis. The fee calculation will be based on the average closing market value of the assets in the client's Program account over the previous calendar month. Value is calculated as the market value, or fair market value in the absence of market value, plus any credit balance or minus any debit balance. Your Eqis account may contain investments that charge a separate fee not included within the Wrap-Fee.

BREAKDOWN OF WRAP-FEE

Part 1, Program Fee

The Eqis Program Fee will be charged as a percentage of assets under management. There are three options that determine the Program Fee. Option 1 (Multi-Manager) includes managers other than Eqis (i.e., managers contracted by Eqis), but not excluding Eqis. Option 2 (Managed ETF) includes only exchange traded funds (ETFs) and no individual stocks or contracted managers. Option 3 (Unified Managed Account) includes managers other than Eqis (i.e., managers contracted by Eqis), but not excluding Eqis and ETFs. It will be up to the sponsor, the participants, and the Financial Professional to determine whether Option 1, Option 2, or Option 3 is best for the participant's particular circumstances. See [Table 2](#).

Part 2, Financial Professional Fee

The Financial Professional Fee is the portion of the overall Wrap Fee that is used to compensate the Financial Professional. The services that the Financial Professional will be compensated for include: introducing clients to Eqis, gathering and communicating clients' financial information, assisting in the manager selection process from the Eqis approved manager list, acting as a liaison between Eqis and clients, staying in contact with clients and informing Eqis of any material changes in clients' financial picture, and other various clerical or administrative duties. The Financial Professional Fee is negotiated between the Plan Sponsor, the Financial Professional and Eqis. The Financial Professional Fees shall under no circumstances exceed 1.5% per annum. The client may be able to negotiate a higher or lower Financial Professional Fee based on the individual Financial Professional that introduces the client to the program.

Other Wrap-Fee Details

The Wrap-Fee includes the Eqis Program Fee that covers all advisory fees, online performance reporting costs, separate account money manager fees and any fees that Eqis pays to a third party in conjunction with marketing the program (i.e. internal or external wholesalers or platform inclusion fees). In addition, the Wrap-Fee is inclusive of the Financial Professional Fee. The Wrap-Fee does not include certain administrative fees; for example, wire transfers, annual charges for qualified accounts, fees associated with the administration of the 401K/403B performed by a third party administrator, or certificate issues. Custodian charges a separate fee for brokerage, execution and custodial services (this fee is exclusive of the Eqis Wrap Fee Program fee.) The current negotiated rate for FolioFN is 20 basis points, charged monthly pro rata. This fee is charge separate from the Eqis

The above types of investments, methods of analysis, sources of information and investment strategies utilized by Eqis are only applicable to portfolios managed directly by Eqis. With respect to outside money managers, clients are requested to refer to the description of Contracted Managers portfolios in Exhibit 1 for more information on that manager's investment strategies, methods of analysis, and other pertinent investment information.

Wrap Program fee and subject to change. A minimum of \$100 of assets under management is required to participate in this program. Securities transactions affected for the clients' accounts may also include, mark-ups, mark-downs, or dealer spreads to market makers or other principals from whom securities were obtained by FolioFn. These mark-ups, mark-downs, or dealer spreads will be retained by the market maker or other principal and will not be credited or reimbursed to the client's account.

Some of the model portfolios available to clients are managed by employees and/or principals of Eqis. Managers of these model portfolios are paid salary by Eqis and therefore do not directly receive any particular percentage of the wrap fee. Other model portfolios are managed by managers who are not employees or principals of Eqis. These outside managers that are contracted by Eqis receive a percentage of assets under management as compensation. Outside manager compensation is negotiated and based on the asset class, equity style, and tenure of manager, among other various criteria judged by Eqis to be important. Contracted Manager compensation is included in the Wrap-Fee of Option 1. **Alternative Strategies (Alt. Strat)** is only available as an asset class within the UMA program. Some managers are limited to a maximum investment of 75% of the entire account in Alt. Strat. based on Eqis assessment of that managers diversification.

Negotiability of Fees and Account Minimums: In certain circumstances, all of Eqis fees and account minimums may be negotiable.

Fee Calculation: The fee charged is calculated as described above and is not charged on the basis of a share of capital gains upon or capital appreciation of the funds or any portion of the funds of an advisory client, pursuant to Section 205(a)(1) of the Investment Advisers Act of 1940, as amended (hereinafter "IA Act").

Fee Payment: Clients will be invoiced and Wrap Fees will be directly debited from client accounts at the beginning of each calendar month. The fee calculation will be based on the average daily market value of the assets in the client's Program account over the previous calendar month. Value is calculated as the market value, or fair market value in the absence of market value, plus any credit balance or minus any debit balance. Fees will be directly debited in accordance with the Client Services Agreement.

Manager Selection: Plan Sponsor selects the money managers for the Plan Participants from a pre-approved list provided by Eqis Capital Management. These selected money managers may be changed by the Plan Sponsor from time to time.

Termination of Advisory Relationship: A client agreement may be canceled at any time, by either party, for any reason upon receipt of written notice. The client has the right to terminate an agreement without penalty within five (5) business days after entering into the agreement. Thereafter, either Eqis or Client may terminate this Agreement upon fifteen days written notice. Upon termination of any account, any prepaid, unearned fees will be promptly refunded, and any earned, unpaid fees for any unbilled portion of a month will be collected prior to disbursement of funds.

Mutual Fund Fees and Expenses: All fees paid to Eqis for investment advisory services are separate and distinct from the fees and expenses charged by ETF's or mutual funds to their shareholders. These fees and expenses are described in each fund's prospectus. These fees will generally include a management fee, other fund expenses, and a possible distribution fee. A client could invest in an ETF or mutual fund directly, without the services of Eqis. In that case, the client would not receive the services provided by Eqis which are designed, among other things, to assist the client in determining which ETF's or funds are most appropriate to each client's financial condition and objectives. Accordingly, the client should review both the fees charged by the ETF's or funds and the fees charged by Eqis to fully understand the total amount of fees to be paid by the client and to thereby evaluate the advisory services being provided.

Fee Schedule Tables

Table 1

The maximum Wrap-Fee (inclusive of parts 1 and 2) charged to clients is as follows:

<u>Assets Under Management</u>	<u>MAXIMUM Annual Fee (%)</u>
All Account Values	Up to 2.25%*

* The actual Wrap-Fee charged to each client will depend in part on the negotiated "Financial Professionals" Fee, as detailed in Part 2 below. The exact Financial Professional fee charged to you will be specified in section #9 (Financial Professional's Report) of this Account Application. Similar advisory services may be available from other registered investment advisers for similar or lower fees.

Table 2

If client invests in a Multi Manager Managed account, the Program Fee will be:

<u>Assets Under Management</u>	<u>Annual Fee (%)</u>
All Account Values	0.75%*

If client invests in a Managed ETF account, the Program Fee will be:

<u>Assets Under Management</u>	<u>Annual Fee (%)</u>
All Account Values	0.55%*

If client invests in a Unified Managed account, the Program Fee will be:

<u>Assets Under Management</u>	<u>Annual Fee (%)</u>
All Account Values	0.80%*

Note: Custodian charges a separate fee for brokerage, execution and custodial services (this fee is exclusive of the Equis Wrap Fee Program fee.) The current negotiated rate for FolioFN is 20 basis points, charged monthly pro rata. This fee is charge separate from the Equis Wrap Program fee and subject to change.

Additional Information about Fees and Services

In considering the investment program described in this brochure, a prospective client should be aware that the Program may cost a client more or less than purchasing the actual services separately from other advisers or broker-dealers. Clients should also be aware that the charge of an Initial Consulting Fee may not be considered standard in the investment advisory industry.

In addition, the amount of compensation received by Equis and the Financial Professional(s) as a result of the client's participation in the Program may be more or less than what Equis and/or the Financial Professional would receive if the client paid separately for investment advice, brokerage and other services. Therefore, Equis and the Financial Professional(s) may have a financial incentive to recommend the Program over other advisory programs or services.

The factors that should be considered by a prospective client include the size of a client's portfolio, the nature of the investments to be managed, commission costs,

custodial expenses (if any), the anticipated level of trading activity, and the amount of advisory fees charged for managing the client portfolio.

Advisory fees may vary among Equis clients based upon a number of factors, including the size of the client's account, the negotiated financial professional fee, the types of investments, the nature of related services provided, and the length of the advisory relationship with a client, among other things.

Clients should understand that similar advisory services may be available from other registered investment advisers for a higher or lower fee.

Clients should understand that if they go to a cash position, their account will still be charged the fee associated with their current Program Type.

Clients may be charged (by the custodian) up to \$4.50 for liquidating each security transferred to the clients' accounts to be managed under an Equis program.

Conflicts of Interest

Equis utilizes FolioFm for all brokerage and custodial services. For this reason, the decision by any client to authorize Equis to place a trade is the functional equivalent of directing Equis to execute the trade through FolioFm. Certain associated individuals of Equis are also licensed insurance agents. As such, these individuals can sell insurance products to advisory clients and the licensed agent may receive separate yet typical insurance-based compensation and/or commissions. While these individuals endeavor at all times to put the interest of Equis's advisory clients first as part of Equis's fiduciary duty, clients should be aware that the receipt of additional compensation itself creates a conflict of interest, and may affect the judgment of these individuals when making advisory/investment recommendations.

Equis or individuals associated with Equis may buy or sell securities identical to, or different from those recommended to clients for their personal accounts. In addition, any related person(s) may have an interest or position in a certain security(ies) which may also be recommended to a client.

It is the expressed policy of Equis that no person employed by Equis may purchase or sell any security immediately prior to a transaction(s) being implemented for an advisory account, and therefore, prevents such employees from benefiting from transactions placed on behalf of advisory accounts.

If the Financial Professional (FP)/solicitor meets certain business related qualifications, Equis may provide up to 5 basis points of the fee paid by the client as an incentive to the client's FP/solicitor for the purpose of marketing and servicing new and existing clients. In order to participate in the incentive provided by Equis, the FP/solicitor needs to maintain certain asset levels and achieve certain new asset levels. The level of incentive increases based upon the previously mentioned criteria. This incentive creates a potential conflict of interest for the FP/solicitor because the FP/solicitor receives compensation that increases based on the level of

assets managed through the program. This compensation does not impact the level of fees that clients pay and clients are under no obligation to follow the recommendations of their FP/solicitor regarding using the program.

As these situations represent a conflict of interest, Equis has established the following restrictions in order to ensure its fiduciary responsibilities:

1. A Director, officer or employee of Equis shall not buy or sell securities for their personal portfolio(s) where their decision is substantially derived, in whole or in part, by reason of his or her employment unless the information is also available to the investing public on reasonable inquiry. No person of Equis shall prefer his or her own interest to that of the advisory client.
2. Equis maintains a list of all securities holdings for itself, and anyone associated with this advisory practice with access to advisory recommendations. These holdings are reviewed on a regular basis by an appropriate officer of Equis.
3. All clients are fully informed that certain individuals may receive separate compensation when effecting transactions outside of the wrap fee Portfolio Management service.
4. Equis requires that all individuals must act in accordance with all applicable Federal and State regulations governing registered investment advisory practices.
5. Any individual not in observance of the above may be subject to termination.

Equis will not aggregate trades for its associated persons with client trades.

Education and Business Standards

Equis requires that investment adviser representatives maintain general standards of education and business experience, especially related to investments. Investment adviser representatives must also satisfy state-by-state qualification requirements within the states in which the representatives have places of business. Generally, states require representatives to complete the Series 65, or Series 7 and 66 NASD examinations.

Equis also requires that all Financial Professionals be properly registered as investment advisers or licensed as investment adviser representatives where required pursuant to relevant federal and/or state regulations.

Officers of Equis

William R Nelson

BORN: 6/15/1971

William Robert Nelson Jr. graduated from San Diego State University with a degree in Finance. He moved to Chicago where as a member of the Chicago Board of Trade he made markets in financial futures. Subsequently, he earned a Ph.D. in economics from George Mason University and was appointed as a professor to the department of Finance and Managerial Economics in the State University of New York at Buffalo School of Management. His original research has been published in the American Economic Review, DePaul Journal of Healthcare Law, The International Conference on Information Technology ITCC 2004 Proceedings, the Journal of Economic Behavior and Organization, Latin American Finance and Capital Markets, and the Latin American Law and Business Report.

Curtis C. Brown, Jr.

BORN: 9/14/1951

Curtis C. Brown, Jr. graduated from San Diego State University with a degree in Political Science. He received an MBA degree from National University and completed advanced business and leadership studies at the Wharton School, University of Pennsylvania. Prior to joining Equis in October of 2010, he spent thirty

years with the investment firm of Merrill Lynch. His career started as a Financial Advisor and he moved onto a variety of leadership positions, including Managing Director, National Sales Manager, Assistant to the Chairman and President, and Regional Managing Director.

Duane Menting

BORN: 3/03/1952

Duane Menting, Esq. graduated with a B.S. degree 1976 from the University of Wisconsin - Stevens Point. He received his JD degree in 1980 from Indiana University - Bloomington. He completed his LLM - Tax degree in 1991 at Golden Gate University - San Francisco. He has run a successful private legal practice for 20 years working with Fortune 500 companies. He joined Equis Capital Management in March of 2008. He is the Chief Financial Officer and the Chief Legal Counsel.

Jennifer C Winters

BORN: 9/25/1971

Jennifer C Winters graduated from Lewis University with a B.A. in Communications. She has been with Equis Capital Management since February of 2003. She is the Chief Compliance Officer.

Portfolio Manager Selection and Review

Dr. William R. Nelson is the Chief Financial Strategist of Equis and the primary Portfolio Manager for portfolios managed by Equis for the Program. Dr. Nelson performs the day to day management of the portfolios managed by Equis. In addition Dr. Nelson designs asset allocation models for the Program that are based on the needs and risk preferences of clients. These models are used within Equis's proprietary proposal generation system. The core of Equis's management philosophy is distilled into the Equis System that employs an augmented version of the Porter Five Forces Model in conjunction with the implications of modern portfolio theory and recent empirical evidence. The processes employed by Equis are continuously updated to provide what Equis and Dr. Nelson believe to be the best possible money management for Equis clients. Additional insights into the market are provided by Equis's distinguished business advisory board. Fortunately, advanced technology allows Dr. Nelson to act as the Portfolio Manager for all clients in the Program that are invested in an Equis

Managed Portfolio.

Clients' Financial Professionals will communicate clients' needs to Equis which will in turn update Dr. Nelson with changes in the financial circumstances and needs of clients, so that their portfolios can be appropriately managed.

Dr. Nelson is not personally available to address clients' questions and concerns. Rather, questions should be sent through clients' Financial Professional(s), who will forward the questions to Equis should the financial professional be unable to respond. Equis will provide the answer to the Financial Professional(s), who will relay the answer to the client.

Dr. Nelson's performance information is not reviewed by the sponsor or a third party, nor calculated on a uniform and consistent basis.

Client Reports

All Documents Are Delivered Electronically

We believe we are one of the most advanced registered investment advisory firm in terms of providing account information to our customers electronically. Our opening and maintaining your account is conditioned on your agreement to receive all notices, documents, and other information related to your account and investments electronically. This may be done through an online posting on our Web site, email, Adobe Acrobat's portable document format (PDF), hypertext mark-up language (HTML), or other electronic media to which you consent. Your consent to electronic delivery extends to all information required to be provided by us, the issuers of the securities in which you invest, and other third parties. Program clients will receive account statements and confirmations of transactions directly from the custodian. Fees are calculated by Equis and invoices are made available to the client before fees are debited from clients' accounts. All clients should verify the accuracy of fee calculations. The above mentioned client reports will be made available to clients through electronic mail and the Internet. They are stored and available for viewing or printing from your filing cabinet or elsewhere on our Web site. You agree that when we send these email notices to you that they constitute delivery to you of the information mentioned in the email even if you do not actually access the information on our Web

site. You may revoke this consent to electronic delivery at any time by providing written notice to us. However, since we have priced our services based on the considerable savings of electronic delivery, we reserve the right to terminate your account or, in certain instances, charge you an extra fee if you ask for paper documents. Clients participating in the program who choose to receive reports in hard copy will be assessed up to an additional \$100 annual administrative fee per account. You agree to keep a working email address and other current contact information and will update your account information immediately if your email address or other contact information changes. If you do not maintain an e-mail address that is working and accessible to us, and we believe we are required to provide you paper notice or documents of particular matters or actions, and we do so, we may charge you an additional annual administrative fee of up to \$100 per account. You acknowledge that you may incur costs (such as online service provider charges or printing costs) associated with the electronic delivery of information to you. To view PDF files, you will need to download the Adobe Acrobat Reader, which is provided for free. If your email address or other contact information changes at any time, you need to update your account information.

Review of Accounts

While the underlying securities within the Program accounts are continuously monitored, these accounts will be formally reviewed at least quarterly by Dr. Nelson. The review will be conducted to determine if the current investment holdings of the account are consistent with the client's investment objectives as outlined at the inception of the advisory relationship. More frequent reviews may be triggered by

material changes in variables such as the client's individual circumstances, drift from the model portfolio weighting, and economic environment. Equis or a designee (typically the Financial Professional) will contact the client on at least an annual basis to discern changes to the client's financial circumstances or investment objectives.

Additional Compensation

Equis does not accept soft dollars or any other additional compensation above the fees paid by the client to Equis outlined in the Fee Schedule. Nevertheless, Equis may receive research reports from FolioFm. The receipt of such reports is not related to any commitment with FolioFm for transaction levels in exchange for any services or products from FolioFm, but does create a possible conflict of interest of which clients should be aware in assessing Equis's brokerage recommendation.

Financial Professionals may receive incentive awards for the recommendation or introduction of investment products to advisory clients. The receipt of this compensation may affect a representative's judgment in recommending products to clients.

Exhibit 1**MODEL PORTFOLIO DESCRIPTIONS**

Egis provides access to model portfolios that provide diversification across the spectrum of domestic and international equity styles and fixed income. Each client of Egis will be assigned an asset allocation comprised of up to ten of the model portfolios. The assignment of an asset allocation will be based solely on the client's needs and risk preferences. Some of the model portfolios are managed in house by Egis; others are managed by independent, contracted managers. Below is a brief description of model portfolios arranged by asset class and equity style.

Large Cap Growth Model Portfolios-Benchmarked to the Russell 1000 Growth Index**Advisor Partners / AP Tax Managed Index LCG**

The U.S. Equity Large Cap Tax Managed Index Strategy seeks to maximize after-tax returns while maintaining risk characteristics similar to the broad U.S. equity market through a managed portfolio of individual securities. The portfolio's benefits include diversification across sectors combined with tax efficiency. Tax efficiency is achieved by selecting tax efficient vehicles and/or through active tax management. The sectors with the greatest representations within the portfolio tend towards finance, information technology, and healthcare. Advisor Partners is an investment management firm specializing in providing customized, tax-managed, index-based investment solutions for advisors and their clients. The average tenure of the principals exceeds two decades and contributes to their depth of investment judgment and expertise. They are privately owned and managed by the principals.

Egis Capital Management / Egis Large Cap Growth

Egis Large Cap Growth is managed to provide clients diversification, primarily among U.S. large capitalization companies oriented towards growth. Equities are selected partially through a proprietary screening mechanism utilizing an augmented version of the Porter Five Forces Model. The Egis proprietary Model explains how market structures determine the intensity of competition. We invest in firms that face less competition and thus have prospects for greater long term profits. The Porter Five Forces Model considers five sources of competition: customers demanding lower prices, suppliers demanding higher prices, substitute products providing alternatives, direct competitors cutting prices and increasing quality, and potential entrants increasing direct competition. An additional consideration is technological innovation which influences the five forces. Egis places an emphasis on a long-term buy and hold approach. When selecting individual equities Egis also takes into consideration the industry in the interest of maintaining diversification to maximize risk adjusted returns.

Financial Trust Asset Management / American Disciplined LCG

The American Disciplined Equity Strategy invests in the highest rated stock within each of the 12 industry sectors of the Standard & Poor's 500. Stocks within each sector are ranked according to FTAM's proprietary rating system which compares the companies in 3 broad areas. Their Earnings Momentum index ranking compares each company's revenue and net income growth in each of the last 3 years. The profitability + quality index ranking compares profitability and quality factors such as return on equity, return on assets, profit margin, and financial leverage. Their Value Momentum index ranking compares valuation and momentum, rating each stock by low price to sales ratio and high 1 year, 3 month, and 1 month momentum factors. The scores are then combined to come up with an overall rating. The ADE portfolio is invested on an equally weighed basis in the top 20% of the stocks in each industry sector with industry weights that are kept equal to the S&P 500. On a quarterly basis the portfolio is rebalanced.

Hanseatic Management Services, Inc /Hanseatic LCG

Managers use a multi-time dimensional system that identifies large-cap stocks whose emergent price trends have better than normal probability of persisting into the 6-36 month target holding period with positive alpha. Lower time dimension patterns are then used to identify shorter term entry and exit points. Research has shown that time parameters in the relevant time dimensions, monthly and weekly in particular, also play an important role. It is the intersection of multi-time dimensional trend measurement and time boundaries that is the foundation of the buy-sell disciplines. The portfolio typically contains at least 100 stocks providing for diversification. Another interesting characteristic of the portfolio is its relatively low correlation with indexes in its asset class. Since 1991 Hanseatic has applied proprietary quantitative buy and sell disciplines to manage equity portfolios' returns, risk, and structure. Their buy disciplines provide a consistent stock selection process that is adaptable to varying market environments.

Laidlaw Group / Laidlaw Group LCG

The Laidlaw Group's Large Cap Value portfolio focuses investments in companies with the following characteristics: high cash flow to market value ratio, high asset to debt ratio, profitability, and growth potential. Close attention is also paid to the sectors in which firms operate. The management may overweigh or underweigh sectors based on their analysis of economic trends. The Laidlaw Group is a family business founded by Robert Laidlaw and his son David. Robert, the current Chairman, is an industry veteran who began his career on the floor of the New York Stock Exchange in 1958 after graduating from Yale, with a degree in philosophy.

His nearly 50 years of industry experience provide the foundation from which the Laidlaw Group excels.

Martin Investment Management, LLC / Martin Quality Growth

Martin Investment Management, LLC of Evanston, Illinois is an employee-owned, SEC-registered equity investment adviser and the winner of numerous industry distinctions including "Equity Manager of the Year" at Opal's 2008 Emerging Manager Conference and was a finalist for the same award in 2009, "Notable Outperformer" in a study entitled "Women Owned Firms" by Altura Capital in February 2009, Top Ten Performer in the Informa Investment Solutions's PSN Investment Manager Database for the eighth time in the last fourteen quarters ending December 31, 2009.

Our "Best Ideas" Long Term Growth strategy typically contains 20-30 of 2,000 stocks that are screened for high returns on invested capital, projected long-term growth, strong cash flow and capital structure. Stocks selected for portfolios should ideally have understandable business, distinct strategies, products, and services, growing earnings and sales, and strong competitive positions. Turnover has averaged about 20% annually. A stock is sold if the company's fundamentals decline, the valuation becomes excessive, the position becomes too large, or more attractive ideas are found.

Patrick Martin is the founder, a managing director, and the primary portfolio manager. His educational accomplishments include an A.B. in economics from Dartmouth College in 1972 and an M.B.A. from Dartmouth's Amos Tuck School in 1974. He holds the professional designations of Chartered Financial Analyst (CFA) and Certified Public Accountant (CPA). Mr. Martin is a member of the CFA Society of Chicago and the CFA Institute.

Sandra Martin and Mary Ellen Zellerbach assist in managing the firm's strategy. Ms. Martin has been a Managing Director since 2003. She holds an A.B. from St. Xavier College, an A.M. from the University of Illinois and an M.B.A. from Loyola University of Chicago. Ms. Zellerbach joined Martin Investment Management, LLC in 2003 after founding Mellon Capital Management. She earned an A.B. in Economics from Wellesley College and an M.B.A. from the Graduate School of Business at Stanford University.

Navellier / Global Large Cap

Navellier implements its investment philosophy through a combination of quantitative and fundamental analysis. The initial portfolio universe includes foreign listed equities and American Depositary Receipts (ADRs) with market capitalizations equal to or greater than \$1 billion and domestic stocks with market capitalizations equal to or greater than \$5 billion. Stocks must have ample liquidity in both the domestic listed market and their home market. The process begins with a computer driven analysis based on Modern Portfolio Theory. The firm calculates reward (alpha) and risk (standard deviation) characteristics for the initial universe of stocks. Trailing 52-week "alphas" are divided by trailing 52-week "standard deviations" to create a "reward/risk" ratio for each stock. These stocks are then reviewed on a fundamental basis. The fundamentals reviewed and measured are based on Navellier's proprietary analysis of what is currently "in favor" on Wall Street and the Accounting and Governance Risk rating (AGR). Stocks are ranked on both the quantitative and fundamental analyses, and the final step is the portfolio construction process, which combines country allocation, weighting of stocks, and portfolio formation. Country allocation is determined by three factors: (1) the direction of interest rates relative to other economies; (2) the level of the average reward/risk ratio for all companies in a given country relative to other countries; and (3) the country's weight in the relevant index. The portfolio is adjusted monthly based on market conditions.

James O'Leary, CFA is the lead Portfolio Manager for the Navellier Asia, Navellier Europe, and Navellier Latin America, Global Small Cap, and Global Growth strategies. He joined Navellier in 1996 and has thirty-five years of experience in the securities industry. Prior to joining Navellier, Mr. O'Leary was Managing Director at Lexington Management Corporation and a Director at Federated Investment Counseling. His B.S. in business administration is from Bowling Green State University and his M.B.A. is from the University of Cincinnati.

Sawgrass Asset Management / Sawgrass LCG Best Ideas

Sawgrass Asset Management, L.L.C. is a 100 percent employee-owned, SEC-registered investment advisor. The firm provides innovative growth equity investment management services to institutional and high net worth investors. The firm was founded on January 15, 1998 in Jacksonville, Florida, by principals Andrew Cantor, Dean McQuiddy and Brian Monroe. The firm consists of a core group of key investment professionals who have worked together for more than 20 years. The core investment team of portfolio managers, equity traders, and client service professionals came to Sawgrass from Barnett Capital Advisors, Inc. and have been with the firm since its inception.

Windward Capital Management Co / CapApp

Windward Capital Management Co., based in Los Angeles, California, offers several large cap growth strategies. It has emerged as a top-rated money manager and continues to produce superior risk-adjusted performance. The firm is 100% employee-owned.

The investment process incorporates a top-down thematic approach combined with a disciplined, fundamental, bottom-up research. Thematic investing involves the

initial determination of a number of compelling cyclical and secular investment themes. After these themes are identified, rigorous financial analysis of those companies is conducted at the individual company level.

Our portfolios display the following fundamental characteristics:

Quality: Dominant companies displaying financial strength within their economic sector. These are leading companies with best-in-class managements, high incremental returns on invested capital, and business models with sustainable competitive advantages.

Growth: Companies with predictable and sustainable above-average growth in revenue, earnings, and free cash flow.

Value: Companies that are undervalued on either an absolute or relative basis, based upon our projections of future cash flow and earnings.

Robert Nichols, Ph.D. is the founder, Chief Executive Officer, and Portfolio Manager of Windward Capital Management Co. For the twenty-one years prior to founding Windward (1971 to 1992), he was President of the Roley, Nichols Capital Group, Inc., in Los Angeles. While at the firm, he was President of RNC Capital Management where he managed more than \$1.25 billion in portfolios of taxable, municipal, corporate and multi-employer retirement plans and foundation clients. In addition to his corporate responsibilities, he was a senior member of the Investment Policy Committee and Research Committee. In 1990, he and his partners sold the firm to an Austrian bank. His academic degrees include a Ph.D. in Management from the Claremont Graduate School's Drucker School of Business.

Donald Bessler, CPA, Chief Investment Officer and Portfolio Manager, came to Windward Capital Management Co. from First American Capital Management where he was a Senior Portfolio Manager/Senior Vice President. Prior to First American Capital Management, he was a Principal and the Director of Research at Roxbury Capital Management LLC, a \$14 billion asset management firm in Los Angeles. As Director of Research and a voting member of the Investment Committee, he supervised a team of six Equity Research Analysts in addition to personally managing more than \$1 billion in client assets. He was also responsible for managing the Roxbury Special Situations Portfolio and the Special Situations Hedge Fund. Mr. Bessler began his career as a Certified Public Accountant and attained the level of Audit Manager with the accounting firm Price Waterhouse. Mr. Bessler graduated *summa cum laude* from Lehigh University with a B.S. in Finance, a B.S. in Accounting, and a B.A. in Psychology.

Large Cap Value Model Portfolios-Benchmarked to the Russell 1000 Value Index

Advisor Partners / AP US High Dividend Yield LCV

The U.S. Equity High Dividend Tax Managed Index Strategy seeks to maximize after-tax returns while maintaining risk characteristics similar to the broad U.S. equity market through a managed portfolio of individual securities. The portfolio's benefits include diversification across sectors combined with tax efficiency. Tax efficiency is achieved by selecting tax efficient vehicles and/or through active tax management. The sectors with the greatest representations within the portfolio tend towards finance, information technology, and industrials. Advisor Partners is an investment management firm specializing in providing customized, tax-managed, index-based investment solutions for advisors and their clients. The average industry tenure of the principals exceeds two decades and contributes to their depth of investment judgment and expertise. They are privately owned and managed by the principals.

Egis Capital Management / Egis Large Cap Value

Egis Large Cap Value is managed to provide clients diversification primarily among U.S. large capitalization companies oriented toward value. This portfolio often features investments in consumer staples, financial, or manufacturing sectors. Equities are selected partially through a proprietary screening mechanism utilizing an augmented version of the Porter Five Forces Model. The Egis Proprietary Model explains how market structures determine the intensity of competition. We invest in firms that face less competition and thus have prospects for greater long-term profits. The Porter Five Forces Model considers five sources of competition: customers demanding lower prices, suppliers demanding higher prices, substitute products providing alternatives, direct competitors cutting prices and increasing quality, and potential entrants increasing direct competition. An additional consideration is technological innovation which influences the five forces. Egis places an emphasis on a long term buy and hold approach. When selecting individual equities Egis also takes into consideration the industry in the interest of maintaining diversification to maximize risk adjusted returns.

Golub Group LLC / Golub Group Equity

The Golub Group of San Mateo, California has managed the wealth of high-net-worth individuals and institutions since 2003. The six investment professionals and 12 client service and operations professionals own 100% of the Golub Group that managed approximately \$600 million in total assets as of December 31, 2009.

The large cap value portfolio typically invests in 30-35 companies with strong cash flows, solid balance sheets, histories of consistent profitability, high returns on equity, successful and proven management teams, the capacity to pay and raise dividends, and honest reporting of financial results. Securities are purchased when we think they are temporarily undervalued relative to their intrinsic values. Estimated intrinsic values are triangulated using several valuation techniques, including discounted cash flow models, dividend discount models, net asset value models, sum-of-the-parts models and comparing standard multiples, such as P/E,

P/B, EV/EBITDA, etc., to peer companies and historical trends. The average market capitalization of our equity holdings is approximately \$100 billion. Typical portfolio turnover is low, averaging between 20-25% annually. Golub Group Equity Composite has outperformed the S&P 500 in seven of the past eight years and achieved a Morningstar™ Overall 5-Star rating.

The six-person Investment Committee has decades of cumulative experience. Michael Golub, the firm's founder, leads the Investment Committee and has over 40 years' investing experience. Colin Higgins, President and Director of Research, has 13 years' experience as a portfolio manager and research analyst. In addition, the team consists of Kurt Hoefer, CFA (19 years' experience), Tim Rich, CFA (11 years' experience), John Dowling, CFA (11 years' experience) and Dave Ogburn (12 years' experience). There has been no turnover in the Investment Committee since the firm's inception.

Loudon Investment Management, LLC / LIM Equity Income

Since its founding in 2003, Loudon Investment Management (LIM) has implemented its thorough and unique investment process that contains three overlays: statistical, fundamental and thematic.

Objective Statistical analysis – All stocks considered for purchase must pass several tests, the most important of which is that at the time of purchase, the current dividend yield for every stock must exceed the market yield and be considerably higher than its average yield of the past 4-5 years. Thus, we do not just buy high-yielding stocks but only those whose yields are historically high because either the dividends have risen faster than the stock price or the stock price has declined to a level that substantially increases the current yield relative to its own history.

Subjective fundamental analysis is oriented toward the long term. It specifically concentrates on the potential growth and health of the business over a full market cycle. We are primarily high-quality, large company investors.

Subjective thematic analysis of macro industry trends may lead to substantial over or under weightings of sectors relative to the general stock market, but security and company specific hurdle must still be met.

The application of the above principles currently results in portfolios with equity income yields of about 4.0% characterized by "unbalanced" diversification and below-average equity volatility. Investments are long term in nature with an average turnover rate of around 20%. The investment horizon is open-ended, but if the price of an individual stock moves up at a rate well ahead of its fundamental progress as measured by cash flow and a declining income yield, we are perfectly willing to realize the gain. The process is repeated by buying another high-quality depressed issue producing current income above both the general stock market and also what we have sold. Over time, this discipline ratchets up the growth in current income production and the investment performance versus what it would have been were we just buy and hold investors.

LIM's equity income style was founded by Douglas M. Loudon. Mr. Loudon began his investment career at Scudder Stevens & Clark in New York in 1971. He was named a General Partner in 1982 and became a Managing Director when the firm incorporated in 1985. In 1986, he was named Investment Director for the American Association of Retired Persons' (AARP) Investment Program. This program consisted of a group of mutual funds concentrating on producing competitive investment returns with below-average investment risk, the same approach that is employed by LIM today. Early in 2003, Mr. Loudon formed LIM to more fully implement the approach he had developed over many years. Mr. Loudon holds a B.A. in Economics from the University of North Carolina and an M.B.A. in Financial Management from Pace University and is a Chartered Financial Analyst.

Texas First Investment Management Company / Texas First LCV

Texas First Investment Management Company has provided significant equity returns with relatively low risk by combining a long term, conservative, and value-oriented approach with an unparalleled expertise acquired by investing solely in Texas-based publicly-held companies. The stock selection criteria include, but are not limited to, value measures of sustainable earnings, sustainable cash flow, and adjusted book value. Potential catalysts to unleash value are also critical considerations. Holdings are carefully diversified among industries. Money Manager Review rated the Large Cap Value portfolio as the top performing large cap value portfolio in the country, for the 5 year period 2001 – 2005. It has outperformed the S&P 500 for seven consecutive years, with below-average risk. During no calendar year has the portfolio ever lost money.

Tom Johnson Investment Management, Inc. / TJIM LCV

The goal of the TJIM Core/Relative Value Stock Portfolio is to maximize total return over a business cycle. We believe in creating a prudent, well-diversified, high-quality portfolio that addresses capital preservation and risk. The focus is on purchasing common stock of companies that have valuations lower than their peer group in industries and sectors that provide the best opportunity in the foreseeable future. Historically, this portfolio has a blend of equity issues that match "value" and "growth" descriptions. Some consultants classify our style as core with a value bias. The portfolio will under normal circumstances contain 30 to 50 securities and is diversified across most sectors. Tax efficiency is addressed by focusing on turnover and realizing gains and losses when in general they provide the most benefit to clients under the U.S. tax code. TJIM was established in 1983 to provide independent investment management services for high net worth individuals and families, public funds, corporations, foundations, endowments, and unions throughout the United States. TJIM's conservative investment philosophy has always maintained that a quality, well-diversified portfolio that addresses both capital appreciation and capital preservation is the most prudent and consistent way

to achieve clients' investment goals. In all our efforts, we seek to provide above average returns in good markets while preserving our clients' wealth when down markets occur.

Mid Cap Growth Model Portfolios-Benchmarked to the Russell Mid Cap Growth Index

Egis Capital Management / Egis Mid Cap Growth

Egis Mid Cap Growth is managed to provide clients diversification among U.S. mid capitalization companies primarily oriented towards growth. Many of these stocks are found in the volatile technology, health-care, and services sectors. Equities are selected partially through a proprietary screening mechanism utilizing an augmented version of the Porter Five Forces Model. The Egis Proprietary Model explains how market structures determine the intensity of competition. We invest in firms that face less competition and thus have prospects for greater long-term profits. The Porter Five Forces Model considers five sources of competition: customers demanding lower prices, suppliers demanding higher prices, substitute products providing alternatives, direct competitors cutting prices and increasing quality, and potential entrants increasing direct competition. An additional consideration is technological innovation which influences the five forces. Egis places an emphasis on a long-term buy and hold approach. When selecting individual equities, Egis also takes into consideration the industry in the interest of maintaining diversification to maximize risk adjusted returns.

Gaineswood Investment Management, Inc. / Gaineswood Standard

Gaineswood Investment Management, Inc. began in 1995 as a publisher of small and mid cap equity research for the institutional investment marketplace. The firm has 10 employees, 5 of whom are analysts whose work is utilized by the firm's portfolio manager and founder, William Baker, CFA. The analysts and manager have a fundamental investment process known as "Persistent Growth Investing," which stresses long-term growth drivers and competitive advantages when selecting stocks. Meticulous investigative research and modeling is used to gain a complete understanding of investments. Institutions, family offices, registered investment advisors, and high-net-worth individuals benefit from Gaineswood's expertise and independence as a private, founder-owned corporation that is not affiliated with a major investment broker or advisor. The affiliates of Gaineswood Investment Management, Inc. are its research broker-dealer, GARP Research & Securities Co. (founded 2003) and the general partner of its private limited partnership, GARP Capital LLC (founded in late 1999). GARP Research & Securities Co. serves the professional money management sector.

The portfolios within the Standard composite seek investment in companies capable of substantial earnings growth over multiple years. Turnover of positions is limited and very long-term. Gaineswood's Standard composite of portfolios contains 30-50 common stocks, generally with a market cap between \$500 million and \$10 billion. Position sizes are usually between 2% and 3%, with some at 5%. The broadly-defined medical and technology sectors are habitually well-represented, but others can be significant depending upon fundamentals. Cash can be 10% but is usually lower. Derivatives are not used in this strategy.

Before founding Gaineswood, William Baker, CFA previously managed in excess of \$100 million for nine years at Oppenheimer Mutual Funds, and earlier was an analyst at what is now Van Kampen Investments. Mr. Baker received an M.B.A. from the Amos Tuck School (Dartmouth College) in 1980 and a B.A. from the University of Pennsylvania in 1978.

Hanseatic Management Services, Inc. / Hanseatic MCG

Managers use a multi-time dimensional system that identifies mid-cap stocks whose emergent price trends have better than normal probability of persisting into the 6-36 month target holding period with positive alpha. Lower time dimension patterns are then used to identify shorter term entry and exit points. Research has shown that time parameters in the relevant time dimensions, monthly and weekly in particular, also play an important role. It is the intersection of multi-time dimensional trend measurement and time boundaries that is the foundation of the buy-sell disciplines. The portfolio typically contains at least 100 stocks providing for diversification. Another interesting characteristic of the portfolio is its relatively low correlation with indexes in its asset class. Since 1991 Hanseatic has applied proprietary quantitative buy and sell disciplines to manage equity portfolios' returns, risk, and structure. Their buy disciplines provide a consistent stock selection process that is adaptable to varying market environments. Returns displayed are based on a backtest of this methodology and are hypothetical. No assets were actually invested using this methodology during the backtest period.

StoneRidge Investment Partners, LLC / StoneRidge Mid Cap Growth

The StoneRidge Small to Mid (SMID) Cap Growth Equity Portfolio seeks to outperform the Russell 2500 Growth Index. StoneRidge believes in a blend of fundamental research, quantitative tools, and qualitative judgments are required to consistently add value in equity investment management. The investment process employed by StoneRidge is built upon a team of six sector specialists performing intensive fundamental equity research. This bottom-up, fundamental investment process is supported by a proprietary, multi-factor screening tool, the purpose of which is to narrow the scope of the investment universe to the most attractive candidates, upon which to perform detailed fundamental analysis. This quantitative tool also provides an ongoing objective analysis of StoneRidge's existing portfolio. The SMID investment universe is comprised of stocks with market capitalizations between \$500 million and \$10 billion as well as those stocks which are constituents

of the Russell 2500 Growth Index. The proprietary, quantitative tool screens and then ranks this universe of over 2400 U.S. stocks. The goal of the screening tool is to narrow opportunities to a focused list of stocks that possess the characteristics most likely to lead to superior investment performance. StoneRidge's screening tool is constructed around five broad factors which are critical to predicting future stock performance: earnings momentum, valuation, technical condition, accounting/financials, and insider activity. Each stock is ranked relative to the entire SMID universe; the result is a list of companies with the most attractive combination of attributes. These stocks are then subjected to in-depth fundamental research by our team of sector specialists.

Tributary Capital Management /Tributary MCG

An average earnings growth rate for the previous five years that exceeds the benchmark is a primary criterion for equity selection into the Tributary Mid Cap Growth portfolio. All fundamental factors play a role in the valuing of a company for investment, but the price-to-earnings ratio provides the most visible, universally applied metric. Our approach avoids absolute concentrations in individual industry sectors, attempting on an absolute basis to keep allocations to individual industries and economic sectors as low as possible. Some of the fundamental factors include revenue, cash flow, and earnings growth. Tributary Capital Management seeks to maximize long-term total return with appropriate diversification into market sectors to reduce risk. Our style of equity investing emphasizes growth companies in a broad range of industries and does not believe in sector speculation. Stocks are selected using a "bottom-up" process rather than relying entirely on information that Wall Street has developed. This fundamental research predominantly defines a universe of medium sized companies (approximately \$1 to \$15 billion in market cap) from which portfolios are constructed. Our approach takes into consideration intrinsic value, profitability, current valuation, and growth potential. Intrinsic value measures include cash flow, growth in revenue, and gains in market share among others. Active portfolio management, based on intensive, original research, can add value by limiting risk and increasing investment returns.

Mid Cap Value Model Portfolios-Benchmarked to the Russell Mid Cap Value Index

Ativo Capital Management / Ativo Mid

Ativo's goal is to recognize Mid Cap firms that earn significantly more than their cost of capital as it is these earnings that drive growth in shareholder value and stock price. Firms that don't earn their cost of capital destroy shareholder value. An accurate residual income model is key to implementing this approach. Our model incorporates discounted cash flow return on investment, cost of capital, and growth and life cycle theory. Each week Ativo converts 13,000 stocks GAAP financial statements to cash based statements. More than 50 adjustments are made in this process. Correction for pension liabilities, option values, and lease capitalizations are just a few. Cost of capital is calculated using a company's size, risk, industry, and other factors. Ativo is a Portuguese word that means both "active" and "assets" - together they illustrate their approach to the management of equity portfolios. Ativo develops portfolios based on a history of quantitative securities research covering nearly four decades that is the basis for a stable and consistent investment philosophy. They start with sound financial theory. Then this theory is applied to real-time experiments in actual markets to develop investment rules that transcend specific market conditions. Consistently applied, these rules pick the stocks for our portfolios. Ativo combine cutting-edge financial theory and clear objectives that are integrated into quantitative models that drive portfolio composition. The results are impressive and are consistent over time.

Cloud Neff / CNM Quant Value

The CN Quantitative value fund equally targets income generation and long term growth by screening stocks according to proprietary valuation measures. This "deep value portfolio" provides a very high dividend by purchasing equities in any industry, though holdings are often concentrated in energy, financial, utility, and real estate. The portfolio tends to have a low tracking correlation with its peer group and benchmark index, due to both its deep value approach and industry concentration. Typically, about 70 stocks are owned and turnover is approximately 70% per annum.

Egis Capital Management / Egis Mid Cap Value

Egis Mid Cap Value is managed to provide clients diversification primarily among U.S. mid capitalization companies oriented toward value. Many of their holdings come from financial and industrial sectors. Equities are selected partially through a proprietary screening mechanism utilizing an augmented version of the Porter Five Forces Model. The Egis Proprietary Model explains how market structures determine the intensity of competition. We invest in firms that face less competition and thus have prospects for greater long-term profits. The Porter Five Forces Model considers five sources of competition: customers demanding lower prices, suppliers demanding higher prices, substitute products providing alternatives, direct competitors cutting prices and increasing quality, and potential entrants increasing direct competition. An additional consideration is technological innovation which influences the five forces. Egis places an emphasis on a long-term buy and hold approach. When selecting individual equities Egis also takes into consideration the industry in the interest of maintaining diversification to maximize risk adjusted returns.

Financial Trust Asset Management / ValueMomentum Leaders MCV

The Value Momentum Leaders Strategy invests in the top 50 stocks that comprise the Value Momentum index. The Value Momentum index rates stocks according to three factors: low Price/Sales ratio, 1-month relative strength, and 1-week relative strength. In addition, the stocks must have a price to sales ratio that is at least 10% less than the average price to sales of the S&P 500. Companies must also have current quarterly earnings that are higher than the same quarter in the previous year. The portfolio is equally weighed among the top 50 stocks. The portfolio is reweighed and rebalanced on a monthly basis. Quantitative research underlies the impressive performance of Financial Trust Asset Management.

Fraser Management Associates / Fraser Contrarian SMA

Fraser Management Associates applies a unique contrarian discipline to produce superior long-term investment results for institutions and private clients. Their unique headquarters in Burlington, Vermont is consistent with their independent thinking. Since their founding in 1969, investment management has been their sole focus and passion. The team has been tempered by sixty-eight years of combined investment management experience. Client value is created by identifying overlooked and under-appreciated trends. Human behavior, market psychology, global trends, and industry dynamics are studied to identify securities poised to profit. Some of the themes guiding current investments are long-term climate change, water scarcity, Hispanic migration, and consolidation within the financial services industry. After theme or trends are identified, the focus narrows to select the specific securities best positioned to capitalize on them. The top down methodology, from general trend to specific security, tends to concentrate the portfolio in a few sectors. Largely due to this concentration, the portfolio has a very low correlation with other money managers and the stock market indexes. The portfolio typically contains 30 to 35 value type stocks with a Median market capitalization of \$2 billion. Historically, turnover has been a low 25% annually, meaning on average securities are held about four years.

Retirement Wealth Advisors / Mid Cap Formula

RWA (Retirement Wealth Advisors) Mid Cap FormulaFolio is a quantitatively managed portfolio of individual equities and cash equivalents. RWA, Inc.'s proprietary step-by-step mechanical approach to selecting positions eliminates emotional trading and is designed to only select above average positions based on both fundamental and macro economic indicators. The portfolio is an individual equity portfolio that uses top-down fundamental analysis to choose only positions that currently and continuously rank highly using a quantitative model developed by RWA. In addition to the fundamental analysis, there is also a macro economic model used to determine the overall percentage of equities in the portfolio to minimize short-term risk and enhance long-term returns.

Due to risk management processes contained within the quantitative models, the portfolio may not be fully invested at all times.

Mr. Wenk's firm, Retirement Wealth Advisors, Inc. is currently the #1 Ranked Private Asset Management firm in the State of Michigan and #8 in the United States by Money Manager Review*. The ranking; based on return, risk and risk adjusted return, is compared to industry giants such as Goldman Sachs, Alliance Bernstein, Oppenheimer Investments, Baird Asset Management, T. Rowe Price and a number of high profile West Michigan managers. Mr. Wenk has been featured in The Grand Rapids Press, numerous industry specific magazines and has been invited as guest speaker to area colleges. In addition, he has taught educational seminars to over 2,500 investors in West Michigan. In 2007 and 2008 Reuters listed Mr. Wenk as one of the United States' top 500 financial advisors (with only one other advisor from West Michigan on the list) and in 2008 was named by Reuters as one of the Top Advisors Under 40 as well as one of the Top Advisors with Retirement Focus. Retirement Wealth Advisors, Inc. is headquartered in West Michigan (offices in Grand Rapids and Spring Lake) and is an SEC Registered Investment Advisory Firm.

Small Cap Growth Model Portfolios-Benchmarked to the Russell 2000 Growth Index

Egis Capital Management / Egis Small Cap Growth

Egis Small Cap Growth is managed to provide clients diversification primarily Egis Small Cap Growth is managed to provide clients diversification primarily among U.S. small capitalization companies oriented towards growth. Many of these stocks are in the technology, health-care, and services sectors. Because these businesses are fast-growing and often richly valued, their stocks tend to be volatile, but often can provide for some of the most explosive returns. Equities are selected partially through a proprietary screening mechanism utilizing an augmented version of the Porter Five Forces Model. The Egis Proprietary Model explains how market structures determine the intensity of competition. We invest in firms that face less competition and thus have prospects for greater long-term profits. The Porter Five Forces Model considers five sources of competition: customers demanding lower prices, suppliers demanding higher prices, substitute products providing alternatives, direct competitors cutting prices and increasing quality, and potential entrants increasing direct competition. An additional consideration is technological innovation which influences the five forces. Egis places an emphasis on a long-term buy and hold approach. When selecting individual equities Egis also takes into consideration the industry in the interest of maintaining diversification to maximize risk adjusted returns.

Hanseatic Management Services, Inc. / Hanseatic SCG

Managers use a multi-time dimensional system that identifies small-cap stocks whose emergent price trends have better than normal probability of persisting into the 6-36 month target holding period with positive alpha. Lower time dimension patterns are then used to identify shorter term entry and exit points. Research has shown that time parameters in the relevant time dimensions, monthly and weekly in particular, also play an important role. It is the intersection of multi-time dimensional trend measurement and time boundaries that is the foundation of the buy-sell disciplines. The portfolio typically contains at least 100 stocks providing for diversification. Another interesting characteristic of the portfolio is its relatively low correlation with indexes in its asset class. Since 1991 Hanseatic has applied proprietary quantitative buy and sell disciplines to manage equity portfolios' returns, risk, and structure. Their buy disciplines provide a consistent stock selection process that is adaptable to varying market environments.

Laidlaw Group / Laidlaw Group SCG

The Laidlaw Group's, Small Cap Value portfolio focuses investments in companies with the following characteristics: high cash flow to market value ratio, high asset to debt ratio, profitability, and growth potential. Close attention is also paid to the sectors in which firms operate. The management may overweigh or underweigh sectors based on their analysis of economic trends. The Laidlaw Group is a family business founded by Robert Laidlaw and his son David. Robert, the current Chairman, is an industry veteran who began his career on the floor of the New York Stock Exchange in 1958 after graduating from Yale, with a degree in philosophy. His nearly 50 years of industry experience provide the foundation from which the Laidlaw Group excels.

Navellier / Global Small Cap

Navellier implements its investment philosophy through a combination of quantitative and fundamental analysis. The initial portfolio universe includes foreign listed equities and American Depositary Receipts (ADRs) with market capitalizations equal to or less than \$5 billion and domestic stocks with market capitalizations between \$200 million and \$2 billion. Stocks must have ample liquidity in both the domestic listed market and their home market. The process begins with a computer driven analysis based on Modern Portfolio Theory. The firm calculates reward (alpha) and risk (standard deviation) characteristics for the initial universe of stocks. Trailing 52-week "alphas" are divided by trailing 52-week "standard deviations" to create a "reward/risk" ratio for each stock. These stocks are then reviewed on a fundamental basis. The fundamentals reviewed and measured are based on Navellier's proprietary analysis of what is currently "in favor" on Wall Street and the Accounting and Governance Risk rating (AGR). Stocks are ranked on both the quantitative and fundamental analyses, and the final step is the portfolio construction process, which combines country allocation, weighting of stocks, and portfolio formation. Country allocation is determined by three factors: (1) the direction of interest rates relative to other economies; (2) the level of the average reward/risk ratio for all companies in a given country relative to other countries; and (3) the country's weight in the relevant index. The portfolio is adjusted monthly based on market conditions.

James O'Leary, CFA is the lead Portfolio Manager for the Navellier Asia, Navellier Europe, and Navellier Latin America, Global Small Cap, and Global Growth strategies. He joined Navellier in 1996 and has thirty-five years of experience in the securities industry. Prior to joining Navellier, Mr. O'Leary was Managing Director at Lexington Management Corporation and a Director at Federated Investment Counseling. His B.S. in business administration is from Bowling Green State University and his M.B.A. is from the University of Cincinnati.

Sawgrass Asset Management / Sawgrass SCG Best Ideas

Sawgrass Asset Management, L.L.C. is a 100 percent employee-owned, SEC-registered investment advisor. The firm provides innovative growth equity investment management services to institutional and high net worth investors. The firm was founded on January 15, 1998 in Jacksonville, Florida, by principals Andrew Cantor, Dean McQuiddy and Brian Monroe. The firm consists of a core group of key investment professionals who have worked together for more than 20 years. The core investment team of portfolio managers, equity traders, and client service professionals came to Sawgrass from Barnett Capital Advisors, Inc. and have been with the firm since its inception.

Small Cap Value Model Portfolios-Benchmarked to the Russell 2000 Value Index

Advisor Partners / Small Cap Value

The Advisor partners' U.S. Equity Small Cap Value Index Strategy mimics the returns of the small cap U.S. equity market as represented by the S&P Small Cap 600 Value index. The Strategy captures the index's risk characteristics and sector diversification using a managed portfolio of individual securities. The sectors with the greatest representations within the portfolio tend towards Financials, Industrials, Consumer Discretionary and Information Technology. Advisor Partners is an investment management firm specializing in providing customized, tax-managed, index-based investment solutions for advisors and their clients. The average industry tenure of the principals exceeds two decades and contributes to their depth of investment judgment and expertise.

Andrew Rudd, the Chairman, and Jim Blachman, the Chief Investment Officer are members of Advisor Partners' Investment Management Committee. Dr. Rudd, a finance industry veteran, holds a Ph.D. from UC Berkeley and co-founded BARRA

Inc. Jim Blachman holds a master's degree in economics from UC Berkeley. His investment career spans 20 years. He is a CFA charterholder.

Ativo Capital Management / Ativo Small Dynamic Select SCV

Ativo's goal is to recognize Small Cap firms that earn significantly more than their cost of capital since it is these earnings that drive growth in shareholder value and stock price. Firms that don't earn their cost of capital destroy shareholder value. An accurate residual income model is key to implementing this approach. Our model incorporates discounted cash flow return on investment, cost of capital, and growth and life cycle theory. Each week Ativo converts 13,000 stocks GAAP financial statements to cash based statements. More than 50 adjustments are made in this process. Correction for pension liabilities, option values, and lease capitalizations are just a few. Cost of capital is calculated using a company's size, risk, industry, and other factors. Ativo is a Portuguese word that means both "active" and "assets" - together they illustrate their approach to the management of equity portfolios. Ativo develops portfolios based on a history of quantitative securities research covering nearly four decades that is the basis for a stable and consistent investment philosophy. They start with sound financial theory. Then this theory is applied to real-time experiments in actual markets to develop investment rules that transcend specific market conditions. Consistently applied, these rules pick the stocks for our portfolios. Ativo combine cutting-edge financial theory and clear objectives that are integrated into quantitative models that drive portfolio composition. The results are impressive and are consistent over time.

BirdRock Asset Management, LP / BirdRock Small Cap Value

BirdRock Asset Management is a value-oriented, independent registered investment advisor. As a fee-only firm, our interests are closely aligned with those of our clients. We begin with the premise that trust, integrity and objective financial advice are the hallmarks of a successful financial relationship. Our mission is to help our clients achieve their goals through vigilant financial research, disciplined planning and continuous review. Our portfolio management team has combined investment experience of over 22 years, and an outstanding performance track record.

Our investment philosophy for the BirdRock Small Cap Value portfolio is based on the theory that value investing (buying companies trading at what we believe to be a discount to their future value) provides investors with long-term rewards as well as risk mitigation during times of market turbulence. While we believe that the market is fairly efficient at discounting current information, this is not always the case, especially with regard to smaller market cap securities. To exploit these inefficiencies and add value through active management, we believe one must take a contrarian approach to information that may be interpreted differently and perhaps incorrectly by other interested parties.

As we begin our search for the underappreciated, misunderstood, or simply overlooked securities, our approach is to dig deep by using quantitative, qualitative, and empirical data to help us add alpha for our clients. The essence of BirdRock Asset Management's value investment style is to buy stocks at less than their intrinsic value. Our extensive research process evaluates a company's intrinsic value through cash flow and book value comparison, financial statements, financial health, competitive advantages, management, and market competition.

Steve Levy is the lead portfolio manager for the BirdRock Small Cap Value and serves as President of BirdRock Asset Management. He is responsible for overseeing the Small Cap Value and Large Cap Value portfolios and is a member of the Investment Committee. Mr. Levy began his career as a reinsurance analyst with The JI Companies in Austin, Texas before joining Janus Capital in 1999. He served on the Investment Committee of Slaughter & Associates for five years and has managed the Small Cap Value portfolio since its inception in January of 2004.

Mr. Levy has an undergraduate degree in Political Science and Spanish with an emphasis in International Relations from San Diego State University, and studied emerging markets, economics and U.S. Foreign Policy in Latin America at the Universidad Colegio Anahuac in Guadalajara, Mexico in 1986-87. Mr. Levy holds an Accredited Wealth Management Advisor (AWMA) designation from the College for Financial Planning.

Egis Capital Management / Egis Small Cap Value

Egis Small Cap Value is managed to provide clients diversification primarily among U.S. small capitalization companies oriented toward value. Investments tend towards the manufacturing and financial sectors. Equities are selected partially through a proprietary screening mechanism utilizing an augmented version of the Porter Five Forces Model. The Egis Proprietary Model explains how market structures determine the intensity of competition. We invest in firms that face less competition and thus have prospects for greater long term profits. The Porter Five Forces Model considers five sources of competition: customers demanding lower prices, suppliers demanding higher prices, substitute products providing alternatives, direct competitors cutting prices and increasing quality, and potential entrants increasing direct competition. An additional consideration is technological innovation which influences the five forces. Egis places an emphasis on a long-term buy and hold approach. When selecting individual equities Egis also takes into consideration the industry in the interest of maintaining diversification to maximize risk adjusted returns.

Texas First Investment Management Company / Texas First SCV

Texas First Investment Management Company has provided significant equity returns with relatively low risk by combining a long term, conservative, and value-oriented approach with an unparalleled expertise acquired by investing solely in

Texas-based publicly-held companies. The stock selection criteria include, but are not limited to, value measures of sustainable earnings, sustainable cash flow, and adjusted book value. Potential catalysts to unleash value are also critical considerations. Holdings are carefully diversified among industries. The Small Cap Value portfolio ranked among the top ten in the country over the 5 year period 2001 – 2005. It has outperformed the Russell 2000 small-cap index for six of the previous seven years, with below-average risk.

Egis Utilities Model Portfolio- Benchmarked to the Dow Jones USA (US) (Dev) Utilities (7000) Broad US dollar Index

Egis Capital Management/ Egis Utilities Model Portfolio

Egis Utilities is managed to provide clients diversification primarily among US utilities stocks of all capitalizations. Utility stocks are usually some combination of U.S. power, telecommunications, and water companies. These stocks usually represent a more stable investment with less emphasis placed on growth and more on dividends. Equities are selected partially through a proprietary screening mechanism utilizing an augmented version of the Porter Five Forces Model. The Egis Proprietary Model explains how market structures determine the intensity of competition. We invest in firms that face less competition and thus have prospects for greater long term profits. The Porter Five Forces Model considers five sources of competition: customers demanding lower prices, suppliers demanding higher prices, substitute products providing alternatives, direct competitors cutting prices and increasing quality, and potential entrants increasing direct competition. An additional consideration is technological innovation which influences the five forces. Egis places an emphasis on a long term buy and hold approach. When selecting individual equities Egis also takes into consideration the industry in the interest of maintaining diversification to maximize risk adjusted returns.

Asian Model Portfolio-Benchmarked to the Dow Asia Pacific (P1) Aggregate Index Broad US Dollar Index

Egis Capital Management / Egis Asia

Egis Asia is managed to provide clients diversification primarily among Asian stocks of all capitalizations through investing in ADR's. Equities are selected partially through a proprietary screening mechanism utilizing an augmented version of the Porter Five Forces Model. The Egis Proprietary Model explains how market structures determine the intensity of competition. We invest in firms that face less competition and thus have prospects for greater long-term profits. The Porter Five Forces Model considers five sources of competition: customers demanding lower prices, suppliers demanding higher prices, substitute products providing alternatives, direct competitors cutting prices and increasing quality, and potential entrants increasing direct competition. An additional consideration is technological innovation which influences the five forces. Egis places an emphasis on a long-term buy and hold approach. When selecting individual equities Egis also takes into consideration the industry in the interest of maintaining diversification to maximize risk adjusted returns.

Financial Trust Asset Management / Asia ValueMomentum

The Asia Value Momentum Strategy invests in the top 20 stocks that comprise the Asia Value Momentum index. The Asia Value Momentum index rates stocks according to three factors: low Price/Sales ratio, 1-month relative strength, and 1-week relative strength. The Asia Value Momentum strategy invests only in ADR's (American Depositary Receipts) of Asian companies that trade on U.S. exchanges. Companies must also have current quarterly earnings which are higher than the same quarter in the previous year. The portfolio is equally weighted among the top 20 stocks. The portfolio is rebalanced on a monthly basis. Returns displayed are based on a backtest of this methodology and are hypothetical. No assets were actually invested using this methodology during the backtest period.

Hanseatic Management Services, Inc / Hanseatic Asia

Managers use a multi-time dimensional system designed to identify domestically traded Asian stocks whose emergent price trends have better than normal probability of persisting into the 6-36 month target holding period with positive alpha. Lower time dimension patterns are then used to identify shorter term entry and exit points. Research has shown that time parameters in the relevant time dimensions, monthly and weekly in particular, also play an important role. It is the intersection of multi-time dimensional trend measurement and time boundaries that is the foundation of the buy-sell disciplines. Initial position size in the portfolio is 2-3% of capital. The manager's objective is to maintain a portfolio structure that provides good diversification relative to the available universe of liquidity-screened stocks. Since 1991 Hanseatic has applied proprietary quantitative buy and sell disciplines to manage equity portfolios' returns, risk, and structure. Their buy disciplines provide a consistent stock selection process that is adaptable to varying market environments. Ed Meihaus, (BSME, University of Louisville; MBA, University of Memphis), joined Hanseatic in 1985. Since then, he has continued to develop quantitative model-based investment applications, primarily the set of disciplines which underlie the company's equity portfolios. He currently serves as the Chief Investment Officer.

Navellier / Navellier Asia

Navellier implements its investment philosophy through a combination of quantitative and fundamental analysis. The initial portfolio universe includes Asian foreign listed equities and American Depositary Receipts (ADRs) with market

capitalizations equal to or greater than \$500 million. Stocks must have ample liquidity in both the listed market and their home market.

The process begins with a computer driven analysis based on Modern Portfolio Theory. The firm calculates reward (alpha) and risk (standard deviation) characteristics for the initial universe of stocks. Trailing 52-week “alphas” are divided by trailing 52-week “standard deviations” to create a “reward/risk” ratio for each stock. These stocks are then reviewed on a fundamental basis. The fundamentals reviewed and measured are based on Navellier’s proprietary analysis of what is currently “in favor” on Wall Street and the Accounting and Governance Risk rating (AGR).

Stocks are ranked on both the quantitative and fundamental analyses, and the final step is the portfolio construction process, which combines country allocation, weighting of stocks, and portfolio formation. Country allocation is determined by three factors (1) the direction of interest rates relative to other economies (2) the level of the average reward/risk ratio for all companies in a given country relative to other countries (3) the country’s weight in the relevant index. The portfolio is adjusted to reflect changes on a monthly basis.

Mr. O’Leary CFA is the lead Portfolio Manager for the Navellier Asia, Navellier Europe, and Navellier Latin America strategies. He joined Navellier in 1996 and has thirty-four years of experience in the securities industry. Prior to joining Navellier, Mr. O’Leary was Managing Director at Lexington Management Corporation and a Director at Federated Investment Counseling. His B.S. in business administration is from Bowling Green State University and his M.B.A. is from the University of Cincinnati.

Mr. Mitteldorf, Portfolio Manager, joined Navellier in 1995 and has thirteen years of experience in the securities industry. After becoming an essential member of several investment teams, Navellier promoted him to Research Analyst and then Portfolio Manager. Mr. Mitteldorf received a B.S. in physiological psychology from the University of California, Santa Barbara and an M.B.A. in finance and marketing from the University of Nevada, Reno.

Navellier / Navellier Asia Ex-Japan

Navellier implements its investment philosophy through a combination of quantitative and fundamental analysis. The initial portfolio universe includes Asian Ex-Japan foreign listed equities and American Depositary Receipts (ADRs) with market capitalizations equal to or greater than \$500 million. Stocks must have ample liquidity in both the listed market and their home market. The process begins with a computer driven analysis based on Modern Portfolio Theory. The firm calculates reward (alpha) and risk (standard deviation) characteristics for the initial universe of stocks. Trailing 52-week “alphas” are divided by trailing 52-week “standard deviations” to create a “reward/risk” ratio for each stock. These stocks are then reviewed on a fundamental basis. The fundamentals reviewed and measured are based on Navellier’s proprietary analysis of what is currently “in favor” on Wall Street and the Accounting and Governance Risk rating (AGR). Stocks are ranked on both the quantitative and fundamental analyses, and the final step is the portfolio construction process, which combines country allocation, weighting of stocks, and portfolio formation. Country allocation is determined by three factors (1) the direction of interest rates relative to other economies (2) the level of the average reward/risk ratio for all companies in a given country relative to other countries (3) the country’s weight in the relevant index. The portfolio is adjusted to reflect changes on a monthly basis.

The Latin Value Momentum index rates stocks according to three factors: low Price/Sales ratio, 1-month relative strength, and 1-week relative strength. The Latin Value Momentum strategy invests only in ADR’s

(American Depository Receipts) of Latin companies that trade on U.S. exchanges. Companies must also have current quarterly earnings which are higher than the same quarter in the previous year. The portfolio is equally weighed among the top 20 stocks. The portfolio is rebalanced on a monthly basis. Returns displayed are based on a backtest of this methodology and are hypothetical. No assets were actually invested using this methodology during the backtest period.

Hanseatic Management Services, Inc / Hanseatic Latin America

Managers use a multi-time dimensional system designed to identify domestically traded Latin American stocks whose emergent price trends have better than normal probability of persisting into the 6-36 month target holding period with positive alpha. Lower time dimension patterns are then used to identify shorter term entry and exit points. Research has shown that time parameters in the relevant time dimensions, monthly and weekly in particular, also play an important role. It is the intersection of multi-time dimensional trend measurement and time boundaries that is the foundation of the buy-sell disciplines. Initial position size in the portfolio is 2-3% of capital. The manager's objective is to maintain a portfolio structure that provides good diversification relative to the available universe of liquidity-screened stocks. Since 1991 Hanseatic has applied proprietary quantitative buy and sell disciplines to manage equity portfolios' returns, risk, and structure. Their buy disciplines provide a consistent stock selection process that is adaptable to varying market environments. Ed Meihaus, (BSME, University of Louisville; MBA, University of Memphis), joined Hanseatic in 1985. Since then, he has continued to develop quantitative model-based investment applications, primarily the set of disciplines which underlie the company's equity portfolios. He currently serves as the Chief Investment Officer.

Navellier / Navellier Latin America

Navellier implements its investment philosophy through a combination of quantitative and fundamental analysis. The initial portfolio universe includes Latin American foreign listed equities and American Depository Receipts (ADRs) with market capitalizations equal to or greater than \$500 million. Stocks must have ample liquidity in both the listed market and their home market.

The process begins with a computer driven analysis based on Modern Portfolio Theory. The firm calculates reward (alpha) and risk (standard deviation) characteristics for the initial universe of stocks. Trailing 52-week "alphas" are divided by trailing 52-week "standard deviations" to create a "reward/risk" ratio for each stock. These stocks are then reviewed on a fundamental basis. The fundamentals reviewed and measured are based on Navellier's proprietary analysis of what is currently "in favor" on Wall Street and the Accounting and Governance Risk rating (AGR).

Stocks are ranked on both the quantitative and fundamental analyses, and the final step is the portfolio construction process, which combines country allocation, weighting of stocks, and portfolio formation. Country allocation is determined by three factors (1) the direction of interest rates relative to other economies (2) the level of the average reward/risk ratio for all companies in a given country relative to other countries (3) the country's weight in the relevant index. The portfolio is adjusted to reflect changes on a monthly basis.

Mr. O'Leary CFA is the lead Portfolio Manager for the Navellier Asia, Navellier Europe, and Navellier Latin America strategies. He joined Navellier in 1996 and has thirty-four years of experience in the securities industry. Prior to joining Navellier, Mr. O'Leary was Managing Director at Lexington Management Corporation and a Director at Federated Investment Counseling. His B.S. in business administration is from Bowling Green State University and his M.B.A. is from the University of Cincinnati.

Mr. Mitteldorf, Portfolio Manager, joined Navellier in 1995 and has thirteen years of experience in the securities industry. After becoming an essential member of several investment teams, Navellier promoted him to Research Analyst and then Portfolio Manager. Mr. Mitteldorf received a B.S. in physiological psychology from the University of California, Santa Barbara and an M.B.A. in finance and marketing from the University of Nevada, Reno.

Alternative Strategies (Alt. Strat) Model Portfolios –

Inflation Fighters:

iSectors / iSectors® Inflation Protection Allocation

iSectors® Inflation Protection Allocation: With a diversified core strategic portfolio of commodities, precious metals, inflation-protected bonds, and other investments that historically have been resistant to inflationary pressures, the iSectors® Inflation Protection Allocation offers investors a tool with which to prepare their portfolios for the possibility of inflation.

iSectors believes that the empirical evidence strongly suggests that asset allocation is the predominant factor behind the returns of any investment approach. As such, many of the iSectors models are Strategic in nature, utilizing an indexing approach within the asset allocation models. Vehicles utilized to execute the allocation process within the models are primarily low-cost, primarily index-based ETFs.

Management of iSectors Asset Allocation strategies is overseen by an investment committee of four professionals, each with significant investment, business and accounting experience along and multiple professional designations, including Prateek Mehrotra, MBA, CFA, CAIA as their Chief Investment Officer and Timothy J. Landolt, MBA as their Strategies Manager. Mr. Mehrotra holds a MBA in Finance from Lehigh University and Mr. Landolt holds a MBA from Loyola Marymount University.

Strategic:

iSectors / iSectors® Domestic 60-40 Allocation

iSectors® Domestic models are strategic asset allocation models that employ a Modern Portfolio Theory (MPT) -based approach to asset allocation. The equity portion of the models is allocated using a diversified basket of domestic, low-cost, equity index-based ETFs. The fixed income portion of the allocations is invested in diversified, low-cost ETFs that hold baskets of investment-grade domestic, government and corporate bonds of various maturities. The models, with respect to their use of ETFs and an annual rebalance process, are designed to be tax-sensitive. Moderate asset allocation strategy consists of approximately 60% domestic (U.S.-only) equities and 40% domestic fixed-income securities.

iSectors believes that the empirical evidence strongly suggests that asset allocation is the predominant factor behind the returns of any investment approach. As such, many of the iSectors models are Strategic in nature, utilizing an indexing approach within the asset allocation models. Vehicles utilized to execute the allocation process within the models are primarily low-cost, primarily index-based ETFs.

iSectors / iSectors® Institutional 40-60 Allocation

iSectors® Institutional models employ a Modern Portfolio Theory (MPT)-based approach, with a review of Resampling, Black Litterman and Monte Carlo Simulation to optimally allocate the model portfolios. The equity portion of the models is allocated across a number of domestic, international and emerging markets index-based exchange traded funds. Fundamentally-weighted index ETFs are included in the model in an effort to enhance return and reduce volatility. The fixed income portion of each model is invested in diversified, low-cost ETFs that hold baskets of domestic, international and emerging market government and corporate bonds of various maturities. The models, with respect to their use of ETFs and an annual rebalance process, are designed to be tax-sensitive. Conservative Moderate allocation strategy is intended to consist of approximately 40% equity and 60% fixed-income investments.

iSectors believes that the empirical evidence strongly suggests that asset allocation is the predominant factor behind the returns of any investment approach. As such, many of the iSectors models are Strategic in nature, utilizing an indexing approach within the asset allocation models. iSectors / iSectors® Endowment 20-80 Allocation

iSectors Endowment models embrace the philosophy pursued by the managers of Endowment portfolios at institutions like Yale and Harvard, which have been aggressively allocating to "alternative investments" such as hedge funds, private equity and real assets for decades. Not only has this enabled their longer-term performance to be superior to their peer group, but also at a reduced risk level. While iSectors Endowment models are not designed to mirror the Yale asset allocation to the fullest extent, but significant allocations are made to "alternative investments" in each model of the Endowment Series. iSectors Endowment models offer investors substantial diversification to more than 50, primarily index-based securities, a significant allocation to liquid alternative asset classes, as well as traditional domestic and international equity and fixed income asset classes. Conservative allocation strategy is designed with the objective of achieving returns in excess of a simple 20-80 Equity/Fixed Income portfolio (as measured by a composite portfolio of 20% S&P 500 Index and 80% Barclays Aggregate Bond Index) over a complete market cycle, while maintaining a similar or better risk profile. This comprehensive, strategic model is enhanced by diversification into alternative asset classes and is intended to be utilized as long-term core holding.

iSectors believes that the empirical evidence strongly suggests that asset allocation is the predominant factor behind the returns of any investment approach. As such, many of the iSectors models are Strategic in nature, utilizing an indexing approach within the asset allocation models. Vehicles utilized to execute the allocation process within the models are primarily low-cost, primarily index-based ETFs. iSectors / iSectors® Post-MPT Growth Allocation

iSectors® Post-MPT Allocations utilize advancements in Modern Portfolio Theory (MPT) to allocate the portfolio among up to 9 unique, uncorrelated asset classes. In addition, iSectors also utilizes advanced, more pragmatic approaches for applying these principles of MPT. The objective of the iSectors® Post-MPT Growth Allocation is to achieve investment returns that outperform the S&P500 stock market index with lower downside risk over a complete market cycle. The portfolio manager objectively allocates and rebalances the portfolio among up to 9 specific, low-correlated asset classes. The mathematical process is guided by a series of economic and capital market factors. Portfolios may be invested up to 30% at any one time into any single asset class, with the exception of government bonds, to which the model may allocate up to 50%. The iSectors Post-MPT Growth Allocation may utilize leveraged ETFs up to a maximum of 33%. However, because iSectors does not use borrowed money in its strategy, the service is available for retirement and non-profit accounts.

iSectors believes that the empirical evidence strongly suggests that asset allocation is the predominant factor behind the returns of any investment approach. As such, many of the iSectors models are Strategic in nature, utilizing an indexing approach within the asset allocation models. Vehicles utilized to execute the allocation process within the models are primarily low-cost, primarily index-based ETFs.

iSectors / iSectors® Post-MPT Moderate Allocation

iSectors® Post-MPT Allocations utilize advancements in Modern Portfolio Theory (MPT) to allocate the portfolio among up to 9 unique, uncorrelated asset classes. In addition,

iSectors also utilizes advanced, more pragmatic approaches for applying these principles of MPT. The objective of the iSectors® Post-MPT Moderate Allocation is to achieve investment returns that outperform a 60/40 stock/bond index (as measured by the S&P500 stock market index + Lehman Aggregate Bond Index) with lower downside risk over a complete market cycle. The portfolio manager objectively allocates and rebalances the portfolio among up to 9 specific, low-correlated asset classes. The mathematical process is guided by a series of economic and capital market factors. Portfolios may be invested up to 30% at any one time into any single asset class, with the exception of government bonds, to which the model may allocate up to 50%. The iSectors® Post-MPT Moderate Allocation does not use borrowed money in its strategy and remains 100% invested at all times.

iSectors believes that the empirical evidence strongly suggests that asset allocation is the predominant factor behind the returns of any investment approach. As such, many of the iSectors models are Strategic in nature, utilizing an indexing approach within the asset allocation models. Vehicles utilized to execute the allocation process within the models are primarily low-cost, primarily index-based ETFs.

Management of iSectors Asset Allocation strategies is overseen by an investment committee of four professionals, each with significant investment, business and accounting experience along and multiple professional designations, including Prateek Mehrotra, MBA, CFA, CAIA as their Chief Investment Officer and Timothy J. Landolt, MBA as their Strategies Manager. Mr. Mehrotra holds a MBA in Finance from Lehigh University and Mr. Landolt holds a MBA from Loyola Marymount University.

Tactical:

Avatar Associates, LLC / Avatar Aggressive Portfolio

Avatar Associates is an independent asset allocator, specializing in risk reduction investment strategies. Since 1970, institutional and private clients have entrusted Avatar with their assets to help them participate in market advances and protect them against market losses.

The Avatar Aggressive Portfolio (the "Portfolio") seeks to provide capital appreciation with no expectations for current income. The Portfolio is an all-equity portfolio and is designed for investors with a long amount of time until retirement and/or a high tolerance for risk. With no fixed income exposure, this portfolio is expected to be the most aggressive implementation of the eight Portfolios currently managed by Avatar. The Fund seeks to outperform its designated benchmark by raising and lowering asset class exposures, industry sector exposures, and international country exposures to anticipate relative price movements. The total weighting of indirect stock holdings in ETFs consist of a larger percentage of large-capitalization U.S. stocks and some mid- and small-capitalization U.S. stocks. This Fund also has the largest exposure to international stocks in the Avatar Portfolio Series. The Portfolio may invest in cash, cash equivalents or various short-term money market instruments.

Portfolio Benchmark: 80% S&P 500 and 20% MSCI EAFE

As Chairman and Chief Investment Officer, Ted Theodore manages the firm's asset allocation models. Previously, Mr. Theodore served as Strategist/Portfolio Manager at Morgan Stanley Asset Management, and as Director of Equity Strategy at Citibank, N.A. Mr. Theodore earned his M.B.A. in Finance and B.A. in Economics from the University of Michigan.

Larry Seibert is Vice Chairman and Head of Security Selection. Previously, he has served at Goldman Sachs and KPMG Peat Marwick. Larry received his B.A. in Economics from Columbia University, and an M.B.A. in Finance from New York University.

Avatar Associates, LLC / Avatar Capital Preservation Portfolio

Avatar Associates is an independent asset allocator, specializing in risk reduction investment strategies. Since 1970, institutional and private clients have entrusted Avatar with their assets to help them participate in market advances and protect them against market losses.

The Avatar Capital Preservation Portfolio (the "Portfolio") seeks to provide current income with limited capital appreciation and is designed for investors with a short amount of time until retirement and/or a low tolerance for risk. This portfolio is the most conservative implementation of the seven portfolios currently managed by Avatar. The Portfolio seeks to outperform its designated benchmark by raising and lowering asset class exposures, industry sector exposures, and international country exposures in anticipation of relative price movements. To this end, the Portfolio utilizes equity ETFs, international ETFs and fixed income ETFs to adjust exposures where appropriate. Small portions of U.S. and international equities are used. The majority of the portfolio is invested in U.S. Treasury and corporate bond ETFs. Cash, cash equivalents or various short-term money market instruments may also be used.

Portfolio Benchmark: 15% S&P 500, 5% MSCI EAFE, and 80% BarCap Aggregate Bond

As Chairman and Chief Investment Officer, Ted Theodore manages the firm's asset allocation models. Previously, Mr. Theodore served as Strategist/Portfolio Manager at Morgan Stanley Asset Management, and as Director of Equity Strategy at Citibank, N.A. Mr. Theodore earned his M.B.A. in Finance and B.A. in Economics from the University of Michigan.

Larry Seibert is Vice Chairman and Head of Security Selection. Previously, he has served at Goldman Sachs and KPMG Peat Marwick. Larry received his B.A. in Economics from Columbia University, and an M.B.A. in Finance from New York University.

Avatar Associates, LLC / Avatar Conservative Portfolio

Avatar Associates is an independent asset allocator, specializing in risk reduction investment strategies. Since 1970, institutional and private clients have entrusted Avatar with their assets to help them participate in market advances and protect them against market losses.

The Avatar Conservative Portfolio (the "Portfolio") seeks to provide current income with capital appreciation and is designed for investors with a reasonably short amount of time until retirement and/or a relatively low tolerance for risk. The Portfolio seeks to outperform its designated benchmark by raising and lowering asset class exposures, industry sector exposures, and international country exposures in anticipation of relative price movements. The total weighting of indirect stock holdings in ETFs consist of a moderate percentage of large-capitalization U.S. stocks and small allocation to mid- and small-capitalization U.S. stocks. This Portfolio also has a small exposure to international stocks. The larger weighting of indirect bond holdings in ETFs are a diversified mix of intermediate- and long-term investment grade, taxable U.S. government, U.S. agency and corporate bonds. The Portfolio may invest in cash, cash equivalents or various short-term money market instruments.

Portfolio Benchmark: 35% S&P 500, 5% MSCI EAFE, and 60% BarCap Aggregate Bond

As Chairman and Chief Investment Officer, Ted Theodore manages the firm's asset allocation models. Previously, Mr. Theodore served as Strategist/Portfolio Manager at Morgan Stanley Asset Management, and as Director of Equity Strategy at Citibank, N.A. Mr. Theodore earned his M.B.A. in Finance and B.A. in Economics from the University of Michigan.

Larry Seibert is Vice Chairman and Head of Security Selection. Previously, he has served at Goldman Sachs and KPMG Peat Marwick. Larry received his B.A. in Economics from Columbia University, and an M.B.A. in Finance from New York University.

Avatar Associates, LLC / Avatar Conservative Growth Portfolio

Avatar Associates is an independent asset allocator, specializing in risk reduction investment strategies. Since 1970, institutional and private clients have entrusted Avatar with their assets to help them participate in market advances and protect them against market losses.

The Avatar Conservative Growth Portfolio (the "Portfolio") seeks to provide current income with capital appreciation consistent with its allocation. The Portfolio is designed for investors with a reasonably short amount of time until retirement and/or a relatively low tolerance for risk. The Portfolio seeks to outperform its designated benchmark by raising and lowering asset class exposures, industry sector exposures, and international country exposures to anticipate relative price movements. The total weighting of indirect stock holdings in ETFs consist of a moderate percentage of large-capitalization U.S. stocks and small allocation to mid- and small-capitalization U.S. stocks. This Portfolio also has a small exposure to international stocks. The larger weighting of indirect bond holdings in ETFs are a diversified mix of intermediate- and long-term investment grade, taxable U.S. government, U.S. agency and corporate bonds. The Portfolio may invest in cash, cash equivalents or various short-term money market instruments.

Portfolio Benchmark: 50% S&P 500, 10% MSCI EAFE, and 40% BarCap Aggregate Bond

As Chairman and Chief Investment Officer, Ted Theodore manages the firm's asset allocation models. Previously, Mr. Theodore served as Strategist/Portfolio Manager at Morgan Stanley Asset Management, and as Director of Equity Strategy at Citibank, N.A. Mr. Theodore earned his M.B.A. in Finance and B.A. in Economics from the University of Michigan.

Larry Seibert is Vice Chairman and Head of Security Selection. Previously, he has served at Goldman Sachs and KPMG Peat Marwick. Larry received his B.A. in Economics from Columbia University, and an M.B.A. in Finance from New York University.

Avatar Associates, LLC / Avatar Fixed Income Plus Portfolio

Avatar Associates is an independent asset allocator, specializing in risk reduction investment strategies. Since 1970, institutional and private clients have entrusted Avatar with their assets to help them participate in market advances and protect them against market losses.

The Avatar Fixed Income Plus Portfolio (the "Portfolio") seeks to provide a modest positive return over time through active fixed income and inflationary asset class management. The strategy has a focus on protection of capital. The model is a tactically managed all-ETF strategy that is unconstrained in its ability to utilize non-fixed income ETFs to help protect against inflation. The Portfolio is designed for investors with a short amount of time until retirement and/or a low tolerance for risk. The Portfolio seeks to outperform its designated benchmark by raising and lowering asset class exposures, credit exposures, duration, and industry sector exposures to anticipate relative price movements. Cash, cash equivalents or various short-term money market instruments may also be used.

Portfolio Benchmark: 100% BarCap Aggregate Bond

As Chairman and Chief Investment Officer, Ted Theodore manages the firm's asset allocation models. Previously, Mr. Theodore served as Strategist/Portfolio Manager at Morgan Stanley Asset Management, and as Director of Equity Strategy at Citibank, N.A. Mr. Theodore earned his M.B.A. in Finance and B.A. in Economics from the University of Michigan.

Larry Seibert is Vice Chairman and Head of Security Selection. Previously, he has served at Goldman Sachs and KPMG Peat Marwick. Larry received his B.A. in Economics from Columbia University, and an M.B.A. in Finance from New York University.

Avatar Associates, LLC / Avatar Growth Portfolio

Avatar Associates is an independent asset allocator, specializing in risk reduction investment strategies. Since 1970, institutional and private clients have entrusted Avatar with their assets to help them participate in market advances and protect them against market losses.

The Avatar Growth Portfolio (the "Portfolio") seeks to provide capital appreciation with no expectations for current income. The Portfolio is designed for investors with a long amount of time until retirement and/or a high tolerance for risk. This Portfolio is a very aggressive implementation with a small fixed income allocation when compared to the other Avatar Portfolios. The Portfolio seeks to outperform its designated benchmark by raising and lowering asset class exposures, industry sector exposures, and international country exposures to anticipate relative price movements. The total weighting of indirect stock holdings in ETFs consist of a larger percentage of large-capitalization U.S. stocks and some mid- and small-capitalization U.S. stocks. The much smaller weighting of indirect bond holdings in ETFs are a diversified mix of intermediate- and long-term investment grade, taxable U.S. government, U.S. agency and corporate bonds. This Portfolio also has a strong exposure to international stocks. The Portfolio may invest in cash, cash equivalents or various short-term money market instruments.

Portfolio Benchmark: 80% S&P 500, 15% MSCI EAFE, and 5% BarCap Aggregate Bond

As Chairman and Chief Investment Officer, Ted Theodore manages the firm's asset allocation models. Previously, Mr. Theodore served as Strategist/Portfolio Manager at Morgan Stanley Asset Management, and as Director of Equity Strategy at Citibank, N.A. Mr. Theodore earned his M.B.A. in Finance and B.A. in Economics from the University of Michigan.

Larry Seibert is Vice Chairman and Head of Security Selection. Previously, he has served at Goldman Sachs and KPMG Peat Marwick. Larry received his B.A. in Economics from Columbia University, and an M.B.A. in Finance from New York University.

Avatar Associates, LLC / Avatar Moderate Portfolio

Avatar Associates is an independent asset allocator, specializing in risk reduction investment strategies. Since 1970, institutional and private clients have entrusted Avatar with their assets to help them participate in market advances and protect them against market losses.

The Avatar Moderate Portfolio (the "Portfolio") seeks to provide moderate capital appreciation with current income. The Portfolio is designed for investors with a reasonably long amount of time until retirement and/or a moderate tolerance for risk. This portfolio is expected to be an all-round portfolio for the average investor. The Portfolio seeks to outperform its designated benchmark by raising and lowering asset class exposures, industry sector exposures, and international country exposures to anticipate relative price movements. The total weighting of indirect stock holdings in ETFs consist of a larger percentage of large-capitalization U.S. stocks and some mid- and small-capitalization U.S. stocks. This Portfolio also has a moderate exposure to international stocks. The moderate weighting of indirect bond holdings in ETFs are a diversified mix of intermediate- and long-term investment grade, taxable U.S. government, U.S. agency and corporate bonds. The Portfolio may invest in cash, cash equivalents or various short-term money market instruments.

Portfolio Benchmark: 60% S&P 500, 10% MSCI EAFE, and 30% BarCap Aggregate Bond

As Chairman and Chief Investment Officer, Ted Theodore manages the firm's asset allocation models. Previously, Mr. Theodore served as Strategist/Portfolio Manager at Morgan Stanley Asset Management, and as Director of Equity Strategy at Citibank, N.A. Mr. Theodore earned his M.B.A. in Finance and B.A. in Economics from the University of Michigan.

Avatar Associates, LLC / Avatar Moderate Growth Portfolio

Avatar Associates is an independent asset allocator, specializing in risk reduction investment strategies. Since 1970, institutional and private clients have entrusted Avatar with their assets to help them participate in market advances and protect them against market losses.

The Avatar Moderate Growth Portfolio (the "Portfolio") seeks to provide capital appreciation with some to moderate current income. The Portfolio is designed for investors with a reasonably long amount of time until retirement and/or a moderately high tolerance for risk. This portfolio is expected to be the third least aggressive implementation of the seven Portfolios currently managed by Avatar. The Portfolio seeks to outperform its designated benchmark by raising and lowering asset class exposures, industry sector exposures, and international country exposures to anticipate relative price movements. The total weighting of indirect stock holdings in ETFs consist of a large percentage of large-capitalization U.S. stocks and some mid- and small-capitalization U.S. stocks. This Portfolio also has a moderate exposure to international stocks. The relatively smaller weighting of indirect bond holdings in ETFs are a diversified mix of intermediate- and long-term investment grade, taxable U.S. government, U.S. agency and corporate bonds. The Portfolio may invest in cash, cash equivalents or various short-term money market instruments.

Portfolio Benchmark: 70% S&P 500, 15% MSCI EAFE, and 15% BarCap Aggregate Bond

As Chairman and Chief Investment Officer, Ted Theodore manages the firm's asset allocation models. Day Hagan Asset Management / Day Hagan Asset Management

Day Hagan Asset Management developed mathematical models in conjunction with Ned Davis Research. The models quantitatively evaluate business conditions, fundamentals, price-trends, sentiment, economic trends, and valuation to identify when a confluence of evidence indicates opportunity. ETF portfolios are updated monthly to include the most attractive asset classes. Advantages of following a model-based approach include the flexibility to respond to market opportunities while controlling the irrationality and temptations imposed by human emotions.

Day Hagan Asset Management's philosophy of investing is founded upon the following tenets: make decisions based on an objective and model-based framework, utilize only time-tested and robust financial market indicators, allocate based on a "weight-of-the-evidence" approach, stay on the right side of major trends using trend-following indicators, and remain disciplined and un-emotional at all times.

Don Hagan, CFA, began his career in 1988 at Ned Davis Research and rose to Chief Sector Analyst where he developed decision-based asset allocation and individual stock and sector buy/sell programs at the institutional level for over 20 years. He was Director of Research and Lead Portfolio Manager for SCI Capital Management's SCI Traditional Value Equity, Blue Chip Bellwether Growth, Industry Select and Tactical Balanced investment strategies. After acquisition of SCI by Wells Fargo, Don was Senior Vice-President and Senior Portfolio Manager for Wells Fargo Bank's Private Client Services and concurrently served on Wells Fargo's National Asset Allocation Committee and National Investment Policy Committees. He has been quoted in several financial publications including the Wall Street Journal (for the first time in April, 1993), Barron's, Atlanta Constitution, and USA Today and is a frequent speaker at conferences and on radio. Don has a B.A. and CFA and is a member of the Association for Investment Management Research and the Investment Management Consultants Association.

Emerald Allocation Strategies / Emerald Concentrated Equity Discipline

All of our strategies have specific risk-control measures within them, in addition to the general risk reduction achieved by a diversified portfolio. Our firm's style and accomplishments have been highlighted in many national media outlets including Bloomberg, The Wall Street Transcript, Investment News, Registered Rep and Wealth Manager Magazine. We have presented our expertise and views at various industry conferences, and our Chief Investment Officer has been recognized as one of Worth Magazine's "Top 100 US Wealth Advisors" from 2005 – 2007 and one of Worth Magazine's "Top 250 US Wealth Advisors" in 2008.

Concentrated Equity seeks to generate investment "alpha" (excess return versus stock market benchmarks) through the purchase of a carefully selected group of equity mutual funds, whose managers each confine their portfolios to a very limited number of holdings (typically under 30 stocks) and generate those returns using distinctly different methods. The combination of these funds seeks to combat the tendency for traditional "style-box" equity approaches (investing by growth vs. value, large cap vs. small cap) that often produce mediocre or negative levels of alpha over longer periods of time. We may also buy dedicated short funds as a portfolio hedge in perceived periods of high market risk.

Mr. Isbitts co-founded Emerald in 1998, chairs the firm's Investment Committee, and is the creator of Emerald's proprietary investment approach. He is a 20+ year veteran of the investment business, holding portfolio management positions at firms such as Fuji Bank & Trust, Morgan Stanley and DLJ. Mr. Isbitts has published over 100 investment articles and commentaries in publications including Wealth Manager, Registered Rep, Financial Planning, and Investment News. In 2006, he published "Wall Street's Bull and How to Bear It." Education includes an undergraduate degree from the State University of New York at Albany, an MBA in Finance from Rutgers University.

Emerald Allocation Strategies / Emerald Global Cycle Discipline:

All of our strategies have specific risk-control measures within them, in addition to the general risk reduction achieved by a diversified portfolio. Our firm's style and accomplishments have been highlighted in many national media outlets including Bloomberg, The Wall Street Transcript, Investment News, Registered Rep and Wealth Manager Magazine. We have presented our expertise and views at various industry conferences, and our Chief Investment Officer has been recognized as one of Worth Magazine's "Top 100 US Wealth Advisors" from 2005 – 2007 and one of Worth Magazine's "Top 250 US Wealth Advisors" in 2008.

Global Cycle is a true long-term approach to growing capital. It involves the research and identification of global investment themes that are in the midst of a long, positive business cycle. (e.g. – alternative energy, potable water, India equity, China equity, etc). Some of these themes may take place, in our opinion, over many years, even decades. Others may start and finish in periods as short as three years. This is a long-term strategy, and often involves investing in areas of the markets

that exhibit high short-term volatility in their returns. Patience is required to be successful. We may also buy dedicated short funds as a portfolio hedge in perceived periods of high market risk or as a way to capture alpha in a certain sector that we feel may be in decline.

Mr. Isbitts co-founded Emerald in 1998, chairs the firm's Investment Committee, and is the creator of Emerald's proprietary investment approach. He is a 20+ year veteran of the investment business, holding portfolio management positions at firms such as Fuji Bank & Trust, Morgan Stanley and DLJ. Mr. Isbitts has published over 100 investment articles and commentaries in publications including Wealth Manager, Registered Rep, Financial Planning, and Investment News. In 2006, he published "Wall Street's Bull and How to Bear It." Education includes an undergraduate degree from the State University of New York at Albany, an MBA in Finance from Rutgers University.

Emerald Allocation Strategies / Emerald Hybrid Discipline:

All of our strategies have specific risk-control measures within them, in addition to the general risk reduction achieved by a diversified portfolio. Our firm's style and accomplishments have been highlighted in many national media outlets including Bloomberg, The Wall Street Transcript, Investment News, Registered Rep and Wealth Manager Magazine. We have presented our expertise and views at various industry conferences, and our Chief Investment Officer has been recognized as one of Worth Magazine's "Top 100 US Wealth Advisors" from 2005 – 2007 and one of Worth Magazine's "Top 250 US Wealth Advisors" in 2008.

Hybrid's objective is to achieve real, absolute returns (positive net of inflation) over any three-year period, regardless of market conditions, without resorting to the use of high-quality bond funds (which, despite their reputation as conservative investments, can produce large losses in periods of rising interest rates and inflation). Our Hybrid holdings typically come from the 11 sub-sectors/styles we have defined in the alternative mutual fund universe through our own research (such as equity long-short, market-neutral, arbitrage, commodities, high-yield and bond hedge). As a result, Hybrid investing is similar to the approach employed by low volatility hedge fund-of-funds managers but without all the unfavorable characteristics of hedge funds, such as lock-up periods, illiquidity, lack of transparency, excessive leverage, high fees, high investment minimums, and tax inefficiency.

Mr. Isbitts co-founded Emerald in 1998, chairs the firm's Investment Committee, and is the creator of Emerald's proprietary investment approach. He is a 20+ year veteran of the investment business, holding portfolio management positions at firms such as Fuji Bank & Trust, Morgan Stanley and DLJ. Mr. Isbitts has published over 100 investment articles and commentaries in publications including Wealth Manager, Registered Rep, Financial Planning, and Investment News. In 2006, he published "Wall Street's Bull and How to Bear It." Education includes an undergraduate degree from the State University of New York at Albany, an MBA in Finance from Rutgers University.

Horizon Investments, LLC / Horizon Investments Balanced Portfolio

Horizon follows a 6 step process in developing asset allocations for Equis Clients.

(1) Compute Style Indices, meaning the categories under which assets are categorized; such as, very large value, mid growth, and international. (2) Compute Fundamental Factor Overweight Score using a regression analysis involving eighty different financial ratios to calculate the expected return for the indexes in each asset category. (3) Compute Market Sentiment Factor Overweight Score to determine which asset categories should be overweighted or under-weighted. (4) Compute the Base Portfolio using the "Returns Based Attribution" technique. (5) Set Portfolio Allocations for the four risk profiles that vary according to the percentage of equity typically in the portfolio. (6) Choose specific investments using a Linear Optimizer to solve for the combinations of investments (typically ETFs and mutual funds) that provide the best match to the desired asset allocation. The balanced portfolio seeks the potential for growth with equity investments that have historically delivered higher, but more variable, long term returns. The strategy also seeks to balance the variability of stock market investments with investments in less volatile assets, such as core fixed income securities.

Dr. Jeffrey Roach is Chairman of the Investment Committee and the Chief Economist of Horizon Investments. Prior to joining Horizon Investments LLC in 2006, he was Senior Economist at Bank of America. Dr. Roach earned a B.S. in Mathematics from Bob Jones University, an M.A. in Economics from Clemson University, and a Ph.D. in Economics from Clemson University.

Dr. William Breen is Senior Investment Strategist for Horizon Investments. He is also Emeritus Professor of Finance at the Kellogg Graduate School of Management at Northwestern University. Dr. Breen has published more than 40 articles and scholarly papers and co-authored three books on investment strategy, corporate finance, asset pricing, and econometric theory. In addition, he served or serves as a director of the LaSalle Trust Company, Barton-Ashmann, X10ion Inc., and the Evanston Community Foundation. He earned a Ph.D. in Econometrics from Cornell University, was an Associate Professor of Economics at Purdue University, and Associate Professor and Professor of Finance at the Kellogg Graduate School.

Horizon Investments, LLC / Horizon Investments Focused Portfolio

Horizon follows a 6 step process in developing asset allocations for Equis Clients.

(1) Compute Style Indices, meaning the categories under which assets are categorized; such as, very large value, mid growth, and international. (2) Compute Fundamental Factor Overweight Score using a regression analysis involving eighty different financial ratios to calculate the expected return for the indexes in each asset category. (3) Compute Market Sentiment Factor Overweight Score to

determine which asset categories should be overweighted or under-weighted. (4) Compute the Base Portfolio using the "Returns Based Attribution" technique. (5) Set Portfolio Allocations for the four risk profiles that vary according to the percentage of equity typically in the portfolio.. (6) Choose specific investments using a Linear Optimizer to solve for the combinations of investments (typically ETFs and mutual funds) that provide the best match to the desired asset allocation. The Focused portfolio seeks capital appreciation in any market cycle. This diversified portfolio utilizes a variety of equity strategies for the aggressive investor.

Dr. Jeffrey Roach is Chairman of the Investment Committee and the Chief Economist of Horizon Investments. Prior to joining Horizon Investments LLC in 2006, he was Senior Economist at Bank of America. Dr. Roach earned a B.S. in Mathematics from Bob Jones University, an M.A. in Economics from Clemson University, and a Ph.D. in Economics from Clemson University.

HS Dent Investment Management, LLC / HS Dent Investment Management

The Dent Portfolio investment approach identifies broad sectors of the US economy, economic sub-sectors, or even geographic regions of the world that appear to be poised for growth over a short horizon. These results are assessed according to a relative strength/momentum model that tells which ETFs to purchase and when to purchase them. In more detail, a pool of possible investment areas (including the money market) is ranked according to HS Dent's proprietary methods. To warrant investment a security must rank above the money market and show strong relative strength. If no security is above money market, or not enough securities to create an entire portfolio, then all or part of the portfolio may be invested in cash or cash equivalents. If we are 100% invested, we are considered to be in an "offensive" position. If any portion of our portfolio is in cash due to not enough securities ranking highly enough to complete the portfolio, then we are in a "defensive" position. We have used this methodology since May 1, 2008, through the worst of the current economic crisis. We have been either mostly defensive or completely defensive four times since then - November and December of 2008, and February and March of 2009. The portfolio typically holds relatively few positions and does have significant turnover.

Harry S. Dent, Jr. is the Founder, Managing Member and majority owner. For two decades Mr. Dent has been principally engaged, as the Managing Member of HS Dent Publishing, LLC., in authoring books, special reports, and a newsletter on the topic of economic change and how to estimate economic change by analyzing demographics, predictable consumer spending patterns, and technological innovation. Mr. Dent earned a bachelor's degree from University of South Carolina and an MBA from Harvard University.

Rodney G. Johnson is the President and Chief Compliance Officer as well as a minority owner. Mr. Johnson began working directly with Mr. Dent in 1997 to develop investment approaches based on the demographic research of Mr. Dent. Mr. Johnson earned a bachelor's degree from Georgetown University and an MBA from Southern Methodist University.

iSectors / iSectors® Tactical Global Balanced Allocation

iSectors® Tactical Global Balanced Allocation offers a comprehensive investment approach diversified across major global asset classes, including Domestic Equities, International and Emerging Market Equities, Bonds, Commodities, Gold and Real Estate. The model actively manages the investments within the portfolio, utilizing a trend following methodology to allocate among the model's targeted asset classes and to cash. This model's objective is to be in cash during prolonged declines in individual asset classes to reduce overall portfolio draw down. The iSectors® Tactical Global Balanced model seeks to invest in exchange-traded funds (ETFs) to achieve its objectives.

iSectors believes that the empirical evidence strongly suggests that asset allocation is the predominant factor behind the returns of any investment approach. Vehicles utilized within the models are primarily low-cost, primarily index-based ETFs. For its dynamic and tactical models, iSectors utilizes objective, quantitative-based models in an active-passive approach. Quite simply, quantitative-based algorithms utilizing updated data are consistently and systematically applied.

Management of iSectors Asset Allocation strategies is overseen by an investment committee of four professionals, each with significant investment, business and accounting experience along and multiple professional designations, including Prateek Mehrotra, MBA, CFA, CAIA as their Chief Investment Officer and Timothy J. Landolt, MBA as their Strategies Manager. Mr. Mehrotra holds a MBA in Finance from Lehigh University and Mr. Landolt holds a MBA from Loyola Marymount University.

iSectors / iSectors® Tactical International Allocation

iSectors® Tactical International Allocation is designed to help investors diversify their portfolios into international markets and participate in worldwide economic growth. Although international and emerging markets can be volatile, iSectors believes these markets move in identifiable trends based upon the respective countries' trade, fiscal, and monetary policies. The proprietary momentum-based algorithm is designed to position the model to profit from these trends. In an effort to reduce volatility and increase returns, the algorithm will allocate up to 100% to cash during periods when securities do not meet the momentum-based investment criteria. The model will allocate up to 10% of the overall portfolio to any single country, regional, or diversified international exchange-traded fund (ETF) at any given time, subject to a maximum of 10 securities, at which point the model will be 100% invested (subject to a 2% cash position for liquidity purposes). The algorithm is applied with updated data and the model rebalanced accordingly on a monthly basis.

iSectors believes that the empirical evidence strongly suggests that asset allocation is the predominant factor behind the returns of any investment approach. Vehicles utilized within the models are primarily low-cost, primarily index-based ETFs. For its dynamic and tactical models, iSectors utilizes objective, quantitative-based models in an active-passive approach. Quite simply, quantitative-based algorithms utilizing updated data are consistently and systematically applied.

Mench Financial Inc. / International Sector Enhanced

Mench Financial, Inc. has managed assets for individual and institutional clients since 1994. Mench strives to deliver superior performance to a national clientele by decreasing volatility and protecting assets during down markets. The key to our success is an econometric investment process and the use of exchange traded funds (ETFs) to participate in major changes in market trends. A composite of indicators triggers portfolio purchases and sales in a highly-disciplined manner. We believe 75% of our ability to outperform the market comes from this process of asset allocation. During weekly Investment Policy Committee meetings, current portfolio, market, sector and industry allocations are determined. These allocations allow us to decrease the volatility in a portfolio by pinpointing the markets or sectors of a market which we believe have the greatest potential for outperforming the general market. In turn, assets are moved away from sectors that we think have a high probability of under-performing. Once we have identified the industries poised to do well in the coming economic environment, we use fundamental and correlation analysis, combined with broad diversification, to shift the risk/reward ratio in our clients' favor.

The exchange traded funds (ETFs) we invest in represent ownership in an index of country- and region-specific common stocks intended to closely track the price performance and dividend yield of that specific country or region. These highly-liquid securities provide clients with a diversified portfolio at lower costs and allow for more consistent returns over a market cycle.

With over 35 years' experience in the investment industry, Mr. Mench, with the assistance of his family, has created a firm in which to implement the strategy he developed back in 1977. He earned a B.A. in Business from Butler University.

Retirement Wealth Advisors / Retirement Wealth Advisors Market Rotator

RWA (Retirement Wealth Advisors) Market Rotator is a quantitatively managed portfolio of exchange traded funds and cash equivalents. RWA, Inc.'s proprietary step-by-step mechanical approach to selecting positions eliminates emotional trading and is designed to only select above average positions based on both fundamental and technical indicators. The investment strategy utilizes 13 separate ETFs. Using no outside leverage or margin, the strategy seeks to identify the most probable direction of major US equity markets as well as the most statistically probable global asset classes for generating maximum total investor returns. Exchange traded funds are used exclusively to take advantage of these probabilities. Due to risk management processes contained within the quantitative models, the portfolio may not be fully invested at all times.

Mr. Wenk's firm, Retirement Wealth Advisors, Inc. is currently the #1 Ranked Private Asset Management firm in the State of Michigan and #8 in the United States by Money Manager Review*. The ranking, based on return, risk and risk adjusted return, is compared to industry giants such as Goldman Sachs, Alliance Bernstein, Oppenheimer Investments, Baird Asset Management, T. Rowe Price and a number of high profile West Michigan managers. Mr. Wenk has been featured in The Grand Rapids Press, numerous industry specific magazines and has been invited as guest speaker to area colleges. In addition, he has taught educational seminars to over 2,500 investors in West Michigan. In 2007 and 2008 Reuters listed Mr. Wenk as one of the United States' top 500 financial advisors (with only one other advisor from West Michigan on the list) and in 2008 was named by Reuters as one of the Top Advisors Under 40 as well as one of the Top Advisors with Retirement Focus. Retirement Wealth Advisors, Inc. is headquartered in West Michigan (offices in Grand Rapids and Spring Lake) and is an SEC Registered Investment Advisory Firm.

Robbins Capital Management Inc. / Large Cap Core Flex

Robbins Capital Management of Atlanta, Georgia has managed assets for high-net-worth individuals and institutions since 2004.

Robbins Capital Management focuses on sector strength and diligent risk management. The strongest among 500 subgroups and sectors are identified as locations for screening of specific securities. Both fundamental and technical momentum and trend analyses are used to isolate the strongest 2%. Stocks demonstrating weakness over a three-month period are progressively sold. The sell discipline results in the portfolio maintaining an average of about 25% in cash/money market-type investments. Diversification is maintained by not investing more than 25% of the portfolio in any one sector and not allowing any one sector to appreciate to over 40% of the portfolio value. Typically, 25-50 stocks each represent less than 5% of the portfolio, yet some can occasionally increase to 7.5%.

Robert Robbins is both the firm's founder and its Chief Investment Officer who makes all substantive investment decisions. Confidence is inspired by his academic pedigree, military experience, and extensive tenure in research and portfolio management for large institutions.

An early interest in investing motivated Bob to earn a B.A. in economics from Dartmouth College. Following his undergraduate studies, Bob was a United States Army officer, rising to the rank of First Lieutenant. His pursuit of excellence continued upon returning to Dartmouth where he earned his M.B.A. from the Amos Tuck School of Business Administration in 1973. Between 1973 and 2002, Citibank, Bankers Trust, Thomson McKinnon, and Suntrust employed Bob's investment expertise in a variety of research and portfolio management positions. Investors can be certain that Bob's decisions are carefully considered because the majority of his personal assets are invested in the same companies as his clients'.

SignalPoint Asset Management, LLC / SignalPoint 10 Portfolio

Everyone understands the basic principle of investing: buy low and sell high. It is extremely difficult, if not impossible, to consistently predict the market tops and bottoms, but this is the objective of most tactical managers. SignalPoint conversely seeks to sell high and buy low. At least a little cash is held at all times and the amount increases with risk of each sector as calculated with our Risk Assessment Model. Cash is then redeployed the calculated risk in each sector declines, thus creating a tax-friendly continuous dollar-cost averaging. Our Risk Assessment Model constantly evaluates real time indicators including: speculation, relative valuation, divergence, and even IPO zeal. Disciplined adherence to our quantitative process removes emotion from investment decisions. During the last two years, our cash position has moved from a high of 48.5% in October 2007 when the market peaked, to a low of 1% in both November of 2008 and March of 2009. We manage only long positions and do not use levered or inverse ETFs. SignalPoint domestic and global portfolio betas range from .50-.72. Clients who seek reduced volatility, but want to maintain market exposure, will find our portfolios to be exactly what they are looking for.

The ten business sectors included in the S&P 500 are represented by individual ETFs and managed both individually and collectively. A money market component is also included and used as an active part of the portfolios management. The performance objective is to reduce risk in contrast to the overall market and outperform the S&P 500 benchmark, while reducing some of the emotional stress of the client.

Thomas M. Veale's responsibilities include management of portfolios, investment strategy, research, and trading. Mr. Veale is also the Chair of Investment Committee and provides general input into firm operations and management. For more than 20 years, Tom has helped a range of clients increase their wealth by guiding the growth of their portfolios. He also devised investment strategies for trusts, foundations and charities.

SignalPoint Asset Management, LLC / SignalPoint Balanced Point

Everyone understands the basic principle of investing: buy low and sell high. It is extremely difficult, if not impossible, to consistently predict the market tops and bottoms, but this is the objective of most tactical managers. SignalPoint conversely seeks to sell high and buy low. At least a little cash is held at all times and the amount increases with risk of each sector as calculated with our Risk Assessment Model. Cash is then redeployed the calculated risk in each sector declines, thus creating a tax-friendly continuous dollar-cost averaging. Our Risk Assessment Model constantly evaluates real time indicators including: speculation, relative valuation, divergence, and even IPO zeal. Disciplined adherence to our quantitative process removes emotion from investment decisions. During the last two years, our cash position has moved from a high of 48.5% in October 2007 when the market peaked, to a low of 1% in both November of 2008 and March of 2009. We manage only long positions and do not use levered or inverse ETFs. SignalPoint domestic and global portfolio betas range from .50-.72. Clients who seek reduced volatility, but want to maintain market exposure, will find our portfolios to be exactly what they are looking for.

This portfolio is a blend of the Signal10 and Stable Income Portfolios. It is designed for investors seeking a moderate portfolio that has exposure to both the equity and income elements of the market. While there may be principal fluctuation because this portfolio provides exposure to numerous types of equities through ETF's and income oriented sectors including REITs, treasuries, high yield debt, convertible securities and income producing equities. The goal of the portfolio is to offer exposure to the equities market and some income generation all within one portfolio.

Thomas M. Veale's responsibilities include management of portfolios, investment strategy, research, and trading. Mr. Veale is also the Chair of Investment Committee and provides general input into firm operations and management. For more than 20 years, Tom has helped a range of clients increase their wealth by guiding the growth of their portfolios. He also devised investment strategies for trusts, foundations and charities.

SignalPoint Asset Management, LLC / SignalPoint Domestic

Everyone understands the basic principle of investing: buy low and sell high. Disciplined adherence to our quantitative process removes emotion from investment decisions. During the last two years, our

cash position has moved from a high of 48.5% in October 2007 when the market peaked, to a low of 1% in both November of 2008 and March of 2009. We manage only long positions and do not use levered or inverse ETFs. SignalPoint domestic and global portfolio betas range from .50-.72. Clients who seek reduced volatility, but want to maintain market exposure, will find our portfolios to be exactly what they are looking for.

This portfolio is comprised of 9 select ETFs, and a money market position. The portfolio provides exposure to higher quality fixed income securities, such as treasuries and investment grade corporate bonds. Limited exposure to REITs and high yield debt is also provided to enhance yield. The portfolio is designed for more conservative investors due to the portfolio's goal of achieving a relatively flat deviation curve and relatively stable Net Asset Value (NAV).

Thomas M. Veale's responsibilities include management of portfolios, investment strategy, research, and trading. Mr. Veale is also the Chair of Investment Committee and provides general input into firm operations and management. For more than 20 years, Tom has helped a range of clients increase their wealth by guiding the growth of their portfolios. He also devised investment strategies for trusts, foundations and charities.

Strategic Capital Alternatives / SCA Moderate Growth

STRATEGIC CAPITAL ALTERNATIVES, of Gig Harbor, Washington is a privately-held firm of 22 employees.

INVESTMENT PROCESS

SCA believes that active managers can and do add value to a portfolio. To identify the stock most likely to outperform in each category, we screen the universe of money managers and hire the best for each specialty. Each money manager supplies SCA with the 10-15 stocks in which they have the most confidence, allowing us to capture the highest conviction positions out of each manager's portfolio, typically between 30-50. As a result, SCA clients benefit from a portfolio that leverages the combined wisdom of top money managers covering each equity sub-category. Alternative asset classes designed to have returns less correlated with the equity and bond markets are provided through hedge funds via a fund of fund approach. In the fixed income space a core / satellite EFT strategy is used. The Core is built around the broad base aggregate index, 50% - 75% of the overall allocation, while the satellite positions will be dictated by current market opportunities and will include, high yield, floating rate, inflation protected, corporate credit and mortgage backed securities

INVESTMENT PHILOSOPHY

SCA believes investment risk can be controlled by maintaining a non-traditional asset allocation across three dimensions:

1. Equity market exposure correlated with the S&P 500 Index
2. Fixed Income exposure correlated with the BCAG Index
3. Alternative asset exposure typically less correlated with the equity market (S&P 500 Index) and bond market (BCAG Index)

Based upon a SECULAR market outlook created by our Investment Committee, the three dimensions are weighted based upon client risk tolerance with the goal of achieving a sufficient return with minimum risk.

INVESTMENT STRATEGY

The strategy is designed to offer downside protection during times of receding value while eliminating the need to specifically time the sharp swings of equity performance. The three-dimensional approach is accomplished by utilizing "traditional" as well as "non-traditional" asset classes historically employed by institutional investors. In short, the relative performance of long equities is balanced with investment vehicles that are designed to produce a stable, absolute return.

INVESTMENT COMMITTEE

Gary Price – Managing Director Mr. Price has over 18 years of investment experience. Mr. Price is the CEO of Genesis Capital, the manager of a family of hedge fund of funds as well as a Managing Director at Strategic Capital Alternatives. Mr. Price was a member of the advisory board that developed Russell Investments separate account manager platform. Mr. Price holds a finance degree from the University of Pennsylvania's Wharton School of Business.

Ron Robertson – Managing Director Mr. Robertson has over 13 years of investment experience and is a founder of Strategic Capital Group which manages or advises on just under \$1 billion for foundations and individuals. Mr. Robertson is the President of Genesis Capital, the manager of a family of hedge fund of funds as well as a Managing Director at Strategic Capital Alternatives. Mr. Robertson holds a B.S. from Western Washington University. He formally served as a member of the Frank Russell Company Alternative Investment Advisory Board and as President of the Strategic Leadership Foundation.

Michael Dubinsky, CFA – Chief Financial Officer Mr. Dubinsky has over 18 years' experience in finance and accounting for hedge funds, venture capital funds and investment management firms. Prior to joining Strategic Capital Alternatives, Mr. Dubinsky spent four years working for the Russell Investment Group, where he managed the operations of hedge funds, private equity funds and domestic and international mutual funds. Mr. Dubinsky also spent four years working for Deloitte & Touche LLP, where he served clients within the hedge fund, venture capital and financial service industries. Mr. Dubinsky holds a Business Administration degree from the University of Washington and is a CFA charterholder.

Wentworth, Hauser and Violich / WHV International Mutual Fund

Wentworth, Hauser and Violich (WHV) is one of the oldest and most respected investment management firms on the West Coast. Founded in San Francisco in 1937. The firm serves individuals, foundations, endowments, and institutions. WHV currently has more than \$11.6 billion in assets under management. The investment philosophy of the WHV International Equity Fund is grounded in the belief that investing in the most attractive global economic sectors can generate superior investment performance. Particular attention is devoted to the identification of investment "Supercycles." These are defined as supply and demand imbalances that are likely to persist over time. WHV believes that the world's investment landscape has evolved from being influenced by regional or country-specific events to an environment defined primarily by two dominant global forces: 1) globalization by economic sectors and 2) categorization of stocks by sectors rather than by country. The WHV International Equity strategy is designed to take advantage of this environment through a top-down sector allocation investment process. The Fund utilizes a five-step, top-down investment process. First, the relative attractiveness of 10 global economic sectors is analyzed. Second, the potential of 67 industry groups is examined. Third, the attractiveness of 51 countries is analyzed. Fourth, a universe of 1,500 foreign equity securities is researched. Lastly, a portfolio of 30 to 60 stocks is constructed representing economic sectors that have the potential for long-term earnings growth.

Mr. Hirayama developed the WHV International Equity Strategy in 1995 and the WHV Global Equity Strategy in 2005. In 2008, Mr. Hirayama, along with WHV, founded Hirayama Investments, LLC, an affiliated investment adviser. Mr. Hirayama was a Computer Research Analyst with the Bank of America Trust Department and BA Investment Management from 1969 to 1982. He became a Security Analyst and Portfolio Manager at BAIMCO in 1983 and at Associated Capital Investors in 1988. He joined Wentworth, Hauser and Violich in 1990. Ms. Stankard joined Wentworth, Hauser and Violich in 1998 as a Portfolio Accountant and was promoted to Operations Officer in 2000. In 2001 she joined the International Equity Team as an International Security Analyst and was promoted to Portfolio Manager in 2008. In 2009, Ms. Stankard became a Member of Hirayama Investments, LLC, WHV's affiliated investment adviser. Ms. Goodson, Associate Portfolio Manager and International Security Analyst, joined Wentworth, Hauser and Violich in 2008 upon receiving her MBA from the Wharton School.

Municipal Fixed Income Model Portfolio

Egis Capital Management / Egis Municipal Fixed Income

The Egis Fixed Income Municipal Portfolio is managed to provide clients with diversification among mostly municipal debt securities through investing in bond ETF's and bond mutual funds. The Egis Municipal Fixed Income Portfolio is utilized within a client's asset allocation to add diversification and reduce volatility. The duration of investments are managed based on anticipated interest rates and the yield curve.

Taxable Fixed Income Model Portfolio

Egis Capital Management / Egis Taxable Fixed Income

The Egis Taxable Fixed Income Portfolio is managed to provide clients with diversification among mostly Treasury and corporate debt securities through investing in bond ETF's and bond mutual funds. The Egis Taxable Fixed Income Portfolio is utilized within a client's asset allocation to add diversification and reduce volatility. The duration of investments are managed based on anticipated interest rates and the yield curve.

iSectors / iSectors® Capital Preservation Allocation

iSectors® Capital Preservation Allocation has been constructed for investors with a desire for principal stability by creating a portfolio of investments with relatively low volatility. Nominal portfolio yield is a secondary goal of the model. The model holds fixed income Exchange-Traded Funds (ETFs), primarily those that invest in short-term, AAA-rated or investment-grade debt instruments. A smaller portion of the assets may be placed in ETFs holding short-term international instruments. The model will generally target ETFs holding bond portfolios with a duration of approximately 3 years or less. While stability of principal is the primary goal of this portfolio, an investment in the iSectors® Capital Preservation Allocation is not guaranteed and will fluctuate in value.

iSectors believes that the empirical evidence strongly suggests that asset allocation is the predominant factor behind the returns of any investment approach. As such, many of the iSectors models are Strategic in nature, utilizing an indexing approach within the asset allocation models. Vehicles utilized to execute the allocation process within the models are primarily low-cost, primarily index-based ETFs.

Management of iSectors Asset Allocation strategies is overseen by an investment committee of four professionals, each with significant investment, business and accounting experience along and multiple professional designations, including Prateek Mehrotra, MBA, CFA, CAIA as their Chief Investment Officer and Timothy

J. Landolt, MBA as their Strategies Manager. Mr. Mehrotra holds a MBA in Finance from Lehigh University and Mr. Landolt holds a MBA from Loyola Marymount University.

Strategic Capital Group / SCA Fixed income

Strategic Capital Alternatives' Fixed Income strategy starts with a core and satellite approach utilizing ETF's to capture our market exposures. The Core is built on the broad base aggregate index with a range of 50-75% of the portfolio allocation in the BC Aggregate. The Satellite positions will be dictated by current market opportunities and will include high yield, floating rate, inflation protection, corporate credit, and mortgage backed securities. The strategy is dynamic and can change as the market environment for fixed income changes. The goal of the strategy is to capture the long term, low volatility, single digit returns of the broad bond market net of fees.

Investment Committee:

Gary Price – Managing Director Mr. Price has over 18 years of investment experience. Mr. Price is the CEO of Genesis Capital, the manager of a family of hedge fund of funds as well as a Managing Director at Strategic Capital Alternatives. Mr. Price was a member of the advisory board that developed Russell Investments separate account manager platform. Mr. Price holds a finance degree from the University of Pennsylvania's Wharton School of Business.

Ron Robertson--Managing Director: He has over 13 years of investment experience, is a founder of Strategic Capital Group, is the President of Genesis Capital, and is a Managing Director at Strategic Capital Alternatives. Mr. Robertson holds a B.S. from Western Washington University.

Municipal/Taxable Fixed Income Model Portfolio

Egis Capital Management / Egis Municipal/Taxable Fixed Income

The Egis Fixed Income Municipal/Taxable Portfolio is managed to provide clients with diversification among municipal and taxable debt securities through investing in ETF's and mutual funds. The Egis Municipal/Taxable Fixed Income Portfolio is utilized within a client's asset allocation to add diversification and reduce volatility. The duration of investments are managed based on anticipated interest rates and the yield curve.

iSectors / iSectors® Domestic Fixed Income Allocation

iSectors® Domestic models are strategic asset allocation models that employ a Modern Portfolio Theory (MPT) -based approach to asset allocation. The equity portion of the models is allocated using a diversified basket of domestic, low-cost, equity index-based ETFs. The fixed income portion of the allocations is invested in diversified, low-cost ETFs that hold baskets of investment-grade domestic, government and corporate bonds of various maturities. The models, with respect to their use of ETFs and an annual rebalance process, are designed to be tax-sensitive. Conservative allocation strategy is intended to consist of approximately 100% domestic (U.S. Only) fixed-income investments.

iSectors believes that the empirical evidence strongly suggests that asset allocation is the predominant factor behind the returns of any investment approach. As such, many of the iSectors models are Strategic in nature, utilizing an indexing approach within the asset allocation models. Vehicles utilized to execute the allocation process within the models are primarily low-cost, primarily index-based ETFs.

Management of iSectors Asset Allocation strategies is overseen by an investment committee of four professionals, each with significant investment, business and accounting experience along and multiple professional designations, including Prateek Mehrotra, MBA, CFA, CAIA as their Chief Investment Officer and Timothy J. Landolt, MBA as their Strategies Manager. Mr. Mehrotra holds a MBA in Finance from Lehigh University and Mr. Landolt holds a MBA from Loyola Marymount University.

iSectors / iSectors® Institutional Fixed Income Allocation

iSectors® Institutional models employ a Modern Portfolio Theory (MPT)-based approach, with a review of Resampling, Black Litterman and Monte Carlo Simulation to optimally allocate the model portfolios. The equity portion of the models is allocated across a number of domestic, international and emerging markets index-based exchange traded funds. Fundamentally-weighted index ETFs are included in the model in an effort to enhance return and reduce volatility. The fixed income portion of each model is invested in diversified, low-cost ETFs that hold baskets of domestic, international and emerging market government and corporate bonds of various maturities. The models, with respect to their use of ETFs and an annual rebalance process, are designed to be tax-sensitive. Conservative allocation strategy is intended to consist of approximately 100% domestic (U.S. Only) fixed-income investments.

iSectors believes that the empirical evidence strongly suggests that asset allocation is the predominant factor behind the returns of any investment approach. As such, many of the iSectors models are Strategic in nature, utilizing an indexing approach within the asset allocation models. Vehicles utilized to execute the allocation process within the models are primarily low-cost, primarily index-based ETFs.

Management of iSectors Asset Allocation strategies is overseen by an investment committee of four professionals, each with significant investment, business and accounting experience along and multiple professional designations, including Prateek Mehrotra, MBA, CFA, CAIA as their Chief Investment Officer and Timothy J. Landolt, MBA as their Strategies Manager. Mr. Mehrotra holds a MBA in Finance from Lehigh University and Mr. Landolt holds a MBA from Loyola Marymount University.

ETF PORTFOLIO DESCRIPTIONS

Large Cap Value

PRIVACY DISCLOSURE DOCUMENT

As part of Equis Capital Management's long tradition of trust, the confidentiality of personal information is paramount. We maintain high standards to safeguard your personal information. We will remain vigilant and professional in protecting that information and in using it in a fair and lawful manner. As part of this commitment to fulfilling your trust we have formulated this Privacy Policy.

Safeguarding Customer Information and Documents

To conduct regular business, we may collect nonpublic personal information from sources such as:

To conduct regular business we collect non-public customer data in checklists, forms, in written notations, and in documentation provided to us by our customers for evaluation, registration, licensing or related consulting services. We also create internal lists of such data.

Equis Capital Management will internally safeguard your nonpublic personal information by restricting access to only those employees who provide products or services to you or those who need access to your information to service your account. In addition, we will maintain physical, electronic and procedural safeguards that meet federal and/or state standards to guard your nonpublic personal information. Failure to observe Equis Capital Management's procedures regarding customer and consumer privacy will result in discipline and may lead to termination.

Sharing Nonpublic Personal and Financial Information

As the Firm shares nonpublic information solely to service our client accounts, we do not disclose any nonpublic personal information about our customers or former Customers to anyone, except as permitted by law or otherwise disclosed herein.

Equis Capital Management is committed to the privacy and protection of our customers' personal and financial information. We will not share any such information with any affiliated or nonaffiliated third party except:

- When necessary to complete transactions in a customer account, such as clearing firm.
- When required to service and/or maintain your account
- In order to resolve a customer dispute or inquiry
- With persons acting in a fiduciary or representative capacity on behalf of the customer
- With rating agencies, persons assessing compliance with industry standards, or to the attorneys, accountants and auditors of the firm
- In connection with any sale and / or merger of Equis Capital Management's business.
- To prevent or protect against actual or potential fraud, identity theft, unauthorized transactions, claims or other liability.
- To comply with all federal, state or local laws, rules, statutes and other applicable legal requirements.
- In connection with a written agreement to provide advisory services or investment management when the information is released solely for the purpose of providing products or services covered by pursuant to the Equis Capital Wrap Fee Program.
- Upon the customer's specific instruction, consent or request
- Pursuant to any other exceptions enumerated in the California Information Privacy Act

Note: When we share your nonpublic information with any third party for the reasons stated above, we make certain that there are written restrictions in place regarding the use and/or disclosure of said information.

Opt-Out Provisions

It is not a policy of Equis Capital Management to share nonpublic personal and financial information with affiliated or unaffiliated third parties except under the circumstances noted above. Since sharing under the circumstances noted above is necessary to service customer accounts or is mandated by law, there are no allowances made for clients to opt out.

Exhibit 3

CUSTOMER IDENTIFICATION PROGRAM

Important Information You Need to Know About Opening a New Account

To help the government fight the funding of terrorism and money laundering activities, federal law requires financial institutions to obtain, verify, and record information that identifies each person who opens an account.

This Notice answers some questions about Equis Capital Management's Customer Identification Program.

What types of information will I need to provide?

When you open an account, Equis Capital Management is required to collect information such as the following from you:

- Your name
- Date of birth
- Address
- Identification number:
- U.S. Citizen: taxpayer identification number (social security number or employer identification number)
- Non-U.S. Citizen: taxpayer identification number, passport number, and country of issuance, alien identification card number, or government-issued identification showing nationality, residence, and a photograph of you

You may also need to show your driver's license or other identifying documents.

A corporation, partnership, trust or other legal entity may need to provide other information, such as its principal place of business, local office, employer identification number, certified articles of incorporation, government-issued business license, a partnership agreement, or a trust agreement.

U.S. Department of the Treasury, Securities and Exchange Commission, FINRA, and New York Stock Exchange rules already require you to provide most of this information. These rules also may require you to provide additional information, such as your net worth, annual income, occupation, employment information, investment experience and objectives, and risk tolerance.

What happens if I don't provide the information requested or my identity can't be verified?

Equis Capital Management may not be able to open an account or carry out transactions for you. If Equis Capital Management has already opened an account for you, we may have to close it.

We thank you for your patience and hope that you will support the financial industry's efforts to deny terrorists and money launderers access to America's financial system.

Exhibit 4**Business Continuity Plan (BCP) - Summary and Disclosure**

Securities industry regulations require that brokerage and investment advisor firms inform their clients of their plans to address the possibility of a business disruption that potentially results from a power outage, natural disaster, or other event. Equis Capital Management has a comprehensive business continuity program in place, which we review, update and test on a regular basis. This plan provides for continuation of client services in the event of various types of interruptions, such as those at our facilities as well as the services we provide. Although we obviously we cannot plan for or guarantee against all contingencies, we have developed this plan in an effort to stem off and / or prepare for most contingencies.

To conform with regulatory expectations, Equis Capital Management's strategy is designed so that we can meet our present obligations to our clients in the event of an unplanned interruption in business, such as in an emergency or a Significant Business Disruption (SBD). In order to facilitate this, we make strive to respond to significant business disruptions by safeguarding employees' lives and firm assets, making a financial and operational assessment, safely and swiftly recovering and resuming operations, protecting all of our books and records, and ensuring that our customers can continue to transact business. In the event that we determine we are unable to continue our business, we will assure customers prompt access to their funds and securities (if applicable).

Our plan anticipates two kinds of SBDs, internal and external. Internal SBDs affect only our firm's ability to communicate and do business, such as a fire or power outage in our building. External SBDs prevent the operation of the securities markets or a number of firms, such as a terrorist attack, a city flood, earthquake, or a wide-scale, regional disruption. Our response to an external SBD relies more heavily on other organizations and systems, especially on the capabilities of our clearing firm.

Key points to our plan include:

- Operational assessments
- Provisions for rapid resumption of mission critical systems
- Back-up arrangements for material relationships with business constituents, banks and appraisals of counter-party impact

- Back up system for recovery of data (both hard copy and electronic data)
- Alternate means for communications for use between employees and the firm, as well as between customers and the firm
- Instructions for communications with regulators and regulatory reporting requirements in the event of a disaster
- Description of the alternate physical locations of employees and/or certain departments
- Assurance for customers' prompt access to their funds and securities in the event the firm determines it is unable to continue its business
- Provisions for updating the plan
- Provisions for periodic testing of the plan
- Notification of relevant provisions of the plan to customers of the firm

No contingency plan can eliminate all risk of service interruption or temporarily impeded account access. Nevertheless, we assess and update our plans to mitigate risks to the extent reasonable. In creating our BCP, certain assumptions have been made such as alternative facilities being accessible, sufficient personnel being available, and external organizations including securities markets and government agencies being operational. If these assumptions are not valid under particular circumstances, we will evaluate possibilities for minimizing the disruption to services as feasible at that time and will promptly provide clients with information about how to access their funds and securities. In an effort to provide support and updated information, clients may contact us through our website at www.eqiscapital.com or via phone at 800-949-9936. In addition, for alternative access they may contact the Custodians(s) directly to access their funds in the event of an emergency at www.foliofn.com or 888-485-3456. We will review, update and test our BCP as needed in the event of changes to our business processes, technology and staff at a minimum annually. We will continue to post updated information on our website. You may also obtain our current BCP summary by submitting a written request to: Equis Capital Management, Inc. ATTN: Business Continuity Plan, 1299 4th St., Ste 502, San Rafael, CA 94901 or via email sent to support@eqiscapital.com.

Making sure that any type of disruption does not unduly impact our clients is extremely important to us, and our BCP is designed to allow us to continue to provide the high quality service you have come to expect from Equis Capital.
