Advisory Business

Firm Description

Raskob Kambourian Financial Advisors, LTD, was founded in 1986.

Raskob Kambourian Financial Advisors, LTD provides personalized confidential financial planning and investment management to individuals, pension and profit sharing plans, trusts, estates, charitable organizations and small businesses. Advice is provided through consultation with the client and may include: determination of financial objectives, identification of financial problems, cash flow management, tax planning, insurance review, investment management, education funding, retirement planning, and estate planning.

Raskob Kambourian Financial Advisors, LTD is strictly a fee-only financial planning and investment management firm. The firm does not sell annuities, insurance, stocks, bonds, mutual funds, limited partnerships, or other commissioned products. The firm is not affiliated with entities that sell financial products or securities. No commissions in any form are accepted. No finder's fees are accepted.

Investment advice is an integral part of financial planning. In addition, Raskob Kambourian Financial Advisors, LTD advises clients regarding cash flow, college planning, retirement planning, tax planning and estate planning.

Investment advice is provided, with the client making the final decision on investment selection. Raskob Kambourian Financial Advisors, LTD does not act as a custodian of client assets. The client always maintains asset control. Raskob Kambourian Financial Advisors, LTD places trades for clients under a limited power of attorney.

A written evaluation of each client's initial situation is provided to the client, often in the form of a net worth statement. Periodic reviews are also communicated to provide reminders of the specific courses of action that need to be taken. More frequent reviews occur but are not necessarily communicated to the client unless immediate changes are recommended.

Other professionals (e.g., lawyers, accountants, insurance agents, etc.) are engaged directly by the client on an as-needed basis. Conflicts of interest will be disclosed to the client in the unlikely event they should occur.

The initial meeting, which may be by telephone, is free of charge and is considered an exploratory interview to determine the extent to which financial planning and investment management may be beneficial to the client.

Principal Owners

Patricia Raskob is the 100% stockholder.

Types of Advisory Services

Raskob Kambourian Financial Advisors, LTD provides investment supervisory services, also known as asset management services; manages investment advisory accounts not involving investment supervisory services; furnishes investment advice through consultations; issues special reports about securities; and issues, charts, graphs, formulas, or other devices which clients may use to evaluate securities.

On more than an occasional basis, Raskob Kambourian Financial Advisors, LTD furnishes advice to clients on matters not involving securities, such as financial planning matters, taxation issues, and trust services that often include estate planning.

As of December 31, 2010 Raskob Kambourian Financial Advisors, LTD manages approximately \$120,070,419 in assets for approximately 144 clients. Approximately \$26,078,375 is managed on a discretionary basis, and \$93,992,044 is managed on a non-discretionary basis.

Tailored Relationships

The goals and objectives for each client are documented in our client relationship management system. Investment policy statements are created that reflect the stated goals and objective. Clients may impose restrictions on investing in certain securities or types of securities.

Agreements may not be assigned without client consent.

Types of Agreements

The following agreements define the typical client relationships.

Financial Planning Agreement

A financial plan is designed to help the client with all aspects of financial planning without ongoing investment management after the financial plan is completed.

The financial plan may include, but is not limited to: a net worth statement; a cash flow statement; a review of investment accounts, including reviewing asset allocation and providing repositioning recommendations; strategic tax planning; a review of retirement accounts and plans including recommendations; a review of insurance policies and recommendations for changes, if necessary; one or more retirement scenarios; estate planning review and recommendations; and education planning with funding recommendations.

Detailed investment advice and specific recommendations are provided as part of a financial plan. Implementation of the recommendations is at the discretion of the client.

The fee for a financial plan is predicated upon the facts known at the start of the engagement. The minimum fee is \$3,500.00 and maybe *negotiable*. Since financial planning is a discovery process, situations occur wherein the client is unaware of certain financial exposures or predicaments.

In the event that the client's situation is substantially different than disclosed at the initial meeting, a revised fee will be provided for mutual agreement. The client must approve the change of scope in advance of the additional work being performed when a fee increase is necessary.

Following the initial overview, ongoing services are provided to include advice on insurance, retirement, estate planning, tax planning and investment advice. Investment Advice includes meetings to set goals and parameters defining client's risk tolerance, time frame and objectives. Recommendations include allocation of present portfolio and allocation of future additions. Following client's approval, RKFA will implement the recommendations.

From	To	Base Fee		Under Management

Over	\$ 5,000,000	\$ 10,000	Plus	0.35%	

Investment Management Agreement

Most clients choose to have Raskob Kambourian Financial Advisors, LTD manage their assets in order to obtain ongoing in-depth advice and life planning. All aspects of the client's financial affairs are reviewed, including those of their children. Realistic and measurable goals are set and objectives to reach those goals are defined. As goals and objectives change over time, suggestions are made and implemented on an ongoing basis.

The scope of work and fee for an Investment Management Agreement is provided to the client in writing prior to the start of the relationship. An Investment Management Agreement includes: cash flow management; investment management (including performance reporting); advice on securities; cash and investments held in clients account; outlook for the economy and markets; analysis of account activity; performance and analysis of current and projected income and implementation of recommendations within each area.

The annual Advisory Service Agreement fee is based on a percentage of the investable assets according to the following schedule:

<u>Value of Assets Under Management</u>	<u>Percent of AUM</u>
0 - \$ 500,000	0.75%
\$ 500,001 - \$1,000,000	0.70%
\$1,000,001 - \$2,000,000	0.60%
\$2,000,001 - \$5,000,000	0.45%
Over - \$5,000,000	0.35%

Minimum Fee is \$5,000 per annum

The minimum annual fee is \$5,000.00 and may be negotiable. Current client relationships may exist where the fees are higher or lower than the fee schedule above.

Although the Advisory Service Agreement is an ongoing agreement and constant adjustments are required, the length of service to the client is at the client's discretion. The client or the investment manager may terminate an Agreement by written notice to the other party. At termination, fees will be billed on a pro rata basis for the portion of the quarter completed. The portfolio value at the completion of the prior full billing quarter is used as the basis for the fee computation, adjusted for the number of days during the billing quarter prior to termination.

Tax Preparation Agreement

Tax preparation work is available. The charge is based on the Forms and Schedules necessary to prepare Federal and any State Income tax return.

Minimum fee is \$100.00.

Financial Consulting Agreement – Hourly/Project Basis

Raskob Kambourian Financial Advisors, LTD provides Project planning services for clients who need advice on a limited scope of work. Minimum fee is \$2,500.00 with an hourly rate of \$350.00.

Asset Management

Assets are invested primarily in no-load or low-load mutual funds and exchange-traded funds, usually through discount brokers or fund companies. Fund companies charge each fund shareholder an investment management fee that is disclosed in the fund prospectus. Discount brokerages may charge a transaction fee for the purchase of some funds.

Stocks and bonds may be purchased or sold through a brokerage account when appropriate. The brokerage firm charges a fee for stock and bond

trades. Raskob Kambourian Financial Advisors, LTD does not receive any compensation, in any form, from fund companies.

Investments may also include: equities (stocks), warrants, corporate debt securities, commercial paper, certificates of deposit, municipal securities, investment company securities (variable life insurance, variable annuities, and mutual funds shares), U. S. government securities, options contracts, futures contracts, and interests in partnerships.

Initial public offerings (IPOs) are not available through Raskob Kambourian Financial Advisors, LTD.

Termination of Agreement

A Client may terminate any of the aforementioned agreements at any time by notifying Raskob Kambourian Financial Advisors, LTD in writing and paying the rate for the time spent on the investment advisory engagement prior to notification of termination. If the client made an advance payment, Raskob Kambourian Financial Advisors, LTD will refund any unearned portion of the advance payment.

Raskob Kambourian Financial Advisors, LTD may terminate any of the aforementioned agreements at any time by notifying the client in writing. If the client made an advance payment, Raskob Kambourian Financial Advisors, LTD will refund any unearned portion of the advance payment.

Fees and Compensation

Description

Raskob Kambourian Financial Advisors, LTD bases its fees on a percentage of assets under management, hourly charges and fixed fees.

Some *Retainer Agreements* may be priced based on the complexity of work, especially when asset management is not the most significant part of the relationship.

Financial plans are priced according to the degree of complexity associated with the client's situation.

Fees in limited situations are *negotiable*.

Fee Billing

Payment in full is expected upon invoice presentation. Fees are usually deducted from a designated client account to facilitate billing. The client must consent in advance to direct debiting of their investment account.

Monthly fees are charged in advance based on the value of the assets on the previous month end.

Other Fees

Custodians may charge transaction fees on purchases or sales of certain mutual funds and exchange-traded funds. These transaction charges are usually small and incidental to the purchase or sale of a security. The selection of the security is more important than the nominal fee that the custodian charges to buy or sell the security.

Raskob Kambourian Financial Advisors, LTD, in its sole discretion, may waive its minimum fee and/or charge a lesser investment advisory fee based upon certain criteria (e.g., historical relationship, type of assets, anticipated future earning capacity, anticipated future additional assets, dollar amounts of assets to be managed, related accounts, account composition, negotiations with clients, etc.).

New Advisory Service Agreement fees are calculated on a formula basis and adjusted for complexity of individual situations. *The formula is based on estimated time necessary to complete the client overview.*

Expense Ratios

Mutual funds generally charge a management fee for their services as investment managers. The management fee is called an expense ratio. For example, an expense ratio of 0.50 means that the mutual fund company charges 0.5% for their services. These fees are in addition to the fees paid by you to Raskob Kambourian Financial Advisors, LTD.

Performance figures quoted by mutual fund companies in various publications are after their fees have been deducted.

Past Due Accounts and Termination of Agreement

Raskob Kambourian Financial Advisors, LTD reserves the right to stop work on any account that is more than 90 days overdue. In addition, Raskob Kambourian Financial Advisors, LTD reserves the right to terminate any financial planning/asset management engagement where a client has willfully concealed or has refused to provide pertinent information about their financial situation when necessary and appropriate, in Raskob Kambourian Financial Advisors, LTD's judgment. Any unused portion of fees collected in advance will be refunded within 30 days.

Performance-Based Fees

Sharing of Capital Gains

Fees are not based on a share of the capital gains or capital appreciation of managed securities.

Raskob Kambourian Financial Advisors, LTD does not use a performance-based fee structure because of the potential conflict of interest. Performance-

based compensation may create an incentive for the adviser to recommend an investment that may carry a higher degree of risk to the client.

Types of Clients

Description

Raskob Kambourian Financial Advisors, LTD generally provides investment advice to individuals, pension and profit sharing plans, trusts, estates, or charitable organizations, corporations or business entities.

Client relationships vary in scope and length of service.

Account Minimums

Raskob Kambourian Financial Advisors does not have a minimum account size.

When an account falls below \$200,000.00 in value, the minimum annual fee of \$3,500.00 is charged. Depending upon circumstances, Raskob Kambourian Financial Advisors, LTD may sign an *Hourly Agreement* with the client if assets have diminished significantly below \$100,000.00.

Clients receiving ongoing Investment Management services will be assessed a \$5,000.00 minimum annual fee. Clients with assets below the minimum account size may pay a higher percentage rate on their annual fees than the fees paid by clients with greater assets under management.

Methods of Analysis, Investment Strategies and Risk of Loss

Methods of Analysis

Security analysis methods may include charting, fundamental analysis, technical analysis, and cyclical analysis.

The main sources of information include financial newspapers and magazines, inspections of corporate activities, research materials prepared by others, corporate rating services, timing services, annual reports, prospectuses, filings with the Securities and Exchange Commission, and company press releases.

Other sources of information that Raskob Kambourian Financial Advisors, LTD may use include Morningstar Principia mutual fund information, Morningstar Principia stock information, Charles Schwab & Company's "SchwabLink" service, Advisor Intelligence, and the World Wide Web.

Investment Strategies

The primary investment strategy used on client accounts is strategic asset allocation utilizing a core and satellite approach. This means that we use

passively-managed index and exchange-traded funds as the core investments, and then add actively-managed funds where there are greater opportunities to make a difference. Portfolios are globally diversified to control the risk associated with traditional markets.

The investment strategy for a specific client is based upon the goals, objectives, risk tolerance, and time frame as stated by the client during consultations. The client may change these elements at any time. Each client executes an Investment Policy Statement that documents their objectives and their desired investment strategy.

Other strategies may include long-term purchases, short-term purchases, trading, short sales, margin transactions, and option writing (including covered options, uncovered options or spreading strategies).

Risk of Loss

All investment programs have certain risks that are borne by the investor. Our investment approach constantly keeps the risk of loss in mind. Investors face the following investment risks:

- **Interest-rate Risk:** Fluctuations in interest rates may cause investment prices to fluctuate. For example, when interest rates rise, yields on existing bonds become less attractive, causing their market values to decline.
- **Market Risk:** The price of a security, bond, or mutual fund may drop in reaction to tangible and intangible events and conditions. This type of risk is caused by external factors independent of a security's particular underlying circumstances. For example, political, economic and social conditions may trigger market events.
- **Inflation Risk:** When any type of inflation is present, a dollar today will not buy as much as a dollar next year, because purchasing power is eroding at the rate of inflation.
- **Currency Risk:** Overseas investments are subject to fluctuations in the value of the dollar against the currency of the investment's originating country. This is also referred to as exchange rate risk.
- **Reinvestment Risk:** This is the risk that future proceeds from investments may have to be reinvested at a potentially lower rate of return (i.e. interest rate). This primarily relates to fixed income securities.
- **Business Risk:** These risks are associated with a particular industry or a particular company within an industry. For example, oil-drilling companies depend on finding oil and then refining it, a lengthy process, before they can generate a profit. They carry a higher risk of profitability than an electric company, which generates its income from

a steady stream of customers who buy electricity no matter what the economic environment is like.

- **Liquidity Risk:** Liquidity is the ability to readily convert an investment into cash. Generally, assets are more liquid if many traders are interested in a standardized product. For example, Treasury Bills are highly liquid, while real estate properties are not.
- **Financial Risk:** Excessive borrowing to finance a business' operations increases the risk of profitability, because the company must meet the terms of its obligations in good times and bad. During periods of financial stress, the inability to meet loan obligations may result in bankruptcy and/or a declining market value.
