ITEM 4: ADVISORY BUSINESS

WHO WE ARE. We are an investment adviser registered with the SEC under the Investment Advisers Act of 1940, as amended (the “*Advisers Act*”) and have been since 1970. We are a California corporation.

We are wholly-owned by The TCW Group, Inc., a Nevada corporation (“**Our Parent**”). Our Parent is majority-owned by Société Générale Holding de Participations, (“**SG Holding**”), which is controlled by Société Générale, S.A., (“**SG**”) an international banking company. SG Holding is the only 25% or more shareholder of Our Parent. SG is the only 25% or more shareholder of SG Holding.

THE SERVICES WE OFFER. We provide investment management and advice for a wide array of U.S. Equities, U.S. Fixed Income, International and Alternatives investment strategies for institutional and individual investors through investment advisory accounts (“**Accounts**”), and open- and closed-end private commingled investment funds (“**Funds**”). We are typically the direct adviser for an Account or Fund, but we sometimes are a sub-adviser. Each Account or Fund in any of our strategies or products is assigned to or managed under either: (i) our Marketable Securities Division, or (ii) our Alternative Investments/Structured Investments Division.

We offer investment management services in a variety of different investment strategies for which we have portfolio managers with an established investment style that our clients come to us for. Our clients include private or government investment funds and institutions, including pension funds, high net worth individuals and family offices and others. Those clients are generally sophisticated investors and often have internal and external consultants and advisers to assist them with determinations of their individual needs, such as allocations among types of investments, and do not seek those determinations from us. We may agree with certain clients on investment guidelines that restrict the securities or types of securities that we invest in on their behalf.

ASSETS UNDER MANAGEMENT. As of December 31, 2011, we had \$42,641,039,188 in discretionary assets under management and \$3,367,030,000 in non-discretionary assets under management. The TCW Group of Companies, including affiliated entities, had approximately \$117 billion in assets under management as of that date.

ITEM 5: FEES AND COMPENSATION

The investment management fees we charge are generally computed as a percentage of the market value of assets under management in the Account or Fund, and are billed, rather than deducted from the assets we manage. Our clients typically pay our management fees quarterly in arrears, although some Accounts and Funds pay us monthly. Accounts are generally subject to a minimum account size as shown in Item 7,

below. Investment management fees are based on the investment strategy and size of the account.

SEPARATE ACCOUNTS. The current fee schedule for Accounts is given below, stated on a per annum basis. In some instances, the fee may be negotiated, particularly in the case of larger accounts, accounts which require a different degree of services or which may involve other special circumstances. All of the strategies listed in this schedule are part of our Marketable Securities Division.

- **U.S. EQUITIES STRATEGIES:**

	Institutional		Individual (High Net Worth)
Concentrated Core	On all assets	.70%	On all assets 1.00%
Concentrated Value	On the first \$25 million	.75%	On all assets 1.00%
	On the next \$75 million	.55%	
	On the remaining assets	.45%	
Growth (All Cap Growth)	On all assets	.80%	On all assets 1.00%
Growth Equities	On the first \$25 million	.80%	On all assets 1.00%
	On the next \$25 million	.65%	
	On remaining assets	.60%	
Healthcare	On all assets	.75%	On all assets 1.00%
Large Cap Value	On the first \$25 million	.70%	On all assets 1.00%
	On the next \$75 million	.50%	
	On the remaining assets	.40%	
Multi-Cap Growth	On the first \$25 million	.80%	On all assets 1.00%
	On the next \$25 million	.65%	
	On the remaining assets	.60%	
Pluris	On all assets	1.00%	On all assets 1.00%

	Institutional		Individual (High Net Worth)
Relative Value Dividend Focused	On the first \$25 million	.70%	On all assets 1.00%
	On the next \$75 million	.50%	
	On the remaining assets	.40%	
Relative Value Large Cap	On the first \$25 million	.70%	On all assets 1.00%
	On the next \$75 million	.50%	
	On the remaining assets	.40%	
Small Cap Growth	On all assets	.85%	On all assets 1.00%
SMID Cap Growth	On the first \$25 million	.85%	On all assets 1.00%
	On the next \$25 million	.80%	
	On the remaining assets	.75%	
Value Opportunities	On the first \$25 million	.80%	On all assets 1.00%
	On the next \$25 million	.65%	
	On the remaining assets	.60%	

- **U.S. FIXED INCOME STRATEGIES:**

	Institutional		Individual (High Net Worth)
Cash Management	On all assets	.25%	Same as Institutional fee.
Core Fixed Income	On the first \$25 million	.35%	Same as Institutional fee.
	On the next \$75 million	.25%	
	On the remaining assets	.20%	
Core Plus Fixed Income	On the first \$25 million	.35%	Same as Institutional fee.
	On the next \$75 million	.25%	
	On the remaining assets	.20%	
Corporate Bonds	On the first \$50 million	.35%	Same as Institutional fee.
	On the next \$50 million	.30%	
	On the remaining assets	.25%	

	Institutional		Individual (High Net Worth)
Index Plus Mortgage-Backed Securities	On all assets		Same as Institutional fee.
	U.S. Investor	.20%	
	Non-U.S. Investor	.50%	
Mortgage-Backed Securities	On all assets		Same as Institutional fee.
	U.S. Investor	.30%	
	Non-U.S. Investor	.50%	
Mortgage-Backed Short-Intermediate	On all assets		Same as Institutional fee.
	U.S. Investor	.30%	
	Non-U.S. Investor	.50%	
Opportunistic Core Plus Fixed Income	On the first \$50 million	.40%	Same as Institutional fee.
	On the remaining assets	.35%	
Opportunistic Mortgage-Backed Securities	On the first \$50 million	.70%	Same as Institutional fee.
	On the remaining assets	.50%	
Securitized Opportunities (formerly Strategic MBS)	U.S. Investor		Same as Institutional fee.
	On the first \$50 million	1.00%	
	On the remaining assets	.50%	
	Non-U.S. Investor		
	On all assets	2.00%	
Specialized Cash Management	On all assets		Same as Institutional fee.
	U.S. Investor	.30%	
	Non-U.S. Investor	.50%	
Total Return Mortgage-Backed Securities	On all assets		Same as Institutional fee.
	U.S. Investor	.35%	
	Non-U.S. Investor	.50%	
• BALANCED STRATEGY:			
Core Balanced*	On the first \$50 million	.50%	Same as Institutional fee.
	On the next \$50 million	.40%	
	On the remaining assets	.30%	

* Consists of an Equity component and a Fixed Income component. Concentrated Core and Relative Value are the choices for the equity component.

- INTERNATIONAL STRATEGIES:**

	Institutional		Individual (High Net Worth)
Emerging Markets Equities	On the first \$25 million 1.00% On the next \$25 million .90% On the remaining assets .80%		Same as Institutional fee.

	For accounts of \$100 million or more: On the first \$100 million .50% On the remaining assets .40%		Same as Institutional fee.
Emerging Markets Local Currency	On accounts under \$100 million: On the first \$50 million .625% On the remaining assets .50%		Same as Institutional fee.
	For accounts of \$100 million or more: On the first \$100 million .50% On the remaining assets .40%		Same as Institutional fee.
International Fixed Income	On the first \$25 million .50% On the next \$25 million .35% On the next \$50 million .25% On the remaining assets .20%		Same as Institutional fee.
International Small Cap	On the first \$25 million 1.00% On the remaining assets .90%		Same as Institutional fee.

- COMPREHENSIVE ASSET ALLOCATION**

We also offer asset allocation investment management that combines one or more investment strategies. Allocations may be made to separate accounts, limited

partnerships, commingled investment trusts or mutual funds that we or our affiliates manage. Investment management fees are charged with respect to each allocation in accordance with the investment strategy in which each allocation is invested or based on a blended rate applicable to specified investment strategies.

PRIVATE FUNDS

We, or a company that we control, are the general partner or managing member of a number of open-end and closed-end privately-offered Funds (“**Private Funds**”). We generally offer Private Funds only to institutional and individual investors that qualify as both (1) a “qualified purchaser” as defined for purposes of Section 3(c)(7) of the Investment Company Act of 1940, and (2) “accredited investors,” as defined in Regulation D under the Securities Act of 1933. However, some Private Funds are available to investors that meet only the “accredited investor” requirement.

The terms of the each limited partnership are described in its private placement memorandum and limited partnership agreement (“**Offering Material**”), which are delivered to each potential investor prior to the time they invest. Investments in open-end Funds generally may be withdrawn monthly. Closed-end Funds are for a stated number of years as discussed in each Fund’s limited partnership agreement. In some instances, the fee may be negotiated because of special circumstances. See Item 7, below, for a list of our open-end funds, the minimum investment required for each and an “Important Notice”.

- **MARKETABLE SECURITIES DIVISION.** The following are the fees for the Funds we currently offer that are part of our Marketable Securities Division. All of these are open-end Funds.

FUND	MANAGEMENT FEES
TCW Worldwide Opportunities Fund	1.25% on each partner’s share of assets if less than \$50 million; 1.00% on assets \$50 million or greater up to \$100 million; and .80% on their share above that.
TCW Concentrated Core Equities, L.P.	.75% on the first \$50 million and .65% on remaining assets.
TCW Corporate Bond, L.P.	.35%
TCW Opportunistic Core Plus Fixed Income, L.P.	.45% on the first \$25 million, .35% on the next \$100 million, and .30% on remaining assets.
TCW High Yield II, L.P.	1.00% on each partner’s share of assets equal to \$2 million or less; .75% on assets greater than \$2 million but less than \$5 million; and .50% on their share above that.

TCW International Fixed Income, L.P.	.50% on all assets
TCW Leveraged Loan Fund, L.P.	.60% per annum on all assets
TCW Leveraged Loan Fund (Cayman), L.P.	.60% per annum on all assets
TCW Long/Short Opportunities Fund, LP	1.00% per annum on all assets
TCW Senior Secured Loan Fund, L.P.	.50% per annum of the first \$100 million; .40% per annum of the second aggregate \$100 million; and .30% per annum on the remaining assets.

IMPORTANT NOTICE

This Brochure may be provided to a prospective investor (“**Investor**”) in one of our Private Funds, together with the Private Fund’s private placement memorandum (“**PPM**”), organizational documents and other related documents (“**Governing Documents**”), in connection with Investor’s consideration of an investment in the Private Fund. While this Brochure may include information about the Private Fund, it does not represent a complete discussion of the features, risks or conflicts associated with the Fund. More complete information about each of our Private Funds is included in its PPM and other Governing Documents.

In no event should this Brochure be considered an offer of interests in a Private Fund or relied upon in determining to invest in a Private Fund. It is also not an offer of, or agreement to provide, advisory services directly to any recipient. Rather, this Brochure is designed only to provide information about us to comply with regulatory requirements under the Advisers Act, which may cause information in this Brochure to differ from the information provided in a PPM. If there is any conflict between the information in this Brochure and similar information in the Fund’s PPM, you should rely on the information in the PPM.

OTHER EXPENSE IN CONNECTION WITH ACCOUNTS AND FUNDS.

- Our Account clients will typically pay fees to their custodian in addition to our management fees. Depending on the strategy in which the account invests, the Account will incur brokerage fees for most equity trading, and the effect of the difference with respect to the bid/ask spread for trading in fixed income investments. If the strategy for the Account involves derivatives, the Account may be required to make payments under the derivatives to counterparties.

- Our Funds will typically incur the same fees as Accounts described above, as well as fees for maintenance of books and records, custody fees, audit expense, tax preparation expense, organizational expense, fees to fund administrators, insurance expense, and annual licensing and registration fees and taxes. If a Fund permits borrowing or other leverage, there may be interest expense and fees for credit. Certain alternative strategies may incur legal expense in connect with the acquisition or disposition of investments and the handling of distressed investments. The Fund Offering Documents describe these fees and expenses in greater detail.

COMPENSATION OF OUR EMPLOYEE MARKETING REPRESENTATIVES.

Our employees who act as our marketing representatives are not normally paid a sales commission by our Funds for marketing those Funds to our clients. If they were to be paid a sales commission by any of our Funds, we would fully disclose that in the Fund documents provided to potential investors prior to investment.

We do, however, compensate our marketing representatives from the management fees we earn on Accounts that they are responsible for and for their clients who invest in our Funds. This practice presents a conflict of interest and gives our marketing representatives an incentive to recommend our investment strategies and Funds based on the compensation received, rather than on a client's needs. Many of our marketable securities strategies are available through mutual fund and wrap accounts managed by our affiliate TCW Investment Management Company ("TIMCO") through brokers and other agents not affiliated with us. For the mutual funds, those brokers and agents are generally compensated through a portion of TIMCO's advisory fees, and in some cases through 12b-1 fees disclosed in the mutual fund documents.

ITEM 6: PERFORMANCE-BASED FEES AND SIDE-BY-SIDE MANAGEMENT

We may receive investment advisory fees for some of the Accounts and Funds that we manage that are performance fees. For investment strategies invested in marketable securities, the performance fee normally consists of an increased asset-based fee which is tied to the performance of the Account or Fund to a benchmark. For alternative investment strategies and for some marketable securities accounts, the performance fees are based on the Account or Fund achieving net gains over a stated rate of return. Alternative investment strategies include:

- mezzanine or other forms of privately-placed financing, distressed investing, private equity, project finance, real estate investments, leveraged loan strategies and other similar strategies, and
- strategies offered in structured vehicles, such as collateralized loan obligations or collateralized debt obligations, or in private funds (sometimes called "hedge funds").

Our portfolio managers may share in performance fees. In each case the fees are specifically authorized by the Account or Fund documents and disclosed in any Fund disclosure documents. For other Accounts and Funds we manage that make the same or similar investments, we may receive investment advisory fees based only on a percentage of assets or a fixed fee.

Performance fees create a risk that:

- we may have an incentive to allocate more attractive investment opportunities to Accounts or Funds with performance fees, and
- we may cause the Account or Fund to make investments that are more speculative than we would for an Account or Fund with similar investment guidelines that does not have performance fees. However, we may receive no performance fee or a reduced fee if the Account or Fund has losses, which can align our interest with the client and temper this risk.

Accounts and Funds that make similar investments, but do not pay us performance fees, may have different investment advisory fees from each other, which also can create the risk that we may allocate more attractive investment opportunities to Accounts and Funds with greater investment advisory fees.

To mitigate these risks, we monitor Accounts and Funds for compliance with investment guidelines and follow investment allocation policies. Under our allocation policies, when a particular investment would be appropriate for several Accounts and Funds we manage, we apportion the investment in a manner that we determine in good faith to be fair and equitable. Our apportionment may not be pro rata depending on our determination of all relevant factors such as differing investment objectives, diversification considerations, and cash availability. We follow similar good faith apportionment policies when disposing of investments for our Accounts and Funds. These allocation policies could in certain circumstances adversely affect the price paid or received by our Accounts and Funds. See Item 12 of this Brochure, describing our *Brokerage Practices*, for more information.

ITEM 7: TYPES OF CLIENTS

Our clients include many of the largest corporate and public pension plans, financial institutions, endowments and foundations in the U.S., as well as a substantial number of foreign investors and high net worth individuals.

Accounts in our investment strategies are generally subject to a minimum account size. In some instances, the minimum may be negotiated because of special circumstances, such as clients with investments managed by us in multiple strategies.

MARKETABLE SECURITIES DIVISION

- **U.S. EQUITIES STRATEGIES:**

	Minimum Account Size	
	Institutional	Individual (High Net Worth)

- **COMPREHENSIVE ASSET ALLOCATION**

The minimum account size for investments in Comprehensive Asset Allocation is \$50 million.

PRIVATE FUNDS

We, or a company that we control, are the general partner or managing general partner for a number of open-end privately-offered Funds that invest in marketable securities.

- We generally offer the following Funds only to institutional and individual investors that qualify as both (1) a “qualified purchaser” as defined for purposes of Section 3(c)(7) of the Investment Company Act of 1940, and (2) “accredited investors,” as defined in Regulation D under the Securities Act of 1933. The

minimum initial investment required is shown for each. In some instances the minimum investment may be negotiated because of special circumstances.

FUND	MINIMUM INVESTMENT
TCW Americas Development Association, L.P. [dba TCW Worldwide Opportunities Fund]	\$1 million
TCW High Yield II, L.P.	\$2 million
TCW Leveraged Loan Fund, L.P.	\$1 million
TCW Leveraged Loan Fund (Cayman), L.P.	\$1 million
TCW Securitized Opportunities, L.P.	\$1 million
TCW Securitized Opportunities (Cayman), L.P.	\$1 million
TCW Senior Secured Loan Fund, L.P.	\$1 million

- We generally offer the following Funds only to institutional and individual "accredited investors," as defined in Regulation D under the Securities Act of 1933. The minimum initial investment required is shown for each. In some instances the minimum investment may be negotiated because of special circumstances.

FUND	MINIMUM INVESTMENT
TCW Concentrated Core Equities, L.P.	\$1 million
TCW Corporate Bond, L.P.	\$1 million
TCW Long/Short Opportunities Fund, LP	\$250,000
TCW Opportunistic Core Plus Fixed Income, L.P.	\$1 million
TCW International Fixed Income, L.P.	\$250,000

IMPORTANT NOTICE

This Brochure may be provided to a prospective investor (“**Investor**”) in one of our privately-offered Funds (“**Private Funds**”), together with the Private Fund’s private placement memorandum (“**PPM**”), organizational documents and other related documents (“**Governing Documents**”), in connection with Investor’s consideration of an investment in the Private Fund. While this Brochure may include information about the Private Fund, it does not represent a complete discussion of the features, risks or conflicts associated with the Fund. More complete information about each of our Private Funds is included in its PPM and other Governing Documents.

In no event should this Brochure be considered an offer of interests in a Private Fund or relied upon in determining to invest in a Private Fund. It is also not an offer of, or agreement to provide, advisory services directly to any recipient. Rather, this Brochure is designed only to provide information about us to comply with regulatory

requirements under the Advisers Act, which may cause information in this Brochure to differ from the information provided in a PPM. If there is any conflict between the information in this Brochure and similar information in the Fund's PPM, you should rely on the information in the PPM.

ITEM 8: METHODS OF ANALYSIS, INVESTMENT STRATEGIES AND RISK OF LOSS

An investment in any of our strategies involves risk, including the risk that an investor can lose money. An investment in any of these strategies by itself is not a balanced investment program for purposes of an investor's portfolio diversification needs. Investors should consult with their financial adviser regarding the appropriateness of an investment in any of these strategies for their overall investment program.

EQUITIES STRATEGIES:

The equity strategies we offer and the principal methods and sources of analysis we use are:

- **Concentrated Core.** A highly-focused approach primarily targeting top large cap companies with strong and enduring business models. An active strategy utilizing proprietary fundamental research focused on identifying companies with improving operating prospects. The strategy also uses cyclical and political risk analysis. Sources of information include financial news, review of corporate activity, internal and third-party research, company reports and press releases, due diligence meeting with management and interviews with suppliers, customers and competitors.
- **Concentrated Value.** A concentrated, large cap value strategy of generally 25-40 securities seeking capital appreciation through fundamental research, analysis of a company's return on capital and cash flow, and a concentrated portfolio structure. The strategy also uses charting, technical, and cyclical analysis, as well as analysis of proprietary data and analytical systems, credit analysis, analysis of discounted cash flows, and discussions with 3rd parties. Sources of information include financial news, internal and third-party research, company reports and press releases, and due diligence meetings with management.
- **Growth Equities.** A strategy that seeks to achieve long-term capital appreciation primarily from medium-sized companies with above average growth prospects. The strategy uses fundamental and cyclical analysis. Sources of information include financial news, inspection of corporate activity, internal and third-party research, corporate rating services, company reports and press releases, due diligence meetings with management, court filings, interviews with suppliers, customers and competitors and audited financial reports.

- **Healthcare.** Our strategy seeks long term capital appreciation by identifying public-traded healthcare-related equity securities that are trading below fundamental value. The strategy may also invest in equity securities of non-U.S. companies trading on a U.S. exchange, NASDAQ or in the U.S. over-the-counter markets. The strategy uses charting, fundamental and technical analysis, as well as analysis of political risk, discounted cash flows and discussions with third parties.
- **Large Cap Value.** A diversified large cap value strategy generally containing 45-75 securities seeking capital appreciation that uses fundamental research, earnings forecasts, return on invested capital, and quantitative portfolio construction. The strategy also uses charting, and cyclical analysis, as well as analysis of securities structures, country and political risk, geological, reserve engineering and consultant reports, proprietary data and analytical systems, credit, monthly compliance statements, discounted cash flows, and discussions with 3rd parties. Sources of information include financial news, inspection of corporate activity, internal and third-party research, timing services, company reports and press releases, due diligence meetings with management, court filings, independently prepared engineering and technical reports, interviews with suppliers, customers and competitors and audited financial reports.
- **Pluris.** A large cap value strategy which seeks to maximize total return using a highly concentrated approach that generally holds no more than 15 securities, and which invests in undervalued companies with improving cash flow and returns on invested capital. The strategy uses charting, fundamental, technical, and cyclical analysis, as well as analysis of securities structures, country and political risk, geological, reserve engineering and consultant reports, proprietary data and analytical systems, credit, monthly compliance statements, discounted cash flows, and discussions with 3rd parties. Sources of information include financial news, inspection of corporate activity, internal and third-party research, timing services, company reports and press releases, due diligence meetings with management, court filings, independently prepared engineering and technical reports, interviews with suppliers, customers and competitors and audited financial reports.
- **Relative Value Dividend Focus.** A strategy which employs a highly disciplined, analytically-driven investment process utilizing quantitative and qualitative resources to generate investment ideas. Primarily invests in equities of companies with dividend paying records. The strategy uses bottom-up, fundamental analysis, as well as analysis of consultant reports, proprietary data and analytical systems, discounted cash flows, and discussions with third parties. Sources of information include financial news, inspection of corporate activity, internal and third-party research, company reports and press releases, due diligence meetings with management, court filings, interviews with suppliers, customers and competitors and audited financial reports.

- **Relative Value Large Cap.** A strategy seeking undervalued, large cap stocks where the company has a fundamental catalyst or competitive advantage which will ultimately be recognized by the market place and appreciate in value. The strategy uses bottom-up, fundamental analysis, as well as analysis of consultant reports, proprietary data and analytical systems, discounted cash flows, and discussions with third parties. Sources of information include financial news, inspection of corporate activity, internal and third-party research, company reports and press releases, due diligence meetings with management, court filings, interviews with suppliers, customers and competitors, and audited financial reports.

Note: In addition to the risks of all our equities strategies, the following are subject to small and mid-capitalization risk described below:

- **Small Cap Growth.** An approach that focuses on equity investments in lesser-known, smaller companies that are experiencing improving fundamentals and above-average growth prospects on a long-term basis. The strategy uses fundamental analysis, as well as analysis of geological, reserve engineering and consultant reports, proprietary data and analytical systems, credit, discounted cash flows, and discussions with 3rd parties. Sources of information include financial news, company reports and press releases, due diligence meetings with management, interviews with suppliers, customers and competitors and audited financial reports.
- **SMID Cap Growth.** A strategy that seeks to achieve capital appreciation primarily through investment in high quality small-and medium-sized companies with superior earnings growth and attractive stock market valuations. The strategy uses fundamental analysis, as well as analysis of geological, reserve engineering and consultant reports, proprietary data and analytical systems, credit, discounted cash flows, and discussions with 3rd parties. Sources of information include financial news, company reports and press releases, due diligence meetings with management, interviews with suppliers, customers and competitors and audited financial reports.
- **TCW Growth (All Cap) Strategy.** An all-cap growth strategy seeking capital appreciation by investing in a unique blend of equity securities across all market capitalizations with the potential for above average earnings growth. The strategy uses charting, fundamental, technical, and cyclical analysis, as well as analysis of securities structures, country and political risk, geological, reserve engineering and consultant reports, proprietary data and analytical systems, discounted cash flows, and discussions with 3rd parties. Sources of information include financial news, inspection of corporate activity, internal and third-party research, corporate rating services, company reports and press releases, due diligence meetings with management, court filings, independently prepared engineering and technical

reports, interviews with suppliers, customers and competitors, third party analytical systems and audited financial reports.

- **TCW Multi-Cap Growth Strategy.** An approach that focuses on equity investments in mispriced securities of companies in all capitalization ranges with good fundamentals and above-average growth prospects on a long-term basis. In addition to fundamental analysis, this strategy is based on analysis of securities structures, country and political risk, geological, reserve engineering and consultant reports, proprietary data and analytical systems, discounted cash flows and discussions with third parties. Sources of information include financial news, inspection of corporate activity, internal and third-party research, corporate rating services, company reports and press releases, due diligence meetings with management, court filings, interviews with suppliers, customers and competitors, and audited financial reports.
- **Value Opportunities.** An aggressive capital appreciation style that generally invests in small- and medium-sized cap companies deemed to be undervalued relative to the equities market. The strategy uses bottom-up, fundamental analysis, as well as analysis of consultant reports, proprietary data and analytical systems, discounted cash flows, and discussions with third parties. Sources of information include financial news, inspection of corporate activity, internal and third-party research, company reports and press releases, due diligence meetings with management, court filings, interviews with suppliers, customers and competitors and audited financial reports.

The principal risks of investing in our equities strategies are:

- **equity risk:** the risk that stocks and other equity securities generally fluctuate in value more than bonds and may decline in value over short or extended periods based on changes in a company's financial condition and in overall market economic and political conditions.
- **price volatility risk:** the risk that the value of the investment portfolio will change as the prices of its investments go up or down.
- **liquidity risk:** the risk that there may be no willing buyer of the portfolio securities and it may have to sell those securities at a lower price or may not be able to sell the securities at all, each of which would have a negative effect on performance.
- **market risk:** the risk that returns from the securities in which we invest will decline in value due to factors affecting securities markets generally or particular industries represented in the securities markets.
- **securities selection risk:** the risk that the securities in the investment portfolio will underperform other accounts or funds investing in the same asset class or

benchmarks that are representative of the asset class because of the our choice of securities.

- **portfolio management risk:** the risk that an investment strategy may fail to produce the intended results.
- **issuer risk:** the risk that the value of a security may decline for reasons directly related to the issuer such as management performance, earnings, financial leverage, the value of assets and reduced demand for the issuer's goods or services.
- **investment style risk:** the risk that the particular style or set of styles that the we primarily use may be out of favor or may not produce the best results over short or longer time periods and may increase the volatility of the value of the investment portfolio.
- **globalization risk:** the risk that the growing interrelationship of all global economies and financial markets has increased the effect of conditions in one country or region on issuers of securities in a different country or region.
- **non-diversification risk:** the risk that the portfolio we invest in may be subject to wider fluctuations in value than if it were subject to broader diversification requirements.
- **foreign investing risk:** the risk that the asset prices will fluctuate with market conditions and the economic and political climates where investments are made.
- **foreign currency risk:** the risk that the value of the investments we make that are denominated in foreign currencies will decline in value relative to the U.S. dollar.
- **small and mid-capitalization risk:** For certain of our strategies identified above, the risk that the stock performance of small and mid-capitalization companies can be more volatile than the stock performance of large capitalization companies, and they face the risk of business failure which increase the risk of loss.
- **market disruptions and geopolitical risk:** geopolitical events may disrupt securities markets and adversely affect global economies and markets. Those events, as well as other changes in foreign or domestic economic and political conditions could adversely affect the value of the investments we make.

U.S. FIXED INCOME

The fixed income strategies we offer are:

- **Cash Management.** A short-term strategy emphasizing principal protection and liquidity by seeking to invest in high quality short-term investments. The assets are invested primarily in U.S. government securities, repurchase agreements and corporate debt.
- **Core Fixed Income.** This strategy invests across US Fixed Income sectors and seeks to outperform by applying specialized management expertise and allocating capital among the US government, corporate, and mortgage-backed bond sectors. In addition to the risk factors for all fixed income strategies, see the risk factors for mortgage-backed and asset-backed securities, below
- **Core Plus Fixed Income.** The strategy seeks to outperform the broad bond market by applying specialized management expertise to and allocating capital among the US government, corporate, high yield and mortgage-backed bond sectors. In addition to the risk factors for all fixed income strategies, see the risk factors for derivatives and mortgage-backed and asset-backed securities, below
- **Corporate Bonds.** A value-oriented strategy capitalizing on our fundamental credit analysis capabilities. The focus is on identifying investment grade corporate bonds offering attractive yields with a particular emphasis on avoiding deteriorating credits as well as selecting improving credits. In addition to the risk factors for all fixed income strategies, see the risk factor for asset-backed securities, below

Note: In addition to the risks of all our fixed income strategies, the following are subject to the mortgage-backed securities, asset-backed securities and derivatives risks described below:

- **Index Plus Mortgage-Backed Securities.** A fixed income strategy that seeks high income and total returns in excess of the broad investment grade bond market through investing in US dollar-denominated mortgage-backed securities. This strategy generally involves tighter restraints on the investments it makes, such as non-agency mortgage-backed securities, than our Mortgage-Backed Securities strategy.
- **Mortgage-Backed Securities.** A fixed income strategy that seeks high income and total returns in excess of the broad investment grade bond market through investing in US dollar-denominated mortgage-backed securities.
- **Mortgage-Backed Short-Intermediate.** A fixed income strategy investing primarily in mortgage-backed securities of US government agencies. The strategy

seeks to capture much of the higher yields of traditional long-term bond portfolios with relatively less volatility.

- **Opportunistic Core Plus Fixed Income.** A strategy that invests in domestic and international fixed income sectors. Its goal is to outperform the aggregate bond market over full market cycles.
- **Opportunistic Mortgage-Backed Securities.** The Opportunistic Mortgage-Backed Securities strategy offers investors the opportunity to take advantage of the pockets of inefficiencies that exist due to the significant repricing of mortgage credit risk. With extensive experience in all sectors of the MBS markets, we are well equipped to exploit these opportunities.
- **Securitized Opportunities (formerly Strategic MBS).** An aggressive, total return fixed income strategy, emphasizing complex mortgage-backed securities designed to offer high absolute returns. The strategy is not managed within a prescribed duration range, and may vary greatly over time.
- **Specialized Cash Management.** A fixed income strategy investing in adjustable rate and other short-term mortgage-backed securities issued by US government agencies. The strategy seeks to outperform short-term US Treasuries and other “AAA” credits.
- **Total Return Mortgage-Backed Securities.** A fixed income strategy that seeks high income and total returns in excess of the broad investment grade bond market through investing in US dollar-denominated mortgage-backed securities. This strategy generally involves fewer restraints on the investments it makes, such as non-agency mortgage-backed securities, than our Mortgage-Backed Securities strategy.

Our methods and sources for analysis for domestic fixed income strategies:

We are a value investment manager. As such, our investment process focuses on preserving capital for our clients, while extracting value utilizing deep, fundamental, “bottom-up” research and analysis.

For the credit sector, our research focuses on asset value, seniority in the capital structure, and the ability to generate free cash flow. We utilize several measures to determine a company's asset value (including discounted cash flow analysis, multiples of cash flow, multiples of free cash flow, percentage of replacement cost, required IRR, etc.) and then compare that to the market price of their debt. We conduct a detailed examination of the company's organizational and capital structure to determine seniority. We consider both structural and payment seniority, as well as limitations on the company's ability to incur debt senior to us. In addition, we concentrate on the actual cash flow generated by reconstructing the components that make up the change in cash from period to

period. This removes accrual accounting distortions. Other firm specific factors such as liquidity, management, and competitive position are also considered. Finally, industry and regulatory characteristics and conditions are examined for desirability and timing of investment.

We employ quantitative research that is driven by a number of powerful and dynamic proprietary models that aid in the analysis of fixed income securities. These models assist us in establishing independent criteria for bond valuation. We believe that the process of developing quantitative fixed income tools in-house improves their understanding and knowledge of different securities. These proprietary analytics also help us to understand and focus on how portfolios are structured relative to benchmarks and how portfolios will perform across a variety of interest rate, yield curve, and volatility scenarios.

Our proprietary quantitative models assist us in analyzing the following sectors of the fixed income market: Treasury securities, Treasury futures, callable corporate bonds, mortgage pass throughs, and collateralized mortgage obligations (CMOs). In addition, we have a proprietary portfolio management system, which aids in risk management, scenario analysis, portfolio risk metrics, client reporting, and compliance. Finally, by having a proprietary portfolio management system rather than vended software, we are able to adapt faster to changes in the market and to do customized reporting or implement risk management projects from clients and consultants.

Our loan level database of over 30 million loans provides original and current loan characteristics that are updated monthly. The original information provided includes LTV, zip code, property type, documentation, loan type, FICO score, etc. Current information is updated monthly to include payment status, modification details, loss amounts, prepayments and liquidation amounts necessary for us to estimate information and REO sale prices.

The research and analytics generate deal and zip code level metrics including delinquency roll rates, prepayment rates, REO sales index, mark-to-market LTV, negative/positive equity and many other factors historically critical in the analysis of the complex non-agency MBS sector. In today's market, the most important factor is the loan-to-value ratio, as it is the primary driver of a borrower's default decision, a key input to loss severity calculations and a significant indicator of prepayment speeds. Our ability to determine a more accurate LTV than is observable in the broader market statistics is a critical way we add incremental value to portfolio analysis and security selection. The output of this analysis shapes our market analysis/insight and pricing and determines vintage rankings, alt-A vs. subprime vs. prime vs. option-arm comparative analysis, absolute and relative rankings at the deal level as well as security level.

In addition to our proprietary resources, we also utilize the best tools available from external vendors. One example is our utilization of Open-Bloomberg, which allows our proprietary analytics packages to interface directly with real time market data. This

includes a database containing over 1,000,000 separate fixed income issues. Another example is our utilization of The Yield Book. This tool enables us to model client indexes with an additional database containing 50,000+ issues. The Yield Book allows us to provide clients, by request, with third-party risk metrics for their portfolio. The output of our analysis shapes our market analysis/insight and pricing and we will conduct further in-depth research to determine relative value.

Our methods and sources for analysis for international fixed income strategies:

We utilize a value-seeking investment approach developed to identify and exploit the best reward-risk opportunities in emerging markets fixed income. Our integrated top-down and bottom-up investment processes emphasize global and multi-sector diversification to generate attractive risk-adjusted returns from income and capital appreciation. Scenario analysis is an important element in the investment process. This probabilistic approach includes the widest range of potential outcomes in the determination of expected returns, allowing us to establish a dynamic link between credit fundamentals, market valuations, and portfolio strategy.

All sovereign and corporate credits are evaluated utilizing proprietary credit models designed and developed by us. This phase of the research process serves three important functions: isolate key credit strengths and weaknesses and other risk factors; analyze the momentum of credit fundamentals; and standardize the framework for comparing credits

Sovereign credits are evaluated using a standardized set of quantitative and qualitative variables covering: exchange rates, fiscal policy, debt service capacity and debt dynamics, financial sector strength, structural reforms and political outlook. Corporate credit fundamentals are evaluated using separate financial and qualitative variables covering: operating performance, debt service capacity, management, competitive position, covenants and operating trends.

Investment positions will generally be taken in countries that are at various stages of the economic development process and share three important characteristics: (i) strong commitment to orthodox economic reforms (macroeconomic stabilization and structural reform); (ii) increasing linkages to developed markets; and (iii) a strategic geopolitical position. Countries where the commitment to economic reform is weak and credit fundamentals are constrained by macroeconomic or financial instability, weak political institutions, and geographic isolation will generally be avoided unless the portfolio managers believe that political or other factors are likely to support a stronger macroeconomic policy mix going forward or where risks are more than fully reflected in prices. In addition, portfolio overlays are utilized to promote diversification. These include GDP filters, sector limits, issue limits, issuer limits, exchange rate limits, and weighted average rating targets.

The cornerstone to our risk management methodology is an elaborate scenario building process that isolates the strengths and weaknesses of each investment and constructs baseline, best, and worst case outcomes from the interplay of investment

fundamentals. The aforementioned process is integral to the development of our investment strategy and risk management techniques; explicit probabilities and market valuations are assigned to each scenario. For each investment, expected return forecasts are derived that capture the full range of possible outcomes. To make the analysis more conservative, worst case outcomes are assumed to include one or several of the most common emerging markets crises, e.g., debt service crisis, financial crisis, balance of payments or exchange rate crisis, or political crisis. This scenario framework is utilized to define specific performance benchmarks for each investment. These benchmarks are utilized to monitor the performance of each investment through time.

In addition to our primary research, the portfolio managers, sovereign risk analysts, and corporate credit analysts also utilize a wide variety of outside research sources, including sell side banks and investment banks, including, but not limited to: JP Morgan, Deutsche Bank, Citibank, Bank of America, Merrill Lynch, and UBS; international multilateral organizations, such as the IMF, IBRD, IADB, EBRD and ADB; in-country political and economic consultants; and a variety of outside data services, including Bloomberg and FactSet.

The principal risks for all fixed income strategies are:

- **interest rate risk:** the risk that debt securities will decline in value because of changes in interest rates or a decline in interest rates will lower their yield.
- **credit risk:** the risk that an issuer will default in the payment of principal and/or interest on a security.
- **price volatility risk:** the risk that the value of the investment portfolio will change as the prices of its investments go up or down.
- **issuer risk:** the risk that the value of a security may decline for reasons directly related to the issuer such as management performance, earnings, financial leverage, the value of assets and reduced demand for the issuer's goods or services.
- **liquidity risk:** the risk that there may be no willing buyer of the portfolio securities and we may have to sell those securities at a lower price or may not be able to sell the securities at all each of which would have a negative effect on performance.
- **market risk:** the risk that returns from the securities in which we invest will decline in value due to factors affecting securities markets generally or particular industries represented in the securities markets.
- **securities selection risk:** the risk that the securities we invest in will underperform others investing in the same asset class or benchmarks that are representative of the asset class because of our choice of securities.
- **portfolio management risk:** the risk that an investment strategy may fail to produce the intended results.
- **globalization risk:** the risk that the growing inter-relationship of all global economies and financial markets has increased the effect of conditions in one country or region on issuers of securities in a different country or region.

- **Market disruptions and geopolitical risk:** geopolitical events may disrupt securities markets and adversely affect global economies and markets. Those events, as well as other changes in foreign or domestic economic and political conditions could adversely affect the value of the investments we make.

The following are risks of strategies that invest in mortgage-backed securities:

- **prepayment risk:** the risk that in times of declining interest rates, the higher yielding securities will be prepaid and we will have to replace them with securities having a lower yield.
- **extension risk:** the risk that in times of rising interest rates mortgage prepayments will slow causing portfolio securities considered short or intermediate term to be long-term securities which fluctuate more widely in response to changes in interest rates than shorter term securities.
- **underlying collateral risk:** the risk that the impairment of the value of the collateral underlying the non-agency security in which we invest, such as non-payment of mortgage loans, will result in a reduction in the value of the security.

The following are risks of strategies that employ derivatives or leverage:

- **derivatives risk:** the risk of investing in derivative instruments, including liquidity, interest rate, market and management risks, mispricing or improper value. Changes in the value of a derivative may not correlate perfectly with the underlying asset, reference rate or index and could lose more than the principal amount invested.
- **leveraging risk:** the risk that leverage created from borrowing or certain types of transactions or instruments, including derivatives, may impair the investment portfolio's liquidity, cause it to liquidate positions at an unfavorable time, increase volatility or otherwise not achieve its intended result.
- **counterparty risk:** the risk that the other party to a contract, such as a swap agreement, will not fulfill its contractual obligations.

The following are risks of strategies that invest in asset-backed securities:

- **underlying collateral risk:** the risk that the impairment of the value of the collateral underlying a security in which we invest such as non-payment of loans, will result in a reduction in the value of the security.

BALANCED STRATEGY:

- **Core Balanced.** A strategy which consists of an equity component, either the TCW Concentrated Core Equity Strategy or the TCW Relative Value Large Cap Strategy and a fixed income component, the TCW High Grade Fixed Income Strategy, all described above, and seeks to provide high total return from equity

and fixed income markets by investing in a managed asset allocation portfolio of high quality stocks and bonds.

INTERNATIONAL STRATEGIES:

The international strategies we offer are:

- **Emerging Markets Equities.** This strategy seeks long-term capital appreciation by investing in the equity securities of issuers in emerging market countries. In addition to fundamental analysis, our portfolio managers analyze and rely on corporate capital structures, country and political risk, geological, reserve engineering or consultant reports, proprietary data, cash flows, and discussions with third parties. This strategy is subject to the same risks as U.S. equities described above, including derivatives, leveraging and counterparty risk. In addition it is subject to the special risks for international strategies described below.
- **Emerging Markets Fixed Income.** This strategy seeks high current income and total returns by investing in emerging market fixed income securities, including the debt obligations of public and private sector issuers. The strategy uses fundamental, technical, and cyclical analysis, as well as analysis of security structure, country and political risk, credit, discounted cash flows, and discussions with 3rd parties. Sources of information include primary research, financial news, inspection of corporate activity, research from secondary sources, corporate rating services, timing services, company reports and press releases, due diligence meetings with management, court filings, independently prepared engineering and technical reports, interviews with suppliers, customers and competitors, third party analytical systems and audited financial reports. This strategy is subject to the same risks as U.S. fixed income strategies described above, including derivatives, leveraging and counterparty risk. In addition it is subject to the special risks for international strategies described below.
- **Emerging Markets Local Currency.** This strategy seeks high current income and total returns by investing in emerging market fixed income securities, including the debt obligations of public and private sector issuers, denominated in local currency. For this strategy our managers employ fundamental, technical and cyclical analysis, as well as analysis of security structures, country and political risks, proprietary data and analytical systems, credit, discounted cash flows and discussions with third parties.
- **International Fixed Income.** This strategy invests primarily in non-US dollar-denominated investment grade fixed income securities. It seeks to maintain a sufficient degree of country diversification to reduce risk while seeking to outperform the benchmark. In addition to fundamental and technical analysis, we analyze securities structures, country and political risk and credit. This

strategy is subject to the same risks as U.S. fixed income strategies described above, including derivatives, leveraging and counterparty risk. In addition it is subject to the special risks for international strategies described below.

- **International Small Cap.** This strategy seeks long-term capital appreciation by investing the equity securities of small capitalization companies that are domiciled outside the United States or whose primary business operations are outside the United States. Small capitalization companies are companies with a market capitalization of \$6 billion or less at time of investment. For this strategy our manager employ charting, fundamental, technical and cyclical analysis, as well as analysis of securities structures, country and political risk, geological, reserve engineering or consultant reports, proprietary data and analytical systems, cash flows, discussions with third parties, and rank order screening techniques. This strategy is subject to the same risks as U.S. equities described above, including derivatives, leveraging and counterparty risk. In addition it is subject to the special risks for international strategies described below, and the risk that the stock performance of small and mid-capitalization companies can be more volatile than the stock performance of large capitalization companies, and they face the risk of business failure which increases the risk of loss.

The principal additional special risks for international strategies are:

- **emerging market country risk:** the risk that the value of investments will decline due to the greater degree of economic, political and social instability of emerging market countries as compared to the developed countries.
- **foreign currency risk:** the risk that the value of the investments denominated in foreign currencies will decline in value because the foreign currency has declined in value relative to the U.S. dollar.

ITEM 9: DISCIPLINARY INFORMATION

Not Applicable.

ITEM 10: OTHER FINANCIAL INDUSTRY ACTIVITIES AND AFFILIATIONS

Broker-Dealer. TCW Funds Distributors (“TFD”) is a registered broker-dealer that is affiliated with us. Some of our employees are registered representatives or principals of TFD. These registered representatives and principals may receive compensation from us for selling interests in open- and closed-end commingled investment vehicles that we manage. They do not receive sales commissions from those investment vehicles, unless specifically disclosed.

Commodities Registrations. We are registered as a commodity pool operator (“CPO”) and a commodity trading adviser (“CTA”). Some of our officers are registered as associated persons of us as a CPO and CTA. These associated persons may receive compensation from us for selling interests in funds or for accounts we manage. They do not receive sales commissions or other compensation from those funds or accounts, unless specifically disclosed.

Investment Advisers. For certain investment strategies, we may retain related registered investment advisers on a fully-disclosed basis. See Part 1 and 2 of the Form ADV of each of these related investment advisers for additional information about their investment management services.

- Buchanan Street Partners, L.P. (SEC Number: 801-60634; CRD Number: 113634)
- Metropolitan West Asset Management, LLC (SEC Number: 801-53332; CRD Number: 104571)
- TCW Investment Management Company (SEC Number: 801-29075; CRD Number: 106546)
- TCW-WLA JV Venture LLC (SEC Number: 801-71746; CRD Number: 154760)

Banks and Trust Companies. An affiliate of ours, Trust Company of the West, is a California trust company licensed by the California Department of Financial Institutions. We are indirectly controlled by Société Générale, S.A., an international banking institution. See Item 11, Participation or Interest in Client Transactions, for further information about transactions we may enter into with Société Générale, S.A. and its affiliates.

Private Funds. We or one of our affiliates is the general partner or managing member of the limited partnerships and limited liability companies listed below that are private commingled investment Funds we provide investment management services to.

This Brochure may be provided to a prospective investor (“**Investor**”) in one of our privately-offered Funds (“**Private Funds**”), together with the Private Fund’s private placement memorandum (“**PPM**”), organizational documents and other related documents (“**Governing Documents**”), in connection with Investor’s consideration of an investment in the Fund. While this Brochure may include information about the Private Fund, it does not represent a complete discussion of the features, risks or conflicts associated with the Fund. More complete information about each of our Private Funds is included in its PPM and other Governing Documents.

In no event should this Brochure be considered an offer of interests in a Private Fund or relied upon in determining to invest in a Private Fund. It is also not an offer of, or agreement to provide, advisory services directly to any recipient. Rather, this Brochure is designed only to provide information about us to comply with regulatory requirements under the Advisers Act, which may cause information in this Brochure to differ from the information provided in a PPM. If there is any conflict between the information in this Brochure and similar information in the Private Fund’s PPM, you should rely on the information in the PPM.

Other Advisers We May Recommend to Clients.

We from time to time recommend to our clients affiliated and unaffiliated investment advisors that are not subsidiaries of The TCW Group, Inc. (together “**Non-TCW Advisors**”). The Non-TCW Advisors may pay us compensation, including a portion of the management and performance fees that they receive, for any of our clients that invest with the Non-TCW advisor. This could create the risk that we refer our clients to the Non-TCW Advisors solely to receive the compensation, without consideration of the interests of the client. However, we review each Non-TCW Advisor, as well as their investment strategies and funds that we recommend, to determine that the adviser has appropriate business capability and capacity and that they offer investment alternatives that may not be available from us. We disclose to the clients we refer to Non-TCW Advisors that we may be compensated if the client establishes an Account or invests in a Fund of the Non-TCW Advisor.

The following are Non-TCW Advisors we may refer our clients to:

- Amundi Group and its subsidiaries
- Lyxor Asset Management, S.A.
- Rockefeller & Co., Inc.

ITEM 11: CODE OF ETHICS, PARTICIPATION OR INTEREST IN CLIENT TRANSACTIONS AND PERSONAL TRADING

SUMMARY OF OUR CODE OF ETHICS

Our officers, directors and employees are generally subject to our Code of Ethics (the “**Code**”). We will provide a copy of our Code of Ethics to any client or prospective client upon request. Our contact information appears on the first page of this Brochure.

The Code includes:

- **Conduct Principles.** General principles of conduct for all employees;
- **Restrictions on Personal Investment.** Restrictions on investment transactions in which our officers, directors and certain other persons have a beneficial interest to avoid any actual or potential conflict or abuse of their fiduciary position. The Code permits personnel subject to the Code to invest in securities, but contains several restrictions and procedures designed to eliminate conflicts of interest including: (a) pre-clearance of non-exempt personal investment transactions; (b) quarterly reporting of personal securities transactions and initial and annual reporting of securities holdings; (c) a prohibition against personally acquiring securities in an initial public offering, entering into uncovered short sales and writing uncovered options; (d) a ten day “black out period” prior or subsequent to a client transaction during which portfolio managers are prohibited from making certain transactions in securities which are being purchased or sold by a client of

- such manager; (e) a prohibition, with respect to certain investment personnel, from profiting in the purchase and sale, or sale and purchase, of the same (or equivalent) securities, within 60 calendar days; (f) a prohibition against buying or selling any security which is subject to firm wide or, if applicable, a department restriction; (g) a prohibition of the purchase of securities offered in a hedge fund, other private placement or limited offering (other than certain offerings we sponsor) except with prior approval of designated officers; (h) a prohibition of a purchase, without prior disclosure to a designated officer, on behalf of a client through a private placement of a security of an issuer or its affiliate, if a member of the department purchasing the security has a beneficial interest in the issuer or affiliate; and (i) a prohibition of acquiring any shares of a third party mutual fund we advise or sub-advise.
- **Insider Trading Rules.** A policy statement on insider trading that provides generally that none of our officers, directors or employees (a) may buy or sell a security either for themselves or others while in possession of material non-public information about the company, or (b) communicate material, non-public information to others who have no official need to know. The policy statement provides guidance about what is material non-public information, lists common examples of situations in which our personnel could obtain that information, and describes our procedures regarding securities maintained on its "Restricted Securities List" and for establishing Information Walls. It also identifies parties to contact for questions in connection with the requirements of the policy statement.
 - **Restrictions on Gifts and Preferential Treatment.** A policy governing gifts, payments and preferential treatment that includes an approval process for specific categories of gifts and entertainment provided to our employees or given by our employees.
 - **Restrictions on Employee Outside Activities.** A policy governing an employee's activities outside of their employment with us, including outside employment, service as a director or in a similar capacity, fiduciary appointments, participation in public affairs and service as treasurer of clubs, houses of worship and lodges.
 - **Restrictions on Political Contributions and Activities.** A policy on political activities and contributions, containing general rules governing contributions and solicitation, responsibility of individuals for personal contribution limits, quarterly reporting of political activities by certain employees and rules for political activities on our premises and for using our resources. The policy further requires employees and certain of their related parties to obtain pre-clearance of political contributions, solicitations and volunteer activity.
 - **Confidentiality Requirements.** Policies governing the confidentiality of our client and business information.

- **Whistleblower Provisions.** A policy stating it is our practice that employees report illegal activity or activities not in compliance with our formal written policies and procedures, including the Code.

The Code provides that exemptive relief may be given from certain of its requirements, upon application.

PARTICIPATION OR INTEREST IN CLIENT TRANSACTIONS

Transactions with Société Générale and Related Parties. Société Générale Holding de Participations, a company controlled by Société Générale, S.A. (“SG”) owns a majority of the stock of The TCW Group, Inc., our parent company. As a result, SG and its subsidiaries and affiliates (which include broker-dealers, banks and other financial intermediaries and institutions) are now our related persons.

- We will enter into transactions or services involving related persons only in accordance with applicable laws and where we determine that the transactions or services are being done on an arm's length basis at fees or rates comparable to: (i) those generally available to the related person's other clients and (ii) those available to us in the marketplace from unrelated parties.
- Where required under Section 206(3) of the Advisers Act, and related rules, or Rule 17e-1 under the Investment Company Act, we will obtain client consent prior to effecting transactions with related parties, either on a case-by-case basis or on a blanket basis, as required or permitted by law. Certain funds we manage specifically authorize transactions with related parties and us, or an affiliate, may consent to those on behalf of those funds.
- From time to time, we may take the following actions on behalf of our clients, or recommend to our clients that they take such actions:
 - buy or sell securities in which persons related to us have a financial interest;
 - effect transactions through related persons, including broker-dealers acting as principal or as agent for non-clients;
 - buy or sell securities to or from related persons who are broker-dealers;
 - buy or sell securities in which we, parties related to us or our other client's accounts are at the same time effecting a sale or purchase; and
 - effect transactions with brokers that have clearing relationships with related persons who are broker-dealers.

In any transaction with a related party, the related party may receive compensation. Furthermore, we may act as investment adviser for related persons and may act as

investment adviser for pension vehicles of related persons. We may be restricted under certain circumstances from entering into principal and agency and other transactions with affiliates of SG. We have adopted procedures to identify brokers affiliated with SG, and that are designed generally to prevent the purchase for certain clients of securities issued by SG and certain of its affiliates. We have also adopted policies and procedures with respect to permitted transactions with our affiliates designed to assure that client interests are not adversely affected.

Investment Products. We may, from time to time, recommend to or purchase or sell on behalf of clients, securities or other investment products ("**Investment Products**") in which we, our affiliates or other related persons have a financial interest as the investment manager, general partner or trustee or as a co-investor in such Investment Products.

Consulting and Structuring Fees. We and our affiliates may receive fees from third parties for performing consulting, merger and acquisition structuring or other financial advisory services or acting as directors, officers or creditors' committee members. These fees can relate to actual, contemplated or potential investments of our clients. Such fees may be retained entirely affiliates or us.

Certain Funds pay us or an affiliate up-front structuring fees. In each case the fees are specifically authorized by the fund documents and disclosed in fund or account disclosure documents, if any. All or a portion of any structuring fees may be credited against investment advisory fees that we earn from the fund.

Transactions by Different Accounts, Funds and Strategies. We may recommend or enter into for clients of any investment strategy:

- sales of or short positions (if allowed) in securities of an issuer, at the same time other of our or our related investment strategies purchase securities of the same issuer for their clients; or
- investments in securities in the same and/or different parts of the capital structure of an issuer than other of our, or our related, strategies.

Securities We Purchase, Hold or Sell. We may recommend, buy or sell securities of issuers in which we or related persons may also purchase, hold or sell securities. These securities may be either publicly traded or private placements. Our Code of Ethics described above establishes various procedures with respect to investment transactions in which our related persons have a beneficial interest that are designed to reduce the potential for conflicts of interest.

Board of Director Memberships. Our officers or employees may from time to time be members of the boards of directors of publicly or privately held companies which may be permitted investments of various investment strategies we offer. In these cases, we take steps, such as establishing appropriate "Information Wall" procedures or placing the

security in question on a Restricted List, which may limit or preclude us from purchasing or selling such securities for our clients.

ITEM 12: BROKERAGE PRACTICES

GENERAL. We and our affiliates seek to achieve best execution when selecting broker-dealers to execute securities transactions. Best execution means seeking to achieve the lowest possible transaction costs by employing an efficient trading process. Best execution does not necessarily mean the lowest available price or commission. We do not necessarily measure best execution by the circumstances surrounding a single transaction and may seek best execution over time across multiple transactions. Other goals include execution of trades on behalf of clients in a timely and cost effective manner, fairness to clients, both in priority of order execution and in the allocation of the price obtained in execution of trades, and compliance with client trading related mandates and investment restrictions.

EQUITIES. Transactions in equities are not always executed at the lowest available commission, and we may effect transactions which cause the client to pay a commission in excess of a commission that another broker-dealer would have charged. We do that if we determine that such commission is reasonable in relation to the value of the brokerage and research services we receive.

- **Block Trades.** In an effort to achieve efficiencies in execution and reduce trading costs, we and our affiliates frequently aggregate securities transactions on behalf of a number of accounts at the same time, generally referred to as "*block trades*." When executing block trades, trades will be allocated among accounts using procedures that we consider fair and equitable. Participation of an account in the allocation is based on such considerations as investment objectives, guidelines and restrictions, availability of cash, amount of existing holdings (or substitutes) of the security in the accounts, investment horizon and directed brokerage instructions, if applicable. We may execute securities transactions alongside or interspersed between block orders when we believe that such execution will not interfere with our ability to execute the order in a manner believed to be most favorable to our clients as a whole. We may exclude trades for accounts that direct brokerage or that are managed in part for tax considerations from block trades.

In some cases, various forms of pro rata allocation are used, and in other cases, random allocation processes are used. However, considerations such as lot size, existing or targeted account weightings in particular securities, account size, cash availability, diversification requirements and investment objectives, restrictions and time horizons may result in more particularized allocations. In connection with multi-account purchase or sale programs, and in other circumstances, if practicable, if multiple trades for a specific security are made with the same

broker in a single day, those securities are allocated to accounts based on a weighted average purchase or sale price.

- **Order Sequencing.** For our U.S. equity strategies we employ a proprietary sequencing methodology designed to determine the trading order of participating equity accounts in such a manner as to provide the most favorable execution under the circumstances, considering factors deemed relevant. The methodology takes into account the liquidity of the security being purchased or sold, the size of the order and the potential market impact. Under the methodology, trades involving less liquid securities, or a higher potential for market impact, will generally result in fully-directed equity accounts being queued at the end of the order so as to minimize the market impact of the order on other accounts. Conversely, trades involving more liquid securities and/or lower potential for market impact may result in fully-directed equity accounts being queued over the course of the full order, which may be either closer to the beginning or the end of the order. Although we believe that our sequencing methodology will result in better net execution of client orders, it is not designed to ensure (and we do not expect) that all clients will receive the same execution terms with respect to orders placed pursuant to this methodology. Additionally, we may trade in a manner not dictated by the sequencing methodology if we determine, in our discretion, that to do so will improve the overall quality of execution. Sometimes securities are held in multiple strategies managed by the same portfolio manager. In these cases, trading in a security in one strategy may (but need not necessarily) occur concurrently with trading of the same or a similar security in other strategies managed by the portfolio manager.
- **Allocation of Public Offerings.** We generally share allocations of equity securities in a pro rata fashion based upon assets under management of those accounts eligible to participate in the initial public offering. We may, however, determine not to allocate shares to Accounts or Funds below a certain minimum threshold. Portfolio managers are also required to designate whether their interest in an equity new issue allocation is to establish a long-term position or is for trading purposes, and priority is given to allocations for long-term positions. In addition, fully directed equity accounts will not be allocated shares in initial public offerings.
- **Client Directed Brokerage.** Clients may direct us to place some or all of the transactions for their accounts with one or more broker-dealers they specify. Clients may do so for several reasons, including offsetting consulting and other fees or participating in a bundled services program. In such circumstances, we may not be able to negotiate commissions, obtain volume discounts or select a broker based on the most favorable price and execution for the transaction. Because of that, such accounts may pay higher commissions than those that do not direct brokerage and may not get best execution. Accounts with directed brokerage instructions may be excluded from block trades and their directed

orders will generally be executed following completion of any non-directed trades. As a result, performance results for these accounts may vary from other client accounts we manage in the same strategy. In some instances, the client may direct us to make all or substantially all of their account trades with specific broker-dealers ("*fully directed*" accounts). Fully directed account clients may be required to sign certain acknowledgments, including the fact that such direction regarding brokerage may compromise best execution and that the client's account may trade after other accounts. Clients may also prohibit us from placing transactions for their accounts with certain broker-dealers. This may prevent us from selecting a restricted broker-dealer even though such broker-dealer may offer a more favorable price and execution for the transaction. In addition, the client may lose the possible advantage that non-designating and unrestricted clients may derive from block trades, utilizing alternative trading venues, or alternative trading techniques for the purchase or sale of a particular security.

- **Client Commissions Used for Research.** When appropriate under its discretionary authority and consistent with its duty to seek best execution, we may direct brokerage transactions for accounts to broker-dealers who provide brokerage and research services. In some cases, research is provided directly by an executing broker-dealer ("*direct research providers*") and in other cases, research may be provided by third party research providers such as a non-executing third party broker-dealer or other third party research service ("*third party research providers*"). Research services furnished by direct research providers or third party research providers generally may be used for any or all of our clients, as well as clients of affiliated entities. In addition, research services generally may be used in connection with accounts other than those whose commissions were used to pay for such research services.

We use an internal allocation procedure to identify those direct research providers who provide us with research services and endeavor to place sufficient transactions with them to ensure the continued receipt of research services we believe are useful. Our procedures also seek to compensate third party research providers that provide us with research by directing executing broker-dealers to cause payments to be made to third party research providers, through cash payments from the executing broker, commission sharing arrangements between the executing broker and a research provider broker or through the use of stepout transactions. A "*stepout transaction*" is a securities trade executed by the executing broker-dealer, but settled by the non-executing research broker-dealer permitting the non-executing research broker-dealer to share in the commission. The determination of the broker-dealers to whom commissions are directed generally is made using a system involving the Director of Research, the portfolio managers and/or the research analysts and is periodically reviewed by the Trading Committee. The Director of Research coordinates the evaluation of broker-dealer research services in most instances, taking into account the views of TCW's portfolio managers and analysts.

Research services include items such as reports on industries and companies, economic analyses, review of business conditions and portfolio strategy, and various trading and quotation services. They also include advice from broker-dealers as to the value of securities, availability of securities, availability of buyers, and availability of sellers. In addition, they include recommendations as to purchase and sale of individual securities and timing of transactions.

We maintain records of all services that are provided under client commission arrangements or directly for third-party research. The records include descriptions of research services and products, the costs of these services, and the brokers with whom we have these arrangements. We may receive products or services from broker-dealers that are used for both research services and other purposes, such as corporate administration or marketing ("*mixed-use products or services*"). We make a good faith effort to determine the relative proportions of mixed-use products or services that may be attributable to research services. The portion attributable to research services may be paid through the allocation of brokerage commissions, and we pay the non-research service portion in cash.

Upon request, we may provide clients with commission reports that show commissions paid to brokers with whom the client's account has traded in a given period. In addition, upon request, we may provide clients with reports that disclose the extent to which commissions paid on a client's account have been used to pay for research services.

We use client brokerage commissions to obtain research or other products or services and receive a benefit because we do not have to pay for the research, products or services. We have an incentive to select or recommend a broker-dealer based on our interest in receiving the research or other products and services, rather than on our clients' interest in trading at the most favorable prices.

- **Commission Rates.** The head of our Equity Trading Department, with the approval of senior management, determines the guidelines for commission rates paid to broker-dealers for equities (other than for directed brokerage orders, discussed above). Fixed income securities are generally purchased from the issuer or a primary market maker acting as principal on a net basis without a stated commission but at prices generally reflecting a dealer spread. Both fixed income securities and equity securities may also be purchased from underwriters at prices that include underwriting fees. Because commission rates are fixed in some international markets, we may be unable to negotiate commissions to any meaningful degree in such markets.

FIXED INCOME. We take into account such factors as price (including the applicable dealer spread), size of order, and difficulty of execution when executing fixed income trades. Transactions are not always executed at the best available price. Other goals

include execution of trades on behalf of clients in a timely and cost effective manner, fairness to clients, both in priority of order execution and in the allocation of the price obtained in execution of trades, and compliance with client trading related mandates and investment restrictions.

Fixed income securities are generally purchased from the issuer or a primary market maker acting as principal on a net basis without a stated commission but at prices reflecting a dealer spread. Fixed income securities may also be purchased from underwriters at prices that include underwriting fees. Because of this pricing structure, research, and products and other services are not paid for from trades in fixed income securities.

- **Block Trades.** In an effort to achieve efficiencies in execution and reduce trading costs, we and our affiliates frequently aggregate securities transactions on behalf of a number of accounts at the same time, generally referred to as "*block trades*." When executing block trades, trades will be allocated among accounts using procedures that we consider fair and equitable. Participation of an account in the allocation is based on such considerations as investment objectives, guidelines and restrictions, availability of cash, amount of existing holdings (or substitutes) of the security in the accounts, investment horizon and directed brokerage instructions, if applicable. We may execute securities transactions alongside or interspersed between block orders when we think that such execution will not interfere with our ability to execute the order in a manner believed to be most favorable to our clients as a whole. We may exclude trades for accounts that direct brokerage or that are managed in part for tax considerations from block trades.
- In some cases, various forms of pro rata allocation are used, and in other cases, random allocation processes are used. However, considerations such as lot size, existing or targeted account weightings in particular securities, account size, cash availability, diversification requirements and investment objectives, restrictions and time horizons may result in more particularized allocations. In connection with multi-account purchase or sale programs, and in other circumstances, if practicable, if multiple trades for a specific security are made with the same broker in a single day, those securities are allocated to accounts based on a weighted average purchase or sale price.
- **Allocation of New Issues.** For new issues of fixed income securities, various forms of pro rata allocations among eligible accounts are generally used, and in other cases, random allocation processes are used. If a small amount of par value is allocated to us, we may allocate disproportionately, taking into consideration lot size, existing or targeted account weightings in particular securities and/or sectors, account size, diversification requirements and investment objectives/restrictions.

- **Client Directed Brokerage.** We may not be able to obtain volume discounts or negotiate price with a broker for accounts that direct brokerage. Because of that, such accounts may not get best execution. Accounts with directed brokerage instructions may be excluded from block trades and their directed orders will generally be executed following completion of any non-directed trades. As a result, performance results for these accounts may vary from other client accounts we manage in the same strategy. In some instances, the client may direct us to make all or substantially all of their account trades with specific broker-dealers (“*fully directed*” accounts). Fully directed account clients may be required to sign certain acknowledgments, including the fact that such direction regarding brokerage may compromise best execution and that the client’s account may trade after other accounts.

AFFILIATED BROKER-DEALERS Broker-dealers selected may include broker-dealers in which clients or their affiliates, or, indirectly we or our affiliates, have some financial interest.

WOMEN-OWNED/MINORITY-OWNED BROKERS. We may, subject to our duty to seek best execution, select broker-dealers for the execution of portfolio transactions that are majority-owned or operated by women and/or members of minority groups. We will select such a broker-dealer only if the broker-dealer can achieve best execution for the account and if selecting the broker-dealer will not cause our clients to pay brokerage commissions or incur portfolio transaction costs in an amount greater than would have been incurred if we had not used such firm. Our list of approved brokers includes women-owned and minority-owned broker-dealers that we have determined are capable of providing best execution. The Trading Review Committee establishes and reviews targets for use of women-owned and minority-owned broker-dealers.

ITEM 13: REVIEW OF ACCOUNTS

Our clients are divided among investment professionals according to the investment strategy of the portfolio. Portfolios are typically monitored and reviewed by the personnel who handle the strategy on an ongoing basis. The details of the monitoring vary based on the nature of the investment strategy.

Separately, our compliance and risk functions perform monitoring and review, including daily transaction reviews for marketable securities strategies.

A combined team led by members of our portfolio analytics and risk departments review the activities of each marketable and alternative investment strategy during our quarterly Portfolio Analytics Committee meeting. This Committee, comprised of members of our executive management, compliance, legal, portfolio analytics, and risk teams, reviews investment activities and portfolio analytics with a focus on changes or shifts to investment style, as well as quantitative metrics, including performance, historical trends,

and risk profiles. If necessary, we hold additional detailed meetings with individual senior investment professionals to further review their respective strategy in order to gain a deeper understanding of the fundamental drivers of the performance metrics. In addition, we review certain alternative investment strategies quarterly at Investment Product Review Committee (“IPRC”) meetings. Participants in IPRC meetings typically include senior portfolio management personnel from the investment strategy, as well as members of our executive management, legal and compliance teams.

We generally distribute quarterly or semi-annual written reports to investors in the Private Funds listed in Item 10, above. The reports describe the activities and provide information about the investments of these funds. In addition, annual reports containing the audited financial statements are prepared and distributed to the investors for many of these Funds.

ITEM 14: CLIENT REFERRALS AND OTHER COMPENSATION

From time to time, we may pay a non-affiliated third party (“**Solicitor**”) a fee or compensation for referral of a client to us in a separate account. The Solicitor is required to provide prospective clients with a current copy of our Brochure and the Solicitor's written disclosure statement. The Solicitor's statement will disclose the particulars of the referral relationship and the compensation we will pay to the Solicitor. We will obtain a signed and dated acknowledgement from each referred client of the receipt of the Brochure and the disclosure statement, as required by Rule 206-4(3) of the Investment Advisers Act of 1940.

At times we may pay persons affiliated with us a fee or compensation for referring a client to us in a separate account. Those persons will disclose to clients the nature of their relationship to us at the time they solicit the clients for us.

Many of our clients engage the services of consultants in connection with their investments and investment managers. Compensation we pay to consultants would typically be disclosed as indicated by the paragraph above, as required by law. We may also pay from time to time a portion the cost of conferences, seminars and other activities we attend that are sponsored by consultants.

ITEM 15: CUSTODY

Accounts. Due to certain arrangements, we may be deemed to have “custody” of client accounts within the meaning of Rule 206(4)-2 under the Advisers Act because we may have access to or authority over client funds and securities for purposes other than issuing trading instructions. If we are deemed to have custody over an account, the custodian will send the client investor periodic account statements (generally on a quarterly basis) indicating the amounts of any funds or securities in your account as of the end of the statement period and any transactions in the account during the statement period. You should review these statements carefully. Additionally, you should contact us

immediately if you do not receive account statements from your custodian on at least a quarterly basis. As noted in Item 13, above, we may provide you, separately, with reports or account statements providing information about the account. You should compare these carefully to the account statements you receive from your custodian. If you should discover any discrepancy between the account statements, please contact us immediately.

Private Funds. Because we or an affiliate serves as general partner or managing member of certain private Funds, we are deemed to have “custody” of the private funds within the meaning of Rule 206(4)-2 under the Advisers Act. For most of these funds, we provide each investor in the fund with audited financial statements that comply with U.S. generally accepted accounting practices (“**GAAP Audits**”) within 120 days following the Fund’s fiscal year end. For some private Funds, we follow the procedure outlined for Accounts, above, and do not provide GAAP Audits.

ITEM 16: INVESTMENT DISCRETION

We enter into written agreements for each Account and Fund that we manage that state our discretion to manage the Account or Fund. We typically have discretionary authority for the investments of these Accounts and Funds, subject to specific investment guidelines and restrictions of those agreements. We enter into these agreements after legal, risk and compliance review on our behalf.

ITEM 17: VOTING CLIENT SECURITIES

We will accept proxy voting authority from our clients, and follow our Proxy Voting Policy, which is summarized below. If we have accepted proxy voting authority from the client, we do not provide the client the option to direct a proxy vote with respect to a particular solicitation. We do, however, agree with some clients to use their proxy voting guidelines when voting proxies on their behalf.

Some of our clients do not give us the authority to vote proxies on their behalf, choosing to vote proxies themselves. Those clients will likely receive proxy solicitations from a custodian and transfer agent, and not through us. Those clients occasionally contact us with questions about a particular solicitation. Our Senior Proxy Specialist will discuss our guidelines with respect to the solicitation with the client.

SUMMARY OF PROXY VOTING POLICY

The following is a summary of our Proxy Voting Policy. We will provide a copy of our Proxy Voting Policy to any client or prospective client upon request. Our contact information appears on the first page of this Brochure.

If we have responsibility for voting proxies in connection with our investment advisory duties, or have the responsibility to specify to an agent how to vote the client’s proxies, we exercise such voting responsibilities through the corporate proxy voting process. We

believe that the right to vote proxies is a significant asset of our clients' holdings. In order to provide a basis for making decisions in the voting of proxies for our clients, we have established a proxy voting committee (the "**Proxy Committee**") and adopted proxy voting guidelines (the "**Guidelines**") and procedures. The Proxy Committee generally meets quarterly (or at such other frequency as determined by the Proxy Committee), and its duties include establishing proxy voting guidelines and procedures, overseeing the internal proxy voting process, and reviewing proxy voting issues. The members of the Proxy Committee include our personnel from the investment, compliance, legal and marketing departments. We also use an outside proxy voting service (an "**Outside Service**") to help manage the proxy voting process. The Outside Service facilitates our voting according to the Guidelines (or according to guidelines submitted by our clients) and helps maintain our proxy voting records. Our proxy voting and record keeping is dependent on the timely provision of proxy ballots by custodians, clients and other third parties. Under circumstances described below involving potential conflicts of interest, we may also request the Outside Service to help decide certain proxy votes. In certain limited circumstances, particularly in the area of structured finance, we may enter into voting agreements or other contractual obligations that govern the voting of shares. In the event of a conflict between any contractual requirements and the Guidelines, we will vote in accordance with our contractual obligations.

Philosophy. The Guidelines provide a basis for our decisions in the voting of proxies for clients. When voting proxies, our utmost concern is that all decisions be made solely in the interests of the client and with the goal of maximizing the value of the client's investments. With this goal in mind, the Guidelines cover various categories of voting decisions and generally specify whether we will vote for or against a particular type of proposal. Our underlying philosophy, however, is that our portfolio managers, who are primarily responsible for evaluating the individual holdings of our clients, are best able to determine how best to further client interests and goals. The portfolio managers may, in their discretion, take into account the recommendations of our management, the Proxy Committee, and the Outside Service.

Overrides and Conflict Resolution. Individual portfolio managers, in the exercise of their best judgment and discretion, may from time to time override the Guidelines and vote proxies in a manner that they believe will enhance the economic value of clients' assets, keeping in mind the best interests of the beneficial owners. The Guidelines provide procedures for documenting and, as required, approving such overrides. It is unlikely that serious conflicts of interest will arise in the context of our proxy voting, because we do not engage in investment banking or the managing or advising of public companies. In the event a potential conflict does arise, the primary means by which we will avoid a conflict of interest is by casting votes solely in the interests of our clients and in the interests of maximizing the value of their portfolio holdings. In this regard, if a potential conflict of interest arises, but the proxy vote to be decided is predetermined under the Guidelines to be cast either in favor or against, then we will follow the Guidelines and vote accordingly. On the other hand, if a potential conflict of interest arises and there is no predetermined vote, or the Guidelines themselves refer such vote to

the portfolio manager for decision, or the portfolio manager would like to override a predetermined vote, then the Guidelines provide procedures for determining whether a material conflict of interest exists and, if so, resolving such conflict.

Proxy Voting Information and Recordkeeping. Upon request, we provide proxy voting records to our clients. These records state how votes were cast on behalf of client accounts, whether a particular matter was proposed by the company or a shareholder, and whether or not we voted in line with management recommendations. We are prepared to explain to clients the rationale for votes cast on behalf of client accounts. To obtain proxy voting records, a client should contact our Sr. Proxy Specialist.

We or an Outside Service will keep records of the following items: (i) the Guidelines and any other proxy voting procedures; (ii) proxy statements received regarding client securities (unless such statements are available on the SEC's EDGAR system); (iii) records of votes cast on behalf of clients (if maintained by an Outside Service, that Outside Service will provide copies of those records promptly upon request); (iv) records of written requests for proxy voting information and our response (whether a client's request was oral or in writing); and (v) any documents we prepared that were material to making a decision how to vote, or that memorialized the basis for the decision. Additionally, we or an Outside Service will maintain any documentation related to an identified material conflict of interest.

We or an Outside Service will maintain these records in an easily accessible place for at least five years from the end of the fiscal year during which the last entry was made on such record. For the first two years, we or an Outside Service will store such records at our principal office.

International Proxy Voting. While we utilize the Guidelines for both international and domestic portfolios and clients, there are some significant differences between voting U.S. company proxies and voting non-U.S. company proxies. For U.S. companies, it is relatively easy to vote proxies, as the proxies are automatically received and may be voted by mail or electronically. In most cases, the officers of a U.S. company soliciting a proxy act as proxies for the company's shareholders.

For proxies of non-U.S. companies, however, it is typically both difficult and costly to vote proxies. The major difficulties and costs may include: (i) appointing a proxy; (ii) knowing when a meeting is taking place; (iii) obtaining relevant information about proxies, voting procedures for foreign shareholders, and restrictions on trading securities that are subject to proxy votes; (iv) arranging for a proxy to vote; and (v) evaluating the cost of voting.

Furthermore, the operational hurdles to voting proxies vary by country. As a result, we consider whether or not to vote an international proxy based on the particular facts and circumstances. However, when we believe that an issue to be voted is likely to affect the economic value of the portfolio securities, that our vote may influence the ultimate

outcome of the contest, and that the benefits of voting the proxy exceed the expected costs, we will make every reasonable effort to vote such proxies.

CLASS ACTION NOTICES AND PROOFS OF CLAIM

From time to time, securities that our clients have owned are the subject of class action lawsuits. Generally, holders of securities within a given class period are entitled to participate in the recovery or settlement in a class action lawsuit by filing a proof of claim. All class members normally are bound by a court-approved settlement or judgment in a class action unless they have filed with the court or claims administrator a timely notice choosing to opt-out of the settlement.

We view the decision to file of a proof of claim in class actions as a corporate action that normally is to be performed by the custodian for our client. In addition, the decision to elect to opt out of a settlement is an individual decision to be made by our client.

Normally, custodians will receive notices of rights to participate in, or opt out of class action settlements. We sometimes receive such notices and have adopted procedures to assist our clients in the performance of class action processing functions. Our actions and responsibilities with respect to class action matters will depend on the role we have with respect to the client.

ITEM 18: FINANCIAL INFORMATION

Not applicable.

ATTACHMENT 1 MATERIAL CHANGES

We have made the following material changes to this Brochure since our last annual update of it on March 31, 2011.

ITEM 4: ADVISORY BUSINESS

We have updated our assets under management to December 31, 2011. At that time, we had \$42,641,039,188 in discretionary assets under management and \$3,367,030,000 in non-discretionary assets under management.

ITEM 5: FEES AND COMPENSATION

- **TCW Funds, Inc., a mutual fund that we advise.** We have added a disclosure about the TCW Global Bond Fund which has been added by TCW Funds, Inc., and deleted disclosures for the TCW Large Cap Growth Fund and the TCW Relative Value Small Cap Fund, which have been terminated.
- **Managed Account Division.** We have deleted disclosures about the High Grade Income strategy and the Relative Value Small Cap strategy, which we no longer offer to managed accounts.
- **Wrap Accounts.** We have deleted disclosures about Fixed Income strategies, which we no longer offer to wrap programs.

ITEM 8: METHODS OF ANALYSIS, INVESTMENT STRATEGIES AND RISK OF LOSS

- We have added information about the Healthcare strategy that we now offer. We have changed the name of our Strategic Mortgage-Backed Securities strategy to Securitized Opportunities. We have deleted information about strategies that we no longer offer: Focused Growth, Large Cap Growth, Relative Value Small Cap, and Value Added.
- We are now providing separate explanations of our methods and sources for analysis of domestic and of international fixed income strategies. In each case the explanations have been expanded to provide more detail about our approach, process and sources for analysis and investment.
- We have added disclosures about the risk of market disruption and geopolitical events for all investment strategies, and the risk of prepayment of underlying mortgage loans to strategies that invest in mortgage-backed securities.

ITEM 13: REVIEW OF ACCOUNTS

We have revised our description of our process for review of accounts to indicate that our Portfolio Analytics Committee is taking over the oversight process previously handled by our Investment Product Review Committees (“IPRC”) for our marketable securities strategies. Our alternative investment strategies will still be reviewed by the IPRC’s.
