This Brochure provides information about the qualifications and business practices of The Roosevelt Investment Group, Inc. (Roosevelt Investments). If you have any questions about the content of this Brochure, please contact us at (646) 452-6700. The information in this brochure has not been approved or verified by the United States Securities and Exchange Commission or by any state securities authority.

Roosevelt Investments is a registered investment adviser. Registration of an Investment Adviser does not imply any level of skill or training. Additional information about Roosevelt Investments is also available on the SEC's website at www.adviserinfo.sec.gov

Item 2: Material Changes

This item discusses only material changes made to this brochure since our last annual update, dated March 18, 2011. The following material changes have been made and further described in the brochure.

Roosevelt Strategic Income Fund: On September 1st, 2011, we launched the Roosevelt Strategic Income Fund. This fund is further discussed in Items 4, 10 and 11.

New Fixed Income Strategies: On October 11, 2011, Roosevelt Investments hired Howard Potter as Senior Fixed Income Portfolio Manager. He will be involved in managing new Roosevelt Fixed Income strategies further described in Item 8.

New International Equity Strategies: On January 31, 2012, Roosevelt Investments hired an international equity team to continue to manage International equity strategies. These strategies are further described in Item 8.

Roosevelt International Fund, LP: On January 31, 2012, we launched the Roosevelt International Fund, LP. This is further described in Items 4 and 10.

Research Publications: With the acquisition of the international equity team, Roosevelt also acquired Heckman Global Advisors, a research provider to mutual funds, hedge funds, banks and other institutional clientele. This new business line, and its conflicts of interest, are detailed in Item 4.

Item 4: Advisory Business

Description of Advisory Firm

Roosevelt Investments is a Manhattan-based Investment Adviser and is principally owned by Arthur Sheer, our CEO and CIO. We trace our origins to the advisory firm P. James Roosevelt, Inc., which began in 1971.

Here is a summary of important dates in our history.

1971	P. James Roosevelt, a cousin of former President Theodore Roosevelt, founded the Investment Advisory firm, P. James Roosevelt, Inc.
1990	Sheer Asset Management is founded by Arthur Sheer.
1993	P. James Roosevelt, Inc., changes its name to The Roosevelt Investment Group, Inc.
2002	The Roosevelt Investment Group, Inc. merges into Sheer Asset Management. The newly combined firm retains the Roosevelt name and Arthur Sheer as the Chief Executive Officer, Chief Investment Officer, and controlling shareholder.
2005	Roosevelt Investments acquires the advisory firm, Ehrlich Meyers Associates, bringing aboard Robert Meyer as a portfolio manager.

As of December 31, 2011, our Assets Under Advisement were approximately \$4.37 Billion. This figure consists of:

- \$2,929,518,073.42 managed on a discretionary basis;
- \$98,590,873.45 managed on a non-discretionary basis;
- \$1,341,563,244.47 Billion in *Advisory-Only-Assets* which are assets in the UMA Programs where we only provide investment models.

Our Approach to Investing

Roosevelt Investments' approach to investing is founded on our internal research. We believe that our team of research professionals allows us to find hidden investment opportunities for our clients.

In conducting our research, we use a broad spectrum of information, including without limitation financial publications, annual reports, prospectuses, regulatory filings, company press releases, corporate rating services, inspections of corporate activities, and meetings with management of various companies. Our investment professionals also use third-party research providers and data services to supplement their own research.

Using this research, our portfolio managers implement various strategies for our clients' portfolios. Our chief investment strategies and services include:

Domestic Equity Strategies: actively managed strategies that break away from the traditional mold of style box investing and pursue a flexible approach. These strategies look for both stocks that are out of favor and considered undervalued (Value), as well as stocks with under-appreciated growth potential (Growth). Furthermore, investments in international companies may be made, though these products predominantly purchase stock of domestic companies.

These strategies typically employ our **Thematic process**, which is a synthesis of top-down and bottom-up methods. Through this forward-looking approach we seek to capitalize on the undercurrents of structural, economic, political, social, demographic, and/or industry-specific change. Once identified, this perspective is constantly reviewed and acts as a framework for further investment analysis.

Additionally, these strategies may employ our **Active Risk Management process**, whereby risk is defined in terms of capital preservation and not as deviation from a benchmark. The goal of this process is to provide protection in down markets. Our opinion of both the risk in the market and

inherent in our portfolio, determined by the results of various models and the evaluation of key economic data, might signal us to implement any one or combination of risk tools:

- Flexibility in the deployment of cash (Max 30%), TIPS ETFs, Zero-Coupon Treasury (Strips) ETFs, precious metal-related securities, and inverse and leveraged-inverse ETFs
- Natural Hedges
- Adjusted Portfolio Beta and Defensive Themes

Fixed Income Strategies: Include both global and domestic actively managed multi-sector fixed income strategies across the risk/return spectrum. Our **Active Risk Management** and **Thematic** processes may be used in our global fixed income strategy, but not typically employed in our domestic fixed income strategies.

International Equity Strategies: actively managed investment strategies that primarily employ our **proprietary country allocation model**. This model evaluates a multitude of developed and emerging markets based on four fundamental investment factors groups: valuation, growth, risk, and sentiment/momentum. These factors are combined to determine the allocation for each market. The country weightings are generally implemented, depending on the international strategy, through either optimized baskets of local shares, or American Depositary Receipts (ADRs), and country Exchange Traded Funds (ETFs). Value is primarily sought by over/under weighting country allocations.

Our Domestic Equity, Fixed Income, and International Equity strategies are all available as separately managed accounts. Furthermore, some strategies are also available as mutual funds that are invested in largely similar fashions as the separately managed accounts. Additionally, the specific strategies are discussed further in Item 8, below.

Types of Advisory Services

We offer the following advisory services:

Private Client Group

Through our Private Client Group (PCG), we provide advisory services to high net-worth individuals, trusts, Taft-Hartley plans, endowments, foundations, government entities, cemetery trusts, and other entities. PCG offers clients on-going advisory services based on the goals, objectives, time horizon, and risk tolerance of each client. While the advice given to clients is tailored to the unique circumstances of our private clients, we use a number of centrally managed strategies in the implementation of a client's investment portfolio.

The advisory services are available either as separately managed accounts, with certain minimum investment requirements, or as registered investment companies in which Roosevelt Investments acts as the adviser to the fund. For individually managed accounts, we request discretionary authority from clients so that we may select securities and execute transactions without permission from the client prior to each transaction.

Clients may restrict us from investing in certain securities or types of securities. We review these requests on a case-by-case basis.

Adviser to Wrap Fee Programs

We provide portfolio management services to high net-worth individuals, trusts, Taft-Hartley plans, endowments, foundations, government entities, cemetery trusts, and other entities in different Wrap Fee Programs (also known as "separately managed account programs or "SMA" programs). These services are tailored to the client, and are based on the client's individual goals, objectives, time horizon, and risk tolerance. We are paid a portion of the advisory fee the client pays to the firm that sponsors the SMA program. The management of SMA accounts is similar to how we manage PCG client accounts; however in some SMA programs the sponsor of the program may determine the

investment strategy's suitability for the client and other programs may request that we participate in that process.

Clients may restrict us from investing in certain securities or types of securities. We review these requests on a case-by-case basis. Additionally, clients may terminate Roosevelt Investments as their manager in a SMA program at any time. The procedures for termination and information regarding the refund of any prepaid fees are described in the program sponsor's brochure.

Advisement of Pooled Investment Vehicles

We serve as an adviser or sub-adviser to two mutual funds, The Roosevelt Multi-Cap Fund and The Roosevelt Strategic Income Fund. We also serve as a sub-adviser to the Roosevelt USD Balanced Fund – SICAV, and certain funds in Global Offshore Unit Trusts, an open-ended unit trust scheme formed in the Jersey, Channel Islands. We manage these pooled investment vehicles in keeping with their prospectuses or offering documents. We also serve as adviser to the Roosevelt International Fund, LP, further described in Item 10.

Types of Non-Advisory Services

Roosevelt Investments offers the following *non-advisory* services, Investment Model Provider to Investment Firms (UMA Program), Consulting Services, and Research Publications, which are all further described below.

For these services, we consider how the non-advisory client will use the information we provide so that we may take steps to ensure that sharing information does not create any harm, or disadvantage, to our advisory clients, such as, a non-advisory client trading ahead of a trade we are executing for our advisory clients. In this example, the non-advisory client could potentially receive a more favorable execution price. We have implemented procedures to resolve material conflicts in favor of our advisory clients. These procedures include delaying the release of research reports or model portfolios to these non-advisory clients.

Investment Model Provider to Investment Firms

We have relationships with numerous investment firms where we provide a model portfolio to the investment firm in their *Unified Managed Account* (UMA) platform. The investment firm (also known as an “Overlay Manager” in connection with a UMA platform) may use this model portfolio as a guide on how to invest their clients’ accounts. These client accounts typically pay an advisory fee to the Overlay Manager, and we are paid a portion of this fee. This service is impersonal and not tailored to client needs because we have no knowledge of the clients’ identities or financial situations.

Consulting Services to Banks and other Fiduciaries

We offer consultations to Banks and other Fiduciaries that include advice regarding our views on financial markets and security recommendations.

Research Publications

Heckman Global Advisors, a division of Roosevelt Investments, issues several research publications regarding country allocation and sector/ industry analysis based on a series of value, growth, risk, and sentiment/momentum factors.

Item 5: Fees and Compensation

How we are paid depends on the type of advisory service we are providing, but generally we are compensated on the basis of fees calculated as a percentage of a client's assets under management. Please see below for fee and compensation information for each of our services.

Standard Advisory Fee

Private Client Group

Our basic fee schedules for our major investment strategies are listed in Appendix A. The minimum account sizes for most accounts are listed in Item 7.

The fee we charge is listed in a client's written agreement with us. Clients may choose to be billed directly for fees or to have us directly debit fees from their accounts. We will refund fees on a pro-rated basis upon termination of the advisory agreement. In certain circumstances, fees may be negotiable.

Wrap Fee Programs

The SMA programs described in Item 4 generally provide for an all-inclusive fee. This fee covers advisory fees, trade execution, reports of activity, custodial services, and the recommendation and monitoring of investment managers.

As an investment manager on SMA programs, our compensation is a portion of the total managed account program fee paid to the sponsor by the client.

Advisement of Pooled Investment Vehicles

The investment advisory fee charged to the registered investment company in which Roosevelt Investments serves as adviser are disclosed in the prospectuses of such investment companies and currently range between 0.60% and 1.0% of the fund's net assets.

Investment Model Provider to Investment Firms

The UMA programs described in Item 4 generally provide for an all-inclusive fee, which covers advisory fees, trade execution, reports of activity, custodial services, and the recommendation and monitoring of model providers.

As a model provider on UMA programs, we receive as compensation a portion of the total managed account program fee paid to the overlay manager by the client.

Research Publications

With respect to Heckman Global Advisors' publications, an annual subscription to a single publication is \$16,500 (a discount is provided if more than one publication is purchased). Heckman Global Advisors also offers interactive allocation models based on the same factors for which it generally charges an annual fee of \$50,000 (which includes the cost of one publication).

Consulting Services to Banks and other Fiduciaries

Our management fee for such services is a minimum of \$30,000 per year, paid in advance on a quarterly basis.

Other Types of Fees and Expenses

Our fees do not include brokerage commissions, transaction fees, and other brokerage related costs and expenses that are paid by the client. Clients may pay fees imposed by custodians, brokers, and other third parties that include the following:

- fees charged by managers,
- custodial fees,
- brokerage commissions,
- deferred sales charges,
- odd-lot differentials,
- transfer taxes,
- wire transfer and electronic fund fees,
- and/or other fees and taxes on brokerage accounts and securities transactions.

Item 12 further describes the factors that we consider in selecting or recommending broker-dealers for client transactions and how we determine that the commissions paid to the broker-dealers are reasonable.

We may include stocks, bonds, mutual funds, and ETFs in our investment strategies. Mutual funds and exchange traded funds also charge expense ratios, and may charge commissions as well. These charges are in addition to our fee, and we do not receive any portion of these charges. This is called *layering of fees*.

An **expense ratio** is a measurement of what it costs to operate a mutual fund or ETF. Operating expenses, which includes the management fee, are taken out of a fund's assets and lower the return to a fund's investors.

For example, the table below demonstrates this *layering of fees* for a single ETF position.

Type of Fee	Annual Fee	Annual Fee Paid (based on \$10,000 position in the ETF)
Roosevelt Investments' Advisory Fee	1.00%	\$100.00
ETF Expense Ratio	0.90%	\$90.00
Total Paid by Client	1.90%	\$190.00

When a client invests in a mutual fund where we are the adviser, we do not bill the client an advisory fee because we will be compensated from the fund's expense ratio. Additionally, the mutual fund may pay annual distribution charges, sometimes referred to as "12b-1 fees" and these 12b-1 fees may be paid to Roosevelt Investments.

As well, the client's assets invested in a mutual fund in which we are the adviser are subject to the management fee associated with the mutual fund. That fee may also include charges for administration and accounting services for the fund, therefore the

investor in a mutual fund may incur a higher total management fee if the mutual fund's expense ratio exceeds the rate the client would otherwise pay for the management of its assets.

Roosevelt Investments employs Regional Directors to support and enhance distribution of Roosevelt Investments' investment strategies through the SMA and UMA sponsor firms with which we have a contract. The Regional Directors receive compensation based on a percentage of revenue from existing SMA and UMA accounts. We believe that this practice does not present a conflict of interest since it is the SMA/UMA sponsoring firm (not the Roosevelt Regional Director) that decides whether the client should invest with Roosevelt Investments.

In our Private Client Group, we employ personnel to support and enhance the distribution of Roosevelt Investments advisory services directly to our target client base. The personnel receive compensation based on a percentage of revenue received from existing client accounts. Additionally, the level of compensation can be dependent on the investment strategy selected (for example equity accounts have a higher advisory fee than fixed income accounts). To ensure client suitability standards are met under this practice, new client accounts are generally reviewed and approved by the Firm. Furthermore, regular reviews are conducted to ensure the appropriateness of the investment strategy.

Item 6: Performance-Based Fees and Side-By-Side Management

Roosevelt Investments provides advisory services to a variety of different clients including mutual funds, a unit investment trust, a SICAV, special portfolios on a sub-advisory basis, institutional accounts, ERISA accounts, and investment partnerships. We also have a variety of compensation structures, outlined in Item 5, which includes *performance-based fees*.

We have performance-based fee arrangements with some clients; however we generally do not make a performance-based fee arrangement available to our individual investors.

We have an incentive to recommend investments to the performance-based fee paying clients that are riskier or more speculative than those we would recommend under our standard fee. There is also an incentive for us to favor higher fee-paying accounts over other accounts. We have procedures in place to ensure that all clients are treated fairly and equally and to prevent this conflict from influencing the allocation of investment opportunities among clients.

Item 7: Types of Clients

We provide investment management services to individuals, trusts, Taft-Hartley plans, endowments, foundations, government entities, business entities, pension plans, profit sharing plans, 401k plans, money purchase plans, banks or thrift institutions, cemetery trusts, investment companies, private investment funds, foreign funds such as SICAVs, and institutional DVP accounts.

For our Private Client Group, we require a minimum investment of \$300,000 per client household. The strategy specific minimums for our Private Client Group are as follows.

Minimum Investment Requirements	
All Cap Core	\$100,000
Large Cap Core	\$100,000
Small/Mid Cap Core	\$100,000
Select Equity	\$100,000
Global Enhanced Fixed Income	\$300,000
Current Income Portfolio	\$100,000
Core Fixed Income	\$100,000
Intermediate Fixed Income	\$100,000
EAFE Plus	\$100,000
Emerging Markets Tactical Allocation	\$100,000

The minimum account size for an account we manage in a SMA Program varies by sponsor, but generally is \$100,000.

Item 8: Methods of Analysis, Investment Strategies, and Risk of Loss

Our Investment Process

As previously discussed in Item 4, our portfolio managers and analysts create proprietary research with which to base investment decisions for our various investment strategies. Our investment professionals have experience researching and investing in many types of securities and asset classes, including common and preferred stocks, convertible securities, government and corporate fixed-income securities, commodities, bank obligations, foreign securities, real estate-related assets, ETFs, MLPs, and oil and gas interests.

Methods of Analysis

We use the following methods of analysis in formulating investment advice:

- **Fundamental Analysis** involves reviewing financial statements to understand the general financial health of a company, and reviewing the management team or advantages the company may have over competitors. We also try to maintain contact with the management teams of the companies in which we invest or are under consideration for investment. We regularly hold conference calls or host face-to-face meetings with company management and attend corporate presentations. This helps us learn the most we can about a company and any relevant changes to the economic landscape.
- **Technical Analysis** involves the analysis of past market data: specifically price and volume, and the use of patterns in performance charts. We use this technique to search for patterns that help predict favorable conditions for buying or selling a security.

- **Cyclical Analysis** involves the analysis of business cycles to find favorable conditions for buying or selling a security.
- **Quantitative Analysis** seeks to understand behavior by using complex mathematical and statistical modeling, measurement, and research.

Investment Strategies

All Cap Core Equity invests primarily in domestic common stock. Investment opportunity is pursued regardless of style or capitalization (usually investing in companies with a market capitalization of \$1 billion or greater), and investment in stock of international companies may also be made.

Large Cap Core Equity invests primarily in domestic common stock. Investment opportunity is pursued regardless of style and investment in stock of international companies may also be made. It targets investment opportunities with a market cap of \$3 billion or above.

Small/Mid Cap Core Equity invests primarily in domestic common stock. Investment opportunity is pursued regardless of style and investment in stock of international companies may also be made. It targets investment opportunities within a market cap range of \$100 million to \$10 billion.

Select Equity invests primarily in domestic common stock. Investment opportunity is pursued regardless of style or capitalization (usually investing in companies with a market capitalization of \$1 billion or greater), and investment in stock of international companies may also be made. This strategy typically invests in fewer holdings than our other Domestic Equity strategies.

Global Enhanced Fixed Income typically invests in domestic and foreign corporate and sovereign bonds. Investments in convertible securities, Eurodollar bonds, domestic preferred stock, as well as certain risk mitigation tools (such as leveraged inverse ETFs) may also be made. The strategy seeks to maximize total return through a combination of current income and capital appreciation from the active management of U.S. and

international fixed income instruments. The strategy is not limited by geography, currency, or credit quality.

Current Income Portfolio seeks to provide high current income through a portfolio comprised primarily of intermediate-term, investment-grade corporate and agency obligations, and relatively liquid preferred stock positions with fixed coupons. Preferred stock positions serve as a portfolio income enhancer as the incremental risk for assuming a lower credit position in a company's capital structure produces higher income streams than comparable bonds of the same company.

Intermediate Fixed Income seeks to provide capital preservation while generating current income and modest capital appreciation. The strategy maintains a high quality credit portfolio with an average target credit rating of 'Aa' and invests primarily in U.S. Treasuries, U.S. Agencies, and investment-grade corporate obligations that are intermediate-term in nature. Duration is controlled to limit interest rate sensitivity.

Core Fixed Income seeks to provide current income, capital appreciation and capital preservation. The strategy maintains a high quality credit portfolio with an average target credit rating of 'Aa' and primarily invests in U.S. government, agency, and corporate obligations. The strategy may invest in debt securities of any maturity, though the portfolio tends to maintain an intermediate-term weighted average duration.

Global Equity is a long-only equity strategy driven by a combination of top-down country allocation and bottom-up stock selection derived from our proprietary country-allocation and stock-selection models. The country-allocation model evaluates developed and emerging markets. For developed and emerging markets, country positions are implemented by investing in baskets of local equities, ETFs, and ADRs.

International Equity is a long-only equity strategy driven by a combination of top-down country allocation and bottom-up stock selection derived from our proprietary country-allocation and stock-selection models. The country-allocation model evaluates

developed and emerging markets and the stock selection model evaluates stocks in developed markets based on multiple investment factors. The strategy excludes the US market.

EAFE Plus is a long-only equity strategy driven by top-down country allocation derived from our proprietary model. The model evaluates developed and emerging markets based on several investment factors. The strategy invests in ETFs and baskets of ADRs.

Emerging Markets is a long-only equity strategy driven by a top-down country allocation derived from our proprietary model. The model evaluates emerging markets based on several investment factors. The strategy invests in ETFs, ADRs, and local shares.

Emerging Markets Tactical Allocation is a long-only equity strategy driven by a top-down country allocation derived from our proprietary model. The model evaluates emerging markets based on several investment factors. The strategy invests in ETFs and ADRs, but not local shares.

Global SRI Equity is a long-only equity strategy driven by a combination of top-down country allocation and bottom-up stock selection derived from our proprietary country-allocation and stock-selection models. The strategy invests in those equities that have undergone a socially responsible screen. The country allocation model evaluates developed and emerging markets on several investment factors.

Material Risks Involved

Investing in securities involves risk of loss that clients should be prepared to bear. Additionally, we cannot guarantee that we will achieve the stated investment objectives of our strategies. The value of your investment in a Roosevelt Investments strategy may be affected by one or more of the following risks, any of which could cause the portfolio's return or the portfolio's yield to fluctuate:

Market Risk: Market risk involves the possibility that an investment's current market value will fall because of a general market decline, reducing the value of the investment regardless of the operational success of the issuer's operations or its financial condition.

Management Risk: The adviser's strategy may fail to produce the intended results.

Style Risk: Any of our strategies may invest in both "value" investments and "growth" investments. With respect to securities and investments we consider undervalued, the market may not agree with our determination that the security is undervalued, and its price may not increase to what we believe to be its full value. It may even decrease in value. With respect to "growth" investments, the underlying earnings or operational growth we anticipate may not occur, or the market price of the security may not increase as we expect it to.

Defensive Risk: To the extent that the strategy attempts to hedge its portfolio stocks or takes defensive measures, such as holding a significant portion of its assets in cash or cash equivalents, the objective may not be achieved.

Small and Medium Cap Company Risk: Securities of companies with small and medium market capitalizations are often more volatile and less liquid than investments in larger companies. Small and medium cap companies may face a greater risk of business failure, which could increase the volatility of the client's portfolio.

Turnover Risk: At times, the strategy may have a portfolio turnover rate that is higher than other strategies. A high portfolio turnover would result in correspondingly greater brokerage commission expenses and may result in the distribution of additional capital gains for tax purposes. These factors may negatively affect the account's performance.

Developing Market Countries: The strategies' investments in developing market countries are subject to all of the risks of foreign investing generally, and may have additional heightened risks due to a lack of established legal, political, business, and social frameworks to support securities markets, including: delays in settling portfolio securities transactions; currency and capital controls; greater sensitivity to interest rate changes; pervasiveness of corruption and crime; currency exchange rate volatility; and inflation, deflation, or currency devaluation.

Availability of Information: Certain issuers, including municipalities, private companies, and foreign issuers may not be subject to the same disclosure, accounting, auditing, and financial reporting standards and practices as companies publicly-listed in U.S. stock markets. Thus, there may be less information publicly available about these issuers and their current financial condition.

Limited Markets: Certain securities may be less liquid (harder to sell) and their prices may at times be more volatile than at other times. Under certain market conditions we may be unable to sell or liquidate investments at prices we consider reasonable or favorable, or find buyers at any price.

Concentration Risk: To the extent that the strategy focuses on particular asset-classes, countries, regions, industries, sectors, or types of investment from time to time, the strategy may be subject to greater risks of adverse developments in such areas of focus than a strategy that invests in more broadly diversified across a wider variety of investments.

Interest Rate: Bond (fixed income) prices generally fall when interest rates rise, and the value may fall below par value or the principal investment. The opposite is also generally true: bond

prices generally rise when interest rates fall. In general, fixed income securities with longer maturities are more sensitive to these price changes.

Credit: An issuer of debt securities may fail to make interest payments and repay principal when due, in whole or in part. Changes in an issuer's financial strength or in a security's credit rating may affect a security's value.

Prepayment or Call Risk: The issuer of a debt security may prepay or call the debt, in whole or in part, prior to the security's maturity date. We may be unable to reinvest the proceeds in a security of equivalent quality or paying a similar yield or coupon.

Trading Practices: Brokerage commissions and other fees may be higher in certain markets or for foreign securities. Government supervision and regulation of foreign securities markets, currency markets, trading systems, and brokers may be less than those in the U.S. stock markets. The procedures and rules governing foreign transactions and custody also may involve delays in payment, delivery, or recovery of money or investments.

Legal or Legislative Risk: Legislative changes or court rulings may impact the value of investments, or the securities' claim on the issuer's assets and finances.

Inflation: Inflation may erode the buying power of your investment portfolio, even if the dollar value of your investments remains the same.

Risks of Specific Securities Used

Apart from the general risks outlined above which apply to all types of investments, specific securities may have other risks.

Bank Obligations including bonds and certificates of deposit may be vulnerable to setbacks or panics in the banking industry. Banks and other financial institutions are highly dependent on short-term interest rates and may be adversely affected by downturns in the U.S. and foreign economies or changes in banking regulations.

Commodities may be subject to extreme changes in price due to supply factors, changes in weather, trade impacts.

Common stocks have often outperformed other types of investments at certain times, however, individual stock prices may go up and down more dramatically. A slower-growth or recessionary economic environment could have an adverse effect on the price of all stocks.

Corporate bonds may lose all value in the event of the issuer's bankruptcy or restructuring.

Exchange Traded Funds (ETF) prices may vary significantly from the Net Asset Value due to market conditions. Certain Exchange Traded Funds may not track underlying benchmarks as expected.

Foreign Securities including American Depositary Receipts (ADRs) may involve more risk than investing in U.S. securities. These risks include currency exchange rates and policies, country or government specific issues, less favorable trading practices or regulation and greater price volatility.

High Yield Debt Securities are lower-rated debt securities of issuers that are not as strong financially as those issuing higher credit quality debt securities. These issues are more likely to encounter financial difficulties and are more vulnerable to changes in the economy, such as a recession or sustained period of rising interest rates, that could affect their ability to make interest and principal payments when due. The prices of high yield debt securities generally fluctuate more than those of higher credit quality. These securities are generally more illiquid (harder to sell) and harder to value.

Inverse and/or Leveraged ETFs are securities that attempt to replicate multiples of the performance of an underlying financial index. Inverse ETFs are designed to replicate the opposite direction of these same indices, often at a multiple. These ETFs often use a combination of futures, swaps, short sales, and other derivatives to achieve these objectives. Most leveraged and inverse ETFs are designed to achieve these results on a daily basis only. This means that over periods longer than a trading day, the

value of these ETFs can and usually do deviate from the performance of the index they are designed to track. Over longer periods of time or in situations of high volatility, these deviations can be substantial.

Municipal/Government bonds are susceptible to events in the municipality that issued the bond or the security posted for the bond. These events may include economic or political policy changes, changes in law, tax base erosion, state constitutional limits on tax increases, budget deficits or other financial difficulties, and changes in the credit rating assigned to municipal issues.

Oil and Gas Interests may lose value due to changes in commodity prices, costs associated with transport of oil/gas, seasonal factors, or technological advances that impact the demand for oil and gas.

Real-Estate linked investments may be especially illiquid and subject to specific geographic risk.

Please note that there are many other circumstances not described here that could adversely affect your investment and prevent your portfolio from reaching its objective.

Investors in mutual funds in which Roosevelt Investments acts as Adviser should review the prospectus used to offer those shares.

Item 9: Disciplinary Information

There are no legal or disciplinary events that we deem are material to a client's or prospective client's evaluation of our firm or the integrity of our management.

Item 10: Other Financial Industry Activities and Affiliations

Registration as a Broker/Dealer or Registered Representative

We currently have management persons that are registered representatives of Unified Financial Securities, Inc., the distributor to the Roosevelt Multi-Cap Fund.

In the normal course of their employment with Roosevelt Investments, adviser to the Roosevelt Multi-Cap Fund, their activities, which may include wholesaling, marketing, and other financial professional contact, require the holding of a securities license. They do not receive compensation from Unified Financial Securities.

Relationships Material to Our Advisory Business and Possible Conflicts of Interest

We serve as the investment adviser to the Roosevelt Multi-Cap Fund, a mutual fund distributed by Unified Financial Securities, Inc., and the Roosevelt Strategic Income Fund, a mutual fund distributed by Quasar Distributors, LLC. Our advisory services are supervised by the Board of Trustees of each fund, all of whom are independent of Roosevelt Investments. We also serve as investment adviser to a number of foreign pooled investment vehicles, such as a SICAV and a Global UIT.

Roosevelt Investments is the investment advisor to the Roosevelt International Fund, LP. This investment vehicle was created as a seed account to build a performance track record for an international equity strategy. Interests in this partnership are not registered and are only available to certain Roosevelt employees.

In many cases, these vehicles invest in strategies similar to those offered through our Private Client Group or SMA Program services; however they may invest in strategies not available to all clients. Certain employees and shareholders of Roosevelt

Investments have an investment interest in the partnerships and their general partners. Roosevelt Investments policies take steps to avoid or mitigate these potential conflicts.

Item 11: Code of Ethics, Participation or Interest in Client Transactions and Personal Trading

Code of Ethics

We have adopted a Code of Ethics, as required under the Investment Adviser's Act of 1940 and the Investment Company's Act of 1940, which describes our standard of business conduct, and our fiduciary duty to our clients. Additionally, it serves as a guide to make our employees aware of what conduct and behavior is expected of them, including their personal securities transactions, and rules against trading upon material nonpublic information so they do not take inappropriate advantage of their positions and the access to information that comes with their position.

The Code of Ethics covers the following areas: Prohibited Purchases and Sales, Insider Trading, Personal Securities Transactions, Exempted Transactions, Prohibited Activities, Conflicts of Interest, Confidentiality, Service on a Board of Directors, Compliance Procedures, Compliance with Laws and Regulations, Procedures and Reporting, Certification of Compliance, Reporting Violations, Compliance Officer Duties, Recordkeeping, Annual Review, and Sanctions.

We will provide a copy of our Code of Ethics to any client or prospective client upon request.

Recommendations Involving Material Financial Interests

We serve as the Investment Adviser to both the Roosevelt Multi-Cap Fund and the Roosevelt Strategic Income Fund, for which we receive a management fee, calculated at the annual rate of 1.0%

and 0.60%, respectively, for this service. When appropriate for the client, all or a portion of client assets may be invested in the fund(s) as part of our investment management services. Clients have the right, at any time, to prohibit us from investing any of their managed assets in the fund(s).

Because we are paid by the mutual funds themselves, we do not charge the client an advisory fee for this investment.

Investing Personal Money in the Same Securities as Clients

Roosevelt Investments does not manage any “proprietary” investment accounts – i.e., accounts that are funded with the firm’s own money and are intended to create profits for the firm. However, we may participate or have an interest in client transactions several other ways, which are described below.

Firm and Employee Investments

Personal trading by employees is allowed. Employees may own the same securities as clients; however we require that client accounts take priority over an employee’s personal trading.

The following is a portion of our Personal Securities Transaction policy and applies to all employees.

Personal Securities Transaction policy covers any account that an employee, or member of their household, has direct or indirect ownership, influence, or control.

We require preapproval for personal trades that involve Private Placements, IPOs, or mutual funds in which we are the Adviser.

We maintain a restricted list of securities that we are currently trading. Personal trading of these securities is not allowed on the same day we are trading for our clients.

If a same-day trade is executed by an employee, then the trade is reviewed by the Chief Compliance Officer to determine client impact and sanction of employee.

Personal accounts that are managed by Roosevelt Investments, or another Investment Adviser (on a fully discretionary basis), are not subject to the

same-day restriction.

Employees are required to have their custodian(s) send electronic feeds, or duplicate statements if electronic feed is not available, to our vendor of pre-trade clearance, employee monitoring, and reporting. Employee trades are then compared against client trades and other criteria.

Employees should not purchase or sell securities for their own accounts or for client accounts which would involve the use of material “inside” information known to such employee but not generally available to the public, or by using knowledge of securities transactions by a client to profit personally, directly or indirectly, by the market effect of such transactions.

New employees are required to provide a copy of statements for all personal accounts that are covered by the Personal Securities Transaction policy. These accounts are then reviewed and added to the monitoring system.

Trading Securities At/Around the Same Time as Clients’ Accounts

As previously discussed, Roosevelt Investments does not buy securities for its own account. Therefore no potential conflict of interest exists at the firm level. However, personal trading by employees is allowed. In some cases, employees may desire to trade securities that our clients also own. The potential conflicts of interest are addressed with our Personal Securities Transactions policy, Code of Ethics, trade allocation and inside information policies.

Item 12: Brokerage Practices

Broker Selection and Best Execution

Seeking the best trade execution is an important aspect of every trade that we place in a client account. Roosevelt Investments has a Best Execution Committee that consists of members of our Investment Committee, Trading team, and Compliance team. The Best Execution Committee approves the brokers to be used to execute trades and determines the reasonableness of their compensation based on the range and quality of a broker’s services including the quality of execution and services provided

value of research provided, financial strength, and responsiveness to Roosevelt Investments.

We have controls in place for monitoring trade execution, including reviewing of trades for best execution.

Our trading staff may consider the following factors when placing a trade for a client with a particular approved broker.

Quality of overall execution services provided by the broker-dealer

Promptness of execution

Liquidity of the market for the security in question

Provision of dedicated telephone lines

Creditworthiness, business reputation, and reliability of the broker-dealer

Promptness and accuracy of oral, hard copy, or electronic reports of execution and confirmation statements

Ability and willingness to correct trade errors

Ability to access various market centers, including the market where the security trades

The broker-dealer's facilities, including any software or hardware provided to the adviser

Any specialized expertise the Broker-Dealer may have in executing trades for the particular type of security

Commission rates

Access to a specific IPO or to IPOs generally

Ability of the broker-dealer to use ECNs to gain liquidity, price improvement, lower commission rates, and anonymity

The broker-dealer's ability to provide for "step-out" transactions

For our clients that do not have a custodial relationship with a bank or SMA Sponsor, we generally recommend them to custody their account with TD Ameritrade, Inc. or Charles Schwab. We

participate in the institutional advisor program offered by TD Ameritrade Institutional, which is a division of TD Ameritrade, Inc., member FINRA/SIPC/NFA, an unaffiliated SEC-registered broker-dealer and FINRA member.

TD Ameritrade offers to independent investment advisors, like Roosevelt Investments, services which include custody of securities, trade execution, and clearance and settlement of transactions. We receive some benefits from TD Ameritrade through our participation in the institutional advisor program, and therefore we may have a conflict of interest (please see Item 14 below).

Research and Other Soft Dollar Benefits

When selecting a broker to execute client trades, we do consider various factors that include research and brokerage services provided by the broker. This may result in a conflict between our duty to act in the best interests of our clients and any benefit that we may receive in result of that execution of client trades by a particular broker. This conflict is because (a) the selection of a broker that does provide us research may result in a higher fee to the client than that charged by a broker that does not provide us research and (b) the transaction may benefit us because the use of client commissions may relieve us of having to pay for those research services ourselves. Nevertheless, when selecting brokers for execution of client transactions, Roosevelt Investments does make a good faith determination that the amount of commission to be charged to the client is reasonable in relation to the value of the brokerage and research services provided by the executing broker in terms of either the particular transaction or our overall responsibilities for all the accounts over which we exercise investment direction. Roosevelt Investments may use the research services provided in “soft dollar” arrangements to service all of its accounts and not just the accounts whose transactions paid for the research services. Moreover, it is possible that the accounts whose transactions generate brokerage commissions that are used to pay some of Roosevelt Investments’ research obligations may not benefit in any way from this research.

We use an internal allocation procedure to identify those executing brokers who provide us with research services and direct sufficient transactions to them to ensure the continued offering of research. The determination of broker-dealers to whom commissions are directed generally is made by the Investment Committee through their ranking of said broker-dealers by such characteristics as quality of research provided, accessibility to analysts, and accessibility to the broker-dealer in general. The Investment Committee takes into account the views of the Director of Trading as well.

We use “soft dollar” arrangements to obtain, among other things, proprietary research of the broker; securities pricing services (such as FT Interactive Data Corp.); stock price quotations and market data (such as Bloomberg Financial Markets and New York Stock Exchange); trade analysis; and third party research reports (such as Coburn Ventures, Empirical Research Partners, KDP Investment Advisors, and ISI Group). These soft dollar arrangements are designed to augment our own internal research and investment strategy capabilities.

We also use soft dollar arrangements to obtain services that serve partially an administrative function and are not entirely research or brokerage related. We refer to these arrangements as “mixed-use” and pay a portion of the costs from Roosevelt Investments revenue (“hard dollars”). In these instances, we have policies and procedures in place to define a reasonable allocation between soft dollars and hard dollars to pay for such arrangements. Examples of this would be our use of FactSet (used for both portfolio management and marketing).

Brokerage for Client Referrals

We do not consider client referrals when we select a broker to execute client transactions.

Directed Brokerage

Certain clients may direct Roosevelt Investments to effect transactions with specific brokers. We do not typically negotiate commissions charged by such brokers and these brokers may

charge commissions in excess of that which another broker might have charged for effecting the same transaction. Accounts with directed brokerage instructions may be excluded from block trades, and generally are not able to take advantage of volume discounts. As a result, performance for these accounts may vary from accounts in the same strategy that do not have directed brokerage instructions, and these accounts may not be able to obtain best execution.

In addition, brokers that refer clients to us may expect trading for the client account to be directed to them. In this case, a conflict of interest exists between the client's interest in obtaining best execution and our interest in receiving future referrals from that broker. In the event that the client wishes to direct its brokerage to a specified broker-dealer, then the client has various brokerage options, including utilizing the services of: 1) the referring broker, if any, 2) any other broker that the client desires, or 3) any firm retained by us to provide custody and execution services for clients. We may be able to negotiate more favorable commission rates when we have full brokerage discretion.

Some clients have arrangements with their securities brokerage firms under which the clients pay a separate fee to their brokerage firm and are not charged commissions on trades. Where appropriate, transactions for advisory clients may be batched for execution which will not ordinarily affect commissions charged on such transactions. In an effort to achieve best execution, we may trade away from the directed broker or SMA sponsor. These trades may be marked up with no further disclosure.

Aggregated Trades

Although we individually manage client accounts, we often will purchase or sell the same securities for many accounts if it is in the best interests of each client, and consistent with our duty to seek best execution, and allowed in client agreements.

When possible, we will group the same transactions in the same securities (aggregate trade) for many clients who have the same

directed brokerage firm. Also, when practical, we will aggregate the same transactions in the same securities for many clients for whom we have discretion to direct brokerage. Clients in an aggregated transaction will each receive the same price per share and no client will be favored over another client.

If we have to place more than one order to fill all orders in an aggregated transaction, each client in the aggregated transaction receives the average price for all orders placed for clients in the same aggregated transaction in the same security for that day. If we are unable to complete a trade, the shares are allocated to clients on a pre-rata basis, a random basis, or based on an equitable rotational system.

Some clients may be excluded from an aggregated trade because there is not enough cash in their account, they may have tax consequences, they may have imposed restrictions on their account, or other administrative reasons.

Conflicts may arise in the allocation of investment opportunities among accounts that we advise on. We will attempt to allocate limited investment opportunities believed appropriate for certain accounts on a fair and equitable basis consistent with the best interests of all accounts involved. However, there can be no assurance that a particular investment opportunity will be allocated in any specific manner.

Item 13: Review of Accounts

Client accounts are generally monitored daily for consistency with client objectives and restrictions. Portfolio managers and our Compliance team perform periodic reviews of each client account on our internal portfolio accounting system. Among other reviews they monitor account performance and asset allocation.

Special reviews of an account may be triggered by unusual performance, the addition or deletion of funds or change in/addition of client imposed restrictions, buy and sell decisions from the Investment Committee, or other client needs.

For SMA programs, Roosevelt Investments reviews and evaluates model strategies to ensure compliance with the strategy's investment objectives, policies, and restrictions.

We issue periodic written reports to our direct clients. These written reports generally contain a list of assets, investment results, and statistical data related to the client's account. We urge clients to carefully review these reports and compare the statements that they receive from their custodian to the reports that we provide.

SMA program clients receive reports from the program sponsor. We also respond to special requests of clients for ad hoc reports related to activity in their account including, for example, proxy voting.

Item 14: Client Referrals and Other Compensation

As disclosed under Item 12 above, we participate in TD Ameritrade's institutional customer program and we may recommend TD Ameritrade to clients for custody and brokerage services. There is no direct link between our participation in the program and the investment advice we give to our clients, although we do receive economic benefits because of our participation in the program and these benefits are not typically available to TD Ameritrade retail investors.

These benefits include the following products and services (provided without cost or at a discount): receipt of duplicate client statements and confirmations; research related products and tools; consulting services; access to a trading desk serving Advisor participants; access to block trading (which provides the ability to aggregate securities transactions for execution and then allocate the appropriate shares to client accounts); the ability to have advisory fees deducted directly from Client accounts; access to an electronic communications network for Client order entry and account information; access to mutual funds with no

transaction fees and to certain institutional money managers; and discounts on compliance, marketing, research, technology, and practice management products or services provided to Advisor by third party vendors. TD Ameritrade may also have paid for business consulting and professional services received by our employees.

Some of the products and services made available by TD Ameritrade through the program may benefit us but may not benefit our clients. These products or services may assist us in managing and administering client accounts, including accounts not maintained at TD Ameritrade. Other services made available by TD Ameritrade are intended to help us manage and further develop our business enterprise. The benefits we receive through participation in the program do not depend on the amount of brokerage transactions directed to TD Ameritrade.

As part of our fiduciary duties to our clients, we endeavor at all times to put the interests of our clients first. Clients should be aware, however, that the economic benefits we receive creates a potential conflict of interest and may indirectly influence our choice of TD Ameritrade for custody and brokerage services.

We may receive client referrals from TD Ameritrade through our participation in TD Ameritrade AdvisorDirect. In addition to meeting the minimum eligibility criteria for participation in AdvisorDirect, we may have been selected to participate in AdvisorDirect based on the amount and profitability to TD Ameritrade of the assets in, and trades placed for, client accounts maintained with TD Ameritrade.

TD Ameritrade is a discount broker-dealer independent of and unaffiliated with Roosevelt Investments and there is no employee or agency relationship between us. TD Ameritrade has established AdvisorDirect as a means of referring its brokerage customers and other investors seeking fee-based personal investment management services or financial planning services to independent investment advisors. TD Ameritrade does not supervise us and has no responsibility for our management of client portfolios or our other advice or services.

We pay TD Ameritrade an on-going fee for each successful client referral. This fee is usually a percentage (not to exceed 25%) of the advisory fee that the client pays to us ("Solicitation Fee"). We will also pay TD Ameritrade the Solicitation Fee on any advisory fees we receive from any of a referred client's family members, including a spouse, child, or any other immediate family member who resides with the referred client and hired us on the recommendation of such referred client. We will not charge clients referred through AdvisorDirect any fees or costs higher than our standard fee schedule (see Item 5) offered to our clients or otherwise pass Solicitation Fees paid to TD Ameritrade to our clients. For information regarding additional or other fees paid directly or indirectly to TD Ameritrade, please refer to the TD Ameritrade AdvisorDirect Disclosure and Acknowledgement Form.

Our participation in AdvisorDirect raises potential conflicts of interest. TD Ameritrade will most likely refer clients through AdvisorDirect to investment advisors that encourage their clients to custody their assets at TD Ameritrade and whose client accounts are profitable to TD Ameritrade. Consequently, in order to obtain client referrals from TD Ameritrade, we may have an incentive to recommend to clients that the assets we manage be held in custody with TD Ameritrade and to place transactions for client accounts with TD Ameritrade. In addition, we have agreed not to solicit clients referred to us through AdvisorDirect to transfer their accounts from TD Ameritrade or to establish brokerage or custody accounts at other custodians, except when our fiduciary duties require doing so. Our participation in AdvisorDirect does not diminish our duty to seek best execution of trades for client accounts.

Item 15: Custody

We have authority to debit fees directly from client accounts. For this reason only, we are deemed to have custody of client funds. Our client assets are held with broker/dealers, banks, or other qualified custodians. Clients should receive at least quarterly statements from their qualified custodian. We urge clients to carefully review such statements and compare the official custodial records to the account statements that we may provide to them. The information in our statements may vary from custodial statements based on accounting procedures, reporting dates, or valuation methodologies of certain securities.

Item 16: Investment Discretion

Roosevelt Investments provides both discretionary and non-discretionary investment advisory services. The vast majority of our clients grant discretion, which allows us to manage portfolios and make investment decisions without client consultation regarding the securities and other assets that are bought and sold for the account. In such accounts, we do not require client approval for the total amount of the securities and other assets to be bought and sold, the choice of executing brokers or the price and commission rates for such transactions.

We usually receive discretionary authority from the client at the outset of an advisory relationship to select the identity and amount of securities to be bought or sold. In all cases, however, such discretion is to be exercised in a manner consistent with the stated investment objectives for the particular client account.

When selecting securities and determining amounts, we observe the investment policies, limitations, and restrictions of the clients for which we advise. For registered investment companies, our authority to trade securities may also be limited by certain federal securities and tax laws that require diversification of investments and favor the holding of investments once made.

Investment guidelines and restrictions must be provided to us in writing by the client. We make every effort to manage restricted portfolios along with other clients within similar mandates. However, it is possible that security selection and trade placement may be delayed for these portfolios while we determine whether a proposed investment decision complies with the account guidelines and restrictions or identify alternatives. Accounts with investment restrictions may forfeit some of the advantages that may result from aggregated orders and may be disadvantaged by the market impact of trading for other portfolios.

Item 17: Voting Client Securities

We vote our clients' securities in a manner that, in our opinion, is in our clients' best interests. We have established the following proxy voting policy.

Responsibility for Voting

We will not vote proxies solicited by or with respect to the issuers of securities in which assets of a client portfolio are invested, unless the client instructs us, in writing, to vote such proxies.

Primary Consideration in Voting

Our primary consideration in determining how proxies should be voted is the client's interest as a shareholder of that issuer. Except as otherwise specifically instructed by a client, we generally do not take into account interests of other stakeholders, of the issuer, or interests the client may have in other capacities.

Conflicts of Interest

There are circumstances in which a conflict of interest might arise by an Investment Adviser voting proxies on behalf of its client. This might occur where an issuer who is soliciting proxy votes also has a client relationship with the Adviser, when a client of the Adviser is involved in a proxy contest (such as a corporate director), or when an employee of the Adviser has a personal interest in a proxy matter.

We believe that our policy of voting in accordance with the recommendations of Glass Lewis (GL), which provides independent recommendations, ensures that proxies are voted solely in the best interests of clients and resolves any potential conflict of interest. In case we become aware that a GL recommendation results in a conflict of interest, such as described above, we will disclose the conflict to the client and obtain the client's consent or advice with respect to the voting based on GL recommendations.

Proxy Voting Records

Clients may also obtain information from us about how we voted any proxies on behalf of their account(s) upon request.

Proxy Voting Policy and Summary

Clients may obtain a copy of our complete proxy voting policies and procedures upon request.

Item 18: Financial Information

In certain circumstances, registered investment advisers are required to provide you with financial information or disclosures about their financial condition in this Item.

Roosevelt Investments has no financial commitment that impairs its ability to meet contractual and fiduciary commitments to clients and has never been the subject of a bankruptcy proceeding. Additionally, Roosevelt Investments does not receive fees more than six months in advance. Therefore, Roosevelt Investments is not required to provide such financial information or disclosures for this item.

Appendix A: Private Client Group Fee Schedule

Domestic Equity		
Strategy	Account Size	Annual Fee
All Cap Core	First \$10,000,000	1.00%
	Over \$10,000,000	0.50%
Large Cap Core	First \$10,000,000	1.00%
	Over \$10,000,000	0.50%
Small/Mid Cap Core	First \$10,000,000	1.00%
	Over \$10,000,000	0.50%
Select Equity	First \$10,000,000	1.00%
	Over \$10,000,000	0.50%

Fixed Income		
Strategy	Account Size	Annual Fee
Global Enhanced Fixed Income	First \$10,000,000	1.00%
	Over \$10,000,000	0.50%
Current Income Portfolio	\$100,000 and above	0.50%
Core Fixed Income	\$100,000 and above	0.50%
Intermediate Fixed Income	\$100,000 and above	0.50%

International Equity		
Strategy	Account Size	Annual Fee
EAFE Plus	First \$10,000,000	1.00%
	Over \$10,000,000	0.50%
Emerging Markets Tactical Allocation	First \$10,000,000	1.00%
	Over \$10,000,000	0.50%
