Regardless of the amount of due diligence and monitoring, all investments in securities include a risk of loss to our principal (invested amount) and any profits that have not been realized (securities that were not sold to "lock in" a profit). Stock and bond markets fluctuate substantially over time. In addition, as recent global and domestic economic events have shown, performance of any investment is not assured nor guaranteed. As a result, there is always a risk of loss and a risk of not achieving a high rate of return as expected that is out of control of any investment professional's control, including Qualified Plan Advisory, LLC. Our fund selection and monitoring processes as well as our model portfolios are all based on historical performance data and other factors as described above. The use of our fund recommendations does not assure that the funds will perform well in the future or that there will not be subsequent losses. In addition, we offer our advice based only on the information provided by the plan sponsor, recordkeeper or administrator. Qualified Plan Advisory, LLC does not update this information, nor does Qualified Plan Advisory, LLC verify the information. This information could include such items as: investment balances, deferral rates, ages, salaries, and current investment allocation.
