Advisory Business

- A.** DRG Investment Advisory Services LLC was founded in 2006.

David R. Giffin is the Owner.

DRG Investment Advisory Services LLC provides personalized confidential investment management to individuals, pension and profit sharing plans, trusts, estates and small businesses. Advice is provided through consultation with the client and may include: determination of financial objectives, identification of financial problems, cash flow management, tax planning, insurance review, investment management, education funding, retirement planning and estate planning.

DRG Investment Advisory Services LLC offers discretionary asset management services to advisory clients. DRG Investment Advisory Services LLC offers clients ongoing portfolio management services by determining individual investment goals, time horizons, objectives, and risk tolerance. Investment strategies, investment selection, asset allocation, portfolio monitoring and the overall investment program are based on these factors. The client gives DRG Investment Advisory Services LLC discretionary authority to make transactions as stated within the Investment Advisory Agreement.

The initial meeting, which may be by telephone, is free of charge and is used to determine if investment management may be beneficial to the client.

Other professionals (e.g.: lawyers, accountants, insurance agents, etc.) are engaged by the client as required. Any conflict of interest will be disclosed to the client.

- B.** DRG Investment Advisory Services LLC provides investment asset management services and furnishes investment advice through consultations.

- C. Goals and objectives for each client are on our Client Data Information Sheet. Clients may place restrictions on the type of investments in their accounts.
- D. DRG Investment Advisory Services LLC does not charge wrap-fees. DRG Investment Advisory Services LLC is a fee-only investment management firm. This firm is not affiliated with entities that sell financial products or securities. No commissions in any form are accepted. No referral or finder's fees are accepted.
- E. All accounts are managed on a discretionary basis. As of December 31, 2011, DRG Investment Services LLC client assets under management were \$75,023,173.

Fees and Compensation

- A. Each month the account(s) will be charged a management fee of 0.0833 percent of the previous month end account balance. For those clients with account balances in excess of \$5,000,000 the fee will be 0.05833 percent of the previous month end account balance. The client may initiate up to 12 trades per month for listed securities with no additional fees being assessed to their account. Any additional trades shall incur fees at the rate imposed by the Clearing Firm.
- B. The management fees will be paid directly from the client's account held by the clearing firm. These fees will be deducted on a monthly basis. The amount of the management fee deducted will be on the statement provided by the Clearing Firm. The fee is not negotiable.
- C. The Clearing Firm charges small fees on some transactions. These charges are usually small and incidental to the purchase or sale of a security. The Clearing Firm also charges an annual IRA custodial fee. Both these fees are paid by the client in addition to the management fee.

Performance-Based Fees

DRG Investment Advisory Services LLC does not charge performance-based fees.

Types of Clients

DRG Investment Advisory Services LLC provides investment advice to individuals, pension and profit sharing plans, trusts, estates, and small businesses.

DRG Investment Advisory Services LLC prefers to open accounts with a minimum of \$100,000 but this minimum can be waived at the discretion of David R. Giffin.

Methods of Analysis, Investment Strategies and Risk of Loss

- A. Security analysis methods may include fundamental, technical or cyclical analysis. The primary sources of information include independent research firms, financial newspapers and magazines, research materials prepared by others, corporate rating services, annual reports, prospectuses, filings with Securities and Exchange Commission, and company press releases.

Each client completes an information sheet that documents their objectives. The investment strategy for a specific client is based upon the objectives stated by the client during consultations and on their information sheet. The client may change these objectives at any time.

- B. Investing in securities involves risk of loss that clients should be prepared to bear. While DRG Investment Advisory Services LLC keeps the risk of loss in mind, investors face the following investment risks.

- **Interest-rate Risk:** Changes in interest rates may cause investment prices to fluctuate. For example, when interest rates rise, yields on existing bonds become less attractive, causing their market values to decline.
- **Market Risk:** The price of a security, bond, or mutual fund may drop in reaction to tangible and intangible events and conditions. This type of risk is caused by external factors independent of a security's particular underlying circumstances. For example, political, economic and social conditions may trigger market events.

- **Inflation Risk:** When any type of inflation is present, a dollar today will not buy as much as a dollar next year, because purchasing power is eroding at the rate of inflation.
- **Currency Risk:** Overseas investments are subject to fluctuations in the value of the dollar against the currency of the investment's originating country. This is also referred to as exchange rate risk.
- **Reinvestment Risk:** This is the risk that future proceeds from investments may have to be reinvested at a potentially lower rate of return (i.e. interest rate). This primarily relates to fixed income securities.
- **Business Risk:** These risks are associated with a particular industry or a particular company within an industry. For example, oil-drilling companies depend on finding oil and then refining it, a lengthy process, before they can generate a profit. They carry a higher risk of profitability than an electric company, which generates its income from a steady stream of customers who buy electricity no matter what the economic environment is like.
- **Liquidity Risk:** Liquidity is the ability to readily convert an investment into cash. Generally, assets are more liquid if many traders are interested in a standardized product. For example, Treasury Bills are highly liquid, while real estate properties are not.
- **Financial Risk:** Excessive borrowing to finance a business' operations increases the risk of profitability, because the company must meet the terms of its obligations in good times and bad. During periods of financial stress, the inability to meet loan obligations may result in bankruptcy and/or a declining market value.
