Website: www.silverpointcapital.com

This brochure (this "Brochure") provides information about the qualifications and business practices of Silver Point Capital, L.P. ("Silver Point"). If you have any questions about the contents of this Brochure, please contact us at (203) 542-4200 or info@silverpointcapital.com. The information in this Brochure has not been approved or verified by the United States Securities and Exchange Commission (the "SEC") or by any state securities authority.

Silver Point is registered as an investment adviser with the SEC. Registration with the SEC or with any state securities authority does not imply a certain level of skill or training.

Additional information about Silver Point is also available on the SEC's website at www.adviserinfo.sec.gov.

ITEM 2
MATERIAL CHANGES

This Brochure is Silver Point's initial Form ADV Part 2A submitted with its application for registration with the SEC, and therefore, there are no material changes to report. If Silver Point makes any material changes to this Brochure, this section will be revised to include a summary of such changes.

ITEM 4 ADVISORY BUSINESS

Advisory Firm

Silver Point, a Delaware limited partnership, was established in 2001 and serves as the principal vehicle for the investment management activities of its principal owners, Edward A. Mulé and Robert J. O'Shea. Edward A. Mulé and Robert J. O'Shea are both limited partners of Silver Point and members of Silver Point Capital Management, LLC, a Delaware limited liability company that serves as the general partner of Silver Point. Silver Point Capital Management, LLC has ultimate responsibility for the management, operations and the investment decisions made by Silver Point.

Advisory Services

Silver Point or an affiliate serves as the management company with discretionary trading authority to private pooled investment vehicles (each, a "Fund" and collectively, the "Funds"). The Funds include:

1. Silver Point Capital Fund, L.P. (the "Domestic Flagship Fund"), Silver Point Capital Offshore Fund, Ltd. (the "Offshore Flagship Fund") and Silver Point Capital Offshore Master Fund, L.P. (the "Master Flagship Fund" and together with the Domestic Flagship Fund and the Offshore Flagship Fund, the "Flagship Funds"). The Offshore Flagship Fund invests substantially all of its assets in a "master-feeder" structure into the Master Flagship Fund. Silver Point Capital General Partner, LLC (the "Domestic Flagship GP") serves as the general partner of the Domestic Flagship Fund and Silver Point Capital Offshore General Partner, LLC (the "Master Flagship GP" and together with the Domestic Flagship GP, the "Flagship GPs") serves as the general partner of the Master Flagship Fund.
2. Silver Point C & I Opportunity Fund, L.P. (the "Domestic C & I Fund I"), Silver Point C & I Opportunity Fund, Ltd. (the "Offshore C & I Fund I") and Silver Point C & I Opportunity Master Fund, L.P. (the "Master C & I Fund I" and together with the Domestic C & I Fund I and the Offshore C & I Fund I, the "C & I Fund I"). An affiliate of Silver Point, Silver Point Capital C & I Management, L.P. ("Silver Point C & I Management I"), provides investment advisory services to the C & I Fund I. Such affiliate is controlled by Edward A. Mulé and Robert J. O'Shea. The Offshore C & I Fund I invests substantially all of its assets in a "master-feeder" structure into the Master C & I Fund I. Silver Point C & I Opportunity GP, LLC, (the "C & I I GP") serves as the general partner of the Domestic C & I Fund I and the Master C & I Fund I.
3. Silver Point C & I Opportunity Fund II, L.P. (the "Domestic C & I Fund II"), Silver Point C & I Opportunity Fund II, Ltd. (the "Offshore C & I Fund II") and Silver Point C & I Opportunity Master Fund II, L.P. (the "Master C & I Fund II" and together with the Domestic C & I Fund II and the Offshore C & I Fund II, the "C & I Fund II" and together with the C & I Fund I, the "C & I Funds"). An affiliate of Silver Point, Silver Point Capital C & I Management II, L.P. ("Silver Point C & I Management II"), provides investment advisory services to the C & I Fund II. Such affiliate is controlled by Edward A. Mulé and Robert J. O'Shea. The Offshore C & I Fund II

invests substantially all of its assets in a "master-feeder" structure into the Master C & I Fund II. Silver Point C & I Opportunity GP II, LLC (the "C & I II GP" and together with the C & I I GP, the "C & I GPs") serves as the general partner of the Domestic C & I Fund II and the Master C & I Fund II.

4. Field Point I, Ltd. and Field Point III, Ltd. (collectively, the "Field Point CDOs").¹ Silver Point is the collateral manager for the Field Point CDOs. The equity of Field Point I, Ltd. and Field Point III, Ltd. is owned by the Domestic Flagship Fund.
5. SPF CDO I, Ltd. (the "SPF CDO" and together with the Field Point CDOs, the "CDOs"). An investment vehicle organized by and in which the principals of Silver Point are investors (the "Principal Vehicle") is the nominal collateral manager for the SPF CDO but has delegated certain managerial responsibilities with respect to the SPF CDO to Silver Point.

References herein to "Silver Point" shall be deemed to include Silver Point C & I Management I and/or Silver Point C & I Management II where applicable.

The Flagship GPs, Silver Point C & I Management I, the C & I I GP, Silver Point C & I Management II and the C & I II GP are presently registered as investment advisers under the Investment Advisers Act of 1940, as amended (the "Advisers Act"), pursuant to Silver Point's Form ADV in reliance on the positions expressed in American Bar Association, Business Law Section, SEC No-Action Letter (January 18, 2012).

The Funds are structured as Delaware limited partnerships, Cayman Islands exempted companies or Cayman Islands exempted limited partnerships.

As used herein, the term "client" generally refers to each Fund.

This Brochure generally includes information about Silver Point and its relationships with its clients and affiliates. While much of this Brochure applies to all such clients and affiliates, certain information included herein applies to specific clients or affiliates only. This Brochure does not contain all of the terms and conditions related to an investment in the Funds or all of the risks associated with any such investment, and certain of the information contained herein is in summary form. As a result, prior to any investment in any Fund, all prospective investors should carefully review the offering memorandum for such Fund.

This Brochure does not constitute an offer to sell or solicitation of an offer to buy any securities. The securities are generally offered and sold on a private placement basis under exemptions promulgated under the Securities Act of 1933, as amended, and other exemptions of similar import under U.S. state laws and the laws of other jurisdictions where any offering may be made. Investors in the Funds generally must be both "accredited investors", as defined in Regulation D, and "qualified purchasers", as defined in the Investment Company Act of 1940, as amended. Persons reviewing this Brochure should not construe this as an offer to sell or solicitation of an offer to buy the securities of any of the Funds described herein. Any such offer or solicitation will be made only by means of a confidential private placement memorandum.

¹ The liabilities for another CDO, Field Point IV, Ltd., were fully paid off as of February 2012 and, as a result, such CDO has not been included as a client in Silver Point's Form ADV.

Investment Strategies and Types of Investments

Silver Point's investment strategy with respect to the Flagship Funds focuses on making investments in debt, equity or other securities, obligations or instruments of misvalued, mislevered, leveraged or financially distressed companies and in event-oriented and other special situations. The Field Point CDOs were created to serve as financing vehicles for the Flagship Funds' investments in debt obligations.

Silver Point's investment strategy with respect to the C & I Funds is to invest in commercial and industrial and commercial real estate loans, principally acquired from banks and other financial institutions.

Please see Item 8 for a more detailed description of the investment strategies pursued and types of investments made by the Funds.

The descriptions set forth in this Brochure of specific advisory services that Silver Point offers to clients, and investment strategies pursued and investments made by Silver Point on behalf of its clients, should not be understood to limit in any way Silver Point's investment activities. Silver Point may offer any advisory services, engage in any investment strategy and make any investment, including any not described in this Brochure, Silver Point considers appropriate, subject to each client's investment objectives and guidelines. The investment strategies Silver Point pursues are speculative and entail substantial risks. Clients should be prepared to bear a substantial loss of capital. There can be no assurance that the investment objectives of any client will be achieved.

Customized Services for Individual Clients

Silver Point's investment decisions and advice with respect to each Fund are subject to each Fund's investment objectives and guidelines, as set forth in its offering documents.

Assets Under Management

As of December, 31, 2011, Silver Point and its affiliates manage approximately \$6.4 billion (calculated on a net basis) on a discretionary basis.

ITEM 5 FEES AND COMPENSATION

The fees applicable to each Fund are set forth in detail in each Fund's offering documents. A brief summary of such fees is provided below.

Advisory Fees and Compensation - The Flagship Funds

Management Fee: In connection with providing investment advisory services to the Flagship Funds, Silver Point receives in advance on the first day of each calendar quarter a management fee equal to 0.5% (2.0% annualized) (the "Flagship Management Fee") of the portion of the net asset value of the Domestic Flagship Fund and the Offshore Flagship Fund attributable to the interests held by each investor as of the first day of such calendar quarter (after taking into account any withdrawals or redemptions, as applicable, of interests as of the end of the immediately preceding quarter and purchases of interests as of the first day of such calendar quarter). For purposes of calculating the Flagship Management Fee, investments held in side pockets or, "Designated Investments",² are valued at fair value. The Flagship Management Fee for a period of less than a full calendar quarter will be prorated based on the actual number of days in such period. Silver Point may, in its sole discretion, waive or reduce the Management Fee with respect to any investor and has done so with respect to employees of Silver Point and certain other related persons.

Incentive Compensation:

The Domestic Flagship Fund. The Domestic Flagship GP will generally be entitled to an incentive allocation as of the close of each fiscal year (and as of each other date on which the Domestic Flagship GP determines it is appropriate or necessary to make a determination of the incentive allocation with respect to an investor, including a date on which an investor withdraws all or a portion of its investment) equal to 20% of any net profits tentatively allocated to each investor in the Domestic Flagship Fund for such fiscal year (taking into account gains and losses realized or deemed realized with respect to Designated Investments) in excess of any previously unrecovered net losses charged to such investor's capital account in prior years (i.e., on a "high-water mark" basis), as such unrecovered net losses may be ratably reduced by withdrawals and distributions with respect to such capital account. The Domestic Flagship GP may, in its sole discretion, reduce or waive the incentive allocation with respect to any investor and has done so with respect to employees of Silver Point and certain other related persons. The computations required to be made for purposes of computing the incentive allocation are made separately with respect to separate contributions to or withdrawals from the Domestic Flagship Fund by a particular investor and for each separate capital account or sub-capital account (including each Designated Investment subaccount) of such investor. A separate capital account or sub-capital account is created for each separate subscription to the Domestic Flagship Fund and with respect to each Designated Investment made or designated as such by the Domestic Flagship Fund.

The Offshore Flagship Fund. Generally, at the end of each fiscal year of the Offshore

² Silver Point intends not to designate any new or existing investments as "side pocket" investments or "Designated Investments." However, the Flagship Funds will continue to hold those investments that were previously designated as "side pockets" or "Designated Investments" until such Designated Investments are liquidated or otherwise realized or deemed realized in their entirety.

Flagship Fund, the Master Flagship GP will be entitled to an incentive allocation equal to 20% of the excess of any net capital appreciation (taking into account net income, and gains and losses with respect to realized or deemed realized Designated Investments) allocated to each capital account in the Master Flagship Fund corresponding to a series or sub-series of the Offshore Flagship Fund's shares for such year; provided, however, that any allocation of the incentive allocation will be subject to a "high-water mark" and thus no incentive allocation will be allocated with respect to a capital account in the Master Flagship Fund attributable to the Offshore Flagship Fund's Class B or Class H shares until any previously unrecovered net losses charged to the Master Flagship Fund capital account in prior years (as such unrecovered net losses may be ratably reduced by withdrawals and distributions) have been recovered. If the Offshore Flagship Fund's shares are redeemed at any time other than at the end of a fiscal year, any incentive allocation that has been accrued in respect of the redeemed shares by the corresponding capital account in the Master Flagship Fund will be allocated to the Master Fund GP's capital account at the time of such redemption. Silver Point or the Offshore Flagship Fund, with the consent of the Master Flagship GP, as applicable, may, in its sole discretion, waive or reduce the incentive compensation with respect to any shareholder and has done so with respect to employees of Silver Point and certain other related persons. The computations required to be made for purposes of computing the incentive compensation are made separately with respect to separate subscriptions for, issuances of, or redemptions of the shares of a particular investor (i.e., with respect to each series and sub-series of shares, including each Designated Investment). A separate series or sub-series of the Offshore Flagship Fund's shares is issued in connection with each subscription by an investor to the Offshore Flagship Fund and each Designated Investment made or designated as such by the Offshore Flagship Fund.

Advisory Fees and Compensation - C & I Funds

Management Fee: The C & I Funds will pay to Silver Point, in respect of each investor, a management fee (the "C & I Management Fee") payable quarterly in advance. The C & I Management Fee will be equal to 0.5% (or 2.0% annualized) of the total commitment by each investor (i) with respect to the C & I Fund I, during the twelve-month period following the date commitments are first accepted by either the Domestic C & I Fund I or the Offshore C & I Fund I (the "C & I Fund I Commitment Period") and (ii) with respect to the C & I Fund II, during the eighteen-month period following the final closing date (the "C & I Fund II Commitment Period" and together with the C & I Fund I Commitment Period, the "Commitment Period"). After the expiration or termination of the applicable Commitment Period, the C & I Management Fee will be equal to 0.5% (or 2.0% annualized) of each investor's aggregate drawn down capital used to fund investments (as adjusted as a result of investors that are admitted or increase their commitments to the C & I Funds in connection with a subsequent closing) minus proceeds from previous dispositions representing a return of capital. Each investor being admitted to a C & I Fund or any existing investor increasing its commitment at any closing subsequent to the initial closing will be responsible for the C & I Management Fee in the amount such investor would have borne had such investor been admitted or increased its commitment at the initial closing, plus interest thereon at the Prime Rate plus 2%. Such amounts (other than interest) will constitute a capital contribution by each such investor and will decrease such investor's unfunded commitment. Silver Point may, in its sole discretion, waive or reduce the C & I Management Fee with respect to the partners and the employees of Silver Point and their respective family members, the C & I GPs and their respective affiliates (and has done so in certain circumstances). Silver Point may also, in its sole discretion, waive or reduce the C & I Management Fee with respect to

other investors.

Carried Interest: With respect to each of the C & I Funds, the C & I GP for such fund will be entitled to receive a 20% carried interest pursuant to the following distribution waterfall. After provision for such reserves as shall be determined to be necessary in the sole discretion of the applicable C & I GP to pay the C & I Funds' liabilities and expenses, net proceeds from a particular investment will be allocated to all investors participating in such investment pro rata according to their respective capital contributions in respect of such investment. The pro rata share thereof attributable to a limited partner of the Domestic C & I Fund I or the Domestic C & I Fund II or a participating shareholder of the Offshore C & I Fund I or the Offshore C & I Fund II will be further divided between such investor and the C & I GP for the relevant C & I Fund as follows: (a) first, 100% to such investor until such investor has received a return of its total capital contributions to such C & I Fund in respect of all realized investments plus its proportionate share of permanent writedowns of unrealized investments and the portion of the C & I Management Fee and any other C & I Fund expenses attributable to such realized investments and such permanent writedowns; (b) second, 100% to such investor until such investor has received a preferred return equal to 8% per annum, compounded annually, on the amounts included in clause (a) above; (c) third, 80% to the C & I GP and 20% to such investor until the C & I GP has received under this clause (c) 20% of the cumulative distributions made pursuant to clause (b) above and this clause (c); and (d) thereafter, 80% to such investor and 20% to the C & I GP (the distributions to the C & I GP described in clause (c) above and in this clause (d) being collectively referred to as the C & I GP's "Carried Interest"). The distribution waterfall occurs at the master fund level with respect to the Offshore C & I Fund I and the Offshore C & I Fund II and thus all distributions are made from the Master C & I Fund I and the Master C & I Fund II to the Offshore C & I Fund I and the Offshore C & I Fund II in respect of each participating shareholder. The C & I GPs may, in their sole discretion, waive or reduce the Carried Interest on distributions in respect of the partners and the employees of Silver Point and their respective family members, the C & I GPs and their respective affiliates (and has done so in certain circumstances). Silver Point may also, in its sole discretion, waive or reduce the Carried Interest on distributions in respect of other investors.

Advisory Fees - CDOs

Silver Point has waived, and intends to continue to waive, all collateral management fees in connection with the Field Point CDOs.

The Principal Vehicle currently receives from the SPF CDO a quarterly management fee (payable on the first business day of each February, May, August and November) accruing at a rate per annum equal to 1% on the sum of (i) the aggregate funded principal balance of all debt obligations held by the SPF CDO, (ii) the aggregate funded amount of principal proceeds of debt obligations held as short-term investments and (iii) the aggregate unfunded portion of all debt obligations held by the SPF CDO (to the extent exceeding certain principal proceeds held as a future funding reserve). Such management fee is payable to the extent of funds available for such purpose in accordance with the indenture governing the issuance of the SPF CDO's notes, and if not paid due to the unavailability of funds, will be payable on the next payment date on which funds are available for such purpose.

Payment of Fees

Fees and compensation paid or allocated to Silver Point or its affiliates by the Funds are

generally deducted from the assets of such clients. As discussed above, management fees are generally deducted on a quarterly basis, incentive compensation is generally deducted or allocated on an annual basis and upon a redemption or withdrawal of an investor and Carried Interest is generally deducted or allocated on a realization basis.

Additional Fees and Expenses - Flagship Funds

Expenses: The Domestic Flagship Fund and the Offshore Flagship Fund will bear their own expenses (and the Offshore Flagship Fund will bear its pro rata share of the Master Flagship Fund's expenses), including legal, accounting, tax, auditing, consulting and other professional expenses (including, without limitation, expenses relating to establishing reputation and public relations in connection with self-sourced lending or other financial transactions), administration fees charged by Silver Point and/or third-party providers of administration services, fees charged by Silver Point or its affiliates to provide investment sourcing services to, or for the benefit of, the Flagship Funds (provided that such sourcing fees do not exceed the rate charged by third parties engaged in such sourcing), fees payable to sub-advisors, professional liability insurance (including costs relating to directors' and officers' liability insurance and errors and omissions insurance), research and market data expenses, interest on margin loans and other indebtedness, custodial fees, bank service fees, investment-related fees and expenses (such as brokerage commissions (see Item 12), third-party sourcing fees, legal fees and fees of other professionals, due diligence expenses and travel, lodging and meal expenses) related to the analysis, purchase or sale of investments (including Designated Investments), whether or not the investments are consummated, other expenses related to the purchase, monitoring, sale, settlement, custody or transmittal of Flagship Fund assets (directly or through trading affiliates) as shall be determined by Silver Point in its sole discretion (including costs associated with systems and software used in connection with investment-related activities), expenses incurred by the Flagship Funds, the Domestic Flagship GP, the Master Flagship GP or Silver Point in connection with the provision of administration services; entity-level taxes, organizational fees and expenses, filing fees, expenses related to the offer and sale of interests (including legal fees); and other expenses associated with the operation of the Flagship Funds and their investment activities.

Administrative Fees and Expenses. To the extent Silver Point, or an affiliate, performs some or all of the functions of a third-party administrator in-house, Silver Point will charge administration costs to the Flagship Funds; provided, however, that such costs will continue to be limited to an amount that, along with the costs of any third-party administration services it continues to use and Silver Point's expenses discussed below, will be the lesser of actual costs incurred or 21 basis points (i.e., the approximate blended administration cost previously charged to the Domestic Flagship Fund and the Offshore Flagship Fund by such fund's former third-party administrator) of the Domestic Flagship Fund's or the Offshore Flagship Fund's net asset value. The costs incurred by Silver Point in the provision of administration services include, but are not limited to, out of pocket expenses (including travel, meals and lodging), third party software licensing, implementation, data management and recovery services, custom development costs and overhead expenses of an ordinarily recurring nature such as rent, utilities, supplies, secretarial expenses, stationery, charges for furniture, fixtures and equipment, employee benefits including insurance, payroll taxes and compensation of all personnel.

Other Fees. Silver Point or its affiliates may receive compensation in connection with lending or other financial transactions or investments (including, without limitation, acquisitions, dispositions, recapitalizations and restructurings, and the provision of financial

advisory, investment monitoring, investment management or similar or related services). 100% of the portion of such compensation ratably attributable to the Flagship Funds' investment in any such transactions or investments (or, in the case of broken deal fees, such proposed transaction or investment) will be applied as an offset to either the Flagship Management Fee or the incentive compensation; provided, however, that if Silver Point or its affiliates receive any fees in connection with or arising from providing administrative, collateral management or similar or related services (including agency services) in respect of lending or other financial transactions, such fees will not be applied as an offset to the Flagship Management Fee or the incentive compensation (as applicable). If the Flagship Management Fee or the incentive compensation (as applicable) is not sufficient to fully effect such offset in any particular period, any shortfall will be carried forward to reduce future Flagship Management Fees or incentive compensation (as applicable) until such shortfall is fully offset. Notwithstanding the foregoing, in the event an investor in the Flagship Funds withdraws or redeems prior to the making of the adjustment described in the previous sentence, such investor will forego, and will not be entitled to, any portion of any such subsequent adjustment. Fees received by Silver Point or its affiliates, if any, in connection with sourcing are not subject to the offset described above.

The Flagship Funds will not receive the benefit of any compensation received by Silver Point or its affiliates in connection with the portion of any financial transactions or investments attributable to participants other than the Flagship Funds. A conflict of interest may arise if Silver Point causes a Flagship Fund to participate in a financial transaction or investment with others and fees are paid to Silver Point or its affiliates.

Additional Fees and Expenses - C & I Funds

Expenses: The C & I Funds will bear their own expenses, including legal, accounting, tax, auditing, consulting and other professional expenses; the C & I Management Fee; fees payable to subadvisors; professional liability insurance (including costs relating to directors' and officers' liability insurance and errors and omissions insurance); research and market data expenses; interest on indebtedness; custodial fees; bank service fees; investment-related fees and expenses (such as third-party sourcing fees, fees and expenses of legal and other professionals, due diligence expenses and travel, lodging and meal expenses) related to the analysis, purchase or sale of investments, whether or not the investments are consummated; other expenses related to the purchase, monitoring, sale, settlement, custody or transmittal of C & I Fund assets (directly or through trading affiliates) as will be determined by Silver Point in its sole discretion (including costs associated with systems and software used in connection with investment-related activities); costs of reporting to investors and investor meetings; administration fees and expenses charged by any third-party provider of administration services; entity-level taxes; expenses relating to the offer and sale of interests; organizational fees and expenses (including legal, accounting, consulting, filing and other organizational expenses); filing fees; costs of winding up and liquidating the C & I Funds; expenses incurred in connection with an investor that defaults in respect of a commitment; and other expenses associated with the operation of the C & I Funds and their investment activities, including extraordinary expenses such as litigation, workout and restructuring and indemnification expenses, if any.

Other Fees. Silver Point or its affiliates may receive compensation in connection with financial transactions or investments made by the C & I Funds. 100% of the portion of such compensation ratably attributable to the C & I Funds' investment (or, in the case of broken deal fees, the C & I Funds' proposed investment) in such transactions or investments will be

applied as an offset to the C & I Management Fee. If the C & I Management Fee is not sufficient to fully effect such offset in any particular period, any shortfall will be carried forward to reduce future C & I Management Fees until the earlier of such time as (i) such shortfall is fully offset or (ii) Silver Point is no longer paid the C & I Management Fee by the C & I Funds. Any fees received by Silver Point or its affiliates in connection with or arising from providing administrative, collateral management or similar or related services (including agency services) in respect of financial transactions or investments will not be applied as an offset to the C & I Management Fee and will be on arm's-length terms and disclosed to investors no less often than quarterly.

The C & I Funds will not receive the benefit of any compensation received by Silver Point or its affiliates in connection with the portion of any financial transactions or investments attributable to participants other than the C & I Funds. A conflict of interest may arise if Silver Point causes a C & I Fund to participate in a financial transaction or investment with others and fees are paid to Silver Point or its affiliates.

Additional Compensation

Neither Silver Point nor any of its supervised persons accept brokerage commissions for the sale of securities or other investment products.

ITEM 6
PERFORMANCE-BASED FEES AND SIDE-BY-SIDE MANAGEMENT

Silver Point and its affiliates accept performance-based fees from every Fund except the CDOs. Because the CDOs are owned by certain of the Funds (and the Principal Vehicle) and serve as financing vehicles for such Funds' investments in debt obligations, Silver Point and its affiliates do not face certain conflicts of interest that may arise when an investment adviser accepts performance-based fees from some clients, but not from other clients.

ITEM 7
TYPES OF CLIENTS

Silver Point and its affiliates generally provide investment advice to the Funds, as described above.

ITEM 8

METHODS OF ANALYSIS, INVESTMENT STRATEGIES AND RISK OF LOSS

Methods of Analysis and Investment Strategies

The descriptions set forth in this Brochure of specific advisory services that Silver Point offers to clients, and investment strategies pursued and investments made by Silver Point on behalf of its clients, should not be understood to limit in any way Silver Point's investment activities. Silver Point may offer any advisory services, engage in any investment strategy and make any investment, including any not described in this Brochure, that Silver Point considers appropriate, subject to each client's investment objectives and guidelines. The investment strategies Silver Point pursues are speculative and entail substantial risks. Clients should be prepared to bear a substantial loss of capital. There can be no assurance that the investment objectives of any client will be achieved.

Flagship Funds

Silver Point's investment strategy with respect to the Flagship Funds focuses on making investments in debt, equity or other securities, obligations or instruments of misvalued, mislevered, leveraged or financially distressed companies and in event-oriented and other special situations. The Flagship Funds may hold both long and short positions in such investments. The investment strategies employed by the Flagship Funds may include (without limitation) the following: credit-oriented investments; event-oriented investments; asset-oriented investments; and investments in misvalued securities, obligations or instruments.

In seeking to achieve its investment objective, the Flagship Funds may utilize any equity, debt, derivative or other instrument that Silver Point deems appropriate, including, but not limited to, bank debt, receivables and trade claims, and may provide financing, including direct lending, debtor-in-possession financing and bankruptcy exit financing, either directly or indirectly through investments in companies, including affiliates of Silver Point, providing such financing. In select circumstances, Silver Point may also pursue other attractive private investment opportunities.

C & I Funds

Silver Point's investment strategy with respect to the C & I Funds is to invest in commercial and industrial and commercial real estate (collectively, "C & I") loans, principally acquired from banks and other financial institutions. The majority of the loans are secured by hard assets (including commercial real estate).

CDOs

Silver Point and its affiliates utilize the CDOs as financing vehicles for the Flagship Funds' and the Principal Vehicle's investments in debt obligations, particularly the secondary purchase of and the primary investment in loan obligations.

Risk Factors

The following risk factors do not purport to be a complete list or explanation of the risks

involved in an investment in the clients advised by Silver Point. These risk factors include only those risks Silver Point believes to be material, significant or unusual and relate to particular significant investment strategies or methods of analysis employed by or types of securities recommended by Silver Point.

The Funds' investment programs are speculative and entail substantial risks. There can be no assurance that the investment objectives of the Funds will be achieved.

Risk Factors with respect to both the Flagship Funds and the C & I Funds

Investments Generally. All investments risk the loss of substantial capital. No guarantee or representation is made that the Funds' investment programs will be successful. The Funds' investment programs involve, without limitation, risks associated with limited diversification and concentration, investments in speculative assets and the use of speculative investment strategies and techniques, interest rates, volatility, tracking risks in hedged positions, credit deterioration or default risks, systems risks and other risks inherent in the Funds' activities. The Funds' investments may be materially affected by conditions in the financial markets and overall economic conditions occurring globally and in particular markets where the Funds may invest their assets.

Silver Point's methods of minimizing such risks may not accurately predict future risk exposures. Risk management techniques are based in part on the observation of historical market behavior, which may not predict market divergences that are larger than historical indicators. Also, information used to manage risks may not be accurate, complete or current, and such information may be misinterpreted. In certain situations Silver Point may be unable to, or may choose not to, implement risk management strategies because of the costs involved or other relevant circumstances, and even if risk management strategies are utilized, such strategies cannot fully insulate the Funds from the risks inherent in their planned activities.

Availability of Investments. The identification of investments suitable for the Funds is difficult and involves significant uncertainty. There can be no guarantee that Silver Point will identify such investment opportunities or that committed capital will be fully invested. Even if such investments are identified there can be no assurance that they will not decline in value considerably while held by the Funds including, without limitation, as a result of weakness in the credit or other markets, or other circumstances.

Identity of Beneficial Ownership and Withholding on Certain Payments (with respect to non-U.S. domiciled Funds only). Under recently enacted legislation, in order to avoid a U.S. withholding tax of 30% on certain payments (including payments of gross proceeds) made after December 31, 2012 with respect to certain U.S. investments, the non-U.S. domiciled Funds will be required to enter into an agreement with the United States Internal Revenue Service (the "Service") identifying certain direct and indirect U.S. equityholders. A non-U.S. investor in a Fund will generally be required to provide to such Fund information which identifies its direct and indirect U.S. ownership. Any such information provided to such Fund will be shared with the Service. A non-U.S. investor that is a "foreign financial institution" within the meaning of Section 1471(d)(4) of the U.S. Internal Revenue Code of 1986, as amended, will generally be required to enter into an agreement with the Service identifying certain direct and indirect U.S. account holders and equityholders. A non-U.S. investor who fails to provide such information to such Fund or enter into such agreement with the Service, as applicable, would be subject to the 30% withholding tax with respect to

its share of any such payments attributable to U.S. investments of such Fund, and the Board of Directors of such Fund may take any action in relation to a shareholder's shares or redemption proceeds to ensure that such withholding is economically borne by the relevant shareholder whose failure to provide the necessary information gave rise to the withholding. Investors in a non-U.S. domiciled Fund should consult their own tax advisors regarding the possible implications of this legislation on their investments in such Fund.

Risk Factors with respect to the Flagship Funds

High Yield and Preferred Securities. The Flagship Funds invest in "high yield" bonds and preferred securities that are rated in the lower rating categories by the various credit rating agencies or comparable non-rated securities. Securities in the lower-rated categories and comparable non-rated securities are subject to greater risk of loss of principal and interest than higher-rated and comparable non-rated securities, and are generally considered to be predominantly speculative with respect to the issuer's capacity to pay interest and repay principal. They are also generally considered to be subject to greater risk than securities with higher ratings or comparable non-rated securities in the case of deterioration of general economic conditions. Because investors generally perceive that there are greater risks associated with lower-rated and comparable non-rated securities, the yields and prices of such securities may be more volatile than those for higher-rated and comparable non-rated securities. The market for lower-rated and comparable non-rated securities is thinner, often less liquid, and less active than that for higher-rated or comparable securities, which can adversely affect the prices at which these securities can be sold and may even make it impractical to sell such securities. High-yield bonds and preferred securities are also typically lower in the capital structure of the relevant issuer than other forms of indebtedness, including secured bank debt. As a result, these securities may not be secured (or fully secured) by the underlying assets of the issuer and, in the event of a bankruptcy, reorganization or other similar event, the Flagship Funds would be subject to significant losses in respect of their investment in such securities.

Corporate Debt. The Flagship Funds invest in bonds, notes, debentures and other instruments of indebtedness issued by, and other obligations of, corporations. These instruments may pay fixed, variable or floating rates of interest, and may include zero coupon and pay-in-kind obligations. The Flagship Funds may invest in corporate debt instruments that have experienced or are contemplated to experience ratings downgrades. The Flagship Funds may invest in instruments that have the lowest quality ratings or are unrated.

Ratings. Credit ratings of debt instruments represent the rating agency's opinions regarding their credit quality and are not a guarantee of quality. Credit ratings evaluate the safety of the principal and interest payments, not the market value risk, of lower-rated instruments. Such ratings also may not accurately reflect macroeconomic or systematic risk, including the risk of increased illiquidity in the credit markets. Accordingly, credit ratings may not fully reflect the true risks of an investment. Also, rating agencies may fail to make timely changes in credit ratings in response to subsequent events, so that an issuer's current financial condition may be better or worse than a rating indicates. Rating agencies may re-rate an instrument which could cause substantial loss as the ratings are downgraded. Such reviews and potential downgrades may be more likely during periods of volatility in the credit markets. Additionally, rating agencies may incorrectly rate instruments due to errors in their internal evaluation processes or models or methodologies. The rating agencies may retrospectively change their rating methodology in the future, which may affect the rating assigned to the

existing debt instruments. The Flagship Funds' investments may experience significant credit rating volatility.

Bank Loans. The Flagship Funds' investment programs will include investments in bank loans. The value of bank loans can fluctuate in response to actual and perceived changes in creditworthiness, foreign exchange rates, political stability or soundness of economic policies. Bank loans (as well as other debt obligations) are subject to the risk of the issuer's inability to meet principal and interest payments on its obligations (i.e., credit risk) and are subject to price volatility due to such factors as interest rate sensitivity, market perception of the creditworthiness of the issuer and general market liquidity (i.e., market risk). These obligations are subject to other risks, including, without limitation: (i) declines in the value of collateral securing the obligations, if any; (ii) declines in the enterprise value of the obligor; (iii) failure of restrictive covenants, if any, to adequately protect the interests of the creditor; (iv) the failure of the bankruptcy process (or other determination of creditors' rights) to produce the outcome anticipated by the investor; (v) the possible invalidation of an investment transaction as a preference or fraudulent conveyance under relevant creditors' rights laws; (vi) so-called lender-liability claims by the issuer of the obligations; and (vii) environmental or other liabilities that may arise with respect to collateral securing the obligations. In analyzing each bank loan, Silver Point compares the relative significance of the risks against the expected benefits of the investment. Successful claims by third parties arising from these and other risks will be borne by the Flagship Funds. The risks associated with bank loans generally also apply to the specific types of bank loans discussed below (e.g., leveraged loans and bridge loans).

Leveraged Loans. "Leveraged loans" are loans made to companies with a below investment grade rating from Moody's and S&P. Such loans may be performing poorly when the Flagship Funds acquire them. There is no assurance that Silver Point will correctly evaluate the value of the assets collateralizing such loans or the prospects for distribution on or repayment of such loans. The Flagship Funds may lose their entire investment or may be required to accept cash, property or securities with a value less than the Flagship Funds' original investment and/or may be required to accept payment over an extended period of time.

Bridge Loans. It is a common practice for financial institutions to commit to providing bridge loans to facilitate acquisitions, including leveraged buyouts, where it serves as an advisor to the purchaser. Bridge loans are frequently made because, for timing or market reasons, longer term financing is not available at the time the funds are needed, which is often at the time of the closing of an acquisition. In the past, these commitments were not frequently drawn upon due to the availability of other sources of financing. However, due to recent market conditions affecting the availability of these other sources of financing (principally high yield bond transactions), bridge loan commitments have been and may be drawn upon more regularly. Since these commitments were not regularly drawn upon in the past, there is little history for investors to rely upon in evaluating investments in bridge loans. Bridge loans often have shorter maturities than the permanent financing by which they are expected to be replaced. Borrowers and lenders typically agree to shorter maturities based on the anticipation that the bridge loans will be replaced with other forms of financing within such shorter time period. However, the source and timing of such replacement financing may be uncertain and can be affected by, among other things, market conditions and the financial condition of the borrower at the maturity date of the bridge. If the borrower is unable to obtain replacement financing and repay the bridge loan at maturity, the terms of the bridge

loan may provide for the bridge loan to be converted to a longer term loan (with maturities similar to that of a bond). If bridge loans are not repaid (or cannot be disposed of on favorable terms) on the dates projected by Silver Point, there may be an adverse effect upon the ability of Silver Point to manage the assets of the Flagship Funds in accordance with its models and projections or an adverse effect upon the Flagship Funds' performance and ability to make distributions.

Risks of Investments in Special Situations. The Flagship Funds may invest in "event-driven" and other special situations such as recapitalizations, spin-offs, restructurings, bankruptcy, litigation, corporate control transactions, corporate events and other catalyst-oriented strategies. Silver Point could be incorrect in its assessment of the magnitude or probability of the downside risks associated with an investment in an "event-driven" or other special situation, thus resulting in significant losses to the Flagship Funds. Investments in such securities are often difficult to analyze or may have limited trading histories or limited in-depth research coverage. Investing in special situations frequently requires the investor to make predictions about (i) the likelihood that an event will occur and (ii) the impact such event will have on the value of a company's financial instruments. If the event fails to occur or it does not have the effect foreseen, losses can result. For example, the adoption of new business strategies or completion of asset dispositions or debt reduction programs by a company may not be valued as highly by the market as Silver Point had anticipated, resulting in losses. In addition, a company may announce a plan of restructuring which promises to enhance value, but fail to implement it, which can result in losses to investors. In liquidations and other forms of corporate reorganization, the risk exists that the reorganization either will be unsuccessful, will be delayed or will result in a distribution of cash or a new security, the value of which will be less than the price paid by the Flagship Funds for the security in respect of which such distribution was made. The consummation of mergers and tender and exchange offers can be prevented or delayed by a variety of factors, including: (i) opposition of the management or stockholders of the target company, which may result in litigation to enjoin the proposed transaction; (ii) intervention of a federal or state regulatory agency; (iii) efforts by the target company to pursue a "defensive" strategy, including a merger with, or a friendly tender offer by, a company other than the offeror; (iv) in the case of a merger, failure to obtain the necessary stockholder approvals; (v) market conditions resulting in material changes in securities prices; (vi) compliance with any applicable federal or state securities laws; and (vii) inability to obtain adequate financing. Because of the inherently speculative nature of investing in special situations, the results of the Flagship Funds' operations may be expected to fluctuate from period to period. Accordingly, limited partners of the Domestic Flagship Fund, or shareholders of the Offshore Flagship Fund, as applicable, should understand that the results of a particular period will not necessarily be indicative of results that may be expected in future periods.

Investments in Non-Traded Equity. As part of their investment programs, the Flagship Funds may make investments in non-traded equity. These investments may occur as a result of, among other things, direct equity investments and the Flagship Funds' purchase of debt instruments that convert to equity interests in the event of a reorganization of an entity's capital structure.

The Flagship Funds' investments in non-traded equity involve a high degree of business and financial risk. The entities in which the Flagship Funds invest may be financially distressed or have recently emerged from bankruptcy, they may require substantial additional capital to support expansion or to achieve or maintain a competitive position, they may produce

substantial variations in operating results from period to period and they may operate at a loss. Such risks may adversely affect the performance of such investments and result in substantial losses. In addition, these entities may require governmental approvals or be subject to licensing procedures in order to operate in their markets. The Flagship Funds could be adversely affected by delays in, or refusals to grant, such approvals or licenses.

Broad Investment Mandate. The Flagship Funds' investment strategy permits investments to be made in a broad range of issuers, securities, financial instruments and transactions. Subject to the concentration limits set forth in the Flagship Funds' respective offering memoranda, Silver Point may also cause the Flagship Funds to focus their investment activities in a limited number of industries, market sectors or types of securities, financial instruments or transactions. Within those broad parameters, Silver Point will make investment decisions for the Flagship Funds as it deems appropriate in its sole discretion. No assurance can be given that the Flagship Funds will be successful in obtaining suitable investments, or that if such investments are made, the objectives of the Flagship Funds will be achieved.

Nature of Bankruptcy Proceedings. There are a number of significant risks when investing in companies involved in bankruptcy proceedings, including the following: First, many events in a bankruptcy are the product of contested matters and adversary proceedings which are beyond the control of the creditors. Second, a bankruptcy filing may have adverse and permanent effects on a company. For instance, the company may lose its market position and key employees and otherwise become incapable of restoring itself as a viable entity. Further, if the proceeding is converted to a liquidation, the liquidation value of the company may not equal the liquidation value that was believed to exist at the time of the investment. Third, the duration of a bankruptcy proceeding is difficult to predict. A creditor's return on investment can be adversely impacted by delays while the plan of reorganization is being negotiated, approved by the creditors and confirmed by the bankruptcy court, and until it ultimately becomes effective. Fourth, the administrative costs in connection with a bankruptcy proceeding are frequently high and will be paid out of the debtor's estate prior to any return to creditors. Fifth, creditors can lose their ranking and priority if they exercise "domination and control" over a debtor and other creditors can demonstrate that they have been harmed by such actions, especially in the case of investments made prior to the commencement of bankruptcy proceedings. Sixth, certain claims, such as claims for taxes, may have priority by law over the claims of certain creditors. Seventh, under certain circumstances, payments to the Flagship Funds and distributions by the Flagship Funds to their investors may be reclaimed if any such payment is later determined to have been a preferential payment. Eighth, the Flagship Funds may seek representation on creditors' committees, and as a member of a creditors' committee they may owe certain obligations generally to all creditors similarly situated that the committee represents and they may be subject to various trading or confidentiality restrictions. If Silver Point concludes that the Flagship Funds' membership on a creditors' committee entails obligations or restrictions that conflict with the duties it or its affiliates owe to the Flagship Funds' investors, or that otherwise outweigh the advantages of such membership, the Flagship Funds will not seek membership in, or will resign from, that committee. Because the Flagship Funds will indemnify the Flagship GPs, Silver Point or any other person serving on a committee on behalf of the Flagship Funds for claims arising from breaches of those obligations, indemnification payments could adversely affect the return on the Flagship Funds' investment in a reorganization company.

Leveraged Companies. The Flagship Funds' investments are expected to include companies

whose capital structures may have significant leverage. Such investments are inherently more sensitive to declines in revenues and to increases in expenses and interest rates. The leveraged capital structure of such investments will increase the exposure of the portfolio companies to adverse economic factors such as downturns in the economy or deterioration in the condition of the portfolio company or its industry. Additionally, the securities acquired by the Flagship Funds may be the most junior in what will typically be a complex capital structure, and thus subject to the greatest risk of loss.

Hedging Risks. Silver Point may hedge some or all of the Flagship Funds' portfolios by taking long and short positions in related securities or through the use of futures, swaps and other derivative instruments, involving, among other things, securities, interest rates or currencies. Hedging against a decline in the value of a portfolio position does not eliminate fluctuations in the values of such portfolio positions or prevent losses if the values of such positions decline, but establishes other positions designed to gain from those same developments, thus seeking to moderate the decline in the portfolio position's value. Therefore, hedging transactions may prevent losses while limiting the opportunity for gain if the value of the portfolio position should increase. In the event of an imperfect correlation between a position in a hedging instrument and the portfolio position that it is intended to protect, the desired protection may not be obtained, and the Flagship Funds may be exposed to risk of loss. In addition, it is not possible to hedge fully or perfectly against any risk, and hedging entails its own costs and risks, such as counterparty risk. Silver Point may determine in its sole discretion not to hedge against certain risks or may not anticipate certain risks and certain risks may exist that cannot be hedged.

Leverage and Financing Risk. The Flagship Funds may leverage their investments in order to enhance returns. Accordingly, the Flagship Funds' securities may be pledged in order to borrow additional funds for investment purposes. The Flagship Funds' investment return may be leveraged with options, short sales and other derivative instruments (including swaps).

Many financing arrangements to which the Flagship Funds are subject contain financial covenants, including limitations on the level of financing that may be provided, asset coverage requirements, limitations on restricted payments (including distributions), minimum performance requirements, issuer and industry diversification requirements, and other limitations and covenants. Furthermore, the financing terms (including, without limitation, terms related to margin requirements) contained in each of the Flagship Fund's prime brokerage arrangements may be changed by the relevant prime broker, subject to certain limitations.

While leverage presents opportunities for increasing the Flagship Funds' total return, it has the effect of potentially increasing losses as well. Accordingly, any event which adversely affects the value of an investment by the Flagship Funds would be magnified to the extent the Flagship Funds are leveraged. The cumulative effect of the use of leverage by the Flagship Funds in a market that moves adversely to the Flagship Funds' investments could result in a substantial loss to the Flagship Funds which would be greater than if the Flagship Funds were not leveraged.

In general, the Flagship Funds' anticipated use of short-term margin borrowings results in certain additional risks to the Flagship Funds. For example, should the securities pledged by the Flagship Funds to brokers to secure margin accounts decline in value, the Flagship Funds could be subject to a "margin call," pursuant to which the Flagship Funds must either deposit additional funds or securities with the broker, or suffer mandatory liquidation of the pledged

securities to compensate for the decline in value. In the event of a sudden drop in the value of the Flagship Funds' assets, the Flagship Funds might not be able to liquidate assets quickly enough to satisfy their margin requirements.

None of the Flagship Funds will borrow money to acquire investments or satisfy obligations of the Flagship Funds in excess of two and one-half times the sum of (i) the net asset value of the Domestic Flagship Fund or the Master Flagship Fund (as applicable) and (ii) the aggregate amount of deferred Flagship Management Fees and incentive compensation (as applicable), if any, owed to Silver Point (each, as determined at the time of the borrowing); provided that the Flagship Funds may exceed such limit with respect to borrowings incurred to facilitate short trading activity and hedging activity.

Short Selling. The Flagship Funds may sell securities short. Short sales can, in certain circumstances, substantially increase the impact of adverse price movements on the Flagship Funds' portfolios. A short sale of a security involves the risk of a theoretically unlimited loss from a theoretically unlimited increase in the market price of the security, which could result in an inability to cover the short position. In addition, there can be no assurance that securities necessary to cover a short position will be available for purchase. Purchasing securities to close out the short position can itself cause the price of the securities to rise further, thereby exacerbating any loss.

Position Limits. In addition to the requirement that each Flagship Fund not invest more than an amount equal to 15% of its net asset value (determined at the time of investment) in any single portfolio company without the consent of a majority in interest of such Flagship Fund's investors, the Flagship Funds may be subject to "position limits" imposed by various regulators. Such position limits may limit the Flagship Funds' ability to effect desired trades. Position limits are the maximum amounts of net long or net short positions that any one person or entity may own or control in a particular financial instrument. All positions owned or controlled by the same person or entity, even if in different accounts, may be aggregated for purposes of determining whether the applicable position limits have been exceeded. Thus, even if the Flagship Funds do not intend to exceed applicable position limits, it is possible that different accounts managed by Silver Point and its affiliates may be aggregated. If at any time positions managed by Silver Point were to exceed applicable position limits, Silver Point would be required to liquidate positions to the extent necessary to come within those limits. Further, to avoid exceeding the position limits, the Flagship Funds might have to forego or modify certain of their contemplated trades.

Risks of Options. A component of the Flagship Funds' investment programs may involve the purchase and sale of options. There are risks associated with the sale and purchase of call options and put options.

The value of an option may change because of a change in the value of the underlying securities, the passage of time, changes in the market's perception as to the future price behavior of the underlying securities, interest rates, or any combination of the foregoing. In the case of the purchase of an option, the risk of loss of an option buyer's entire investment in the option (i.e., the premium paid and transaction charges) reflects the nature of an option as a wasting asset that may become worthless at its expiration. Where an option is written (or sold) uncovered, the option seller may be liable to pay substantial additional margin, and the risk of loss is theoretically unlimited, as the option seller will be obligated to deliver, or take delivery of, a security at a predetermined price, which may, upon the exercise of the option,

be significantly different from its market value at the time the option was initially written (or sold).

The Flagship Funds may purchase and sell exchange-traded options on individual securities, securities sectors and/or securities indices. There can be no guarantee that there will at all times be a liquid market for all options. A market could become unavailable if one or more exchanges were to stop trading options or it could become unavailable with respect to options on a particular underlying stock if the exchanges stopped trading options on that stock. In addition, a market could become temporarily unavailable if unusual events (e.g., volume exceeds clearing capability) were to interrupt normal exchange operations. If an options market were to become illiquid or otherwise unavailable, an option holder would be able to realize profits or limit losses only by exercising and an option seller or writer would remain obligated until the option is exercised or until the option expires.

If trading is interrupted in an underlying stock, the trading of exchange-traded options on that stock is usually halted as well. Holders and writers of such options will then be unable to close out their positions until options trading resumes, and they may be faced with considerable losses if the stock reopens at a substantially different price. Even if options trading is halted, holders of options will generally be able to exercise them. However, if trading has also been halted in the underlying stock, option holders face the risk of exercising options without knowing the stock's current market value. If exercises do occur when trading of the underlying stock is halted, the party required to deliver the underlying stock may be unable to obtain it, which may necessitate a postponed settlement and/or the fixing of cash settlement prices.

Highly Volatile Markets. The prices of commodities contracts and all derivative instruments, including options prices, can be highly volatile. Price movements of forward and other derivative contracts in which the Flagship Funds' assets may be invested are influenced by, among other things, interest rates, changing supply and demand relationships, trade, fiscal, monetary and exchange control programs and policies of governments, and national and international political and economic events and policies. In addition, governments from time to time intervene, directly and by regulation, in certain markets, particularly those in currencies and financial instrument options. Such intervention often is intended directly to influence prices and may, together with other factors, cause all of such markets to move rapidly in the same direction because of, among other things, interest rate fluctuations. The Flagship Funds also are subject to the risk of the failure of any of the exchanges on which its positions trade or of their clearinghouses.

Exposure to Certain Financial Institutions. The Flagship Funds may invest in financial instruments issued by financial institutions, such as investment and commercial banks, insurance companies, savings and loan associations, mortgage originators and other companies engaged in the financial services industry (collectively, "financial institutions"). In addition, financial institutions will act as counterparties to the Flagship Funds in connection with the Flagship Funds' investment activities, and will provide prime brokerage services to the Flagship Funds. The Flagship Funds may also gain exposure to these entities through derivative transactions, including, without limitation, options, credit default swaps and credit linked notes, and through long and short strategies. In the course of conducting their business operations, financial institutions are exposed to a variety of risks that are inherent to the financial services industry. Significant risks that could affect the financial condition and results of operations of financial institutions include, but are not limited to,

fluctuations in interest rates, exchange rates, equity and commodity prices and credit spreads caused by global and local market and economic conditions; credit-related losses that can occur as a result of an individual, counterparty or issuer being unable or unwilling to honor its contractual obligations; the potential inability to repay short-term borrowings with new borrowings or assets that can be quickly converted into cash while meeting other obligations; operational failures or unfavorable external events; potential changes to the established rules and policies of various U.S. and non-U.S. legislative bodies and regulatory and exchange authorities, such as federal and state securities, bank regulators and industry participants; risks associated with litigation, investigations and/or proceedings by private claimants and governmental and self-regulatory agencies arising in connection with a financial institution's activities; and its continuing ability to compete effectively in the market. Recently, many financial institutions have announced writedowns and losses relating to their exposures to the U.S. subprime market. These financial institutions may continue to have exposure to these markets and products, and as market conditions continue to evolve the fair value of certain mortgage-related instruments could further deteriorate, which could result in further writedowns and losses. Other areas of financial institutions' businesses that have not yet been adversely affected by the illiquidity in mortgage and lending markets could be adversely affected if current conditions in the credit market spread to other sectors. While financial institutions seek to manage these and other risks through risk management policies and procedures, there can be no assurance that such any financial institution's risk management practices will be effective.

Illiquidity and Credit Risk of Derivative Instruments. The Flagship Funds may enter into transactions involving privately negotiated over-the-counter derivative instruments, including, without limitation, total-return, interest rate, foreign currency and credit default swaps, over-the-counter options and forward contracts on securities, security indices and foreign currency, and volatility and other swaps (each, a "Synthetic Asset"). There can be no assurance that a liquid secondary market will exist for any particular derivative instrument at any particular time. Although over-the-counter derivative instruments are designed to be tailored to meet particular financing needs and, therefore, typically provide more flexibility than exchange-traded products, the risk of illiquidity is also greater as these instruments can generally be terminated only by negotiation with the other party to the instrument. Over-the-counter derivative instruments, unlike exchange-traded instruments, are not guaranteed by an exchange or clearinghouse and thus may have greater credit risks.

Other Derivative Instruments. The Flagship Funds may effectuate a portion of their investment objective indirectly through Synthetic Assets including, without limitation, total return swaps and credit derivatives.

Each Synthetic Asset that is a credit derivative or total return swap may reference one or more reference assets including leveraged loans, high yield bonds, second lien loans and other debt financings or securities (each, a "Reference Obligation"). Exposure to such Reference Obligations through Synthetic Assets presents risks in addition to those resulting from direct purchases of the securities or investments. The Flagship Funds will have a contractual relationship only with a counterparty, and not with any issuer (each, a "Reference Entity") of a Reference Obligation unless an event of default occurs with respect to any such Reference Obligation, physical settlement applies and the counterparty delivers the Reference Obligation to the Flagship Funds. If the Flagship Funds do not take delivery of the Reference Obligation, the Flagship Funds likely will have no right directly to enforce compliance by the Reference Entity with the terms of any such Reference Obligation and the Flagship Funds

will not have any rights of set-off against the Reference Entity.

In the event of the insolvency of the counterparty, the Flagship Funds will be treated as general creditors of the counterparty, and will not have any claim of title with respect to the Reference Obligations. Consequently, the Flagship Funds will be subject to the credit risk of the counterparty, as well as that of the Reference Entity. As a result, entering into Synthetic Assets subjects the Flagship Funds to an additional degree of risk with respect to defaults by the counterparty as well as by the respective Reference Entities.

While the Flagship Funds expect that returns in connection with Synthetic Assets will reflect those of each related Reference Obligation, as a result of the terms of the individual Synthetic Asset instruments and the assumption of the credit risk of the counterparty, the Flagship Funds' Synthetic Assets will likely have a different expected return, a different (and potentially greater) probability of default and different expected loss and recovery characteristics following a default. In addition, entering into Synthetic Assets may also be done on a levered basis, which means that the returns in connection with an investment in a Synthetic Asset, whether positive or negative, may be higher than they would have been had the Flagship Funds purchased the Reference Obligation directly.

Synthetic Assets may be less liquid and not as transferable as other obligations and may be subject to more variability between their market value and actual sale price of the underlying Reference Obligation than other obligations. In addition, there is no assurance that a buyer will be available or a termination value will be immediately determinable if the Flagship Funds decide to sell or terminate a Synthetic Asset.

It is expected that the Flagship Funds will not be able to transfer Synthetic Assets without the consent of the applicable counterparty. If the Flagship Funds want to terminate their exposure to a Synthetic Asset and the counterparty objects, the Flagship Funds may be obligated to continue to hold the Synthetic Asset. In addition, because the Synthetic Asset may not be liquid, it may be difficult to enter into an offsetting synthetic transaction at what Silver Point believes is the market price.

To enter into a Synthetic Asset, the Flagship Funds generally will enter into a form of ISDA Master Agreement. The ISDA Master Agreement has "events of default" and "termination events" and an unwind methodology that is applicable to both parties. If an "event of default" or "termination event" occurs with respect to either party, the non-defaulting or non-affected party will have a right to designate an "early termination date", and the party will use a standard valuation methodology as specified in the ISDA Master Agreement to determine the termination price for all the Synthetic Assets. Depending upon the market conditions when the early termination date is designated, the unwind price may be less than what Silver Point believes is a fair unwind price, particularly if the price is based upon third party quotations. For example, recently the credit markets have experienced a liquidity crisis, including the derivative markets on loans and leveraged finance instruments, which has made the sale and termination of derivative instruments difficult.

The Flagship Funds may take advantage of opportunities with respect to certain Synthetic Assets that are not presently contemplated for use or that are currently not available, but that may be developed, to the extent such opportunities are both consistent with the investment objective of the Flagship Funds and legally permissible. Special risks may apply to instruments that are invested in by the Flagship Funds in the future that cannot be determined

at this time or until such instruments are developed or invested in by the Flagship Funds. For example, risks with respect to credit derivatives may include determining whether an event will trigger payment under the contract and whether such payment will offset the loss or payment due under another instrument. In the past, buyers and sellers of credit derivatives have found that a trigger event in one contract may not match the trigger event in another contract, exposing the buyer or the seller to basis risk. Other Synthetic Assets may be subject to various types of risks, including market risk, liquidity risk, the risk of non-performance by the counterparty, including risks relating to the financial soundness and creditworthiness of the counterparty, legal risk and operations risk.

Non-U.S. Currency. The Flagship Funds may enter into non-U.S. currency option and forward contracts for speculative, hedging or other investment purposes. Non-U.S. currency option contracts (the right to buy or sell the underlying non-U.S. currency at a specific price in a specific currency) involve risks similar to the risks involved in trading securities options. Non-U.S. currency forward contracts (agreements to exchange one currency for another at a future date) involve a risk of loss if currency exchange rates move against the Flagship Funds, unless such contracts are hedges of foreign currency risk of the Flagship Funds in their investments. In addition, forward contracts are not guaranteed by an exchange or clearinghouse. Therefore, a default by the forward contract counterparty may result in a loss to the Flagship Funds for the value of unrealized profits on the contract or for the difference between the value of their commitments, if any, for purchase or sale at the current currency exchange rate and the value of those commitments at the forward contract exchange rate.

It is contemplated that most non-U.S. currency forward contracts will be with banks. There are no limitations on daily price moves of forward contracts. Banks are not required to continue to make markets in currencies. There have been periods during which certain banks have refused to continue to quote prices for forward contracts or have quoted prices with an unusually wide spread (the difference between the price at which the bank is prepared to buy and that at which it is prepared to sell). The imposition of credit controls by governmental authorities might limit the level of such forward trading to less than that which Silver Point would otherwise recommend, to the possible detriment of the Flagship Funds. Neither the Commodity Futures Trading Commission nor the U.S. banking authorities regulate forward currency transactions through banks. In respect of such trading, the Flagship Funds are subject to the risk of bank failure or the inability of or refusal by a bank to perform with respect to such contracts.

Repurchase Programs and Bank Obligations. Repurchase agreements are subject to the risk of failure of the seller to repurchase the investment purchased by the Flagship Funds, or delays or limitations on realization of the purchase obligation in the event of the initiation of bankruptcy or other proceedings involving the seller. Certain types of bank obligations which may be acquired by the Flagship Funds may not be covered by insurance from the Federal Deposit Insurance Corporation or the Federal Savings and Loan Insurance Corporation.

Liquidity of Investments. The Flagship Funds' investments will include privately-held securities or other financial instruments which are generally less liquid than publicly-traded securities. Such investments may require a significant amount of time from the date of initial investment before disposition. The value of all illiquid securities and any marketable securities for which reliable quotations are not available (including Designated Investments) will be their fair value (which may be their cost) as determined pursuant to the policies and

procedures described under the respective Flagship Funds' offering memoranda. There can be no assurance that the valuations assigned to such securities will ever be realized.

Non-U.S. Investments. The Flagship Funds' portfolios may consist of non-U.S. securities, financial instruments and other assets. Such investments require consideration of certain risks typically not associated with investing in the U.S. Such risks include, among other things, trade balances and imbalances and related economic policies, unfavorable currency exchange rate fluctuations, imposition of exchange control regulation by the U.S. or non-U.S. governments, U.S. and non-U.S. withholding taxes, limitations on the removal of funds or other assets, policies of governments with respect to possible nationalization of their industries, political difficulties, including expropriation of assets, confiscatory taxation and economic or political instability in foreign nations.

With respect to certain countries, there is a possibility of expropriation, confiscatory taxation, imposition of withholding or other taxes on dividends, interest, capital gains, other income or gross sale or disposition proceeds, limitations on the removal of funds or other assets of the Flagship Funds, political or social instability or diplomatic developments that could affect investments in those countries. An issuer of securities may be domiciled in a country other than the country in whose currency the instrument is denominated. The values and relative yields of investments in the markets of different countries, and their associated risks, are expected to change independently of each other.

There may be less publicly available information about certain non-U.S. companies than would be the case for comparable companies in the U.S., and certain non-U.S. companies may not be subject to accounting, auditing and financial reporting standards and requirements comparable to or as uniform as those of U.S. companies. Securities markets outside the U.S., while growing in volume, have for the most part substantially less volume than U.S. markets, and many securities traded on these foreign markets are less liquid and their prices more volatile than securities of comparable U.S. companies. In addition, settlement of trades in some non-U.S. markets is much slower and more subject to failure than in U.S. markets. There also may be less extensive regulation of the securities markets in particular countries than in the U.S.

Additional costs could be incurred in connection with the Flagship Funds' international investment activities. Brokerage commissions outside the U.S. generally are higher than in the U.S. Expenses also may be incurred on currency exchanges when investments are changed from one country to another. Increased custodian costs as well as administrative difficulties (such as the applicability of foreign laws to foreign custodians in various circumstances, including bankruptcy, ability to recover lost assets, expropriation, nationalization and record access) may be associated with the maintenance of assets in foreign jurisdictions.

Investments denominated in currencies other than the U.S. dollar have a price determined by reference to currencies other than the U.S. dollar. The Flagship Funds value their securities and other assets in U.S. dollars. The value of certain of the Flagship Funds' assets fluctuates with U.S. dollar exchange rates as well as with price changes of the Flagship Funds' investments in the various local markets and currencies. Thus, an increase in the value of the U.S. dollar compared to the other currencies in which the Flagship Funds make their investments will reduce the effect of increases and magnify the U.S. dollar equivalent of the effect of decreases in the prices of the Flagship Funds' investments in their local markets.

Conversely, a decrease in the value of the U.S. dollar will have the opposite effect of magnifying the effect of increases and reducing the effect of decreases in the prices of the Flagship Funds' non-U.S. dollar investments.

Risk Factors with respect to the C & I Funds

Lack of Diversification. The C & I Funds' investment strategy is focused on investing in a narrow category of assets. The aggregate return on the investments may be adversely affected by the unfavorable conditions which may impact a particular region or property type and will be at a greater risk to overall changes in the economy (and in particular the commercial & industrial loan market) than if the C & I Funds had a more diversified portfolio.

General Credit Risks. The C & I Funds will be exposed to losses resulting from borrower default. Therefore, the value of the underlying collateral, the creditworthiness of the borrower or other counterparty and the priority of the lien are each of great importance. Silver Point cannot guarantee the adequacy of the protection of the C & I Funds' interests, including the validity or enforceability of the applicable loan purchase contract and the maintenance of the anticipated priority and perfection of the applicable security interests. Furthermore, Silver Point cannot assure that claims may not be asserted that might interfere with enforcement of the C & I Funds' rights.

Foreclosure Risks. It is possible that the C & I Funds may find it necessary or desirable to foreclose on certain loans. The foreclosure process is often lengthy and expensive. Borrowers may resist mortgage foreclosure actions by asserting numerous claims, counterclaims and defenses against the C & I Funds, including, without limitation, numerous lender liability claims and defenses, even when such assertions may have no basis in fact, in an effort to prolong the foreclosure action and force the lender into a modification of the loan or a favorable buy-out of the borrower's position. In some states, foreclosure actions can sometimes take several years or more to litigate. At any time prior to or during the foreclosure proceedings the borrower may file for bankruptcy, which would have the effect of staying the foreclosure actions and further delaying the foreclosure process. Foreclosure litigation tends to create a negative public image of the mortgaged property and may result in disrupting the ongoing leasing, management and operation of the property, and may negatively affect the sales price of the property.

There can be no assurance that there will be a ready market for resale of foreclosed properties because investments in real estate generally are not liquid; holding periods accordingly are difficult to predict, particularly as business plans may be revised to adapt to changing economic, business and financial conditions. In addition, there may be significant expenditures associated with holding real property, including real estate taxes and maintenance costs. The liquidation proceeds upon sale of the real estate may be less than the amount invested in the loan, resulting in a loss to the C & I Funds. Any costs or delays involved in the liquidation of the real estate will further reduce proceeds received and thus increase any loss.

Vulnerability to Interest Rate Changes. Some of the loans in which the C & I Funds invest will be fixed-rate debt or similar instruments, and therefore will decline in value when interest rates rise. Also, because the value of real estate may decline when interest rates rise, the value of the collateral underlying the commercial & industrial loans in which the C & I

Funds invest may decline at the same time as the securities themselves. Therefore, rising interest rates could substantially reduce the value of the investments and the price the C & I Funds would receive if it tried to dispose of them.

Investments Longer Than Term. The C & I Funds may make investments which may not be advantageously disposed of prior to the date scheduled for dissolution of the C & I Funds. Additionally, due to the illiquid nature of the collateral that underlies many of the positions which the C & I Funds are expected to acquire, as well as the uncertainties of the reorganization and active management process, Silver Point is unable to predict with confidence what the exit strategy will ultimately be for any given position. Although Silver Point expects that investments (and their underlying collateral, if applicable) will be able to be disposed of prior to dissolution, the C & I Funds may have to sell, distribute, or otherwise dispose of investments (or collateral) at a disadvantageous time for a price which is less than the price that could have been obtained if they were held for a longer period of time.

General Real Estate Risks. The C & I Funds' investments will be subject to the risks inherent in the ownership of real property to the extent that real property will typically be underlying collateral for the C & I Funds' loan investments. These risks include, but are not limited to, typical expenses incurred in connection with the ownership of real property; general and local economic conditions; the supply and demand for properties; fluctuations in the average occupancy and room rates for hotel properties; the financial resources of tenants; changes in building, environmental, and other laws; changes in real property tax rates; changes in interest rates and the availability of mortgage funds which may render the sale or refinancing of properties difficult or impracticable; negative developments in the economy that depress travel activity; environmental liabilities; uninsured casualties; the quality and philosophy of management; competition based on rental rates; quality of maintenance; changes in operating costs; the exercise of the right of eminent domain by governmental entities; terrorism; acts of God and other factors beyond the control of Silver Point.

Risks Associated with Investing in Commercial and Industrial Loans. The C & I Funds will often invest in loans secured by commercial and industrial properties. While Silver Point will typically value commercial and industrial properties based on their real estate liquidation value alone, a property's tenant(s), a property's attributes and the quality of the neighborhood each may adversely impact the ability of the borrower to repay the loan and the value of the property. Factors that can affect the value of commercial & industrial loans include, without limitation, (i) the diversity and quality of a property's tenants, including whether the owner relies on a single or dominant tenant and the creditworthiness of any such tenant; (ii) the terms, including duration, of a property's leases with tenants; (iii) an economic decline in the business that occupies a property; (iv) a decline in a particular business segment, which thereby reduces demand for a particular type of space; (v) the physical attributes of a property (both individually and in comparison to competing properties), including, but not limited to, a property's age, its physical condition, design and appearance, its location and access to transportation, and its ability to offer amenities (e.g., sophisticated systems and/or wiring requirements); (vi) a property's technological attributes and adaptability to changes in a tenant's technological needs; (vii) the desirability of the neighborhood as a location; (viii) continued expenses for maintenance, refurbishment and modernization of existing facilities, even prior to their useful life; (ix) a decline in the managerial capacity or prowess of a business operator; (x) the strength of the local economy, including the cost of labor, quality of life and the tax environment; and (xi) an adverse impact on the neighborhood's population, including employment growth (thereby creating demand for office space), each influence the

ability of the borrower to repay the loan and the underlying value of the business occupying the property. In the event of a default of a loan, the C & I Funds may not fully recover the amount invested in the loan, which may result in a loss on such loan even if purchased at a discount.

Potential Environmental Liabilities. Under various U.S. Federal, state and local environmental laws, ordinances and regulations, a current or previous owner or operator of real estate (which may include a lender such as the C & I Funds in some instances) may be required to investigate and clean up any hazardous or toxic substances or petroleum product releases and may be liable for the costs in connection with such contamination. These laws typically impose clean-up responsibility and liability without regard to whether the owner knew of, or was responsible for, the presence of the contaminants, and the liability under such laws has been interpreted to be joint and several unless the harm is divisible and there is a reasonable basis for allocation of responsibility. The cost of investigation, remediation or removal of such substances may be substantial, and the owner's liability as to any property is generally not limited to the value of the property and/or the aggregate assets of the owner. Furthermore, the presence of such substances on such property may adversely affect the owner's ability to sell or rent such property or to borrow using such property as collateral.

Persons who arrange for the disposal or treatment of hazardous or toxic substances or petroleum products at a disposal or treatment facility may also be liable for the costs of removal or remediation of a release of hazardous or toxic substances or petroleum products at such disposal or treatment facility, whether or not the facility is owned or operated by such person. In certain circumstances, third-party lenders that have directed or had an active involvement in the environmental compliance activities or the day-to-day management of a borrower's facilities or that have taken possession of or title to such borrower's collateral may be liable for the costs of removal or remediation of a release of hazardous or toxic substances or petroleum products at the facility. In addition, some environmental laws create a lien on the contaminated site in favor of the government for damages and costs it incurs in connection with contamination. In addition, the owner of a site may be subject to common law claims by third parties based on damages and costs resulting from environmental contamination emanating from a site. Certain U.S. Federal, state and local laws, regulations and ordinances govern the removal, encapsulation or disturbance of asbestos-containing materials when such materials are in poor condition or in the event of construction, remodeling, renovation or demolition of a building. These laws may impose liability for release of asbestos-containing materials and may provide for third parties to seek recovery from owners or operators of real property for personal injury associated with such asbestos-containing materials.

In connection with the C & I Funds' debt investments, the C & I Funds, to the extent they have an active involvement in the environmental compliance activities of a borrower's facilities or takes possession of a borrower's collateral, may incur liability for environmental costs. Additionally, changes in environmental laws or in the environmental condition of an asset may create liabilities that did not exist at the time of acquisition and that could not have been foreseen.

Prepayment Risk. The frequency at which prepayments (including voluntary prepayments by the obligors and liquidations due to default and foreclosures) occur on loans will be affected by a variety of factors including the prevailing level of interest rates as well as economic, demographic, tax, social, legal and other factors. In general, "discount" loans (loans whose

principal or par amounts exceed their market values) are adversely affected by slower than anticipated prepayments. Since the C & I Funds will focus on investments in discount loans, such loans may be adversely affected by slower than anticipated prepayments.

Risks Associated with Non-Performing Loans. It is anticipated that certain loans purchased by Silver Point for the C & I Funds will be non-performing and possibly in default. Furthermore, the obligor or relevant guarantor may also be in bankruptcy or liquidation. There can be no assurance as to the amount and timing of payments, if any, with respect to the loans. By their nature, these investments will involve a high degree of risk. Commercial & industrial loans in workout and/or restructuring modes or under the United States Bankruptcy Code are subject to additional potential liabilities, which may exceed the value of the C & I Funds' original investments. For example, borrowers often resist foreclosure by asserting numerous claims, counterclaims and defenses against the holder of the real estate loan, including lender liability claims and defenses, in an effort to delay or prevent foreclosure. Under certain circumstances, lenders who have inappropriately exercised control of the management and policies of a debtor may have their claims subordinated or disallowed or may be found liable for damages suffered by parties as a result of such actions. In addition, under certain circumstances, payments to the C & I Funds and distributions or dividends by the C & I Funds to their investors may be reclaimed if any such payment or distribution is later determined to have been a fraudulent conveyance or a preferential payment. In addition to being lengthy and expensive, foreclosure and bankruptcy proceedings may disrupt ongoing leasing and management of the property.

Second Lien Loans. Although the C & I Funds expect to invest primarily in loans where they hold a first lien position, the C & I Funds may invest in loans that are secured by a second lien on assets. Second lien loans have been a developed market for a relatively short period of time, and there is limited historical data on the performance of second lien loans in adverse economic circumstances. In the event of default by the borrower, holders of loans secured by a second lien on assets will have a lower priority in terms of payment than holders of loans secured by a first lien on assets. While uncertainty of recovery in an insolvency or distressed situation is inherent in all debt instruments, second lien loan products carry more risks than certain other debt products.

Risks Associated with Bankruptcy Cases. There may be instances where the borrowers of the loans in which the C & I Funds invest seek protection under U.S. bankruptcy law. Many of the events within a bankruptcy case are adversarial and often beyond the control of the creditors. While creditors generally are afforded an opportunity to object to significant actions, there can be no assurance that a bankruptcy court would not approve actions which may be contrary to the interests of the C & I Funds.

Generally, the duration of a bankruptcy case can only be roughly estimated. The reorganization of a debtor usually involves the development and negotiation of a plan of reorganization, plan approval by creditors and confirmation by the bankruptcy court. This process can involve substantial legal, professional and administrative costs to the debtor and the C & I Funds; it is subject to unpredictable and lengthy delays; and during the process the debtor's competitive position may erode, key management may depart and the debtor may not be able to invest adequately. In some cases, the debtor may not be able to reorganize and may be required to liquidate assets. Although the C & I Funds intend to invest in loans, the debt of companies in financial reorganization will, in most cases, not pay current interest, may not accrue interest during reorganization and may be adversely affected by an erosion of

the issuer's fundamental value. Such investments can result in a total loss of principal.

U.S. bankruptcy law permits the classification of "substantially similar" claims in determining the classification of claims in a reorganization for purpose of voting on a plan of reorganization. Because the standard for classification is vague, there exists a significant risk that the C & I Funds' influence with respect to a class of debt can be lost by the inflation of the number and the amount of claims in, or other gerrymandering of, the class. In addition, certain administrative costs and claims that have priority by law over the claims of certain creditors (for example, claims for taxes) may be quite high.

Silver Point, on behalf of the C & I Funds, may elect to serve on creditors' committees or other groups to ensure preservation or enhancement of the C & I Funds' positions as creditors. A member of any such committee or group may owe certain obligations generally to all parties similarly situated that the committee represents. If Silver Point concludes that its obligations owed to the other parties as a committee or group member conflict with its duties owed to the C & I Funds, it will resign from that committee or group, and the C & I Funds may not realize the benefits, if any, of participation on the committee or group. In addition, and also as discussed above, if the C & I Funds are represented on a committee or group, they may be restricted or prohibited under applicable law from disposing of or increasing their investments in such company while they continue to be represented on such committee or group.

Leverage and Financing Risk. The C & I Fund I does not intend to use financial leverage in its investment strategy, but its right to draw down capital from its investors may be used to secure bridge facilities for the C & I Fund I to fund investments in advance of drawdowns from investors.

The C & I Fund II may leverage its investments in order to enhance returns. Accordingly, the C & I Fund II's assets may be pledged in order to borrow additional funds for investment purposes.

Financing arrangements to which the C & I Fund II may be subject will contain financial covenants, which may include limitations on the level of financing that may be provided, asset coverage requirements, limitations on restricted payments (including distributions), minimum performance requirements, diversification requirements, and other limitations and covenants.

While leverage presents opportunities for increasing the C & I Fund II's total return, it has the effect of potentially increasing losses as well. Accordingly, any event which adversely affects the value of an investment by the C & I Fund II would be magnified to the extent the C & I Fund II is leveraged. The cumulative effect of the use of leverage by the C & I Fund II in a market that moves adversely to the C & I Fund II's investments could result in a substantial loss to the C & I Fund II which would be greater than if the C & I Fund II were not leveraged.

ITEM 9
DISCIPLINARY INFORMATION

There are no legal or disciplinary events that are material to a client's or prospective client's evaluation of Silver Point's advisory business or the integrity of Silver Point's management.

ITEM 10

OTHER FINANCIAL INDUSTRY ACTIVITIES AND AFFILIATIONS

Broker-Dealer Registration Status

Silver Point and its management persons are not registered as broker-dealers and do not have any application pending to register as a broker-dealer or registered representative of a broker-dealer.

Futures Commission Merchant, Commodity Pool Operator or Commodity Trading Adviser Registration Status

Silver Point and its management persons are not registered as, and do not have any application to register as, a futures commission merchant, commodity pool operator, commodity trading advisor, or an associated person of the foregoing entities.

Material Relationship or Arrangements with Industry Participants

Silver Point does not have any relationships or arrangements that are material to its advisory business or to its clients with related persons that are industry participants.

Material Conflicts of Interest Relating to Other Investment Advisers

Silver Point generally does not recommend or select other investment advisers for its clients; however, Silver Point has the right to cause the Flagship Funds to enter into joint venture arrangements, co-invest with third parties or otherwise participate in pooled investment vehicles with others, or to allocate discrete portions of the Flagship Funds' assets to independent managers to manage on a discretionary basis, if Silver Point determines that such an arrangement represents the best way to access a particular investment opportunity or otherwise expand the investment expertise available to the Flagship Funds. The Flagship Funds may be subject to various costs relating to such ventures, including additional performance-based or fixed asset-based fees or allocations payable to the promoters, managers, finders or sub-advisors of such ventures. For ventures involving an investment in a particular transaction, a difficult-to-access market or where a third party brings a special expertise to the situation (as determined in the sole discretion of Silver Point), any such fees and allocations will not reduce the Flagship Management Fee or the incentive compensation. For all such other ventures, Silver Point will determine whether any such fees and allocations will reduce the Flagship Management Fee or the incentive compensation.

Other Conflicts

The Funds will be subject to a number of actual and potential conflicts of interest involving Silver Point and its affiliates, employees or partners, including the Funds (collectively, the "Silver Point Group"), including, among other things, the fact that: (i) the Silver Point Group may conduct substantial investment, administrative and other related activities for their own accounts and the accounts of clients or members of the Silver Point Group (such accounts, "Silver Point Accounts") in which a particular Fund has no interest; (ii) the Silver Point Group advises other Silver Point Accounts, which may utilize the same, similar or different strategies, objectives and policies as a particular Fund, and may have financial incentives (including, without limitation, as it relates to the composition of investors in such funds and

accounts or to the Silver Point Group's compensation arrangement) to favor certain Silver Point Accounts over such Fund; (iii) the Silver Point Group may use the strategy of the Flagship Funds or the C & I Funds in certain other Silver Point Accounts; (iv) the Silver Point Group may give advice and recommend financial instruments to, or buy or sell financial instruments for, a Fund, which advice or financial instruments may differ from advice given to, or financial instruments recommended or bought or sold for, other Silver Point Accounts; and (v) the Silver Point Group and other Silver Point Accounts may actively engage in transactions in the same financial instruments sought by a Fund and, therefore, may compete with such Fund for investment opportunities or may hold positions potentially in conflict with positions maintained on behalf of such Fund. Due to restrictions imposed on the Silver Point Group in connection with the management of other Silver Point Accounts, a Fund may not be able to initiate a transaction that it otherwise might have initiated and may not be able to sell an investment that it otherwise might have sold.

Silver Point Accounts will make investments in the same issuers and conflicts of interest (or perceived conflicts of interest) may arise in connection with such investments, including as a result of investing in different levels of an issuer's capital structure or otherwise in different classes of an issuer's financial instruments. In addition, other Silver Point Accounts may make follow-on or other investments (including with respect to issuers in which a Fund has an investment) in which such Fund will not participate. These investments may create additional conflicts of interest among a Fund and such Silver Point Accounts. While these conflicts cannot be eliminated, the Silver Point Group endeavors to address potential conflicts in a manner that is fair and equitable to each Fund and the other Silver Point Accounts. Conflict resolution may result in a Fund receiving less consideration than it may have otherwise received in the absence of such a conflict of interest.

The Principal Vehicle has co-invested with the Flagship Funds in certain investments. It is expected that the Principal Vehicle will continue to invest or co-invest in certain opportunities identified by Silver Point. Conflicts of interest may arise with respect to the allocation of investment opportunities between the Flagship Funds and the Principal Vehicle, and with respect to potentially conflicting interests associated with certain investments as more fully described herein. Allocations of investment opportunities between the Flagship Funds and the Principal Vehicle will be made pursuant to policies maintained by Silver Point (generally on a basis providing priority to the Flagship Funds).

Silver Point's policies and procedures are intended to produce fairness over time, but may not, and are not expected to, produce mathematical precision in the allocation of individual purchases and sales of securities.

Silver Point and its investment personnel will devote to the Funds as much time as Silver Point deems necessary and appropriate to manage the business of the Funds. The investment personnel of Silver Point (and the other service providers of the Funds) will continue to provide services to other Silver Point Accounts. Future activities of the Silver Point Group, including the establishment of other investment funds, may give rise to additional conflicts of interest.

ITEM 11
CODE OF ETHICS, PARTICIPATION OR INTEREST IN CLIENT TRANSACTIONS
AND PERSONAL TRADING

Code of Ethics

Silver Point strives to adhere to the highest industry standards of conduct based on principles of professionalism, integrity, honesty and trust. In seeking to meet these standards, Silver Point has adopted a Code of Ethics (the "Code"). The Code incorporates the following general principles that all employees are expected to uphold:

- employees must act in the best interests of the Funds;
- employees must comply with all applicable laws, rules and regulations;
- all personal securities transactions must be conducted in a manner consistent with the Code and any actual or potential conflicts of interest or any abuse of an employee's position of trust and responsibility must be avoided;
- employees must not take any inappropriate advantage of their positions; and
- information concerning the identity of securities held by, and financial circumstances of, the Funds and their investors must be kept confidential.

Clients may request to review the Code by contacting Silver Point at the address or telephone number listed on the first page of this document.

Cross Trades/Principal Transactions

Subject to applicable restrictions in Silver Point's written policies and procedures, Silver Point may determine that it would be in the best interests of certain clients to transfer a security from one client to another (each such transfer, a "Cross Trade") for a variety of reasons, including, without limitation, tax purposes, liquidity purposes, leverage purposes, rebalancing or other legal reasons, or to reduce transaction costs that may arise in an open market transaction. If Silver Point decides to engage in a Cross Trade, Silver Point will determine that the trade is in the best interests of each client involved, will take steps to ensure that the transaction is consistent with its fiduciary duties and will seek to obtain best execution for each of those clients.

When effecting cross transactions between clients, Silver Point, its affiliates and its personnel may have cross ownership interests and will potentially have conflicting loyalties and responsibilities. To the extent that such transactions may be viewed as principal transactions due to the ownership interest in the client by Silver Point, its affiliates or its personnel, Silver Point will comply with the requirements of Section 206(3) of the Advisers Act. In no event will a Fund engage in a principal transaction except where (i) a Fund selects one or more unaffiliated persons to serve on a committee, the purpose of which will be to consider and approve or disapprove principal transactions, and such committee approves such transaction,

or (ii) to the extent a Fund has independent third party directors, such directors consider and approve of such transaction.

Investing in Securities that Silver Point or a Related Person Recommends to Clients

The Code places restrictions on personal trades by employees, including that they disclose their personal securities holdings and transactions to Silver Point on a periodic basis, and it requires that employees pre-clear certain types of personal securities transactions. Subject to internal compliance policies and approval procedures, and to the extent consistent with Silver Point's fiduciary duties to the Funds, Silver Point, its affiliates and its employees may invest on behalf of themselves in securities and other instruments that would be appropriate for, held by, or may fall within the investment guidelines of the Funds.

Silver Point, its affiliates and its employees may give advice or take action for their own accounts that may differ from, or conflict with advice given or action taken for the Funds. These activities may affect the prices and availability of other securities or instruments held by or potentially considered for one or more Funds. Potential conflicts also may arise due to the fact that Silver Point and its personnel may have different levels of investments in the various Funds.

Silver Point endeavors to monitor and resolve conflicts with respect to investment opportunities in a manner that it deems fair and equitable, including the restrictions placed on personal trading in the Code, as described above.

Conflicts of Interest Created by Contemporaneous Trading

Silver Point manages investments on behalf of a number of clients. Certain clients have investment programs that are similar to or overlap and may, therefore, participate with each other in investments. It is the policy of Silver Point to allocate investment opportunities among all clients fairly, in accordance with each client's applicable investment strategies, over a period of time. Silver Point will have no obligation to purchase or sell a security for, enter into a transaction on behalf of, or provide an investment opportunity to any other client solely because Silver Point purchases or sells the same security for, enters into a transaction on behalf of, or provides an opportunity to any client if, in its reasonable opinion, such security, transaction or investment opportunity does not appear to be suitable, practical or desirable for the client.

It is expected that investment opportunities that are consistent with the investment strategies of two or more clients will be allocated among such clients in such proportion as Silver Point or its affiliates may deem to be fair and equitable. Among other considerations, Silver Point may consider the following factors: (i) a client's objectives (whether such objectives are considered solely in light of the specific investment under consideration or in the context of such client's overall holdings); (ii) the relative amount of a client's capital available for new investments; (iii) the terms, structure and, availability of financing in respect of an investment; (iv) the diversification of a client's overall holdings; (v) the size, liquidity and anticipated duration of the proposed investment; (vi) the potential for the proposed investment to create an imbalance in a client's portfolio; and (vii) a client's diversification, leverage and other limitations. Such considerations, among others, may (and often are expected to) result in allocations among such clients on a basis other than available capital. Such clients may invest in issuers in which other clients have pre-existing investments

(including the same, similar or potentially conflicting financial instruments of such issuers) and the terms and structure of such pre-existing investments may differ from such client's investments (including in a manner that is more beneficial to the other clients).

ITEM 12

BROKERAGE PRACTICES

Factors Considered in Selecting or Recommending Broker-Dealers for Client Transactions

As noted previously, Silver Point has full discretionary authority to manage the Funds, including authority to make decisions with respect to which securities are bought and sold, the amount and price of those securities, the brokers or dealers to be used for a particular transaction, and commissions or markups and markdowns paid.

With respect to the Flagship Funds, portfolio transactions will be allocated to broker-dealers on the basis of best execution and in consideration of the provision of certain investment-related services (including research services) and/or payment of the costs of investment-related research, which Silver Point believes to be of benefit to the Flagship Funds. Silver Point will use various brokers and dealers to execute, settle and clear securities transactions for the Flagship Funds. Subject to best execution, in selecting broker-dealers (including a prime broker) Silver Point may consider, among other things, the overall cost of the transaction; the size and type of the transaction; the nature of the market for the financial instrument; execution capability, speed and efficiency; market intelligence regarding the transaction; the extent to which the broker-dealer makes a market in the financial instrument involved or has access to such markets; the broker-dealer's financial stability; the broker-dealer's reputation for diligence, fairness and integrity; quality of service rendered by the broker-dealer in other transactions for Silver Point; confidentiality considerations; the quality and usefulness of research services and investment ideas presented by the broker-dealer; the broker-dealer's willingness to correct errors; the broker-dealer's ability to accommodate any special execution or order handling requirements in connection with any particular transaction; and other factors deemed appropriate by Silver Point. Accordingly, if Silver Point concludes that the commissions charged by a broker or the spreads applied by a dealer are reasonable in relation to the overall quality of services rendered by such broker or dealer (including, without limitation, the value of the brokerage and research products or services provided by such broker or dealer), the Flagship Funds may pay commissions to or be subject to spreads applied by such broker-dealer in an amount greater than the amount another broker-dealer might charge or apply. Silver Point need not solicit competitive bids and does not have an obligation to seek the lowest available commission cost or spread. Silver Point reviews, on at least a quarterly basis, the quality of brokerage executions.

The C & I Funds do not generally utilize broker-dealers in connection with their portfolio transactions.

Research and Other Soft Dollar Benefits

Although Silver Point does not have any formal "soft dollar" arrangements, from time to time, Silver Point may pay a broker-dealer commissions (or markups or markdowns with respect to certain types of riskless principal transactions) for effecting Flagship Fund transactions in excess of that which another broker-dealer might have charged for effecting the transaction in recognition of the value of the brokerage and research services provided by the broker-dealer. The use of "soft dollars", if any, generated by the Flagship Funds to pay for research and research-related products or services, if any, will fall within the safe harbor

created by Section 28(e) of the U.S. Securities Exchange Act of 1934, as amended, and will be subject to prevailing interpretations of Section 28(e) by the SEC. Silver Point believes it is important to its investment decision-making processes to have access to independent research.

Also, consistent with Section 28(e), research obtained with soft dollars generated by the Flagship Funds may be used by Silver Point to service clients other than the Flagship Funds, including clients that may not have paid for the soft dollar benefits. Silver Point does not seek to allocate soft dollar benefits to client accounts in proportion to the soft dollar credits the client accounts generate. Where a product or service provides both research and non-research assistance to the Flagship Funds, Silver Point will make a reasonable allocation of the cost that may be paid for with soft dollars.

If Silver Point uses client brokerage commissions (or markups or markdowns) to obtain research or other products or services, Silver Point receives a benefit because it does not have to produce or pay for such products or services. Silver Point may have an incentive to select or recommend a broker-dealer based on Silver Point's interest in receiving research or other products or services, rather than on its clients' interest in receiving most favorable execution.

Silver Point reviews, on at least a quarterly basis, its order execution practices, the quality of brokerage services (including research) and the costs associated with such services. In no case will Silver Point make binding commitments as to the level of brokerage commissions it will allocate to a broker-dealer, nor will it commit to pay cash if any informal targets are not met. A broker-dealer is not excluded from receiving business because it has not been identified as providing research products or services.

Brokerage for Client Referrals

Neither Silver Point nor any related person receives referrals from any broker-dealer or third party to manage any investment fund or managed account. From time to time, representatives of Silver Point may speak at conferences and programs sponsored by a broker for investors interested in investing in hedge funds. Through such "capital introduction" events, prospective investors in the Funds have the opportunity to meet with Silver Point. Currently, neither Silver Point nor the Funds compensate the brokers for organizing such events or for any investments ultimately made by prospective investors attending such events, nor do they anticipate doing so in the future. The Funds may accept subscriptions from investors who also provide services to the Funds, including brokers and their affiliates. Relationships such as these could be viewed as creating a conflict of interest that potentially could affect Silver Point's ability to seek best execution. While Silver Point's relationship with brokers may influence it in deciding whether to use such broker in connection with brokerage, financing and other activities of the Funds, Silver Point will not commit to allocate a particular amount of brokerage to a broker in any such situation. Furthermore, Silver Point conducts periodic best execution reviews.

Directed Brokerage

Silver Point does not recommend, request or require that a client direct Silver Point to execute transactions through a specified broker-dealer.

Order Aggregation

To the extent permitted by applicable law, orders of clients may be combined with orders for other clients, and if any order is not filled at the same price, orders may be allocated on an average price basis. Each client that participates in an aggregated order should participate at the average price for all of the clients' transactions in that security at that time, with transaction costs shared *pro rata* based on each client's participation in the transaction. Silver Point will generally execute client transactions on an aggregated basis when it believes that to do so will allow it to obtain best execution or reduce transaction costs. When aggregating orders, the clients will be treated in a fair and equitable manner. Situations may occur where a client could be disadvantaged because of the investment activities conducted by Silver Point or its affiliates for other clients.

ITEM 13 REVIEW OF ACCOUNTS

Frequency and Nature of Review of Client Accounts

Silver Point, analysts, traders and the portfolio manager perform various daily, weekly, monthly, quarterly and periodic reviews of Fund positions. A review of a Fund account may also be triggered by any unusual activity or special circumstance.

Factors Prompting Review of Client Accounts Other than a Periodic Review

Silver Point provides audited financial statements to its clients within 120 days of the applicable Fund's fiscal year end.

Content and Frequency of Account Reports to Clients

Investors in the Funds receive unaudited information at least quarterly regarding the performance of their Fund as well as other relevant information from time to time (which for the Flagship Funds currently includes, among other things, monthly investor letters and exposure reports). In addition, Silver Point issues tax reports and audited financial statements to investors on an annual basis. Investors may receive additional information (for example, in connection with due diligence requests), which is in addition to information provided in a Fund's regular reports to investors.

ITEM 14
CLIENT REFERRALS AND OTHER COMPENSATION

Economic Benefits for Providing Services to Clients

Silver Point does not receive economic benefits from non-clients for providing investment advice and other advisory services to its clients.

Compensation to Non-Supervised Persons for Client Referrals

Neither Silver Point nor any related person directly or indirectly compensates any person who is not a supervised person, including placement agents, for client referrals. Silver Point may in the future enter into arrangements with third party placement agents or distributors to solicit investors in the Funds, and such arrangements would generally provide for the compensation of such persons for their services at Silver Point's expense (including through offsets to the fees and compensation received by Silver Point and its affiliates in respect of the Funds).

ITEM 15

CUSTODY

Silver Point is deemed to have custody of client funds and securities because it has the authority to obtain client funds or securities, for example, by deducting advisory fees from a client's account or otherwise withdrawing funds from a client's account. Account statements related to the Funds are sent by qualified custodians to Silver Point. Fund investors typically receive annual audited financial statements prepared by independent public accountants. In addition, Fund investors typically receive account statements from a third party administrator, which for certain Funds includes custody reports and account statements.

Silver Point is subject to Rule 206(4)-2 under the Advisers Act (the "Custody Rule"). However, Silver Point is not required to comply (or is deemed to have complied) with certain requirements of the Custody Rule with respect to each Fund because it requires that each Fund be subject to an audit at least annually by an independent public accountant that is registered with, and subject to regular inspection by, the Public Company Accounting Oversight Board, and Silver Point requires that each Fund distribute its audited financial statements to all investors within 120 days of the end of its fiscal year.

ITEM 16
INVESTMENT DISCRETION

Silver Point or an affiliate serves as the management company with discretionary trading authority for each Fund.

Silver Point's investment decisions and advice with respect to each Fund are subject to each Fund's investment objectives and guidelines, as set forth in its offering documents.

Silver Point or an affiliate of Silver Point entered into an investment management or similar agreement with each Fund, pursuant to which Silver Point or an affiliate of Silver Point was granted discretionary trading authority.

ITEM 17

VOTING CLIENT SECURITIES

Silver Point has adopted proxy voting policies and procedures in compliance with Advisers Act Rule 206(4)-6. The general policy is to vote proxy proposals, amendments, consents or resolutions relating to client securities (collectively, "Proxies") in a manner that will best serve the interests of the applicable Funds, as determined by Silver Point in its discretion on a case-by-case basis.

In limited circumstances, Silver Point may refrain from voting Proxies where Silver Point believes that not voting would be in the best interests of the applicable Fund, taking into consideration various factors, including, but not limited to, the costs associated with exercising the Proxy, legal restrictions on trading relating to the exercise of the Proxy and whether Silver Point has sold the underlying securities since the record date of the Proxy. Generally, the Funds may not direct Silver Point's vote in a particular solicitation.

Actual or perceived conflicts of interest may arise between the interests of the investing Funds on the one hand and Silver Point or its affiliates on the other hand. If Silver Point determines that an actual or perceived conflict may arise when voting Proxies pursuant to its proxy voting policies and procedures, Silver Point will evaluate the potential conflict and will determine how to proceed in accordance with its Proxy voting policies. The Funds may obtain a copy of Silver Point's Proxy voting policies and its Proxy voting record upon request.

ITEM 18
FINANCIAL INFORMATION

Silver Point is not required to include a balance sheet for its most recent fiscal year, is not aware of any financial condition reasonably likely to impair its ability to meet contractual commitments to clients, and has not been the subject of a bankruptcy petition at any time during the past ten years.
