

Statement of Additional Information
September 30, 2012

Jubak Global Equity Fund (JUBAX)
A series of the Investment Managers Series Trust

This Statement of Additional Information (“SAI”) is not a prospectus, and it should be read in conjunction with the Prospectus for the Jubak Global Equity Fund (the “Fund”) dated September 30, 2012, as may be amended or supplemented from time to time. The Fund is a series of the Investment Managers Series Trust (the “Trust”). Jubak Asset Management, LLC (“Jubak” or the “Advisor”) is the investment advisor to the Fund. A copy of the Fund’s Prospectus may be obtained by contacting the Fund at the address or the telephone number below:

THE TRUST

The Trust is an open-end management investment company organized as a Delaware statutory trust under the laws of the State of Delaware on February 15, 2005. The Trust currently consists of several other series of shares of beneficial interest, par value \$0.01 per share. This SAI relates only to the Fund and not to the other series of the Trust. The Fund is a non-diversified mutual fund, which means it is not subject to the diversification requirements under the Investment Company Act of 1940, as amended (the “1940 Act”). Under the 1940 Act, a diversified fund may not, with respect to 75% of its total assets, invest more than 5% of its total assets in the securities of one issuer (and in not more than 10% of the outstanding voting securities of an issuer), excluding cash, Government securities, and securities of other investment companies. Although the Fund is not required to comply with the above requirement, the Fund intends to diversify its assets to the extent necessary to qualify for tax treatment as a regulated investment company under the Internal Revenue Code of 1986.

The Trust is registered with the U.S. Securities and Exchange Commission (“SEC”) as an open-end management investment company. Such a registration does not involve supervision of the management or policies of the Fund. The Prospectus of the Fund and this SAI omit certain of the information contained in the Registration Statement filed with the SEC. Copies of such information may be obtained from the SEC upon payment of the prescribed fee.

INVESTMENT STRATEGIES AND POLICIES

Descriptions in this SAI of a particular investment practice or technique in which the Fund may engage is meant to describe the spectrum of investments that the Advisor in its discretion might, but is not required to, use in managing the Fund’s portfolio assets. The Advisor may in its discretion at any time employ such practice, technique or instrument for the Fund. Furthermore, it is possible that certain types of financial instruments or investment techniques described herein may not be available, permissible, economically feasible or effective for their intended purposes in all markets. Certain practices, techniques or instruments may not be principal activities of the Fund, but to the extent employed, could from time to time have a material impact on the Fund’s performance.

The equity and debt capital markets in the United States and internationally have experienced unprecedented volatility. This financial crisis has caused a significant decline in the value and liquidity of many securities. These market conditions may continue or get worse. Because the situation is unprecedented and widespread, it may be unusually difficult to identify both risks and opportunities using past models of the interplay of market forces, or to predict the duration of these events.

Additional Information Regarding the Fund’s Investments

Common Stock. Common stocks are shares of a corporation or other entity that entitle the holder to a pro rata share of the profits of the corporation, if any, without preference over any other class of securities, including the company's debt securities, preferred stock and other senior equity securities. Common stock of an issuer in the Fund’s portfolio may decline in price if the issuer fails to make anticipated dividend payments because, among other reasons, the issuer of the security experiences a decline in its financial condition. While broad market measures of common stocks

have historically generated higher average returns than fixed income securities, common stocks have also experienced significantly more volatility in those returns.

The Fund may invest in common stock of companies with market capitalizations that are small compared to other publicly traded companies. Investments in larger companies present certain advantages in that such companies generally have greater financial resources, more extensive research and development, manufacturing, marketing and service capabilities, and more stability and greater depth of management and personnel. Investments in smaller, less seasoned companies may present greater opportunities for growth but also may involve greater risks than customarily are associated with more established companies. The securities of smaller companies may be subject to more abrupt or erratic market movements than larger, more established companies. These companies may have limited product lines, markets or financial resources, or they may be dependent upon a limited management group. Their securities may be traded in the over-the-counter market or on a regional exchange, or may otherwise have limited liquidity. As a result of owning large positions in this type of security, the Fund is subject to the additional risk of possibly having to sell portfolio securities at disadvantageous times and prices if redemptions require the Fund to liquidate its securities positions. In addition, it may be prudent for the Fund, as its asset size grows, to limit the number of relatively small positions it holds in securities having limited liquidity in order to minimize its exposure to such risks, to minimize transaction costs, and to maximize the benefits of research. As a consequence, as the Fund's asset size increases, the Fund may reduce its exposure to illiquid small capitalization securities, which could adversely affect performance.

The Fund may also invest in stocks of companies with medium market capitalizations (i.e., mid cap companies). Such investments share some of the risk characteristics of investments in stocks of companies with small market capitalizations described above, although mid cap companies tend to have longer operating histories, broader product lines and greater financial resources and their stocks tend to be more liquid and less volatile than those of smaller capitalization issuers.

Warrants and Rights. The Fund may invest in warrants or rights (including those acquired in units or attached to other securities) that entitle the holder to buy equity securities at specific prices for specific periods of time but will do so only if such equity securities are deemed appropriate by the Advisor for inclusion in the Fund's portfolio.

Investing in warrants is purely speculative in that they have no voting rights, pay no dividends, and have no rights with respect to the assets of the corporation issuing them. They do not represent ownership of the securities but only the right to buy them. Warrants are issued by the issuer of the security, which may be purchased on their exercise. The prices of warrants do not necessarily parallel the prices of the underlying securities.

Preferred Stocks. Preferred stock has a preference over common stock in liquidation (and generally as to dividends as well), but is subordinated to the liabilities of the issuer in all respects. Preferred stock may offer the opportunity for capital appreciation as well as periodic income.

There are special risks associated with investing in preferred stock, including:

Deferral. Preferred stocks may include provisions that permit the issuer, at its discretion, to defer distributions for a stated period without any adverse consequences to the issuer. If the Fund owns a

preferred stock that is deferring its distributions, the Fund in certain circumstances may be required to report income for federal income tax purposes prior to the actual receipt of such income.

Non-Cumulative Dividends. Some preferred stocks are non-cumulative, meaning that the dividends do not accumulate and need not ever be paid. A portion of the portfolio may include investments in non-cumulative preferred securities, whereby the issuer does not have an obligation to make up any arrearages to its shareholders. Should an issuer of a non-cumulative preferred stock held by the Fund determine not to pay dividends on such stock, the amount of dividends the Fund pays may be adversely affected. There is no assurance that dividends or distributions on non-cumulative preferred stocks in which the Fund invests will be declared or otherwise made payable.

Subordination. Preferred stocks are subordinated to bonds and other debt instruments in a company's capital structure in terms of priority to corporate income and liquidation payments, and therefore will be subject to greater credit risk than more senior debt instruments.

Liquidity. Preferred stocks may be substantially less liquid than many other securities, such as common stocks or U.S. government securities.

Limited Voting Rights. Generally, preferred stock holders (such as the Fund) have no voting rights with respect to the issuing company unless preferred dividends have been in arrears for a specified number of periods, at which time the preferred security holders may have the right to elect a number of directors to the issuer's board. Generally, once all the arrearages have been paid, the preferred security holders no longer have voting rights.

Special Redemption Rights. In certain varying circumstances, an issuer of preferred stock may redeem the securities prior to a specified date. For instance, for certain types of preferred stocks, a redemption may be triggered by a change in federal income tax or securities laws. As with call provisions, a redemption by the issuer may negatively impact the return of the security held by the Fund.

Convertible Securities. A convertible security is a preferred stock, warrant or other security that may be converted into or exchanged for a prescribed amount of common stock or other security of the same or a different issuer or into cash within a particular period of time at a specified price or formula. A convertible security generally entitles the holder to receive the dividend paid on preferred stock until the convertible security matures or is redeemed, converted or exchanged. Before conversion, convertible securities generally have characteristics similar to both fixed income and equity securities.

Foreign Investments. Investments in the securities of foreign issuers may involve risks in addition to those normally associated with investments in the securities of U.S. issuers. All foreign investments are subject to risks of foreign political and economic instability, adverse movements in foreign exchange rates, and the imposition or tightening of exchange controls and limitations on the repatriation of foreign capital. Other risks stem from potential changes in governmental attitude or policy toward private investment, which in turn raises the risk of nationalization, increased taxation or confiscation of foreign investors' assets.

The financial problems in global economies over the past several years, including the European sovereign debt crisis, may continue to cause high volatility in global financial markets. In addition, global economies are increasingly interconnected, which increases the possibilities that conditions in one country or region might adversely impact a different country or region. The severity or duration of these conditions may also be affected if one or more countries leave the euro currency or by other policy changes made by governments or quasi-governmental organizations.

Additional non-U.S. taxes and expenses may also adversely affect the Fund's performance, including foreign withholding taxes on foreign securities' dividends, and generally higher commission rates payable on foreign transactions. Foreign companies may be subject to different accounting, auditing and financial reporting standards and accordingly, less information may be available about foreign companies than is generally available on issuers of comparable securities in the United States. Foreign securities may also trade less frequently and with lower volume and may exhibit greater price volatility than U.S. securities.

Changes in foreign exchange rates will affect the value in U.S. dollars of all foreign currency-denominated securities held by the Fund. Exchange rates are influenced generally by the forces of supply and demand in the foreign currency markets and by numerous other political and economic events occurring outside the United States, many of which may be difficult, if not impossible, to predict.

Income from foreign securities will be received and realized in foreign currencies, and the Fund is required to compute and distribute income in U.S. dollars. Accordingly, a decline in the value of a particular foreign currency against the U.S. dollar occurring after the Fund's income has been earned and computed in U.S. dollars may require the Fund to liquidate portfolio securities to acquire sufficient U.S. dollars to make a distribution. Similarly, if the exchange rate declines between the time the Fund incurs expenses in U.S. dollars and the time such expenses are paid, the Fund may be required to liquidate additional foreign securities to purchase the U.S. dollars required to meet such expenses.

Emerging Market Securities. The Fund may invest in emerging market countries or developing countries as defined by the World Bank, International Financial Corporation or the Morgan Stanley Capital International (MSCI) emerging market indices or other comparable indices. Developing countries may impose restrictions on the Fund's ability to repatriate investment income or capital. Even where there is no outright restriction on repatriation of investment income or capital, the mechanics of repatriation may affect certain aspects of the operations of the Fund.

Some of the currencies in emerging markets have experienced devaluations relative to the U.S. dollar, and major adjustments have been made periodically in certain of such currencies. Certain developing countries face serious exchange constraints.

Governments of some developing countries exercise substantial influence over many aspects of the private sector. In some countries, the government owns or controls many companies. Therefore, government actions in the future could have a significant effect on economic conditions in developing countries, which could affect the private sector companies in which the Fund invests.

Foreign Currency Transactions. The Fund may conduct foreign currency exchange transactions either on a spot, i.e., cash, basis at the prevailing rate in the foreign exchange market or by entering

into a forward foreign currency contract. A forward foreign currency contract ("forward contract") involves an obligation to purchase or sell a specific amount of a specific currency at a future date, which may be any fixed number of days (usually less than one year) from the date of the contract agreed upon by the parties, at a price set at the time of the contract. Forward contracts are considered to be derivatives. The Fund enters into forward contracts in order to "lock in" the exchange rate between the currency it will deliver and the currency it will receive for the duration of the contract. In addition, the Fund may enter into forward contracts to hedge against risks arising from securities the Fund owns or anticipates purchasing or the U.S. dollar value of interest and dividends paid on those securities. The Fund will not have more than 10% of its total assets committed to forward contracts, or maintain a net exposure to forward contracts that would obligate the Fund to deliver an amount of foreign currency in excess of the value of the Fund's investment securities or other assets denominated in that currency.

If the Fund delivers the foreign currency at or before the settlement of a forward contract, it may be required to obtain the currency by selling some of the Fund's assets that are denominated in that specific currency. The Fund may close out a forward contract obligating it to purchase a foreign currency by selling an offsetting contract, in which case it will realize a gain or a loss.

Foreign currency transactions involve certain costs and risks. The Fund incurs foreign exchange expenses in converting assets from one currency to another. Forward contracts involve a risk of loss if the Advisor is inaccurate in predicting currency movements. The projection of short-term currency market movements is extremely difficult, and the successful execution of a short-term hedging strategy is highly uncertain. The precise matching of forward contract amounts and the value of the securities involved is generally not possible. Accordingly, it may be necessary for the Fund to purchase additional foreign currency if the market value of the security is less than the amount of the foreign currency the Fund is obligated to deliver under the forward contract and the decision is made to sell the security and deliver the foreign currency. The use of forward contracts as a hedging technique does not eliminate the fluctuation in the prices of the underlying securities the Fund owns or intends to acquire, but it fixes a rate of exchange in advance. Although forward contracts can reduce the risk of loss if the values of the hedged currencies decline, these instruments also limit the potential gain that might result from an increase in the value of the hedged currencies.

There is no systematic reporting of last sale information for foreign currencies, and there is no regulatory requirement that quotations available through dealers or other market sources be firm or revised on a timely basis. Quotation information available is generally representative of very large transactions in the interbank market. The interbank market in foreign currencies is a global around-the-clock market. Since foreign currency transactions occurring in the interbank market involve substantially larger amounts than those that may be involved in the use of foreign currency options, the Fund may be disadvantaged by having to deal in an odd lot market (generally consisting of transactions of less than \$1 million) for the underlying foreign currencies at prices that are less favorable than for round lots.

Depository Receipts. Global depository receipts ("GDRs") are negotiable certificates held in the bank of one country representing a specific number of shares of a stock traded on an exchange of another country. American Depository Receipts ("ADRs") are negotiable receipts issued by a U.S. bank or trust company that evidence ownership of securities in a foreign company which have been deposited with such bank or trust company's office or agent in a foreign country. Canadian depository receipts ("CDRs") are negotiable receipts issued by a Canadian bank or trust company

that evidence ownership of securities in a foreign company which have been deposited with such bank or trust company's office or agent in a foreign country. European depository receipts ("EDRs") are negotiable certificates held in the bank of one country representing a specific number of shares of a stock traded on an exchange of another country. Investing in GDRs, CDRs, EDRs and ADRs presents risks that may not be equal to the risk inherent in holding the equivalent shares of the same companies that are traded in the local markets even though the Fund will purchase, sell and be paid dividends on GDRs, CDRs, EDRs and ADRs in U.S. dollars. These risks include fluctuations in currency exchange rates, which are affected by international balances of payments and other economic and financial conditions; government intervention; speculation; and other factors. With respect to certain foreign countries, there is the possibility of expropriation or nationalization of assets, confiscatory taxation, political and social upheaval, and economic instability. The Fund may be required to pay foreign withholding or other taxes on certain GDRs, CDRs, EDRs or ADRs that it owns, but investors may or may not be able to deduct their prorata shares of such taxes in computing their taxable income, or take such shares as a credit against their U.S. federal income taxes. See "Federal Income Tax Matters." GDRs, CDRs, EDRs and ADRs may be sponsored by the foreign issuer or may be unsponsored. Unsponsored GDRs, CDRs, EDRs and ADRs are organized independently and without the cooperation of the foreign issuer of the underlying securities. Unsponsored GDRs, CDRs, EDRs and ADRs are offered by companies which are not prepared to meet either the reporting or accounting standards of the United States. While readily exchangeable with stock in local markets, unsponsored GDRs, CDRs, EDRs and ADRs may be less liquid than sponsored GDRs, CDRs, EDRs and ADRs. Additionally, there generally is less publicly available information with respect to unsponsored GDRs, CDRs, EDRs and ADRs.

Strategic Transactions

The Fund may, but is not required to, use various investment strategies as described below ("Strategic Transactions") to earn income, to facilitate portfolio management and to mitigate risks. Techniques and instruments may change over time as new instruments and strategies are developed or as regulatory changes occur. Although the Advisor, as applicable, seeks to use such transactions to further the Fund's investment objective, no assurance can be given that the use of these transactions will achieve this result. The Fund's activities involving Strategic Transactions may be limited by the requirements of the Internal Revenue Code of 1986, as amended (the "Internal Revenue Code" or "Code"), for qualification as a regulated investment company.

Short Sales. A short sale is a transaction in which the Fund sells a security it does not own in anticipation that the market price of that security will decline. If the price of the security sold short increases between the time of the short sale and the time the Fund replaces the borrowed security, the Fund will incur a loss; conversely, if the price declines, the Fund will realize a capital gain. Any gain will be decreased, and any loss will be increased, by the transaction costs incurred by the Fund, including the costs associated with providing collateral to the broker-dealer (usually cash and liquid securities) and the maintenance of collateral with its custodian. Although the Fund's gain is limited to the price at which it sold the security short, its potential loss is theoretically unlimited.

When the Advisor believes that the price of a particular security held by the Fund may decline, it may make short sales "against the box" to hedge the unrealized gain on such security. Selling short

against the box involves selling a security which the Fund owns for delivery at a specified date in the future.

To the extent the Fund sells securities short, it will provide collateral to the broker-dealer and (except in the case of short sales “against the box”) will maintain additional asset coverage in the form of liquid assets with its custodian in a segregated account in an amount at least equal to the difference between the current market value of the securities sold short and any amounts required to be deposited as collateral with the selling broker (not including the proceeds of the short sale).

Selling Call and Put Options. The principal reason for selling options is to obtain, through receipt of premiums, a greater current return than would be realized on the underlying securities alone. Such current return could be expected to fluctuate because premiums earned from an option selling program and dividend or interest income yields on portfolio securities vary as economic and market conditions change. Selling options on portfolio securities is likely to result in a higher portfolio turnover rate.

The purchaser of a call option pays a premium to the seller (i.e., the writer) for the right to buy the underlying security from the seller at a specified price during a certain period. The Fund would write call options only on a covered basis or for cross-hedging purposes. A call option is covered if, at all times during the option period, the Fund owns or has the right to acquire the securities of the type that it would be obligated to deliver if any outstanding option were exercised. An option is used for cross-hedging purposes if it is not covered by the security subject to the option, but is designed to provide a hedge against another security which the Fund owns or has the right to acquire. In such circumstances, the Fund collateralizes the option by segregating cash and/or liquid securities in an amount at least equal to the market value of the underlying security, marked to market daily, while the option is outstanding.

The purchaser of a put option pays a premium to the seller (i.e., the writer) for the right to sell the underlying security to the writer at a specified price during a certain period. The Fund would sell put options only on a secured basis, which means that, at all times during the option period, the Fund would segregate cash and/or liquid securities in an amount at least equal to the exercise price of the option, or would hold a put on the same underlying security at an equal or greater exercise price.

To terminate its position as a writer of a call or put option, the Fund could enter into a "closing purchase transaction," which is the purchase of a call (put) on the same underlying security and having the same exercise price and expiration date as the call (put) previously sold by the Fund. The Fund would realize a gain (loss) if the premium plus commission paid in the closing purchase transaction is less (greater) than the premium it received on the sale of the option. The Fund would also realize a gain if an option it has written lapses unexercised.

The Fund could sell options that are listed on an exchange as well as options which are privately negotiated in over-the-counter transactions. The Fund could close out its position as a seller of an option only if a liquid secondary market exists for options of that series, but there is no assurance that such a market will exist, particularly in the case of over-the-counter options, since they can be closed out only with the other party to the transaction. Alternatively, the Fund could purchase an offsetting option, which would not close out its position as a seller, but would provide an asset of equal value to its obligation under the option sold. If the Fund is not able to enter into a closing

purchase transaction or to purchase an offsetting option with respect to an option it has sold, it will be required to maintain the securities subject to the call or the collateral securing the option until a closing purchase transaction can be entered into (or the option is exercised or expires) even though it might not be advantageous to do so. The staff of the SEC currently takes the position that, in general, over-the-counter options on securities other than U.S. government securities purchased by a fund, and portfolio securities "covering" the amount of such fund's obligation pursuant to an over-the-counter option sold by it (the cost of the sell-back plus the in-the-money amount, if any) are illiquid. Therefore any such options in which the Fund invests are subject to the Fund's limitation on illiquid securities described herein.

Risks of Writing Options. By selling a call option, the Fund loses the potential for gain on the underlying security above the exercise price while the option is outstanding; by selling a put option the Fund might become obligated to purchase the underlying security at an exercise price that exceeds the then current market price.

Purchasing Call or Put Options. The Fund could purchase call options to protect against anticipated increases in the prices of securities it wishes to acquire. Alternatively, the Fund could purchase call options for capital appreciation. Since the premium paid for a call option is typically a small fraction of the price of the underlying security, a given amount of cash will purchase call options covering a much larger quantity of such security than could be purchased directly. By purchasing call options, the Fund could benefit from any significant increase in the price of the underlying security to a greater extent than had it invested the same amount in the security directly. However, because of the very high volatility of option premiums, the Fund would bear a significant risk of losing the entire premium if the price of the underlying security did not rise sufficiently, or if it did not do so before the option expired.

Put options may be purchased to protect against anticipated declines in the market value of either specific portfolio securities or of the Fund's assets generally. Alternatively, put options may be purchased for capital appreciation in anticipation of a price decline in the underlying security and a corresponding increase in the value of the put option. The purchase of put options for capital appreciation involves the same significant risk of loss as described above for call options.

In any case, the purchase of options for capital appreciation would increase the Fund's volatility by increasing the impact of changes in the market price of the underlying securities on the Fund's net asset value per share ("NAV").

Options on Stock Indices. Options on stock indices are similar to options on stock, but the delivery requirements are different. Instead of giving the right to take or make delivery of stock at a specified price, an option on a stock index gives the holder the right to receive an amount of cash which amount will depend upon the closing level of the stock index upon which the option is based being greater than (in the case of a call) or less than (in the case of a put) the exercise price of the option. The amount of cash received will be the difference between the closing price of the index and the exercise price of the option, multiplied by a specified dollar multiple. The writer of the option is obligated, in return for the premium received, to make delivery of this amount.

Some stock index options are based on a broad market index such as the Standard & Poor's 500 or the New York Stock Exchange Composite Index, or a narrower index such as the Standard & Poor's

100. Indices are also based on an industry or market segment such as the AMEX Oil and Gas Index or the Computer and Business Equipment Index. A stock index fluctuates with changes in the market values of the stocks included in the index. Options are currently traded on several exchanges.

Gain or loss to the Fund on transactions in stock index options will depend on price movements in the stock market generally (or in a particular industry or segment of the market) rather than price movements of individual securities. As with stock options, the Fund may offset its position in stock index options prior to expiration by entering into a closing transaction, or it may let the option expire unexercised.

Futures Contracts. The Fund may engage in transactions involving futures contracts and options on futures contracts in accordance with the rules and interpretations of the Commodity Futures Trading Commission ("CFTC") under which the Fund would be exempt from registration as a "commodity pool."

An index futures contract is an agreement pursuant to which a party agrees to take or make delivery of an amount of cash equal to a specified dollar amount multiplied by the difference between the index value at a specified time and the price at which the futures contract originally was struck. No physical delivery of the underlying securities in the index is made.

Currently, securities index futures contracts can be purchased with respect to several indices on various exchanges. Differences in the securities included in the indices may result in differences in correlation of the futures contracts with movements in the value of the securities being hedged.

In contrast to the purchase or sale of a security, no price is paid or received upon the purchase or sale of a futures contract. Initially, the Fund is required to deposit an amount of cash and/or liquid securities equal to a percentage (which will normally range between 1% and 10%) of the contract amount with either a futures commission merchant pursuant to rules and regulations promulgated under the Investment Company Act of 1940, as amended (the "1940 Act") or with its custodian in an account in the broker's name. This amount is known as initial margin. The nature of initial margin in futures contract transactions is different from that of margin in security transactions in that futures contract margin does not involve the borrowing of funds by the customer to finance the transaction. Rather, the initial margin is in the nature of a performance bond or good faith deposit on the contract, which is returned to the Fund upon termination of the futures contract and satisfaction of its contractual obligations. Subsequent payments to and from the initial margin account, called variation margin, are made on a daily basis as the price of the underlying securities or index fluctuates, making the long and short positions in the futures contract more or less valuable, a process known as marking to market.

For example, when the Fund purchases a futures contract and the price of the underlying security or index rises, that position increases in value, and the Fund receives a variation margin payment equal to that increase in value. Conversely, where the Fund purchases a futures contract and the value of the underlying security or index declines, the position is less valuable, and the Fund is required to make a variation margin payment.

At any time prior to expiration of the futures contract, the Fund may elect to terminate the position by taking an opposite position. A final determination of variation margin is then made, additional cash is required to be paid by or released to the Fund, and the Fund realizes a loss or a gain.

When the Fund anticipates a significant market or market sector advance, the purchase of a futures contract affords a hedge against not participating in the advance at a time when the Fund is otherwise fully invested ("anticipatory hedge"). Such purchase of a futures contract would serve as a temporary substitute for the purchase of individual securities, which may be purchased in an orderly fashion once the market has stabilized. As individual securities are purchased, an equivalent amount of futures contracts could be terminated by offsetting sales. The Fund may sell futures contracts in anticipation of or in a general market or market sector decline that may adversely affect the market value of the Fund's securities ("defensive hedge"). To the extent that the Fund's portfolio of securities changes in value in correlation with the underlying security or index, the sale of futures contracts would substantially reduce the risk to the Fund of a market decline and, by so doing, provides an alternative to the liquidation of securities positions in the Fund. Ordinarily, transaction costs associated with futures contract transactions are lower than transaction costs that would be incurred in the purchase and sale of the underlying securities.

Special Risks Associated with Futures Contract Transactions. There are several risks connected with the use of futures contracts. These include the risk of imperfect correlation between movements in the price of the futures contracts and of the underlying securities or index; the risk of market distortion; the risk of illiquidity; and the risk of error in anticipating price movement.

There may be an imperfect correlation (or no correlation) between movements in the price of the futures contracts and of the securities being hedged. The risk of imperfect correlation increases as the composition of the securities being hedged diverges from the securities upon which the futures contract is based. If the price of the futures contract moves less than the price of the securities being hedged, the hedge will not be fully effective. To compensate for the imperfect correlation, the Fund could buy or sell futures contracts in a greater dollar amount than the dollar amount of securities being hedged if the historical volatility of the securities being hedged is greater than the historical volatility of the securities underlying the futures contract. Conversely, the Fund could buy or sell futures contracts in a lesser dollar amount than the dollar amount of securities being hedged if the historical volatility of the securities being hedged is less than the historical volatility of the securities underlying the futures contracts. It is also possible that the value of futures contracts held by the Fund could decline at the same time as portfolio securities being hedged; if this occurred, the Fund would lose money on the futures contract in addition to suffering a decline in value in the portfolio securities being hedged.

There is also the risk that the price of futures contracts may not correlate perfectly with movements in the securities or index underlying the futures contract due to certain market distortions. First, all participants in the futures contract market are subject to margin depository and maintenance requirements. Rather than meet additional margin depository requirements, investors may close futures contracts through offsetting transactions, which could distort the normal relationship between the futures contract market and the securities or index underlying the futures contract. Second, from the point of view of speculators, the deposit requirements in the futures contract market are less onerous than margin requirements in the securities markets. Therefore, increased participation by speculators in the futures contract markets may cause temporary price distortions.

Due to the possibility of price distortion in the futures contract markets and because of the imperfect correlation between movements in futures contracts and movements in the securities underlying them, a correct forecast of general market trends by the Advisor may still not result in a successful hedging transaction.

There is also the risk that futures contract markets may not be sufficiently liquid. Futures contracts may be closed out only on an exchange or board of trade that provides a market for such futures contracts. Although the Fund intends to purchase or sell futures contracts only on exchanges and boards of trade where there appears to be an active secondary market, there can be no assurance that an active secondary market will exist for any particular contract or at any particular time. In the event of such illiquidity, it might not be possible to close a futures contract position and, in the event of adverse price movement, the Fund would continue to be required to make daily payments of variation margin. Since the securities being hedged would not be sold until the related futures contract is sold, an increase, if any, in the price of the securities may to some extent offset losses on the related futures contract. In such event, the Fund would lose the benefit of the appreciation in value of the securities.

Successful use of futures contracts is also subject to the Advisor's ability to correctly predict the direction of movements in the market. For example, if the Fund hedges against a decline in the market, and market prices instead advance, the Fund will lose part or all of the benefit of the increase in value of its securities holdings because it will have offsetting losses in futures contracts. In such cases, if the Fund has insufficient cash, it may have to sell portfolio securities at a time when it is disadvantageous to do so to meet the daily variation margin.

Although the Fund intends to enter into futures contracts only if there is an active market for such contracts, there is no assurance that an active market will exist for the contracts at any particular time. Most U.S. futures contract exchanges and boards of trade limit the amount of fluctuation permitted in futures contract prices during a single trading day. Once the daily limit has been reached in a particular contract, no trades may be made that day at a price beyond that limit. It is possible that futures contract prices would move to the daily limit for several consecutive trading days with little or no trading, thereby preventing prompt liquidation of futures contract positions and subjecting some futures contract traders to substantial losses. In such event, and in the event of adverse price movements, the Fund would be required to make daily cash payments of variation margin. In such circumstances, an increase in the value of the portion of the portfolio being hedged, if any, may partially or completely offset losses on the futures contract. However, there is no guarantee that the price of the securities being hedged will, in fact, correlate with the price movements in a futures contract and thus provide an offset to losses on the futures contract.

Options on Futures Contracts. The Fund may also purchase and write options on futures contracts. An option on a futures contract gives the purchaser the right, in return for the premium paid, to assume a position in a futures contract (a long position if the option is a call and a short position if the option is a put) at a specified exercise price at any time during the option period. As a writer of an option on a futures contract, the Fund would be subject to initial margin and maintenance requirements similar to those applicable to futures contracts. In addition, net option premiums received by the Fund are required to be included as initial margin deposits. When an option on a futures contract is exercised, delivery of the futures contract position is accompanied by cash representing the difference between the current market price of the futures contract and the

exercise price of the option. The Fund could purchase put options on futures contracts in lieu of, and for the same purposes as, the sale of a futures contract; at the same time, it could write put options at a lower strike price (a "put bear spread") to offset part of the cost of the strategy to the Fund. The purchase of call options on futures contracts is intended to serve the same purpose as the actual purchase of the futures contracts.

Risks of Transactions in Options on Futures Contracts. In addition to the risks described above which apply to all options transactions, there are several special risks relating to options on futures contracts. The Advisor will not purchase options on futures contracts on any exchange unless in the Advisor's opinion a liquid secondary exchange market for such options exists. Compared to the use of futures contracts, the purchase of options on futures contracts involves less potential risk to the Fund because the maximum amount at risk is the premium paid for the options (plus transaction costs). However, there may be circumstances, such as when there is no movement in the price of the underlying security or index, when the use of an option on a future contract would result in a loss to the Fund when the use of a future contract would not.

Additional Risks of Options, Futures Contracts and Options on Futures Contracts. Each of the exchanges has established limitations governing the maximum number of call or put options on the same underlying security or futures contract (whether or not covered) which may be written by a single investor, whether acting alone or in concert with others (regardless of whether such options are written on the same or different exchanges or are held or written on one or more accounts or through one or more brokers). An exchange may order the liquidation of positions found to be in violation of these limits and it may impose other sanctions or restrictions. These position limits may restrict the number of listed options which the Fund may write.

In the event of the bankruptcy of a broker through which the Fund engages in transactions in options, futures contracts or options on futures contracts, the Fund could experience delays or losses in liquidating open positions purchased or incur a loss of all or part of its margin deposits. Transactions are entered into by the Fund only with brokers or financial institutions deemed creditworthy by the Advisor.

Recent legislation calls for new regulation of the derivatives markets. The extent and impact of the regulation is not yet fully known and may not be for some time. Any new regulations could adversely affect the value, availability and performance of derivative instruments, may make them more costly, and may limit or restrict their use by the Fund.

Swap Agreements. A swap is a derivative financial instrument that typically involves the exchange of cash flows between two parties on specified dates (settlement dates), where the cash flows are based on agreed-upon prices, rates, indices, etc. Swaps are individually negotiated and structured to include exposure to a variety of different types of investments or market factors. The Fund may enter into swap agreements with respect to individual securities, indices of securities, interest rates, currencies and other assets or measures of risk or return. The Fund may also enter into options on swap agreements ("swaptions"). These transactions are entered into in an attempt to obtain a particular return when it is considered desirable to do so, possibly at a lower cost to the Fund than if the Fund had invested directly in an instrument that yielded that desired return.

Swap agreements are two-party contracts entered into primarily by institutional investors for periods ranging from a few weeks to more than one year. In a standard "swap" transaction, two parties agree to exchange the returns (or differentials in rates of return) earned or realized on particular predetermined investments or instruments, which may be adjusted for an interest factor. The gross returns to be exchanged or "swapped" between the parties are generally calculated with respect to a "notional amount," i.e., the return on or increase in value of a particular dollar amount invested at a particular interest rate or in a "basket" of securities representing a particular index. Forms of swap agreements include caps, under which, in return for a premium, one party agrees to make payments to the other to the extent that, for example, the return on a given equity index exceeds a specified rate, or "cap"; floors, under which, in return for a premium, one party agrees to make payments to the other to the extent that, for example, the return on a given equity index falls below a specified rate, or "floor"; and collars, under which a party sells a cap and purchases a floor or vice versa in an attempt to protect itself against movements exceeding given minimum or maximum levels. A swaption is a contract that gives a counterparty the right (but not the obligation) to enter into a new swap agreement or to shorten, extend, cancel or otherwise modify an existing swap agreement, at some designated future time on specified terms. The Fund may write (sell) and purchase put and call swaptions.

Many swap agreements entered into by the Fund would calculate the obligations of the parties to the agreement on a "net basis." Consequently, the Fund's current obligations (or rights) under a swap agreement will generally be equal only to the net amount to be paid or received under the agreement based on the relative values of the positions held by each party to the agreement (the "net amount"). The Fund's current obligations under a swap agreement will be accrued daily (offset against any amounts owed to the Fund). Although it has no current intention to do so, the Fund may use swap agreements to add leverage to the portfolio. The Fund may (but is not required to) cover any accrued but unpaid net amounts owed to a swap counterparty through the segregation of assets determined to be liquid by the Fund in accordance with procedures established by the Trust's Board of Trustees (the "Board"). Obligations under swap agreements so covered will not be construed to be "senior securities" for purposes of the Fund's investment restriction concerning senior securities and borrowings.

Whether the Fund's use of swap agreements or swaptions will be successful in furthering its investment objectives will depend to a large extent on the Advisor's ability to predict correctly whether certain types of investments are likely to produce greater returns than other investments. Because they are two-party contracts and because they may have terms of greater than seven days, swap agreements may be considered to be illiquid. Moreover, the Fund bears the risk of loss of the amount expected to be received under a swap agreement in the event of the default or bankruptcy of a swap agreement counterparty. If a counterparty's creditworthiness declined, the value of a swap agreement would be likely to decline, potentially resulting in losses. The performance of swap agreements may be affected by a change in the specific currency, or by other factors that determine the amount of payments due. If a swap agreement calls for a payment by the Fund, the Fund must be prepared to make such payments when due.

The swaps market is largely unregulated. The Fund's ability to terminate or transfer a swap agreement is generally very limited. Swap agreements may increase the overall volatility of the investments of the Fund. It is possible that developments in the swaps market, including potential government regulation, could adversely affect the Fund's ability to terminate existing swap agreements or to realize amounts to be received under such agreements.

Use of Segregated and other Special Accounts. Many Strategic Transactions, in addition to other requirements, require that the Fund segregate cash and/or liquid securities to the extent Fund obligations are not otherwise "covered" as described above. In general, either the full amount of any obligation by the Fund to pay or deliver securities or assets must be covered at all times by the securities, instruments or currency required to be delivered (or securities convertible into the needed securities without additional consideration), or, subject to any regulatory restrictions, the Fund must segregate cash and/or liquid securities in an amount at least equal to the current amount of the obligation. The segregated assets cannot be sold or transferred unless equivalent assets are substituted in their place or it is no longer necessary to segregate them. In the case of a futures contract or an option on a futures contract, the Fund must deposit initial margin and possible daily variation margin in addition to segregating cash and/or liquid securities sufficient to meet its obligation to purchase or provide securities or currencies, or to pay the amount owed at the expiration of an index-based futures contract. Strategic Transactions may be covered by other means when consistent with applicable regulatory policies.

Certain Other Investment Practices

When Issued, Delayed Delivery Securities and Forward Commitments. The Fund may enter into forward commitments for the purchase or sale of securities, including on a "when issued" or "delayed delivery" basis, in excess of customary settlement periods for the type of security involved. In some cases, a forward commitment may be conditioned upon the occurrence of a subsequent event, such as approval and consummation of a merger, corporate reorganization or debt restructuring, (i.e., a when, as and if issued security). When such transactions are negotiated, the price is fixed at the time of the commitment, with payment and delivery taking place in the future, generally a month or more after the date of the commitment. At the time the Fund makes the commitment to purchase a security in a delayed-delivery transaction, it will record the transaction and reflect the value of the security in determining its NAV. While it will only enter into a forward commitment with the intention of actually acquiring the security, the Fund may sell the security before the settlement date if it is deemed advisable.

Securities purchased under a forward commitment are subject to market fluctuation, and no interest (or dividends) accrues to the Fund prior to the settlement date. The Fund will segregate with its custodian cash or liquid securities in an aggregate amount at least equal to the amount of its outstanding forward commitments.

Repurchase Agreements. Repurchase agreements may be seen as loans by the Fund collateralized by underlying debt securities. Under the terms of a typical repurchase agreement, the Fund would acquire an underlying debt obligation for a relatively short period (usually not more than one week) subject to an obligation of the seller to repurchase, and the Fund to resell, the obligation at an agreed price and time. This arrangement results in a fixed rate of return to the Fund that is not subject to market fluctuations during the holding period. The Fund bears a risk of loss in the event that the other party to a repurchase agreement defaults on its obligations and the Fund is delayed in or prevented from exercising its rights to dispose of the collateral securities, including the risk of a possible decline in the value of the underlying securities during the period in which it seeks to assert these rights. The Advisor, acting under the supervision of the Board, reviews the creditworthiness of those banks and dealers with which the Fund enters into repurchase agreements to evaluate these

risks and monitors on an ongoing basis the value of the securities subject to repurchase agreements to ensure that the value is maintained at the required level.

Investment Company Securities. The Fund may invest in shares of other open-end and closed-end investment companies (each, an “Underlying Fund”), including affiliated funds and exchange-traded funds (“ETFs”), to the extent permitted by applicable law and subject to certain restrictions set forth in this SAI. Generally, under the 1940 Act, and SEC rules adopted pursuant to the 1940 Act, the Fund’s acquisition of the securities of affiliated and unaffiliated funds is subject to the following guidelines and restrictions:

- The Fund may own an unlimited amount of any affiliated fund’s voting securities.
- The Fund and its “affiliated persons” may own no more than 3% of an unaffiliated fund’s voting securities, subject to the following restrictions:
 - the Fund and the Underlying Fund, in the aggregate, may not charge a sales load greater than the limits set forth in Rule 2830(d)(3) of the Conduct Rules of the Financial Industry Regulatory Authority (“FINRA”) applicable to funds of funds;
 - the Underlying Fund is not obligated to redeem more than 1% of its total outstanding securities during any period less than 30 days; and
 - the purchase or acquisition of the Underlying Fund is made pursuant to an arrangement with the Underlying Fund or its principal underwriter whereby the Fund is obligated either to (i) seek instructions from its shareholders with regard to the voting of all proxies with respect to the Underlying Fund and to vote in accordance with such instructions, or (ii) to vote the shares of the Underlying Fund held by the Fund in the same proportion as the vote of all other shareholders of the Underlying Fund.
- Any Underlying Fund must have a policy that prohibits it from acquiring any securities of registered open-end funds or registered unit investment trusts in reliance on certain sections of the 1940 Act.

Acquired funds typically incur fees that are separate from those fees incurred directly by the Fund. The Fund’s purchase of such investment company securities results in the layering of expenses as Fund shareholders would indirectly bear a proportionate share of the operating expenses of such investment companies, including advisory fees, in addition to paying Fund expenses.

Under certain circumstances an open-end investment company in which the Fund invests may determine to make payment of a redemption by the Fund wholly or in part by a distribution in kind of securities from its portfolio, instead of in cash. As a result, the Fund may hold such securities until the Advisor determines it is appropriate to dispose of them. Such disposition will impose additional costs on the Fund.

The Fund expects that its investments in underlying funds will primarily be in ETFs. Investment decisions by the investment advisors to the registered investment companies in which the Fund invests are made independently of the Fund. At any particular time, one Underlying Fund may be purchasing shares of an issuer whose shares are being sold by another Underlying Fund. As a result,

under these circumstances the Fund indirectly would incur certain transactional costs without accomplishing any investment purpose.

Illiquid and Restricted Securities. The Fund may invest in illiquid securities (i.e., securities that are not readily marketable). For purposes of this restriction, illiquid securities include, but are not limited to, restricted securities (securities the disposition of which is restricted under the federal securities laws), securities that may only be resold pursuant to Rule 144A under the Securities Act of 1933, as amended (the "Securities Act"), but that are deemed to be illiquid; and repurchase agreements with maturities in excess of seven days. However, the Fund will not acquire illiquid securities if, as a result, such securities would comprise more than 15% of the value of the Fund's net assets. The Board or its delegate has the ultimate authority to determine, to the extent permissible under the federal securities laws, which securities are liquid or illiquid for purposes of this 15% limitation. The Board has delegated to the Advisor the day-to-day determination of the illiquidity of any security held by the Fund, although the Board has retained oversight and ultimate responsibility for such determinations. Although no definitive liquidity criteria are used, the Board has directed the Advisor to look to such factors as (a) frequency of trading and availability of quotations; (b) the number of dealers willing to purchase or sell the security and the availability of buyers; (c) the willingness of dealers to be market makers in the security; and (d) the nature of trading activity including (i) the time needed to dispose of a position or part of a position and (ii) offer and solicitation methods.

Restricted securities may be sold only in privately negotiated transactions or in a public offering with respect to which a registration statement is in effect under the Securities Act. Where registration is required, the Fund may be obligated to pay all or part of the registration expenses and a considerable period may elapse between the time of the decision to sell and the time the Fund may be permitted to sell a security under an effective registration statement. If, during such a period, adverse market conditions were to develop, the Fund might obtain a less favorable price than that which prevailed when it decided to sell.

Illiquid securities will usually be priced at fair value as determined in good faith by the Board or its delegate. If, through the appreciation of illiquid securities or the depreciation of liquid securities, the Fund should be in a position where more than 15% of the value of its net assets is invested in illiquid securities, including restricted securities which are not readily marketable, the Fund will take such steps as is deemed advisable, if any, to protect liquidity.

Loans of Portfolio Securities. Consistent with applicable regulatory requirements and the Fund's investment restrictions, the Fund may lend portfolio securities to securities broker-dealers or financial institutions, provided that such loans are callable at any time by the Fund (subject to notice provisions described below), and are at all times secured by cash or cash equivalents, which are maintained in a segregated account pursuant to applicable regulations and that are at least equal to the market value, determined daily, of the loaned securities. The advantage of such loans is that the Fund continues to receive the income on the loaned securities while at the same time earns interest on the cash amounts deposited as collateral, which will be invested in short-term obligations. The Fund will not lend portfolio securities if such loans are not permitted by the laws or regulations of any state in which its shares are qualified for sale. The Fund's loans of portfolio securities will be collateralized in accordance with applicable regulatory requirements and no loan will cause the value of all loaned securities to exceed 33 1/3% of the value of the Fund's total assets.

A loan may generally be terminated by the borrower on one business day's notice, or by the Fund on five business days' notice. If the borrower fails to deliver the loaned securities within five days after receipt of notice or fails to maintain the requisite amount of collateral, the Fund could use the collateral to replace the securities while holding the borrower liable for any excess of replacement cost over collateral. As with any extensions of credit, there are risks of delay in recovery and in some cases even loss of rights in the collateral should the borrower of the securities fail financially. However, these loans of portfolio securities will only be made to firms deemed by the Fund's management to be creditworthy and when the income that can be earned from such loans justifies the attendant risks. Upon termination of the loan, the borrower is required to return the securities to the Fund. Any gain or loss in the market price during the loan period would inure to the Fund. The risks associated with loans of portfolio securities are substantially similar to those associated with repurchase agreements. Thus, if the counterparty to the loan petitions for bankruptcy or becomes subject to the United States Bankruptcy Code, the law regarding the rights of the Fund is unsettled. As a result, under extreme circumstances, there may be a restriction on the Fund's ability to sell the collateral, and the Fund would suffer a loss. When voting or consent rights that accompany loaned securities pass to the borrower, the Fund will follow the policy of calling the loaned securities, to be delivered within one day after notice, to permit the exercise of such rights if the matters involved would have a material effect on the Fund's investment in such loaned securities. The Fund will pay reasonable finder's, administrative and custodial fees in connection with a loan of its securities.

Temporary Defensive Investments

When a temporary defensive posture is believed by the Advisor to be warranted ("temporary defensive periods"), the Fund may, without limitation, hold up to 100% of its assets in cash or invest up to 100% of its assets in money market instruments and repurchase agreements. The money market instruments in which the Fund may invest are obligations of the U.S. government, its agencies or instrumentalities; commercial paper rated A-1 or higher by S&P or Prime-1 by Moody's; and certificates of deposit, bankers' acceptances and bank time deposits issued by domestic branches of U.S. banks that are members of the Federal Deposit Insurance Corporation. During temporary defensive periods, the Fund also may invest in shares of money market mutual funds to the extent permitted under applicable law. Money market mutual funds are investment companies, and the investments in those companies by the Fund are in some cases subject to certain fundamental investment restrictions. As a shareholder in a mutual fund, the Fund will bear its ratable share of its expenses, including management fees, and will remain subject to payment of the fees to the Advisor, with respect to assets so invested. The Fund may not achieve its investment objectives during temporary defensive periods.

Investment Restrictions

The Fund has adopted the following restrictions as fundamental policies, which may not be changed without the favorable vote of the holders of a "majority," as defined in the 1940 Act, of the outstanding voting securities of the Fund. Under the 1940 Act, the "vote of the holders of a majority of the outstanding voting securities" means the vote of the holders of the lesser of (i) 67% of the shares of the Fund represented at a meeting at which the holders of more than 50% of its outstanding shares are represented or (ii) more than 50% of the outstanding shares of the Fund. The Fund's investment objective is a non-fundamental policy and may be changed without shareholder approval.

The Fund may not:

1. Issue senior securities, borrow money or pledge its assets, except that (i) the Fund may borrow from banks in amounts not exceeding one-third of its net assets (including the amount borrowed); and (ii) this restriction shall not prohibit the Fund from engaging in options transactions or short sales and in investing in financial futures and reverse repurchase agreements.
2. Act as underwriter, except to the extent the Fund may be deemed to be an underwriter in connection with the sale of securities in its investment portfolio;
3. Invest 25% or more of its total assets, calculated at the time of purchase and taken at market value, in any one industry (other than U.S. Government securities);
4. Purchase or sell real estate or interests in real estate or real estate limited partnerships (although the Fund may purchase and sell securities which are secured by real estate and securities of companies which invest or deal in real estate such as real estate investment trust ("REITs");
5. Make loans of money, except (a) for purchases of debt securities consistent with the investment policies of the Fund, (b) by engaging in repurchase agreements or, (c) through the loan of portfolio securities in an amount up to 33 1/3% of the Fund's net assets; or
6. Purchase or sell commodities or commodity futures contracts (although the Fund may invest in financial futures and in companies involved in the production, extraction, or processing of agricultural, energy, base metals, precious metals, and other commodity-related products).

The Fund observes the following restriction as a matter of operating but not fundamental policy, pursuant to positions taken by federal regulatory authorities:

The Fund may not invest, in the aggregate, more than 15% of its net assets in securities with legal or contractual restrictions on resale, securities that are not readily marketable and repurchase agreements with more than seven days to maturity.

Except with respect to borrowing, if a percentage or rating restriction on investment or use of assets set forth herein or in the Prospectus is adhered to at the time a transaction is effected, later changes in percentage resulting from any cause other than actions by the Fund will not be considered a violation.

MANAGEMENT OF THE FUND

Trustees and Officers

The overall management of the business and affairs of the Trust is vested with its Board of Trustees. The Board approves all significant agreements between the Trust and persons or companies furnishing services to it, including the agreements with the Advisor, co-administrators, distributor, custodian and transfer agent. The day-to-day operations of the Trust are delegated to its officers,

except that the Advisor is responsible for making day-to-day investment decisions in accordance with the Fund's investment objective, strategies, and policies, all of which is subject to general supervision by the Board.

The Trustees and officers of the Trust, their years of birth and positions with the Trust, term of office with the Trust and length of time served, their business addresses and principal occupations during the past five years and other directorships held are listed in the table below. Unless noted otherwise, each person has held the position listed for a minimum of five years. Charles H. Miller, Ashley Toomey Rabun and William H. Young are all of the Trustees who are not "interested persons" of the Trust, as that term is defined in the 1940 Act (collectively, the "Independent Trustees").

| Name, Address, Year of Birth and Position(s) held with Trust | Term of Office ^c and Length of Time Served | Principal Occupation During the Past Five Years and Other Affiliations | Number of Portfolios in the Fund Complex Overseen by Trustee | Other Directorships Held During the Past Five Years by Trustee |
|---|---|--|--|--|
| "Independent" Trustees: | | | | |
| Charles H. Miller ^a (Born 1947) Trustee | Since November 2007 | Executive Vice President, Client Management and Development, Access Data Corporation, a Broadridge company, a provider of technology and services to asset management firms (1997-present). | 49 | None |
| Ashley Toomey Rabun ^a (born 1952) Trustee and Chairperson of the Board | Since November 2007 | President and Founder, InvestorReach, Inc. a financial services consulting firm (1996-present). | 49 | None |
| William H. Young ^a (born 1950) Trustee | Since November 2007 | Independent financial services consultant (1996-present); Consultant-Interim CEO, Unified Fund Services, Inc., a mutual fund service provider (2003-2006); Ex-officio Board Member of the National Investment Company Service Association and past President and Chairman (1995-1997); Senior Vice President, Oppenheimer Management Company (1983-1996). | 49 | None |
| Interested Trustees: | | | | |
| John P. Zader ^{a†} (born 1961) Trustee and President | Since November 2007 as Trustee and December 2007 as President | CEO, UMB Fund Services, Inc., a mutual and hedge fund service provider, and the transfer agent, fund accountant, and co-administrator for the Fund, and affiliate of the Fund's distributor and custodian (2006-present); Consultant to Jefferson Wells International, a provider of professional services for multiple industries, including financial services organizations (2006); Senior Vice President and Chief Financial Officer, U.S. Bancorp Fund Services, LLC, a mutual and hedge fund service provider (1988-2006). | 49 | None |
| Eric M. Banhazl ^{b†} | Since January | President, Mutual Fund Administration Corp. | 49 | Advisors Series |

| Name, Address, Year of Birth and Position(s) held with Trust | Term of Office^c and Length of Time Served | Principal Occupation During the Past Five Years and Other Affiliations | Number of Portfolios in the Fund Complex Overseen by Trustee | Other Directorships Held During the Past Five Years by Trustee |

(2004 – 2007); Partner, The Academy of Financial Services Studies and Precision Marketing Partners (1998 - 2004); Senior Vice President, Chief Financial Officer and Treasurer of AAL Capital Management and The AAL Mutual Funds (1987 - 1998). | N/A | N/A |
| Robert Tuszynski ^a (born 1959) Vice President | Since March 2010 | Senior Vice President, Director of Distribution Services, UMB Fund Services, Inc. (2008 – present); Vice President and CCO, CUNA Mutual Fund Group (2004 – 2008). | N/A | N/A |
| Todd Cipperman ^b (born 1966) Chief Compliance Officer (“CCO”) | Since December 2009 | Founder and Principal, Cipperman & Company/Cipperman Compliance Services (2004 – present). | N/A | N/A |

a Address for certain Trustees and certain officers: 803 West Michigan Street, Milwaukee, WI 53233-2301.

b Address for Mr. Banhazl, Ms. Ausili and Ms. Dam: 2220 E. Route 66, Suite 226, Glendora, CA 91740. Address for Mr. Cipperman: 500 Swedesford Road, Suite 104, Wayne, PA 19087.

c Trustees and officers serve until their successors have been duly elected.

† Mr. Zader is an “interested person” of the Trust by virtue of his position with the Fund’s distributor, Grand Distribution Services, LLC and its affiliates, UMB Fund Services, Inc., the transfer agent, fund accountant and co-administrator of the Fund, and the Fund’s custodian, UMB Bank, n.a. Mr. Banhazl is deemed to be an “interested person” of the Trust by virtue of his position with Mutual Fund Administration Corp., the Fund’s co-administrator.

Compensation

Each Independent Trustee receives from the Trust a quarterly retainer of \$10,000, \$5,000 for each regular meeting attended and \$2,500 for each special in-person meeting attended. In addition, Ms. Rabun receives an additional annual retainer of \$12,000 for serving as Chairperson of the Board, each of Mr. Young and Mr. Miller receives an additional annual retainer of \$8,000 for serving as Audit Committee Chair and Valuation Committee Chair, respectively, and Mr. Young receives an additional annual retainer of \$4,000 for serving as Derivatives Risk Oversight Committee Chair. The Trust has no pension or retirement plan. No other entity affiliated with the Trust pays any compensation to the Trustees.

| Name of Person/Position | Aggregate Compensation From the Fund ¹ | Pension or Retirement Benefits Accrued as Part of Fund's Expenses | Estimated Annual Benefits Upon Retirement | Total Compensation from Trust (37 funds) Paid to Trustees ¹ |
|---|---|---|---|--|
| Independent Trustees | | | | |
| Charles H. Miller, Trustee | \$1,551 | None | None | \$52,500 |
| Ashley Toomey Rabun, Trustee and Chairperson | \$1,605 | None | None | \$54,000 |
| William H. Young, Trustee and Audit Committee Chair | \$1,605 | None | None | \$54,000 |

¹ For the fiscal year ended May 31, 2012.

Mr. Zader and Mr. Banhazl are not compensated for their services as trustees because of their affiliation with the Trust.

Additional Information Concerning the Board and the Trustees

The current Trustees were selected in November 2007 (January 2008 for Mr. Banhazl) with a view towards establishing a Board that would have the broad experience needed to oversee a registered investment company comprised of multiple series employing a variety of different investment strategies. As a group, the Board has extensive experience in many different aspects of the financial services and asset management industries.

The Trustees were selected to join the Board based upon the following factors, among others: character and integrity; willingness to serve and willingness and ability to commit the time necessary to perform the duties of a Trustee; as to each Trustee other than Messrs. Banhazl and Zader, satisfying the criteria for not being classified as an “interested person” of the Trust as defined in the 1940 Act; and, as to Messrs. Banhazl and Zader, their positions with the Trust’s co-administrators. In addition, the Trustees have the following specific experience, qualifications, attributes and/or skills relevant to the operations of the Trust:

- Ms. Rabun has substantial senior executive experience in mutual fund marketing and distribution and serving in senior executive and board positions with mutual funds, including multiple series trusts similar to the Trust.

- Mr. Miller has significant senior executive experience with respect to marketing and distribution of mutual funds, including multiple series trusts similar to the Trust.
- Mr. Young has broad senior executive experience with respect to the operations and management of mutual funds and administrative service providers, including multiple series trusts similar to the Trust.
- Mr. Banhazl has significant experience serving in senior executive and board positions for mutual funds and with respect to the organization and operation of mutual funds and multiple series trusts similar to the Trust.
- Mr. Zader has substantial experience serving in senior executive positions at mutual fund administrative service providers.

In its periodic self-assessment of the effectiveness of the Board, the Board considers the complementary individual skills and experience of the individual Trustees primarily in the broader context of the Board's overall composition so that the Board, as a body, possesses the appropriate (and appropriately diverse) skills and experience to oversee the business of the series of the Trust. The summaries set forth above as to the qualifications, attributes and skills of the Trustees are required by the registration form adopted by the SEC, do not constitute holding out the Board or any Trustee as having any special expertise or experience, and do not impose any greater responsibility or liability on any such person or on the Board as a whole than would otherwise be the case.

The Board of Trustees has four standing committees: the Audit Committee, the Derivatives Risk Oversight Committee (the "Derivatives Committee"), the Nominating and Governance Committee (the "Nominating Committee"), and the Valuation Committee.

- The function of the Audit Committee, with respect to each series of the Trust, is to review the scope and results of the Trust's annual audit and any matters bearing on the audit or the Fund's financial statements and to assist the Board's oversight of the integrity of the Fund's pricing and financial reporting. The Audit Committee is comprised of all of the Independent Trustees and is chaired by Mr. Young. It does not include any Interested Trustees. The Audit Committee met twice during the fiscal year ended May 31, 2012 with respect to the Fund.
- The Audit Committee also serves as the Qualified Legal Compliance Committee ("QLCC") for the Trust for the purpose of compliance with Rules 205.2(k) and 205.3(c) of the Code of Federal Regulations regarding alternative reporting procedures for attorneys retained or employed by an issuer who appear and practice before the SEC on behalf of the issuer. The QLCC meets as needed. The QLCC did not meet during the fiscal year ended May 31, 2012.
- The Derivatives Committee reviews the types of investment in derivatives made by various series of the Trust. The Derivative Committee conducts meetings periodically in order to inform the Board of Trustees about various series' derivatives positions, related valuation issues and such other matters related to derivatives as the Committee shall determine. The Derivatives Committee is comprised of Messrs.

Young and Miller and is chaired by Mr. Young. The Derivatives Committee meets as needed and did not meet during the fiscal year ended May 31, 2012.

- The Nominating Committee is responsible for seeking and reviewing candidates for consideration as nominees for Trustees as it considers necessary from time to time and meets at least annually. The Nominating Committee will consider nominees properly recommended by the Trust's shareholders. Shareholders who wish to recommend a nominee should send nominations that include, among other things, biographical data and the qualifications of the proposed nominee to the Trust's Secretary. The Independent Trustees comprise the Nominating Committee, and the Committee is chaired by Mr. Miller. The Nominating Committee did not meet during the fiscal year ended May 31, 2012.
- The function of the Valuation Committee is to value securities held by any series of the Trust for which current and reliable market quotations are not readily available. Such securities are valued at their respective fair values as determined in good faith by the Valuation Committee and the actions of the Valuation Committee are subsequently reviewed by the Board. The Valuation Committee meets as needed. The Valuation Committee is comprised of all the Trustees and is chaired by Mr. Miller, but action may be taken by any one of the Trustees. The Valuation Committee met four times during the fiscal year ended May 31, 2012.

Independent Trustees comprise 60% of the Board and Ashley Toomey Rabun, an Independent Trustee, serves as Chairperson of the Board. The Chairperson serves as a key point person for dealings between the Trust's management and the other Independent Trustees. As noted above, through the committees of the Board the Independent Trustees consider and address important matters involving each series of the Trust, including those presenting conflicts or potential conflicts of interest. The Independent Trustees also regularly meet outside the presence of management and are advised by independent legal counsel. The Board has determined that its organization and leadership structure are appropriate in light of its fiduciary and oversight obligations, the special obligations of the Independent Trustees, and the relationship between the Interested Trustees and the Trust's co-administrators. The Board also believes that its structure facilitates the orderly and efficient flow of information to the Independent Trustees from management.

Consistent with its responsibility for oversight of the Fund in the interests of shareholders, the Board among other things oversees risk management of the Fund's investment programs and business affairs directly and through the Audit Committee. The Board has emphasized to the Advisor the importance of maintaining vigorous risk management programs and procedures.

The Fund faces a number of risks, such as investment risk, valuation risk, reputational risk, risk of operational failure or lack of business continuity, and legal, compliance and regulatory risk. Risk management seeks to identify and address risks, i.e., events or circumstances that could have material adverse effects on the business, operations, shareholder services, investment performance or reputation of the Fund. Under the overall supervision of the Board, the Advisor and other service providers to the Fund employ a variety of processes, procedures and controls to identify various of those possible events or circumstances, to lessen the probability of their occurrence and/or to mitigate the effects of such events or circumstances if they do occur. Different processes, procedures and controls are employed with respect to different types of risks. Various personnel,

including the Trust's CCO, the Advisor's management, and other service providers (such as the Fund's independent registered public accounting firm) make periodic reports to the Board or to the Audit Committee with respect to various aspects of risk management. The Board recognizes that not all risks that may affect the Fund can be identified, that it may not be practical or cost-effective to eliminate or mitigate certain risks, that it may be necessary to bear certain risks (such as investment-related risks) to achieve the Fund's investment objective, and that the processes, procedures and controls employed to address certain risks may be limited in their effectiveness. Moreover, reports received by the Trustees as to risk management matters are typically summaries of the relevant information. As a result of the foregoing and other factors, the Board's risk management oversight is subject to substantial limitations.

Fund Shares Beneficially Owned by Trustees. As of December 31, 2011, no Trustees, including the Independent Trustees, beneficially owned shares of the Fund.

Control Persons, Principal Shareholders, and Management Ownership

A principal shareholder is any person who owns of record or beneficially 5% or more of the outstanding shares of the Fund. A control person is one who owns beneficially or through controlled companies more than 25% of the voting securities of the Fund or acknowledges the existence of control of the Fund. To the best knowledge of the Trust, shareholders owning 5% or more of the outstanding shares of the Fund as of record are set forth below:

| Shareholder | Percentage of Total Outstanding Shares of the Fund as of September 1, 2012 |
|--|---|
| Charles Schwab & Co., Inc. 101 Montgomery Street San Francisco, CA 94104 | 25.34% |

As of September 1, 2012, none of the Trustees and officers of the Trust owned any shares of the Fund. Furthermore, neither the Independent Trustees, nor members of their immediate families, own securities beneficially or of record in the Advisor, the Fund's distributor, Grand Distribution Services, LLC (the "Distributor"), or any affiliate of the Advisor or Distributor.

The Advisor

Jubak Asset Management, LLC, located at 9 W. 57th Street, 26th Floor, New York, NY 10019, acts as investment advisor to the Fund pursuant to an Investment Advisory Agreement (the "Advisory Agreement"). The Advisor is owned by James Jubak and Tangent Advisors, LLC, a Delaware limited liability company. Tangent Advisors, LLC is owned and controlled by Robert E. Rice and William James Peet who also own and control Tangent Capital Partners, LLC, a registered broker-dealer. Subject to such policies as the Board of Trustees may determine, the Advisor is ultimately responsible for investment decisions for the Fund. Pursuant to the terms of the Advisory Agreement, the Advisor provides the Fund with such investment advice and supervision as it deems

necessary for the proper supervision of the Fund's investments. The Advisor also continuously monitors and maintains the Fund's investment criteria and determines from time to time what securities may be purchased by the Fund.

The Advisory Agreement will remain in effect for an initial two-year period. After the initial two-year period, the Advisory Agreement will continue in effect from year to year only if such continuance is specifically approved at least annually by the Board or by vote of a majority of the Fund's outstanding voting securities and by a majority of the Trustees who are not parties to the Advisory Agreement or interested persons of any such party, at a meeting called for the purpose of voting on the Advisory Agreement. The Advisory Agreement is terminable without penalty by the Trust on behalf of the Fund, upon giving the Advisor 60 days' notice when authorized either by a majority vote of the Fund's shareholders or by a vote of a majority of the Board, or by the Advisor on 60 days' written notice, and will automatically terminate in the event of its "assignment" (as defined in the 1940 Act). The Advisory Agreement provides that the Advisor under such agreement shall not be liable for any error of judgment or for any loss suffered by the Trust in connection with the Advisory Agreement, except for a loss resulting from a breach of fiduciary duty, or for a loss resulting from willful misfeasance, bad faith or gross negligence in the performance of its duties, or from reckless disregard by the Advisor of its duties under the Advisory Agreement.

In consideration of the services to be provided by the Advisor pursuant to the Advisory Agreement, the Advisor is entitled to receive from the Fund an investment advisory fee computed daily and paid monthly based on an annual rate equal to a percentage of the Fund's average daily net assets specified in the Prospectus.

The Fund is responsible for its own operating expenses. The Advisor has contractually agreed to reduce fees payable to it by the Fund and/or to pay Fund operating expenses to the extent necessary to limit the Fund's aggregate annual operating expenses (excluding taxes, leverage interest, brokerage commissions, dividend expenses on short sales, acquired fund fees and expenses as determined in accordance with Form N1-A, expenses incurred in connection with any merger or reorganization, or extraordinary expenses such as litigation expenses) to the limit set forth in the Expense Table in the Prospectus (the "expense cap"). Any such reductions made by the Advisor in its fees or payment of expenses which are the Fund's obligation are subject to reimbursement by the Fund to the Advisor, if so requested by the Advisor, in subsequent fiscal years if the aggregate amount actually paid by the Fund toward the operating expenses for such fiscal year (taking into account the reimbursement) does not exceed the applicable limitation on Fund expenses currently in effect and the applicable limitation in effect at the time of such fee waivers or expense reimbursement. The Advisor is permitted to be reimbursed only for fee reductions and expense payments made in the previous three fiscal years from the date the expense was incurred. Any such reimbursement is also contingent upon the Board's subsequent review and ratification of the reimbursed amounts. Such reimbursement may not be paid prior to the Fund's payment of current ordinary operating expenses.

The Fund paid the following advisory fees to the Advisor:

| | Advisory Fees Accrued | Advisory Fees Waived | Advisory Fee Retained |
|--|----------------------------------|---------------------------------|----------------------------------|
| For the fiscal year ended May 31, 2012 | \$ 386,374 | \$ 242,281 | \$ 144,093 |
| For the fiscal year ended May 31, 2011 | \$ 209,321 | \$ 209,321 | \$ 0 |

Portfolio Manager

James Jubak, Chief Investment Officer of the Advisor, serves as the portfolio manager responsible for the day-to-day management of the Fund.

Other Accounts Managed by the Portfolio Manager.

As of May 31, 2012, information on other accounts managed by Mr. Jubak is as follows.

| | | | <u>With Advisory Fee based on performance</u> | |
|---------------------------------|--------------------------------------|--------------------------------|--|--------------------------------|
| <u>Type of Accounts</u> | <u>Number of Accounts</u> | <u>Total Assets</u> | <u>Number of Accounts</u> | <u>Total Assets</u> |
| Registered Investment Companies | 0 | \$- | 0 | \$- |
| Other Pooled Investments | 0 | \$- | 0 | \$- |
| Other Accounts | 0 | \$- | 0 | \$- |

Material Conflict of Interest. Currently, the Advisor and the portfolio manager only manage the Fund and have no other investment clients. The Advisor therefore allocates all investment opportunities to the Fund. Should the Advisor decide in the future to offer and provide its services to more than one client, the Advisor will adopt procedures to ensure that allocations of investment opportunities are done in a fair and equitable basis for all clients.

Compensation. The portfolio manager does not receive a fixed salary. The portfolio manager owns 50% of the Advisor, and will therefore be entitled to 50% of its profits, with a preferential right to receive the first \$100,000 of profits in any given year.

Ownership of the Fund by Portfolio Manager

As of May 31, 2012, the portfolio manager owns equity securities of the Fund as follows:

| Name of Portfolio Manager | Dollar Range of Securities in the Fund (A: None, B: \$1-\$10,000, C: \$10,001-\$50,000, D: \$50,001-\$100,000, E: \$100,001 - \$500,000, F: \$500,001 - \$1,000,000, G: Over \$1,000,000) |
|--------------------------------------|--|
| James Jubak | E |

Service Providers

Pursuant to a Co-Administration Agreement (the “Co-Administration Agreement”), UMB Fund Services, Inc. (“UMBFS”), 803 W. Michigan Street, Milwaukee, Wisconsin 53233, and Mutual Fund Administration Corporation (“MFAC”), 2220 E. Route 66, Suite 226, Glendora, California 91740

(collectively the “Co-Administrators”), act as co-administrators for the Fund. The Co-Administrators provide certain administrative services to the Fund, including, among other responsibilities, coordinating the negotiation of contracts and fees with, and the monitoring of performance and billing of, the Fund’s independent contractors and agents; preparing for signature by an officer of the Trust of all documents required to be filed for compliance with applicable laws and regulations including those of the securities laws of various states; arranging for the computation of performance data, including net asset value and yield; arranging for the maintenance of books and records of the Fund; and providing, at their own expense, office facilities, equipment and personnel necessary to carry out their duties. In this capacity, the Co-Administrators do not have any responsibility or authority for the management of the Fund, the determination of investment policy, or for any matter pertaining to the distribution of Fund shares. The Co-Administration Agreement provides that neither Co-Administrator shall be liable for any error of judgment or mistake of law or for any loss suffered by the Trust or its series, except for losses resulting from a Co-Administrator's willful misfeasance, bad faith or negligence in the performance of its duties or from reckless disregard by it of its obligations and duties under the Agreement.

As compensation for their services, the Fund pays the Co-Administrators an administration fee payable monthly at the annual rate set forth below as a percentage of the Fund’s average daily net assets:

| <u>Net Assets</u> | <u>Rate</u> |
|---------------------|-------------|
| First \$150 million | 0.10% |
| Next \$100 million | 0.08% |
| Thereafter | 0.05% |

Set forth below is information about co-administration fees paid the Fund.

| | Co-Administration Fees |
|--|-------------------------------|
| For the fiscal year ended May 31, 2012 | \$41,358 |
| For the period June 30, 2010 (commencement of operations) through May 31, 2011 | \$32,520 |

UMBFS also acts as the Trust’s fund accountant, transfer agent and dividend disbursing agent pursuant to separate agreements.

UMB Bank, n.a. (the “Custodian”), an affiliate of UMBFS, is the custodian of the assets of the Fund pursuant to a custody agreement between the Custodian and the Trust, whereby the Custodian provides services for fees on a transactional basis plus out-of-pocket expenses. The Custodian’s address is 928 Grand Boulevard, Kansas City, Missouri 64106. The Custodian does not participate in decisions pertaining to the purchase and sale of securities by the Fund.

Tait, Weller & Baker LLP is the independent registered public accounting firm for the Fund’s services include auditing the Fund’s financial statements and the performance of related tax services.

Bingham McCutchen LLP (“Bingham”), 355 South Grand Avenue, Suite 4400, Los Angeles, California 90071, serves as counsel to the Trust and provides counsel on legal matters relating to the Fund. Bingham also serves as independent legal counsel to the Independent Trustees.

Distribution Agreement

The Trust has entered into a Distribution Agreement (the “Distribution Agreement”) with Grand Distribution Services, LLC, 803 W. Michigan Street, Milwaukee, Wisconsin 53233 (the “Distributor”), pursuant to which the Distributor acts as the Fund’s distributor, provides certain administrative services and arranges for the sale of the Fund’s shares. The offering of the Fund’s shares is continuous. The Distributor, UMBFS and Custodian are affiliated companies. The Distributor is a registered broker-dealer and a member of FINRA.

The Distribution Agreement has an initial term of up to two years and will continue in effect only if such continuance is specifically approved at least annually by the Board or by vote of a majority of the Fund’s outstanding voting securities and, in either case, by a majority of the trustees who are not parties to the Distribution Agreement or “interested persons” (as defined in the 1940 Act) of any such party. The Distribution Agreement is terminable without penalty by the Trust on behalf of the Fund on 30 days’ written notice when authorized either by a majority vote of the Fund’s shareholders or by vote of a majority of the Board, including a majority of the trustees who are not “interested persons” (as defined in the 1940 Act) of the Trust, or by the Distributor on 30 days’ written notice, and will automatically terminate in the event of its “assignment” (as defined in the 1940 Act). The Distribution Agreement provides that the Distributor shall not be liable for any error of judgment or mistake of law or for any loss suffered by the Trust in connection with the performance of the Distributor’s obligations and duties under the Distribution Agreement, except a loss resulting from the Distributor’s willful misfeasance, bad faith or negligence in the performance of such duties and obligations, or by reason of its reckless disregard thereof.

Rule 12b-1 Plan

The Trust has adopted a plan pursuant to Rule 12b-1 under the 1940 Act (the “12b-1 Plan”) that provides for payments for services performed and costs incurred that are primarily intended to result in sales of the Fund’s shares. Under the 12b-1 Plan, the Advisor serves as an administrative paying agent of the Fund -- its “distribution coordinator” -- for the purpose of receiving an aggregate monthly payment pursuant to the Fund’s 12b-1 plan (at the annual rate of 0.25% of the Fund’s average daily net assets) and disbursing the Fund’s 12b-1 payments to appropriate recipients. Payments made through the Plan include those for matters such as expenses of preparing and distributing sales literature; printing and distributing prospectuses to prospective shareholders; development of marketing plans; expenses of participation by and support of registered representatives in conferences, seminars and other sales-related meetings; payments to broker-dealer sales platforms; and reimbursement to the Advisor of the portion of the salary paid to its employees who are registered representatives of the Distributor, based on the portions of their working time spent by such employees on sales-related activities for the Fund. Any unallocated 12b-1 payments by the Fund must be retained by the Advisor as paying agent of the Fund and disbursed in future months for the purposes described above. Because 12b-1 fees are paid out of Fund assets on an ongoing basis, they will, over time, increase the cost of an investment and may cost more than other types of sales charges.

The Rule 12b-1 Plan may not be amended to materially increase the amount to be paid by the Fund for distribution services without the vote of a majority of the outstanding voting securities. The Rule

12b-1 Plan shall continue in effect indefinitely, provided that such continuance is approved at least annually by a vote of a majority of the Trustees, including the Independent Trustees, cast in person at a meeting called for such purpose or by vote of at least a majority of the outstanding voting securities. The Rule 12b-1 Plan may be terminated at any time without penalty by vote of a majority of the Independent Trustees or by vote of the majority of the outstanding voting securities.

If the Rule 12b-1 Plan is terminated for the Fund in accordance with its terms, the obligation of the Fund to make payments to the Advisor pursuant to the Rule 12b-1 Plan will cease and the Fund will not be required to make any payments past the termination date. Thus, there is no legal obligation for the Fund to pay any expenses incurred by the Advisor other than fees already payable under the Rule 12b-1 Plan, if the Rule 12b-1 Plan is terminated in accordance with its terms for any reason.

The Fund paid the following 12b-1 fees for the fiscal year ended May 31, 2012:

| | 12b-1 Fees |
|-------------------------|-------------------|
| Broker-Dealers | \$58,071 |
| Advertising & Marketing | 17,096 |
| Distributor | 5,327 |
| Total | <u>\$80,494</u> |

Marketing and Support Payments

The Advisor, out of its own resources and without additional cost to the Fund or its shareholders, may provide cash payments or other compensation to certain financial intermediaries who sell shares of the Fund. These payments are in addition to other fees described in the Fund's Prospectus and this SAI, and are generally provided for shareholder services or marketing support. Payments for marketing support are typically for inclusion of the Fund on sales lists, including electronic sales platforms. Investors may wish to take these payments into account when considering and evaluating recommendations to purchase shares of the Fund.

PORTFOLIO TRANSACTIONS AND BROKERAGE

Pursuant to the Advisory Agreement, the Advisor determines which securities are to be purchased and sold by the Fund and which broker-dealers are eligible to execute the Fund's portfolio transactions. The purchases and sales of securities in the over-the-counter market will generally be executed by using a broker for the transaction.

Purchases of portfolio securities for the Fund also may be made directly from issuers or from underwriters. Where possible, purchase and sale transactions will be effected through dealers (including banks) that specialize in the types of securities which the Fund will be holding unless better executions are available elsewhere. Dealers and underwriters usually act as principals for their own accounts. Purchases from underwriters will include a concession paid by the issuer to the underwriter and purchases from dealers will include the spread between the bid and the asked price. If the execution and price offered by more than one dealer or underwriter are comparable, the order

may be allocated to a dealer or underwriter that has provided research or other services as discussed below.

In placing portfolio transactions, the Advisor will use its reasonable efforts to choose broker-dealers capable of providing the services necessary to obtain the most favorable price and execution available. The full range and quality of services available will be considered in making these determinations, such as the size of the order, the difficulty of execution, the operational facilities of the broker-dealer involved, the risk in positioning the block of securities, and other factors. In those instances where it is reasonably determined that more than one broker-dealer can offer the services needed to obtain the most favorable price and execution available, consideration may be given to those broker-dealers which furnish or supply research and statistical information to the Advisor that they may lawfully and appropriately use in their investment advisory capacities, as well as provide other services in addition to execution services. The Advisor considers such information, which is in addition to and not in lieu of the services required to be performed by it under its Advisory Agreement with the Fund, to be useful in varying degrees, but of indeterminable value.

While it is the Fund's general policy to seek to obtain the most favorable price and execution available in selecting a broker-dealer to execute portfolio transactions for the Fund, weight is also given to the ability of a broker-dealer to furnish brokerage and research services as defined in Section 28(e) of the Securities Exchange Act of 1934, as amended, to the Fund or to the Advisor, even if the specific services are not directly useful to the Fund and may be useful to the Advisor in advising other clients. In negotiating commissions with a broker or evaluating the spread to be paid to a dealer, the Fund may therefore pay a higher commission or spread than would be the case if no weight were given to the furnishing of these supplemental services, provided that the amount of such commission or spread has been determined in good faith by the Advisor to be reasonable in relation to the value of the brokerage and/or research services provided by such broker-dealer. The standard of reasonableness is to be measured in light of the Advisor's overall responsibilities to the Fund.

Investment decisions for the Fund are made independently from those of other client accounts that may be managed or advised by the Advisor. Nevertheless, it is possible that at times, identical securities will be acceptable for both the Fund and one or more of such client accounts. In such event, the position of the Fund and such client accounts in the same issuer may vary and the holding period may likewise vary. However, to the extent any of these client accounts seek to acquire the same security as the Fund at the same time, the Fund may not be able to acquire as large a position in such security as it desires, or it may have to pay a higher price or obtain a lower yield for such security. Similarly, the Fund may not be able to obtain as high a price for, or as large an execution of, an order to sell any particular security at the same time as the Advisor's other client accounts.

The Fund does not effect securities transactions through brokers in accordance with any formula, nor does it effect securities transactions through brokers for selling shares of the Fund. However, broker-dealers who execute brokerage transactions may effect purchase of shares of the Fund for their customers.

The Fund has paid the following brokerage commissions:

| | Broker Commissions |
|--|-------------------------------|
| For the fiscal year ended May 31, 2012 | \$104,178 |
| For the period June 30, 2010 (commencement of operations) through May 31, 2011 | \$60,385 |

PORTFOLIO TURNOVER

Although the Fund generally will not invest for short-term trading purposes, portfolio securities may be sold without regard to the length of time they have been held when, in the opinion of the Advisor, investment considerations warrant such action. Portfolio turnover rate is calculated by dividing (1) the lesser of purchases or sales of portfolio securities for the fiscal year by (2) the monthly average of the value of portfolio securities owned during the fiscal year. A 100% turnover rate would occur if all the securities in the Fund's portfolio, with the exception of securities whose maturities at the time of acquisition were one year or less, were sold and either repurchased or replaced within one year. A high rate of portfolio turnover (100% or more) generally leads to higher transaction costs and may result in a greater number of taxable transactions. To the extent net short-term capital gains are realized, any distributions resulting from such gains will be taxed at ordinary income tax rates for federal income tax purposes.

The Fund's portfolio turnover rate for the fiscal year ended May 31, 2012 and May 31, 2011 were 140% and 59%, respectively. The increase in the turnover rate in the most recent fiscal year resulted from the Advisor's response to the extraordinary volatility of the financial markets during that period. The Advisor believes that stocks generally were affected by extreme shifts in macro trends and investor sentiment in very short time periods. For example, from June 15, 2011 to November 25, 2011—roughly 5 months—the Standard & Poor's 500 Stock Index experienced 8 periods with at least a 5% increase or decrease. From June 15 to July 6, the Index was up 5.8%. From July 6 to August 10, the Index was down 16.3%. From August 10 to August 15, the Index was up 7.4%. From August 15 to August 19, the Index was down 7.1%. From August 19 to August 30, the Index was up 7.9%. From August 30 to October 3, the Index was down 9.4%. From October 3 to October 26, the Index was up 22.1%. From October 26 to November 25, the Index was down 6.8%. The Advisor attempted to use that market volatility to lower the basis cost on the Fund's positions by buying low and selling high-- repeatedly. In periods of extreme downside volatility the Advisor also sought to protect the Fund's value by selling certain positions and building the Fund's cash position. All of this activity resulted in a higher rate of trading than the Advisor expects to effect in a normal market. In the Advisor's estimation, however, the period described above did not represent a normal market.

PROXY VOTING POLICY

The Board has adopted Proxy Voting Policies and Procedures ("Policies") on behalf of the Trust, which delegates the responsibility for voting the Fund's proxies to the Advisor, subject to the Board's continuing oversight. The Policies require that the Advisor vote proxies received in a manner consistent with the best interests of the Fund. The Policies also require the Advisor to

present to the Board, at least annually, the Advisor's Proxy Voting Policies and Procedures ("Advisor's Proxy Policies") and a record of each proxy voted by the Advisor on behalf of the Fund, including a report on the resolution of all proxies identified by the Advisor as involving a conflict of interest. See Appendix B for the Advisor's Proxy Voting Policy. This policy is intended to serve as a guideline and to further the economic value of each security held by the Fund. The Trust's CCO will review this policy on a regular basis. Each proxy will be considered individually, taking into account the relevant circumstances at the time of each vote.

If a proxy proposal raises a material conflict between the Advisor's interests and the Fund's interests, the Advisor will resolve the conflict by following the policy guidelines or the recommendation of an independent third party.

The Fund is required to annually file Form N-PX, which lists the Fund's complete proxy voting record for the 12-month period ending June 30th each year. Once filed, the Fund's proxy voting record will be available without charge, upon request, by calling toll-free 1-888-88JUBAK (58225) and on the SEC's web site at www.sec.gov.

ANTI-MONEY LAUNDERING PROGRAM

The Trust has established an Anti-Money Laundering Compliance Program (the "Program") as required by the Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism Act of 2001 ("USA PATRIOT Act"). In order to ensure compliance with this law, the Program provides for the development and implementation of internal practices, procedures and controls, designation of anti-money laundering compliance officers, an ongoing training program and an independent audit function to determine the effectiveness of the Program.

Procedures to implement the Program include, but are not limited to, determining that the Fund's Distributor and Transfer Agent have established proper anti-money laundering procedures, reporting suspicious and/or fraudulent activity, checking shareholder names against designated government lists, including Office of Foreign Assets Control ("OFAC"), and a complete and thorough review of all new opening account applications. The Trust will not transact business with any person or entity whose identity cannot be adequately verified under the provisions of the USA PATRIOT Act.

PORTFOLIO HOLDINGS INFORMATION

The Fund has adopted policies and procedures regarding disclosure of portfolio holdings information (the "Disclosure Policy"). The Board of Trustees determined that the adoption of the Disclosure Policy, including the disclosure permitted therein, was in the best interests of the Fund. The Disclosure Policy applies to the Fund, Advisor and other internal parties involved in the administration, operation or custody of the Fund, including, but not limited to UMBFS, MFAC, the Board of Trustees, counsel to the Trust and Independent Trustees, Bingham McCutchen LLP, and the Fund's independent registered public accounting firm, Tait, Weller & Baker LLP (collectively, the "Service Providers"). Pursuant to the Disclosure Policy, non-public information concerning the Fund's portfolio holdings may be disclosed to its Service Providers only if such disclosure is

consistent with the antifraud provisions of the federal securities laws and the fiduciary duties owed by the Fund and the Advisor to the Fund's shareholders. The Fund and its Service Providers may not receive compensation or any other consideration (which includes any agreement to maintain assets in the Fund or in other investment companies or accounts managed by the Advisor or any affiliated person of the Advisor) in connection with the disclosure of portfolio holdings information of the Fund. The Fund's Disclosure Policy is implemented and overseen by the CCO of the Trust, subject to the oversight of the Board of Trustees. Periodic reports regarding these procedures will be provided to the Trust's Board.

Portfolio holdings information will be deemed public (1) when it has been posted to the Fund's public website (www.JubakFund.com) or (2) in periodic regulatory filings on the SEC's website (www.sec.gov). In addition, management of the Fund may make publicly available its portfolio holdings by making such information available to any person who calls the Fund's toll-free number at 1-888-885-8225, no earlier than five days following the effective date of such information (e.g., information as of January 31 may be made available no earlier than February 5).

Non-Public Portfolio Holdings Information Policy. All portfolio holdings information that has not been disseminated in a manner making it available to investors generally as described above is considered non-public portfolio holdings information for the purposes of the Disclosure Policy. Pursuant to the Disclosure Policy, the Fund or its Service Providers may disclose non-public portfolio holdings information to certain third parties who fall within pre-authorized categories on a daily basis, with no lag time unless otherwise specified below. These third parties include: (i) the Fund's Service Providers and others who need access to such information in the performance of their contractual or other duties and responsibilities to the Fund (e.g., custodians, accountants, the Advisor, administrators, attorneys, officers and Trustees) and who are subject to duties of confidentiality imposed by law or contract, (ii) brokers who execute trades for the Fund, (iii) evaluation service providers (as described below) and (iv) shareholders requesting in-kind redemptions (as described below).

Evaluation Service Providers. These third parties include mutual fund evaluation services, such as Morningstar and Lipper, if the Fund has a legitimate business purpose for disclosing the information, provided that the third party expressly agrees to maintain the non-public portfolio holdings information in confidence and not to trade portfolio securities based on the non-public portfolio holdings information. Subject to the terms and conditions of any agreement between the Fund or its authorized service providers and the third party, if these conditions for disclosure are satisfied, there shall be no restriction on the frequency with which the Fund's non-public portfolio holdings information is released, and no lag period shall apply. In addition, persons who owe a duty of trust or confidence to the Fund or its Service Providers (such as legal counsel) may receive non-public portfolio holdings information without entering into a non-disclosure agreement.

Shareholder In-Kind Distributions. The Fund's shareholders may, in some circumstances, elect to redeem their shares of the Fund in exchange for their pro rata share of the securities held by the Fund. In such circumstances, pursuant to the Disclosure Policy, Fund shareholders may receive a complete listing of the portfolio holdings of the Fund up to seven (7) calendar days prior to making the redemption request provided that they represent orally or in writing that they agree to maintain the confidentiality of the portfolio holdings information.

Other Entities. Pursuant to the Disclosure Policy, the Fund or the Advisor may disclose non-public portfolio holdings information to a third party who does not fall within the pre-approved categories, and who are not executing broker-dealers; however, prior to the receipt of any non-public portfolio holdings information by such third party, the recipient must have entered into a non-disclosure agreement and the disclosure arrangement must have been approved by the CCO and the President of the Trust. The CCO will report to the Board of Trustees on a quarterly basis regarding any recipients of non-public portfolio holdings information approved pursuant to this paragraph. There are no other ongoing arrangements as of the date of this SAI.

Current Arrangements Regarding Disclosure of Portfolio Holdings. As of the date of this SAI, the Trust or the Fund has ongoing business arrangements with the following entities which involve making portfolio holdings information available to such entities as an incidental part of the services they provide to the Trust: (i) Jubak Asset Management, LLC (the Advisor), MFAC and UMBFS (the Trust's co-administrators) and UMB Bank, n.a. (the Custodian) pursuant to investment management, administration and custody agreements, respectively, under which the Fund's portfolio holdings information is provided daily on a real-time basis (i.e., with no lag time); (ii) Tait, Weller & Baker, LLP (independent registered public accounting firm), Bingham McCutchen LLP (attorneys) and other professionals engaged by the Trust to whom the Trust provides portfolio holdings information on a regular basis with varying lag times after the date of the information, (iii) Broadridge (ProxyEdge) pursuant to a proxy voting agreement under which the Fund's portfolio holdings information is provided daily with no time lag; and (iv) Morningstar, Inc., Lipper Inc., Thomson Financial, Vickers Stock Research Corporation, and Bloomberg L.P., to which the Fund's portfolio holdings information is provided quarterly after the end of the previous fiscal quarter, with a 60-day time lag and no earlier than the date such information is filed on the SEC's EDGAR system on Form N-Q (for the first and third fiscal quarters) or the Annual or Semi-Annual Report is mailed to shareholders (for the second and fourth fiscal quarters), as applicable.

DETERMINATION OF NET ASSET VALUE

The NAV of the Fund's shares will fluctuate and is determined as of the close of trading on the New York Stock Exchange (the "NYSE") (generally 4:00 p.m. Eastern Time) each business day. The NYSE annually announces the days on which it will not be open for trading. The most recent announcement indicates that the NYSE will not be open for the following holidays: New Year's Day, Martin Luther King, Jr. Day, Presidents' Day, Good Friday, Memorial Day, Independence Day, Labor Day, Thanksgiving Day and Christmas Day. However, the NYSE may close on days not included in that announcement.

The NAV is computed by dividing the value of the securities held by the Fund plus any cash or other assets (including interest and dividends accrued but not yet received) minus all liabilities (including accrued expenses) by the total number of shares in the Fund outstanding at such time.

$$\frac{\text{Net Assets}}{\text{Shares Outstanding}} = \text{NAV}$$

An example of how the Fund calculated the NAV as of May 31, 2012 is as follows:

$$\frac{\$27,878,199}{3,124,581} = \$8.92$$

Generally, the Fund's investments are valued at market value or, in the absence of a market value, at fair value as determined in good faith by the Advisor and the Trust's Valuation Committee pursuant to procedures approved by or under the direction of the Board. Pursuant to those procedures, the Board considers, among other things: 1) the last sale price on the securities exchange, if any, on which a security is primarily traded; 2) the mean between the bid and ask prices; 3) price quotations from an approved pricing service, and 4) other factors as necessary to determine a fair value under certain circumstances.

The Fund's securities which are traded on securities exchanges are valued at the last sale price on the exchange on which such securities are traded, as of the close of business on the day the securities are being valued or, lacking any reported sales, at the mean between the last available bid and ask prices.

Securities that are traded on more than one exchange are valued on the exchange determined by the Advisor to be the primary market. Securities primarily traded in the National Association of Securities Dealers Automated Quotation ("NASDAQ"), National Market System for which market quotations are readily available shall be valued using the NASDAQ Official Closing Price ("NOCP"). If the NOCP is not available, such securities shall be valued at the last sale price on the day of valuation, or if there has not been any sale on such day, at the mean between the bid and ask prices. Over-the-counter ("OTC") securities which are not traded in the NASDAQ National Market System shall be valued at the most recent trade price.

Stocks that are "thinly traded" or events occurring when a foreign market is closed but the NYSE is open (for example, the value of a security held by the Fund has been materially affected by events occurring after the close of the exchange or market on which the security is principally traded) may create a situation where a market quote would not be readily available. When a market quote is not readily available, the security's value is based on "fair value" as determined by procedures adopted by the Board. The Board will periodically review the reliability of the Fund's fair value methodology. The Fund may hold portfolio securities, such as those traded on foreign exchanges that trade on weekends or other days when the Fund's shares are not priced. Therefore, the value of the Fund's shares may change on days when shareholders will not be able to purchase or redeem shares.

Short-term debt obligations with remaining maturities in excess of 60 days are valued at current market prices, as discussed above. Short-term securities with 60 days or less remaining to maturity are, unless conditions indicate otherwise, amortized to maturity based on their cost to the Fund if acquired within 60 days of maturity or, if already held by the Fund on the 60th day, based on the value determined on the 61st day.

All other assets of the Fund are valued in such manner as the Board in good faith deems appropriate to reflect as their fair value.

PURCHASE AND REDEMPTION OF FUND SHARES

Detailed information on the purchase and redemption of shares is included in the Fund's Prospectus. Shares of the Fund are sold at the next offering price calculated after receipt of an order for purchase. In order to purchase shares of the Fund, you must invest the initial minimum investment for the relevant class of shares. However, the Fund reserves the right, in its sole discretion, to waive the minimum initial investment amount for certain investors, or to waive or reduce the minimum initial investment for 401(k) plans or other tax-deferred retirement plans. You may purchase shares on any day that the NYSE is open for business by placing orders with the Fund.

The Fund reserves the right to refuse any purchase requests, particularly those that would not be in the best interests of the Fund or its shareholders and could adversely affect the Fund or its operations. This includes those from any individual or group who, in the Fund's view, is likely to engage in or has a history of excessive trading (usually defined as more than four round-trip transactions out of the Fund within a calendar year). Furthermore, the Trust may suspend the right to redeem its shares or postpone the date of payment upon redemption for more than three business days (i) for any period during which the NYSE is closed (other than customary weekend or holiday closings) or trading on the NYSE is restricted; (ii) for any period during which an emergency exists as a result of which the sale by the Fund of securities owned by it is not reasonably practicable or it is not reasonably practicable for the Fund to fairly determine the value of its net assets; (iii) for such other periods as the SEC may permit for the protection of the Fund's shareholders; or (iv) to ensure a recent purchase made by check clears.

Redemptions In-Kind. The Trust has filed an election under SEC Rule 18f-1 committing to pay in cash all redemptions by a shareholder of record up to amounts specified by the rule (the lesser of (i) \$250,000 or (ii) 1% of a Fund's assets). The Fund has reserved the right to pay the redemption price of their shares in excess of the amounts specified by the rule, either totally or partially, by a distribution in-kind of portfolio securities (instead of cash). The securities so distributed would be valued at the same amount as that assigned to them in calculating the NAV per share for the shares being sold. If a shareholder receives a distribution in-kind, the shareholder could incur brokerage or other charges in converting the securities to cash.

The Fund does not intend to hold any significant percentage of its portfolio in illiquid securities, although the Fund, like virtually all mutual funds, may from time to time hold a small percentage of securities that are illiquid. In the unlikely event the Fund were to elect to make an in-kind redemption, the Fund expects that it would follow the normal protocol of making such distribution by way of a pro rata distribution based on its entire portfolio. If the Fund held illiquid securities, such distribution may contain a pro rata portion of such illiquid securities or the Fund may determine, based on a materiality assessment, not to include illiquid securities in the in-kind redemption. The Fund does not anticipate that it would ever selectively distribute a greater than pro rata portion of any illiquid securities to satisfy a redemption request. If such securities are included in the distribution, shareholders may not be able to liquidate such securities and may be required to hold such securities indefinitely. Shareholders' ability to liquidate such securities distributed in-kind may be restricted by resale limitations or substantial restrictions on transfer imposed by the issuers of the securities or by law. Shareholders may only be able to liquidate such securities distributed in-

kind at a substantial discount from their value, and there may be higher brokerage costs associated with any subsequent disposition of these securities by the recipient.

FEDERAL INCOME TAX MATTERS

The following is a summary of certain material U.S. federal (and, where noted, state and local) income tax considerations affecting the Fund and its shareholders. The discussion is very general. Current and prospective shareholders are therefore urged to consult their own tax advisers with respect to the specific federal, state, local and foreign tax consequences of investing in the Fund. The summary is based on the laws in effect on the date of this SAI and existing judicial and administrative interpretations thereof, all of which are subject to change, possibly with retroactive effect.

The Fund is treated as a separate entity from other series of the Trust for federal income tax purposes. The Fund has elected to be treated and to qualify each year to be taxed as a regulated investment company under Subchapter M of the Code by complying with all applicable requirements of the Code, including, among other things, requirements as to the sources of the Fund's income, diversification of the Fund's assets and timing of Fund distributions. To so qualify, a Fund must, among other things: (a) derive at least 90% of its gross income in each taxable year from dividends, interest, payments with respect to certain securities loans, and gains from the sale or other disposition of stock or securities or foreign currencies, or other income (including, but not limited to, gains from options, futures or forward contracts) derived with respect to its business of investing in such stock, securities or currencies, and net income derived from interests in "qualified publicly traded partnerships" (i.e., partnerships that are traded on an established securities market or tradable on a secondary market, other than partnerships that derive 90% of their income from interest, dividends, capital gains, and other traditionally permitted mutual fund income); and (b) diversify its holdings so that, at the end of each quarter of the Fund's taxable year, (i) at least 50% of the market value of the Fund's assets is represented by cash, securities of other regulated investment companies, U.S. Government securities and other securities, with such other securities limited, in respect of any one issuer, to an amount not greater than 5% of the Fund's assets and not greater than 10% of the outstanding voting securities of such issuer and (ii) not more than 25% of the value of its assets is invested in the securities (other than U.S. Government securities or securities of other regulated investment companies) of any one issuer, in the securities (other than the securities of other regulated investment companies) of any two or more issuers that the Fund controls and that are determined to be engaged in the same or similar trades or businesses or related trades or businesses, or in the securities of one or more "qualified publicly traded partnerships."

As a regulated investment company, a Fund will not be subject to U.S. federal income tax on the portion of its taxable investment income and capital gains that it distributes to its shareholders provided that it satisfies a minimum distribution requirement. In order to avoid liability for federal excise tax, the Fund must distribute (or be deemed to have distributed) by December 31 of each calendar year at least the sum of (i) 98% of its ordinary income for such year, (ii) 98.2% of the excess of its realized capital gains over its realized capital losses for the 12-month period ending on October 31 during such year and (iii) any amounts from the prior calendar year that were not distributed and on which the Fund paid no federal income tax. The Fund will be subject to income tax at regular corporate tax rates on any taxable income or gains that it does not distribute to its shareholders. The Fund's policy is to distribute to its shareholders all investment company taxable

income (determined without regard to the deduction for dividends paid) and any net capital gains for each fiscal year in a manner that complies with the distribution requirements of the Code, so that the Fund will not be subject to any federal income or excise taxes.

If, for any taxable year, the Fund were to fail to qualify as a regulated investment company or to meet certain minimum distribution requirements under the Code, it would be taxed in the same manner as an ordinary corporation and distributions to its shareholders would not be deductible by the Fund in computing its taxable income. In addition, in the event of a failure to qualify, the Fund's distributions, to the extent derived from the Fund's current or accumulated earnings and profits, including any distributions of net tax-exempt income and net long-term capital gains, would be taxable to shareholders as ordinary dividend income for federal income tax purposes. However, such dividends would be eligible, subject to any generally applicable limitations, (i) for taxable years beginning on or before December 31, 2012, to be treated as qualified dividend income in the case of shareholders taxed as individuals and (ii) for the dividends received deduction in the case of corporate shareholders. Moreover, if the Fund were to fail to qualify as a regulated investment company in any year, it would be required to pay out its earnings and profits accumulated in that year in order to qualify again as a regulated investment company. Under certain circumstances, the Fund may be able to cure a failure to qualify as a regulated investment company, but in order to do so the Fund might incur significant Fund-level taxes and might be forced to dispose of certain assets. If the Fund failed to qualify as a regulated investment company for a period greater than two taxable years, the Fund would generally be required to recognize any net built-in gains with respect to certain of its assets upon a disposition of such assets within ten years of qualifying as a regulated investment company in a subsequent year.

Shareholders will be subject to federal income taxes on distributions made by the Fund whether paid in cash or additional shares. Distributions of net investment income (including interest, dividend income and net short-term capital gain in excess of any net long-term capital loss, less certain expenses), other than qualified dividend income, will be taxable to shareholders as ordinary income. For taxable years beginning on or before December 31, 2012, distributions of qualified dividend income, as such term is defined in Section 1(h)(11) of the Code (generally dividends received from U.S. domestic corporations and certain qualified foreign corporations provided that certain holding period and other requirements are met), generally will be taxed to non-corporate shareholders at the federal income tax rates applicable to net capital gain, provided the Fund reports the amount distributed as qualified dividend.

Distributions of net capital gain (the excess of net long-term capital gain over net short-term capital loss), if any, will be taxable to non-corporate shareholders as long term capital gain without regard to how long a shareholder has held shares of the Fund. The Fund may retain certain amounts of capital gains and designate them as undistributed net capital gain in a notice to its shareholders, who (i) will be required to include in income for U.S. federal income tax purposes, as long-term capital gain, their proportionate shares of the undistributed amounts so designated, (ii) will be entitled to credit their proportionate shares of the income tax paid by the fund on those undistributed amounts against their federal income tax liabilities and to claim refunds to the extent such credits exceed their liabilities and (iii) will be entitled to increase their federal income tax basis in their shares by an amount equal to the excess of the amounts of undistributed net capital gain included in their respective income over their respective income tax credits.

Dividends paid by the Fund may qualify in part for the 70% dividends received deduction available to corporate shareholders, provided the Fund reports the amount distributed as a qualifying dividend and certain holding period and other requirements under the Code are satisfied. The reported amount, however, cannot exceed the aggregate amount of qualifying dividends received by the Fund for its taxable year. In view of the Fund's investment policies, it is expected that dividends from domestic corporations may be part of the Fund's gross income and that, accordingly, a portion of the distributions by the Fund may be eligible for treatment as qualified dividend income and for the dividends received deduction. However, the portion of the Fund's gross income attributable to qualified dividend income and qualifying dividends is largely dependent on the Fund's investment activities for a particular year and, therefore, cannot be predicted with any certainty. Qualified dividend income treatment and the dividends received deduction may be reduced or eliminated if, among other things, (i) the shareholder is under an obligation (whether pursuant to a short sale or otherwise) to make related payments with respect to positions in substantially similar or related property or (ii) certain holding period requirements are not satisfied at both the Fund and shareholder levels. In addition, qualified dividend income treatment is not available if a shareholder elects to have the dividend income treated as investment income for purposes of the limitation on deductibility of investment interest.

Dividends and distributions from the Fund will generally be taken into account in determining a shareholder's "net investment income" for purposes of the Medicare contribution tax applicable to certain individuals, estates and trusts for taxable years beginning after December 31, 2012.

Shareholders who choose to receive distributions in the form of additional shares will have a cost basis for federal income tax purposes in each share so received equal to the NAV of a share on the reinvestment date. Distributions are generally taxable when received. However, distributions declared in October, November or December to shareholders of record on a date in such a month and paid the following January are taxable for federal income tax purposes as if received on December 31 of the calendar year in which declared. Distributions are includable in alternative minimum taxable income in computing a shareholder's liability for the federal alternative minimum tax.

A redemption of Fund shares may result in recognition of a taxable gain or loss. The gain or loss will generally be treated as a long-term capital gain or loss if the shares were held for more than one year. If the shares were held for one year or less, the gain or loss will generally be treated as a short-term capital gain or loss. Any loss realized upon redemption or exchange of shares held for six months or less will be treated as a long-term capital loss to the extent of any amounts treated as distributions of long-term capital gains during such six-month period. Any loss realized upon a redemption may be disallowed under certain wash sale rules to the extent shares of the same Fund or other substantially identical stock or securities are purchased (through reinvestment of distributions or otherwise) within 30 days before or after the redemption.

If a shareholder recognizes a loss with respect to the Fund's shares of \$2 million or more for an individual shareholder or \$10 million or more for a corporate shareholder, the shareholder must file with the IRS a disclosure statement on Form 8886. Direct shareholders of portfolio securities are in many cases exempted from this reporting requirement, but under current guidance, shareholders of a regulated investment company are not exempted. The fact that a loss is reportable under these regulations does not affect the legal determination of whether the taxpayer's treatment of the loss is

proper. Shareholders should consult their tax advisors to determine the applicability of these regulations vconsidering their individual circumstances.

The Fund's transactions in options and other similar transactions, such as futures, may be subject to special provisions of the Code that, among other things, affect the character of any income realized by the Fund from such investments, accelerate recognition of income to the Fund, defer Fund losses, affect the holding period of the Fund's securities, affect whether distributions will be eligible for the dividends received deduction or be treated as qualified dividend income and affect the determination of whether capital gain and loss is characterized as long-term or short-term capital gain or loss. These rules could therefore affect the character, amount and timing of distributions to shareholders. These provisions may also require the Fund to "mark-to-market" certain types of the positions in its portfolio (i.e., treat them as if they were closed out), which may cause the Fund to recognize income without receiving cash with which to make distributions in amounts necessary to satisfy the distribution requirements for avoiding U.S. federal income and excise taxes. The Fund will monitor these transactions and will make the appropriate entries in its books and records, and if the Fund deems it advisable, will make appropriate elections if available in order to mitigate the effect of these rules, prevent disqualification of the Fund as a regulated investment company and minimize the imposition of U.S. federal income and excise taxes.

The Fund's transactions in broad based equity index futures contracts, exchange-traded options on such indices and certain other futures contracts are generally considered "Section 1256 contracts" for federal income tax purposes. Any unrealized gains or losses on such Section 1256 contracts are treated as though they were realized at the end of each taxable year. The resulting gain or loss is treated as 60% long-term capital gain or loss and 40% short-term capital gain or loss. Gain or loss recognized on actual sales of Section 1256 contracts is treated in the same manner. As noted above, distributions of net short-term capital gain are taxable to shareholders as ordinary income while distributions of net long-term capital gain are taxable to shareholders as long-term capital gain, regardless of how long the shareholder has held shares of the Fund.

The Fund's entry into a short sale transaction, an option or certain other contracts, such as futures, could be treated as the constructive sale of an appreciated financial position, causing the Fund to realize gain, but not loss, on the position.

If the Fund invests in certain pay-in-kind securities, zero coupon securities, deferred interest securities or, in general, any other securities with original issue discount (or with market discount if the Fund elects to include market discount in income currently), the Fund must accrue income on such investments for each taxable year, which generally will be prior to the receipt of the corresponding cash payments. However, the Fund must distribute, at least annually, all or substantially all of its investment company taxable income (determined without regard to the deduction for dividends paid), including such accrued income to shareholders to avoid federal income and excise taxes. Therefore, the Fund may have to sell portfolio securities (potentially under disadvantageous circumstances) to generate cash, or may have to undertake leverage by borrowing cash, to satisfy these distribution requirements. Dispositions of portfolio securities may result in additional gains and additional distribution requirements.

If the Fund invests in a market discount bond, it will be required to treat any gain recognized on the disposition of such market discount bond as ordinary income (instead of capital gain) to the extent of the accrued market discount, unless the Fund elects to include the market discount in income as it

accrues as discussed above. A market discount bond is a security acquired in the secondary market at a price below its redemption value (or its adjusted issue price if it is also an original issue discount bond).

The Fund may be subject to withholding and other taxes imposed by foreign countries, including taxes on interest, dividends and capital gains with respect to its investments in those countries, which would, if imposed, reduce the yield on or return from those investments. Tax treaties between certain countries and the United States may reduce or eliminate such taxes in some cases. So long as the Fund qualifies for treatment as a regulated investment company and incurs “qualified foreign taxes; more than 50% of its net assets at the close of its taxable year consist of stock or securities of foreign corporations, the Fund may elect to “pass through” to its shareholders the amount of such foreign taxes paid. If this election is made, information with respect to the amount of the foreign income taxes that are allocated to the Fund’s shareholders will be provided to them and any shareholder subject to tax on dividends will be required (i) to include in ordinary gross income (in addition to the amount of the taxable dividends actually received) his/her proportionate share of the foreign taxes paid that are attributable to such dividends; and (ii) either to deduct his/her proportionate share of such foreign taxes in computing his/her taxable income or to claim that amount as a foreign tax credit (subject to applicable limitations) against U.S. income taxes.

Qualified foreign taxes generally include taxes that would be treated as income taxes under U.S. tax regulations but do not include most other taxes, such as stamp taxes, securities transaction taxes, and similar taxes. Shareholders who do not itemize deductions for U.S. federal income tax purposes will not, however, be able to deduct their pro rata portion of qualified foreign taxes paid by the Fund, although such shareholders will be required to include their shares of such taxes in gross income if the Fund makes the election described above. No deduction for such taxes will be permitted to individuals in computing their alternative minimum tax liability.

If the Fund makes this election and a shareholder chooses to take a credit for the foreign taxes deemed paid by such shareholder, the amount of the credit that may be claimed in any year may not exceed the same proportion of the U.S. tax against which such credit is taken that the shareholder’s taxable income from foreign sources (but not in excess of the shareholder’s entire taxable income) bears to his entire taxable income. For this purpose, long-term and short-term capital gains the Fund realizes and distributes to shareholders will generally not be treated as income from foreign sources in their hands, nor will distributions of certain foreign currency gains subject to Section 988 of the Code or of any other income realized by the Fund that is deemed, under the Code, to be U.S.-source income in the hands of the Fund. This foreign tax credit limitation may also be applied separately to certain specific categories of foreign-source income and the related foreign taxes. As a result of these rules, which may have different effects depending upon each shareholder’s particular tax situation, certain shareholders may not be able to claim a credit for the full amount of their proportionate share of the foreign taxes paid by the Fund. Shareholders who are not liable for U.S. federal income taxes, including tax-exempt shareholders, will ordinarily not benefit from this election. If the Fund does make the election, it will provide required tax information to shareholders. The Fund generally may deduct any foreign taxes that are not passed through to its shareholders in computing its income available for distribution to shareholders to satisfy applicable tax distribution requirements.

Foreign exchange gains or losses realized by the Fund in connection with certain transactions involving foreign currency-denominated debt securities, certain options and futures contracts relating to foreign currency, foreign currency forward contracts, foreign currencies, or payables or

receivables denominated in a foreign currency are subject to Section 988 of the Code, which generally causes such gains or losses to be treated as ordinary gain or loss and may affect the amount, timing and character of distributions to shareholders.

The Fund may purchase the securities of certain foreign investment funds or trusts called passive foreign investment companies (“PFICs”). Currently, PFICs are the only or primary means by which the Fund may invest in some countries. If the Fund invests in PFICs, it may be subject to U.S. federal income tax on a portion of any “excess distribution” or gain from the disposition of such shares even if such income is distributed as a taxable dividend to shareholders. Additional charges in the nature of interest may be imposed on either the Fund or shareholders with respect to deferred taxes arising from such distributions or gains. Capital gains on the sale of such holdings will be deemed to be ordinary income regardless of how long such PFICs are held. A “qualified electing fund” election or a “mark to market” election may generally be available that would ameliorate these adverse tax consequences, but such elections could require the Fund to recognize taxable income or gain (subject to the distribution requirements applicable to regulated investment companies, as described above) without the concurrent receipt of cash. In order to satisfy the distribution requirements and avoid a tax on the Fund, the Fund may be required to liquidate portfolio securities that it might otherwise have continued to hold, potentially resulting in additional taxable gain or loss to the fund. In order for the Fund to make a qualified electing fund election with respect to a PFIC, the PFIC would have to agree to provide certain tax information to the Fund on an annual basis, which it might not agree to do. The Fund may limit and/or manage its holdings in PFICs to limit its tax liability or maximize its return from these investments.

Ordinary dividends and certain other payments made by the Fund to non-U.S. shareholders are generally subject to withholding tax at a 30% rate (or such lower rate as may be determined in accordance with any applicable treaty). In order to obtain a reduced rate of withholding, a non-U.S. shareholder will be required to provide an IRS Form W-8BEN certifying its entitlement to benefits under a treaty. The withholding tax does not apply to regular dividends paid to a non-U.S. shareholder who provides a Form W-8ECI, certifying that the dividends are effectively connected with the non-U.S. shareholder’s conduct of a trade or business within the United States. Instead, the effectively connected dividends will be subject to regular U.S. income tax as if the non-U.S. shareholder were a U.S. shareholder. A non-U.S. corporation receiving effectively connected dividends may also be subject to additional “branch profits tax” imposed at a rate of 30% (or a lower treaty rate). A non-U.S. shareholder who fails to provide an IRS Form W-8BEN or other applicable form may be subject to backup withholding at the appropriate rate.

The 30% withholding tax generally does not apply to distributions of net capital gains. For Fund taxable years that began before January 1, 2012, the 30% withholding tax also will not apply to dividends that a Fund reports as (a) interest-related dividends, to the extent such dividends are derived from a Fund’s “qualified net interest income,” or (b) short-term capital gain dividends, to the extent such dividends are derived from a Fund’s “qualified short-term gain.” “Qualified net interest income” is a Fund’s net income derived from U.S.-source interest and original issue discount, subject to certain exceptions and limitations. “Qualified short-term gain” generally means the excess of the net short-term capital gain of a Fund for the taxable year over its net long-term capital loss, if any. In order to qualify for this exemption from withholding, a non-U.S. shareholder will need to comply with applicable certification requirements relating to its non-U.S. status (including, in general, furnishing an IRS Form W-8BEN or substitute Form).

Distributions paid after December 31, 2013 and redemption payments paid after December 31, 2014 to a shareholder that is a “foreign financial institution” as defined in Section 1471 of the Code and that does not meet the requirements imposed on foreign financial institutions by Section 1471 will generally be subject to withholding tax at a 30% rate notwithstanding the status of any such amounts as capital gain dividends, short-term capital gain dividends or interest-related dividends. Distributions paid after December 31, 2013 and redemption payments paid after December 31, 2014 to a non-U.S. shareholder that is not a foreign financial institution will generally be subject to such withholding tax if the shareholder fails to make certain required certifications. The extent, if any, to which such withholding tax may be reduced or eliminated by an applicable tax treaty is unclear.

The Fund is required to withhold (as “backup withholding”) a portion of reportable payments, including dividends, capital gain distributions and the proceeds of redemptions and exchanges or repurchases of Fund shares, paid to shareholders who have not complied with certain IRS regulations. The backup withholding rate is currently 28% and is scheduled to increase to 31% in 2013. In order to avoid this withholding requirement, shareholders, other than certain exempt entities, must certify on IRS Forms W-9 or on certain other documents, that the Social Security Numbers or other Taxpayer Identification Numbers they provide are their correct numbers and that they are not currently subject to backup withholding, or that they are exempt from backup withholding. The Fund may nevertheless be required to backup withhold if it receives notice from the IRS or a broker that a number provided is incorrect or that backup withholding is applicable as a result of previous underreporting of interest or dividend income.

This discussion and the related discussion in the Prospectus have been prepared by management of the Fund, and counsel to the Trust has expressed no opinion in respect thereof.

Prospective shareholders of the Fund should consult their own tax advisors concerning the effect of owning shares of the Fund in light of their particular tax situations.

DIVIDENDS AND DISTRIBUTIONS

The Fund will receive income in the form of dividends and interest earned on its investments in securities. This income, less the expenses incurred in its operations, is the Fund’s net investment income, substantially all of which will be declared as dividends to the Fund’s shareholders.

The amount of income dividend payments by the Fund is dependent upon the amount of net investment income received by the Fund from its portfolio holdings, is not guaranteed and is subject to the discretion of the Board. The Fund does not pay “interest” or guarantee any fixed rate of return on an investment in its shares.

The Fund also may derive capital gains or losses in connection with sales or other dispositions of its portfolio securities. Any net gain the Fund may realize from transactions involving investments held for less than the period required for long-term capital gain or loss recognition or otherwise producing short-term capital gains and losses (taking into account any carryover of capital losses from the eight previous taxable years), although a distribution from capital gains, will be distributed to shareholders with and as a part of the income dividends paid by the Fund and will be taxable to shareholders as ordinary income for federal income tax purposes. If during any year the Fund realizes a net gain on transactions involving investments held for more than the period required for

long-term capital gain or loss recognition or otherwise producing long-term capital gains and losses, the Fund will have a net long-term capital gain. After deduction of the amount of any net short-term capital loss, the balance (to the extent not offset by any capital losses carried over from the eight previous taxable years) generally will be distributed and treated as long-term capital gains in the hands of the shareholders regardless of the length of time the Fund's shares may have been held by the shareholders. For more information concerning applicable capital gains tax rates, see your tax advisor.

Any dividend or distribution paid by the Fund reduces the Fund's NAV on the date paid by the amount of the dividend or distribution per share. Accordingly, a dividend or distribution paid shortly after a purchase of shares by a shareholder would represent, in substance, a partial return of capital (to the extent it is paid on the shares so purchased), even though it would be subject to federal income taxes.

Dividends and other distributions will be made in the form of additional shares of the Fund unless the shareholder has otherwise indicated. Investors have the right to change their elections with respect to the reinvestment of dividends and distributions by notifying the transfer agent in writing, but any such change will be effective only as to dividends and other distributions for which the record date is seven or more business days after the transfer agent has received the written request.

GENERAL INFORMATION

Investment Managers Series Trust (formerly known as Claymore Trust) is an open-end management investment company organized as a statutory trust under the laws of the State of Delaware on February 15, 2005. The Trust changed its name from Claymore Trust to Investment Managers Series Trust on December 3, 2007. The Trust currently consists of multiple series of shares of beneficial interest, par value of \$0.01 per share. The Trust's Declaration of Trust permits the Trustees to issue an unlimited number of full and fractional shares of beneficial interest and to divide or combine the shares into a greater or lesser number of shares without thereby changing the proportionate beneficial interest in the Fund. Each share represents an interest in the Fund proportionately equal to the interest of each other share. Upon the Fund's liquidation, all shareholders would share pro rata in the net assets of the Fund available for distribution to shareholders.

With respect to the Fund, the Trust may offer more than one class of shares. The Trust has reserved the right to create and issue additional series or classes. Each share of a series or class represents an equal proportionate interest in that series or class with each other share of that series or class.

The shares of each series or class participate equally in the earnings, dividends and assets of the particular series or class. Expenses of the Trust, which are not attributable to a specific series or class, are allocated among all the series in a manner believed by management of the Trust to be fair and equitable. Shares issued do not have pre-emptive or conversion rights. Shares when issued are fully paid and non-assessable, except as set forth below. Shareholders are entitled to one vote for each share held. Shares of each series or class generally vote together, except when required under federal securities laws to vote separately on matters that only affect a particular series or class, such as the approval of distribution plans for a particular class.

The Trust is not required to hold annual meetings of shareholders but will hold special meetings of shareholders of a series or class when, in the judgment of the Board, it is necessary or desirable to submit matters for a shareholder vote. Shareholders have, under certain circumstances, the right to communicate with other shareholders in connection with requesting a meeting of shareholders for the purpose of removing one or more trustees. Shareholders also have, in certain circumstances, the right to remove one or more trustees without a meeting. No material amendment may be made to the Trust's Declaration of Trust without the affirmative vote of the holders of a majority of the outstanding shares of each portfolio affected by the amendment. The Trust's Declaration of Trust provides that, at any meeting of shareholders of the Trust or of any series or class, a shareholder servicing agent may vote any shares as to which such shareholder servicing agent is the agent of record for shareholders who are not represented in person or by proxy at the meeting, proportionately in accordance with the votes cast by holders of all shares of that portfolio otherwise represented at the meeting in person or by proxy as to which such shareholder servicing agent is the agent of record. Any shares so voted by a shareholder servicing agent will be deemed represented at the meeting for purposes of quorum requirements. Any series or class may be terminated (i) upon the merger or consolidation with, or the sale or disposition of all or substantially all of its assets to, another entity, if approved by the vote of the holders of two-thirds of its outstanding shares, except that if the Board recommends such merger, consolidation or sale or disposition of assets, the approval by vote of the holders of a majority of the series' or class' outstanding shares will be sufficient, or (ii) by the vote of the holders of a majority of its outstanding shares, or (iii) by the Board by written notice to the series' or class' shareholders. Unless each series and class is so terminated, the Trust will continue indefinitely.

The Declaration of Trust provides that no Trustee or officer of the Trust shall be subject to any personal liability in connection with the assets or affairs of the Trust or any of its series except for losses in connection with his or her willful misfeasance, bad faith, gross negligence or reckless disregard of his or her duties. The Trust's Declaration of Trust also provides that the Trust shall maintain appropriate insurance (for example, fidelity bonding and errors and omissions insurance) for the protection of the Trust, its shareholders, trustees, officers, employees and agents covering possible tort and other liabilities. Thus, the risk of a shareholder incurring financial loss on account of shareholder liability is limited to circumstances in which both inadequate insurance existed and the Trust itself was unable to meet its obligations.

The Declaration of Trust does not require the issuance of stock certificates. If stock certificates are issued, they must be returned by the registered owners prior to the transfer or redemption of shares represented by such certificates.

Rule 18f-2 under the 1940 Act provides that as to any investment company which has two or more series outstanding and as to any matter required to be submitted to shareholder vote, such matter is not deemed to have been effectively acted upon unless approved by the holders of a "majority" (as defined in the rule) of the voting securities of each series affected by the matter. Such separate voting requirements do not apply to the election of Trustees or the ratification of the selection of accountants. The Rule contains special provisions for cases in which an advisory contract is approved by one or more, but not all, series. A change in investment policy may go into effect as to one or more series whose holders so approve the change even though the required vote is not obtained as to the holders of other affected series.

The Board, the Advisor and the Distributor have adopted Codes of Ethics under Rule 17j-1 of the 1940 Act. These codes of ethics permit, subject to certain conditions, personnel of the Advisor and Distributor to invest in securities that may be purchased or held by the Fund.

FINANCIAL STATEMENTS

Incorporated by reference herein is the Fund's Annual Report to shareholders for the fiscal year ending May 31, 2012 which includes the "Report of Independent Registered Public Accounting Firm", "Schedule of Investments", "Statement of Assets and Liabilities", "Statement of Operations", "Statements of Changes in Net Assets", "Financial Highlights" and "Notes to Financial Statements". A copy of the Fund's Annual Report can be obtained at no charge by calling 1-888-885-8225 or writing the Fund.

APPENDIX A

DESCRIPTION OF SHORT-TERM RATINGS

Description of certain short-term ratings assigned by Standard & Poor's Ratings Services ("S&P") and Moody's Investors Service ("Moody's"):

S&P

A-1 - A short-term obligation rated 'A-1' is rated in the highest category by S&P. The obligor's capacity to meet its financial commitment on the obligation is strong. Within this category, certain obligations are given a plus sign (+) designation. This indicates that the obligor's capacity to meet its financial commitment on these obligations is extremely strong.

A-2 - A short-term obligation rated 'A-2' is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher rating categories. However, the obligor's capacity to meet its financial commitment on the obligation is satisfactory.

Moody's

Prime rating system (short-term)

Issuers rated **Prime-1** (or supporting institutions) have a superior ability for repayment of senior short-term debt obligations. Prime-1 repayment ability will often be evidenced by (a) leading market positions in well-established industries, (b) high rates of return on funds employed, (c) conservative capitalization structure with moderate reliance on debt and ample asset protection, (d) broad margins in earnings coverage of fixed financial charges and high internal cash generation, and (e) well-established access to a range of financial markets and assured sources of alternate liquidity.

Issuers rated **Prime-2** (or supporting institutions) have a strong ability for repayment of senior short-term debt obligations. This will normally be evidenced by many of the characteristics cited above but to a lesser degree. Earnings trends and coverage ratios, while sound, may be more subject to variation. Capitalization characteristics, while still appropriate, may be more affected by external conditions. Ample alternate liquidity is maintained.

Issuers rated **Prime-3** (or supporting institutions) have an acceptable ability for repayment of senior short-term obligations. The effect of industry characteristics and market compositions may be more pronounced. Variability in earnings and profitability may result in changes in the level of debt protection measurements and may require relatively high financial leverage. Adequate alternate liquidity is maintained.

APPENDIX B

Jubak Asset Management, LLC Proxy Voting Policy and Guidelines

Generally, the Advisor will not take any action or render any advice with respect to the voting of proxies solicited by, or with respect to, the issuers of securities in which the client's assets may be invested.

Upon request by a client, the Advisor will vote proxies based on the Advisor's reasonable judgment of that vote most likely to produce favorable financial results for the client. Proxy votes generally will be cast in favor of proposals that maintain or strengthen the shared interests of shareholders and management, increase shareholder value, maintain or increase shareholder influence over the issuer's board of directors and management, and maintain or increase the rights of shareholders; proxy votes generally will be cast against proposals having the opposite effect. However, the Advisor will consider both sides of each proxy issue. Consistent with the Advisor's paramount commitment to the financial investment goals of its clients, social considerations will not be considered absent contrary instructions by a client.

Conflicts of interest between the Advisor or a principal of the Advisor and the Advisor's clients in respect of a proxy issue conceivably may arise. If the Advisor determines that a material conflict of interest exists, the Advisor will take necessary steps to resolve the conflict before voting the proxies. For example, the Advisor may disclose the existence and nature of the conflict to the client owning the securities, and seek directions on how to vote the proxies; the Advisor may abstain from voting, particularly if there are conflicting client interests (for example, where client accounts hold different client securities in a competitive merger situation); or take other necessary steps designed to ensure that a decision to vote the proxy is in the client's best interest and was not the product of the conflict.

The Advisor keeps certain records required by applicable law in connection with its proxy voting activities for certain clients and shall provide proxy voting information to such clients upon their written or oral request.

GUIDELINES

Each proxy issue will be considered individually. The following guidelines are a partial list to be used in voting proposals contained in the proxy statements, but will not be used as rigid rules.

1. The Advisor generally casts proxy votes against issues that seek to entrench the Board and management of a company through anti-takeover measures, staggered Board terms, super majority requirements and poison pill provisions.

2. The Advisor is highly sensitive to any measures that potentially dilute shareholder interests through new security issuance or excessive management compensation through equity gifting.
3. The Advisor will not vote shares in the Fund portfolio in favor of any “social” issues unless such issues happen also, in the Advisor’s judgment, to directly advance shareholder value.
4. The Advisor generally votes in favor of measures that provide shareholders with greater abilities to nominate directors; hold directors and management accountable for performance; allow shareholders to directly vote on takeover proposals by third parties.
