## *INVESTMENT PARTNERSHIP, LLC*

*“Luck is what happens when preparation meets opportunity” ---Seneca*

### **Introduction**

The partnership, in its sole formation, will seek profitable opportunities at the mere possibility, or probability, that there is some disorderly climax in our global monetary affairs.

The cost of such a disorderly climax will certainly compound because it will involve the interruption of productive activity in the real economy.

Therefore, the purpose of this partnership is to not only protect participants capital but appropriately mitigate, allocate, and profit on the restructuring of global monetary systems.

The timing of these events is unique to history in of itself and therefore the lifetime of this partnership could be expected to last no more than a decade. Opportunity, as they say, is knocking at the door.

There is much positive convexity to

capture within the capital markets during a global monetary restructuring. As such, this unique time frame allows for the very high probability to capture significant financial wealth in a very small time frame.

It is in my view, in clearly recognizing this opportunity, that formulating a partnership with these goals set henceforth, as such to capitalize on this uniqueness would be in the best financial interest of the participating partners.

As acting manager, my responsibilities and duties in regards to my time, efforts, due diligence, and fiduciary responsibility of members capital, will be to seek out the best opportunities across a spectrum of global financial markets to maximize all profit potential presented from a monetary crisis.

***"Financial crises are not caused by speculators, but by the authorities, which create or establish the wrong rules that allow speculators to do what people blame them for. In other words, to put it more clearly, speculators are messengers delivering bad news." ---- George Soros***
