

Disclosure Brochure

March 24, 2014

WOLF RIVER CAPITAL MISSISSIPPI, LLC

a Registered Investment Adviser

This brochure provides information about the qualifications and business practices of Wolf River Capital Mississippi, LLC (hereinafter “WRCMS” or the “Firm”). If you have any questions about the contents of this brochure, please contact Gina Douglas at (901) 312-9653. The information in this brochure has not been approved or verified by the United States Securities and Exchange Commission or by any state securities authority. Additional information about Wolf River Capital Mississippi, LLC is available on the SEC’s website at www.adviserinfo.sec.gov.

Wolf River Capital Mississippi, LLC is an SEC registered investment adviser. Registration does not imply any level of skill or training.

Business Address: 232 Goodman Road West, Suite 300, Southaven, MS 38671 | (901) 312-9653

Item 2. Material Changes

This Item discusses only the material changes that have occurred since WRCMS's initial filing, dated April 1, 2013. The Firm has the following material changes to disclose:

- WRCMS provides investment management services to the Wolf River Opportunity Fund (the "*Opportunity Fund*").

Item 4. Advisory Business

WRCMS has been in business as a registered investment adviser since March 2013 and is principally owned by R. Davis Howe, James Wingett, Douglas Duncan, Gina Douglas, Beth Gunn Lee, Janet Gerber, and William Renovich. The Firm's investment advisory services are provided from WRCMS's office in Southaven, MS. As of December 31, 2013, WRCMS had \$37,955,291 in assets under management, all of which was managed on a discretionary basis.

WRCMS will serve as the discretionary investment manager to the *Opportunity Fund*, a pooled investment vehicle that seeks to achieve risk-adjusted returns by capitalizing on opportunities in the credit markets. The *Fund* is exempt from registration under the Investment Company Act of 1940, and the interests in the *Fund* have been privately offered pursuant to Regulation D under the Securities Act of 1933. The Firm will tailor its management services with respect to the *Opportunity Fund* in accordance with its stated investment objectives. For purposes of this document, the term "client" generally refers to the Fund and not individual investors. All relevant information about the *Opportunity Fund* is set forth in the LLC Agreement which each investor is required to execute prior to being accepted as an investor.

Relevant information may consist of terms and conditions relative to the *Opportunity Fund*, including the compensation received by WRCMS, withdrawal rights, qualification requirements, suitability, risk factors, and potential conflicts of interest. WRCMS will provide services to the *Opportunity Fund* until terminated by either party pursuant to the terms of the LLC Agreement. Neither WRCMS nor the client may assign the agreement without the consent of the other party. A transaction that does not result in a change of actual control or management of WRCMS is not considered an assignment.

Item 5. Fees and Compensation

WRCMS will not charge an investment advisory fee for managing the *Fund*.

The *Fund* may incur certain charges imposed by other third parties, such as broker-dealers, custodians, trust companies, banks and other financial institutions (collectively "*Financial Institutions*"). These additional charges may include securities brokerage commissions, transaction fees, custodial fees, charges imposed directly by the issuer of a particular holding, deferred sales charges, odd-lot differentials, transfer taxes, wire transfer and electronic fund fees, and other fees and taxes on brokerage accounts and securities transactions.

Item 6. Performance-Based Fees and Side-by-Side Management

WRCMS does not provide any services for a performance-based fee (i.e., a fee based upon capital gains on or capital appreciation of the assets in an account).

Item 7. Types of Clients

WRCMS provides investment advisory services solely to the *Fund* and does not impose any account restrictions at this time.

Item 8. Methods of Analysis, Investment Strategies and Risk of Loss

Methods of Analysis and Investment Strategies

Investment Objective

WRCMS's investment objective is to seek positive risk-adjusted returns on capital primarily through the purchase of Securitized Pools (including the junior-most tranches) of such securities and trust preferred securities, subordinated debt securities or other securities, including equity securities, issued by banks, thrifts, insurance companies or other similar financial institutions or holding companies of real estate investment trusts, and such other investments including without limitation common and preferred stocks, convertible stocks and bonds, mutual funds, exchange traded funds, options, option futures, foreign securities, American Depositary Receipts, unit investment trusts, money market funds, corporate and government bonds, notes, evidences of indebtedness, general and limited partnership interests, units, joint venture interests, warrants, certificates of deposits, and any and all securities whatsoever, public or private, foreign or domestic, that the Firm may from time to time deem to be in the best interests of clients (collectively, "*Portfolio Securities*").

Investment Strategy

WRCMS seeks to identify selected *Portfolio Securities* that are undervalued and, accordingly, present opportunities for attractive, risk-adjusted returns. WRCMS believes that stress in the financial sector and the global recession have caused many securities to be deeply discounted and that the difficulty of analyzing the underlying collateral and structures of Securitized Pools in the current environment has led to discounted pricing of the securities.

Combined, WRCMS's seven (7) professionals have extensive experience on the equity and debt sides of the financial markets, as well as operational and investment experience within the banking, insurance, and investment banking industries. Additionally, prior to associating with WRCMS, WRCMS's professionals underwrote, structured and placed many of the Securitized Pools in which the *Fund* invests. The targeted asset classes and investment strategies of the *Fund* include, but are not limited to, the following:

- *Securitized Pools* – The primary focus of the *Fund* will be investment in securities from Securitized Pools of trust preferred securities and subordinated debt issued by bank holding companies, banks, insurance companies and real estate investment trusts. These Securitized Pools were largely originally issued between 2000 and 2007. Generally, the underlying collateral of the pools

originally consisted of 50 to 100 obligors. The transactions have different interest and principal waterfalls. The *Fund* may purchase bonds from various tranches of the Securitized Pools.

- *Trust Preferred Securities* – WRCMS expects that the *Fund*'s investments will also include trust preferred securities issued by bank holding companies and insurance companies. Generally, trust preferred securities have a 30 year maturity period from the date of issuance, with an initial non-call period of five (5) years. The securities have a five (5) year deferral option, where the issuer can defer its interest for a period of five (5) years without having such deferral result in an event of default. If the issuer exercises its deferral option, it is prohibited from paying interest and dividends on or redeeming forms of debt or equity that are *pari passu*, or subordinate to the trust preferred securities, including senior preferred stock issued via the Treasury Department's Capital Purchase Program, non-cumulative preferred stock, and common stock.
- The *Fund* may also invest in other debt and equity of financial services companies, or any other investment.

Description of Investment Process

- *Investment Analysis* – WRCMS has developed and maintains proprietary databases that facilitate tracking the performance of Securitized Pools as well as the individual obligors underlying the Securitized Pools. WRCMS will utilize its databases and general market knowledge to determine investment opportunities within the context of the current market and its expectation of the future market for individual securities and Securitized Pools.
- *Portfolio Evaluation* – Once an investment opportunity is determined to be attractive as a stand-alone investment, WRCMS will evaluate the effect of adding that investment to the *Fund* portfolio.
- *Investment and Portfolio Monitoring* – WRCMS will continually monitor positions to ensure that the investment thesis behind each position remains intact. WRCMS will also monitor market prices and spreads so that portfolio adjustments can be made as trading and intrinsic values converge or losses can be minimized in the event of a significant shift in an investment's fundamental premise. WRCMS will monitor aggregate investment positions with the goal of diversifying risk within the *Fund*'s parameters.
- *Development and Risks of Investment Manager's Trading Strategy* – The development of a trading strategy is a continual and dynamic process. WRCMS's trading strategy and methods for the Fund must therefore be modified from time to time. WRCMS's trading methods are confidential, and the description of them contained herein is not exhaustive. Trading decisions require the exercise of judgment by WRCMS. WRCMS may, at times, decide not to make certain trades, thereby forgoing participation in price movements that would have yielded profits or avoided losses. There is no assurance that the strategies or methods utilized by WRCMS will achieve the desired results.

Wolf River Capital Mississippi, LLC Disclosure Brochure

Risks of Loss

The *Fund's* investment program entails substantial risks, and there can be no assurance that its investment objectives will be achieved.

Market Risks

The profitability of a significant portion of WRCMS's recommendations may depend to a great extent upon the correct assessment of the future course of price movements of stocks and bonds. There can be no assurance that WRCMS will be able to predict those price movements accurately.

Distressed Securities

As stated, WRCMS is a distressed asset manager and as such, may recommend "below investment grade" securities and obligations of issuers in weak financial condition, experiencing poor operating results, having substantial capital needs or negative net worth, and/or facing special competitive or product obsolescence problems, including companies involved in bankruptcy or other reorganization and liquidation proceedings. These securities are likely to be particularly risky investments although they also may offer the potential for correspondingly high returns. Among the risks inherent in investments in troubled entities is the fact that it frequently may be difficult to obtain information as to the true condition of such issuers. Such investments may also be adversely affected by laws relating to, among other things, fraudulent transfers and other voidable transfers or payments, lender liability and the bankruptcy court's power to disallow, reduce, subordinate or disenfranchise particular claims. Such companies' securities may be considered speculative, and the ability of such companies to pay their debts on schedule could be affected by adverse interest rate movements, changes in the general economic climate, economic factors affecting a particular industry or specific developments within such companies. In addition, there is no minimum credit standard that is a prerequisite to WRCMS's recommendation of an instrument, and some or all of the obligations and securities which WRCMS recommends may be less than investment grade rated. The level of analytical sophistication, both financial and legal, necessary for successful investment in companies experiencing significant business and financial difficulties is unusually high. There is no assurance that WRCMS will correctly evaluate the value of the assets' underlying investments or prospects for a profitable return. In any reorganization or liquidation proceeding relating to a company which WRCMS recommends, clients may lose the investment, may be required to accept cash or securities with a value less than the original investment, and/or may be required to accept payment over an extended period of time. Under such circumstances, the returns generated by WRCMS may not compensate clients adequately for the risks assumed.

Illiquidity of Portfolio Investments

WRCMS may recommend investments that have limited liquidity under current market conditions. There may be legal, contractual or other restrictions on their resale and/or other factors. As a result, there is no

Wolf River Capital Mississippi, LLC Disclosure Brochure

guarantee that securities can be liquidated in a timely manner, and certain investments may require holding for an indefinite period of time or until the maturity thereof.

Highly Volatile markets

The market prices of financial instruments which WRCMS may recommend can be highly volatile. Price movements of investments which WRCMS may recommend are influenced by, among other things, interest rates; changing supply and demand relationships; trade, fiscal, monetary and exchange control programs and policies of governments and regulatory authorities; and national and international political and economic events and policies.

Credit Quality of Securities

There are no restrictions on the credit quality of investments that WRCMS may recommend. Investments which WRCMS may recommend may be deemed by rating agencies to have substantial vulnerability to default in payment of interest and/or principal. Securities may have the lowest quality ratings or may be unrated. Such ratings may indicate that payments are in default, that a bankruptcy petition has been filed with respect to the issuer, or that the issuer is regarded as having extremely poor prospects for being able to meet its financial obligations.

Investors should recognize that lower rated and unrated securities in which WRCMS may invest have large uncertainties or major risk exposure to adverse conditions and are considered to be predominantly speculative. Generally, such securities offer a higher return potential than higher rated securities but involve greater volatility of price and greater risk of loss of interest and principal.

The market values of certain of these securities also tend to be more sensitive to changes in economic conditions than higher rated securities. In addition, clients may incur additional expenses to the extent that it is required to seek recovery upon a default in the payment of principal or interest on its portfolio holdings.

In general, the ratings of nationally recognized rating organizations represent the opinions of these agencies as to the quality of securities that they rate. Such ratings, however, are relative and subjective; they are not absolute standards of quality and do not evaluate the market value risk of the securities. It is also possible that a rating agency might not change its rating of a particular issue on a timely basis.

Market Conditions and Governmental Action

WRCMS generally recommends a portfolio of investments which are primarily related or exposed to securities issued by financial institutions, insurance companies or real estate investment trusts in the United States. Although there are signs of moderate economic growth, as a result of the deteriorating economic trends in the United States coming out of the 2008-2009 recession, the credit markets have experienced significant contraction, de-leveraging and generally reduced liquidity. The United States federal government and state governments have implemented a broad variety of governmental actions

Wolf River Capital Mississippi, LLC Disclosure Brochure

and have implemented and are considering new regulations of the financial markets and financial services companies that WRCMS recommends. Any of these factors may negatively impact, perhaps significantly, WRCMS's investment strategy.

The value of investments may be adversely affected by periods of economic slowdown or recession, which may be accompanied by declines in real estate values, decreased demand for commercial credit and higher failure rates of banks and bank holding companies. In particular, the continued failure rate of banks and bank holding companies at a level consistent with levels experienced over the last two years could adversely affect clients' returns.

Catastrophic events and adverse market conditions may have a negative impact on the performance and profitability of insurance companies, as not only may a reduction in economic activity reduce the demand for insurance, but insurance companies may also suffer contemporaneous reductions in investment income and increased investment losses. These circumstances, coupled with difficulty in raising capital, could lead to further economic difficulties and insolvency for certain insurance companies and ultimately result in losses on investments issued by such insurance companies and an adverse effect on returns.

Most investments have floating coupon rates indexed to three month LIBOR. Sustained low interest rates will impact returns negatively.

Securities and futures markets and the credit markets are subject to comprehensive statutes, regulations and other requirements. The Securities and Exchange Commission, other regulators, self-regulatory organizations and exchanges are authorized to take extraordinary actions in the event of market emergencies. The regulation of derivatives transactions and funds that engage in such transactions is an evolving area of law and is subject to modification by government and judicial actions.

The effects of any changes in law or interpretations of existing laws could be substantial and adverse to clients' investments.

Each of these recent and developing economic and governmental factors may impact WRCMS's ability to purchase and sell investments and to recover its clients' investments (or achieve any return on such investment).

Financial Institution Regulatory Reform

The financial markets remain in a state of recovery from the "great recession" of 2008 and 2009. Continuing developments in the global financial markets illustrate that the current environment is one of extraordinary and possibly unprecedented uncertainty. Volatility remains high from a historical context. In light of such recent market turmoil and the overall weakening of the financial services industry, certain financial institutions or bank holding companies may be adversely affected and may become subject to additional legal, regulatory, reputational and other unforeseen risks that could have a material adverse effect on the implementation of the WRCMS's investment strategy. The laws and regulations affecting financial services companies continue to evolve in an unpredictable manner. Laws and regulations,

particularly those involving modifications to Tier I capital ratio requirements of bank holding companies, can change quickly and unpredictably and may at any time be amended, modified, repealed or replaced in a manner that is adverse to the interests of these institutions' various stakeholders. However, the increase of capital requirements is generally a net positive for debt holders.

Insolvency Considerations

Investments in securities may be adversely affected by the issuers' reorganization, insolvency or liquidation proceedings. A bankruptcy court, the FDIC or other regulatory authorities, as applicable, could determine to invalidate, in whole or in part, the investment in the certain securities, to subordinate such indebtedness to existing or future creditors of the issuer or to recover amounts previously paid by the issuer in satisfaction of such indebtedness. Furthermore, in liquidation (both in and out of bankruptcy) and other forms of corporate reorganization, there exists the risk that the reorganization either will be unsuccessful (due to, for example, failure to obtain requisite approvals), will be delayed (for example, until various liabilities, actual or contingent, have been satisfied) or will result in a distribution of cash or a new security the value of which will be less than the purchase price to the client in respect to which such distribution was made.

Securities issued by Special Purpose Trust Subsidiaries

WRCMS may recommend securities issued by special purpose trust subsidiaries of financial institutions, insurance companies or real estate investment trusts. The trust subsidiary uses the proceeds of the sale of its securities to purchase deferrable subordinated debentures (each, a "Corresponding Debenture") or other subordinated debt of its parent financial institution or holding company (each, a "Corresponding Debenture Issuer"). A trust's only source of cash to make payments on its securities will be the interest payments it receives on the Corresponding Debentures. The Corresponding Debenture Issuer is dependent on dividends from its operating subsidiaries to make payments on the Corresponding Debentures. These operating subsidiaries are highly regulated and in most cases subject to regulatory limitations related to dividend payments to their respective holding companies. The securities have maturities and coupons that mirror the Corresponding Debentures of the Corresponding Debenture Issuer.

Securities issued by each trust will generally be redeemed when the Corresponding Debentures issued by its Corresponding Debenture Issuer are paid at maturity, or upon earlier optional redemption of the Corresponding Debentures. The securities may have varying coupon rates, distribution or payment dates and accrual periods, call prices and dates, maturity dates and other terms from one another.

Payments under the Corresponding Debentures, and in turn on the securities and the Securitized Pools that they underlie, are highly dependent upon payments received from the relevant Corresponding Debenture Issuer and its subsidiaries. Furthermore, adverse developments with respect to the financial, insurance and real estate industries in general may adversely affect the ability of a Corresponding Debenture Issuer to make payments under the Corresponding Debentures.

Wolf River Capital Mississippi, LLC Disclosure Brochure

The obligations of each Corresponding Debenture Issuer under the guarantee it provides in respect of the securities and its Corresponding Debentures will generally be unsecured, subordinate and junior in right of payment to all present and future senior indebtedness of such Corresponding Debenture Issuer. No payment of principal of or premium, if any, or interest on any Corresponding Debenture may be made if (i) any payment due in respect of senior indebtedness of the issuing Corresponding Debenture Issuer is not paid when due and any applicable grace period with respect to such default has ended with such default not having been cured or waived or ceasing to exist or (ii) the maturity of any senior indebtedness of the issuing Corresponding Debenture Issuer has been accelerated because of a default and such acceleration has not been rescinded or cancelled. In addition, Corresponding Debenture Issuers may be parties to agreements with holders of their senior indebtedness that have the practical effect of further subordinating the rights of holders of the Corresponding Debentures to such holders of their senior indebtedness under certain circumstances. Any Corresponding Debenture Issuer or any subsidiary of any Corresponding Debenture Issuer may incur additional indebtedness, secured or unsecured, including any senior indebtedness, without limitation.

The Corresponding Debentures are not insured or guaranteed by the regulatory authority of any financial institution, any governmental agency or instrumentality or any insurance guaranty fund. Because each Corresponding Debenture Issuer that issues Corresponding Debentures may be a holding company, its ability to make distributions on the Corresponding Debentures will be highly dependent upon the earnings of its subsidiaries and its ability to receive payments from such subsidiaries in the form of dividends, fees, loans or distributions. The subsidiaries of each Corresponding Debenture Issuer are separate and distinct legal entities and have no obligation, contingent or otherwise, to pay any amounts under the Corresponding Debentures or any guarantee provided by the Corresponding Debenture Issuer in respect of the securities, or to make any funds available therefore, whether by dividends, loans or other payments.

There are also various legal and regulatory limitations on the extent to which a Corresponding Debenture Issuer's subsidiaries may extend credit, pay dividends or otherwise supply funds to the Corresponding Debenture Issuer or various of its affiliates. In particular, with respect to insurance companies, payments of dividends or other distributions to the Corresponding Debenture Issuer or its affiliates by the Corresponding Debenture Issuer's U.S. domiciled insurance company subsidiaries are subject to the various insurance regulatory restrictions of the states having jurisdiction over such insurance company subsidiaries. Such laws typically vary from state to state. Certain states generally require that any statutory surplus following any dividend or distribution be reasonable in relation to such subsidiary's outstanding liabilities and adequate to meet its financial needs and permit the payment of dividends only out of earned (unassigned), as opposed to contributed, statutory surplus. In addition, many states prohibit an insurance company, without prior notice to and approval of the applicable regulatory authority, to declare or pay an extraordinary dividend, which is typically defined as any dividend or distribution of cash or other property whose fair market value, together with other dividends or distributions made within the preceding 12 months, exceeds the greater of such subsidiary's statutory net gain from operations of

the preceding calendar year or 10% of statutory surplus as of the preceding December 31, although some states use more stringent standards. For insurance regulatory purposes, the surplus of an insurance company is generally determined on the basis of Statutory Accounting Practices ("SAP") prescribed or permitted by the state of domicile rather than generally accepted accounting principles. SAP generally is a more conservative measure of an insurance company's surplus.

In addition, certain agreements, loans, exchanges of assets and other transactions between an insurance company subsidiary and its affiliates, including its Corresponding Debenture Issuer, may require prior notice to or approval of the applicable regulatory authority. Such restrictions and requirements may affect the permissibility and timing of distributions to a Corresponding Debenture Issuer from its insurance company subsidiaries. Moreover, the right of a Corresponding Debenture Issuer to participate in any distribution of assets of any of its subsidiaries upon liquidation, reorganization or otherwise will be subject to the claims of the creditors and any preferred equity holders of the applicable subsidiary, except to the extent that the Corresponding Debenture Issuer is recognized as a creditor of such subsidiary. Even if the Corresponding Debenture Issuer is recognized as a creditor of its insurance company subsidiary, its claims as such will likely be subordinated to those of policyholder creditors in the context of the liquidation of the insurance company subsidiary pursuant to the applicable state insolvency laws governing such liquidation. Accordingly, the Corresponding Debenture Issuer's Corresponding Debentures and guarantee will effectively be subordinated to all existing and future liabilities and preferred equity of the Corresponding Debenture Issuer's insurance subsidiaries. With respect to bank issuers, dividend payments from the depository institution subsidiaries of Affiliated Depository Institution HCs or the Holding Company Subordinated Debenture Issuer are subject to regulatory limitations, generally based on current and retained earnings of the depository institution subsidiary and other factors, imposed by law or regulation and, in some cases, require prior regulatory approval. Payment of dividends is also subject to regulatory restrictions if such dividends would impair the capital of the depository institution subsidiary and in certain other cases.

A default in payment or a deferral in interest payments on any Corresponding Debenture will decrease the amount of cash available to the trusts to make payments on the securities.

The terms and provisions of the securities may vary and such variations may be material. There can be no assurance that differences between the terms and provisions of some securities in comparison to the terms and provisions of other securities will not have an adverse effect on any Securitized Pools that they underlie and, consequently, on the clients to the extent the client owns any such securities or Securitized Pools. Clients should consider and assess for themselves the likely level of defaults and the likely level and timing of recoveries on the securities and on any the Securitized Pools that they underlie.

General Risk of Loss

Investing in securities involves the risk of loss. Clients should be prepared to bear such loss.

Item 9. Disciplinary Information

WRCMS is required to disclose the facts of any legal or disciplinary events that are material to a client's evaluation of its advisory business or the integrity of management. WRCMS does not have any required disclosures to this Item.

Item 10. Other Financial Industry Activities and Affiliations

WRCMS is under common control with its affiliated SEC registered investment adviser, Wolf River Capital Management, LLC (CRD No. 149038), and certain of the Firm's Supervised Persons also serve in the same or similar capacity for Wolf River Capital Management, LLC. Wolf River Capital Management, LLC serves as the investment manager to several affiliated pooled investment vehicles, as described in its Form ADV Part 2A. Each investment adviser renders services independent of the other, and no clients of Wolf River Capital Management, LLC are solicited to invest in the *Fund*.

Item 11. Code of Ethics

WRCMS and persons associated with WRCMS ("Associated Persons") are permitted to buy or sell securities that it also recommends to clients consistent with WRCMS's policies and procedures.

WRCMS has adopted a code of ethics that sets forth the standards of conduct expected of its associated persons and requires compliance with applicable securities laws ("*Code of Ethics*"). WRCMS's *Code of Ethics* contains written policies reasonably designed to prevent the unlawful use of material non-public information by WRCMS or any of its associated persons. The *Code of Ethics* also requires that certain of WRCMS's personnel (called "*Access Persons*") report their personal securities holdings and transactions and obtain pre-approval of certain investments.

Unless specifically permitted in WRCMS's *Code of Ethics*, none of WRCMS's *Access Persons* may effect for themselves or for their immediate family (i.e., spouse, minor children, and adults living in the same household as the *Access Person*) any transactions in a security which is being actively purchased or sold, or is being considered for purchase or sale, on behalf of any of WRCMS's clients.

When WRCMS is purchasing or considering for purchase any security on behalf of a client, no *Access Person* may effect a transaction in that security prior to the completion of the purchase or until a decision has been made not to purchase such security. Similarly, when WRCMS is selling or considering the sale of any security on behalf of a client, no *Access Person* may effect a transaction in that security prior to the completion of the sale or until a decision has been made not to sell such security. These requirements are not applicable to: (i) direct obligations of the Government of the United States; (ii) money market instruments, bankers' acceptances, bank certificates of deposit, commercial paper, repurchase agreements and other high quality short-term debt instruments, including repurchase agreements; (iii)

shares issued by mutual funds or money market funds; and (iv) shares issued by unit investment trusts that are invested exclusively in one or more mutual funds. Notwithstanding the above, Access Persons may effect transactions for themselves at the same time as clients as part of a block trade, in accordance with the Rules and the Compliance Manual.

Clients and prospective clients may contact WRCMS to request a copy of its *Code of Ethics*.

Item 12. Brokerage Practices

As discussed above, in Item 5, WRCMS will not charge an investment advisory fee for managing the *Fund*, but the *Fund* may incur certain expenses and transaction fees imposed by *Financial Institutions*.

Factors which WRCMS considers in utilizing specific *Financial Institutions* include their respective financial strength, reputation, execution, pricing, research and service. The transaction fees charged by a particular *Financial Institution* may be higher or lower than those charged by others.

The commissions paid by WRCMS's clients comply with WRCMS's duty to obtain "best execution." Clients may pay commissions that are higher than another qualified *Financial Institution* might charge to effect the same transaction where WRCMS determines that the commissions are reasonable in relation to the value of the services received. In seeking best execution, the determinative factor is not the lowest possible cost, but whether the transaction represents the best qualitative execution, taking into consideration the full range of a *Financial Institution's* services, including among others, the value of research provided, execution capability, costs, and responsiveness. WRCMS seeks competitive rates but may not necessarily obtain the lowest possible commission rates for client transactions. WRCMS periodically and systematically reviews its policies and procedures regarding its recommendation of *Financial Institutions* in light of its duty to obtain best execution.

Consistent with obtaining best execution, brokerage transactions may be directed to certain broker-dealers in return for investment research products and/or services which assist WRCMS in its investment decision-making process. Such research generally will be used to service all of WRCMS's clients, but brokerage commissions paid by one client may be used to pay for research that is not used in managing that client's portfolio. The receipt of investment research products and/or services as well as the allocation of the benefit of such investment research products and/or services poses a conflict of interest because WRCMS does not have to produce or pay for the products or services.

Software and Support Provided by Financial Institutions

WRCMS may receive from certain *Financial Institutions*, without cost to WRCMS, computer software and related systems support. WRCMS may receive the software and related support without cost because WRCMS custodies assets or trades through a particular *Financial Institution*. The software and support is not provided in connection with securities transactions of clients (i.e. not "soft dollars"). The software and related systems support may benefit WRCMS, but not its clients directly. In fulfilling its duties to its

clients, WRCMS and its affiliates endeavor at all times to put the interests of their clients first. WRCMS's receipt of economic benefits from a broker-dealer creates a conflict of interest since these benefits may influence WRCMS's choice of broker-dealer over another broker-dealer that does not furnish similar software, systems support, or services.

Item 13. Review of Accounts

WRCMS's investment committee monitors client portfolios as part of an ongoing proprietary process. Investors in the *Fund* may receive a report from WRCMS that may include such relevant account and/or market-related information such as the *Fund's* performance and capital account value on a periodic basis. In addition, all investors in the *Fund* receive the audited financial statements of the *Fund* after the end of each fiscal year.

Item 14. Client Referrals and Other Compensation

WRCMS does not compensate any third parties for client referrals. The Firm may receive an economic benefit from certain *Financial Institutions* it utilizes in managing the *Fund*, as further described in Item 12 (above).

Item 15. Custody

WRCMS is deemed to have custody over the *Fund*, and therefore the Firm will either i) engage an independent auditor to perform a surprise annual examination of the *Fund's* accounts or ii) engage an independent, PCAOB registered accounting firm to perform an annual audit of the *Fund's* accounts and distribute the audited financial statements to investors.

Item 16. Investment Discretion

WRCMS will retain the authority to exercise discretion on behalf of the *Fund*. WRCMS takes discretion over the following activities:

The securities to be purchased or sold;

The amount and price of securities to be purchased or sold;

When transactions are made; and

The *Financial Institutions* to be utilized.

Item 17. Voting Client Securities

WRCMS may vote client securities (proxies) on behalf of its clients. When WRCMS accepts such responsibility, it will only cast proxy votes in a manner consistent with its stated policies and procedures. The following is a brief summary of WRCMS's Proxy Voting Committee and Policies and Procedures.

Proxy Voting Committee

The Proxy Voting Committee ("Committee") consists of the members of WRCMS's Investment Committee. Three members of the Committee must be present for a quorum to be met; at least one such member must be a Principal.

The Leader of the Committee is responsible for the following:

- Monitoring proxy voting deadlines;
- Convening the Committee from time to time in anticipation of deadlines;
- Keeping the records of the Committee; and
- Ensuring that proxy votes are submitted to the appropriate parties.

Proxy Policies and Procedures

- If a quorum is not met, the Committee is adjourned and reconvened later when a quorum can be met.
- The members of the Committee present pertinent facts from an issuer's solicitation documents to the Committee. Additional information on the issuer that is deemed relevant by the members is also presented and discussed.
- The Committee determines which clients hold notes with voting rights and which vote benefits the positions held by these clients.
- The Committee identifies conflicting interests among clients and the affiliated client accounts. For conflicts between affiliated client accounts and internal-only accounts, including the *Fund*, the Committee votes in accordance with the best interests of the clients. For conflicts between affiliated client (i.e., not internal-only, such as the *Fund*) accounts, the Committee votes each affiliated client account in its individual best interest.
- The Committee determines the appropriate vote for each client and affiliated client which holds notes with voting rights. As noted above, the appropriate vote for different client accounts may differ based on the specific class of notes held by each account and/or the investment objectives of each account.
- The Leader designates a committee member to submit proxy votes and any required representations or proof of ownership to the appropriate parties.

- The Leader keeps records from each Proxy Voting Committee using the Proxy Voting Committee record or a similar form as deemed appropriate by Proxy Voting Committee. The record should include the following information:
 - Brief summary of solicitation which requires the proxy vote
 - Client accounts for which proxies are to be voted and votes submitted
 - Members of Proxy Voting Committee present
- WRCMS's Chief Investment Officer signs off on the final votes, and the Leader keeps this with the Proxy Voting Committee records.

Item 18. Financial Information

WRCMS is not required to disclose any financial information pursuant to this Item due to the following:

The Firm does not require the payment of fees;

The Firm does not have a financial condition that is reasonably likely to impair its ability to meet contractual commitments to clients; and

The Firm has not been the subject of a bankruptcy petition at any time during the past ten years.
