General Information

Acorns Advisers LLC (Acorns) offers the Acorns Advisers Wrap Fee Program (the Program) to prospective clients. We are registered with the SEC as an Investment Adviser. Program Description

Acorns offers an easy way to regularly invest small and large amounts of money. Acorns offers a computer software-based algorithm that provides clients investment advice on allocations of exchange-traded funds (ETFs) based on personalized information that each client enters through the website or application. We place orders with our affiliated broker, Acorns Securities, LLC (Acorns Securities), to buy, rebalance, and sell the allocation each client selects. By combining brokerage and advisory services into the Program, Acorns simplifies the investment process for its customers. Acorns will interact with clients using a software application developed by its parent company, Acorns Grow, Inc.

The Program was designed for early adoption of non-retirement savings and does not incorporate overall financial or tax planning.

Portfolio Management

Acorns manages client portfolios in the Program with strategies based on Modern Portfolio Theory. Dr. Harry Markowitz, the Nobel Prize winning economist and founder of Modern Portfolio Theory, serves on the Acorns Investment Committee. Acorns constructs, revises, and recommends model portfolios with target allocations of equity and fixed-income ETFs. Then, initial allocations are determined by the software-based algorithm, which selects among the target allocations based on information from clients about their financial situation and risk profile.

When a client deposits money, Acorns constructs a combination of ETF purchases to align his or her account along the corresponding target allocation. Upon a client's request to withdraw money, a combination of ETF sales are initiated while continuing to pursue the corresponding target allocation.

Clients may manually select one of the target allocations other than the one recommended or currently in effect. As clients deposit or withdraw money the corresponding transactions will rebalance to pursue the modified target allocation. If the holdings of the account significantly deviate from the newly selected target allocation, then Acorns will initiate a rebalancing to bring the holdings within an acceptable range of the target allocation.

The Acorns algorithm is designed to keep the holdings within each client's portfolio within a specified range of the target allocation, even when the market prices of the ETFs fluctuate.

Acorns' clients agree to rebalance holdings automatically and to re-invest dividends automatically.

Acorns provides investment advisory services only through the Program. Clients should consider which, if any, of the portfolios offered through the Program results in the best allocation for their specific circumstances.

Fees

Acorns' clients pay an annual wrap fee of .25% for account balance of \$5000 or more. Accounts under \$5000 are subject to a fixed fee of \$1 per month for personal use of the Acorns' web or mobile application. The fees are not negotiable. The wrap fee includes advisory services, execution, clearance, custody, and account reporting. The fee schedule is as follows:

Account Balance	Fee
Under \$5000	Lesser of month-end account balance or \$1 per month.
\$5000 or more	.25% /year, charged monthly

Clients should be aware that Acorns is designed with **frequent** investing in mind. The fee structure may not be appropriate for individuals looking to make few or infrequent small-dollar investments.

The wrap fee is calculated based on the client's average daily balance and charged monthly in arrears. Custodian will deduct fees from the assets in the client's account on a monthly basis to pay Acorns.

Transaction costs are absorbed by Acorns as part of the Program. Clients may find the advisory and other services that comprise the Program may exceed the costs of similar services purchased separately.

The ETFs recommended by Acorns have fees that are separate and distinct from the fees paid to Acorns for its wrap fee program. These fees are outlined in the prospectus for each ETF.

Acorns reserves the right to waive any fees associated with the Program at its sole discretion.

Brokerage and Custody Services

Acorns will use its affiliated broker-dealer, Acorns Securities, as custodian for its clients' accounts. Clients agree to direct brokerage in their accounts with Acorns Securities. Acorns Securities will be responsible for confirmations and statements. It will utilize RBC Capital Markets, LLC as a custodian to hold clients' funds and ETF shares in safekeeping and to execute, clear, and settle ETF trades on an omnibus basis.

Account Requirements and Types of Clients

The Program is available to individuals who are legal U.S. residents and maintain a checking account with a U.S. bank. There is no minimum account size, and the minimum deposit is \$5.
