One Financial Plaza  
Hartford, CT 06103  
860-299-2000  
[www.conning.com](http://www.conning.com)

This Brochure provides information about the qualifications and business practices of Conning, Inc. ("Conning"). If you have any questions about the contents of this Brochure, please contact us at 860-299-2000 or at [robert.pearce@conning.com](mailto:robert.pearce@conning.com). The information in this Brochure has not been approved or verified by the United States Securities and Exchange Commission (SEC) or by any state securities authority.

Conning is a registered investment adviser. Registration of an Investment Adviser does not imply any level of skill or training. The oral and written communications of an Adviser provide you with information to determine whether to hire or retain an Adviser.

Additional information about Conning is also available on the SEC's website at [www.adviserinfo.sec.gov](http://www.adviserinfo.sec.gov).

## Item 2 – Material Changes

There were no material changes to Conning, Inc. during 2015. This brochure is used to provide our clients with a summary of new\or updated information. We will inform you of the revisions based on the nature of the updated information.

We will provide you with a new Brochure at any time, without charge. Our Brochure may be requested by contacting our Chief Compliance Officer at 860-299-2151 or [robert.pearce@conning.com](mailto:robert.pearce@conning.com).

Additional information about **Conning, Inc.** is also available via the SEC's web site [www.adviserinfo.sec.gov](http://www.adviserinfo.sec.gov).

## **Item 4 – Advisory Business**

Conning is a registered investment adviser with the Securities and Exchange Commission (“SEC”) under the Investment Advisers Act of 1940. Conning began conducting its SEC-registered investment advisory business in 1983. Conning is a wholly owned subsidiary of Conning & Company. Conning & Company is 100% owned by Conning Holdings Corporation, which is a portfolio company owned and managed by Aquiline Capital Partners, LLC. (“Aquiline”).

Conning specializes in managing fixed income investments on behalf of institutional and insurance company clients. Conning offers a range of actively managed multi-sector strategies. As of December 31, 2014, Conning’s assets under management totaled approximately \$82 billion, the majority of which are managed on a discretionary basis.

Conning provides investment services for diversified third party clients. Conning’s client base includes various insurance companies and pension plans.

### **Institutional Accounts**

Conning primarily provides fixed income investment management services to institutional clients. Conning only manages the assets which are the subject of its management agreement and does not consider the client’s other assets and other obligations. Conning receives authority to supervise and direct the investment of the assets on a discretionary or non-discretionary basis in accordance with the clients’ written objectives and limitations as outlined in each individual client’s Investment Management Agreement. Clients could impose restrictions or limitations on investing in specific securities or specific types of securities.

Conning’s High Dividend Equity (“HDE”) Strategy invests in a portfolio of large cap equities with similar characteristics: strong financial profiles, healthy dividend yields and a history of maintaining or raising the dividend payout. The portfolio is 100% invested and does not actively rotate between equity segments, sectors or regions. The HDE Strategy is designed to participate in the performance of rising equity markets and outperform in down markets, while providing a steady income component to total return in all markets.

Conning offers an internally managed indexed equity approach strategy which utilizes advanced computer-based portfolio management and trading systems. The advantages of this approach include low transactions costs, low fees relative to active management and the opportunity for tax management. Our indexed equity process optimizes the risk/reward trade-off. This passive approach provides broad exposure to the market, a high level of confidence in achieving market performance and the certainty of low costs.

Conning's Master Limited Partnership ("MLP") Strategy puts an emphasis on MLPs with attractive yields and stable to improving cash flow. We focus on larger capitalization MLPs with moderate leverage. There is a strong preference for MLPs which benefit from fee-based revenues not vulnerable to commodity price volatility. Preference is given to MLPs involved in transportation, storage and processing but not exploration and production. Portfolio turnover is limited to maximize after-tax returns.

### **Other Related Investment Management Services**

An outside sub-adviser is utilized when offering investment advice with respect to convertible bonds.

### **Publications of Periodicals**

Conning publishes research of general scope concerning the insurance industry. Clients occasionally request specific information or research formatted or arranged to suit their needs about industries or issues Conning has researched. To supply that information, we negotiate a fee with the client to fit the situation in relation to the amount of work required.

### **Risk & Capital Management Solutions**

Conning will provide advice on the insurance industry in general, not on specific securities. These services include investment advisory, asset allocation, asset liability management and strategic research on a consulting basis, and financial modeling software licensing. These services are offered as stand-alone or included in our full service product. Conning does not offer manager search or performance evaluation services.

## **Item 5 – Fees and Compensation**

The client's Investment Management Agreement specifies the fees charged by Conning. All fees are subject to negotiation. Other charges, fees and commissions are in addition to Conning's management fee. Conning's fees do not include brokerage commissions, transaction fees, and other related costs and expenses which shall be paid by the client. Conning does not receive any portion of these additional fees. For minimum account sizes, please refer to Item 7.

Some Institutional and Insurance Company Investment Management clients incur other charges including charges imposed by custodians.

### **Institutional Accounts**

Asset management fees are determined based on contractual provisions and are earned based on percentages of the assets under management. Billing is generally conducted quarterly in arrears with the majority of asset management clients billed using a four period monthly average which adds together assets under management for

the month that precedes the current calendar quarter for which the calculation is being made plus assets under management at the end of each month in the current calendar quarter, then dividing the sum by four. Conning does not deduct management fees from a client's account. Management fees are prorated for each capital contribution and withdrawal made during the applicable calendar quarter (with the exception of contributions and withdrawals made in the ordinary course of business, such as fees and expenses). Accounts initiated or terminated during a calendar quarter will be charged a prorated fee.

The fees charged for separately managed accounts are subject to negotiation and are based on the fair market value of the assets depending on the size of the account and strategy selected.

Fixed Income Services and Fees:

Annual fees are based on fee schedules the components of which are generally within the range of 10 basis points to 50 basis points for institutional clients. Conning seeks a minimum dollar fee or a minimum mandate size.

Specialty Asset Services and Fees:

Conning manages portfolios of specialty assets (e.g., high dividend equity yield, indexed equities and master limited partnerships). Annual fee schedules are negotiated on an account-by-account basis, based upon the type and scope of services provided, whether managed actively or passively, and the size of mandate. Fees are billed on a pro-rated basis monthly, quarterly, or semi-annually in arrears. Fee schedules are generally within the range of 10 basis points to 75 basis points annually for institutional clients. Conning seeks a minimum dollar fee or a minimum mandate size.

Incentive-Based Fees:

For certain types of clients and mandates, annual fees are calculated based on the income and capital appreciation of the account. Such an incentive-based fee will not be calculated on less than a quarterly basis. Fees are generally a negotiated combination of fixed-income services fees and incentive fees and are billed quarterly or semi-annually in arrears.

Accounts of this type are accepted only if all conditions of Rule 205-3 of the Investment Advisors Act of 1940 are met. Accounts of this type are accepted only if all conditions of Rule 205-3 of the Investment Advisors Act of 1940 are met. Incentive-based fees are charged to clients as permitted by Rule 205 under the Advisors Act.

**Publication of Periodicals Fees**

Publications are sold individually as well as by annual subscription. Fees are billed prior to fulfillment. All subscriptions can be cancelled by the client upon request. On a rare

occasion that a subscription is cancelled, pro-rata refunds are negotiated .

## **Risk & Capital Management Solutions**

Custom strategic research is produced on a negotiated contracted fee basis. Fees for these projects are negotiated on an individual basis and payable either in installments or upon completion of the project. Conning does not offer manager search or performance evaluation services.

### **Item 6 – Performance-Based Fees and Side-By-Side Management**

As we disclosed in Item 5 of this Brochure, Conning accepts performance-based fees from clients. Such a performance-based fee is calculated based on a share of capital gains on or capital appreciation of the assets of the client.

Clients should be aware that performance-based fee arrangements could create an incentive to recommend investments which are riskier or more speculative than those which would be recommended under a different fee arrangement.

Furthermore, as we also have clients who do not pay performance-based fees, we could have an incentive to favor accounts that do pay such fees because the compensation we receive from these clients is more directly tied to the performance of their accounts.

Conning addresses such conflicts by ensuring that all clients receive fair and equitable transactions by bunching trades when applicable. One way this is monitored is by the performance of a daily trade recap review conducted by the Compliance Department. Our risk management area also performs an independent trade review on a daily basis to identify potential price differences between client transactions.

### **Item 7 – Types of Clients**

As stated in Item 4, Conning provides primarily fixed income investment services for institutional diversified third party clients. Our client base primarily includes insurance companies and pension plans.

Regardless of client type, Conning seeks a minimum dollar fee or a minimum mandate size.

### **Item 8 – Methods of Analysis, Investment Strategies and Risk of Loss**

#### **FIXED INCOME:**

Conning's fixed income investment approach is founded on the following:

- ◆ Firm-wide sector views provide top down influence on portfolio construction
- ◆ Issue selection driven by "fundamentals first" philosophy
- ◆ Strategy implementation combines portfolio needs/constraints with sector views and selection opportunities

Investing in securities involves risk of loss that clients should be prepared to bear.

**Investment Process:** Conning's investment process is built on a long-standing and disciplined philosophy, a team-based investment approach and a "portfolio manager" service model. Our staff brings a wealth of experience in both the investment and insurance areas. Through our customized approach, our clients benefit from our focus on optimizing performance, managing risk and meeting client needs.

**Philosophy:** We understand that our clients' portfolios have a purpose beyond the immediate challenge of producing investment returns. These portfolios also exist to support the businesses of our insurance clients. They provide cash flow for claims and benefits along with income for contract guarantees. They stand behind our client's surplus and financial strength. Conning's investment philosophy centers around four beliefs. These beliefs imply four corresponding principles that are at the center of our investment approach.

Belief - Portfolio Management Principle

- Asset allocation provides greater opportunity to add value than interest rate anticipation - Emphasize asset allocation, sector rotation and security selection
- The income component of bond returns is critical in the long run - Emphasize spread and income in portfolio holdings
- Consistently predicting the future levels of interest rates is difficult - Control interest rate risk by prudent duration management
- Excessive concentrations of risk are imprudent - Manage overall portfolio risk through asset diversification

**Portfolio Construction:** Using a team approach, we design and implement portfolio construction through a disciplined allocation of resources focused on three areas of portfolio value: fundamental, relative and structural.

Fundamental Value

Since any investment, particularly a fixed income security, represents a series of cash flows owed to the portfolio, we look for assurance that those cash flows are

sustainable, both in amount and timing. Our credit and structured products analysts make such judgments and capsule their opinions in their official recommendations.

#### Relative Value

Relative value determination falls to the trading desk, where traders apply their knowledge of trading histories, inter-market spreads, dealer inventories, and end-user portfolios to find and execute the best price.

#### Structural Value

Portfolio managers are responsible for portfolio structure and ultimately determine how to construct and when to execute. This decision is based on the “best fit” for our client’s portfolio.

#### Factors that drive this decision include:

- The existing and desired duration exposure, yield curve positioning, credit posture and liquidity requirements
- Concentrations of risk by sector and sub-sector, cash flow and volatility exposures and relevant accounting effects

**Tactical Asset Allocation:** Every month, Conning produces an investment outlook that serves as the top-down influence on portfolio construction. Asset class teams – including portfolio managers, analysts and traders – meet and formulate recommendations pertaining to duration, yield curve position and sector allocations. Then, our entire investment team reviews these recommendations. Following open discussion and debate, the investment team determines the official investment policy for the current month. Conning’s portfolio managers use this policy to drive asset class and sector allocations, as well as duration and yield curve positioning. We provide these conclusions to our clients in our monthly “Capital Markets Outlook.”

#### EQUITY:

**Philosophy:** Our HDE Strategy focuses on bottom-up company fundamentals. Conning’s analysis of companies focuses on the financial strength of the company and its ability to generate cash flow from operations across the economic cycle to support current and future dividends. Sector concentration limits and equal weighting of all companies in the portfolio ensure a portfolio that is diversified by issuer and sector yet focused on names with similar financial profile characteristics. Conning utilizes an intersection approach of both quantitative screening and qualitative bottom up analysis. Companies must pass through multiple screens, identifying companies with an attractive dividend yield, a history of maintaining or raising the dividend, and a financial profile supportive of the future continuation of dividend payments.

**Investment Process:** Portfolio construction is a 3-stage process.

1. Quantitative Screening – S&P 500 is starting universe. All names are run through multiple screens. Roughly 70-100 companies pass.
2. Qualitative Review – All survivors have fundamental bottoms up review by Conning's credit research team. 60-80 names pass.
3. Comparative Review – Remaining names are reviewed against each other to identify weakest names in the group, and 10% are eliminated from the model portfolio.

**Philosophy:** For our Indexed Equity Strategy, we create optimal portfolios based on portfolio size, surplus sensitivity, client risk tolerance, cash flow expectations and optimal lot size. We use a mix of vendor market data and proprietary systems combined with optimization models to construct, monitor and adjust portfolios. Our portfolios are designed to exhibit optimal tracking variance with predictability and consistency. We monitor portfolio tracking in real-time and rebalance the portfolio when a tracking error violates specified tolerance parameters. Preferences with respect to market sector and style can be built into our passive approach.

**Investment Process:** Our Indexed Equity Process optimizes the risk/reward trade-off. This passive approach provides broad exposure to the market, a high level of confidence in achieving market performance and the certainty of low costs. During the investment process, we incorporate an allocation to equities as part of our overall Asset Liability Modeling. Various equity weightings are modeled to determine their impact on both risk and return relative to the overall portfolio and to the specific risk tolerance of our clients.

**Philosophy:** Conning's Master Limited Partnership (MLP) Strategy has an emphasis on MLPs with attractive yields and stable to improving cash flow and those MLPs involved in pipeline transportation, gathering and processing, and storage and terminalling. There is a strong preference for MLPs with significant fee-based revenues to limit commodity price volatility with a focus on larger capitalization MLPs. Issuers must meet Conning's requirements for strong management, steady and consistent cash flow, investment grade debt ratings, and those not overly exposed to commodity price volatility. The Strategy limits portfolio turnover to maximize after-tax returns.

**Investment Process:** There are the several steps to Conning's MLP investment process: Quantitative screens of broad MLP universe to identify companies meeting parameters; criteria reviewed include leverage metrics, cash flow trends, equity market capitalization, current yield, valuations, earnings stability and price volatility; qualitative analysis eliminates issues with higher risk profiles; issues that do not meet Conning's requirements for strong management, steady and consistent cash flow, investment

grade debt ratings, or those overly exposed to commodity price volatility, are eliminated; ongoing monitoring of MLP portfolio constituents; Conning conducts continuous reviews of potential portfolio constituents; changes in underlying business fundamentals can lead to a conviction sale; the target universe is reviewed quarterly for the addition of new names and the elimination of names no longer meeting parameters

## **Risk Management**

**Credit Risk:** The risk that the issuer of a security will fail to pay interest or principal in a timely manner, or that negative perceptions of the issuer's ability to make such payments will cause the price of the security to decline. Debt securities rated below investment-grade are especially susceptible to this risk.

**Sector Risk:** The value of securities focused in a particular industry or market sector will be highly sensitive to financial, economic, political and other developments affecting that industry or market sector, and conditions that negatively impact that industry or market sector will have a greater impact as compared to an account that does not have its holdings similarly concentrated.

**Interest Rate Risk:** The value of fixed income securities usually rise and fall in response to changes in interest rates. Declining interest rates generally increase the value of existing instruments, and rising interest rates generally decrease the value of existing instruments. Changes in value usually will not affect the amount of interest income, but will affect the value of shares. Interest rate risk is generally greater for investments with longer maturities.

Certain fixed income securities pay interest at variable or floating rates. Variable rate securities reset at specified intervals, while floating rate securities reset whenever there is a change in a specified index rate. The market prices of these securities could fluctuate significantly when interest rates change.

**Structured Risk:** These types of securities share many of the same risks. The impairment of the value of collateral or other assets underlying a mortgage-backed or asset-backed security, such as that resulting from non-payment of loans, results in a reduction in the value of such security and losses. Early payoffs in the loans underlying such securities result in receiving less income than originally anticipated. Securities with longer maturities tend to fluctuate in value more widely in response to changes in interest rates than shorter-term securities.

**Foreign Investing Risk:** Investing in securities of non-U.S. companies involves special risks and considerations not typically associated with investing in U.S. companies, and the values of non-U.S. securities are more volatile than those of U.S. securities. The values of non-U.S. securities are subject to economic and political developments in

countries and regions, or where the securities are traded. Values could also be affected by restrictions on receiving the investment proceeds from a non-U.S. country.

- **Emerging Market Risk.** The risks of foreign investments are generally greater in countries whose markets are still developing than they are in more developed markets. Emerging market countries typically have economic and political systems that are less fully developed, and can be expected to be less stable than those of more developed countries. Investments in emerging markets are considered speculative.

**Liquidity Risk:** Certain debt securities are substantially less liquid than many other securities.

### **Derivatives**

Conning periodically buys or sells forwards or futures as long as they are consistent with the client investment guidelines.

## **Item 9 – Disciplinary Information**

Conning and its management personnel do not have any disciplinary information to report.

## **Item 10 – Other Financial Industry Activities and Affiliations**

### **Industry Affiliations & Activities**

Conning is a portfolio company of the funds managed by Aquiline Capital Partners, LLC. ("Aquiline"). Aquiline is a private equity firm with a history of investing in financial services enterprises in industries such as property and casualty insurance, specialty financing, asset management, life insurance, and transaction processing. Aquiline also is a company formed to create and package limited partnerships (or similar pooled investment vehicles hereinafter referred to as "entities") for investment purposes. Conning or one or more of our related persons also act as general partner or manager of these entities. A list of these affiliated entities is specifically disclosed on Schedule D of Form ADV, Part 1 at Item 7.B. (Part 1 of our Form ADV can be accessed by following the directions provided on the Cover Page of this Firm Brochure.)

Conning is an affiliate of Goodwin Capital Advisers, Inc. and Conning Investment Products, Inc., both are registered investment adviser with the Securities and Exchange Commission ("SEC") under the Investment Advisers Act of 1940. Certain individuals will assume dual responsibilities within both Conning and Goodwin in relation to portfolio management, trading, and other services. All individuals must adhere to our Code of Ethics which is outlined in Item 11.

Conning provides investment management and advisory services for Cathay Life

Insurance Co., Ltd., an affiliate of Cathay Financial Holdings Co., Ltd. Cathay Financial is a minority percent owner of Conning.

Conning provides investment accounting and reporting services to both investment advisory and non-advisory clients and has a separate department of employees that dedicate 100% of their time to this function. Conning also licenses proprietary software to clients in connection with its investment advisory services. Finally, Conning does offer general business advice that does not fall within the definition of investment advice to some clients.

Conflict of interest within these interrelationships could include using the same vendor for different services.

### **Broker-Dealers**

Conning has an affiliated broker-dealer, Conning Investment Products, Inc. ("CIP"). Conning does not use this entity for client security transactions; however, CIP does offer affiliated or non-affiliated private placement funds to current Conning clients.

Certain management personnel of Conning are separately licensed as registered representatives of CIP.

Conning has another affiliated broker-dealer, CRT Capital Group, LLC. ("CRT"), which is under common control with its indirect owner Aquiline Capital Partners, LLC. From time to time, Conning places non-ERISA trades with CRT provided that best execution for the client is obtained.

Conflict of interest within these interrelationships could include using the same vendor for different services.

### **Item 11 – Code of Ethics, Participation or Interest in Client Transactions & Personal Trading**

Conning has a Code of Ethics for the entire firm describing its standard of business conduct and responsibility to its clients. The Code of Ethics includes provisions relating to the confidentiality of client information, a prohibition on insider trading, a prohibition of rumor mongering, restrictions on the acceptance of significant gifts and the reporting of certain gifts and business entertainment items, and personal securities trading procedures, among other things. All supervised persons at Conning must accept the terms of the Code of Ethics on an annual basis, or sooner if amended.

The Code of Ethics prohibits employees from buying or selling a security (with certain exemptions) held in their personal account within three business days after a client account trades the same security. In addition, employees are required to hold a security for no less than 30 days after purchase.

Conning's clients or prospective clients may request a copy of the firm's Code of Ethics by contacting the Chief Compliance Officer.

For more information on our Brokerage Practices, please refer to Item 12.

## **Item 12 – Brokerage Practices**

In the absence of specific written instructions in a client's investment management agreement, Conning has discretion in selecting brokers for client transactions.

Conning seeks best execution at the best price available for each trade. Conning also takes into consideration several factors, such as:

- the broker's ability to execute the trade;
- the size of the trade;
- characteristics of the security;
- the quality and reliability of brokerage services; and
- the overall direct net economic results to the account.

Conning also considers the availability of the broker to stand ready to execute possibly difficult transactions in the future, and the financial strength and stability of the broker.

Conning currently does not participate in soft dollar arrangements.

Conning does not receive client referrals from any broker.

Conning aggregates orders, when possible in accordance with client guidelines, for the purchase or sale of the same security for all participating accounts. When an order is filled in its entirety, each participating account receives their full allocation at the agreed upon trade execution price. When an order is partially filled, each participating account receives a pro rata allocation, at the agreed upon trade execution price, subject to certain exceptions including de minimis orders. Transaction costs are shared on a pro rata basis for all participating accounts.

SEC Rule 206(3)-2 of the Investment Advisers Act of 1940 allows an investment adviser, under certain circumstances, to engage in inter-account transactions. If one client of an investment adviser is looking to sell a security in its portfolio and another client of the same investment adviser is looking to purchase that security, this rule permits the investment adviser to do a cross trade between the two accounts. The buy/sale must be at fair market value and with no commissions. Conning will only engage in these cross trades when advantageous to both clients and with prior approval from the Chief Compliance Officer. Cross transactions will not be conducted through an affiliated broker-dealer.

Conning does accept direction from clients regarding which brokers to use. Currently, all client directed brokerage is subject to most favorable execution and best execution.

Conning's Best Execution Committee consists of members from investment management, trading, financial and compliance. The Committee meets quarterly to set, guide and review brokerage allocation and practices. New brokers are reviewed and approved by the Chief Risk Officer and the Compliance Department.

Conning does direct the purchase of securities on behalf of clients, in secondary market transactions, in public offerings directly from an underwriter or in privately negotiated transactions with an issuer. Securities purchased in public offerings could be resold shortly after acquisition in the immediate aftermarket to take advantage of price appreciation from the public offering price or for other reasons. Short-term trading of securities acquired in public offerings, or otherwise, result in higher portfolio turnover.

If consistent with a client's investment objectives, investment restrictions, and risk tolerance, Conning purchases securities sold in underwritten new issues, ("deal securities") for client accounts. Deal securities are allocated among participating accounts in a fair and equitable manner so as not to unfairly discriminate in favor of certain clients or types of accounts. When a portfolio manager receives a reduced allocation of deal securities, the portfolio manager will allocate the reduced allocation among accounts in accordance with the allocation percentages set forth in the initial allocation instructions for the deal securities, except where this would result in de minimis allocation to any client account.

Equity and fixed income securities are priced on a daily basis when available from Conning's pricing vendor's (Reuters/Markit). For month end portfolio pricing, Conning manually prices any fixed income security that is not priced by a vendor, using a pre-determined source hierarchy. When Reuters is unable to provide a price, Conning will look to Markit then the *street* (i.e., brokers buying/trading/selling) to provide pricing; therefore, where a broker-provided pricing is available, these take a highest precedence after Reuters and Markit. When a broker is unable to price a security, Barclay's Index pricing will be used. Similarly to broker's, Conning's Credit and Trading Groups research securities, particularly distressed securities. Where the Credit Group has issued documentation/justification for using particular price level/methods, that price will be used. Where pricing is not available from any 3<sup>rd</sup> party sources and sufficient information is available (via Bloomberg or other documentation) to model the security on Yieldbook, it is modeled using the best available indicative information. Conning will then use the Corporate Spread Matrix to provide a spread and apply to Yieldbook. When not enough information is available to model the security, we will benchmark the security using the monthly price return of a Barclays Sector Index. If we are not able price using the Spread Matrix, a Bloomberg price will be used, if available. Finally,

when no information is available, we will use the prior month price adjusted based on the price return of a pre-determined index. When these analytic methods cannot be used and no information is available, Conning will use the Prior Month Price as a last resort. Also, depending on the availability and timeliness of supporting documentation, the purchase price is used if/when it has been purchased within the month as this price represents an actual transaction price. Where the purchase was made nearer the beginning of the month there is greater emphasis on identifying a source from the hierarchy. Where supporting documentation is not available the purchase price is used.

Additionally, the supervisory team responsible for best execution quality standards meets quarterly and reviews transactions against all Conning-priced valuations; variances of 5% or more must be explained and documented.

Conning could give advice, or take action, with respect to any one client account which differs from the advice given, or action taken, with respect to another client account. However, Conning, to the extent practical and over a period of time, allocates investment opportunities to each account on a fair and equitable basis relative to other similarly-situated client accounts based on client guidelines and cash availability.

As in any business, mistakes do happen despite the good intentions of employees and the controls in place. Conning will correct trading errors in a timely manner with no financial loss to clients.

### **Item 13 – Review of Accounts**

On a continuous basis, Conning's portfolio managers conduct a review of their investment management clients' portfolios to monitor performance and to ensure compliance with client investment guidelines and restrictions. A separate independent Risk Management Group monitors portfolio compliance, pricing, performance, credit risk, and other risk factors daily (transaction review, pre-trade compliance), weekly (credit review), and monthly (pricing, post-trade compliance reports, performance vs. benchmark).

Conning will provide all clients written reports on a quarterly basis. Reports include market commentary, account performance, portfolio related characteristics, appraisal and transactions. Conning will provide reports on a more frequent basis if requested.

### **Item 14 – Client Referrals and Other Compensation**

Conning has entered into an arrangement to refer clients to a third-party who engages in the business of originating and servicing commercial mortgage loans ("CML") and who is paid an on-going fee for any such referrals.

Conning currently has no solicitor arrangements; however, Conning does compensate employees with a fee for referring accounts to the firm.

### **Item 15 – Custody**

Conning does not have custody of client funds or securities. Clients should receive, at least quarterly, statements from the broker dealer, bank or other qualified custodian that holds and maintains the client's investment assets. Conning urges clients to carefully review those statements and compare official custodial records to the account statements that Conning provides to clients as noted in Item 13. On occasion, Conning's statements vary from custodial statements based on accounting procedures, reporting dates, or valuation methodologies of certain securities.

Conning's Hong Kong SFC-registered affiliate, Cathay Conning Asset Management Limited ("CCAM"), manages futures and equity options if they are acceptable in the respective client's investment guidelines. Accordingly, margin accounts are set up by their clients under their own names.

CCAM has the discretion to send transfer instructions to the custodians or the margin brokers for fund transfer from their clients' custodian accounts to their own margin accounts (or vice versa) based on the power of attorney issued by their clients. Such power of attorney only authorizes CCAM to make fund transfer to the specified accounts owned by the same client.

### **Item 16 – Investment Discretion**

Conning typically receives discretionary authority from the client at the outset of an advisory relationship to select the identity and amount of securities bought or sold. In all cases, however, such discretion is exercised in a manner consistent with the stated investment objectives in the investment management agreement for the particular client account.

When selecting securities and determining amounts, Conning observes the investment policies, limitations and restrictions as outlined in the clients investment management agreement.

### **Item 17 – Voting Client Securities**

Conning does vote proxies on behalf of clients who contract this service via their investment management agreement. Conning utilizes the services of an outside proxy voting firm in order to vote on the client's behalf. Votes are cast in accordance with pre-determined guidelines provided by Conning which are based upon the clients' best

interests. Clients can obtain a copy of our complete proxy voting policies and procedures or how their proxies were voted by contacting us by telephone, email, or in writing.

As an investment adviser primarily to insurance companies, Conning's field of potential clients is a narrow one. As a result, the definitive situation where Conning's interest would be directly in conflict with that of a client when voting a proxy is where the issuer of the security is an insurance company, that is either a client or potential client of Conning. In that interest, it is conceivable that Conning could be tempted to vote a proxy in line with management's interest rather than shareholders' interest, in order to obtain favorable treatment from company decision makers who have the ability to hire or retain Conning as an investment adviser.

With respect to ERISA accounts, we will vote proxies unless the plan documents specifically reserve the plan sponsor's right to vote proxies. To direct us to vote a proxy in a particular manner, clients should contact their portfolio manager.

Under no circumstances will Conning act on behalf of its clients in legal proceedings, including class actions or bankruptcies involving securities purchased or held in the client account, other than with respect to bankruptcies involving private placement securities where such services have been retained by a client. If desired, clients may direct us to transmit copies of class action notices to the client or a third party. Upon such direction, we will make commercially reasonable efforts to forward such notices in a timely manner.

## **Item 18 – Financial Information**

Conning has no financial commitment that impairs its ability to meet contractual and fiduciary commitments to clients, and has not been the subject of a bankruptcy proceeding.

## **Item 19 – Best Practices**

Conning has a disaster recovery and business continuity program in place to help the firm manage in the case of an emergency. This program is designed to provide the most critical portfolio-management, operations, and computer systems with a measure of protection against potential disasters.

### Linwood E. Bradford, CFA President & Chief Executive Officer

This Brochure Supplement provides information about Linwood Bradford that supplements the Conning, Inc. Brochure. You should have received a copy of that Brochure. Please contact us at us at 860-299-2151 or at [robert.pearce@conning.com](mailto:robert.pearce@conning.com) if you did not receive Conning's Brochure or if you have any questions about the contents of this supplement.

#### **Item 2- Educational Background and Business Experience**

Linwood Bradford (b. 1967) obtained his Master of Business Administration as a Baker Scholar from Harvard Business School in 1993 and his Bachelor of Science Degree in Chemistry from Worcester Polytechnic Institute in 1989 where he graduated with High Distinction. Mr. Bradford has been with Conning since February 2010 and is the President & Chief Executive Officer. Previously, Mr. Bradford was an Operating Partner for Advent International from January 2009 to February 2010; and a Managing Director for Putnam Investments where he worked from July 1996 to July 2008.

Mr. Bradford earned his Chartered Financial Analyst (CFA) designation in 2011. The CFA charter is a globally respected, graduate-level investment credential established in 1962 and awarded by CFA Institute – the largest global association of investment

professionals. There are currently more than 90,000 CFA charterholders working in 135 countries. To earn the CFA charter, candidates must: 1) pass three sequential, six hour examinations; 2) have at least four years of qualified professional investment experience; 3) join CFA Institute as members; and 4) commit to abide by, and annually reaffirm, their adherence to the CFA Institute Code of Ethics and Standards of Professional Conduct, enforced through an active professional conduct program, require CFA charterholders to:

- Place their clients' interests ahead of their own
- Maintain independence and objectivity
- Act with integrity
- Maintain and improve their professional competence
- Disclose conflicts of interest and legal matters

Passing the three CFA exams is a difficult feat that requires extensive study. Earning the CFA charter demonstrates mastery of many of the advanced skills needed for investment analysis and decision making in today's quickly evolving global financial industry. As a result, employers and clients are increasingly seeking CFA charterholders - often making the charter a prerequisite for employment. Additionally, regulatory bodies in 19 countries recognize the CFA charter as a proxy for meeting certain licensing requirements, and more than 125 colleges and universities around the world have incorporated a majority of the CFA Program curriculum into their own finance course.

The CFA Program curriculum provides a comprehensive framework of knowledge for investment decision making and is firmly grounded in the knowledge and skills used every day in the investment profession. The three levels of the CFA Program test a proficiency with a wide range of fundamental and investment topics, including ethical and professional standards, fixed-income and equity analysis, alternative and derivative investments, economics, financial reporting standards, portfolio management, and wealth planning.

The CFA Program curriculum is updated every year by experts from around the to ensure that candidates learn the most relevant and practical new tools, ideas, and investment and wealth management skills to reflect the dynamic and complex nature of the profession. To learn more about the CFA charter, visit [www.cfainstitute.org](http://www.cfainstitute.org).

### **Item 3- Disciplinary Information**

Mr. Bradford does not have any disciplinary information to report.

#### **Item 4- Other Business Activities**

Mr. Bradford is President, CEO and a registered representative of Conning Investment Products, Inc. ("CIP"), an affiliated broker-dealer and investment adviser.

CIP is at times utilized as a placement agent for alternative investments offered to Conning client's in whom a commission will be paid to CIP for services rendered.

#### **Item 5- Additional Compensation**

Compensation paid includes commission or bonuses based on placement fees earned. While this individual endeavors at all times to put the interest of the clients first as part of our fiduciary duty, clients should be aware that the receipt of additional compensation itself creates a conflict of interest, and could affect the judgment of these individuals when making recommendations. All placement fees are disclosed to the client prior to investing.

#### **Item 6 - Supervision**

Conning has a continuing responsibility to adhere to the Advisors Act, including the supervision of, and the responsibility for, portfolio managers and anyone acting on behalf of Conning to read, understand and attest to comply with the policies and procedures located within Conning's Compliance Policies and Procedures Manual.

Mr. Bradford is supervised by the Conning & Company Board of Directors.

#### **Item 2- Educational Background and Business Experience**

Joseph Syage (b. 1956) obtained his Bachelor of Science in Accounting from Ithaca College in 1978. Mr. Syage has recently joined Conning as a Managing Director. Prior to Conning, Mr. Syage was a Managing Director, Insurance Asset Management at Brookfield Investment Management, Inc. from May 2000-June 2014. Mr. Syage also was a Senior Vice President\Senior Portfolio Manager at American Re Asset Management, Inc. from April 1996 – April 2000 and prior to that, he was a Vice

President/Portfolio Manager at Public Service Mutual Insurance Company from August 1984 – March 1996.

Mr. Syage has earned his Chartered Financial Analyst (CFA) designation. The CFA charter is a globally respected, graduate-level investment credential established in 1962 and awarded by CFA Institute – the largest global association of investment professionals. There are currently more than 90,000 CFA charterholders working in 135 countries. To earn the CFA charter, candidates must: 1) pass three sequential, six hour examinations; 2) have at least four years of qualified professional investment experience; 3) join CFA Institute as members; and 4) commit to abide by, and annually reaffirm, their adherence to the CFA Institute Code of Ethics and Standards of Professional Conduct, enforced through an active professional conduct program, require CFA charterholders to:

- Place their clients' interests ahead of their own
- Maintain independence and objectivity
- Act with integrity
- Maintain and improve their professional competence
- Disclose conflicts of interest and legal matters

Passing the three CFA exams is a difficult feat that requires extensive study. Earning the CFA charter demonstrates mastery of many of the advanced skills needed for investment analysis and decision making in today's quickly evolving global financial industry. As a result, employers and clients are increasingly seeking CFA charterholders - often making the charter a prerequisite for employment. Additionally, regulatory bodies in 19 countries recognize the CFA charter as a proxy for meeting certain licensing requirements, and more than 125 colleges and universities around the world have incorporated a majority of the CFA Program curriculum into their own finance course.

The CFA Program curriculum provides a comprehensive framework of knowledge for investment decision making and is firmly grounded in the knowledge and skills used every day in the investment profession. The three levels of the CFA Program test a proficiency with a wide range of fundamental and investment topics, including ethical and professional standards, fixed-income and equity analysis, alternative and derivative investments, economics, financial reporting standards, portfolio management, and wealth planning.

The CFA Program curriculum is updated every year by experts from around the to ensure that candidates learn the most relevant and practical new tools, ideas, and investment and wealth management skills to reflect the dynamic and complex nature of the profession. To learn more about the CFA charter, visit [www.cfainstitute.org](http://www.cfainstitute.org).
