INFORMATIONAL BROCHURE

DUNN WARREN INVESTMENT ADVISORS, LLC

Item 4: Advisory Business

Dunn Warren Investment Advisors, LLC (“DW”) has been in business since 2005. James Cornehlson and Elizabeth Cornehlson are the firm’s only principal owners.

DW provides personalized investment management services. We typically work with individuals, investment companies, pension and profit sharing plans, trusts, estates, charities, corporations, other business entities and other investment advisory firms.

Financial Planning

Financial planning is the process by which the client’s current circumstances (which include assets as well as liabilities, insurance, tax, retirement, education and other perspectives) are viewed against the clients goals, and a plan is developed to help the client reach those goals. In order for us to perform this service, the client will provide all information relevant to their financial position (income, savings, insurance, other investments, age, liabilities, personal obligations, etc.) and ultimate financial goals (retire dates, estate objectives, spending targets, etc.). Information is collected by personal interview, phone conference and/or in writing. Once collected, an investment plan will be created for the purpose of evaluating present status to the likelihood of accomplishing ultimate goals, as well as to monitor client progress through time.

This work is intended to be a general guide to aid in the overall planning process, with a key element of an early alert if a plan is falling off target and at risk of missing a major goal. Not every plan will be the same for every client, as circumstances and goals are highly personal. Because a plan is based on client provided information, accurate and complete data is essential, as well as updates regarding material changes in life circumstances.

Asset Management

DW requires each client to place at least \$50,000 with the firm. This minimum may be waived in the discretion of DW.

We believe that successful investing comes from correctly assessing and acting on risk, not by attempting to predict the future course of the market. Incorrectly assessing risk potentially leads to a painful loss of money. In addition to traditional asset management, DW also designs, implements and monitors various model strategies. Many DW clients have assets managed using one or more of these proprietary models. The models are more fully discussed in Item 8.

We manage our portfolios by acting on the current market environment for risk, valuation, economic growth, investor sentiment, and relative strength. Our investment decisions are based on a monthly

review of the portfolio unless global and/or portfolio specific events require a more frequent review. We tailor our investment advice to your needs based on a financial profile you complete at the onset of our relationship.

Asset management services are provided on a “discretionary” basis. When DW is engaged to provide asset management services on a discretionary basis, we will monitor your accounts to ensure that they are meeting your asset allocation requirements. If any changes are needed to your investments, we will make the changes. These changes may involve selling a security or group of investments and buying others or keeping the proceeds in cash. You may at any time place restrictions on the types of investments we may use on your behalf, or on the allocations to each security type. You will receive written or electronic confirmations from your account custodian after any changes are made to your account. You will also receive statements at least quarterly from your account custodian. Clients engaging us on a discretionary basis will be asked to execute a Limited Power of Attorney (granting us the discretionary authority over the client accounts) as well as an Investment Management Agreement that outlines the responsibilities of both the client and DW.

In certain limited circumstances, and in the discretion of the firm, a client may engage the firm to provide investment management services on a non-discretionary basis. This means the firm monitors the accounts in the same way as for discretionary services. The difference is that changes to your account will not be made until we have confirmed with you (either verbally or in writing) that our proposed change is acceptable to you.

Wrap Program

For clients whose assets come to DW directly and not through another adviser, DW may include certain transactional costs in the client’s management fee. This arrangement is referred to a “Wrap Program”. For account in the Wrap Program, DW pays a fee to the account custodian based on the transactions executed through the Wrap Program, thus taking on many of the clients’ transactions cost. Fees included in the wrap fee include transaction fees for the purchase or sale of securities, but do not include expenses related to the use of margin, wire transfer fees, the fees charged to shareholders of mutual funds or ETFs, mark-ups and mark-downs, spreads, odd-lot differentials, fees charged by regulatory agencies, and any transaction fees for securities trades executed by a broker-dealer other than the account custodian. Expenses for the management fees of third party managers are also not included in the Wrap Program, and to the extent utilized, you will be responsible for such fees. Because DW will be managing the assets of wrap fee program clients the same way as other non-wrap fee program clients, the use of external portfolio managers within the wrap program is expected to be limited. To the extent a third party manager is utilized, the fees payable to such managers will not be included in the wrap program. Therefore, there is no difference between how DW manages wrap fee accounts and how DW manages other accounts.

Because of the nature of a wrap fee program, where wrap fees are not tied to an account’s frequency of trading and apply to generally all assets in the account, the wrap fee program client may pay more or less than if the client had compensated DW outside of the wrap fee program. For example, if a client’s account is rarely traded, the transaction fees the client would have paid would be minimal, thus limiting the benefits of “wrapping” management fees and transaction fees. Clients whose accounts will be rarely

traded should carefully consider whether the Wrap Program is appropriate. Clients are not required to participate in the Wrap Program. DW receives a portion of the wrap fee for our services.

DW does not engage other portfolio managers to manage assets within the wrap fee program. To the extent a third party manager is utilized, the fees payable to such managers will not be included in the wrap program. DW is the sole portfolio manager in the wrap program, which means that DW receives a portion of the wrap fee for our services. Transaction fees are paid to various broker-dealers, mutual funds and ETFs. The remainder of the wrap fee is the management fee payable to DW. As discussed more fully in the wrap brochure, the transaction fees paid to the account custodian are based on a fixed rate that is based on the total amount of assets DW clients have in custody with the account custodian, where the rate drops as the amount of assets in custody increase. Accordingly, DW does not receive greater compensation for placing or not placing trades. However, DW does have an incentive to recommend the account custodian to clients in order to reduce the fixed fee for transactions. DW attempts to mitigate this conflict by requiring that the firm's employees acknowledge their fiduciary duty to place client interests ahead of their own, evaluating all aspects, including the wrap program asset-based transaction pricing when considering what broker-dealers to recommend.

DW will receive no additional compensation for offering the wrap fee program.

Please see the separate Wrap Fee Brochure for a more complete description of the Wrap Program.

Pooled Investment Vehicle

DW acts as the investment manager for a pooled investment vehicle, Rocky Mountain Capital Fund, LP (Rocky Mountain). The investment program of Rocky Mountain involves the investment of assets, both directly and indirectly in a select group of privately sourced debt instruments. Clients may be invited to invest in the private placement, but only if the respective investment is appropriate for the client. Dunn Warren charges a management fee to the private placement (please see Item 5 for details). The assets in the pooled vehicle are managed in accordance with its offering documents. Clients invested in the pooled vehicle should consult that vehicle's offering documents.

Assets under Management

As of the date of this brochure, DW has \$30,914,525 in assets under management in 742 accounts. Of this total, all accounts are managed on a discretionary basis.

Item 5: Fees and Compensation

A. Fees Charged

Financial Planning

Financial planning fees can be either hourly or on a fixed fee basis. Our hourly charge is \$175 per hour. For new clients, fixed fee rates vary from \$300 to \$3,000 for an initial financial plan. For existing

clients, the fixed fee for ongoing financial planning services will be \$90 per month.

The fee ranges stated are meant to be a guideline only. Fees may be higher or lower than this range, based on the nature of the engagement. Fees are negotiable, and will depend on the anticipated complexity of your plan. Some clients may also engage the firm on a project basis to provide advice on isolated matters, such as an evaluation of a special purchase.

Asset Management, Including Pooled Investment Vehicles

All investment management clients will be required to execute an Investment Management Agreement that will describe the type of management services to be provided and the fees, among other items.

DW offers a number of different options to clients for charging fees. Clients may choose to pay fees based on the value of their assets under management, choose a fee based on the performance of their accounts, or a combination of the two.

Generally, fees vary from 0.00% to 2.00% per annum of the market value of a client's assets managed by DW. The fee range stated is a guide. Fees are negotiable, and may be higher or lower than this range, based on the nature of the account. Factors affecting fee percentages include the size of the account, complexity of asset structures, and other factors.

For clients that are qualified, DW offers a 20% performance fees based on annual new capital appreciation in the Client's account. There are no retainers of flat fees associated with this fee option. The last fee option provided to clients who are qualified is a combination of the asset based fees and the performance based fee. The fee is typically 1.10% of assets managed and a 10% performance fee based on annual new capital appreciation. For either performance based fee option, capital appreciation in the Client's account is based upon a high watermark. Meaning that if your account goes from \$900,000 to \$1,000,000 in the first year, but is down to \$950,000 in the second, you do not pay a performance based fee until your account exceeds its highest year-end value. In the example given above, that is \$1,000,000. *Please see response to Item 6 for additional information.*

Cash Policy

Clients who wish to move their account to cash or cash equivalents must submit that request in writing. We will continue to bill the account for the remainder of the quarter, and will send you a notification letting you know that you have until the next quarter to reinvest. If after the end of the second quarter, you have not elected to reinvest, the account will be billed per your investment advisory agreement and then terminated.

B. Fee Payment

For all clients, clients may choose to pay upon receipt of an invoice from the firm by check or bank check, or their investment advisory fees will be debited directly from each client's account. The advisory fee is paid either annually or quarterly, in arrears, and the value used for the fee calculation is the daily average balance of the portfolio for the previous quarter of year. In some cases, the fees are

based on the balance of the account as of the end of the previous quarter or year. The annual payment of fees is only available for performance fee based accounts. This means that if your annual fee is 1.00%, then each quarter we take the sum of each day's balance and then divide by the number of the days in the period to calculate our fee. Once the calculation is made, we will instruct your account custodian to deduct the fee from your account and remit it to DW.

Clients whose fees are directly debited will provide written authorization to debit advisory fees from their accounts held by a qualified custodian chosen by the client. Each quarter, clients will receive a bill itemizing the fees to be debited, including the formula used to calculate the fee, the amount of assets upon which the fee is based, and the time period covered by the fee. The invoice will also state that the fee was not independently calculated by the custodian. The client will also receive a statement from their account custodian showing all transactions in their account, including the fee.

C. Other Fees

There are a number of other fees that can be associated with holding and investing in securities. You will be responsible for fees including transaction fees for the purchase or sale of a mutual fund or Exchange Traded Fund, or commissions for the purchase or sale of a stock. To the extent you participate in Dunn Warren's Wrap Program, you will not be responsible for these fees, as they will be paid by Dunn Warren as part of your management fee. Expenses of a fund will not be included in management fees, as they are deducted from the value of the shares by the mutual fund manager. For complete discussion of expenses related to each mutual fund, you should read a copy of the prospectus issued by that fund. DW can provide or direct you to a copy of the prospectus for any fund that we recommend to you.

For Qualified Retirement Plan accounts, Third Party Administrators may provide various administrative services. These are separate and distinct from our Advisory Fees and the Custodian's fees if applicable.

Fees charged to pooled investment vehicles are as described in the vehicle's respective private placement memorandum. The fund's general partner, in conjunction with Dunn Warren, may modify or waive the fee arrangement for a given limited partner. Please see the fund's private placement memorandum for specific details.

Please make sure to read Item 12 of this informational brochure, where we discuss broker-dealer and custodial issues.

D. *Pro-rata* Fees

If you become a client during a quarter, you will pay a management fee for the number of days left in that quarter. If you terminate our relationship during a quarter, you will be entitled to a refund of any paid, but unearned management fees for the remainder of the quarter. Once your notice of termination is received, we will refund the unearned fees to you in whatever way you direct (check, wire back to your account). However, given that Dunn Warren charges fees in arrears, it is likely that the terminating client will owe the firm for the period of the quarter during which the client was a client. In that case, the amount due will be debited from the client's account or invoiced, depending on what method of fee payment has been the case with the client prior to termination.

E. Compensation for the Sale of Securities.

This item is not applicable.

Item 6: Performance-Based Fees

We accept performance-based fees, and the same people who manage the performance-based fee accounts also offer services for a fixed or hourly fee, or an asset-based fee. Those associated people may have an incentive to favor accounts that receive a performance-based fee or to invest in more risky investments in an effort to increase remuneration. To mitigate that risk, we monitor the trading activity in performance-based accounts and strive to treat clients equitably. Clients selecting performance-based must be a qualified purchaser, which is defined as a client who has at least \$1,000,000 under management with Dunn Warren immediately after entering into the contract, or the client must have a net worth of more than \$2,000,000.

Item 7: Types of Clients

We typically work with individuals, investment companies, pension and profit sharing plans, trusts, estates, charities, corporations, other business entities and other investment advisory firms.

The minimum account balance for one account is \$50,000. For an additional account, the two accounts need to add up to \$65,000. For three accounts, the balance must add up to \$80,000. This means that each additional account adds \$15,000 to the total of assets required. These balances are for households, or 2 clients residing at the same address (i.e. husband and wife). For example the wife might have an account worth \$40,000 and the husband has an account worth \$25,000. This would meet the \$65,000 requirement for two accounts per household.

Below is a schedule of accounts and the balances required:

Dollar Value	Number of Accounts in Household
\$50,000	1 Account
\$65,000	2 Accounts
\$80,000	3 Accounts
\$95,000	4 Accounts
\$110,000	5 Accounts

Item 8: **Methods of Analysis, Investment Strategies and Risk of Loss**

It is important for you to know and remember that all investments carry risks. **Investing in securities involves risk of loss that clients should be prepared to bear.**

We manage our portfolios by acting on the current market environment for risk, valuation, economic growth, investor sentiment and relative strength. The investment decision is based on a monthly review of the portfolio unless global and or portfolio specific events require more frequent review.

INVESTMENT STRATEGIES

In addition to traditional asset management, DW also designs, implements and monitors various model strategies. Many DW clients have assets managed using one or more of these strategies, some of which are exclusive to Dunn Warren and some of which are accessed through other parties. We believe that successful investing comes from correctly assessing and acting on risk, not by attempting to predict the future course of the market. Incorrectly assessing risk potentially leads to a painful loss of money. Following is a description of our strategies:

Analyst Upgrades

The Analyst Upgrades Folio was developed for investors seeking high capital appreciation potential with higher volatility and asset turnover. The Analyst Upgrades strategy is based on the Zacks.com research. Since higher returns come with higher risk, investors in this portfolio must be able to accept higher than average short-term price fluctuations in order to seek above average returns. Due to this possible short-term volatility, capital appreciation with a longer-term focus is the primary objective of this portfolio. The Analyst Upgrades Folio is comprised of stocks that have had the greatest improvement in analyst ratings over the past month, as reported by Zacks.com, an investment research company. If a company has multiple ratings improvements, it may signify potential opportunities for capital appreciation. Markets and economic conditions can change quickly and well liked companies can quickly go out of favor. Because of the nature of the strategy (stocks with improvements, as opposed to strictly a value interpretation, combined with the low number of holdings (approximately 30) this strategy may have significant turnover.

Analyst Momentum

The Analyst Anomaly Strategy was developed for investors seeking the potential for higher than market returns through the use of a concentrated portfolio of analyst recommended equities. The Analyst Momentum strategy is based on the Zacks Analyst Anomaly Folio available through Foliofn. Since higher returns come with higher risk, investors in this portfolio must be able to accept higher than average short-term price fluctuations in order to seek above average returns. Due to this possible short-term volatility, capital appreciation with a longer-term focus is the primary objective of this portfolio. The Zacks Analyst Anomaly Folio — created and maintained by Zacks Investment Research — focuses on the Analyst anomaly which indicates that despite being publicly available information, analyst recommendations and earnings forecasts can be used to predict future stock prices. Like the Analyst Upgrades strategy, this strategy is expected to have high turnover rates.

Earnings Momentum Strategy

The Earnings Momentum strategy is appropriate for those investors that have a long-term time horizon and are willing to accept a high degree of volatility. We strive to reach our goal by investing in those stocks that exhibit earnings growth above the industry average. The portfolio consists of up

to 25 equities meet specific criteria which Dunn Warren believes are indicators of future value. These include earnings growth, earnings estimate revisions, and other factors. We will “hedge” or reduce market exposure when the reward presented by the market is unfavorable based on the risk seen in the valuation and the economic growth in the economy. This does not mean the potential for loss is limited, merely that Dunn Warren attempts to mitigate potential losses through risk management.

Equity Income

The goal of the Equity Income is for current income, which means taxable income. The investments are in stocks that can increase or decrease with the overall stock market and therefore investors should have at least a three-to-five year investment horizon. The portfolio seeks to provide above-average income by investing in up to 20 stocks that have dividend yields that exceed the stock market average. We will also attempt to limit risk by keeping any one industry or sector to 20% of the total portfolio. We will “hedge” or reduce market exposure when the reward presented by the market is unfavorable based on the risk seen in the valuation and the economic growth in the economy. This does not mean the potential for loss is limited, merely that Dunn Warren attempts to mitigate potential losses through risk management.

Focused Strength

The objective of the strategy is to provide consistent intermediate-term to long-term growth while limiting drawdowns in both depth and duration. We seek to achieve these results by consistently executing a rules-based investing system developed through quantitative research conducted by Dunn Warren. The strategy is focused on only 1-2 broad market sectors at a time and can experience periods of higher short-term volatility. While we seek to avoid periods of extended drawdown, the strategy is expected to experience 1 year volatility similar to that of the S&P 500 index. This strategy is intended to be highly concentrated, with 100% of the portfolio in 1-2 specific exchange traded funds, so as to maximize the potential for returns based on our judgment as to the best sector opportunities. With such high concentration, the risk of a downturn is significant if our judgment as to the correct sectors is off. Due to the nature of this strategy, turnover is expected to be high, with short term holdings frequent.

Exchange Traded Funds

The goal of Exchange Traded Funds, formerly marketed as Strategic Asset Allocation, is to capture capital appreciation over a significant time horizon. We strive to reach our goal by investing in exchange traded funds (ETFs) that have the appropriate risk classification, risk/reward payoff and relative strength. We will “hedge” or reduce market exposure when the reward presented by the market is unfavorable based on the risk seen in the valuation and the economic growth in the economy. This does not mean the potential for loss is limited, merely that Dunn Warren attempts to mitigate potential losses through risk management. This strategy is expected to have very significant turnover.

Bond ETF

The Bond ETF Folio was developed for investors seeking income and conservative long term capital preservation. It is not developed by or run by Dunn Warren. It is a choice of strategy available to Dunn Warren and its clients through Foliofn. The Bond ETF Folio consists of ETFs that invest in a range of fixed income securities. This Folio provides the opportunity to invest in a diversified pool of fixed

income investments that are expected to be less volatile than an investment in a single bond category. Fixed income securities can provide a source of income and also serve as a hedge against market downturns.

MaxBalanced

The MaxBalanced strategy is designed to provide an approach similar to that of many university endowments, which strive to achieve returns but must also ensure risk is mitigated so the fundamental purposes of the endowment are not substantially at risk. For an individual investor, Dunn Warren believes this approach can lead to attractive returns with less volatility than some of our other strategies. MaxBalanced was initiated by Capstone Investment Financial Group, Inc., which Dunn Warren purchased in 2014, and we have continued operating the strategy as intended. The operating premise of this strategy involves both diversification and tactical allocation; thus the term “balanced”. The MaxBalancedSM strategy may invest in domestic stocks — small, medium, large; international stocks — developed or emerging; US bonds, including TIPS; non-US bonds; currencies; real estate; natural resources and commodities, as well as absolute return strategies. Besides stocks and bonds, we will invest in Exchange Traded Funds and Mutual Funds that meet these criteria. *Please see below for discussion of risks associated with continuing the strategy of a previous firm.*

CIFG MaxBalanced Sustainable

This strategy is designed to provide a socially responsible approach to investing, while including in its goals the potential for attractive returns. The portfolio is designed to invest in companies that are pursuing a sustainable social and environmental strategy. The CIFG MaxBalanced Sustainable was initiated by Capstone Investment Financial Group, Inc., which Dunn Warren purchased in 2014, and we have continued operating the strategy as intended. This strategy, as the MaxBalanced strategy, combines both diversification and tactical allocation as its guiding principles, but adds the component of sustainable social and environmental goals. Accordingly, preference will be given to inclusion in the portfolio of investments that support good environmental impact, social impact, and good corporate government, all within the lens of good return on investment. It is our belief that companies who excel in this thinking will also excel long term as investments.

Please note: Not all of the above strategies may be available at all custodians whom Dunn Warren Investment Advisors, LLC recommends. Clients should be aware that the choice of a specific custodian may affect their access to certain strategies.

POOLED INVESTMENT VEHICLE

Each pooled investment vehicle will be managed according to the stated investment program in the fund’s private placement memorandum. Individual partners in a fund will not receive individual asset management within the fund. For details regarding the investment program, client should refer to their fund’s private placement memorandum.

Other Important Information about our Strategies and their Risks

In some strategies, we have established a policy to allocate at least 15%, 30%, 45%, and 70% respectively, to fixed income investments. This is intended to offer the potential for current income to investors. If interest rates were to rise, this allocation should, over time, lead to larger income distributions but could also lead to a loss of investment capital. This loss results from the unalterable inverse relationship that exists between the price of fixed income investments and current interest

rates. Seeking to reduce the risk of loss while increasing possible income, we will consider investments for these fixed income allocations based solely upon certain quantifiable characteristics rather than requiring they be solely bonds. Specifically, we will consider any exchange traded fund with a risk score (using our risk score) no more than 1.5 times the risk score of the ETF we use as the bond benchmark. We believe that this will allow investments in preferred stocks, utilities, some health care sectors, and other investment options to be included in the income portion of the ETF portfolios.

The Advisor retains full discretion to add, subtract, or revise the factors utilized, the weightings and the processes applied to construct the portfolio, as well as discretion to determine the market capitalization of securities for purchase by the strategy.

Some strategies will invest in leveraged investments. The more a fund invests in leveraged investments, the more the leverage will magnify any gains or losses on those investments.

Some Programs may also invest in "short" or "inverse" investments which are designed to profit from declining securities prices, which involve certain risks that may include increased volatility due to the funds possible use of short sales of securities and derivatives such as options and futures.

IMPORTANT RISKS

There are always risks to investing. **Clients should be aware that all investments carry various types of risk including the potential loss of principal that clients should be prepared to bear.** It is impossible to name all possible types of risks. Among the risks are the following:

- **Political Risks.** Most investments have a global component, even domestic stocks. Political events anywhere in the world may have unforeseen consequences to markets around the world.
- **General Market Risks.** Markets can, as a whole, go up or down on various news releases or for no understandable reason at all. This sometimes means that the price of specific securities could go up or down without real reason, and may take some time to recover any lost value. Adding additional securities does not help to minimize this risk since all securities may be affected by market fluctuations.
- **Currency Risk.** When investing in another country using another currency, the changes in the value of the currency can change the value of your security value in your portfolio.
- **Regulatory Risk.** Changes in laws and regulations from any government can change the value of a given company and its accompanying securities. Certain industries are more susceptible to government regulation. Changes in zoning, tax structure or laws impact the return on these investments.
- **Tax Risks Related to Short Term Trading:** Clients should note that DW may engage in short-term trading transactions. These transactions may result in short term gains or losses for federal and state tax purposes, which may be taxed at a higher rate than long term strategies. DW endeavors to invest client assets in a tax efficient manner, but all clients are advised to consult with their tax professionals regarding the transactions in client accounts.
- **Purchasing Power Risk.** Purchasing power risk is the risk that your investment's value will decline as the price of goods rises (inflation). The investment's value itself does not decline, but its relative value does, which is the same thing. Inflation can happen for a variety of complex reasons, including a growing economy and a rising money supply.
- **Business Risk.** This can be thought of as certainty or uncertainty of income. Management comes under business risk. Cyclical companies (like automobile companies) have more business risk because of the less steady income stream. On the other hand, fast food chains tend to have steadier income

streams and therefore, less business risk.

- **Financial Risk.** The amount of debt or leverage determines the financial risk of a company.
- **Risks specific to sub-advisors and other managers.** If we invest some of your assets with another advisor, including a private placement, there are additional risks. These include risks that the other manager is not as qualified as we believe them to be, that the investments they use are not as liquid as we would normally use in your portfolio, or that their risk management guidelines are more liberal than we would normally employ.
- **Default Risk.** This risk pertains to the ability of a company to service their debt. Ratings provided by several rating services help to identify those companies with more risk. Obligations of the U.S. government are said to be free of default risk.
- **Margin Risk.** “Margin” is a tool used to maximize returns on a given investment by using securities in a client account as collateral for a loan from the custodian to the client. The proceeds of that loan are then used to buy more securities. In a positive result, the additional securities provide additional return on the same initial investment. In a negative result, the additional securities provide additional losses. Margin therefore carries a higher degree of risk than investing without margin. Any client account that will use margin will do so in accordance with Regulation T. DW may utilize margin on a limited basis for clients with higher risk tolerances.
- **Short Sales.** “Short sales” are a way to implement a trade in a security DW feels is overvalued. In a “long” trade, the investor is hoping the security increases in price. Thus in a long trade, the amount of the investor’s loss (without margin) is the amount paid for the security. In a short sale, the investor is hoping the security decreases in price. However, unlike a long trade where the price of the security can only go from the purchase price to zero, in a short sale, the price of the security can go infinitely upwards. Thus in a short sale, the potential for loss is unlimited and unknown, where the potential for loss in a long trade is limited and knowable. DW utilizes short sales only when the client’s risk tolerances permit.
- **Information Risk.** All investment professionals rely on research in order to make conclusions about investment options. This research is always a mix of both internal (proprietary) and external (provided by third parties) data and analyses. Even an adviser who says they rely solely on proprietary research must still collect data from third parties. This data, or outside research is chosen for its perceived reliability, but there is no guarantee that the data or research will be completely accurate. Failure in data accuracy or research will translate to a compromised ability by the adviser to reach satisfactory investment conclusions. This risk is especially important for DW, due to our reliance on Zacks for information.
- **Small Companies.** Some investment opportunities in the marketplace involve smaller issuers. These companies may be starting up, or are historically small. While these companies sometimes have potential for outsized returns, they also have the potential for losses because the reasons the company is small are also risks to the company’s future. For example, a company’s management may lack experience, or the company’s capital for growth may be restricted. These small companies also tend to trade less frequently than larger companies, which can add to the risks associated with their securities because the ability to sell them at an appropriate price may be limited compared to the markets as a whole. Not only do these companies have investment risk, if a client is invested in such small companies and requests immediate or short term liquidity, these securities may require a significant discount to value in order to be sold in a shorter time frame.
- **Concentration Risk.** While DW selects individual securities, including mutual funds, for client

portfolios based on an individualized assessment of each security, this evaluation comes without an overlay of general economic or sector specific issue analysis. This means that a client's equity portfolio may be concentrated in a specific sector, geography, or sub-sector (among other types of potential concentrations), so that if an unexpected event occurs that affects that specific sector or geography, for example, the client's equity portfolio may be affected negatively, including significant losses.

- **Transition risk.** As assets are transitioned from a client's prior advisers to DW there may be securities and other investments that do not fit within the asset allocation strategy selected for the client. Accordingly, these investments will need to be sold in order to reposition the portfolio into the asset allocation strategy selected by DW. However, this transition process may take some time to accomplish. Some investments may not be unwound for a lengthy period of time for a variety of reasons that may include unwarranted low share prices, restrictions on trading, contractual restrictions on liquidity, or market-related liquidity concerns. In some cases, there may be securities or investments that are never able to be sold. The inability to transition a client's holdings into recommendations of DW may adversely affect the client's account values, as DW's recommendations may not be able to be fully implemented.

- **Strategy Risk.** When investments are made through a strategy, rather than individualized investment considerations, there is always the possibility that individualized investment choices would have produced a more positive result for a client than an approach where investments are made for a group of individuals with common characteristics.

- **Restriction Risk.** Clients may at all times place reasonable restrictions on the management of their accounts. However, placing these restrictions may make managing the accounts more difficult, thus lowering the potential for returns.

- **Risks Related to Investment Term & Liquidity.** Securities do not follow a straight line up in value. All securities will have periods of time when the current price of the security is not an accurate measure of its value. If you require us to liquidate your portfolio during one of these periods, you will not realize as much value as you would have had the investment had the opportunity to regain its value. Further, some investments are made with the intention of the investment appreciating over an extended period of time. Liquidating these investments prior to their intended time horizon may result in losses.

- **REITs:** Dunn Warren may recommend that significant portions of client portfolios be allocated to real estate investment trusts, otherwise known as "REITs". A REIT is an entity, typically a trust or corporation, that accepts investments from a number of investors, pools the money, and then uses that money to invest in real estate through either actual property purchases or mortgage loans. While there are some benefits to owning REITs, which include potential tax benefits, income and the relatively low barrier to invest in real estate as compared to directly investing in real estate, REITs also have some increased risks as compared to more traditional investments such as stocks, bonds, and mutual funds. First, real estate investing can be highly volatile. Second, the specific REIT chosen may have a focus such as commercial real estate or real estate in a given location. Such investment focus can be beneficial if the properties are successful, but lose significant principal if the properties are not successful. REITs may also employ significant leverage for the purpose of purchasing more investments with fewer investment dollars, which can enhance returns but also enhances the risk of loss. The success of a REIT is highly dependent upon the manager of the REIT. Clients should ensure they understand the role of the REIT in their portfolio.

- **MLPs:** Dunn Warren may recommend that significant portions of client portfolios be allocated to master limited partnerships, otherwise known as "MLPs". An MLP is a publicly traded entity that is

designed to provide tax benefits for the investor. In order to preserve these benefits, the MLP must derive most, if not all, of its income from real estate, natural resources and commodities. While MLPs may add diversification and tax favored treatment to a client's portfolio, they also carry significant risks beyond more traditional investments such as stocks, bonds and mutual funds. One such risk is management risk-the success of the MLP is dependent upon the manager's experience and judgment in selecting investments for the MLP. Another risk is the governance structure, which means the rules under which the entity is run. The investors are the limited partners of the MLP, with an affiliate of the manager typically the general partner. This means the manager has all of the control in running the entity, as opposed to an equity investment where shareholders vote on such matters as board composition. There is also a significant amount of risk with the underlying real estate, resources or commodities investments. Clients should ask Dunn Warren any questions regarding the role of MLPs in their portfolio.

TRADE REQUEST POLICY

We have a 10 a.m. MST (12 p.m. EST) cut-off for instructions received from clients. This is specifically for instructions requiring liquidations, withdrawals, and account closures. If we have the paperwork before 10 a.m., we will trade and process the instructions that day. For paperwork to be processed, it must be complete. We require signed instructions from you to instruct us to sell out of the market. For any liquidation and withdrawal instructions received after 10 a.m., we have until the next business day to process the request.

Item 9: Disciplinary Information

There are no disciplinary items to report.

Item 10: Other Financial Industry Activities and Affiliations

A. Broker-dealer

This item is not applicable.

B. Futures Commission Merchant/Commodity Trading Advisor

Neither the principals of DW, nor any related persons are registered, or have an application pending to register, as a futures commission merchant, commodity pool operator, a commodity trading advisor, or an associated person of the foregoing entities.

C. Relationship with Related Persons

James Cornehlson, Managing Director, is also an investment advisor representative and minority

owner of Capstone Investment Financial Group, Inc. (“Capstone”). DW has recently completed the acquisition of Capstone, and clients who choose to will be transitioning to DW in the first quarter of 2015.

Mr. Cornehlson also owns operates a company called AUM in a Box. AUM in a Box is designed to provide four services to financial advisors to help grow their business. Those services include Internet Marketing, Coaching, Sales Consulting, and offer back office solutions to Financial Advisors.

Mr. Cornehlson is also the owner of Fitter Financials, a company that provides bookkeeping services to enable business owners to tell a story using their financials and make the best decisions to grow their business. Receipt of fees through his ownership of Fitter Financials gives rise to a conflict of interest for Mr. Cornehlson, in that in the event he recommends that a client who owns a small business (or a client that is a small business) utilize the services of Fitter Financials, Mr Cornehlson would be both the recommending party as well as the recipient of that recommendation. Mr. Cornehlson therefore has a financial incentive to recommend that clients utilize the services of Fitter Financials. This conflict is disclosed to clients verbally and in this brochure. Dunn Warren attempts to mitigate this conflict by requiring employees to acknowledge their fiduciary responsibility toward each client.

D. Recommendations of other Advisers

This item is not applicable, as Dunn Warren does not recommend other advisors in exchange for a fee of any kind.

Item 11: Code of Ethics, Participation or Interest in Client Transactions and Personal Trading

A. A copy of our Code of Ethics is available upon request. Our Code of Ethics includes discussions of our fiduciary duty to clients, political contributions, gifts, entertainment, and trading guidelines.

B. Not applicable. DW does not recommend to clients that they invest in any security in which DW or any principal thereof has any financial interest.

C. On occasion, an employee of DW may purchase for his or her own account securities which are also recommended for clients. Our Code of Ethics details rules for employees regarding personal trading and avoiding conflicts of interest related to trading in one’s own account. To avoid placing a trade before a client (in the case of a purchase) or after a client (in the case of a sale), all employee trades must be reviewed by the Compliance Officer. All employee trades must either take place in the same block as a client trade or sufficiently apart in time from the client trade so the employee receives no added benefit. Employee statements are reviewed to confirm compliance with the trading procedures.

D. On occasion, an employee of DW may purchase for his or her own account securities which are also recommended for clients at the same time the clients purchase the securities. Our Code of Ethics details rules for employees regarding personal trading and avoiding conflicts of interest related to trading in one's own account. To avoid placing a trade before a client (in the case of a purchase) or after a client (in the case of a sale), all employee trades must be reviewed by the Compliance Officer. All employee trades must either take place in the same block as a client trade or sufficiently apart in time from the client trade so the employee receives no added benefit. Employee statements are reviewed to confirm compliance with the trading procedures.

Item 12: Brokerage Practices

A. Recommendation of Broker-Dealer

DW recommends that investment accounts be held in custody by *FolioFN* or Our solicitors who may have affiliations with broker/dealers, who in turn may require solicitors to direct accounts to a particular custodian. We do not have an incentive to select or recommend these other custodians in that these custodians are typically more difficult for us to work with. Envestnet Asset Management, Inc. ("Envestnet") provides a platform for us to offer the investment program that we have created. Envestnet provides numerous back office administrative services to us. Because of our relationship with Envestnet, we are able to create, sponsor, and distribute our programs more efficiently. Because of these efficiencies, we recommend Envestnet as a custodial platform to solicitors who are interested in offering our services to clients. Envestnet, TD Ameritrade, Inc. and *FolioFN* are wholly independent from DW. It is expected that most, if not all, transactions in a given client account will be cleared through the custodian of that account in its capacity as a broker-dealer.

DW recommends broker-dealers to its clients based on a variety of factors. These include, but are not limited to, commission costs. However, in choosing a broker-dealer or custodian to recommend, we are most concerned with the value the client receives for the cost paid, not just the cost. Each of our recommended custodians adds value beyond commission cost. Other factors that may be considered in determining overall value include speed and accuracy of execution, financial strength, knowledge and experience of staff, research and service.

DW places trades for its client accounts subject to its duty to seek best execution and its other fiduciary duties. DW may use broker-dealers other than those recommended to execute trades for client accounts maintained at recommended broker-dealers, but this practice may result in additional costs to clients so that DW is more likely to place trades through recommended broker-dealers rather than other broker-dealers. DW re-evaluates the use of its recommended broker-dealers at least annually to determine if they are still the best value for our clients.

Recommended broker-dealers may provide us with some non-cash benefits (not available to retail customers) in return for placing client assets with them or executing trades through them. Such non-cash benefits are referred to as "soft dollars". Currently, these benefits come in the form of investment

research and sponsored attendance at various investment seminars. We may also receive such items as investment software, books and research reports. These products, services, or educational seminars are items that will play a role in determining how to invest client accounts. If there is any item that has a multi-use aspect, mixed between investment and non-investment purposes, DW will determine a reasonable allocation of investment to non-investment use and soft dollars will be allocated only to the investment portion of the product (and we will pay the remaining cost). DW receives a benefit from these services, as otherwise we would be compiling the same research ourselves. This may cause us, or another adviser, to want to place more client accounts with a broker-dealer/custodian solely because of these added benefits. However, the value to all of our clients of these benefits is included in our evaluation of custodians. Products and services received via soft dollars will generally be used for the benefit of all clients. However, it is possible that a given client's trades will generate soft dollars that acquire products and/or services that are not ultimately utilized for that same client's account. Soft dollars provide additional value, and are accordingly considered in determining which broker-dealer or custodian to utilize as part of our best execution analysis.

We do not consider whether any broker-dealer/custodian, refers clients to DW as part of our evaluation of these broker-dealers.

Pooled Investment Vehicle

Rocky Mountain Capital Fund has contracted with Mortgage Buyer, Inc. to provide research on the privately sourced debt instruments. Mortgage Buyers, Inc. was chosen based on a variety of factors, including but not limited to, commission costs. Other factors that may be considered in determining overall value include speed and accuracy of execution, knowledge and experience of staff, research and service. We periodically review the performance and cost of all of our broker-dealers to ensure that clients are receiving best execution.

B. Aggregating Trades

Commission costs per client may be lower on a particular trade if all clients in whose accounts the trade is to be made are executed at the same time. This is called aggregating trades. For clients not working with DW through the wrap program, DW may place trades for the same security needed in multiple accounts by executing one trade, and then allocate the trades to each account after execution. If an aggregate trade is not fully executed, the securities will be allocated to client accounts on a *pro rata* basis, except where doing so would create an unintended adverse consequence (For example, if a *pro rata* division would result in a client receiving a fraction of a share, or a position in the account of less than 1%.)

Item 13: Review of Accounts

All accounts will be reviewed by a senior professional on at least a quarterly basis. However, it is expected that market conditions, changes in a particular client's account, or changes to a client's circumstances will trigger a review of accounts.

The annual report in writing provided by DW is intended to review asset allocation. All clients will

receive statements and confirmations of trades directly from their custodian. Please refer to Item 15 regarding Custody.

Item 14: Client Referrals and Other Compensation

A. Economic Benefit Provided by Third Parties for Advice Rendered to Client.

Please refer to Item 12, where we discuss recommendation of Broker-Dealers.

B. Compensation to Non-Advisory Personnel for Client Referrals.

DW may compensate firms or people who refer us clients. Through these arrangements, we pay a cash referral fee to the Solicitor based on a percentage of our advisory fee. This fee is paid based on a written agreement. The specific information about the referral is disclosed prior to or at the time you enter into an investment advisory agreement.

Solicitors may be acting in the capacity as wholesalers of our investment advisory services to other potential Solicitors.

In certain instances, we may compensate a Solicitor for other products and/or services that the Solicitor has provided us. These products and services may include but are not limited to office rent, assistance with marketing, coaching programs, facilities usage, administrative and day-to-day expenses, personnel, and equipment. In cases such as this, the Solicitor may have a conflict of interest when referring clients to us in that he may receive additional compensation that may influence his decision to recommend us. Clients who are referred to us by Solicitors with such arrangements do not pay higher fees than those who are referred to us by other Solicitors or those who contract with us directly.

Item 15: Custody

DW deducts fees from client accounts, but would not have custody of client funds otherwise. Clients will receive statements directly from their Custodian, and copies of all trade confirmations directly from the Custodian.

Clients whose fees are directly debited will provide written authorization to debit advisory fees from their accounts held by a qualified custodian chosen by the client. Each quarter, clients will receive a bill itemizing the fees to be debited, including the formula used to calculate the fee, the amount of assets the fee is based, and the time period covered by the fee. The invoice will also state that the fee was not independently calculated by the custodian. The client will also receive a statement from their account custodian showing all transactions in their account, including the fee.

We encourage clients to carefully review the statements and confirmations sent to them by their custodian, and to compare the information on your quarterly report prepared by DW against the information in the statements provided directly from your Custodian. Please alert us of any

discrepancies.

Item 16: Investment Discretion

When DW is engaged to provide asset management services on a discretionary basis, we will monitor your accounts to ensure that they are meeting your asset allocation requirements. If any changes are needed to your investments, we will make the changes. These changes may involve selling a security or group of investments and buying others or keeping the proceeds in cash. You may at any time place restrictions on the types of investments we may use on your behalf, or on the allocations to each security type. You may receive at your request written or electronic confirmations from your account custodian after any changes are made to your account. You will also receive monthly statements from your account custodian. Clients engaging us on a discretionary basis will be asked to execute a Limited Power of Attorney (granting us the discretionary authority over the client accounts) as well as an Investment Management Agreement that outlines the responsibilities of both the client and DW.

Item 17: Voting Client Securities

Copies of our Proxy Voting Policies are available upon request.

From time to time, shareholders of stocks, mutual funds, exchange traded funds or other securities may be permitted to vote on various types of corporate actions. Examples of these actions include mergers, tender offers, or board elections. Clients are required to vote proxies related to their investments, or to choose not to vote their proxies. DW will not accept authority to vote client securities. Clients will receive their proxies directly from the custodian for the client account. DW will not give clients advice on how to vote proxies.

Item 18: Financial Information

DW does not require the prepayment of fees more than six (6) months or more in advance and therefore has not provided a balance sheet with this brochure.

There are no material financial circumstances or conditions that would reasonably be expected to impair our ability to meet our contractual obligations to our clients.

Item 5: Account Requirement and Type of Clients	viii
Item 6: Portfolio Manager Selection and Evaluation.....	viii
Item 7: Client Information provided to Portfolio Managers	ix
Item 8: Client Contact with Portfolio Managers.....	ix
Item 9: Additional Information.....	ix

Item 4: Services, Fees, and Compensation

The Dunn Warren Wrap Program (the “Program”) is a wrap fee program sponsored by Dunn Warren Investment Advisors, LLC (DW) which has been in business since 2005. James Cornehlson and Elizabeth Cornehlson are the firm’s only principal owners.

DW provides personalized investment management services. We typically work with individuals, investment companies, pension and profit sharing plans, trusts, estates, charities, corporations, other business entities and other investment advisory firms.

A. Description of the Program

Asset Management

DW requires each client to place at least \$50,000 with the firm. This minimum may be waived in the discretion of DW. All clients participating in the Wrap Program must have the assets managed through the Wrap Program held in custody with TD Ameritrade Institutional, a division of TD Ameritrade Inc., member FINRA/SIPC or with FolioFN.

We believe that successful investing comes from correctly assessing and acting on risk, not by attempting to predict the future course of the market. Incorrectly assessing risk potentially leads to a painful loss of money. In addition to traditional asset management, DW also designs, implements and monitors various model strategies. Many DW clients have assets managed using one or more of these proprietary models. The models are more fully discussed in Item 8 of the Informational Brochure.

We manage our portfolios by acting on the current market environment for risk, valuation, economic growth, investor sentiment, and relative strength. Our investment decisions are based on a monthly review of the portfolio unless global and/or portfolio specific events require a more frequent review. We tailor our investment advice to your needs based on a financial profile you complete at the onset of our relationship.

In certain limited circumstances, and in the discretion of the firm, a client may engage the firm to provide investment management services on a non-discretionary basis. This means the firm monitors the accounts in the same way as for discretionary services. The difference is that changes to your account will not be made until we have confirmed with you (either verbally or in writing) that our proposed change is acceptable to you.

As of the date of this brochure, DW has \$30,914,525 in assets under management in 742 accounts. Of this total, all accounts are managed on a discretionary basis.

Fees and Compensation

Fees Charged

All clients will be required to execute a written agreement that will describe the type of services to be provided and the fees, among other items.

Our Wrap Fees

DW offers a number of different options to clients for charging fees. Clients may choose to pay fees based on the value of their assets under management, choose a fee based on the performance of their accounts, or a combination of the two. Clients selecting performance-based must be a qualified purchaser, which is defined as a client who has at least \$1,000,000 under management with Dunn Warren immediately after entering into the contract, or the client must have a net worth of more than \$2,000,000.

Generally, fees vary from 0.00% to 2.00% per annum of the market value of a client's assets managed by DW. The fee range stated is a guide. Fees are negotiable, and may be higher or lower than this range, based on the nature of the account. Factors affecting fee percentages include the size of the account, complexity of asset structures, and other factors.

For clients that are qualified, DW offers a 20% performance fees based on annual new capital appreciation in the Client's account. There are no retainers of flat fees associated with this fee option. The last fee option provided to clients who are qualified is a combination of the asset based fees and the performance based fee. The fee is typically 1.10% of assets managed and a 10% performance fee based on annual new capital appreciation. For either performance based fee option, capital appreciation in the Client's account is based upon a high watermark. Meaning that if your account goes from \$900,000 to \$1,000,000 in the first year, but is down to \$950,000 in the second, you do not pay a performance based fee until your account exceeds its highest year-end value. In the example given above, that is \$1,000,000.

Because our wrap fees are not tied to an account's frequency of trading and apply generally to all assets in the account, this fee arrangement is not appropriate for all accounts. For example, a wrap fee arrangement would not be appropriate for an account that holds primarily cash and cash equivalents, fixed income securities or no-transaction-fee mutual funds for a substantial period of time.

Investment advisory fees will be debited directly from each client's account. The advisory fee is paid either annually or quarterly, in arrears, and the value used for the fee calculation is the daily average balance of the portfolio for the previous quarter of year. In some cases, the fees are based on the balance of the account as of the end of the previous quarter or year. The annual payment of fees is only available for performance fee based accounts. This means that if your annual fee is 1.00%, then each quarter we take the sum of each day's balance and then divide by the number of the days in the period to calculate our fee. Once the calculation is made, we will instruct your account custodian to deduct the fee from your account and remit it to DW.

Clients whose fees are directly debited will provide written authorization to debit advisory fees from their accounts held by a qualified custodian chosen by the client. Each quarter, clients will receive a bill itemizing the fees to be debited, including the formula used to calculate the fee, the amount of assets upon which the fee is based, and the time period covered by the fee. The invoice will also state that the fee was not independently calculated by the custodian. The client will also receive a statement from their account custodian showing all transactions in their account, including the fee.

Other Information about Advisory Fees

Clients may pay margin fees, IRA fees, or other fees not considered trading or custodial fees.

Associated persons may buy or sell for their own accounts the same securities recommended to you. Associated persons seek to ensure that they do not personally benefit from the short-term market effects of their recommendations to you and we monitor their personal trading.

Associated persons are aware of the rules regarding material non-public information and insider trading. Associated persons may also buy or sell a specific security for their own account based on personal investment considerations, which the Advisor does not deem appropriate to buy or sell for clients.

We have adopted a Code of Ethics to instruct its personnel in their ethical obligations and to provide rules for their personal securities transactions. The Firm and our personnel owe a duty of loyalty, fairness and good faith to their clients, and the obligation to adhere not only to the specific provisions of the code but also to the general principles that guide the Code. The Code covers a range of topics including general ethical principles, reporting personal securities trading, exceptions to reporting securities trading, reportable securities, initial public offerings and private placements, reporting ethical violations, distribution of the Code, review and enforcement processes, amendments to Form ADV and supervisory procedures. We will provide a copy of the Code to any client or prospective Client upon request.

Item 5: Account Requirement and Type of Clients

We typically work with individuals, investment companies, pension and profit sharing plans, trusts, estates, charities, corporations, other business entities and other investment advisory firms.

The minimum account balance for one account is \$50,000. For an additional account, the two accounts need to add up to \$65,000. For three accounts, the balance must add up to \$80,000. This means that each additional account adds \$15,000 to the total of assets required. These balances are for households, or 2 clients residing at the same address (i.e. husband and wife). For example the wife might have an account worth \$40,000 and the husband has an account worth \$25,000. This would meet the \$65,000 requirement for two accounts per household.

Below is a schedule of accounts and the balances required:

Dollar Value	Number of Accounts in Household
\$50,000	1 Account
\$65,000	2 Accounts
\$80,000	3 Accounts
\$95,000	4 Accounts
\$110,000	5 Accounts

Item 6: Portfolio Manager Selection and Evaluation

The wrap fee program offered by DW is sponsored by the firm, and DW is the only portfolio manager. The only fees covered under the wrap fee program are transaction fees associated with the purchase and sale of securities in an account managed by DW. All client accounts managed by DW, including wrap fee program clients, are managed

with similar processes, although account recommendations may differ.

Item 7: Client Information provided to Portfolio Managers

Please see response to Item 6, above

Item 8: Client Contact with Portfolio Managers

Clients may contact DW, the only portfolio manager, at any time.

Item 9: Additional Information

Disciplinary Information

Neither the firm nor any of its employees or principals has any disciplinary information to report

Other Financial Industry Activities and Affiliations

Broker-dealer

This item is not applicable.

Futures Commission Merchant/Commodity Trading Advisor

Neither members of management, nor any related persons are registered, or have an application pending to register, as a futures commission merchant, commodity pool operator, a commodity trading advisor, or an associated person of the foregoing entities.

Relationship with Related Persons

James Cornehlson, Managing Director, is also an investment advisor representative of Capstone Investment Financial Group, Inc. ("Capstone"). DW is in the process of acquiring Capstone, and clients who choose to will be transitioning to DW in the first quarter of 2015.

Mr. Cornehlson also owns operates a company called AUM in a Box. AUM in a box is designed to provide four services to financial advisors to help grow their business. Those services include Internet Marketing, Coaching, Sales Consulting, and offer back office solutions to Financial Advisors.

Mr. Cornehlson is also the owner of Fitter Financials, a company that provides bookkeeping services to enable business owners to tell a story using their financials and make the best decisions to grow their business. Receipt of fees through his ownership of Fitter Financials gives rise to a conflict of interest for Mr. Cornehlson, in that in the event he recommends that a client who owns a small business (or a client that is a small business) utilize the services of Fitter Financials, Mr Cornehlson would be both the recommending party as well as the recipient of

that recommendation. Mr. Cornehlson therefore has a financial incentive to recommend that clients utilize the services of Fitter Financials. This conflict is disclosed to clients verbally and in this brochure. Dunn Warren attempts to mitigate this conflict by requiring employees to acknowledge their fiduciary responsibility toward each client.

Recommendations of other Advisers

See response to Item 8 of the Informational Brochure regarding third-party managers.

Code of Ethics, Participation or Interest in Client Transactions and Personal Trading

- A. A copy of our Code of Ethics is available upon request. Our Code of Ethics includes discussions of our fiduciary duty to clients, political contributions, gifts, entertainment, and trading guidelines.
- B. Not applicable. DW does not recommend to clients that they invest in any security in which DW or any principal thereof has any financial interest.
- C. On occasion, an employee of DW may purchase for his or her own account securities which are also recommended for clients. Our Code of Ethics details rules for employees regarding personal trading and avoiding conflicts of interest related to trading in one's own account. To avoid placing a trade before a client (in the case of a purchase) or after a client (in the case of a sale), all employee trades are reviewed by the Compliance Officer. All employee trades must either take place in the same block as a client trade or sufficiently apart in time from the client trade so the employee receives no added benefit. Employee statements are reviewed to confirm compliance with the trading procedures.
- D. On occasion, an employee of DW may purchase for his or her own account securities which are also recommended for clients at the same time the clients purchase the securities. Our Code of Ethics details rules for employees regarding personal trading and avoiding conflicts of interest related to trading in one's own account. To avoid placing a trade before a client (in the case of a purchase) or after a client (in the case of a sale), all employee trades are reviewed by the Compliance Officer. All employee trades must either take place in the same block as a client trade or sufficiently apart in time from the client trade so the employee receives no added benefit. Employee statements are reviewed to confirm compliance with the trading procedures.

Review of Accounts

All accounts will be reviewed by a senior professional on at least a quarterly basis. However, it is expected that market conditions, changes in a particular client's account, or changes to a client's circumstances will trigger a review of accounts.

The annual report in writing provided by DW is intended to review asset allocation. All clients will receive statements and confirmations of trades directly from the client's custodian. Additionally, all clients will receive quarterly itemized bills from DW. Please refer to Item 15 of the Informational Brochure regarding Custody.

Client Referrals and Other Compensation

A. Compensation to Non-Advisory Personnel for Client Referrals.

DW may compensate firms or people who refer us clients. Through these arrangements, we pay a cash referral fee to the Solicitor based on a percentage of our advisory fee. This fee is paid based on a written agreement. The specific information about the referral is disclosed prior to or at the time you enter into an investment advisory agreement.

Solicitors may be acting in the capacity as wholesalers of our investment advisory services to other potential Solicitors.

In certain instances, we may compensate a Solicitor for other products and/or services that the Solicitor has provided us. These products and services may include but are not limited to office rent, assistance with marketing, coaching programs, facilities usage, administrative and day-to-day expenses, personnel, and equipment. In cases such as this, the Solicitor may have a conflict of interest when referring clients to us in that he may receive additional compensation that may influence his decision to recommend us. Clients who are referred to us by Solicitors with such arrangements do not pay higher fees than those who are referred to us by other Solicitors or those who contract with us directly.

Financial Information

DW does not require the prepayment of fees more than six (6) months or more in advance and therefore has not provided a balance sheet with this brochure.

There are no material financial circumstances or conditions that would reasonably be expected to impair our ability to meet our contractual obligations to our clients.

Item 2 Educational Background and Business Experience

James (Jamie) B. Cornehlson is the portfolio manager at Dunn Warren Investment Advisors, LLC. His investment industry experience is vast. From 1994 to 1996, Jamie served as an analyst with the Gartner Group working with the pension plan and 401k program. This is where he initially developed the Risk/Reward matrix. From 1996 to May 1998, Jamie worked as a financial analyst covering the software industry for Schwab SoundView Capital Markets in Greenwich, Connecticut. He then moved to Bear Sterns in New York for a year before moving to Colorado in 2000 where he joined Corboy and Jerde, an investment bank specializing in public and private equity investments.

Jamie founded Dunn Warren Investment Advisors, LLC in September 2001, providing consulting to hedge funds, mutual funds and Registered Investment Advisors. In 2005, Mr. Cornehlson made the decision to expand Dunn Warren Investment Advisors, LLC to serve individuals and other financial professionals as an Investment Adviser.

Jamie received his MBA from the William E. Simon Graduate School of Business at the University of Rochester, and his Bachelor of Arts in Economics from the University of Colorado. He studied econometrics at the University of York in England. Jamie is a CFA Charterholder and past president of the CFA Society of Colorado. The Chartered Financial Analyst (CFA) designation is an international professional certification offered by the CFA Institute (formerly AIMR) to financial analysts who complete a series of three examinations. To become a CFA Charterholder candidates must pass each of three six-hour exams, possess a bachelor's degree from an accredited institution (or have equivalent education or work experience) and have 48 months of qualified, professional work experience. CFA charterholders are also obligated to adhere

to a strict Code of Ethics and Standards governing their professional conduct.

Jamie was born on June 20, 1971.

Item 3 Disciplinary Information

James has no disciplinary history.

Item 4 Other Business Activities

James Cornehlson, Managing Director, is also an investment advisor representative and minority owner of Capstone Investment Financial Group, Inc. ("Capstone") Mr. Cornehlson spends approximately 10% of his time in this activity, through which he assists clients' with their financial plans, participates in portfolio management, and focuses on business development. This presents a conflict of interest, in that Mr. Cornehlson has a fiduciary duty to both the clients of Dunn Warren Investment Advisors, LLC and to Capstone. You should be aware of this conflict when considering whether to engage us or utilize Mr. Cornehlson to implement any investment recommendations. Dunn Warren attempts to mitigate this conflict by requiring employees to acknowledge in the firm's Code of Ethics, their individual fiduciary duty to the clients of Dunn Warren, which requires that employees put the interests of clients ahead of their own. Further, Dunn Warren has entered into a contract with Capstone that provides for the acquisition of Capstone by Dunn Warren. Accordingly, ultimately these entities will merge. Mr. Cornehlson's role at Capstone is limited, and therefore, we feel that he is equipped to meet the responsibilities of serving both clients.

~~James Cornehlson, Managing Director, is also an investment advisor representative of Capstone Investment Financial Group, Inc. Mr. Cornehlson spends approximately 40% of his time in this activity, through which he meets with and solicits individual clients, as well as engages in investment decisions. This is a conflict in that Mr. Cornehlson is a fiduciary to the clients of Dunn Warren Investment Advisors, LLC and to Capstone Investment Financial Group, Inc.~~

Mr. Cornehlson operates a company called AUM in a Box. AUM in a box is designed to provide four services to financial advisors to help grow their business. Those services include Internet Marketing, Coaching, Sales Consulting, and offer back office solutions to Financial Advisors. Mr. Cornehlson spends 9 hours per week on AUM in a Box. At this time AUM in a Box does not account for any of Mr. Cornehlson's income.

Mr. Cornehlson is also the owner of Fitter Financials, a company that provides bookkeeping services to enable business owners to tell a story using their financials and make the best decisions to grow their business. He spends 3 hours a week on Fitter Financials.

Item 5 Additional Compensation

James will not receive any additional compensation.

Item 6 Supervision

The person responsible for Supervision is Ann Zemann. She supervises Mr. Cornehlson by meeting with him regularly, and enforcing the Firm's Written Supervisory Procedures and Code of Ethics. You may contact her at (402) 502-2881 with any questions or concerns.

1999 – 2006	IAR	Commonwealth Financial Network

Theodore Schwartz holds the CFP® designation. The CERTIFIED FINANCIAL PLANNER™, CFP® and federally registered CFP (with flame design) marks (collectively, the “CFP® marks”) are professional certification marks granted in the United States by Certified Financial Planner Board of Standards, Inc. (“CFP Board”).

The CFP® certification is a voluntary certification; no federal or state law or regulation requires financial planners to hold CFP® certification. It is recognized in the United States and a number of other countries for its (1) high standard of professional education; (2) stringent code of conduct and standards of practice; and (3) ethical requirements that govern professional engagements with clients. Currently, more than 62,000 individuals have obtained CFP® certification in the United States.

To attain the right to use the CFP® marks, an individual must satisfactorily fulfill the following requirements:

- Education – Complete an advanced college-level course of study addressing the financial planning subject areas that CFP Board’s studies have determined as necessary for the competent and professional delivery of financial planning services, and attain a Bachelor’s Degree from a regionally accredited United States college or university (or its equivalent from a foreign university). CFP Board’s financial planning subject areas include insurance planning and risk management, employee benefits planning, investment planning, income tax planning, retirement planning, and estate planning.
- Examination – Pass the comprehensive CFP® Certification Examination. The examination, administered in 10 hours over a two-day period, includes case studies and client scenarios designed to test one’s ability to correctly diagnose financial planning issues and apply one’s knowledge of financial planning to real world circumstances.
- Experience – Complete at least three years of full-time financial planning-related experience (or the equivalent, measured as 2,000 hours per year).
- Ethics – Agree to be bound by CFP Board’s *Standards of Professional Conduct*, a set of documents outlining the ethical and practice standards for CFP® professionals.

Individuals who become certified must complete the following ongoing education and ethics requirements in order to maintain the right to continue to use the CFP® mark:

- Continuing Education – Complete 30 hours of continuing education hours every two years, including two hours on the *Code of Ethics* and other parts of the *Standards of Professional Conduct*, to maintain competence and keep up with developments in the financial planning field.
- Ethics – Renew an agreement to be bound by the *Standards of Professional Conduct*. The Standards prominently require that CFP® professionals provide financial planning services at a fiduciary standard of care. This means CFP® professionals must provide financial planning services in the best interests of their clients.

CFP® professionals who fail to comply with the above standards and requirements may be subject to CFP Board’s enforcement process, which could result in suspension or permanent revocation of their CFP® certification.

Item 3 Disciplinary Information

None of our supervised persons is subject to any material legal or disciplinary event.

Item 4 Other Business Activities

Please see item 9 of the Firm Brochure (attached) for more information about our Other Business Activities.
